PROCEEDINGS AND DEBATES OF THE 99th CONGRESS, SECOND SESSION

## HOUSE OF REPRESENTATIVES—*Wednesday, August 6, 1986*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Help us, O God, as we are busy with our varied tasks, never to loss sight of the beauty and glory of Your world. You have given us such great gifts and wonderful opportunities, and yet we can so easily miss the splender of Your creation. In this moment of prayer, in the midst of a busy day, we offer our thanks for good and loyal friends, for the love expressed from one person, to another, for our families and friends, and for the opportunities of living in freedom and in peace. In Your name, we pray. Amen.

### THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

### MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Secretary inform the House of Representatives that the Senate is ready to receive the managers appointed by the House for the purpose of exhibiting articles of impeachment against Harry E. Claiborne, judge of the U.S. District Court for the District of Nevada, agreeably to the notice communicated to the Senate, and that at the hour of 1 o'clock p.m. on Wednesday, August 6, 1986, notwithstanding the provisions of rule XXII, the Senate will receive the honorable managers on the part of the House of Representatives, in order that they may present and exhibit the said articles of impeachment against the said Harry E. Claiborne, judge of the U.S. District Court for the District of Nevada.

### ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair wishes to announce that the Senate message has asked the managers of the House on the impeachment proceedings to present the articles of impeachment in the Senate at 1 o'clock.

### TRIBUTE TO PAUL WILSON

(Mr. WHITTEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WHITTEN. Mr. Speaker, Paul M. Wilson, who retired as the seventh clerk and staff director of the Committee on Appropriations, died Sunday, August 3, at his home in Salisbury, MD.

Paul had been a member of the staff of the committee from 1947 until his retirement in June of 1972. Prior to joining the committee staff, he had worked in the Agriculture Department and the Puerto Rico Reconstruction Agency. In all, he served his country in a government capacity some 41 years.

I had the pleasure and privilege of knowing Paul and being aware of his contribution and dedicated work for the committee and the Congress. Appointed to the committee staff by Chairman John Taber of New York in 1947, Paul Wilson became a close aide and assistant to the two succeeding chairmen of the committee, Clarence Cannon of Missouri and my predecessor George Mahon of Texas. From 1955 until 1969, Paul served as assistant clerk and staff director and in 1969 was appointed clerk and staff director by Chairman Mahon.

Mr. Speaker, the work of the Congress is greatly enhanced by the devotion, dedication, and loyalty of our staff members. Paul Wilson was such a person. He was a dedicated and patriotic American and was a key staff member to the House of Representatives. His knowledge of budget and appropriations matters was unsurpassed. Paul's picture hangs in the main office of the committee, as do those of the other clerks and staff directors.

I extend my deepest regrets and condolences to his wife Edna and other members of the family.

### WHEN YOUR DOLLAR IS NOT WORTH MUCH, NEITHER IS YOUR GOVERNMENT

(Mr. DANNEMEYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANNEMEYER. Mr. Speaker, in 1974 the Canadian dollar was worth 93 United States cents and the Tory Party, then in opposition, had an election slogan: "When your dollar is not worth much, neither is your government." What was true for Canada in 1974, is true for the United States in 1986, for the stronger reason of greater currency depreciation. Our dollar makes new postwar lows against the Japanese yen every day, while the managers of our monetary system hold victory celebrations.

It is a great tragedy that we could not learn from the monetary disasters north and south of our border. The Canadian dollar, having fallen as low as 68 United States cents, is barely worth 70 United States cents today. The Tory Party, now in power, does not like to be reminded of its own election slogan.

But this makes the slogan only more valid, not less.

### TODAY AMERICA MUST MAKE A CHOICE

(Ms. KAPTUR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, today America must make a choice. Do we continue down the road of more lost jobs and more business failures, or do we stand up for America's textile and footwear industry and its workers?

In the last 2 years, 726 U.S. apparel manufacturers have gone out of busi-

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

ness. Since 1980, some 300,000 American workers in that industry have lost their jobs because of unfair, subsidized foreign imports and foreign markets closed to America's products.

We are talking about America's most modestly paid industrial workers who earn $5.50 an hour on average.

The textile bill we will consider today is not protectionist. The bill concedes one-half of the U.S. textile and apparel market to foreign imports. The remaining half will tie increased imports to the growth rate in our own market so we are not inundated.

Today we will hear every excuse in the book as to why we should do nothing while another vital basic American industry withers away. For those who cringe at the thought of retaliation, I ask where? The countries affected by this bill buy so few U.S. goods, there is no room for retaliation.

Mr. Speaker, let us stop finding excuses and start putting some muscle in our trade policies. It is time for America to stand up.

## SAY NO TO UNILATERAL WITHDRAWAL OF U.S. CHEMICAL WEAPONS FROM EUROPE

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, if you haven't heard, a recent chemical weapons agreement commits the United States to withdrawing all United States chemical weapons from Europe in return for German support for new binary chemical weapons never to be deployed. None of the new U.S. binary chemical weapons proposed for production would replace our deterrent in Europe. Instead, the United States could only get a commitment from the West Germans to possibly consider deployment in the midst of a European crisis.

It is ironic that the United States and West Germany are fulfulling a long-term Soviet foreign policy objective: the creation of a chemical weapons-free zone in which the West withdraws its chemical deterrent while the Soviets and their cronies keep their stockpile of deadly chemical weapons in Europe, only miles from NATO troops.

I'm certain that the Congress never intended that funding for our new binary weapons would lead to the unilateral abandonment of our chemical deterrent based in Europe.

I urge my colleagues to support the bipartisan Fascell-Porter-Roukema amendment to the DOD authorization bill calling for a 1-year delay in the production of chemical weapons and preventing the withdrawal of our European chemical deterrent.

## STOP NUCLEAR TESTING

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, a year ago today, the Soviets announced a moratorium on nuclear testing in observance of the 40th anniversary of the first use of nuclear weapons in Hiroshima. The Soviets issued an invitation to the United States to join them in that moratorium and to resume talks on a formal test ban treaty.

The American Government ignored that challenge. But the American people didn't.

Over 150 communities in over 26 States passed resolutions in favor of the United States joining the Soviets in a testing moratorium. In addition, six States have passed similar resolutions.

I am proud that people from my district of Denver have joined voices with the people of Detroit, Atlanta, Provo, Austin, Providence, Cleveland, New York City, and other communities to send a loud and clear message to Washington, DC: Stop nuclear testing.

This grassroots effort has grown. The small tree has grown into a mighty oak. Tomorrow, the House will have the chance to signal to the American people that we are listening by voting for an amendment to establish a 1-year moratorium, contingent upon the Soviets agreeing to onsite inspection.

The momentum for a moratorium is building because the American people want to seize the opportunity for peace. I urge my colleagues not to pass up the chance of our lifetime for a lifetime of chance.

□ 1010

## CRUCIAL CROSSROADS

(Mr. HENDON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HENDON. Madam Speaker, today as we prepare to vote on the textile veto override, we find ourselves at another crucial crossroads. A lot of fine folks say go this way; a lot of fine folks say go that way. A lot of folks say our Special Trade Representative is doing a great job; others say the South African textile debacle clearly shows he does not have any idea what he is doing.

I want to take 30 seconds to give my colleagues an eyewitness account of what he is doing down where I live. He is wrecking, he has wrecked entire communities with his free trade, open borders, no enforcement, look the other way, listen to the State Department policy. Our Special Trade Representative has wrecked entire communities. All of this while the government-subsidized textile workers in East Asia prosper.

Madam Speaker, they have got over 55 percent of the domestic market. Our trade policy is flawed, it is wrong, and it is time to say so. Our good friends downtown notwithstanding, let us listen to the working men and the working women on main street. They want fair trade, they want a fair shake. Let us give them both. Let us give America both with a "yes" vote on this crucial veto override.

## LET US PRETEND

(Mr. ACKERMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ACKERMAN. Madam Speaker, let us pretend. Just for the sake of argument, let us pretend that drug tests do work. Let us forget about the fact that a poppyseed roll at breakfast can accuse an innocent person of being a heroin addict. Let us forget that some over-the-counter pain relievers taken before a drug test can have you fighting the label of "junkie" for the rest of your life.

Let us also pretend that we can suspend the Bill of Rights; that we never heard of presumption of innocence, illegal search and seizure, and probable cause, and the protection against self-incrimination. Let us even pretend that the President is right; that America would be better off if every citizen tinkled for him on Tuesdays. Took lie detector tests on Wednesdays, blood tests on Thursdays, personality tests on Fridays, and maybe genetic tests on Saturdays in order to get and keep a job.

Madam Speaker, let us pretend these things because we know that we are dealing with an administration that pretends. They pretend to want to get Government off our backs while gleefully putting Big Brother in our bedrooms, our bloodstreams, and now even confiscating our urine.

Even if we pretend the President is right, how are we going to pay for this dubious effort? We all know the sad answer. Mr. Reagan's pretend war on drugs is financed by reducing border guards, by reducing funding to the cities in their fight against suppliers, and by reducing our drug-fighting commitment overseas. Instead, we get a farcical raid on Bolivian drug peddlers who were not there and a war on our own Government workers.

Madam Speaker, imagine instead what could happen if we spent $100 million defending our borders and educating our children. With this administration that would be just pretending.

## LET US ACT RESPONSIBLY AND AVOID ACROSS-THE-BOARD CUTS

(Mr. McCANDLESS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCANDLESS. Madam Speaker, we are rapidly approaching the August 15 Gramm-Rudman snapshot. At this point, it appears likely that we will fail to meet the $144 billion deficit target set by law. It also appears that the target will be exceeded by over $10 billion. Consequently, we are facing another round of across-the-board budget cuts in the form of a sequestration order.

As a cosponsor and strong advocate of Gramm-Rudman, it was never my intention to use sequestration as a crutch. Rather, I view sequestration as a strong incentive for us to do our jobs. The effect of cutting programs, without regard to their importance or priority, is something that should, and must, be avoided. If budget cuts are required, then we should carefully review all Federal spending so that programs with a low priority can be curtailed and programs with a high priority can be protected. We will not all agree on priorities, but the House should be given the opportunity to work its will.

I have introduced a resolution to do exactly that. The resolution calls on the committees to review the programs under their jurisdiction, make recommendations to the Budget Committee, which will then report legislation embodying those recommendations to the full House. My resolution provides specific dates by which we would need to act to avoid sequestration.

Reliance on sequestration is an admission to our constituents that we are unable—or unwilling—to do the job for which we were elected.

Madam Speaker, let's act responsibly and avoid across-the-board cuts. I invite my colleagues to cosponsor House Resolution 529.

## WE MUST VOTE TO OVERRIDE THE TEXTILE BILL VETO

(Mr. HEFNER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HEFNER. Madam Speaker, the textile industry has long been basic to our industrial strength, just as steel is basic, and automobile manufacturing is basic.

But, Madam Speaker, we are losing these manufacturing bases because of the flood of imports from foreign countries and the textile industry has suffered most from this erosion with a 75-percent increase in textile and apparel imports since 1982.

We have lost more than 350,000 jobs since 1981 because of these imports. The new MFA which the administration has just negotiated is even weaker than the previous MFA with no attempts to tie import growth to growth in the domestic market.

Overriding H.R. 1562 is the only way the MFA and the recently negotiated bilateral agreements with Korea, Hong Kong, and Taiwan can be addressed in any reasonable manner.

Opponents of this bill argue that consumers will pay more for clothing for their families. All of you received two designer shirts this week—one made in Taiwan and one in the United States. They both carried the same price tag. Oh yes, there are imports that are not designer items which sell for less. You can also buy U.S.-made nondesigner clothes for less.

Some opponents have also raised the issue of retaliation. They say our trading partners will not purchase U.S. exports. I say that is a bunch of baloney. First, the big five and the up and coming exporting countries already have a very large share of our market and they want to keep it.

Second, I would like to point out that the United States has a very large military presence in many of these countries that flood our textile markets. For example, we have 40,000 troops in Korea and support a total of 135 bases. This represents an expenditure of approximately $2.49 billion in Korea alone. This is in addition to some $231 million we provide in foreign military assistance.

India, Indonesia, Pakistan, Phillipines, and Thailand—all big textile exporters to the United States—receive, in total, billions of dollars in foreign aid from the United States.

Retaliation is not the problem in this issue and our opponents know this. This is a question of U.S. jobs, jobs which will add to the well-being of our economy and our people.

An override of H.R. 1562 is a vote for jobs. It is a vote for fair trade, not protectionism as this administration has charged. It is clear though the MFA, the bilaterals with Korean and Taiwan, and the agreement with South Africa that it is up to this legislative body to preserve American jobs.

## LET US VOTE TO OVERRIDE THE PRESIDENTIAL VETO

(Mr. ROGERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROGERS. Madam Speaker, listen to the words of the President when he vetoed the Textile and Apparel Trade Enforcement Act sometime back:

> I will not stand by and watch American businesses fail because of unfair trading practices abroad. I will not stand by and watch American workers lose their jobs because other nations do not play by the rules * * * our philosophy will always be to increase trade, increase economic growth, and increase jobs.

Madam Speaker, since the administration vetoed the textile bill, none of those things have happened. Instead, we signed off on bilaterals with the three largest exporters to us which allow increased imports into this country from them and reward them for the success in flooding our markets. We signed an umbrella textile bill which is in many respects worse than what we had which was not enforced in the first place. The imports have continued to roll in; we are forfeiting our jobs and losing a basic industry in this Nation.

I ask my colleagues to disregard for the moment the battle of numbers this prolonged debate has generated. Look at the fairness of this issue. Look at the untenable situation our industry is in. With aggressive exporters on the one side and a gun-shy administration on the other, surely Madam Speaker, if we can afford to subsidize massive wheat exports to Communist Russia, surely we can limit the flood of subsidized goods produced under slavelike conditions which are destroying this Nation's basic industry.

I urge the Members to vote with us to override the veto.

□ 1020

## TEXTILE VETO OVERRIDE

(Mr. SHELBY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHELBY. Madam Speaker, 717, that's the number of textile workers in Alabama who have lost their jobs since the President vetoed the Textile and Apparel Enforcement Act of December 17, 1985.

Since the President vetoed the textile bill, the trade deficit has soared to $170 billion.

According to the U.S. Department of Labor, in 1985, 2,900 Alabama textile workers lost their jobs. That's in addition to the 12,000 Alabama textile jobs lost since 1980 and the 300,000 textile jobs lost nationwide.

On October 10, 1985, the House passed the Textile and Apparel Enforcement Act of 1985 and sent a message to the administration to save our textile and apparel industry—an industry vital to our economy and our defense. The Senate echoed that message when it passed the bill in December.

But the administration turned a deaf ear to our plea by negotiating a series of agreements allowing even more textile and apparel imports into the country.

Studies estimate that under this new agreement, 550,000 textile and apparel jobs will be lost by 1991—many of these may be in my home State of Alabama.

In his 1986 State of the Union Address, the President challenged us not to let anything hinder our realizing the American dream.

For over 14,000 textile workers in Alabama and over 300,000 textile workers across this Nation, that dream is shattered—their dream of buying a new home, their dream of sending their children to college.

I urge my colleagues not to let the American dream die for Alabama's and America's textile workers. Vote to override the veto. Vote to save America's vital textile and apparel industry.

## A VOTE TO SUSTAIN THE PRESIDENT'S VETO

(Mr. MILLER of Washington asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MILLER of Washington. Madam Speaker, we vote this afternoon on whether to sustain the President's textile bill veto.

This was a bad bill last year, and it is a bad bill now. It is bad for American consumers, who will pay $44 billion in higher prices. It is bad for American workers, who will lose their jobs as other nations retaliate against our exports. It is bad for America's friends in the Far and Middle East.

Why are we doing all these bad things? To give further protection to America's most protected industry, an industry that in the first half of 1986 had rising profits and production.

I listened to my colleagues who are unhappy with the President on this or that, and they want to send him a message. This important piece of legislation is about to become law. The time for sending messages is over. It is time to face our responsibility and decide whether this bill serves the Nation's interest. It does not.

Madam Speaker, let us vote to sustain the President's veto.

## THE CASE FOR OVERRIDING THE PRESIDENT'S VETO—A NEW PERSPECTIVE ON VIRGINIA'S HALIFAX COUNTY

(Mr. DANIEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANIEL. Madam Speaker, yesterday I addressed the House on some of the points that should cause us to override the President's veto of the textile bill today. One I did not mention is that during World War II the War Production Board concluded that textiles was second only to steel in importance to the war effort. So that gives us another reason why we should override the veto today. It would indeed be ironic if—God forbid—we are faced with another such emergency that we have to rely on a foreign source for uniforms?

Another thing I want to mention this morning, Madam Speaker, is concerning an article which appeared in the Washington Post last Sunday having to do with the city of South Boston located in my district. The Post characterized it as a "poor land of tobacco fields and pine forests." But let me assure the Members that it is much more than that, and I give the Members some information today which I believe will give a true picture of the character and potential of that important area of Virginia.

Madam Speaker, an article in Sunday's Washington Post concerning a drug case offered readers a seriously distorted picture on Halifax County.

This "poor land of tobacco fields and pine forests" has a lot to offer its residents, and it is a pity that the writer chose to ignore reality while straining to make a point.

The same week in which this article was written, announcement was made of the establishment of a new industry in Halifax County, Cellulog, Inc. This company, which will recycle wood and paper waste to mulch will have a modest beginning, employing only 25 to start. But it has the potential for considerable expansion. It is a joint effort of Messrs. James Clark, George Foy, and Leslie Logan, all minority businessmen in Halifax County, and each already established in existing careers. If the Washington Post seeks an article about minorities in southside Virginia, they would do well to look to these three men.

The county papers last week also reported on continuing efforts to attract new industries to the area, and along with that effort, the county has just entered the final phase of airport upgrading, to make the area more accessible by air.

Also underway right now is serious consideration of plans to consolidate some services of Halifax County and the independent city of South Boston. The goal is greater efficiency and united efforts to attract new industry to the area.

These efforts have not gone unnoticed. A while back, an Associated Press story reported that Halifax County was a model small county for economic development, and at its board of supervisors meeting this morning, members were presented with a new brochure promoting the county's industrial park, which is also new.

The county is not unmindful of the source of its recent publicity, and took action this morning to help head off potential problems at the county level by establishing a Drug Abuse Prevention Task Force to work with county and city law enforcement agencies, schools, and churches in an effort to avert the problem.

The writer of yesterday's article made a point of Halifax County's median income. Certainly everyone would like to see that figure higher, but the people who live in Halifax County and South Boston are rich in ways a city writer can never know or understand.

If D'Vera Cohn had looked beyond her prejudices, she would surely have written a different story.

## JOBS FOR TEXTILE WORKERS DEPENDENT ON VETO OVERRIDE

(Mr. McMILLAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McMILLAN. Madam Speaker, today is the day for the vote to override the President's veto of the Textile and Apparel Trade Enforcement Act. Since his veto, Congress and the textile industry have waited to see the results of the Multi-Fiber Agreements renegotiations just completed in Geneva as well as the results of the bilateral trade negotiations that have taken place with our trading partners. They do little more than confirm trends that have cost Americans 300,000 jobs. The textile veto must be overriden and Congress must assume a more active role in setting a fair, tough-minded U.S. trade policy. Had Congress not shown its concern in the textile bill and other trade matters, it is doubtful that even these limited and insufficient results of the newly negotiated MFA and the textile agreements with Hong Kong and Taiwan would have been achieved.

Our trade deficit may reach $170 billion this year, up from $150 billion last year. This occurred despite the welcome drop in oil prices and the return of the dollar to a more balanced level versus the Japanese yen and German mark. It all the more underscores the critical importance of passing tough-minded trade legislation that works toward the removal of subsidies, targeting, and outright restrictive practices of foreign governments against U.S. products.

Textile imports now account for 40 percent of the U.S. market. Over 300,000 American textile workers have lost their jobs due to imports. In order to save the rest of them, the veto must be overridden.

I hope we will succeed in the House. Members of Congress have realized how important it is that legislation be enacted to force our trading partners to pursue fair trade agreements at the negotiating table. Without such legislation, nations such as Taiwan, South Korea, Japan, and Hong Kong will be allowed to continue to increase their share of the U.S. market without corresponding to similar agreements regarding American exports into their country or exports from other textile producing countries. Madam Speaker, for the sake of thousands of jobs in the textile and apparel industry, and common sense in trade policy, I urge

all Members to vote in favor of overriding the President's veto.

By voting to override the veto, Congress will be saying—enough. The Textile and Apparel Enforcement Act does provide for a significant portion of our market to come from imports, but it puts an end to the United States being a dumping ground for the world's exports of textiles.

## TEXTILE INDUSTRY THREATENED BY IMPORTS: NEEDS YES VOTE ON VETO OVERRIDE

(Mrs. LLOYD asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. LLOYD. Madam Speaker, today we will vote on the veto override on the Textile and Apparel Trade Enforcement Act.

I have been a long time supporter of this legislation. The textile and apparel industries have been asking for help for many years. Originally, all they asked was that the current multifiber agreement be strictly enforced. But it wasn't.

We have watched the erosion of one or our most vital industries. While a few small steps have been taken in the past couple of weeks to rectify the situation, it is sadly too little, too late.

Imports now represent more than half of the domestic apparel market. The new MFA agreement—which was not enforced in the past—offers no real commitment to these industries or their workers. With new agreements which allow yet more imports, we may well be by the 1990's, importing our military requirements.

With an annual increase, however small, in imports, we may well fly American flags made in Hong Kong over the Capitol for our constituents.

The time for action is now. The platform for action is here. Let us not wake up one day to see our own national flag an imported product because we have no industry ourselves to manufacture them.

Vote "yes" to override the veto.

## CURRENT TAX PROPOSALS WOULD COMPLICATE, NOT SIMPLIFY

(Mr. MONSON asked and was given permission to address the House for 1 minute.)

Mr. MONSON. Madam Speaker, considering the following, it is hard to be convinced that the current tax reform proposal will simplify our tax system:

Currently, taxpayers selling either personal or real property and receiving the proceeds over a number of years may elect to use the installment method for reporting taxable income. Each year, a percentage of the proceeds received will be taxed. In the new bill, this could be considered as realizing gain on the installment sale. To compute the gain, taxpayers must prepare a quarterly balance sheet on the accrual basis. We will require taxpayers to prepare and maintain four quarterly financial statements, something not now required which is not simplification.

Additionally, those with losses from shelters, other than gas and oil, could use those losses to offset income of other shelters. The losses could not be used against the other types of income. Think of all income as being in one of three baskets. The first holds all business activity income where the taxpayer is not active—basically limited partnership tax shelters. The second is all real property rental income and loss where the taxpayer is active in the business. The third basket includes everything else—dividends, interest, wages, and business income. The new bill requires that income and losses are added up in each category. If a basket has net income, the amount is included in taxable income. If it has a loss, the loss could not be used against the income of other baskets. Thus, we would have the distinct possibility that some taxpayers will be carrying forward three different net operating losses. This would not simplify our Tax Code. I urge my colleagues to examine the proposal more closely.

## ARKANSAS LOSES MORE JOBS IN TEXTILE INDUSTRY, VETO OVERRIDE URGED

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Madam Speaker, since 1981, the administration's policy of dependence on foreign-made products to supply consumer needs has cost hundreds of thousands of American jobs. Just last week, Levi Strauss announced two more plant closings in Little Rock and Wayne, AR, costing almost 500 more American jobs.

American workers and the management of the textile and footwear industries have been mistreated by the President's policy of dependence on foreign products. This corrosive policy must be met with action by the Congress to override the President's veto on the textile and footwear bill in order to begin restoring the industrial base of America and putting our people back to work.

□ 1030

## SUSTAIN PRESIDENT'S VETO OF TEXTILE BILL

(Mr. FRENZEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FRENZEL. Madam Speaker, today we are going to vote on the textile bill veto override. I am urging all Members to support the President's veto.

I ask you to sustain the veto not because textiles is the most protected industry in the United States and probably in the world; and not because textile output is up 11 percent in the first 5 months of this year; and not because the industry's profits have doubled in the first half of 1986 over last year; not because the capacity utilization in the industry is up to a figure of 88 percent compared to an all-industry figure of 79 percent; not because textile unemployment is under the national average or because textile employment is up 4 percent this year in the textile industry and one-half percent in apparel. My request is not based on any of these reasons.

The real reason to substain the veto is that the United States is the largest trader in the world. We are the country, and the people, who are going to suffer most if we repudiate our trading agreements.

Remember what happened to us after the oilseed and Afghanistan embargoes in the agricultural markets. We lost markets it will take us years to recover. If this veto is overridden, the United States will no longer be a reliable trading partner. We can then predict continued market losses, decreases in trade, and, ultimately, the diminution of the living standard of every country in the world. That diminution will be most severe in this country.

I respectfully suggest that the Presidents' veto be sustained.

## KEEP THE MIRV CEILINGS

(Mr. DICKS asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and to include extraneous material.)

Mr. DICKS. Madam Speaker, we are about to debate a number of far-reaching national security issues that will have a significant impact on defense and arms control.

Some have suggested that this is not a proper role of the Congress, that these decisions should be left entirely to the executive branch. This ignores our responsibilities under the Constitution to raise armies and navies and to exercise the power of the purse.

McGeorge Bundy, a former executive official as National Security Adviser in both the Kennedy and Johnson administrations, discusses his view that this indeed is a proper role for the Congress. He further argues that on the merits the amendment I will be offering to preserve the MIRV ceilings of the SALT II Treaty are in our best national security interest.

I am including Mr. Bundy's column, which appeared in this morning's

Washington Post in the RECORD for the Member's review.

KEEP THE MIRV CEILINGS

(By McGeorge Bundy)

In a few days the House of Representatives will be voting on a number of amendments to the defense authorization bill that bear on strategic arms policy and strategic arms control. They have in common the characteristic that they would refuse funds for certain activities—for underground nuclear testing, for the testing of antisatellite devices and for the deployment of additional multiple-warhead missiles (MIRVs) beyond the SALT ceilings—as long as the Soviets show a parallel restraint. In each case there are questions on the merits, and in each case I think the balance, on the merits, is on the side of the proposed amendment.

But there is also a more general question that is being raised about these amendments: do they constitute an improper intrusion into the president's responsibility for the conduct of arms control negotiations? I believe deeply in the protection of presidential authority, and I know from White House experience how hard it is to get progress in arms control without direct presidential leadership. I also know from experience that there is good reason to be wary about intrusion from other places. Arms control negotiations can be endangered by military or technological pressure, for example, or indeed by people on the Hill with their own agenda. But in these three present cases I can see no reason of this kind for members of Congress to hold back from voting on the merits. For simplicity I will focus on the case for protecting the MIRV ceilings in SALT II.

There is widespread agreement now that large-scale land-based multiple-warhead missile systems, especially those based in vulnerable silos, are destabilizing. Congress itself has registered this conclusion with steadily increasing force over recent years, most notably in its restraint of MX deployment. Moreover, the MIRV limits SALT II, while too high, constrain further Soviet deployment at least as much as our own. Finally, there is little enthusiasm in the Navy for spending money to keep old submarines alive just for the pleasure of breaking the SALT II limits. Breaking the limits does us no good, and keeping them is to our advantage.

No one doubts that Congress has a constitutional right to refuse money for testing, for ASATs and for MIRVs, whenever it thinks such spending is a bad use of tax dollars. Congress has been refusing money for this or that weapon over a very long time. Nor can it be beyond congressional power to tie that judgment to the related actions of other governments—no money for additional MIRVs if the Soviets do not deploy additional MIRVs. A judgment based in part on the action or inaction of others is one that Congress has every right to make, both under the Constitution and by historical precedent.

Moreover, if it is the best judgment of Congress that the MIRV ceilings should be respected, the sooner the president knows it the better, from the point of view of his responsibility for negotiations. There is no point in his bargaining for options that Congress will not vote, and such unreal bargaining chips are of no value in serious arms control negotiations. If more MIRVs would be bad for both sides, which really is not a far-out proposition, then it makes sense not to spend money for them, and it also makes sense to put the weight of Congress on the side of international restraint. SALT II is a complex affair, neither perfect nor totally flawed, but its MIRV ceilings are clearly much better than no ceilings at all, and Congress will not handicap the president's work for arms control by helping to keep them intact.

It is true that a congressional decision to refuse funds for breaking the MIRV ceilings will be opposed by those for whom the real purpose all along has been to kill SALT II and to avoid any arms control agreement that Moscow could possibly accept. Their sincerity in this purpose is not in question, but they are not entitled to much attention when they talk of protecting the president's authority to negotiate. Their fondest hope is that he will negotiate nothing at all. They should be asked to tell us, on the merits, whether they think there is any such animal in the world of arms control as a good agreement with MIRV limits higher than those of SALT II. If not, then why is it wrong for Congress to act on that fact?

I believe that such congressional action would in reality be a help to the part of the administration, and indeed the part of the president himself, that really does want good arms control agreements.

## NO RECESS

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Madam Speaker, when I was back in grammar school and we were bad, the teacher used to have one threat hanging over our heads: No recess.

Now, I do not mean to say that Congress is like grammar school. But if the shoe fits, wear it.

We have no business going out on recess next Friday. We have got 8 days of work, but we will leave here by 3 p.m. this Friday; we will not go in until noon next Monday and Tuesday, and no votes next Monday.

In those 8 days, we are supposed to pass the budget reconciliation bill in both bodies, go to conference, and send it to the White House. We have to pass a tax bill, but the conferees are locked up downstairs, hidden from the public eye.

We should impose sanctions on South Africa. We should reform our trade policy. Some Members want to fix Gramm-Rudman. The other body has to try the impeached judge, Harry Claiborne, who continues to collect his salary in the jailhouse. Not one appropriation bill has gone to conference.

The message is, Madam Speaker: We have not earned a recess. We have been bad. Shame on us. Let us shut off the air-conditioning—that is the only way to speed up the work process around here.

## PROTECTING AMERICA'S INDUSTRIAL BASE IS NOT PROTECTIONISM

(Mr. LEVIN of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVIN of Michigan. Madam Speaker, it has been said by opponents of the textile override that what is behind this effort are special interests. Quite the contrary, it is the Nation's interest.

I am from a State with little textile, apparel, and footwear production and no copper production, but we all have a stake in today's vote.

The same lack of a trade policy that is hurting textiles has damaged automobiles, auto parts, steel, machine tools, semiconductors. No one can be sure which will be the next victim.

You name the industry, you are likely to see the same administration approach: neglect, then pressure to act first from Congress and the private sector, the labeling by the administration of pressure as protectionism, and finally in some cases the administration reacts, but if the action is not too late, it is invariably too little.

With this override, the administration once again is on the defensive. It is scrambling toward a last-minute response and scratching for just enough votes to thwart the opposition, and any argument will do; but what this Nation needs in trade is a policy, not patchwork.

I will vote proudly to override, not only to send a message, but as an important step toward creating a national policy.

To protect the integrity of America's industrial base is not protectionism.

## A BAREFOOT ARMY IN LEVIS

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BENTLEY. Madam Speaker, today we have the opportunity to vote for America. For American jobs and American manufacturing, but also, for a major item in the Defense base: the clothing and shoes necessary for an Army, a Navy, an Air Force.

During the last months, on this floor, we have heard proponents of free trade blast the idea of protecting American industry because of the threat of retaliation from other countries.

Having already lost at least 1 million manufacturing jobs since the beginning of this decade, facing the threat of the loss of another half million more jobs in textiles—what more can they do?

We have the great, rich market. They need access to it. We should by any rational thought be in the driver's

seat. But, we cower under foreign threats and let them take us for a ride.

We had better consider, and consider well the impact of this bill on the Defense of the United States. Russia has major refueling and supply bases capable of interdicting shipping in or out of any of the Pacific Rim countries. Wars, historically, have been won or lost on the availability of basic supplies.

Shoes and uniforms are basic. If we lost the shoe industry, if we lost the clothing industry, we may well field a barefoot Army dressed in levis for the next war. Madam Speaker, to me this is absolutely an unbelievable situation. I am voting override to protect America.

## ANOTHER $20 BILLION IN DEFICITS

(Mr. WILLIAMS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILLIAMS. Madam Speaker, today we will hear from the White House that the deficit is $20 billion higher than expected and it will be politically fashionable in the Oval Office to blame the Congress of the United States, but perhaps it might not be entirely inappropriate to look at the facts of how we reached this $20 billion higher deficit than we expected. Half of it, $10 billion, is because we have less revenue due to the failed economy than we expected, and almost all of that, $10 billion, is less taxes paid by corporations.

Two billion dollars of the deficit will come from bank failures or near bank failures and the payment therefore of the Federal insurance on bank deposits.

One billion dollars is in higher unemployment benefits than expected.

Fully half comes from the Pentagon which has spent $5 billion more than anticipated and the small amount remaining is because of an accounting difficulty with funds oil drilling on the Outer Continental Shelf.

None of the extra $20 billion has come from domestic spending voted by this Congress. All of it is the result of a failed trickle-down, half-baked riverboat gamble initiated at the White House.

## MOMENT OF TRUTH ON TEXTILE BILL

(Mr. COBEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COBEY. Madam Speaker, the moment of truth has come. Today we vote on the textile and apparel veto override.

This is just not a textile and apparel vote. We should focus on the total trade situation in this country. Last year the trade deficit was over $150 billion. This year it is going to be over $170 billion.

When are we are going to stand up for America and American jobs? When are we going to show the rest of the country that we have backbone?

This is not retaliation and we will not be retaliated against. They are already flooding our markets. They want our markets. They want to maintain the share that they have. We should have no fear of retaliation.

It is time to look out for the interests of America and vote to override this veto.

## THE TEXTILE BILL

(Mrs. KENNELLY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. KENNELLY. Madam Speaker, I supported the textile bill last October and again in December. I really supported this type of legislation to try to get the administration's attention, to try to end their policy of malign neglect on trade; but there is no doubt that I had to think long and hard about what I was going to do regarding a veto override.

Unfortunately, the administration has resisted every effort this House has made to grapple with the trade deficit. They have ignored every signal that we sent out. Maybe some of these signals were even 2 by 4's, but we did want to get the attention of the administration. I had hoped that we might; however, this morning the Washington Post said something that was the last straw for me. The Chairman of the Council of Economic Advisers said that he believes the administration can defeat the override, and he goes on to say: "If we win this and win it big, we might discourage the Senate from passing an omnibus trade bill."

I voted for the textile bill because I wanted to send that message of frustration to the administration. I wanted to let them know it is time to strengthen and streamline our textile bills. We did this in the omnibus trade bill. I had hoped that passage of the omnibus trade bill would make industry-specific bills like this one unnecessary.

Apparently I was wrong. Apparently I was naive. As a result, I will vote again with my friend, the gentleman from Georgia.

## ADMINISTRATION HAS BEEN FUNDAMENTALLY MISHANDLING OUR TRADE POLICIES

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Madam Speaker, I want to reinforce what the gentlewoman from Connecticut just said. If you vote to sustain the veto of the textile bill, you are sending the signal to the executive branch that it is doing just fine on trade; yet the fact is that this administration has been fundamentally mishandling our trade policies.

Consider the following letter from Tom Roboz:

DEAR CONGRESSMAN GINGRICH: As a cleared industry advisor, I have participated in every multilateral textile negotiation since the Long-Cotton Arrangement was negotiated during the Kennedy Administration in 1962. This includes the Multi-Fiber Arrangement (MFA) negotiations in 1974, 1977, 1981 and 1983, as well as innumerable bilateral negotiations over the last 25 years.

I can tell you personally that never before have I experienced the inexplicable and inexcusable lack of consultation by U.S. negotiators with domestic industry advisors as was evidenced during the recent renegotiation of the MFA in Geneva.

During the last 36 hours our industry advisors were not contacted by either Ambassador Carlisle or Robert Shepherd, the primary U.S. negotiators. This occurred despite repeated written and oral requests to them that we meet. We were forced to get whatever information we could from our counterparts working with the European Economic Community.

In contrast, other countries, most notably those in the EEC and the Pacific Rim, were consulted hourly by their government negotiators. In Geneva, I personally asked Ambassador Carlisle to brief us. His reponse was that he did not have enough time.

Yesterday's announcement of the new Korean bilateral is indicative of the total breakdown of the consultation mechanism with our government's textile negotiators. A few days ago, Ambassador Michael Smith secretly flew to Honolulu to conclude that agreement. Our industry advisors were not only unaware of the new negotiating round in Hawaii, but we had been told that there were no other sessions planned.

I urge you to work to override the President's veto. It is clear that our textile bill is the only thing that can save this industry from being liquidated. Our government is so intent on pursuing their free trade agenda that they do not even want to know the impact the bilateral and multilateral treaties have on our industry. That complex and technical information can only be provided by the industry advisor process. A process that this administration chooses to ignore.

Sincerely,

TOM ROBOZ,
*CEO, Stanwood Corp.*

Clearly, Madam Speaker, this is a record of indifference to American jobs that we must change. We must vote to override.

## A TIME TO PREACH AND A TIME TO FIGHT

(Mr. KANJORSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KANJORSKI. Madam Speaker, I do not think that in this session of Congress I often agree with the gentleman from Georgia who just spoke, but I have to say that for the first

time I am in 100-percent agreement with him.

I come from Pennsylvania. The first Speaker of the U.S. House of Representatives came from Pennsylvania, Frederick Muhlenberg. During the Revolutionary War, he was a minister. He was preaching one afternoon. His robes were flowing. Finally, at the end of his sermon, he said, "There is a time to preach and a time to fight."

He tore off his robes and had the uniform of a colonel of the Revolutionary Army under it and said: "and now is the time to fight."

This House has preached for 19 months and we have not been heard. We have not preached for protectionism. We have preached for American jobs and American industry. We have preached for fairness, not only for American working men and women, but for working men and women around the world who are working at slave labor wages to produce garments that are flooding this Nation and, indeed, dressing our soldiers in combat.

It is time that this administration listens to the Congress of the United States, for we are a vehicle for the people and the working men and women of the United States.

Mr. President, we cannot afford to lose more textile jobs, footwear jobs, steel jobs, auto jobs, American jobs.

□ 1045

Mr. President, this is not a wrestling match between the White House and the House of Representatives.

Mr. President, this is an emergency. We in the House, Republicans and Democrats alike, today have an opportunity to stand up and be heard. Vote yes for the override.

## VOTE TO OVERRIDE PRESIDENT'S VETO

(Mr. HARTNETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HARTNETT. Madam Speaker, today we will be faced with the decision as to whether or not to override President Reagan's veto of a very important piece of legislation.

President Reagan's philosophical consistency is laudable, but it is extracting too great a toll from a very important American industry. We have been at a disadvantage in this country, and we are quickly and rapidly losing the craftsmen, the skilled workers, and those workers who work in this vital industry every year.

In the event of an all-out national emergency, we will need this vital industry, and I am afraid that it is going to be too late.

I would say that there are very few of my political persuasion who do not stand shoulder to shoulder with President Reagan and admire the great successes which he has enjoyed during his term and a half in office. But I would say to the President in this case, "I think that your political consistency is wrong, Mr. President, and I, who have considered myself to be one of your most loyal soldiers, will leave you and urge my colleagues to vote to override your veto on this most important piece of legislation."

## OVERRIDE PRESIDENTIAL VETO OF TEXTILE AND APPAREL ENFORCEMENT ACT

(Mr. NICHOLS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NICHOLS. Madam Speaker, today, those of us in this body who are alarmed with the ever-increasing trade deficit of the United States, especially relating to textile and apparel imports, have a tough row to hoe in overriding President Reagan's veto of the textile bill.

I stand before my colleagues today as one person whose entire life has been surrounded by textile mills. As a schoolboy growing up in Sylacauga, my first job was in the textile mill. When I served in the Alabama Legislature, I represented a county whose major livlihood depended on the textile and apparel mills scattered throughout the area. And today, Madam Speaker, I am proud to represent, in Congress, one of the largest textile districts in our entire country.

My words today are not just my own, but come from the some 25,000 textile workers who live and work in my district. From the northern part of my district in Calhoun County, I speak for the residents of Eastaboga, Piedmont, Oxford, and Anniston. southward toward Randolph County, I speak for those textile and apparel workers in Roanoke, Rock Mills, and Wedowee. Madam Speaker, the valley area of Alabama's Third Congressional District includes the towns of Shawmut, Langdale, Lanett, and Lafayette, and in this area is one of the largest concentrations of textile workers to be found anywhere in America. In the southern part of my district, I speak for those textile workers in Opelika, Tallassee, Phenix City, and Alexander City. And, Madam Speaker, I would be indeed remiss today if I did not mention my home county of Talladega and the hundreds and hundreds of friends who are employed in textile cut-and-sew plants. All of those who live in these communities are represented on this floor today and the message they are sending is loud and clear, "Foreign imports are taking our jobs—we need relief."

Madam Speaker, in the last few weeks, I have had hundreds and hundreds of handwritten letters pointing out that Alabama has lost more than 10,000 textile and apparel employees just in the past 12 months due to plant closings, and they have all called my attention to the recent trade figures released by the Commerce Department showing that textile imports from Hong Kong, Korea, Taiwan, and China have increased this year more than 20 percent over last year's figure.

I beg of my colleagues, in the name of saving American jobs and protecting our industrial base of these United States, to vote with me today in overriding the Presidential veto of our textile bill.

## NATIONAL STRENGTH WILL GAIN FROM VETO OVERRIDE

(Mr. FOWLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOWLER. Madam Speaker, it seems to me that if the goal of American military security and the national security of our country is peace through strength, it is no less a challenge to the national strength of our country that we have competitiveness through strength.

The national strength of this country is not only in its missiles and its armaments and its men and women who defend our shores; the national strength of our Nation is made up of the ability to clothe ourselves and feed ourselves. Agriculture, textiles, steel, rubber—basic industries of the United States of America—make up the national strength of our people. If we lose a part of that national strength, we lose an overall part, a key part, of the national security of our Nation.

This is an important vote today because it is a vote for national strength and national security. I am extremely pleased with the bipartisan efforts of my friends on both sides of the aisle to make the case for overriding this Presidential veto for the national strength of this Nation.

## STICK TO THE FACTS ON TEXTILE IMPORTS

(Mr. GIBBONS asked and was given permission to address the House for 1 minute.)

Mr. GIBBONS. Madam Speaker, this is an important and historic day for America. The debate has gotten a little off track; I have heard some statements that are just completely inaccurate, and I want to correct them here in the well right now.

Imports of finished textile products—apparel and household goods—in 1980 were 13.3 percent of the U.S. market; today they are about 24 percent of the U.S. market. Apparel imports only in 1980 were 24 percent, almost 25 percent of the U.S. market;

today, they represent 35 percent of the U.S. market.

I would hope that my colleagues would restrict the statistics that they use in debate to accurate figures that are supplied to us every day by the Department of Commerce. I have heard speakers say today that there is a rush of subsidized imports. That is baloney; there is no rush of subsidized imports. There are adequate laws to protect against subsidized importation. The textile and garment people are using those laws, and using them successfully.

The American textile industry is healthy. It is in transition. Some of it will survive, and some of it will not survive. It is the most highly protected industry in the United States. It has been protected for far too long. The protection rate is about 40 percent, and this protection rate has caused a slowdown in the transition that we must normally face.

Certainly textile jobs will be lost in the United States, but they will be lost to machines in this country. I hope that during the debate today we will stick to the facts.

## SUBSIDIZED GRAIN SALES TO "EVIL EMPIRE"

(Mr. DARDEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DARDEN. Madam Speaker, V.I. Lenin, the father of the Soviet state, once said, "The imperialists are so hungry for profits that they will sell us the rope with which to hang them."

It appears now that we at least will sell them—at a subsidized price—the grain that offsets the shortfalls created by the inadequacy of their own agricultural system.

President Reagan's decision to authorize a subsidized grain sale to the Soviets even has Mr. Reagan's own Secretary of State, George Shultz, baffled. The Soviets—who have sworn to destroy the very capitalist system under which American farmers operate—will use that system to buy wheat at less cost than our own citizens pay.

At the same time, this action was taken while a parliamentary delegation from Australia was in Washington to protest this potential action. We did not even have the courtesy to let them leave the country before we made that decision. That is no way to treat a valued ally.

Madam Speaker, what kind of logic is that from a President who has labeled the Soviets "an evil empire"?

## THE WAR AGAINST NARCOTICS

(Mr. RANGEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RANGEL. Madam Speaker, as we in the House attempt to embark on a legislative project to form an omnibus bill in support of the President's recently declared war against narcotics, it is important to note that all of the committees are working to deal with the question of reduction in demand, as we have bills before the Education and Labor Committee to deal with interdiction, as Mr. GIBBONS has successfully passed out of his committee assistance to our customs, and most importantly, the Foreign Affairs Committee, that will be dealing with countries that are violating international treaties, those that have ignored the need to embark on eradication programs.

In this light I would like to laud the administration for the effort that they have made in Bolivia. Many of us were concerned of the intrusion of American troops working with the Bolivian Government, but notwithstanding that, I think that we are beginning to develop some type of a foreign policy and seeing the successful results of the Bolivian project.

It has been reported to us by the State Department that at least six laboratories have been destroyed which involved some 6 tons of coca leaves which would be coming into this country for processing as cocaine. In addition to that, it has dramatically reduced the demand for the coca leaf crops from the farmers in Bolivia. I only hope that we can extend this program to Peru and to Colombia.

□ 1055

## DROUGHT RELIEF

(Mr. DE LA GARZA asked and was given permission to address the House for 1 minute.)

Mr. DE LA GARZA. Madam Speaker, in a few moments we will be voting on the suspensions from Monday and yesterday. The third suspension, H.R. 5288, will be the drought assistance legislation which we debated on the floor yesterday.

We cannot say enough about what farmers, about what the individual citizens have done to assist our brethren in the Southeast. This is the first and perhaps the only opportunity we will have as Members of Congress to have our imprint and to assist in that endeavor, and I urge all Members to vote to support this legislation and give it as near a unanimous vote as we can so that we can tell our friends that are suffering from the drought that we care and that we, within the constraints that we have, budget and otherwise, nonetheless are trying to do our best to assist them in this endeavor.

## VETERANS' LEGISLATION

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Madam Speaker, I would like to also explain two suspension votes that we will have in just a few moments that came out of the Veterans' Affairs Committee.

One of the bills you will vote on will improve the health care of veterans, and the other bill pertains to ex-prisoners of war, to give benefits such as dental care.

These are not expensive bills, and they do help the veteran. I hope we can get a unanimous vote on these two bills that are now before the body out of the Veterans' Affairs Committee.

## NATIONAL SCIENCE FOUNDATION AUTHORIZATION ACT FOR FISCAL YEAR 1987

Mr. WALGREN. Madam Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4184) to authorize appropriations to the National Science Foundation for the fiscal year 1987, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "National Science Foundation Authorization Act for Fiscal Year 1987".

AUTHORIZATION OF APPROPRIATIONS

SEC. 2. (a) There are authorized to be appropriated to the National Science Foundation, for fiscal year 1987, the sums set forth in the following categories:

(1) Mathematical and Physical Sciences, $489,870,000.

(2) Engineering, $172,470,000.

(3) Biological, Behavioral, and Social Sciences, $270,500,000.

(4) Geosciences, $298,150,000.

(5) Scientific Technological, and International Affairs, $47,030,000.

(6) Computer and Information Science and Engineering, $122,980,000.

(7) Program Development and Management, $78,000,000.

(8) United States Antarctic Program, $117,000,000.

(9) Science and Engineering Education, $89,000,000.

(b) Notwithstanding any other provision of this Act, from the amount authorized under subsection (a)—

(1) not less than $33,430,000 is authorized only for purposes of the Social and Economic Sciences Division;

(2) not less than $49,870,000 is authorized only for purposes of the Behavioral and Neural Sciences Division;

(3) not less than $89,060,000 is authorized only for the purposes of the Astronomical Sciences Division; and

(4) not less than $11,500,000 is authorized only for the purposes of the College Science Instrumentation Program.

AVAILABILITY

SEC. 3. (a) Appropriations made under authority provided in sections 2 and 5 shall remain available for obligation for periods specified in the Acts making the appropriations.

(b) To the extent that the total amount appropriated to carry out program activities specified in this Act is less than the total amount authorized to be appropriated for such activities under this Act, all such authorized amounts for such activities or their subactivities shall be reduced proportionally.

OFFICIAL EXPENSES

SEC. 4. From appropriations made under authorizations provided in this Act, not more than $5,000 for fiscal year 1987 may be used for official consultation, representation, or other extraordinary expenses at the discretion of the Director of the National Science Foundation. The determination of the Director will be final and conclusive upon the accounting officers of the Government.

FOREIGN CURRENCY AUTHORIZATION

SEC. 5. In addition to the sums authorized by section 2, not more than $700,000 for fiscal year 1987 are authorized to be appropriated for expenses of the National Science Foundation incurred outside the United States, to be drawn from foreign currencies that the Department of the Treasury determines to be excess to the normal requirements of the United States.

TRANSFERS AUTHORIZED

SEC. 6. (a) Funds may be transferred among the categories listed in section 2(a), so long as the net funds transferred to or from any category do not exceed 10 percent of the amount authorized for that category in section 2.

(b) The Director of the National Science Foundation may propose transfers to or from any category exceeding 10 percent of the amount authorized for that category in section 2. An explanation of any such proposed transfer must be transmitted in writing to the Speaker of the House of Representatives, the President of the Senate, the Committees on Labor and Human Resources and Commerce, Science, and Transportation of the Senate, and the Committee on Science and Technology of the House of Representatives. The proposed transfer may be made only when 30 calendar days have passed after submission of the written explanation.

MISCELLANEOUS AMENDMENTS

SEC. 7. (a) Section 3(a)(6) of the National Science Foundation Act of 1950 (42 U.S.C. 1862(a)(6)) is amended to read as follows:

"(6) to provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal Government; and".

(b)(1) Section 6 of the National Science Foundation Act of 1950 (42 U.S.C. 1864a) is amended—

(A) by striking out "(a)" after the section designation; and

(B) by striking out subsection (b).

(2) Section 5316 of title 5, United States Code, is amended by striking out "Assistant Directors, National Science Foundation (4).".

(c) Section 10 of the National Science Foundation Act of 1950 (42 U.S.C. 1869) is amended by striking out ", within the limits of funds made available specifically for such purpose pursuant to section 16,".

(d) Section 11 of the National Science Foundation Act of 1950 (42 U.S.C. 1870) is amended—

(1) by striking out "and" at the end of paragraph (i);

(2) by striking out the period at the end of paragraph (j) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(k) during the 5-year period beginning on the date of the enactment of the National Science Foundation Authorization Act for Fiscal Year 1987, to indemnify grantees, contractors, and subcontractors associated with the Ocean Drilling Program under the provisions of section 2354 of title 10, United States Code, with all approvals and certifications required by such indemnification made by the Director.".

TASK FORCE ON WOMEN, MINORITIES, AND THE HANDICAPPED IN SCIENCE AND TECHNOLOGY

SEC. 8. (a) It is the purpose of this section to establish a task force on women, minorities, and the handicapped in science and technology to—

(1) examine the current status of women, minorities, and the handicapped in science and engineering positions in the Federal Government and in federally assisted research programs;

(2) coordinate existing Federal programs designed to promote the employment of women, minorities and the handicapped in such positions;

(3) suggest cooperative interagency programs for promoting such employment;

(4) identify exemplary State, local, or private sector programs designed to promote such employment; and

(5) develop a long-range plan to advance opportunities for women, minorities, and the handicapped in Federal scientific and technical positions in federally assisted research, and to coordinate the activities of participating agencies with the Committee on Equal Opportunities in Science and Engineering established by section 36 of the National Science Foundation Authorization and Science and Technology Equal Opportunities Act (42 U.S.C. 1885c), after the termination of the task force established by this section.

(b) For purposes of this section, the term "participating agency" means—

(1) the National Science Foundation;

(2) the Department of Health and Human Services;

(3) the National Aeronautics and Space Administration;

(4) the Environmental Protection Agency;

(5) the Department of Agriculture;

(6) the Department of Defense;

(7) the Department of Education;

(8) the Department of Energy;

(9) the Department of Commerce; and

(10) the Department of the Interior.

(c)(1) The task force on women, minorities, and the handicapped in science and technology shall be composed of individuals appointed by participating agencies pursuant to this subsection.

(2) The head of each participating agency shall appoint two individuals to serve as members of the task force. If an appointed member is unable to serve for the duration of the task force, the head of the participating agency who appointed that member shall appoint another individual to fill the vacancy.

(3) Task force members may be appointed from private business, academia, professional associations, or nonprofit foundations.

(d) The task force shall prepare and submit a report on its findings and recommendations to the President, the Congress, and the head of each participating agency not later than December 31, 1989.

(e) The Office of Science and Technology policy shall call the first meeting of the task force not later than 90 days after the date of enactment of this Act, shall ensure that each participating agency has appointed two members, and shall assist the task force to meet its objectives.

(f)(1) Members of the task force not otherwise employed by the Federal Government shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in carrying out the duties of the task force.

(2) The Director of the National Science Foundation shall make provision for administrative support of the task force, and may enter into agreements with the heads of other participating agencies to facilitate the work of the task force.

(g) The task force shall terminate on January 31, 1990.

GREENHOUSE EFFECT REPORT

SEC. 9. The President shall, at the earliest practical date (but not later than August 1, 1987), submit to the Congress a report on any action taken or proposed to be taken by the Federal Government with respect to the establishment of an International Year of the Greenhouse Effect to occur in calendar year 1991. Such report shall include descriptions of possible international missions and related research and educational activities, and other such activities as the President may consider appropriate.

COMPUTER NETWORK STUDY

SEC. 10. (a) The Office of Science and Technology Policy (hereinafter referred to as the "Office") shall undertake a study of critical problems and current and future options regarding communications networks for research computers, including supercomputers, at universities and Federal research facilities in the United States. The study shall include an analysis of—

(1) the networking needs of the Nation's academic and Federal research computer programs, including supercomputer programs, over the period which is fifteen years after the date of enactment of this Act, including requirements in terms of volume of data, reliability of transmission, software compatibility, graphics capability, and transmission security;

(2) the benefits and opportunities that an improved computer network would offer for electronic mail, file transfer, and remote access and communications for universities and Federal research facilities in the United States; and

(3) the networking options available for linking academic and other federally supported research computers, including supercomputers, with a particular emphasis on the advantages and disadvantages, if any, of fiber optic systems.

(b) The Office shall submit to the Congress—

(1) within one year after the date of enactment of this Act, a report on findings from the study undertaken pursuant to subsection (a) with respect to needs and options regarding communications networks for university and Federal research supercomputers within the United States; and

(2) within two years after the date of enactment of this Act, a report on findings from the study undertaken pursuant to subsection (a) with respect to needs and options regarding communications networks for all research computers at universities and Federal research facilities in the United States.

REPEAL

SEC. 11. Title IX of the National Defense Education Act of 1959 (42 U.S.C. 1876 et seq.) is repealed.

Mr. WALGREN (during the reading). Madam Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore (Ms. KAPTUR). Is there objection to the request of the gentleman from Pennsylvania?

Mr. LUJAN. Madam Speaker, reserving the right to object, I do so for the purpose of asking the gentleman from Pennsylvania [Mr. WALGREN], the chairman of the subcommittee, to explain the legislation before us.

Mr. WALGREN. Madam Speaker, if the gentleman will yield, on June 26, 1986, the House amended and passed H.R. 4184, the National Science Foundation Authorization Act for fiscal year 1987 by a vote of 405 yeas to 2 nays. On August 1, the Senate amended S. 2184, the Senate counterpart bill, then substituted the text for that of H.R. 4184 and passed the bill. In the other body, two committees considered the NSF authorization—the Committee on Labor and Human Resources and the Committee on Commerce, Science, and Transportation. The House bill and the Senate bill both provide for a total authorization of $1.686 billion, a level identical to the authorization level proposed by the administration.

Prior to consideration of the bill by the Senate, representatives of the Committee on Science and Technology consulted with the two Senate committees to review any differences between the House-passed version and the versions reported from the Committee on Labor and Human Resources and the Committee on Commerce, Science, and Transportation. The Senate version before us reflects the consensus between the House and Senate committees.

There are some differences between the House-passed version of H.R. 4184, and the Senate substitute which is before us today. The House-passed bill redirected funds from the U.S. Antarctic Program to the Behavioral and Social Sciences Programs and the College Science Instrumentation Program within the Science and Engineering Education Directorate. The Senate bill redirects identical amounts to these programs, but gives the director of the Foundation authority to reallocate the funds as he sees appropriate, rather than taking all of the funds from the U.S. Antarctic Program. In addition, the Senate version authorizes an additional $4 million for astronomical sciences above the initial administration request. However, the total authorization level remains the same in both the House and Senate versions of H.R. 4184.

The Senate bill also contains a provision, not in the House-passed version, which states that if the total amount appropriated to carry out program activities is less than the amount authorized, all authorized amounts are to be reduced proportionally. The Senate-passed version also includes a provision to establish an interagency Task Force on Women, Minorities, and the Handicapped in Science and Technology to advance opportunities for these groups in Federal scientific and technical positions in federally assisted research.

Authorization for two studies and reports is included in the Senate version which was not included in H.R. 4184 as passed by the House. These provisions require the President to submit to the Congress a report on actions taken, or proposed, to establish an International Year of the Greenhouse Effect. Likewise, the Office of Science and Technology Policy is to study and report to the Congress critical problems and current and future options regarding communications networks for research computers, including supercomputers, at universities and Federal research facilities.

The House-passed version contains a provision to authorize NSF, for a 5-year period, to indemnify grantees, contractors, and subcontractors associated with the Ocean Drilling Program. The Senate amended S. 2184 to include this language. H.R. 4184, as passed by the House, also includes a directive that none of the funds authorized for the Foundation may be used to implement or enforce changes to the Office of Management and Budget [OMB] Circular A-21 made subsequent to February 11, 1986. This provision referred to the rather hasty promulgation by OMB which would have made a major change in the amount of administative cost allowances to universities. Since the time H.R. 4184 passed the House, however, OMB has modified the proposal, thus the committee agreed with the Senate to drop this provision.

All other aspects of H.R. 4184 as passed by the Senate are identical to the House bill. I believe the Science and Technology Committee's consultation with the Senate Labor Committee and Commerce Committee has produced an excellent authorization for the National Science Foundation. I am pleased that the two Senate committees continue to work together, and I appreciate the cooperation, on both sides of the aisle, which allows Congress to move forward in a timely fashion with an authorization for NSF.

I want to especially give credit and recognition as we pass this bill to the chairman of the full committee, DON FUQUA, as well as the ranking Republican member, Mr. LUJAN, and the ranking Republican member of the Subcommittee on Science, Research and Technology, Mr. BOEHLERT, for their cooperation and sustained efforts in the development of this legislation.

The basic science and fundamental engineering research supported by NSF ultimately provides much of the knowledge necessary to solve the Nation's current and future economic challenges and maintain our competitive technological advantage. H.R. 4184, as amended and passed by the Senate, will help to guarantee not only the knowledge base, but that our young citizens benefit from education and advancement in science and engineering. I urge my colleagues to adopt the Senate-passed version of H.R. 4184, so that this authorization for the National Science Foundation may become public law.

Mr. LUJAN. Madam Speaker, I thank the gentleman for his explanation of the bill to reauthorize funds for the National Science Foundation for fiscal year 1987. As the gentleman explained on June 26, 1986, the House debated H.R. 4184 and overwhelmingly voted to support the administration's request for increased funding of the National Science Foundation. I commend my colleagues in the Senate, particularly Senator HATCH and Senator GORTON, for their expeditious, thorough, and strong endorsement of this legislation.

The bill, as amended by the Senate, meets the need for a sound budget proposal for an agency that provides significant support to our Nation's science and engineering research and education enterprises. The vast majority of precollege, undergraduate, and graduate institutions in the United States are supported in some way with NSF funds. Therefore, all taxpayers benefit from NSF's programs. Furthermore, there are several programs NSF sponsors that have a cost-sharing factor assigned to them. This has not only leveraged the Federal investment in science, but it has also drawn State and local governments, academic institutions, and the private sector into a productive alliance.

Madam Speaker, I urge the House to accept the unanimous-consent request for passage of H.R. 4184. It is not only a strong signal of the Congress' support for basic research and education, but it is also a very sound investment of taxpayers' money.

Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Pennsylvania?

There was no objection.

A motion to reconsider was laid on the table.

## PERMISSION FOR SUBCOMMITTEE ON PUBLIC BUILDINGS AND GROUNDS OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO SIT TODAY DURING THE 5-MINUTE RULE

Mr. GRAY of Illinois. Madam Speaker, I ask unanimous consent that the Subcommittee on Public Buildings and Grounds of the Committee on Public Works and Transportation be permitted to sit today, August 6, 1986, under the 5-minute rule.

Madam Speaker, this matter has been cleared by the minority.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 5, rule I, the Chair will now put the question on each motion on which further proceedings were postponed on Monday, August 4, 1986, and Tuesday, August 5, 1986, in the order in which that motion was entertained.

Votes will be taken in the following order:

H.R. 4333, by the yeas and nays;

H.R. 4623, by the yeas and nays; and

H.R. 5288, by the yeas and nays.

The Chair will reduce to 5 minutes the time for all electronic votes after the first vote in this series.

## IMPROVED BENEFITS FOR FORMER PRISONERS OF WAR

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 4333.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi [Mr. MONTGOMERY] that the House suspend the rules and pass the bill, H.R. 4333, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 413, nays 0, answered "present" 1, not voting 17, as follows:

So (two-thirds having voted in favor thereof), the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. BROWN of California). Pursuant to the provisions of clause 5, rule I, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on all the additional motions to suspend the rules on which the Chair has postponed further proceedings.

## VETERANS' HEALTH-CARE AMENDMENTS OF 1986

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 4623, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi [Mr. MONTGOMERY] that the House suspend

the rules and pass the bill, H.R. 4623, as amended, on which the yeas and nays are ordered.

The Chair announces that this will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 418, nays 0, not voting 13, as follows:

□ 1130

So (two-thirds having voted in favor thereof), the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title of the bill was amended so as to read: "A bill to amend title 38, United States Code, to improve the delivery of health-care services by the Veterans' Administration, and for other purposes."

A motion to reconsider was laid on the table.

## EMERGENCY ASSISTANCE FOR DROUGHT RELIEF

The SPEAKER pro tempore (Mr. BROWN of California). The unfinished business is the question of suspending the rules and passing the bill, H.R. 5288, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas [Mr. DE LA GARZA] that the House suspend the rules and pass the bill, H.R. 5288, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 418, nays 0, not voting 13, as follows:

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title of the bill was amended so as to read: "A bill to provide emergency assistance to farmers and ranchers adversely affected by natural disasters in 1986."

A motion to reconsider was laid on the table.

## PERSONAL EXPLANATION

Mr. VALENTINE. Mr. Speaker, I was unavoidably delayed in North Carolina this morning because of previous commitments in my district. I was therefore unable to return to Washington in time to vote on three bills which were approved under suspension of the rules. These bills were H.R. 4333, providing certain disability benefits for former prisoners of war; H.R. 4623, the Veterans' Health Care Amendments; and H.R. 5288, the Emergency Drought Relief Act.

Had I been present, I would have voted "aye" on each of these bills.

I particularly want to point out my support for the Emergency Drought Relief Act. I was an original cosponsor of this legislation, which is needed badly in the Southeastern United States.

This bill does not provide a complete solution for the many farmers who have been hit hard by drought, but it does make available emergency loans and feed donations that could be critical for some farmers. I am delighted that the House has passed this bill by a unanimous vote. Our action today provides both symbolic support and tangible assistance to the farmers who already face formidable challenges.

□ 1140

## APPOINTMENT OF CONFEREES ON H.R. 4151, OMNIBUS DIPLOMATIC SECURITY AND ANTI-TERRORISM ACT OF 1986

Mr. FASCELL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4151) to provide enhanced diplomatic security and combat international terrorism, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida? The Chair hears none and, without objection, appoints the following conferees:

For consideration of the entire House bill and Senate amendment: Messrs. FASCELL, YATRON, MICA, KOSTMAYER, SMITH of Florida, WEISS, MACKAY, BROOMFIELD, and GILMAN, Mrs. SNOWE, Mr. MACK, and Mr. MCCAIN.

As additional conferees for consideration of title IX of the House bill and modifications committed to conference: Messrs. JONES of North Carolina, BIAGGI, STUDDS, DAVIS, and SNYDER.

For consideration of titles III, VIII, XI, and section 603 of the House bill and modifications committed to conference: Messrs. ASPIN, PRICE, and DICKINSON.

For consideration of sections 702, 703, 711, 713, and 714 of the Senate amendment and modifications committed to conference: Messrs. RODINO, HUGHES, EDWARDS of California, CONYERS, MCCOLLUM, LUNGREN, and GEKAS.

For consideration of title III and title VIII of the House bill and modifications committed to conference: Mr. FORD of Michigan, Mrs. SCHROEDER, Ms. OAKAR, Mr. HORTON, and Mr. YOUNG of Alaska.

There was no objection.

## TEXTILE AND APPAREL TRADE ENFORCEMENT ACT OF 1985—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore (Mr. BROWN of California). The unfinished business is the further consideration of the veto message of the President on the bill (H.R. 1562) to achieve the objectives of the Multi-Fiber Arrangement and to promote the economic recovery of the U.S. textile and apparel industry and its workers.

The question is, Will the House, on reconsideration, pass the bill, the objections of the President to the contrary notwithstanding?

The gentleman from Illinois [Mr. ROSTENKOWSKI] is recognized for 1 hour.

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today the House casts an important vote which will help determine what kind of trade policy the U.S. Congress wants to adopt. The question before us is whether we should enact statutory quotas on imports of textiles, footwear, and copper, as supporters of H.R. 1562 propose, or whether to pursue another type of approach to our trade problems. I have a great deal in common with my colleague from Georgia, the sponsor of this bill. Both of us are greatly troubled by our record trade deficits, which continue to rise every month. Both of us are disturbed by the loss of 2 million manufacturing jobs since 1981, and its implications for our industrial base. Both of us are highly critical of this administration's handling of our international trade and monetary problems, and its demonstrated reluctance to act until forced to do so. Both of us feel the urgency to take aggressive action to reduce our trade deficit and revive our sagging international competitiveness.

I regret, however, that we do not agree on the best course of action for the Congress to take. My colleague proposes to respond to the very com-

plex, difficult trade problems this country faces—pressures felt not only by the textile industry, but throughout our manufacturing and agricultural sectors—by legislating unilateral, unconditional import restrictions on certain products. I do not believe that is the right answer to our dilemma, and I seriously doubt that my colleagues are prepared to vote for such measures for every industry in America that faces a trade problem.

The provisions of this bill will move this country's trade policy in the wrong direction. This legislation will make it harder to open up foreign markets and harder to achieve reciprocity in the world trading system. It does nothing to eliminate unfair trade practices. It does nothing to promote growth in world trade. Once the United States has enacted this legislation, we cannot expect to be taken seriously by Japan and other nations when we demand that they eliminate their protectionist policies. We will lose our credibility at the negotiating table. In short, this bill does not address the real trade problems which we face today, and instead mandates a trade policy that will be contrary to our own best interests.

There is a responsible and constructive answer to this Nation's trade difficulties. Less than 3 months ago this House passed H.R. 4800, the omnibus trade reform bill. It does not resort to unilateral protectionism, but instead uses the threat of retaliation in order to promote free and fair trade. It does address the inequities in the trading system, and demands fair play on the part of all who trade with us. I want to remind my colleagues of the major principle underlying H.R. 4800: That the United States is justified in taking tough action against foreign protectionism in areas such as telecommunications. How can we hold that principle out to the world once we disavow all of our bilateral textile agreements and close down our own market for textiles? Countries will be justified in saying to us, "you do it, too!"

Like my colleague from Georgia, I, too, am worried about the trade deficit, jobs and our international competitiveness. But I want to do more than cast a vote out of frustration. I want to pass trade legislation that helps us solve our problems rather than making them worse. I urge a no vote on H.R. 1562.

Mr. Speaker, I yield the remaining time in equal measures to the gentleman from Georgia [Mr. JENKINS], the gentleman from Florida [Mr. GIBBONS], and the gentleman from Tennessee [Mr. DUNCAN].

Mr. Speaker, I ask unanimous consent that they be permitted to yield to other Members.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. DUNCAN. Mr. Speaker, I object to the procedure being followed with respect to division of time for debate. I have always prided myself in telling everyone, including in a speech I made this morning downtown, of the good, friendly and fair relationship that I have with my chairman, the gentleman from Illinois [Mr. ROSTENKOWSKI].

I was surprised when I came to the floor this morning to find that we had no time allocated to the minority. I recall just 2 weeks ago, when I offered a motion to instruct the conferees on the tax conference, that I had an hour and yielded half to my chairman. I just assumed that was the right thing to do, because since I have been in the Congress all these years we have always given the other side at least half of the time. Today, I found that it was all being allocated to the Democratic side.

□ 1150

Under the rules that can be done, but it has not been the custom. Following the regular order of the House, the committee chairman would ordinarily yield to me as his opposite number on the committee half the time. This has been traditionally. I have been in this House 22 years, and to me it has never happened before and I believe it should not happen in this instance.

It is true that this issue will not be settled along party lines. The Members may be split fairly equally on both sides of the aisle. Therefore, it can be argued strongly that time for the debate should be divided between those for the override and those opposed to it. In this case, too, my objection is valid because my friend, the gentleman from Illinois [Mr. ROSTENKOWSKI], and I are on different sides of the question. He opposes override, and I favor it.

To sum it up, Mr. Speaker, tradition, comity, regular order, and fairness all argue for division of time as I have requested. I am aware that the gentleman does control the time and can divide the time, but I call upon him to show his usual fairness. And it is not just his usual fairness; it is fairness as he has always shown it. This is the first time I have ever known the gentleman to be what I might say is unfair in the division of time.

The SPEAKER pro tempore (Mr. BROWN of California). Is the gentleman objecting to the division and right to allocate time suggested by the gentleman from Illinois [Mr. ROSTENKOWSKI]?

Mr. DUNCAN. I do object to that, Mr. Speaker.

The SPEAKER pro tempore. Objection is heard.

The Chair recognizes the gentleman from Illinois [Mr. ROSTENKOWSKI].

PARLIAMENTARY INQUIRIES

Mr. ROSTENKOWSKI. Mr. Speaker, may I make a parliamentary inquiry?

The SPEAKER pro tempore. The gentleman will state it.

Mr. ROSTENKOWSKI. What now does this do with respect to my distributing time?

The SPEAKER pro tempore. The gentleman may distribute the time in exactly the way he indicated as long as he does not ask unanimous consent for those Members in turn to be permitted to yield blocks of time.

Mr. ROSTENKOWSKI. Then, Mr. Speaker, I yield 20 minutes to the gentleman from Georgia. Let me amend that.

Mr. Speaker, I yield the remaining time divided equally among the 3 Members as follows: The gentleman from Tennessee [Mr. DUNCAN], the gentleman from Florida [Mr. GIBBONS], and the gentleman from Georgia [Mr. JENKINS].

The SPEAKER pro tempore. Then the gentleman yields approximately 18½ minutes to each of these gentlemen.

Mr. ROSTENKOWSKI. Mr. Speaker, I have a further parliamentary inquiry.

Do I need unanimous consent, then, in order for my colleagues to whom I have yielded the time to yield blocks of time to other Members?

The SPEAKER pro tempore. The gentleman is correct.

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that the gentleman to whom I have referred have the authority to yield time to their colleagues.

The SPEAKER pro tempore. Is there objection to the additional unanimous consent request of the gentleman from Illinois?

Mr. DUNCAN. Mr. Chairman, reserving the right to object, I have no objection to that.

Mr. Speaker, I would like to suggest the absence of a quorum, and I make the point of order that a quorum is not present.

The SPEAKER pro tempore. There is no objection to the request of the gentleman from Illinois [Mr. ROSTENKOWSKI], and it is, therefore, agreed to.

The Chair will state that under rule XV there is no basis for raising the point of no quorum at this point in the debate.

The Chair recognizes the gentleman from Florida [Mr. GIBBONS].

Mr. GIBBONS. Mr. Speaker, how much time do I have?

The SPEAKER pro tempore. The gentleman from Florida [Mr. GIBBONS] has 18 minutes and 40 seconds.

Mr. GIBBONS. Mr. Speaker, I will yield 5 minutes to the minority side. I want to be sure that they are going to

divide the time equally. I understand that the gentleman from Georgia [Mr. JENKINS] is going to yield some time to them also. Is that correct? We are both going to yield 5 minutes to the minority side?

Mr. JENKINS. It might not be exactly 5 minutes.

Mr. GIBBONS. All right. I will yield 5 minutes. I understood that was going to be the case.

Mr. DUNCAN. Mr. Speaker, I understand the time is allocated equally to me, to the gentleman from Illinois [Mr. CRANE], the ranking Member on the Trade Subcommittee of the Ways and Means Committee, who opposes the override, and to the gentleman from South Carolina [Mr. CAMPBELL], who favors the override.

Mr. Speaker, I ask unanimous consent that I be permitted to allocate the time which has been given to me equally to the gentleman from Illinois and the gentleman from South Carolina.

Mr. GIBBONS. Mr. Speaker, I yield my 5 minutes to the gentleman from Illinois [Mr. CRANE], then.

The SPEAKER pro tempore. The unanimous consent requests are agreed to, without objection.

There was no objection.

The SPEAKER pro tempore. The Chair will attempt to keep track of those Members to whom time has been allocated.

Mr. CAMPBELL. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. CAMPBELL. Mr. Speaker, my inquiry is this: As I understand it—and the Chair may correct me if I am wrong—that the time yielded to the gentleman from Tennessee [Mr. DUNCAN], 18½ minutes, has been divided equally between the gentleman from Illinois [Mr. CRANE] and myself.

The SPEAKER pro tempore. That is the way the Chair interprets it.

Mr. CAMPBELL. Mr. Speaker, if I may make a further inquiry, is it then my understanding that the gentleman from Florida [Mr. GIBBONS] has yielded 5 minutes to the gentleman from Illinois [Mr. CRANE]? Is that correct?

The SPEAKER pro tempore. That is the Chair's understanding.

Mr. CAMPBELL. My question, then, as a parliamentary inquiry is this: Has the gentleman from Georgia [Mr. JENKINS] been given time, and has he yielded yet?

The SPEAKER pro tempore. The gentleman from Georgia [Mr. JENKINS] has not been recognized up to this point.

Mr. CAMPBELL. My further inquiry then would be this, if I may state it: If the gentleman from Georgia [Mr. JENKINS] is yielded the time of 18½ minutes, then he still is allowed to yield time to this gentleman if he so desires?

The SPEAKER pro tempore. The gentleman is correct.

Mr. GIBBONS. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. GIBBONS. Mr. Speaker, I am the ranking Democrat on the Ways and Means Committee. I support the position of the President. I assume that I will be allowed to close debate; is that correct?

The SPEAKER pro tempore. The gentleman is correct as ranking majority member at this point.

Mr. GIBBONS. All right. Mr. Speaker, how much time do I have?

The SPEAKER pro tempore. The gentleman started out with 13 minutes and 40 seconds after he yielded 5 minutes.

Mr. GIBBONS. I thank the Chair.

Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, this is perhaps the most historic vote this Congress will cast this year, next year, last year, or any year in this timeframe. This is more than just a foreign policy vote. This is more than just a national policy vote. This is a tax to be levied on all American people, a tax starting at around $7 billion a year and going up over a 5-year period to a total of about $44 billion.

This is a new and added tax that people will have to pay. Who will be the taxpayers in this respect? Will they be the wealthy? Will they be business? No, they will be the poorest of all Americans. That is who will pay this tax. They will pay it as they purchase their shoes, their socks, their underwear, their coats, and their jackets so that they can go to work and go to school. These are the people on whom we will be putting an additional burden.

We will be saying to the rest of the world that we are "Uncle Welcher." We have about 40 agreements that will be broken unilaterally by this one act. We will be punishing such friends as Israel by rolling back its imports of textiles by 44 percent. Yet this is a country with which we just solemnly finished negotiating a treaty, a free trade arrangement, less than a year and a half ago. We will roll their trade back by this bill by 40 percent.

I cannot tell the Members what this will do for the reputation of the United States. They can all judge that. We cannot enter into as many agreements as we have and then unilaterally walk away from them when the going gets tough.

The SPEAKER pro tempore. The time of the gentleman from Florida [Mr. GIBBONS] has expired.

Mr. GIBBONS. Mr. Speaker, I yield myself 30 additional seconds.

Mr. Speaker, there have been many false figures used here. The textile industry is healthy. It is prosperous, and it is in change. It was a stellar performer last year on the stock market. It is increasing in employment today, and all of the sounds and all of the songs about how badly it is doing are a distortion, a bad distortion of the true facts.

The SPEAKER pro tempore. The time of the gentleman from Florida [Mr. GIBBONS] has expired.

□ 1200

Mr. JENKINS. Mr. Speaker, I yield 2 minutes to the gentleman from South Carolina [Mr. DERRICK].

Mr. DERRICK. Mr. Speaker, this is an historic vote. I certainly agree with the gentleman from Florida [Mr. GIBBONS] on that, but there are those who would lead us to believe that we, as Representatives of this country, do not have the right to be concerned about the jobs of Americans. This is ridiculous.

There are those who tell you that this is protectionist legislation, and they are correct; but this is legalized protectionism. It is protectionism that has been agreed to.

We all know what the GATT agreements are, the big ball of wax. Fourteen years ago, it was agreed by the member nations, the signatories, that textiles represented a special place. It was agreed that this would be an abrogation of the GATT agreements. All the signatory countries signed the Multi-Fiber Agreements.

The reason we are here today is because our Nation has not enforced its part of these Multi-Fiber Agreements.

The European Common Market saw it coming in the early 1980's. They limited their imports.

Japan saw it coming a long time ago. They have kept their imports at a very low level.

Korea does not allow any textile/apparel goods into that nation from a wage market that is less than theirs. The list goes on and on.

The problem that we face, and I might add that I have lost thousands and thousands of jobs in South Carolina and throughout this Nation, that the Third World nations who are starved admittedly for dollars because of the relatively low capitalization and high labor intensity have flooded and overproduced in the world. We are the only market in the world, for practical purposes, that is open to them. They are flooding our markets because other countries are not enforcing their part of the Multi-Fiber Agreements.

Mr. Speaker, I urge the House to vote to override the President's veto for the Members that you represent and the citizens that you represent and for the jobs of this Nation.

Mr. Speaker, I rise today to urge my colleagues to vote to override the President's veto of H.R. 1562, the Textile and Apparel Trade Enforcement

Act of 1985. There are plenty of good economic reasons for this but the most important one is simply—jobs. Textile plants are closing every month all across the United States because of unfair competition from cheaply made foreign imports. Almost 400,000 American citizens have lost what may be their only means of livelihood. Our economy ends up as the net loser: Unemployed people don't buy goods and don't pay taxes.

I am not willing to sit back and let this industry be run into the ground on the basis of maintaining the principle of "free" trade. Without fair trade, there can be no free trade! How can it be fair when the major textile exporters subsidize their industries and pay their employers $1 a day? We can't compete with that type of management, and I don't want to. Our employees are some of the most productive in the world, and with a level playing field, we can compete with any foreign nation.

This bill does not do a thing that our Nation has not already decided was necessary to maintain a decent market for our domestic textile industry. What this bill does is require the administration to enforce the laws that are already on the books. I have heard the argument about the abundance of regulations for every form of fiber and fabric known to man. However, those regulations aren't worth the paper they are printed on if we continue to look the other way when the shipments of garments from Taiwan are unloaded in our ports.

The American people cannot take this unfair treatment from our own trade policies anymore.

What is more important—South Korea or South Carolina?

Mr. CAMPBELL. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania [Mr. SCHULZE], a distinguished member of the Trade Subcommittee and of the Ways and Means Committee.

Mr. RUDD. Mr. Speaker, will the gentleman yield?

Mr. SCHULZE. I yield to the gentleman from Arizona.

Mr. RUDD. Mr. Speaker, I rise to express my opposition to H.R. 1562, the Textile and Apparel Trade Enforcement Act.

When the President vetoed H.R. 1562 last December he directed the Office of the U.S. Trade Representative to negotiate a stronger and more comprehensive multifiber arrangement.

The new agreement, which was released August 1, extends coverage to fibers such as ramie, linen and silk blends which were previously uncontrolled. The new agreement also provides a mechansim to prevent destructive import surges, and improves provisions to prevent fraud. Also, as the new arrangement was being negotiated, U.S. representatives made clear that the United States would continue to pursue measures in our bilateral agreement that will open markets to our textile exports.

H.R. 1562 would impose significant costs on U.S. consumers. The President's Council of Economic Advisers estimates that U.S. consumers will pay an additional $44 billion for clothing over the next 5 years. In other words U.S. consumers will pay $70,000 for each $13,000 a year textile job saved.

Furthermore, the United States will encourage its competitors to increase their profits by shifting their production into higher valued merchandise. Lower and middle income consumers will suffer as lower-priced goods disappear from stores.

Besides raising costs for domestic consumers, a more restrictive textile trade policy would provoke retaliation by our trading partners, harming many more industries. If the Smoot-Hawley Tariff Act of 1930 is any indication of what would happen as a result of this bill's and related legislation's passage, we would be in serious trouble. The 1930 act provided retaliation by 25 of our trading partners, and U.S. exports fell by two-thirds in just 2 years. It was a prime cause of the Great Depression.

Finally, H.R. 1562 assumes that imports are the sole cause of the economic difficulties facing the textile industry. In reality the situation is much more complex. Jobs are also being lost because of automation and the shutdown of outmoded plants.

Enacting restrictive trade barriers may offer temporary relief to the textile industry, but at the same time it would impose significant costs on U.S. consumers. The ultimate costs of H.R. 1562 cannot be estimated when we take into consideration retaliatory measures enacted by our trading partners. I urge my colleagues to oppose this attempt to override the President's veto.

Mrs. SMITH of Nebraska. Mr. Speaker, will the gentleman yield?

Mr. SCHULZE. I yield to the gentlewoman from Nebraska.

Mrs. SMITH of Nebraska. Mr. Speaker, I rise in support of the President's position.

For every 1 billion dollars' worth of farm products this country doesn't export, 35,000 agricultural workers lose their jobs. Additionally, 60,000 nonfarm jobs vanish when those exports disappear.

In a period of weak exports this past year, the three countries who would feel the greatest bite from this legislation, Hong Kong, South Korea, and Taiwan, bought nearly 2 billion dollars' worth of goods from our farmers. Only 2 years ago that figure was up to $3½ billion.

What we should be debating here today is not the further protection of an already heavily protected industry. Imported textiles already face higher average tariffs than any other U.S. imports—an average of 22 percent.

What we should be debating here is not measures that will guarantee even higher profits to an already prosperous industry. Textile production is not down, and textile profits are on the rise. Our consumers already pay enough for the shirts on their backs.

What this Congress should concern itself with now is not expanding protectionism, but increasing competitiveness. The deficit, the dollar, and the whims of the Department of State have all hurt America's position as an exporter.

My friends, we have to build roads, not walls.

This debate is not designed to save an American industry from unfair competition. If they want to say it is, let the supporters of an override explain why Hong Kong—Hong Kong which has not one barrier to the entry of United States goods—let them explain why Hong Kong is one of the primary targets of this legislation.

One out of every three Nebraska acres is dedicated to production for export. Let us find a way to build markets for those commodities, and other U.S. exports, before we throw barbed wire on our shores.

Mr. LAGOMARSINO. Mr. Speaker, will the gentleman yield?

Mr. SCHULZE. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Speaker, I rise today to urge the House to sustain the President's veto of H.R. 1562, the Textiles and Apparel Trade Enforcement Act of 1985. It is no wonder that this legislation is opposed editorially by such diverse papers as the Wall Street Journal, the Washington Post, and the Los Angeles Herald, by six members of the President's Cabinet, and the Chairman of the Federal Reserve Board.

This legislation is a blatant violation of U.S. commitments and obligations under the GATT and the fundamental principles of the multifiber arrangement [MFA] and would put a new round of congressionally supported multilateral trade agreements; that is, in jeopardy. Hong Kong, Taiwan, and South Korea, also, what incentive would there be to negotiate with the United States. It will invite certain retaliation by many of our free world allies threatening thousands of jobs in agriculture, aerospace, and semiconductor parts. The United States is still the world's largest exporter and consequently we will have the most to lose in a trade war. Under GATT our trading partners would have the right to shut off American exports equal to their loss.

The bill is blatantly discriminatory because it is directed only at the developing Asian and Latin American countries while excluding major textile exporters such as Canada and the European Community. Moreover, many of these countries are important to the United States as foreign policy, military, and economic allies. The House should remember that Asia is our largest and fastest growing export market. However, the United States will be unable to sell our products overseas if other nations are denied export earnings. Also, some of these nations are deep in debt to U.S. banks and need to have a sound base for foreign exchange earnings or else increased U.S. foreign aid assistance may become necessary.

This bill will raise the price of clothing and shoes by more than $44 billion at the retail level over the next 5 years. Low income families would be the ones most affected by the unavailability of low priced imports.

Supporters of this legislation say that this is a way to save American jobs and prevent irreversible damage to the textile industry. Textile-apparel

industry statistics tend to point in a different direction. Productivity in the industry has increased by 3.4 percent per year since 1980. Factory utilization in textiles is at 88.4 percent in 1986 compared to a national average of 78.6 percent. Finally, average unemployment in the main textile States is 5.5 percent versus 6.9 percent in the United States. It is interesting to note that stock prices of seven of the largest textile companies were up 70 percent in a year.

The textile-apparel industry is already the most highly protected industry in the Nation. It has and will continue to benefit from the decline in the dollar and improved domestic productivity. I have always felt that it is better to negotiate than legislate and this administration recently negotiated a favorable multifiber arrangement with the three largest textile supplier nations. Interestingly, the textile industry has never taken a case to the International Trade Commission.

Mr. Speaker, I would remind my colleagues who think that retaliation is not likely, to just ask our wheat farmers about the retaliation they suffered the last time we restricted Chinese textile exports of the computer products industry when we placed a stiff tariff on imported Canadian cedar shingles. I urge my colleagues to uphold the President's veto and oppose this dangerous piece of legislation.

Mr. Speaker, I include the following articles:

[From the Los Angeles Examiner, Aug. 4, 1986]

DANGERS OF PROTECTIONISM: TEXTILE BILL WOULD UNDERMINE THE MARKET

Democrats, and some renegade Republicans, are demanding an override of the president's veto of the Textile Quota Bill, which would restrict fabric and apparel imports. When Congress faces the issue this week, politicians should resist this shortsighted solution that threatens to undermine the world economy.

The recent renegotiation of U.S. textile trade agreements has limited importation of certain fibers. Most important, Asian textile producers are agreeing to open their markets to U.S. goods and reduce subsidies.

The proposed law, however, would work against furthering cooperation between the U.S. and Asian producers, with its mandate to cut by 30 percent imports from Taiwan, Hong Kong and South Korea.

The bill would push the world even closer to the "spiral of protectionism" feared by Federal Reserve Board Chairman Paul Volcker, who warned it would result in recession as nations close off their markets.

Moreoever, the bill would limit the flexibility of U.S. negotiators seeking agreements with greatly different nations. For example, Taiwan and Hong Kong, two of the largest exporters to the U.S., are more willing and able to agree to trading concessions than the less developed economies of South Korea and Thailand.

The bill has been touted as a way to save American jobs and prevent irreversible damage to the textile industry, particularly in North Carolina, South Carolina and Georgia. But recent layoffs, along with modernization, have made domestic textile companies more competitive, and the industry's productivity is climbing faster than many other types of manufacturing. Unemployment in those three states is below national averages due to new jobs in other fields.

Though the textile bill likely would do little to save jobs, it almost certainly would force clothing prices up, since the legislation would cut the supply available to Americans.

The urgency in Congress to do something about international competitors is understandable, especially in light of the record trade deficits the U.S. has been ringing up. But trade protectionism will only weaken domestic markets and hurt American consumers.

---

[From the Wall Street Journal, July 17, 1986]

THE SHIRT OFF YOUR BACK

We have a small request. The next time you walk into a store and are surprised at the suddenly higher price on that cotton shirt or linen blouse, send the bill to Ed Jenkins at the U.S. House of Representatives, Washington, D.C. Rep. Jenkins (D., Ga.) will no doubt be expecting it, because he knows that he and his friends in Congress are a major reason millions of Americans will be paying more for their clothing in the next few months and years.

Mr. Jenkins is the main sponsor of the textile protection act that President Reagan vetoed last year, and he doesn't quit easily. He and the other congressional trade kamikazes have now scheduled a vote to override that veto on Aug. 6, unless the Reagan administration can fend them off by proving beforehand that its instincts are also destructively protectionist. And, by jingo, the administration took another step in that direction Monday by imposing new and onerous limits on imports from Taiwan, America's largest clothing supplier. Hong Kong already received its mugging earlier in the month, while South Korea, another productive ally, is next on the hit list.

For the Reagan administration, we suppose there is some perverse logic in imposing a little protection to forestall the truly awful Jenkins bill. Congress would have rolled back imports by 30%, while this week's Taiwan accord provides for no rollback but instead limits the growth in imports to 0.5% a year through 1988. The agreement with Hong Kong allowed all of 1% annual growth, generously reflecting the fact that the colony imposes not a single trade barrier on U.S. products.

Note well, however, that even these accords haven't made Ed Jenkins and his fellow price-gougers happy. Mr. Jenkins himself responded with an appropriate dizzy metaphor: The Hong Kong accord, he said, is like "saying to an alcoholic who has increased his drinking consumption to a quart of liquor a day that it is perfectly all right for him to continue to drink a quart . . . so long as he does not increase much beyond that level." Former Rep. James Broyhill was sworn in as the new Republican Senator from North Carolina Monday, and the very first thing this new statesman said was that he'd continue his House efforts to override the textile veto.

The problem with a protectionist U.S., even if the protection mainly takes the form of a lot of huffing and puffing by members of Congress, is that one can never predict the point at which damage and recrimination will begin to snowball into something uncontrollable. Foreigners may not vote in U.S. elections, but they do in fact buy millions of dollars of American products that are tied directly to jobs in the U.S. As one Hong Kong newspaper put it this month, these U.S.-made products "could begin gathering dust on Hong Kong shelves." Maybe our exporters should send their unsold goods to Rep. Jenkins, too.

At some point soon, the Reagan administration might consider that trying to immunize Congress with a little protection only serves to spread the disease.

---

TEXTILE FACT SHEET

This Administration has done more than any other to assist the textile and apparel industry and will continue to do so.

The Administration has instituted ongoing efforts on the international front to aid our industry.

Over 1,300 quotas are in place covering 38 countries; we are negotiating with two more. Only 24 countries were covered by agreements in 1981.

Over 550 of these quotas have been established since 1981, including 250 in 1985 alone. Over 80% of U.S. textile and apparel imports from low-wage countries are covered by quotas.

The Administration just renegotiated agreements with Hong Kong, Taiwan and Korea over a year and a half early with expanded product coverage and the toughest limits ever on import growth (1% or less).

On August 1, the Administration successfully renegotiated a stronger and more comprehensive Multifiber Arrangement (MFA) that will help our textile and apparel industry compete more fairly in the international marketplace. The new MFA exceeds the President's promise in last year's textile bill veto message to renegotiate the MFA "on terms no less favorable than present."

The new MFA, which runs through July 31, 1991, contains strong mechanisms to prevent disruptive import surges and expands product coverage to previously uncontrolled fibers such as ramie, linen and silk blends. Coupled with the tougher bilateral agreements, the new MFA will allow us to moderate growth in textile and apparel imports without incurring reprisals against U.S. exports.

The Administration has taken the administrative steps necessary to ensure these agreements are enforced. The Customs Service tightened its program against quota fraud and implemented new rules of origin to make evasion more difficult. At industry's request, Customs increased its scrutiny of Japanese fabric shipments.

The textile and apparel industries are by far the most protected in the manufacturing sector. In addition to quotas, tariffs in this sector average about 22 percent.

The Administration's program has balanced the need to prevent market disruption at home with our obligations abroad. The U.S. industry has benefited.

Textile output rose 11 percent and apparel output 3 percent in the first five months of 1986.

Textile industry profits more than doubled in the first quarter this year compared to the same period last year and capacity utilization rose from 79 percent to 88 percent.

Employment, measured by man-hours, increased 4 percent in textiles and ½ percent in apparel in the first half of 1986.

U.S. exports of textiles and apparel for the period January-May are up over the same period last year: 13 percent for textile mill products and 19 percent for apparel.

The textile quota bill would undo the progress we have made, hurt the American consumer, and invite almost certain trade retaliation which would threaten American jobs from agriculture to aviation.

H.R. 1562 will cost American consumers over $44 billion over the next five years, almost $70,000 for each textile job (average wage: $13,000) "saved" by the bill. Moreover, other jobs would be lost in retailing, importing and exporting.

Because the bill clearly violates our GATT obligations, the countries most affected will almost certainly retaliate against the United States. Their targets would be clear: the 12 major textile-producing countries cited in the bill imported $50 billion of U.S. goods in 1985, including soybeans, wheat, cotton, tobacco and aircraft.

Mr. LEACH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. SCHULZE. I yield to the gentleman from Iowa.

Mr. LEACH of Iowa. Mr. Speaker, few veto overrides are more tempting to vote for than this one. Many of the premises of those favoring an override are valid. The trade imbalance of the United States is staggering. The textile industry has lost jobs in part because the backbone of our trade negotiators has been less than stiff.

Yet when all is said and done, this override effort must be considered a landmine for trade rather than a landmark for justice.

Far more than textiles are at issue. The world is watching to see what kind of leadership the United States is willing to take on the trade front. Not only is the prospect of liberalization of trade under GATT in jeopardy, so is the prospect of maintaining stability in current trade. In the final measure a veto override raises the prospect of sparking trade retaliation and reducing world commerce. It would almost certainly curtail world economic growth and cut back the average living standard of the average citizen—at home and abroad.

In the largest measure, however, protectionist trade policies of this nature are not only economically foolish; they are politically dangerous. They sow the seeds of social instability and conflict around the world. They make the world more unstable at a time when responsibility is most in demand.

History illustrates how Japan in the first half of this century expanded militarily in direct relation to its tariff isolation. History teaches that a lack of economic growth in developing countries produces social turmoil and breeds radicalism. History teaches that the cost of responding to protectionist economic policies can be towering—in terms of wars fought, famines instituted, and weapons purchased.

Some of us in this body have been concerned that the administration has been too unilateral in its political and military policies abroad. Ironically, the alternative political party in this country has produced a protectionist approach that sets a standard of unilateralism in trade policy with explosive repercussions that go well beyond the trade arena.

A far preferable approach is to acknowledge the trade dilemma with which the United States is confronted and to recognize what Congress can constructively do about it. The more challenging approach is to seek to reduce the trade deficit by expanding exports rather than restricting imports. Economic growth is preferable to industrial stagnation; entrepreneurial answers are preferable to cheap political blamesmanship. It is time the American consumer stops being ripped off by politicians who prefer to reach for excuses rather than work for answers.

Congress, after all, is institutionally responsible for the greatest fiscal mistake of the century—a peacetime deficit of unprecedented dimensions. It is fiscal irresponsibility, not trade negotiation, which is chiefly responsible for the overvaluation of the dollar and the highest real rates of interest in this century. Righting the imbalances and the unfairness implicit in the budget deficit is the single most important and effective thing that Congress can do to protect domestic industry. The trade deficit will be more likely to shrink in relation to reductions in the budget deficit than in relation to protectionist steps of the nature contemplated in this bill.

Trade protectionism is an irresponsible copout. It is an ostrichlike response to the real problems of our day. The President's veto should be upheld so Congress can devote its priorities to the proper task—righting its own economic mistakes.

Mr. CHANDLER. Mr. Speaker, will the gentleman yield?

Mr. SCHULZE. I yield to the gentleman from Washington.

Mr. CHANDLER. I rise in support of the President's position.

Mr. Speaker, those who support and those who oppose the Textile and Apparel Trade Enforcement Act have one fundamental commitment in common: We all want to do everything we can to make sure that every American who wants to work can find a job. That's why debate over this bill is so emotionally charged on both sides. We're all concerned about people's jobs.

But the question before this House is not which side is motivated by the best intentions. Clearly both sides mean well. The question before this House is whether this bill is fair, whether this bill will strenghten our economy, and whether this bill will actually save jobs.

Mr. Speaker, unfortunately, this bill is not fair.

It isn't fair to the American consumer, whose costs for clothing and shoes will increase by over $44 billion over the next 5 years if we pass this bill. And it certainly isn't fair to the poorest among us who spend the greatest percentage of their income on clothing.

It isn't fair to our trading partners. It isn't fair to unilaterally abrogate 38 existing bilateral restraint agreements, and it isn't fair to violate GATT principles of "special and differential treatment" for developing countries.

It isn't fair to the Third World. This bill exempts the West Europeans and targets Asian countries. The bill will clearly be perceived as discriminatory in the Third World.

The bill will not strengthen our economy.

Triggering a global trade war will not strengthen our economy. Violating international trade agreements will not only prompt retaliation, it will legitimize retaliation. Who will be affected by retaliation? Our export-competitive industries, including agriculture, high technology, and aircraft.

Is that anyway to strengthen our economy?

Will the bill save jobs? At the moment, unemployment in the textile industry is 6.5 percent, lower than the overall rate of unemployment in this country. Average unemployment in the primary textile States is only 5.5 percent, well below the national average of 7 percent.

Will the bill save jobs? According to the Commerce Department, at least three jobs in footwear wholesaling and retailing would be lost for every job protected in footwear manufacturing.

Will the bill save jobs? We know that corn, soybeans, cotton, wheat, tobacco, lumber, coal, fertilizer, aircraft, electronic components, and office machine parts exports would be curtailed as the result of the retaliation that would inevitably follow enactment of this bill. Is it fair to put those jobs at risk?

Mr. Speaker, we all want to save jobs for American workers, but there's an old saying that what goes around comes around. Trying to build barriers between our economy and that of the rest of the world won't work. In the long run, American workers and American consumers will pay for the folly of this shortsighted, protectionist proposal.

Mr. SCHULZE. Mr. Speaker, I rise in support of overriding the President's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act.

Even though the Government has successfully renegotiated somewhat tougher bilateral textile agreements and a strengthened multifiber arrangement, voting in favor of overriding this veto is essential because of its symbolic importance. It symbolizes all the frustration our Nation has experienced with the lack of a comprehensive, clearly directed, and fully implemented trade policy for our Nation. It is my firm belief that if we had established such a trade policy, not only would we not be taking up this measure today, we also would not have the burden of a trade deficit of $150 plus billion.

In vetoing H.R. 1562 last December, the President stated that the legislation would result in lost American jobs and damage to our world trading

system. He also pledged "to do everything possible to combat unfair trade practices."

Since that veto, however, our trade deficit has rocketed to new heights, which has exacerbated U.S. job loss, increased the fragility of our world trade order, while unfair trade practices are allowed to flourish.

The plight of U.S. textile and apparel industries serves as a mocrocosm of all of manufacturing, which has borne the brunt of our ever spiraling trade deficit: continued import surges, growing numbers of dislocated workers, and decreasing export opportunities.

In overriding the Presidential veto of H.R. 1562, Congress will loudly declare that enough is enough. We can no longer be the sole engine of world industrial growth at the expense of destroying our own industrial base. We will not tolerate countries paying lip service to removing old trade barriers, while simultaneously erecting new ones. Our Nation can no longer exist in an ivory tower!

Enacting H.R. 1562 will force the rest of the world into realizing that the responsibilities of our international trade regime must be shared or it will be seriously jeopardized, and that a coherent and decisive trade policy will be a first priority for our Nation.

Mr. Speaker, I urge that my colleagues vote to override the President's veto of H.R. 1562.

Mr. CRANE. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, I want first of all to extend a word of appreciation to my distinguished colleague on the Ways and Means Committee who was the initial author of the textile bill and who was the person gracious enough to send us these lovely shirts yesterday to illustrate his concern about foreign imports. I must say, they are very beautiful cotton polo shirts. They have got a lovely logo down here in the corner. The shirt is priced, according to the tag, at $34. Our colleague sends them out to illustrate that while one was made in Singapore, the other was made in the United States, both of them retailing at $34.

I would only suggest that that is not an illustration of unfair trade, but rather an illustration of a lack of good judgment on the part of the retailer if he bought the Singapore product at less cost than he paid for the American product and is selling them both at $34.

I did go out and check, though, a number of other stores here in the Washington, DC, area. I found one that is quite comparable, in fact, to the one that the gentleman sent us. It does not, to be sure, have that beautiful polo logo down there in the corner, but it sells for $16. It is also 100-percent cotton. This shirt also happens to be made in Singapore. It carries a trade name up on the top, as does the other.

The thought crossed my mind that you could buy two of these for the price of that one and still have a couple bucks left over for a couple beers.

Now, some of the shirts were priced in fact below $10 and were American-made shirts, which suggests that the American manufacturers are being competitive. That would be borne out certainly by the figures that we see in some of the most recent headlines, "Dupont fiber profits soar 85 percent in second quarter, 76 percent in 6 months. Stevens has $9.7 million profit in second period. Van Heusen earnings rocket 48 percent in first period. Burlington up 143 percent."

I submit, Mr. Speaker, that the industry is not suffering, that the President has exercised leadership in behalf of free trade.

We should sustain the President's veto.

Mr. JENKINS. Mr. Speaker, I yield 1 minute to the gentleman from Massachusetts [Mr. FRANK].

Mr. FRANK. Mr. Speaker, I thank the gentleman. I want to acknowledge his leadership.

Mr. Speaker, we had been told, those of us who are concerned about hundreds of thousands or more working men and women whose livelihoods are threatened by the tide of underpriced and subsidized imports that we have a problem, but this is not the way to deal with it.

This administration has succeeded in turning back any other way to deal with this problem. Adjustment assistance that used to exist for people who were going to be hurt by imports, that is virtually gone. For most of the term of this administration, they had boasted of their efforts to drive the dollar up, which hurts American products.

In bilateral negotiations time and again the President trades away his view for political interests and gives in on economic interests.

We have nations which ban whole categories of American goods, benefiting from their ability to flood our markets with imports; yet there are some poor countries out there who ought to get some consideration and who are entitled to be able to sell. There are some wealthy countries as well.

Hong Kong is no pocket of poverty. Taiwan is developing rapidly and does not need to make progress at the expense of American workers.

We are here with this bill because nothing else will work because this administration has cut off every other effort to bring help to these working people.

Mr. GIBBONS. Mr. Speaker, I yield 2 minutes to the gentleman from Washington [Mr. BONKER], the chairman of the Export Caucus of the Congress.

Mr. BONKER. Mr Speaker, I would like to commend the distinguished chairman of the Ways and Means Subcommittee on Trade for his work on this and other trade issues.

Mr. Speaker, I can make a much better case for the timber and wood products industries than the advocates are making for the textile industry in this bill. Unemployment is twice as high in timber and wood products. Just recently, Weyerhaeuser employees had to accept a wage and benefit reduction of 20 percent so that their plants could be more competitive.

Import penetration is much greater in wood products than it is in textiles and the country that is doing the importing is heavily subsidizing, clearly an unfair trade practice.

So what do I tell my workers when Congress protects textiles, but not timber? Clearly, this is a double standard and one that cannot be justified.

This leads to a second point—precedent setting. If I can make a better case for timber, so could my colleagues on a number of industries that affect their areas: Automobiles, machine tools, petroleum and refining, aluminum, and the list goes on and on.

If we override today, we will have thrown open the door and extended an invitation for Congress to protect industry after industry. It will be Smoot-Hawley all over again.

The last point concerns our international commitments. The United States has just signed a Multi-Fiber Arrangement. This is a vast improvement over previous MFA's.

We have also signed a least three major bilateral agreements on textiles. An override today would unilaterally violate those agreements.

So what is our word worth today? As the most power and respected nation in the world, are we going to simply walk away from our international obligations? How on Earth do we expect other nations to adhere to our treaties and agreements which we do not honor ourselves?

Mr. Speaker, I am afraid if we do not sustain the veto, it wil be a dark day for America and for the world trading system. We will have sunk to a new low. We will have set a very bad example.

The House recently passed a comprehensive trade bill that will improve our competitiveness and bring down the trade deficit. It deserves a chance to work. It is a positive way to address our trade problems.

I have been as critical as any Member in the House of the President's trade policy. Until recently, this administration has all but ignored the problem, but this textile bill is not the answer.

Mr. Speaker, I urge my colleagues to vote no on the motion of the gentleman from Georgia [Mr. JENKINS].

□ 1215

PARLIAMENTARY INQUIRY

Mr. CAMPBELL. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore (Mr. BROWN of California). The gentleman will state it.

Mr. CAMPBELL. In the discussion earlier, did the gentleman from Georgia yield any additional time to the gentleman from South Carolina?

The SPEAKER pro tempore. The gentleman did not yield additional time.

Mr. JENKINS. Mr. Speaker, I yield 3½ minutes to the gentleman from South Carolina [Mr. CAMPBELL].

Mr. CAMPBELL. I thank the gentleman. Mr. Speaker, might I inquire how much time I have remaining?

The SPEAKER pro tempore. The gentleman from South Carolina has 9 minutes and 50 seconds remaining.

Mr. CAMPBELL. Mr. Speaker, I yield 2 minutes to the gentlewoman from Maine [Ms. SNOWE].

Ms. SNOWE. Mr. Speaker, I rise in strong support of overriding the President's veto of H.R. 1562. Today is the day this House either votes to take a stand against unfair trade practices or joins the administration in running up the white flag of surrender in the international marketplace.

In the 8 months since the President vetoed this legislation, there has been ample opportunity for him to demonstrate a willingness to take a strong stand against dumping and the deliberate assault on the textile and shoe industries. The U.S. Government instead has pursued a policy characterized by inaction and neglect.

The results of the current trade policy are clear. In the footwear industry, for example, 32 factories and 6,200 jobs have been lost since the President's veto. Imports rose another 14 percent over last year's recordbreaking levels, accompanied by a 10-percent drop in domestic production. When I last spoke in favor of this legislation, imports controlled 78 percent of the domestic market. They now control 81 percent of the domestic market. In spite of the threat of this legislation, our trading partners remain undeterred.

I would suggest to my colleagues that we're not just observing a trend with these figures, it's a death watch. For if we cannot take action on behalf of this industry, which was granted relief by the ITC yet ultimately rejected by the President, when will we ever act on trade?

That's why it is crucial that the House override the President's veto. The footwear provisions in this legislation are hardly onerous. It still allows imports to represent 6 out of every 10 pairs of shoes sold in the United States, still an astonishingly high level.

Mr. Speaker, when measured against the import and export policies of our trading "partners," H.R. 1562 is a moderate, restrained approach. Some have labeled it protectionist. The President has labeled it destructionist. I label it as nothing more than survival, and I thus urge my colleagues to join in overriding the President's veto.

Mr. JENKINS. Mr. Speaker, I yield 1 minute to the gentleman from Minnesota [Mr. OBERSTAR].

Mr. OBERSTAR. Mr. Speaker, opponents of textile-import relief say that quotas will trigger a war with our trading partners. Well, first of all, they are not partners, they are trading adversaries. In case the administration and others have not noticed, there is a war already under way, and we are losing it. America has become a dumping ground for the unemployment and other economic problems of our trading adversaries. We have closed over 550 steel plants, laid off 400,000 steelworkers, and we have virtually shut down the domestic copper industry. You can hardly find a shoe made in the U.S.A. Brazil provides 27 tax subsidies for the export of iron ore. And this administration has still to meet a foreign tax subsidy that it does not like.

Several years ago the Arrow Shirt Co., shut down the last of five shirt factories in my northeastern Minnesota district because of imports, and within a week shirts made in Sri Lanka, Singapore, and Hong Kong were showing up in communities where those shirt factories were shut down.

In the late seventies, President Carter put a quota on specialty steel imports which had taken 80 percent of the U.S. market. Within 3 years the domestic specialty steel industry had recovered and regained 80 percent of the market, with 9,000 people back to work. Our trade deficit is deindustrializing America. Let us stop that slide down the slope of destroying America as an industrial nation.

Mr. CRANE. Mr. Speaker, I yield 1½ minutes to the gentlewoman from Connecticut [Mrs. JOHNSON].

Mrs. JOHNSON. Mr. Speaker, I share the anger and frustration of those who have watched communities devastated by undisciplined foreign competition. I share the anguish of all those in the textile, shoe, machine tool, and bearing industries who have suffered as a consequence of this Nation's not having strong, 20th century trade laws, aggressively enforced. But the answer is trade law reform. The answer is strong enforcement.

For the American textile industry we now have strong agreements providing more comprehensive and enforceable protection than is afforded any other American industry. We have a strong commitment to enforcement here and by Jim Baker, who in a recent letter to me said:

I can also guarantee that the Customs Service will firmly enforce the provisions of these and all our bilateral textile agreements to prevent quota evasion.

My colleagues should remember the grain embargo and the pipeline embargo, and remember how long it took us to shake the label of "unreliable supplier," to earn our way back into the confidence of the international community, because we had unilaterally abrogated contracts.

Today we consider unilaterally abrogating not contracts negotiated by individuals, but international agreements negotiated by our Government. If "unreliable supplier" was hard to shake, think how much harder it will be to shake "unreliable negotiator."

Our vote today is not on textiles, shoes, and copper. It is a statement about how this House, this Congress, views international commitments. Do we believe ourselves bound by the tradition of diplomacy and negotiated agreements that has governed trade and international relations historically? Let us reject the temptation to deal with our failure and frustration through an erratic, destructive gesture which is called here on this floor of the House "overriding the President's veto," but which is the real world, in the international community, levies a body blow at bilateral negotiations who alone can bring order to trade relations, protection for all American jobs, and peace in a nuclear age.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. BIAGGI].

Mr. BIAGGI. Mr. Speaker, I rise in support of overriding the President's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act.

Sure, there are many good reasons why the textile and apparel industry needs the relief provided in this bill. After all, since 1980, 388,000 textile and apparel jobs have been lost due to the flood of foreign imports.

However, that's not the only reason why this vote is so important. Simply put, today we have an opportunity to tell the world that the United States won't be anybody's sucker anymore when it comes to foreign trade. We have been too generous for too long and look where it's gotten us. Our U.S. trade deficit for this year is expected to be $170 billion, and for the last 5 years, it has exceeded $600 billion.

While we've opened our trade doors about as wide as they can go, our foreign trading partners have slammed their trade doors in our face. The result, millions of lost American jobs; and billions of lost U.S. dollars due to plant closings, unemployment assistance, and so many other ills that come from the decimation of a vital U.S. industry.

Some have argued that the Multi-Fiber Arrangement and other bilateral agreements between the United States and foreign nations provide all the protection that is necessary. Wrong! The MFA and other bilateral agreements are inadequate and are not being enforced. In fact, all this bill does is require the

Government to establish import levels where they should be if the MFA had been enforced.

Others have said that this bill is anticonsumer because it will raise the prices of textile and apparel goods. Wrong again! There is little difference at the retail level between foreign and domestic goods. Retailers turn the lower priced foreign goods into higher profits through markup; they don't pass those savings along to the American consumer.

Finally, consider this argument for the bill. A recent study by an economics consulting firm revealed that the net impact of this bill would be an additional $2.8 billion in GNP and 140,000 U.S. jobs. Conversely, if this bill is not enacted, we can expect nearly 1 million additional lost jobs in the next 4 years and another $24 billion tacked onto the Federal deficit.

The choice is not a difficult one. I urge my colleagues to join me in voting to override the President's veto.

Mr. JENKINS. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Illinois [Mrs. COLLINS].

Mrs. COLLINS. Mr. Speaker, I rise in support of overriding the President's veto.

Mr. Speaker, once again the administration has let the American people down. Unemployment lines are growing and our industrial base crumbling. Yet President Reagan, like the Roman Emperor Nero, fiddles, oblivious to the fires that are consuming the U.S. economy.

This Nation's trade deficit is increasing dramatically. It is now nearly seven times higher than when President Reagan took office. In response to Presidential inaction, Congress passed H.R. 1562, the Textile and Apparel Trade Enforcement Act. This provides only the most limited protection, but the President has chosen to abandon the working people of this Nation and veto this critically important bill.

The President claims that foreign nations will retaliate against American business if H.R. 1562 is enacted, causing economic hardship. Well, Mr. President, this economy is already hurting from unfair foreign trade practices. The U.S. trade deficit is currently running at an annual rate of $168 billion. Industries are failing and unemployment increasing. Textile, apparel, and footwear industries have lost hundreds of thousands of jobs. Agriculture is also suffering, actually running a deficit in the last 2 months—a crisis which was unthinkable in the past.

The American people cry out for action. Business, labor, and agriculture have united in their support of this bill. Still, the administration refuses to act and the President clings to his outdated trade policies.

President Reagan insists that he will address the trade problem diplomatically. Just last week he negotiated an increase in textile imports from the racist regime of South Africa. This clearly shows his insensitivity not only to the soaring imbalance of trade, but also to human rights. I can imagine no action more detrimental to this Nation's interests and ideals. This will insure that American jobs will be lost to a foreign textile industry which is supported by the work of an oppressed people who are forced to accept starvation wages. American workers can't and ought not have to compete with what amounts to slave labor. Our economy cannot support many such blind-sided solutions.

It is time that Congress stood up for American workers. If the President refuses to act in a responsible manner, then Congress must do so. Let's join together to establish fair trade practices. A vote to override the President's veto, is a vote in support of America's economic future.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from North Carolina [Mr. HEFNER].

Mr. HEFNER. Mr. Speaker, I would like to associate myself with the remarks of the gentleman from Minnesota [Mr. OBERSTAR], and I rise in strong support of the override of the President's veto.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from Georgia [Mr. ROWLAND].

Mr. ROWLAND of Georgia. Mr. Speaker, I rise in strong support of overriding the President's veto.

Mr. Speaker, today we can make a difference in the lives of thousands of our constituents who have lost their jobs due to the effect that imports are having upon American-made textile and apparel products. In my opinion, we have no choice but to override the President's veto of H.R. 1562.

Many of our basic industries have been devastated by the trade imbalance. In my home State of Georgia, we have lost more than 27,000 textile and apparel jobs in the last 6 months alone. In the Eighth Congressional District, which I represent, we have lost more than 1,600 jobs over this same period. Georgia has been losing thousands of textile and apparel jobs annually for the past several years, and the situation is getting worse.

Others segments of our economy have been hit just as hard. Farmers have been particularly hurt by the trade imbalance. After struggling to survive year after year in the face of droughts, freezes, low prices, falling land values and high debts, it is a bitter experience for these folks to have to stand by and watch as their markets go to foreign competitors because of the Government's inability to adequately enforce our trade agreements.

Just in recent weeks, the administration has again shown that it is unwilling to get tough on this issue, as demonstrated by the agreement reached with Taiwan and the new Multi-Fiber Arrangement.

As I noted when we passed this bill, this is a very modest approach. The bill does not irrevocably place us in a protectionist posture. Instead, it challenges our trade partners to adhere to fair and reasonable trade practices, something that will help reestablish a truly free and open international market place, which is what we all desire.

Mr. Speaker, the administration is not acting forcefully on this issue and it now up to Congress to do the job.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from Arkansas [Mr. ALEXANDER].

Mr. ALEXANDER. Mr. Speaker, I rise today in strong support of the motion to override the President's veto of H.R. 1562.

This bill offers hope to American footwear and apparel industries that are fighting to stay afloat in the sea of imports.

Since 1981, the administration's policy of dependence on foreign made products to supply consumer needs has cost hundreds of thousands of American jobs. For several years imports have flooded our economy causing a $145 billion trade deficits in 1985 and promising a new record of $170 billion in 1986. The Nation's industrial base is being eroded away as hardworking patriotic citizens are being punished by the President's trade policy. Even agriculture, which has traditionally contributed a surplus to our trade balance, has fallen victim to imports. In May, for the first time since 1959, the United States imported more agricultural products than it exported causing the U.S. balance sheet to fall by another $152 million. American workers and management of footwear and textile industries have been mistreated by the President's policy. They work hard, pay taxes and deserve better treatment from their Government.

Clearly, U.S. industries are being innundated in the world marketplace. Imports account for 80 percent of the domestic footwear market. Agriculture exports have dropped an amazing 37 percent since 1981. Both of these basic industries have been disadvantaged by the administration's policy which has overvalued the dollar making U.S. products too expensive for foreigners to buy.

Arkansas workers living in towns with names like Osceola, Wynne, and Mountain View who have seen their livelihood swept away by a tide of imports want to know why the administration's policy encourages dependence on foreign goods, shutting down plants all over the Nation's heartland.

The administration's trade policy is a conscious effort to lower inflation at the expense of American Jobs.

Martin Feldstein, the former Chairman of the Council of Economic Advisors under President Reagan, recognizes that the strong dollar has led to the United States weak trading position. In a recent Washington Post article, he wrote, "* * * the overvalued dollar is the source of the overwhelming trade deficit. The current huge trade deficit is not due to any fundamental weakness of American industry or to increases in unfair trade practices of other nations."

Progress has been made in bringing the foreign value of the dollar down; however it is too little too late, and more effort to fix the par value of the dollar is needed. Imports are firmly entrenched in the domestic marketplace. Foreign businessmen have established distribution networks and strengthened demand for their goods in markets. Meanwhile, American firms are relocating overseas to take advantage of the bloated dollar as well as a lower cost of production. For example, Ford Motor Co., will soon import its compact cars from Korea. America is slowly losing its industrial base which is moving overseas.

Loss of our industrial base is not just an economic condition to be feared but a nation-

al deterioration that must be stopped. With the loss of basic industry, rural America will become a desolute economic wasteland.

Already, the First District of Arkansas is enduring the tragic effects of plant closings and massive layoffs. In 1982, two shoe factories closed down, one in my hometown of Osceola, leaving hundreds unemployed. Just last week, a textile plant shut down in Wynne, AR, adding hundreds more to the unemployment rolls. These layoffs ripple through the entire local economy. Spending on Main Street is down by a third. Businesses are closing and people are running away from rural towns; without legislation to stop the deterioration of their economic livelihood and their lifestyle, this trickle will become a flood.

Over 5,000 residents of the First District of Arkansas contacted me to plead for their jobs and the opportunity to continue living where they do. Let me read from a few of those letters. I think they serve as argument enough for the need for Congress to act on the behalf of textile and footwear workers.

One woman wrote, "Representative ALEXANDER, I am from Piggott, AR, where the shoe factory closed down and put 400 people out of work. I know what it is to work for a company that has shut the door * * *. I worked at Piggott from 1964 till 1983. I lost all my benefits and now I have to drive 85 miles a day to work. I am gone from home 10 to 12 hours a day just to work 8 hours. It sure has put a hardship on my family and I sure don't want to see this happen to anyone else."

Another constituent stated: "Being over 50 years of age made it impossible for me to obtain work from another factory. They want younger people."

These people are simply asking for the opportunity to work and survive. A gentleman from Wynne AR, sums it up simply, "If this veto is not overidden, my job with the shoe factory may close, because of foreign imports. I may forced to get Government help to feed me and my family. Please, all we need is a few years and a fair chance."

We in Congress must respond to this need by giving our citizens a chance to work and to support themselves to put America back to work. I will cast my vote today for the overide and for the people in America who are struggling to survive and swim in the sea of imports.

The administration trade policy is a conscious effort to lower inflation with consuming cheap imports which reinforce the prevailing false sense of prosperity while at the same time rewarding service economies of the east and west coast, enriching them at the expense of the production economy of the Nation's midsection.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from Georgia [Mr. BARNARD].

Mr. BARNARD. Mr. Speaker, I urge my colleagues to override the President's veto.

Mr. Speaker, one question we should ask ourselves in deciding whether to sustain or override the President's veto of the Textile and Apparel Trade Enforcement Act is: Has anything improved for the U.S. textile and apparel industries in the 10 months since the bill was overwhelmingly approved by the House? Has anything been done by the administration to stem the loss of jobs in these vital industries by limiting imports and to open markets for U.S. exporters to the major textile and apparel suppliers? Has the administration done anything to bolster the Customs Service, which is our front line in preventing textile and apparel quota fraud?

I regret that these questions must all be answered in the same manner—little or nothing has been done to change for the better the position of the United States in international trade, and, specifically, the distressed state of our textile, apparel, and fiber industries.

Since the textile bill was passed in October 1985, we have negotiated bilateral agreements with the major textile and apparel suppliers—Hong Kong, Taiwan, and South Korea—and we have just concluded renegotiating the major umbrella agreement, the Multi-Fiber Arrangement [MFA], which sets the rules for international textile trade. We have also negotiated agreements with Turkey and South Africa. In none of these negotiations has the United States succeeded in reclaiming any of the lost market share we have given over to imports in the past 6 or 7 years. Since 1980, imports of textiles and apparel into the U.S. market have more than doubled and more than 300,000 jobs have been lost. Textile and apparel imports soared to their highest level in history during the first 5 months of 1986. In some segments of the textile and apparel markets, imports comprise half of the entire market. Imports have grown at a far faster pace than the domestic market, and they now comprise an historically high share of that market.

While the textile and apparel import issue has now come to a decisive juncture, it is not a new problem. Almost 2 years ago, in November 1984, the Commerce, Consumer, and Monetary Affairs Subcommittee, which I chair, held its first hearing in Rock Hill, SC, on the threats to our domestic textile and apparel industries from the extraordinary growth in foreign imports. We held another hearing here in Washington in March 1985 and followed with a comprehensive report in October 1985. That report found that our bilateral agreements and the MFA allowed too high a rate of import growth, set no limits on certain goods, and failed to establish comprehensive, "global," limits on U.S. imports from all foreign countries. The report urged that textile and apparel import growth must be limited to the rate of growth in the U.S. domestic market, as President Reagan promised in a 1980 campaign pledge.

At the time of the subcommittee's report, the textile and apparel industries were in serious distress. Conditions have not improved. If anything, this group of vital industries is in worse shape today than ever before because of virtually uncontrolled foreign imports. Just last week, the Commerce, Consumer, and Monetary Affairs Subcommittee held another hearing on this subject and received an up-to-date report on the status of the textile negotiations from a representative of the U.S. Trade Representative's office.

Mr. Speaker, after all of this oversight, I must regretfully conclude that we have made no progress in limiting foreign imports which have so severely damaged our domestic industries and resulted in lost jobs throughout the Nation and even less progress in obtaining fairer treatment for American exports. The Hong Kong, Taiwan, and South Korea agreements, which have been hailed as victories by the administration, in reality just serve to insure that these supplier nations will continue to be permitted to export to the United States at current unacceptably high levels. There are no rollbacks in these bilateral agreements; there is only slower growth than in the past. Similarly, the MFA failed to achieve the goals of the administration.

Our Government had three basic goals in the MFA negotiations: First, to develop a mechanism to control import surges which disrupt markets; second, coverage of products made of fibers in addition to cotton, manmade fibers, and wool, which are flooding our markets and amounted to 2.8 billion square yards in 1985; and third, opening up foreign markets to our exports. Unfortunately, we accomplished none of these goals.

For these reasons, Mr. Speaker, we must override the President's veto. We must restore fairness to our international trade in textiles and apparel. We must send a message to the administration that Congress has not abdicated its constitutional role in international trade.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from North Carolina [Mr. NEAL].

Mr. NEAL. Mr. Speaker, I urge the House to override this Presidential veto.

Mr. Speaker, the U.S. textile industry has been bearing the brunt of unfair trade practices for a long time. The effects of unequal trade agreements, passive enforcement and foreign barriers to free trade can be seen in idle factories across the country. What has happened in textiles and apparel is this: Imports have grown an average of 16 percent per year since 1980; imports surged 75 percent from 1982 to 1985; 300,000 jobs have been lost since 1980; imports now claim over 50 percent of the U.S. clothing market, and the textile and apparel annual trade deficit has hit a record $18 billion.

Today, the House will attempt to restore fairness to U.S. trade policy by trying to override President Reagan's veto of the Textile and Apparel Trade Enforcement Act. The bill passed the House in December by an overwhelming vote of 255 to 161, and the Senate by 60 to 39. Now we need a two-thirds majority vote in the House and Senate to override the veto. Even if the override effort fails, it is essential that we continue our efforts to control textile imports.

With other members of the Congressional Textile Caucus, I have tried over the years to persuade Presidents Ford, Carter, and Reagan to vigorously enforce international textile trade agreements that are supposed to prevent unfair competition.

In fact, in 1978, I organized a dramatic late-night meeting of the House Banking Committee to report legislation to reject a Carter administration proposal to use textile import tariffs as a bargaining chip in trade negotiations in Geneva. The textile trade deficit was not

nearly as bad then as it is today, but I did not believe, nor do I today, that the jobs of millions of U.S. textile employees should be arrogantly bargained away.

Even earlier, in September 1977, the Export-Import Bank submitted a proposed transaction to assist in the purchase of United States raw cottom by Japan. The subsidized cotton would have been used for the production of Japanese textiles and apparel. As chairman of the Subcommittee on International Finance, I forced the Bank to stop what had been an ongoing practice of these kinds of subsidies.

However, Mr. Speaker, the greatest damage to the textile industry has occurred in the last 6 years. The $200 billion budget deficits resulting from the economic plan we adopted in 1981 drove the value of the dollar to new heights and choked off U.S. sales abroad. The recession in 1983 led to a world economic slow-down from which Europe, Japan, and other trading partners have not yet fully recovered. The sluggish world economy is keeping U.S. sales flat in spite of a welcomed improvement in the value of the dollar.

Mr. Speaker, the Reagan administration's recent negotiation of a new multifiber arrangement covering trade in textiles and apparel is an absolute failure. It is totally meaningless because it has so many loopholes, and it is no better than the old MFA which permitted imports to double in 5 years and resulted in the loss of 300,000 American jobs. Furthermore, the administration's recent decision to permit South Africa to increase its textile exports to the United States by 4 percent per year adds insult to injury. As if our textile industry didn't have enough problems, the administration will allow that racist regime to become yet another major supplier to the American market.

Mr. Speaker, our balance of trade is not a balance at all. In 1986, we will import about $170 billion more than we export. This represents a loss of millions of American jobs and has caused the United States to become a debtor nation for the first time in decades. We can turn the trade deficit around, but the first step is to stop unfair trade practices. I simply cannot understand how the administration can sit idly by and allow other nations to flood our markets and destroy our Nation's industrial base—no other nation in the world would permit it.

I strongly support the Textile and Apparel Trade Enforcement Act. I cosponsored it, I voted for it, and I support the override of the President's veto. I hope all of our colleagues will join in this effort to restore some fairness to our textile trade policies.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from North Carolina [Mr. VALENTINE].

Mr. VALENTINE. Mr. Speaker, I rise in support of the veto override.

Mr. Speaker, the American economy continues to set records. Unfortunately, they are records that show we are heading farther and faster in the wrong direction than ever before.

The latest news is that we spent $14.2 billion more for foreign goods in June than our overseas customers paid for American products. This matched our dismal performance in May. And worse yet, we appear to be heading for an annual trade deficit that dwarfs the disastrous record we set just last year.

These records are not mere numbers or statistics. They mean the loss of American jobs—jobs in our traditional manufacturing sector, jobs in our new high technology industries, jobs in agriculture, which has already been devastated by drought and low prices. According to the Commerce Department, the trade deficit has cost 2 million American jobs since 1981. Do millions more have to follow before we take action?

Mr. Speaker, we have the means at hand to begin taking the needed action, at least for one embattled industry.

While many sectors of the economy have been crippled, I do not believe that any industry has suffered more than the textile industry. And while every sector of the country has been adversely affected by the current trade imbalance, I do not believe that any State has suffered more than North Carolina.

The North Carolina Department of Commerce estimates that 48,000 jobs have been lost in the textile, apparel, and fiber industry since 1980. In that same period, the number of textile plants in North Carolina has decreased by approximately 160. Some of these closings are due to consolidations, buyouts, and mergers, but the figures show clearly that the industry is contracting.

In just the first quarter of this year, according to industry sources, more than 3,000 textile jobs have disappeared in North Carolina. In the first 4 months of 1986, 13 plants have either closed completely or have had to make permanent reductions in the level of employment.

On the national level, recent Department of Commerce figures show that, during the first 3 months of this year, textile and apparel imports reached 3.2 billion square yards, an increase of 25.6 percent over the same period of 1985. Further, the textile and apparel trade deficit amounted to nearly $5 billion during the first quarter of 1986, a record level for any first quarter in United States history. This 3-month deficit is 22 percent greater than the textile and apparel trade deficit for all of 1980.

Mr. Speaker, these figures should be sobering for anyone concerned about American workers and American families. As with any statistics, there is some disagreement about the exact figures and their precise meaning, but the evidence is overwhelming that Americans are being hurt badly by unfair foreign competition in the textile and apparel industry. Since 1980, more than 300,000 jobs have been lost, and the situation is worsening rapidly and steadily.

This is a grim picture, but we are not without recourse. The Textile and Apparel Trade Enforcement Act represents a reasonable, moderate approach to solving the problems plaguing the textile industry. Contrary to some of the arguments we have heard, this bill is not a radical, protectionist solution. It simply imposes a degree of fairness and order in an international marketplace that currently suffers from uncontrolled and unfair trade practices. Under present conditions, American textile workers must compete against foreign industries that are subsidized by their governments, against foreign workers who are paid rock bottom wages, and against nations that severely limit American imports.

This bill will not cure all the ills afflicting the textile industry. But it is an important start in the right direction. It would set reasonable limits for textile imports into the United States and, in fact, would allow smaller nations to increase their exports.

In the long run, this bill will strengthen the U.S. economy. It is clearly in our national interest to have a strong, healthy domestic textile and apparel industry.

We must ask ourselves what will be accomplished if we fail to pass this legislation. How will the economy be helped if we continue to export American jobs to overseas producers? How will the economy be helped by policies that force millions of Americans out of work? How will the economy be helped by a ballooning trade deficit that threatens to plunge our Nation into a new recession?

The answer to all these questions is clear—we cannot help the economy by continuing a failed policy. But we can help the economy, we can save American jobs, we can create new employment opportunities, and we can ensure the consumer a continuing supply of high quality domestic textiles and apparel by overriding the President's veto of the Textile and Apparel Trade Enforcement Act.

American workers can compete effectively. But the rules must be fair. Free trade must be free and fair for every nation or it is free and fair for none. This bill starts the essential process of restoring fair competition in the international textile marketplace.

Textile workers are certainly not alone in facing challenges from unfair foreign competition, and we need to address the plight of other industries as well. But the problems in textiles are among the most widespread and acute in the American economy. We needed the Textile and Apparel Trade Enforcement Act when we passed it last year, and we need it even more now. I urge my colleagues to vote for the American worker and to vote for the American consumer by voting to override the President's veto and pass this bill again. Millions of Americans are counting on us.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from Missouri [Mr. YOUNG].

Mr. YOUNG of Missouri. Mr. Speaker, I rise in support of overriding the President's veto on H.R. 1562.

Mr. Speaker, H.R. 1562 sets permanent import quotas on textile and textile products from countries which have been flooding our markets with products turned out by very low-cost labor, at prices which simply cannot be matched or ever approached in some cases by this country. Additionally, this bill, which has bipartisan support, contains language imposing quotas on all nonrubber footwear imports which have captured 71 percent of the American footwear market.

Mr. Speaker, I share the concerns of millions of Americans about the alarming rise in imports. In 1985, the U.S. trade deficit was over $140 billion. It is anticipated that the trade deficit for this year will reach a record $170 billion. We all know the impact of this deficit on our domestic industries, our work-

ers, and on our standard of living. The economy of this Nation is dependent upon healthy domestic industries.

Congress should pay heed to the recent warning of Federal Reserve Chairman Paul Volcker when he said that the U.S. economy could go into a recession if the trade deficit does not shrink soon.

Unfortunately, the absence of a strong and predictable U.S. trade policy has contributed significantly to the sharp deterioration of the international economic position of the United States and kept scores of domestic industries and millions of American workers defenseless against plant closings, bankruptcies, and recessionary unemployment levels.

Clearly, the mystical dream world of free trade is a world that never was and never will be.

We live in a world where there are quotas, stringent inspection requirements, discriminatory standards, export subsidies and incentives, industrial targeting programs, buy-national policies, and export performance requirements.

No industry knows this more than the textile and apparel industry.

The American textile and apparel industry is fighting for its life. In 1985 alone, apparel imports swallowed half the U.S. market and, in some categories, captured 80 percent of it.

Since 1980, the textile industry has experienced an import surge that shows no signs of abating. As a result, 300,000 American fiber, textile, and apparel jobs have been exported overseas. These cheap, low-wage textile products are negatively impacting the 15,000 to 50,000 textile and apparel employees in the State of Missouri.

In the St. Louis metropolitan area, textile and apparel employment has felt the impact of increasing imports. In 1980, 8,500 individuals were employed in this industry. Two years ago, only 6,900 people were working.

In spite of aggressive modernization programs, product innovation and productivity improvement. We are losing market share due to factors beyond our control, that is foreign government subsidies and inadequate implementation of the multifiber arrangement [MFA]. How can we ask our textile industry to compete against foreign governments that subsidize their industries, paying workers as little as 16 cents per hour and imposing severe restrictions on imports from the United States and other countries.

Besides textiles, shoes are facing a similar case where imports are taking the domestic market.

There is no doubt that the flood of imported shoes is seriously injuring the domestic shoe industry. While our Nation's unemployment rate is around 7 percent, the unemployment rate in the shoe industry hovers close to 25 percent.

Tens of thousands of jobs are at stake. In my own State of Missouri, some 15,200 people work for the footwear industry at 92 manufacturers which account for 11 percent of the total footwear produced in the United States.

However, since 1982, more than eight shoe facilities have closed their doors in Missouri because of foreign imports. In a 4 year period from 1980–84, over 700 people lost their jobs. Unless we act now, that number will only increase.

For the past 6 years, the United States international trade problems have grown to crisis proportions. Missouri has lost hundreds of jobs, particularly in the footwear industry, because little has been done to stop the unfair flood of foreign imports into the United States.

The U.S. apparel and shoe manufacturers want an opportunity to compete with foreign companies on an even footing. Nothing more. Nothing less. I feel confident that by overriding the President's veto, American manufacturers will have that fighting chance to compete in the marketplace at home and abroad.

Mr. JENKINS. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Tennessee [Mrs. LLOYD].

Mrs. LLOYD. Mr. Speaker, I rise in strong support of overriding the President's veto. I urge all my colleagues to support this override.

Mr. Speaker, this is a trade issue; this is an industry issue; this is an employment issue; and this is a women's issue. The textile and apparel jobs are primarily women's jobs. Of the hundreds of thousands of unemployed textile and apparel employees, the majority are women. These women work because they need to work.

These are single mothers. These are women who are providing second incomes for their families just for the basics. These are women whose jobs are threatened, who have had to take pay cuts and reduced hours, and who are juggling their families financial books trying to survive. We all know it is increasingly difficult to survive with only one paycheck for a family.

We must save these jobs—these American jobs. Many of these people have only those skills they have learned in the textile or apparel industries. These skills are not marketable in other industries.

I urge you to save American products; save American industries; save American jobs.

Vote to override the veto.

Mr. MURPHY. Mr. Speaker, I rise in support of the motion to override the President's veto of H.R. 1562.

Mr. Speaker, I supported and voted for H.R. 1562 last session and I was extremely disappointed when the President ignored the wishes of Congress and the overwhelming mass of Americans, and vetoed this legislation. To hear him tell it, "The cure was worse than the disease." His solution was no solution to let the patient heal himself or die.

What has happened in the intervening 7 months—not only has the patient not gotten any better, but the textile industry is virtually on life support systems. There was no miracle cure. No magic plan of action by the President or his Trade Commissioner. No infusion of help for these industries so battered by relentless imports.

The results of the President's nonexistent plans to reduce imports and improve market conditions was a record first half trade deficit of $84 billion and a secretly negotiated textile agreement with the Government of South Africa.

I don't believe that what Congress is seeking is unrealistic or excessive: limiting import growth to domestic market growth, reductions in imports from major foreign suppliers and the authority to penalize quota fraud. Is this overreacting? I think not.

Since 1981, textile and apparel imports have doubled and now compromise over 50 percent of the domestic market. According to industry figures, 388,000 jobs have been lost and over 250 plants have had to close as a direct result of foreign imports. Imports have captured 71 percent of the American footwear market as of 1984 and the forecast is for a continued increase.

Mr. President, your opposition to this bill in December 1985 was wrong and your continued opposition is just as wrong in August 1986. Your reluctance to deal with the trade issue on a realistic level, with realistic solutions, has left Congress no choice but today's action to override your veto.

Your record on trade during your first 6 years in office is abysmal. Congress can no longer sit idly by and continue to watch the sickening decline of our steel industry, our agricultural base, our shoe industry, and now our textile industry.

Enough is enough. I can only hope that we are not too late.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. MURPHY].

Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia [Mr. DANIEL].

Mr. DANIEL. Mr. Speaker, this is a Buy America vote. I ask the Members to override the President's veto.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan [Mr. CROCKETT].

Mr. CROCKETT. Mr. Speaker, I rise in support of the motion to override the President's veto.

Mr. JENKINS. Mr. Speaker, I yield 1 minute to the gentleman from Oklahoma [Mr. WATKINS].

Mr. WATKINS. Mr. Speaker, I rise in support of overriding the President's veto today, and I have changed my position here. I would like to explain to my colleagues why.

Mr. Speaker, today agriculture imports exceed agriculture exports of this Nation for the first time in over 30 years. Even though we have lost over 50 percent of the price that we get for a lot of our agricultural products, the policies of this administration still do not provide us with a way to compete.

Second, we are importing more foreign oil today than ever before, which makes up over one-third of our foreign-trade deficit, which is selling out the future of our country. It is closing many of the domestic wells and has put thousands of oilfield workers out of work in Oklahoma. And, yes, it is closing textile plants in Oklahoma, taking some of the remaining jobs for

some of the wives and some of the spouses that have worked there for years to help educate their children.

□ 1225

What has resulted with this lack of policy, this lack of fair trade is one, we have had the largest number of bankruptcies in the history of Oklahoma. We have had the largest number of bank failures since statehood, and we have had the largest number of farm foreclosures since the Great Depression, with our landowners losing over 50 percent of their land value.

The administration policy is to buy anything that is cheap, even though it is selling out the economic and industrial base of this Nation and the future of our children.

Mr. GIBBONS. Mr. Speaker, I yield 1 minute to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. Mr. Speaker, I fully understand the sense of frustration felt by those who are arguing today to override the President's veto of H.R. 1562, but I cannot support the motion to pass this bill over the President's objections. I do agree that the administration has been negligent in prodding our trading partners to reduce their unfair trade barriers and excessive subsidies, but I cannot go along with what is basically a negative response to that problem. By setting quotas like those in this bill, we are in effect adding to the problem other nations have created. This bill has absolutely nothing in it to encourage an end to the unfair policies adopted by Taiwan, South Korea, Hong Kong, and other nations. Instead, it sends a clean message that those restrictive policies are a course of action which they can legitimately pursue because we will be doing just the same. This bill is no longer a symbol or a signal to protect trade policies; it is the real thing. The trade problems are desperately serious; but the risks associated with passage of this bill are even greater.

I know we have a terrible trade deficit. That is is why I support the major trade reform legislation passed by the House earlier this year. That legislation would put into effect the principle of reciprocity; it would serve to encourage our trading partners to open their markets to U.S. products, not to spur an escalation of trade restrictions. In recent days, there has been an extensive debate on how to modify our agricultural export promotion programs to widen our markets around the world. I have said time and again during that debate that those changes will not be the salvation of our agricultural economy, but I continue to recognize that access to export markets, especially the growing markets of the Far East and the developing world, is vitally important to farmers in my State of Kansas and throughout rural America. The last time China felt we had imposed unfair quotas on their textiles, Kansas wheat farmers took it on the chin. Those Kansas farmers are having a hard enough time making a go of it these days without us passing legislation like this which is a virtually an open invitation for retaliation against them.

Again, I fully understand the sentiments which have prompted this legislation and this attempt to override the President's veto, but I plead with my colleagues not to support this policy which will only escalate protectionism. There are constructive policy changes that should be made, but they are not to be found in this bill.

Mr. GIBBONS. Mr. Speaker, I yield 1 minute to the gentleman from Washington [Mr. LOWRY].

Mr. LOWRY of Washington. Mr. Speaker, I would like to thank the gentleman from Florida [Mr. GIBBONS], a courageous Democrat.

I rise in opposition to the override. The textile bill that is before us has told American consumers that they cannot buy what products they want to buy at what price they want to buy. I just want to say that they just want to tell them they cannot do it, and we would tell them they cannot buy products from another country.

What countries are those? I will tell you what countries they are. They are 11 Asian countries, 2 South American countries, and perhaps a little of Portugal and Spain.

I wonder how come Western Europe and Canada have been excluded from this bill? Since 1980 there has been a 355-percent increase in textiles from Canada and Western Europe, but that is not in this bill.

And I do not want to tell any of my friends from the Black Caucus for anything that they ought to look at who this bill really concentrates on, and who it really hits.

This is a bill that is bad for American policy, bad for foreign relations, bad for our relations with Third World countries, and it is bad economics.

On top of that, I want to tell you that it costs jobs for a lot of people such as in my district, about 15,000.

Mr. CAMPBELL. Mr. Speaker, I yield such time as he may consume to the gentleman from South Carolina [Mr. SPENCE].

Mr. SPENCE. Mr. Speaker, I rise in support of the efforts to override the veto.

Mr. Speaker, today we are involved in a debate that has aroused a great deal of passion which is indicative of the tremendous frustrations surrounding the textile issue and felt by every person in the Nation in one capacity or another; supplier, producer, retailer or consumer. But it really comes down to one small word—choice. I hear many opponents of this bill saying that we must sustain the President's veto to preserve consumer choice in the marketplace and free trade among nations. I agree completely, at least with the stated goal, and I think most of you know that I have always considered myself one of free trade's strongest advocates.

However, one of my staff members described a recent experience he had that belies certain assertions presented by some of my colleagues. While shopping in one of the Capital's largest retail stores, trying to find a certain shirt for one of his sons, he browsed through three departments. It suddenly dawned on him that not one shirt bore a "Made in America" label. Every shirt was an import and no bargain at that. Where was his choice? Where was the price competition? Where was the opportunity for America to exercise her free trade rights within her own borders?

True, this was only one store, involving one item. But, I submit to you that this is a spectre of things to come. I also submit to you that once we have given up our place in the market, prices will not come down; more likely, they will go up as foreign imports monopolize our markets. Even now, the so-called cheaper imports sell at the very same price—or higher—as American made products—that is, when you can find the latter endangered species.

The bill only enforces existing international textile and apparel trade agreements which have consistently been ignored, circumvented or deliberately flaunted. By every conceivable standard, we have the absolute and acknowledged right to protect our domestic industries from unfair practices. Free trade is one thing, giveaways are another. I am deeply sorry that the President and I disagree on this issue, but I must respectfully urge my colleagues to override his veto and vote for H.R. 1562.

Mr. CAMPBELL. Mr. Speaker, I yield such time as he may consume to the gentleman from South Carolina [Mr. HARTNETT].

Mr. HARTNETT. Mr. Speaker, I urge my colleagues to join me in voting to override the President's veto.

Mr. Speaker, on December 17, 1985, President Reagan vetoed the Textile and Apparel Trade Enforcement Act of 1985. Subsequently, subsidized textile imports have increased by 22 percent over the record pace of last year and the annual trade deficit within the textile and apparel industry has reached $18 billion. Foreign countries, which subsidize their own textile industry, are enjoying the benefits of America's free trade policy while keeping their own markets restricted from American products. Consequently, the American textile industry is on the verge of elimination from the foreign and, more tragically, the domestic market. However, with a successful override of President Reagan's veto, Congress can tie textile import growth to the expansion of the domestic market and, thereby, create a more equitable textile trade.

The textile industry represents the largest manufacturing business in the United States. In fact, this industry employs more people than the auto

and steel industries combined. Regardless of the fact that these laborers are the most productive in the world, approximately 1,000 plants have closed due to foreign import penetration since 1980. Although the domestic industry has spent over $8 billion in the last 6 years to modernize local factories, foreign textile industries, utilizing unfair government subsidies and rebates, have seized over 50 percent of the domestic market. At this pace, an additional 2 million jobs will be lost in the textile and dependent industries by 1990.

The administration has attempted to resolve this matter through trade negotiations. Although these efforts have been laudable, the results of these meetings have produced more bad news for the textile industry. The new multifiber arrangement is weaker than its predecessor, which allowed textile imports to double in only 5 years. The employees of the American textile industry are paying the price for a toothless trade policy. In fact, in the last 5 years, competition with heavily subsidized foreign imports has cost over 300,000 textile workers their jobs. The time has arrived for the U.S. Government to recognize the international abuse that is experienced by the most productive American manufacturing industry. Foreign governments must understand that although the United States symbolizes free trade, Americans will not tolerate inequitable trade.

Having talked to workers in the textile industry, I know that they do not want or need protectionist legislation. The current production level and technological efficiency of the American textile industry have created a formidable competitor that would welcome a free market. However, foreign governments through the introduction of subsidies, rebates and other economic incentives have made fair competition an impossibility. In addition to governmental subsidies, the domestic textile industry is forced to compete against foreign manufacturers that benefit from cheap labor, and foreign trade laws that restrict the introduction of American goods into their marketplace. Obviously, the inadequate trade policy of the United States and poor enforcement of existing trade laws have failed to establish a fair textile marketplace.

The Textile and Apparel Trade Enforcement Act insures that a more equitable atmosphere is created without protecting the domestic industry from foreign manufacturers. In fact, the bill permits textile imports to grow in an expanding American market. However, this legislation encourages foreign textile industries to take advantage of our free enterprise policy instead of encouraging foreign governments to take advantage of our free trade policy.

Throughout my years as a U.S. Congressman, I have been a strong supporter of the Reagan administration. However, the President's veto of the Textile and Apparel Trade Enforcement Act was a poor policy decision. This legislation is absolutely critical for the survival of the domestic textile industry and the millions of Americans that it employs. Therefore, I ask my colleagues to join me in overriding the President's veto.

Mr. CAMPBELL. Mr. Speaker, I yield 1 minute to the gentleman from Missouri [Mr. EMERSON].

Mr. EMERSON. Mr. Speaker, as my colleagues know, this bill is not confined to textiles. Shoes are also included.

We in shoe-producing States have been fighting a flood of cheap imports for years, and we have been losing. Why? Not because workers are not doing their jobs or because our domestic industry is not capable of competing.

No, the problem is that we have been victimized by the unfair and aggressive trade policies of other nations and have received virtually nothing in the way of temporary protection or even encouragement from our own Government, including full and forceful enforcement of the existing trade laws.

Repeatedly the ITC and the administration have turned deaf ears to our modest and responsible requests for temporary protection of our shoe workers' needs. The ITC did restudy the problem and determined that there is serious damage being done to our domestic shoe industry and made recommendations to correct the problem, which the administration chose to ignore.

Thus, we in the Congress took the necessary action on our own by passing the Textile and Apparel Trade Enforcement Act, and what has happened? The administration once again chose to ignore the problem and use the veto to try to prevent us from doing what needs to be done if our domestic shoe and textile industries are to survive.

I, for one, refuse to give this battle up—and, therefore, rise today to urge that we override the President's veto and provide long overdue assistance for the footwear, textile, and apparel industry to restore a level playing field, and to restore reciprocity in world trade.

Mr. JENKINS. Mr. Speaker, I yield 30 seconds to the gentleman from Pennsylvania [Mr. GAYDOS].

Mr. GAYDOS. Mr. Speaker, this House has waited 10 long years for some type of relief and remedy. We started with a $50 billion surplus in trade. Now we are $150 billion in deficit.

We have tried various procedures, the trigger price mechanism, we have gone through devaluation of the dollar procedures to stem these imports, and yes, even under GATT, the General Agreement on Tariffs and Trade, even that agreement has not done what it has promised to do.

This is our only remedy left to us, and we must override the veto.

Mr. JENKINS. Mr. Speaker, I yield 30 seconds to the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Speaker, the President's policies are making American workers cry uncle. The only uncle we should be concerned about today is Uncle Sam, and without the American worker we will never overcome our budget deficits or our national debt problems.

This is the issue today. The cancer that I am experiencing from a lack of having no steel policy, and no national industrial policy that benefits steel and major industries is now spreading in these other areas. We must put our foot down. It is a clash of wills, and Congress must win. The American people want Congress to overcome the President's failure to have a national industrial policy.

I ask you to vote for that.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from Georgia [Mr. COLEMAN].

Mr. COLEMAN of Texas. Mr. Speaker, I rise in support of the veto override.

Mr. Speaker, last week the administration announced yet another month of record trade deficits. And, as we all know, trade deficits are just another way of talking about the growing ranks of American workers who are losing their jobs to unfair foreign competition.

America is in deep trouble today, because we are fast losing our entire manufacturing base. Our Nation cannot survive as a leader of the free world with the destruction of basic industries such as steel, textiles, machine tools, mining, and agriculture. This year, our trade deficit will exceed $170 billion. Last year, for the first time in over half a century, America became a debtor nation. I repeat, "the most powerful Nation in the world has dropped to the ranks of a debtor nation." In the last 5 years, that total trade deficit has exceeded $600 billion, and it is getting worse.

In considering the veto override of the textile bill, we need to consider some facts:

Since 1981, more than 350,000 U.S. textile and apparel workers have lost their jobs to the unchecked flood of foreign imports, including over 7,000 jobs in El Paso, TX, alone.

Textile and apparel imports have increased by 75 percent between 1982 and today.

Foreign imports now claim more than half of the textile and apparel market in the United States.

This year, we are expected to buy $20 billion more in foreign textile and apparel imports than we sell abroad.

In just 4 years, 947,000 Americans in the textile industry have lost their jobs, and 943,000 others will be put out of work due to the "ripple effect."

The root of the problem has been the administration's refusal to enforce what is an already weak Multi-Fiber Agreement [MFA], and its recent approval of an even weaker agreement.

Last winter, a concerned Congress of both political parties voted in favor of the Textile Act. It is not a protectionist bill; it is legislation

to enforce the laws that are already on the books by establishing import levels where they should have been today if the MFA had been properly enforced. It is not a protected trade policy, it is a managed trade policy, a clear and pressing duty of the Federal Government.

The Congress sent a message to the administration when it passed H.R. 1562 and sent the bill to the President. The President, in his veto message, assailed the bill as counterproductive and vowed to ease our trade crisis through negotiations. As we have seen, our negotiators have more bark than bite, and the U.S. approval was nothing more than an agreement to agree. It provides no relief for the industry. Instead, it provides for increased imports in textiles and apparel from the previous agreement and allows for increased imports in raw material as well, such as cotton. We want free trade, but we also want fair trade. We want to help the developing countries, but not at the expense of America's low-income textile and apparel workers as well as our American farmers. This bill accomplishes those goals.

Mr. Speaker, the American people are tired of losing their jobs because the administration refuses to enforce the existing trade laws. All that American industry and American labor want is a fighting chance to survive. Let us give our factories and our factory workers the opportunity to keep that most valuable of things—an American job.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from Missouri [Mr. VOLKMER].

Mr. VOLKMER. Mr. Speaker, I rise as a Member representing both manufacturing and agricultural interests.

My district in Missouri is heavily dependent on farming, but also includes many shoe and garment factories. I believe it is in the best interest of both constituencies that I strongly support this override attempt.

There is no doubting the seriousness of the problem faced by the American footwear and textile industries. Spurred by an uneven playing field, imports have grown at a devastating rate, closing American factories, including some in my district, and throwing thousands of workers out of work. Indeed, America's top export these days seems to be jobs.

I received yesterday a letter from opponents of this measure which says the bill is supported by the rhetoric of a few major textile corporations. I have also received over 1,000 letters from workers in my district who want me to help save their jobs by voting to override. I call that more than rhetoric, and I say to my constituents, "I will help you."

There has been a great deal of discussion of the impact of this action on Agricultural trade. Make no mistake about it, exports of our commodities are very important, even critical, to strengthening our farm economy. But let us take a look at agricultural exports and where they stand now.

Our agricultural trade is suffering, just as manufacturing trade is suffering. Since 1980, under this administration which says "trust us", we have gone from an agriculture trade surplus of $23 billion to a trade deficit. Unbelievable as it may seem, this country, the breadbasket of the world, imported more farm products than we exported in May and June of this year.

Just as the administration has told the textile and shoe industries, "Don't worry, we will take care of you," they are telling American farmers to not fear, their program is working. The administration program is working, just as it did with manufacturing. They are letting American farmers fail, so other nations' farmers can prosper.

We have heard about the special deal the administration is giving South Africa on textiles. How long will it be before we hear they have decided to help that country, or another, increase its food shipments to the United States?

Some say farmers oppose this measure. Some do, but many do not. The American agriculture movement supports this bill. So do cotton and wool producers. The National Farmers Union and the National Farmers Organization support the bill. And last month, the National Corn Growers Association endorsed this override attempt.

The corn growers considered the prospect of retaliation for this bill among buyers, and decided this was an empty threat. After all, they are already losing export markets to offshore competition. They cite as an example South Korea. South Korea has had almost unlimited access to the U.S. textile market, but has reduced corn purchases from 3.2 million tons to 300,000 tons.

These farm groups are saying that this bill is good for America. I agree with them, and I urge my farm-State colleagues to join me in telling the President that we are not satisfied with the trade situation, and we will do something about it. Support this override.

Mr. JENKINS. Mr. Speaker, I yield 30 seconds to the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. Mr. Speaker, this is the all-American issue. The administration has not shown a ripple of concern about our enormous trade deficit.

To add salt to the wound, he just negotiated with South Africa on the textile issue which contributes to the economy of that despicable philosophy of apartheid.

Finally, the majority of jobs that are affected are jobs that affect women, women with families to support.

So this is our symbolic vote, no matter what the region you are from, to say we want to protect the do-nothing policies of this administration.

Vote to override the veto.

Mr. CRANE. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas [Mr. FIELDS].

Mr. FIELDS. Mr. Speaker, I rise in support of the 4,000 retail jobs that will be lost and the 160,000 jobs tied to the Port of Houston that will be affected if the President's veto is overridden.

Mr. Speaker, I rise today to express my opposition to this final attempt to enact a bill that is not in the best interest of the United States.

I realize that the textile industry in the United States has experienced difficulties in recent years. Its problems stem in part from an increase in textile and apparel imports. I also realize, however, that this country gains nothing if it merely takes efficient jobs from one sector of the economy and transfers them, at great cost to the consumer, to another sector of the economy.

Mr. Speaker, I realize that proponents of this legislation have the interests of their constituents foremost in their minds. I too, however, am concerned about the interests of my district and the people I represent here in Congress. That is why I oppose this legislation. Under the program outlined in this bill, 4,457 retail jobs will be lost in Texas, while Texas would only gain 2,098 jobs in the textile sector. This constitutes a net loss of 2,359 retail jobs in Texas. This net loss does not even take into account the jobs that could be lost as a result of retaliation.

The threat of retaliation is of even greater concern to me and let me tell you why. With the Port of Houston in my district, trade is of particular importance to my constituents. One-third of the capital that goes into the Houston economy is generated, directly or indirectly, from port activities; 32,000 jobs in Houston are directly affected by port activity with an additional 160,000 jobs throughout Texas that are indirectly affected by the port's functions. Finally, the port generates on the average $3 billion in revenue annually, including $742 million in personal income for individuals employed from port activity.

Unilateral restraints on trade, such as would be imposed by H.R. 1562, will have an immediate and adverse effect on the U.S. public port and marine terminal industry. The effect will ripple through the maritime labor community and other domestic industries which are dependent on the flow of international commerce.

Let me for a moment address the consumer, also a loser under this legislation. Consumers already pay $27 billion a year because of existing trade restrictions on textiles and apparel. If H.R. 1562 becomes law, consumers will pay an additional $44 billion in 5 years, according to the Council on Economic Advisers. American taxpayers will then pay $70,000 for each textile industry job saved which averages at $13,000 a year.

If we enact this legislation over the President's veto, American consumers will lose. American workers will lose. In summary, if the President's veto of this bill is overridden today, one regional industry—an industry whose 1985 net profits exceeded $1.2 billion and which already enjoys considerable import protection—will benefit at the expense of the consumers and other sectors of the economy.

I hope we will act responsibly today and sustain the President's veto.

Mr. CRANE. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania [Mr. GEKAS].

Mr. GEKAS. Mr. Speaker, we are here today being asked to apply the wisdom of Solomon. On the one hand to choose the textile worker who feels that he will be helped by the override of this bill. On the other hand, we have to choose between the textile worker and the farmer, who feels that

an override of this veto will devastate him.

Who in this Chamber is wise enough to choose between these two fellow Americans?

There is a wise course to follow, and that is to help the textile worker by enforcing to the teeth and implementing fully the bilateral and multifiber agreements that have been reached, and to preserve the textile workers' jobs by making sure that they work, while at the same time not jeopardizing the farmer, the farmworker, the retail worker and others who will be hurt by an override of the veto.

□ 1235

I am for the textile worker and I am for the farmer, and therefore I must vote no on this bill.

Mr. CAMPBELL. Mr. Speaker, I yield 30 seconds to the gentleman from North Carolina [Mr. COBLE].

Mr. COBLE. Mr. Speaker, we have heard nothing about protectionism as to the other side of the coin. If this bill is passed, 40 percent of the market is assured to our trading partners. Is that protectionism?

That protects their trade, as I see it. This is not a bill of protectionism; this is a bill of benefit because we are talking about jobs, American jobs, to be specific. If I have a choice to preserve jobs in this country or jobs abroad, I will take American jobs every time.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from Georgia [Mr. FOWLER].

Mr. FOWLER. Mr. Speaker, I think it is imperative that we override this veto on behalf of the strength of our country.

Mr. JENKINS. Mr. Speaker, I yield 30 seconds to the gentleman from Texas [Mr. CHAPMAN].

Mr. CHAPMAN. Mr. Speaker, 25 years ago I was a sophomore in high school when H.D. Lee Manufacturing Co. located a plant in my home town. Friday that plant will lay off over 200 workers, reducing a work force that at one time was 700 to only 200 remaining.

We talk about fair trade, but we do not have fair trade in this country. We talk about timber and steel and we need work there, too. We talk about retaliation. It is time that we retaliate against an administration whose trade polices have been an abject failure, and we retaliate against those trading partners that will not abide by those trade agreements.

I urge the override of the President's veto.

Mr. GIBBONS. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Ohio [Mr. PEASE], a member of the Subcommittee on Trade.

Mr. PEASE. Mr. Speaker, I will vote not to override the President's veto of the textile bill.

But, as I do so, I want to be clear about three points.

First, there is a textile and apparel import problem. Many firms and workers in the industry are hurting, and I have great sympathy for them.

Second, the fact that this bill ever saw the light of day is proof of the failure and irresponsibility of the Reagan administration's trade policy. In 1983, 1984, and 1985, textile and apparel imports surged at rates far beyond the import growth contemplated by the multifiber arrangement. The Reagan administration unaccountably failed to use the legitimate tools at its disposal to contain this growth. It simply fell asleep at the switch, leaving the industry nowhere else to turn but Congress.

Third, even if the veto is sustained, the textile import problem will still be with us. There is no guarantee that the Reagan administration will exercise our rights under the new MFA any more than it did under the old MFA. Therefore, I will join in an effort to require textile and apparel trade policy to be administered diligently, not forgotten, by this and future administrations.

I note that the new agreement permits the United States to unilaterally restrict imports for 2 years. The old agreement permitted us to take unilateral action for 1 year. Where was the administration in 1984 when imports surged out of control? Had it acted, there would not have been a textile bill. Similarly, what assurance do we have that the authority under the new MFA will be exercised?

Overriding the President's veto would break our international commitments many times over. This, in turn, would endanger many other manufacturing and agricultural jobs in the U.S. economy and jolt the international trading system at a time when it is under great strain.

Had the administration availed itself of the legitimate and legal tools of active negotiation and, if necessary, selective unilateral action, we would not be only two votes away from perhaps most serious rupture in the world trading system since it was reconstructed after World War II.

This whole issue illustrates the basic, dangerous flaw in the administration's passive approach to trade policy. As if in a Greek tragedy, the less the administration avails itself of legitimate trade policy options in the name of free trade, the more it undermines the faith of the American people in an open trading system.

The administration and indeed Congress could have forced action on the textile import problem without blatantly breaking the rules of the game. More generally, the administration could do a lot more to look out for American economic interests by diligently administering trade policy up to the limits of our rights under international law.

That is what H.R. 4800, H.R. 4830, and S. 1860 are all about. Members of Congress on both sides of the aisle have awakened to the need for a systematic, active trade policy to maintain a consensus in this country behind an open trading system. Today's vote is a clear indication that the administration may not have long to come around to this view.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts [Mr. STUDDS].

Mr. STUDDS. Mr. Speaker, I rise in strong support of the motion to override President Reagan's veto of the Textile and Apparel Trade Enforcement Act. Enactment of this legislation is, I believe, essential to the future of the textile and apparel industry in the United States. Unfortunately, this measure of protection against the unfair trading practices of our competitors comes too late for the hundreds of textile and apparel workers who have already lost their jobs in New Bedford, MA—a city I have the privilege to represent. The mills and garment shops that New Bedford has lost provided well-paying jobs to decent, hard-working people—especially to women and immigrants—for whom new jobs and opportunities are not easy to come by.

These people and the tens of thousands of industry workers nationwide who have lost their jobs over the last 5 years deserve to have existing trade agreements enforced vigorously, and violations of those agreements dealt with promptly. The current administration, however, has done neither. It was for this reason that the Congress last year passed legislation to preserve orderly, free trade under the Multi-Fiber Arrangement [MFA], and to set quotas at where growth rates originally agreed on in the MFA would have been. The bill guaranteed foreign manufacturers 45 percent of the U.S. market, and it permitted smaller countries to increase their exports. The bill was designed to help ensure a strong domestic textile and apparel industry that could add up to $2.8 billion to our gross national product and create some 140,000 jobs for American workers.

Notwithstanding the commitment of both the House and Senate to confront the industry's urgent needs, the President vetoed the textile bill. I urge my colleagues to vote today to override the President's veto and to keep jobs in America.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from North Carolina [Mr. ROSE].

Mr. ROSE. Mr. Speaker, I urge all of my colleagues to override this veto.

Mr. Speaker, North Carolina has, to this point, endured a 5-year period in which the U.S. trade deficit has doubled and the American textile industry had become an unwilling doormat for a wild stampede of foreign imports. For as many years, the North Carolina textile industry has met the administration's challenge to compete. Our textile mills are

twice as efficient and productive as their foreign counterparts.

For 5 years, North Carolina has listened to the administration's promises to promote fair trade practices and to correct the trade imbalance. Unfortunately, the administration's efforts have fallen short, way short, of its promised goals. Mr. Speaker, the administration's newly negotiated Multi-Fiber Arrangement has, at best, armed the American textile industry with a thimble to bail out an ocean of trade imbalance.

North Carolina is justifiably concerned about the tragic realities that are destroying the American textile industry and the certain doom that looms over this industry's future. The administration has had its chance. North Carolina has tired of this administration's wolf cries of protectionism and its dire predictions of economic doom. We need a trade policy that is fair, not only to our allies, but also fair to our own textile industries. For this reason, I stand in full support of overriding the Presidential veto of congressional efforts to make the American market available to American manufacturers and to establish a truly fair trade policy.

Mr. Speaker, I would like to share a letter that is representative of the hardworking nature of the people of the Seventh North Carolina Congressional District and is testimony against the multitude of charges that label American textile workers as being noncompetitive and solely interested in a free ride.

DEAR CONGRESSMAN ROSE: I want to tell you a story, one, no doubt, similar to hundreds you've heard before. My Daddy is a retired solider, a veteran of Korea and Vietnam. He retired before the servicemen's retirement benefits were booted up. He retired without taking a disability claim despite the fact that he suffered a hearing loss of 30 percent due to an injury in Vietnam. My Dad isn't looking for handouts. He fights to make his own way. He has instinctively given of himself to his country. Now you have a chance to see that our country does something for him.

Dad works in a cotton mill in Hope Mills. He doesn't make that much, but he doesn't want much, just a job. Just to be able to do for himself! His job and others like his are threatened by our trade imbalance. I applaud Congress's efforts to undo the damage done. The "Made in the USA" tags is great, and I, for one, always check. But that's not enough. Please vote to override the veto on the Fair Trade Act. My Father is an unsung American hero, in my eyes at least. Don't let him become a statistic.

Sincerely,

CAROL MORTON.

Mr. Speaker, I would like to say that North Carolinians have always been a competitive breed of Americans, and I assure you that we Tarheels are not going to allow the American textile industry to be sold short in the international trade market. As a concerned Congressman, I hope my colleagues will see fit to make the fight that Carol Morton's father must endure as fair as possible.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from Arizona [Mr. UDALL].

Mr. UDALL. Mr. Speaker, I rise in support of the motion to override, and I ask for some justice for the copper industry.

Mr. Speaker, I rise in support of H.R. 1562 and urge my colleagues to override the President's veto of the bill. Others today will talk about the textile and shoe provisions of H.R. 1562, but I would like to talk for a moment about the copper provisions.

America's copper industry is in serious trouble. Other industries have recovered from the 1982 recession, but not copper. The industry remains plagued by low prices and high unemployment. But with the aid of low-interest loans from multilateral lending institutions, foreign copper producers have been expanding their production. As a result, copper inventories have mounted and kept prices at record lows.

Imports of refined copper have more than doubled since 1982, rising from 285,000 short tons in 1982 to an estimated 620,000 tons last year. Imports now account for more than 26 percent of domestic consumption, compared to just 16 percent in 1982.

The impact on our domestic industry has been devastating. The work force has been cut in half. So has capacity utilization. Some of our biggest mines are shut down. And with prices now at 58 cents a pound, still more may close. Many will never reopen.

Copper is regarded as a strategic metal. And that makes our copper industry a strategic industry. But, at the moment, it is a dying industry. The industry has made substantial gains in productivity. And copper workers have made large wage concessions. But it is not enough. Driven by demand for hard currency, foreign governments have continued to boost their country's copper production. They do so with low-interest loans from multilateral development banks. But they do so without the type of pollution controls that we impose in this country. And like other foreign competitors, the derived substantial benefits from the overvalued dollar.

There is just too much copper being produced in the world. That is one point on which market analysts have agreed. Foreign copper producers are not sensitive to changes in world copper prices. Every drop in price leads to an increase, not a decrease, in production.

H.R. 1562 addresses that problem. It directs the President, acting through the Trade Representative, to enter into negotiations with foreign copper producers with the aim of getting them to agree to restrain production for 5 years. Major foreign producers—Chile, Peru, Zambia, Zaire, and Canada—would be asked to cut production back to 1982 levels. On average, that would be about a 6- to 7-percent reduction.

Smaller, but still significant, producers of copper would be asked to trim their production back to 1984 levels and allowed to grow at a rate equal to world copper demand.

The President would be given 9 months in which to negotiate an agreement with these countries and would be asked to report back to Congress at 3-month intervals on the progress of the negotiations.

It is possible, of course, that these negotiations could fail. But I do not think so. All governments, and their copper producers, have an interest in stabilizing world copper prices. Everyone is harmed by cutthroat production schedules that ignore market demands.

This is a sensible approach to a serious problem. I urge an override of the President's veto.

Although I am voting to override the veto of this legislation for the reasons that I have explained, I do not support provisions which would essentially treat U.S. insular areas as foreign for the purposes of textile product imports.

Most products in our markets can be classified as either domestic or foreign in origin. Members should remember, however, that there is a third category: Those originating in the insular areas of the United States which are outside the customs territory of the United States.

The territories of American Samoa, Guam, and the Virgin Islands and the Commonwealth of the Northern Mariana Islands are part of the American political family, but for sound economic reasons are not a part of American customs territory. As provided in the laws establishing the relationships of some of these areas to the United States, products of these insular areas have long been provided duty-free entry into the United States on terms and conditions specified in general headnote 3a of the Tariff Schedules.

This legislation would unfairly disrupt headnote 3a treatment of textile products and actually treat these U.S. insular areas worse than some favored foreign nations.

It would impose overly restrictive limitations on current insular imports for which it provides special quotas. It would effectively prevent potential new insular imports.

Thus, in attempting to preserve jobs for Americans in the parts of America within our customs territory it prevents the creation of jobs for Americans in the parts of America outside of our customs territory. This runs counter to the primary purpose of insular trade policy and contrary to our policy of developing the economies of the U.S. insular areas. Most insular economies are seriously underdeveloped in comparison to the rest of the American political family.

I do understand the reasons that these objectionable provisions were unfortunately developed and incorporated into this legislation, however. There are reasons for them that should be recognized in at least one of the U.S. insular areas.

In the case of the Northern Mariana Islands, many of the jobs which have been created in the textile industry have not been going to the new Americans of those islands, other Americans, or even new residents. Instead, a significant percentage of the jobs are held by temporary alien workers.

Significant initial foreign employment would be understandable if it was clear that residents of the islands would be trained to take these jobs, or jobs would be available to other Americans, or new workers were becoming permanent residents. But large-scale, long-term employment of temporary workers from countries whose imports are causing injury to domestic production suggests an intent to circumvent limitations which should apply to foreign imports.

A similar intent is also suggested by production in insular areas which cannot reasonably be considered insular in origin. In such a case,

limited insular processing would clearly be used to qualify products which really originate in countries whose imports are causing injury to domestic production.

The requirements of headnote 3a should be adequate to prevent such passthrough assembly in the U.S. insular areas. To the extent which they might not be, a careful modification of headnote 3a should be considered in consultation with the insular areas.

Regrettably, that was not the approach used in the case of this legislation's insular areas provisions, particularly in the Senate's revision of these provisions. So, the bill employs overkill to address concerns which could have been handled in ways that would have preserved trade treatment of the U.S. insular areas that recognizes their unique situations and would be at least a little better than the treatment of other countries.

Because of the various concerns I have identified as well as other trade problems concerning all of the U.S. insular areas, I intend to schedule a hearing in the Committee on Interior and Insular Affairs this year on insular trade matters. This hearing will be part of the committee's series of oversight hearings on Federal policies regarding our territories and commonwealths and, I hope, will suggest any necessary revisions of the current trade treatment of the U.S. insular areas.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from Tennessee [Mr. JONES].

Mr. JONES of Tennessee. Mr. Speaker, I rise in support of the motion to override the President's veto.

Mr. Speaker, let me say at the outset that I have cosponsored this bill, urged the President to sign it, and have been outspoken in my support for it.

I did not take this position without serious consideration. I have always considered myself a free trade advocate. The industry with which I am most familiar—agriculture—needs a free trade environment to be profitable. Unfortunately, it has become abundantly clear to me that the free trade I espouse must be a two-way street. It is certainly not a two-way street today.

The result is that thousands of Americans have been put out of work in this country in the textile and shoe industries because other countries refuse to abide by principles of fair trade to match their free trade rhetoric. Plant closings and layoffs in those industries have been particularly painful in my congressional district.

In addition to an outright depression in the agricultural base of the economy there, available jobs in textile and shoe factories which used to be abundant are nonexistent today. The result is unemployment in the range of 10 percent since 1981, and a local economy that is simply stagnant.

This legislation can be considered extraordinary. That is an appropriate assessment considering the lack of a policy within the administration to at least attempt to stem the flow of imported textile products and shoes into this country, an ever-growing tide that is putting Americans out of work.

It is unfortunate that we must take this extraordinary action. However, it is obvious that some action must be undertaken to let our trading partners understand our determination to demand a bilateral commitment to fair trade as well as free trade. I urge my colleagues to vote to override the President's veto on H.R. 1562.

Mr. JENKINS. Mr. Speaker, May I make an inquiry as to the remaining time that Members have?

The SPEAKER pro tempore (Mr. BROWN of California). The time remaining is as follows:

The gentleman from Georgia [Mr. JENKINS] has 7 minutes and 10 seconds remaining; the gentleman from South Carolina [Mr. CAMPBELL] has 6 minutes and 20 seconds remaining; the gentleman from Illinois [Mr. CRANE] has 9 minutes and 50 seconds remaining; and the gentleman from Florida [Mr. GIBBONS] has 4 minutes and 40 seconds remaining.

Mr. CRANE. Mr. Speaker, I yield 1 minute to the gentleman from Washington [Mr. MILLER].

Mr. COATS. Mr. Speaker, will the gentleman yield?

Mr. MILLER of Washington. I yield to the gentleman from Indiana.

Mr. COATS. Mr. Speaker, I rise in opposition to the motion to override the veto.

Mr. Speaker, I was one of those Members genuinely torn over how to vote on H.R. 1562, the Textile and Apparel Trade Enforcement Act. I am deeply concerned over the continuing trade deficit, its negative impact on American jobs, and the failure of this administration to adequately respond to the problem with a comprehensive, broad-based trade reform package. I am also deeply concerned over the potential negative impact that textile imports have on textile workers in my district and in other parts of the Nation. Yet, as I examine the contents of the legislation, and discuss the substance of the bill with experts on both sides of this issue, I cannot help but conclude that this legislation before us is the wrong way to address the problem.

Instead of addressing a very real problem through comprehensive trade reform legislation, this bill seeks to protect two industries, textiles and shoes, by imposing restrictions that are sure to invite retaliation. You can apply some of the same concerns to a number of products like autos, machine tools, steel, telecommunications equipment, and computers. These products, and the jobs they provide, are all important to the economy of the Fourth Congressional District of Indiana, yet ignored by this bill.

And what about the almost certain retaliation that this legislation would invite against manufactured products and particularly agricultural exports, both critical to the employment of Hoosiers in northeastern Indiana. While firm action is needed on our trade policy, as Hoosiers, we must be especially mindful of the form which that action will take. Indiana is second only to the State of Washington in per capita income derived from exports. Indiana exports nearly 50 percent of all its crops, and northeast Indiana sends over 60 percent of its soybeans overseas. In addition, nearly 1 in every 7 of our manufacturing jobs in Indiana is for the purpose of manufacturing a product that is exported. These exports provide real jobs for many of my constitutents, and we must be very careful not to place them in jeopardy.

I would certainly not be one to argue against the need to reform our trade laws, but I have not been convinced that H.R. 1562 is the correct avenue on which we should proceed. However, in an effort to be responsive to the textile industry and others that have been harmed by our trade laws, I have been supporting measures designed to help solve America's trade problems.

On a broader scale, the Energy and Commerce Committee, on which I serve has documented counterfeiting, quota fraud, targeting, dumping, subsidization, other tariff and nontariff barriers to U.S. exports, copyright and trademark theft, and predatory import surges as elements of our trading situation that can, and must, be resolved if we are to begin to stop the job and economic losses our U.S. industries are facing. I think our inability to respond to these practices is partly a result of our trade policy decisionmaking apparatus that is too divided and cumbersome. Some 25 departments and agencies administer our trade laws. This structure needs to be consolidated. Therefore, I introduced H.R. 4363 to establish a single, unified Department of Trade to do just that.

Finally, and most importantly, our trade laws are not geared to providing balanced, speedy, and effective relief. They need to be modernized to respond to the new realities of world trade. For this reason, I joined in the efforts of the Energy and Commerce Committee last fall to draft a bipartisan, far-reaching and fair trade reform bill that had the support of labor and industry. Reciprocity, as I have said many times, must be the cornerstone of trade policy.

This vote does not draw a conclusion to the issue. The administration must realize that significant progress has to be made through trade negotiations and with GATT in order to avoid a repeat of the situation today where Members of Congress are forced to make extremely tough choices; because if there is a next time, the administration may not enjoy the same level of support in the House of Representatives.

Mr. MILLER of Washington. Mr. Speaker, I have been listening to my colleagues the last several days, and I hear many of them that are unhappy with the President on this or that; on wheat exports or South Africa or a local project, and so they want to send a message with this bill.

Well, the time for sending messages is over. It is time to face our responsibility and decide whether this bill, one of the most important pieces of legislation in this session, is in the national interest, and it is not.

This bill is bad for American consumers, who will pay $44 billion in higher prices; it is bad for American workers, who will lose their jobs as other nations retaliate against our ex-

ports; it is bad for America's friends in the Far and Middle East who relied on our word.

Why are we doing these bad things? To give further protection to America's most protected industry, an industry during the first half of 1986 that had rising—not falling, but rising—employment, profits and production.

Mr. Speaker, it was a bad bill last year; it is still a bad bill. We should sustain the President's veto.

Mr. CRANE. Mr. Speaker, I yield 1 minute to the gentleman from Nebraska [Mr. DAUB].

Mr. DAUB. Mr. Speaker, it has been said that this bill is both good and bad. That's probably right. It is bad for consumers, but it's good for inflation; it's bad for American employment, but it's good for foreign jobs; it's especially bad for the American farmer but it's great for his foreign competitor.

The bill's import restrictions are not negotiated, but imposed unilaterally. Make no mistake about it, unilateral actions lead to retaliation. Consider our experience with China; 1983, when textile negotiations broke down with China we unilaterally restricted $50 million of Chinese textiles. China canceled a grain agreement. We lost $500 million in wheat sales.

These drastic restrictions on imports will hammer some of the best customers of the American farmer. It repeats and multiplies the mistake we made with China.

The 12 countries this bill hits bought 43 percent of all American farm exports in 1984. Specifically, they purchased; 41.3 percent of all American wheat exports last year; $1.9 billion of our corn and $1.5 billion of our soybeans.

Of the big four textile exporters, the American farmer sold them more than double the $1.8 billion in textiles we bought from them.

There are some interesting foreign policy implications for this bill. Take Bangledash, for instance. This bill slashes Bangledash's exports by 97 percent, effectively killing the only manufacturing industry this country has. Isn't it better to continue selling them 100 million dollars' worth of American grain each year rather than flexing our protectionist muscles to smash the sole industry in one of the world's poorest nations?

Does anybody seriously believe that these countries will continue to buy American farm products which are in oversupply throughout the world, if we slash their No. 1 export?

It's said that the European Community cutback on textile imports and suffered no retaliation. They did, but they did through negotiated reductions, not unilateral cutoffs like H.R. 1562. We have a new Multi-Fiber Arrangement which is much tougher on textile imports than the current MFA and will not risk retaliation against our farmers.

This bill can destroy the chances for a new GATT round. We are trying to get agriculture on a fast track—that is completed first—to avoid a brewing Ag trade subsidy war.

Does anybody think that these countries will cooperate in trade liberalization efforts under a new GATT round if we violate the existing GATT with this bill?

The problems with the textile and apparel industries are largely due to the overvalued dollar.

Congressional Budget Office points out that from 1972 to 1980, a time of lower dollar, textile imports went down about 3 percent per year.

Since 1980 imports have dramatically increased. So did the dollar; by about 60 percent.

The dollar has gone down, but not against Asian texitle currencies. Negotiations will begin with these countries to reduce the value of the dollar. This will greatly assist the American textile industry.

This industry enjoys an average tariff of 22 percent—four times more than the next industry—and over 300 individual quotas. New agreements and the MFA means more protection is on the way. If protectionism was the answer to the textile industry's woes, we don't need this bill, the industry's already got it.

Let's vote this bill down.

JULY 30, 1986.

DEAR CONGRESSMAN: American farmers and agricultural exporters continue to fear a further decline in farm exports if world trade disruption causes an even greater drop in the purchasing power of developing country customers, or if the United States takes unwise unilateral protectionist steps which induce retaliation.

The textile import restriction bill (H.R. 1562), which is now scheduled for an August 6th House "override" challenge, represents such a threat, as President Reagan properly recognized when he vetoed it last year.

We continue to support a strong negotiating stance by the Administration to deal with the serious problems of the domestic textile industry through voluntary import restraints and through appropriate measures to assist unemployed textile workers and businesses which have been hurt by unfair or excessive growth of textile and apparel imports.

American farmers would be unfairly penalized if the needed relief for the United States' textile industry were to be accomplished by the arbitrary and GATT-violative approach of H.R. 1562. We urge the Congress and the Administration to find more appropriate solutions for this problem through bilateral and multilateral negotiations within the framework of the Multi-Fiber Agreement and the upcoming major GATT trade negotiating round.

Mr. CRANE. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. OXLEY].

Mr. OXLEY. Mr. Speaker, I rise in support of the President's position.

Mr. Speaker and Members, the message has been sent, the message has been received. The administration has just finished strong bilateral agreements recently signed, South Korea, Hong Kong, and Taiwan; the dollar weakended to a new low against the yen for the last 40 years.

We are through sending messages. Really the time has come to decide what we are going to do. We are going to be making law today. We are not going to be sending messages. We are going to be making law if we indeed override the President.

Let us keep that in mind. I say that because I see this not as the end of protectionism in this Congress but the beginning. Indeed, if the President's veto is overridden, you can almost bet on it, the line will start forming in your offices yet this afternoon by special pleaders who have their own cases to make in all the various areas that feel they are being affected by imports.

So let us keep that in mind when we look at this very important subject. We have a major decision to make. Let us hope it is the right one.

Mr. JENKINS. Mr. Speaker, I yield 30 seconds to the gentleman from Pennsylvania [Mr. KANJORSKI].

Mr. KANJORSKI. Mr. Speaker, I rise very quickly today to support the motion to override the President's veto, and I cannot add very much in 30 seconds except perhaps I can talk to a few colleagues on either side of the aisle who have not decided.

The decision of maybe two or three votes will change what we do here today. Those two or three votes will be fundamental. I am sure all Americans will be looking at those Members.

It seems to me that it is not a message we want to send. It seems to me it is no longer a castigation of someone's policies or thoughts, whether it be in the White House or here. All we are trying to do is save the hundreds of thousands of workers that will lose their jobs if we fail to perform properly today.

I urge an affirmative vote to override the veto.

Mr. CAMPBELL. Mr. Speaker, I yield 45 seconds to the gentleman from Alabama [Mr. CALLAHAN].

Mr. CALLAHAN. I thank the Speaker. I rise in support of the override, and it does not come with just a cursory glance at the Jenkins legislation. It comes after an indepth analysis of the

entire problem and the history that lead us to this moment. There are certainly some good arguments presented by the administration in defense of protectionism, but let me assure you that after this careful and indepth analysis that I have done and after the many hours of meetings with Trade Representative Yeutter and the members of the administration and the opponents of this legislation, they have presented some good arguments. But the good of the Jenkins bill outweighs the good of the opponents of this measure.

So let me encourage the Members of this body to take advantage of the many hours and research that I have put into this measure and join me and support the override of the Presidential veto.

Mr. JENKINS. Mr. Speaker, may I inquire as to the remaining time, since we have only two speakers left from my side here?

The SPEAKER pro tempore (Mr. BROWN of California). The time situation is as follows: the gentleman from Florida [Mr. GIBBONS] has 4 minutes and 40 seconds remaining, the gentleman from Illinois [Mr. CRANE] has 6 minutes and 50 seconds remaining, the gentleman from Georgia [Mr. JENKINS] has 6 minutes and 40 seconds remaining, and the gentleman from South Carolina [Mr. CAMPBELL] has 5 minutes and 35 seconds remaining.

Under the normal procedure, the Chair would recognize the gentleman from Illinois.

Mr. CRANE. Mr. speaker, I yield 1½ minutes to the gentleman from California [Mr. ZSCHAU].

Mr. ZSCHAU. Mr. Speaker and colleagues, despite the sharp clash in the debate, there is much on which we agree. We agree we have a trade deficit that is costing jobs, we agree that unfair trading practices have been a partial cause for that, we agree that the Federal Government has to take a proactive role to negotiate and enforce the end to those unfair practices. Historically that has not been done. But it is being done now. We have just negotiated a multifiber agreement for textiles and bilateral agreements.

Last week a semiconductor agreement was negotiated with Japan. Much more needs to be done, but we need to do it to protect all industries from unfair competition. Our success in these negotiations will depend on our commitment to abide by fair trade principles ourselves. We must be willing to follow the guidelines we are asking others to abide by.

This bill will undermine that commitment. This bill will make us an outlaw of international trade.

This bill will undermine our ability to achieve fair trade for agriculture, for semiconductors, electronics, manufacturing.

Let us not sacrifice the ability for others to compete on the false hope that this bill will help one industry. Rather, let us work together to achieve a better opportunity for all.

Defeat this resolution, sustain the President's veto, support our trade negotiators' efforts to eliminate unfair competition in all industries.

Mr. CAMPBELL. Mr. Speaker, I yield 45 seconds to the gentleman from Maine [Mr. MCKERNAN].

Mr. MCKERNAN. I thank the gentleman for yielding.

Mr. Speaker, if we fail to override this veto today and we do nothing to prevent the unfair trade practices which afflict our textile and shoe industries, we are guaranteeing that the epitaphs on the tombstones of those industries are going to read: "I told you I was sick."

That is because we know the facts, we know since the veto, textile imports have increased by 23 percent, we know that shoe imports have increased by 14 percent, up to 80 percent import penetration in that industry alone. That cost jobs. That cost jobs in my State, thousands of jobs in the shoe industry alone.

Mr. Speaker, our current trade policies are unfair, and they are unfair the way we send our textile and shoe companies into international competition. Our policies are like sending a pitcher into a professional baseball game against major league hitters with a whiffleball. We have a chance today to play hardball and to bring fairness to our trade policy, and I urge an override of this veto.

Mr. JENKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from Alabama [Mr. BEVILL].

Mr. BEVILL. I thank the gentleman for yielding time to me.

Mr. Speaker, I would like to urge my colleagues to vote today to override the President's veto of the Textile and Apparel Trade Enforcement Act.

This bill is needed because these foreign countries are laughing at us. The administration has done nothing but talk about enforcing trade laws for the past 5 years. It is only when Congress comes up with a plan to stop unfair foreign trade competition that the White House attempts to get trade agreements. When all is said and done, these agreements don't amount to a hill of beans.

Meanwhile, Americans are losing their jobs because of unfair foreign trade competition. Thousands of those jobs have been lost in Alabama where the textile industry is the State's largest industry. Between 1980 and 1984, 12,000 textile and apparel workers lost their jobs in Alabama. In 1985, another 2,900 jobs were lost. In the past 2 weeks, 700 textile workers lost their jobs in my district when two textile plants closed in Culman and Haleyville.

Do we want to export American jobs? Of course not. But, that's what's happening every time we let these foreign countries dump their goods here.

This bill would provide the temporary relief needed by the domestic textile industry to get back on its feet. It would impose quotas on foreign imports for 5 years.

These limits are not a long-range solution. We must be competitive in the international market. We can do it in the textile field by having time to modernize our plants. I am hoping that this relief would eventually extend to help our steel, coal, and timber industries which have also suffered from unfair foreign competition.

We must have a strong domestic industrial base. American jobs depend on it. Our national security depends on it.

I am all for free trade. That's like being for motherhood and apple pie. But, I also think we need fair trade. I hope this bill will wake up the administration and send the message to these foreign countries that we aren't going to take it anymore.

We have had an open-door policy and we are going to have to close that door a little. These countries which have shut their doors to our products must be willing to open their markets. That's the way free and fair trade ought to work.

Mr. CAMPBELL. Mr. Speaker, I yield 50 seconds to the gentleman from Kentucky [Mr. ROGERS].

Mr. ROGERS. Mr. Speaker, I urge a vote to override this veto. The laid-off textile worker begins to wonder what is the fairness of all of this? He wonders why the same Government that allows unlimited foreign subsidized imports that cost them their jobs, that same Government also allows their tax dollars to subsidize wheat sales to Communist Russia, all in the name of fairness to an American industry. They wonder why it is OK to fight dumping of semiconductors but not textiles. They wonder why it is OK to put automobile quotas on but not textile quotas. They wonder why the Government says it is OK to put quotas on specialty steel but not textiles. It is time to be fair to textiles. Override this veto and you will see a new arrangement being worked out between our trading partners and our Government. An override will solve the problem.

Mr. CRANE. Mr. Speaker, I yield 1 minute to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Speaker, the vote we face today—whether to override the President's veto of H.R. 1562 and force into law this blatantly protectionist textile bill—is one of the most important decisions of this 99th Congress.

This is no longer the time to send messages or to vote on unrelated issues by casting a particular vote on the textile bill. Today, we could pass a bill that could put our exports at risk and end our credibility as a trading nation in meeting our international obligations and in pressing for open markets. A great deal more than textiles is at stake today.

This legislation provides unprecedented additional protection for an industry that already enjoys the most extensive safety net of high tarrifs, the highest in the world; strict quotas; and administrative monitoring and special procedures at every level. The textile industry has received exaggerated protection since the 1930's.

This is unprecedented, unnecessary additional protection for an industry whose capacity utilization, export volume, profitability, and employment are all on the rise. The textile and apparel industry is demanding this unprecedented protection even though its adverse effects on other sectors of our economy could be severe, even disastrous.

Unless the President prevails, thousands of jobs in retail and other trade sensitive or export industries will be jeopardized. Export sales, especially in agriculture, will be seriously threatened. The hidden retaliation of developing countries that simply can no longer buy U.S. goods because they cannot earn foreign exchange is a certainty.

It also is clear that if this bill becomes law there will be no round of multilateral trade negotiations in the GATT. This means no forum to negotiate new disciplines in the areas of agriculture, service, intellectual property rights, dispute settlement and further market access. This means also that the House's own goods for trade cannot be met at GATT for there will be no new GATT Round.

The United States will have absolutely no credibility if less than a week after concluding a new tougher multifiber [MFA] agreement and 1 day after concluding a bilateral agreement with our toughest textile competitor—Korea—The United States unilaterally abrogates all its commitments in this area. We might just as well withdraw from international trade fora and become an insular nation that has admitted it cannot compete internationally.

Another very serious effect of this bill is the abrogation of our free trade agreement with Israel. That agreement prohibits cuts to any quotas in effect. Yet the Jenkins bill will cut our trade with Israel by 44.3 percent in 1986.

Even though the Jenkins bill purports to affect only the imports of our major trading partners, let's look at its impact on some of the least developed countries. Thailand, our ally in three wars, and a refugee haven at our request, has a cutback of 30.2 percent. Its share of total MFA imports is 2.16 percent. Malaysia has a 44.3 percent cut. It ships less than 1 percent of our total imports. The Dominican Republic is cut 36.7 percent. Singapore 22.5 percent, Bangladesh 75.7 percent. All of these ship around 1 percent or less.

Many of these countries have little to export other than textiles and apparel. With no access to our market, they can't buy our exports. Market denial is a terrible slap in the face to some of our important allies.

Ambassador Carlisle has just concluded a new MFA when great odds were against him, including an industry that made impossible demands and cried foul at every turn. The industry will continue to receive extensive protection, and the new MFA provides broader coverage of products and will guard against surges. Most importantly it provides tougher disciplines and penalties against passthroughs and circumventions.

Even though the textile industry was given nearly everything it sought from the MFA negotiations, it still complains vociferously that it didn't receive 100 percent. In my judgement, they get 85 percent—much more than we've been able to get for any other injured U.S. industry, and much more than the industry deserves or has earned. Our allies will pay a stiffer penalty for this new agreement.

Yet, the domestic industry claims it is on the brink of disaster and the administration has done nothing for them. To be satisfied, it will only take $44 billion in higher cost to the consumer over the next 5 years in addition to the $24 billion per year in current consumer cost.

Seventy thousand dollars spent for each textile job saved, $26,000 for each footwear job saved; the possibility of more than 62,000 jobs lost in other sectors; agriculture exports to affected countries cut in half; and no new GATT round. That's a very high price to pay indeed. And for an industry that appears to be well on the road to recovery.

In fact, profits in a representative section of the industry were doubled both in the first and second quarters of 1986. The industry is modernizing and is doing a better job of finding niches in the marketplace. Productivity was up 7 percent during the first 6 months of 1986 over 1985. Exports were up 13 percent in textiles, 19 percent in apparel. Stock prices of the seven largest textile companies were up 70 percent in 1985. Capacity utilization is higher than the national average. Inventories are down.

It is tough for me to believe that these indicators, plus the MFA, the three new bilaterals, and lower cotton prices sanctioned in the 1985 farm bill, would make anyone surmise that additional relief is due the textile industry.

I also want to point out that unemployment in the textile industry is below the national average. Other industries that must compete with imports have unemployment problems more serious than in the textile industry. If they experience difficulty they must use the procedures of the trade law to gain a remedy. The textile industry has ignored the trade laws and has only sought special interest legislation.

If we look at States with the highest concentrations of textile-apparel production, only Alabama and Mississippi have unemployment figures higher than the May 1986 national average of 7.3 percent. California's unemployment rate is 6.1 percent, Georgia is at 5.6 percent, North Carolina is at 5.4 percent, South Carolina at 6.6 percent, New York at 6.9 percent, and Virginia at 4.9 percent. Should Midwest industrial areas hard hit by imports accept further high unemployment rates because of textile protectionist legislation?

Industry supporters have also told you that there will be no retaliation from those countries affected under the Jenkins bill. Evidence is conclusive that there will be retaliation, including some fairly strong language from the PRC that they will retaliate. Estimates are that $4.9 billion of U.S. exports, mostly in the agricultural and high technology areas, would be affected. Two billion, one hundred million dollars retaliation would occur from the footwear restrictions in the bill.

Supporters will tell you that the Europeans cut back their major suppliers with no retaliation. But what they won't tell you is that Europe negotiated the cutbacks, and they increased other quotas to compensate for the cutbacks. Our cutbacks are not negotiated, as is the requirement under the MFA; they are unilateral. Negotiated agreements will not result in retaliation. Unilateral actions will.

Mr. Speaker, I have seen claims that imports have claimed up to 50 percent of our market. I'm not sure what kind of a magic hat those figures were pulled from, but the figures I have from the Commerce Department show that the percent of imports to consumption in dollars is only 15 percent in 1985. Even if you look at the same figure in square yard equivalents, you get 24.6 percent in 1985.

Neither measure shows a surge when you compare the imports to increasing domestic consumption of textiles and apparel. Even if you look at imports alone, the only slight surge shows up in 1985 when compensation was also up sharply. To me, the dollar figure is the most accurate measure of the affect imports are having on our domestic industry.

Even if you look at the import figures for the three largest exporters—Taiwan, Hong Kong, and Korea, which comprise about 34 percent of our imports—you won't see any indication that imports will surge in the next few years. To the contrary, even though there were surges from these countries in 1983 and somewhat in 1984, imports were down significantly, to an average of 5.5 percent in 1985. With the new bilaterals, there will be an actual rollback for Taiwan and Hong Kong in 1986 with growth rates of well under 1 percent for the remaining years of the agreement. Korea's imports will grow only 0.29 percent in 1986 and 0.8 percent thereafter.

What this means is that these three countries will not be able to take advantage of any growth in the U.S. market in the next several years. The effect will be a rollback. And that is just what the domestic industry demanded. Those three agreements were a significant concession to the domestic industry.

Let us look at where some of the real growth in imports occurred. In 1982 and 1983 imports from the European Community surged by increases of 57 and 38 percent, respectively, much higher than the figures from the Far East. In 1984, imports from Canada surged 115 percent. Despite these high figures, both Canada and the EEC are exempt from the Jenkins bill.

I hope we will be conscientious and reasonable legislators and reject this legislation. The consequences of overriding the President's veto here are grave and can mean the livelihood of many Americans across the spectrum of the U.S. economy.

This is clearly one of the worst protectionist bills we have seen to date in the Congress. It should not be passed to express our disappointment in the trade deficit, with the administration's trade policies, with our South Africa policy, or any unrelated gripe we have with the administration.

I urge my colleagues to vote no on the motion to override the President's veto of H.R. 1562.

Mr. FRENZEL. Mr. Speaker, this veto override vote is a broader issue than it seems. The bill is designed to protect the textile industry, but it is not solely a textile bill.

It will affect and hurt nearly every industry and consumer in the United States.

Compensation and retaliation will hurt every country. The United States will be hurt the worst because we are the biggest exporter.

It will cost the consumers of the United States $44 billion over 5 years. It will cost many jobs, as many jobs as it will save. It will save $13,000-a-year jobs at a cost of $70,000.

It will kill our chances for a new GATT round, and it will kill our chances for the achievement of the House's trade objectives as expressed in our recent trade bill.

Who is going to trust the United States as a reliable trade partner again? This bill even cuts textile trade with Israel, our most loyal ally. Under this bill, Israel would lose 44 percent of its United States market access. If this bill is passed it is going to take us decades to regain lost markets.

The bottom line here today is that the United States cannot afford the Jenkins bill. We cannot pull up the gangplank, let one industry get on board, and allow everyone else to suffer.

The SPEAKER pro tempore. The time of the gentleman from Minnesota [Mr. FRENZEL] has expired.

Mr. GIBBONS. Mr. Speaker, I yield an additional 40 seconds to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman from Florida for yielding this additional time.

Mr. Speaker, it may seem redundant to express these thoughts again. Oratory is not going to change votes on this floor.

But it is important that Members understand that, if this veto is sustained, we are going to have to live with a bill that the rest of the world cannot tolerate, and which is ultimately going to cost us $50 billion in compensation and retaliation.

That $50 billion is going to come out of the heart of our economy and hurt industries and individuals in every single district in this country.

The only way that we can prevent severe, substantial loss to the national economy of the United States and to our citizens is to sustain the President's veto.

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. LUNDINE].

Mr. LUNDINE. Mr. Speaker, I rise in support of the override of the President's veto.

Mr. Speaker, I urge my colleagues to vote to override President Reagan's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act. I do so because I am convinced that this action is necessary to stop the erosion which has taken place in the textile and apparel industry over the last 5 years.

We are in a difficult position here today. The President has recently concluded bilateral agreements with the three largest textile exporters to the United States—Hong Kong, Taiwan, and South Korea in a belated effort to control textile imports. In addition, he has recently concluded negotiation of a new international multifiber arrangement proposed to govern international trade in textiles for the next 5 years. Under these circumstances, for Congress to act to override this veto will have ramifications for these agreements.

Yet, it seems to me that the basic issue here is one of whether or not we can afford to trust this administration to control textile imports under these new arrangements. I am voting to override this veto today because I have serious doubts about the commitment of this "free trade" administration to this end. After all, this is an administration which has given us escalating trade deficits since it came to office. This year, our trade deficit will go through the ceiling when it reaches an unbelievable record of $170 billion.

The damage which has occurred to the textile and apparel industry under President Reagan's watch is inexcusable. In 1979, the U.S. textile and apparel industry had 2.2 million workers. Today, it has 1.8 million. Nearly 400,000 jobs gone. In 1979, textile and apparel imports into the United States amounted to $8.7 billion of all fibers. In 1985, imports reached $21.3 billion—nearly a threefold increase. In 1979, the U.S. textile and apparel trade deficit was $4.6 billion. In 1985, it was $18 billion—a staggering 300 percent increase.

An administration with such a record does not inspire trust. By overriding this veto today, the Congress of the United States will be retaking control of U.S. trade policy from a floundering administration. If we make the Textile and Apparel Trade Enforcement Act the law of the land, then the administration will have no choice but to implement and enforce it.

As many of you know, I have been active on many aspects of trade policy over the last 5 years. I am an advocate for a progressive trade policy for the United States—one which opens up opportunity for expanded trade, but also one which does not in the process destroy our domestic economic base. The bill before us meets the test of these important guiding principles.

In my capacity as chairman of the International Development Subcommittee of the House Banking Committee, I have looked in depth at the problems of developing countries. I have been very concerned about the serious international debt problem facing many of these developing countries and acknowledge the importance of trade expansion to these developing countries.

This bill is not antideveloping countries. Rather, it carefully distinguishes between those more advanced developing countries which can afford to experience cuts in their textile exports to the United States and those which cannot.

The bill establishes three categories of textile exporters. The first includes major producing countries where the largest cutbacks in exports to the United States would occur. This would encompass only three countries—Taiwan, South Korea, and Hong Kong—all nations which can afford to absorb the cutbacks. The second category includes producing countries. This would include China, Japan, Pakistan, Indonesia, India, Philippines, Thailand, Brazil, and Singapore—again countries which can sustain some cutbacks.

The rest of the countries of the world—with the exception of Canada and Europe which are exempt from the bill—would be included in the small-exporting-countries category. Products from these countries would be permitted to grow by 15 percent a year from the 1984 levels unless the product consumes more than 40 percent of the U.S. market. As a result, there is considerable room for continued export growth by many developing countries which need access to the U.S. market to stimulate renewed growth in their own economies.

Let me conclude by saying that I do not believe that either the United States or the international trading system will suffer if this bill is enacted. Trade in textiles has been an exception to the General Agreement on Tariffs and Trade since 1973 when the nations of the world entered into the first multifiber arrangement which recognized that trade in textiles had to be managed. The override of the veto of this bill is the latest manifestation of that reality. It is an attempt to reassert control over U.S. textile and apparel trade which has grown out of control over the past 5 years under this administration. I urge your support to override the President's veto.

Mr. CAMPBELL. Mr. Speaker, I yield 45 seconds to the gentleman from Pennsylvania [Mr. GOODLING].

Mr. GOODLING. I thank the gentleman for yielding.

Mr. Speaker, I am tired of hearing the word retaliation. There is not much left that our so-called trading partners can do to retaliate. I am also tired of hearing of the defense of the consumer. A consumer is someone who has money to purchase something to consume. If he does not have a job, he cannot consume. I do not want my farmers being bandied around here that they somehow or other are supporting the President on this issue. My farmers know they cannot get anything into the Common Market areas, they know they cannot get anything into Japan. So let us send a message around the world, but more importantly let us send a wake-up call to the White House. Let us override the President's veto.

Mr. GOODLING. Mr. Speaker, I feel that it is necessary in this debate to address the outrageous fact that the administration has been unresponsive to the plight of the domestic footwear industry even though the Department of Defense reported that this industry is unable to sustain even a short-term limited mobilization.

The DOD study to which I refer was concluded in April 1985 and advised the President that if import relief were granted, we would regain sufficient production capacity to ensure our military footwear needs. In the name of preparedness, a diety often invoked by this administration, the President should have approved the ITC recommendations of last June.

Instead, as the DOD study points out, there will be a number of problems in obtaining needed footwear in the event of a national emergency. The footwear industry is labor intensive, and training of workers requires a lead time of 3 to 6 months. The leadtime of equipping a factory—which might not be possible, due to the fact that most of the necessary gear is foreign made—would take at least 6 months. We will rapidly lose the supplier networks and management and labor skills. Finally, DOD reports that "present domestic production will not sustain simultaneous military and civilian consumption," and predicts a shortfall of 70 percent or more.

I ask my colleagues to consider what the Department of Defense translates these findings to. It determined that the domestic footwear industry would be unable to meet first year mobilization needs of 6.5 million pairs, falling nearly 1 million pairs short without allowing for any domestic consumption. Bear in mind, too, that 6.5 million pair figure assumes a limited situation with 3 million troops. In World War II, we fielded 12 million troops, and an effort of this size would create a need for approximately 24 million pairs of boots, or 18.5 million pairs more than we are currently capable of producing.

Mr. CAMPBELL. Mr. Speaker, I yield 30 seconds to the gentleman from Alabama [Mr. DICKINSON].

Mr. DICKINSON. Mr. Speaker, I have heard many speeches here today. Most of them I agree with, particularly those in favor of the override. But one thing impressed me very much. When I heard one of my colleagues, a good friend of mine ticking off the great profits a lot of companies have made, that really does not impress the 3,000 people who lost their jobs in my district in textile-related industries in the last 5 years. They do not know anything about those big profits. They do not have a job. They are gone.

If we do not do something about addressing the imbalance—and this is the chance to do it—then we are being very foolish.

Mr. CRANE. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, we have heard commentary about jobs. I think it is important to recognize that our economy is in a state of transition. Many people are moving into new jobs. We are creating them faster than any society on the face of the Earth. Roughly 12 million new jobs in the last 5 years, more than the European community has created in the last 20 years, and the same is true for Japan. I think it is important to recognize that to save 71,000 jobs in textiles, we risk losing 89,000 in retailing and transportation plus suffering the consequence of retaliation against those agricultural exports that go into these 12 affected countries, amounting to about $50 billion of purchases annually.

You can be assured when the world is awash in foodstuffs that there will be tit-for-tat retailation against U.S. exports.

I urge you again to sustain the President's veto. This is misguided legislation. As the New York Times says, it is an exercise in moral and economic leadership, and we have to demonstrate that leadership this afternoon.

---

## CALL OF THE HOUSE

Mr. CRANE. Mr. Speaker, I make the point of order that a quorum is not present, and I move a call of the House.

The SPEAKER pro tempore (Mr. BROWN of California). The Chair does not need to entertain the point of no quorum.

The gentleman may by unanimous consent ask for a call of the House.

Mr. CRANE. Mr. Speaker, I ask unanimous consent for a call of the House.

The SPEAKER pro tempore. Without objection, a call of the House is ordered.

There was no objection.

The call was taken by electronic device, and the following Members responded to their names:

[Roll No. 289]

The SPEAKER pro tempore (Mr. BROWN of California). On this rollcall, 419 Members have recorded their presence by electronic device, a quorum.

Under the rule, further proceedings under the call were dispensed with.

## TEXTILE AND APPAREL TRADE ENFORCEMENT ACT OF 1985—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore. The Chair recognizes the gentleman from Florida [Mr. GIBBONS].

GENERAL LEAVE

Mr. GIBBONS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985, and the Presidential veto thereof.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. KOLTER].

Mr. KOLTER. I thank the gentleman for yielding time to me.

Mr. Speaker, while arms control is a very difficult and complex subject, one could argue that the United States and the Soviet Union have not yet arrived at an agreement because each side strongly believes that it must take a very firm position. I think it is most unfortunate that the United States does not take this same approach to trade negotiations. Instead, it seems that U.S. trade negotiators bring an attitude toward trade negotiations bordering on unilateral disarmament. They seem intoxicated with the textbook theories of "free trade" and appear willing to ignore international economic reality.

This year the Nation's trade deficit will approach the budget deficit. Over the last 5 years the trade deficit has exceeded $600 billion. Basic industries have been devastated. The steel industry has lost thousands of jobs over the last several years. Many of those lost jobs were due to increased imports and the failure of the administration to grant meaningful import relief. Instead, the United States entered into import restraint agreements with major steel-producing nations. While this sounds good at first glance, it does not go far enough. Imports are still capturing about 23 percent of the domestic market. This is three points higher than Congress and the White House agreed to.

The situation in the domestic textile industry is just as serious. Last year's imports captured 50 percent of the domestic market. In some product lines up to 80 percent of the domestic market was supplied by imports. Since 1981, in excess of 350,000 U.S. workers have lost their jobs.

In the face of this serious economic disruption we have heard very tough talk from the White House and our trade negotiators. Now that the time has come to review the results of this tough talk on trade, we are able to see that the love affair between our trade negotiators and "free trade" is flourishing.

The multifiber arrangement was negotiated to assist developing nations in capturing a healthy share of the world textile and apparel market. Domestic textile producers were told that they could plan for an orderly 6 percent rate of growth in imports under the multifiber arrangement. What really has happened was that imports averaged 19 percent since 1980.

The new agreement is not only too generous to major textile exporters, but it ratifies the extremely high levels of imports that have been flooding our markets over the last several years. In addition to granting South Africa a 4-percent increase in market share growth, it sends a message to other textile exporters. That message is: "It is not necessary to live-up to the benchmark levels negotiated in this agreement, because the United States will not punish violations. Instead, the United States will concede any market share growth beyond the negotiated limits and then even add more when the next multifiber arrangement is negotiated."

Mr. Speaker, the American textile worker like workers in other domestic industries are only seeking a fair chance to compete. They expect their Government to work toward securing a more level playing field. They do not expect their Government to trade their jobs away by placing foreign policy objectives above the interests of American workers.

By overriding the President's veto of the textile and apparel trade enforcement bill, Congress will send several very pointed messages. We will make it clear to the President and our trade negotiators that Congress is not satisfied with their performance in negotiating textile and other trade agreements. Second, we will send a message to our trading partners that the United States seeks a level playing field in the international marketplace. If our trading partners do not open their markets, especially to American agriculture, we have no choice but to limit the volume of the textiles and apparel they ship into this country.

Mr. Speaker, many talk about Adam Smith and "The Wealth of Nations," but how many have read what Mr. Smith wrote? So often we hear the theoretical abstractions about free trade, but rarely are we told what Adam Smith wrote about the real world in his famous work. He cites several cases when it would be appropriate to take unilateral action to enforce fair trade. I will list one. He specifically wrote that when one nation places barriers to imports from another, that the victim has the right to retaliate, especially when it means that many jobs will be lost in the nation whose products are denied market access.

Agriculture is an area where the United States could clearly sell more to major textile manufacturing nations. That would certainly assist the United States in the lowering the trade deficit. Yet these nations are purchasing fewer and fewer agricultural products while at the same time, they are sending us more and more textile and apparel products. Something is wrong here. Congress needs to send a message that anything short of a level playing field is unacceptable.

Lastly, Congress needs to send a message to American workers that there is still someone in the U.S. Government who is looking out for their interest. Last week several women from the Big River mill in Kittanning, PA stopped by my office and told me that if this veto is not overriden, they and about 350 of their coworkers would lose their jobs by the end of the year—just in time for the holidays.

These women explained that most of the people working in the Big River mill are the sole source of family income. Husbands have lost their jobs due to steel mill shutdowns and they have been unable to find gainful employment. Therefore, these families must rely on income from the textile mill. Few have any job prospects if the Big River mill closes.

Yesterday the Washington Post carried an incredible ad sponsored by the Retail Industry Trade Action Coalition. Among other things, it read the American consumers would have to pay $70,000 for each $13,000 textile job this bill would save. I could not believe the heartlessness and extreme lack of compassion expressed in that ad. It was shocking to me that a group claiming to represent retailers and consumers would be willing to publically place the value of a person's job over the possibility of saving a few dollars for consumers. What they forgot to print is that most apparel prices are the same regardless of country of manufacture and that those American textile workers are also consumers.

Mr. Speaker, let's make sure the President keeps his word to protect American jobs and to break down barriers that prevent more American products from being sold in other nations. Let's vote to override the President's veto of H.R. 1562.

□ 1320

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from Kentucky [Mr. HUBBARD].

Mr. HUBBARD. Mr. Speaker, I rise in strong support of the efforts and the motion to override the Presidential veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act.

There is too much umemployment in our country today because of too many imports and too few exports. Many of those now unemployed previously worked in factories in which clothes and shoes were once manufactured.

We have tried to negotiate a trade balance which is equitable. We have failed. It is time now for strong legislation. Please vote "Yes" to override the Presidential veto of H.R. 1562.

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. GRAY].

Mr. GRAY of Pennsylvania. Mr. Speaker, I rise in strong support of the efforts to override the President's veto.

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from South Carolina [Mr. TALLON].

Mr. TALLON. Mr. Speaker, I rise in strong support of the efforts to override the President's veto.

Mr. Speaker, American industry today competes in a global marketplace, against a growing array of trading nations. The competition has become so fierce that, in many ways, the entire world is turning into the O.K. Corral.

Our competitors are gunning for us, they're coming from every direction, and they're not fighting fairly. Unfortunately, as our $84 billion trade deficit demonstrates, we haven't been very fast on the draw.

Instead we hide behind a flimsy myth of free trade. But as we cling to this myth, essential American industries are crumbling under a rising tide of imports.

We can no longer afford to ignore the stark truth that free trade isn't fair trade. For, the theory of free trade has been made a mockery of by the unfair trade practices of other nations and the reluctance of our own Government to enforce our existing trade laws.

Where do unemployment, foreign quotas, controlled foreign markets and unenforced customs regulations fit into this theory of free trade?

In South Carolina, we are seeing entire towns shut down in the face of the textile imports leaving families jobless and hopeless.

If there is one work that encompasses all that American stands for it is "opportunity." And it is the future opportunity of millions of American workers that we are deciding here today.

American workers want and deserve the opportunity to compete with foreign workers on an even footing. Nothing more. Nothing less.

Mr. Speaker, I rise today to urge my colleagues in the strongest terms to join me in an override of the President's veto of the Textile and Apparel Trade Enforcement Act.

The Commerce Department recently revealed that the U.S. trade deficit reached $83.9 billion in the first half of 1986—the worst ever—despite an 8.5-percent drop in the dollar's value since January 1 and a 19-percent slide since September 1. A major contributor to this trade deficit has been a dismaying 22-percent increase in textile and apparel imports. And the Chairman of the Federal Reverse Board, Paul Volcker, has predicted that this trade deficit will precipitate domestic economic stagnation.

Yet, the administration maintains its policy of inaction in the hopes that the "invisible hand" of a free trade economy will intervene to protect the thousands of jobs that are being lost yearly. It has not and it will not. If we really care about American jobs, American industry and the American economy, we must discard our rose-colored glasses and take a good hard look at the current international trading situation.

American industry today competes in a global marketplace, against a growing array of trading nations. The competition has become so fierce that, in many ways, the entire world is turning into the O.K. Corral. Our competitors are gunning for us, and they're coming from every direction. And as our deteriorating balance of trade suggests, we haven't been very fast on the draw. Instead we hide behind a flimsy myth of free trade. But as we cling to this myth, essential American industries are crumbling under a rising tide of imports.

We can no longer afford to ignore the stark truth that free trade isn't fair trade. For the theory of free trade has been made a mockery of by the unfair trade practices of other nations and the reluctance of our own Government to enforce our existing trade laws. Where do unemployment, foreign quotas, controlled foreign markets and unenforced customs regulations fit into this theory of free trade?

We must look at the practical realities:

At least half of the world is affected by some sort of "protectionism"—tariffs, quotas, subsidies, or other measures that distort trade by preventing its free flow.

Fully 40 percent of the world trade is not between countries but between branches of multinational companies.

Almost every nation except the United States has a trade policy and makes it part of its overall foreign policy.

The U.S. textile and apparel industry and its workers are the most productive and efficient in the world, but they cannot compete against foreign governments that subsidize their industries, pay workers as little as 16 cents per hour and impose severe restrictions on imports from the United States and other countries. The U.S. fiber, fabric, and apparel manufacturers want an opportunity to compete with foreign companies on an even footing. Nothing more. Nothing less.

The American textile and apparel industry is fighting for its life. In 1985 alone, apparel imports swallowed half the U.S. market and, in some categories, captured 80 percent. The textile and apparel trade deficit has hit a record $18 billion. This deficit translated into human terms, has claimed over 300,000 jobs. All across the country. skilled textile and apparel industry workers are arriving at the workplace only to be told they are no longer needed, that they'll have to look elsewhere for work—even when "elsewhere" doesn't exist in their community.

In South Carolina, we are seeing entire towns shut down in the face of the textile deficit leaving families jobless and hopeless. Meanwhile, the administration has announced that it intends to allow increased textile imports from South Africa. What is fair or even free about that? What does this say about our administration's commitment to opportunity, to hope, to a future for America's workers?

Today, the U.S. House of Representatives will decide whether to override the veto of the Textile and Apparel Trade Enforcement Act. The Senate will vote on the override soon after. What is at stake now is the future of America's largest manufacturing industry. For, if the current situation continues, by 1990 we will see dark effects: 947,000 people in the textile and apparel industry will have lost their jobs; 943,000 other workers will be out of work because of the "ripple effect"; the Federal budget deficit will soar another $24 billion. Our already overwhelming trade deficit will increase another $21 billion; U.S. citizens will have $19 billion less in disposable income; consumers will spend $8 billion less; corporate profits will fall by $10 billion; the gross national product will decrease by $40 billion.

It is vital that colleagues, in the House and Senate, join me in a bipartisan effort to override the President's veto.

Less than a month ago, our entire Nation celebrated the birthday of the Statue of Liberty and all that she symbolizes. By overriding this veto we will reaffirm our commitment to opportunity, to U.S. industry, to the American dream. The time for talk is past, now we must act. It is a responsibility we cannot afford to shirk.

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from Oregon [Mr. AuCoin].

Mr. AuCOIN. Mr. Speaker, I rise in support of the President's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act.

Last October I voted against this bill because I felt it was bad law. Today I will vote to sustain the President's veto of this bill because it is still bad law.

If a student of international relations were looking for the textbook definition of "protectionism", this bill would be required reading. The purpose of H.R. 1562 is to simply "protect" an industry that has faced stiff competition from overseas by imposing arbitrary quotas on the imports from those countries.

But protectionism is no panacea for the woes of this, or any other, American industry that finds itself beseiged by foreign imports.

Yes; this bill would save jobs in the textile and apparel industry. But it would be an extremely expensive rescue operation. It's estimated that it would cost about $60,000 to $170,000 a year per $13,000-a-year job saved. I don't think the average American taxpaying citizen is ready to be that generous.

Meanwhile, restricting cheaper imports will no doubt instigate an increase in the price of clothing and shoes by $44 billion over the next 5 years alone. This is just a discreet way of imposing a tax on the American consumer—and an economically destructive and regressive one at that.

The most serious objection I have to this legislation is that its passage is sure to trigger a tidal wave of retaliation that will leave other U.S. industries—and jobs—destroyed in its wake. And much of the destruction will be in my district.

This legislation is targetted only at the countries of the Pacific Rim. The European Community and Canada are totally exempt from the bill. Does anyone honestly believe that the nation of Korea, Taiwan, Japan, Hong Kong, and so forth will sit by idly while we take this unilateral action restricting the level of their exports to the United States?

I think not.

They will retaliate.

And who is the likely target of their retaliation?

Well, the 12 major textile-producing nations targetted by this bill imported approximately $50 billion of U.S. agricultural goods in 1985, including large quantities of soybeans, wheat, cotton, and tobacco.

I think it's pretty evident that one of the main targets of their reprisals will be the American farmer.

Is there any segment of the American community that is in more dire straights right now

than the farmer? Is this a time when we want to make conditions worse for American agriculture? Several weeks ago I held a series of meetings in Oregon with the farmers in my district and they are scared. Unanimously, they oppose this bill because of the spectre of retaliation. And remember, they were burnt just a few years ago when China retaliated against a similar United States action by cutting back on its wheat imports.

Mr. Speaker, there are other industries, such as our burgeoning high-technology community, that are possible targets of retaliation. The inevitable by-product of protectionism is that you trade off one industry against another. You are then faced with no-win questions like: "Should we sacrifice a family farm in Oregon for the sake of a job in a textile mill in Georgia?" Or, "Should we ask the counter clerk at the local department store to give up her job for the sake of the apparel seamstress in New York?"

In addition to my strong philisophical objections to protectionism and my concern over its detrimental affects on economic development in this country, and in Oregon especially, there have been some recent developments in the international community that further argue against the need for this bill.

First of all, the domestic textile industry has been experiencing an economic rebound in 1986. In the first 5 months of this year, exports of U.S. textiles were up 13 percent. Exports of apparel were up 19 percent. Employment in the textile industry has risen by 4 percent in the first half of 1986. And profits for both industries have actually doubled over the first quarter of 1985.

Second, the textile industry already is one of the most protected industries in the United States. Tariff barriers on these products already average 22.3 percent, compared to an average tariff of less than 5 percent for all other industries. And while I am the first one to criticize the administration when I believe it has not done enough to stop unfair trading practices, it is a fact that since 1980 we have negotiated 38 bilateral textile agreements that contain almost 1,000 quotas.

In fact, three separate agreements have just been reached with major textile suppliers—Hong Kong, Korea, and Taiwan.

Under the new agreement with Hong Kong, import growth will average approximately 1 percent annually between 1985 and 1991. In addition, this restriction will apply not only to previously covered cotton, wool, and manmade fiber imports, but also to imports made from ramie, linen, sild blends, and other fibers that until now have been exempt from quotas. It will reduce 1986 imports almost 5 percent from levels prevailing in the most recent 12-month period.

The agreement with Taiwan will hold the average annually growth rate through 1988 to just over one-half of 1 percent. The 1986 cap would be approximately 7 percent below the most recent 12-month period. Furthermore, these agreements contain a condition that any future lengthening of the agreement or alternation in growth rates is contingent on Taiwan taking steps to open its markets to United States exporters.

And just 2 days ago a new pact with Korea was announced which limits import growth to 0.8 percent a year, compared with an average growth of 8.6 percent from 1981 to 1984.

A sledgehammer approach to trade has never produced results in the real world of international economics. It's only caused problems. You only have to recall the infamous Smoot-Hawley Act to prove that.

If certain foreign countries have developed an unfair advantage in international trade, the only constructive way to eliminate that advantage is by exerting pressure from within the international community. And, in fact, that is exactly what has happened in the last few weeks in the cases of textiles from Korea, Taiwan, and Hong Kong and semiconductors from Japan.

Besides, it's never been the American way to curl up into a shell and erect walls around our industries. When American jobs were on the line, we've fought back. And, in fact, that is just what the American textile and apparel industry has done in the last year.

On behalf of my constituents in Oregon, in the best long-term interests of America, I urge my colleagues to defeat the motion to override the President's veto of the Textile and Apparel Trade Enforcement Act.

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois [Mr. GRAY].

Mr. GRAY of Illinois. Mr. Speaker, I rise in strong support of the efforts to override the veto of the President.

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. OWENS].

Mr. OWENS. Mr. Speaker, I rise to urge all of my colleagues to vote to override the veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act.

The President has vetoed this legislation based on his ardent belief in free trade. However, he is merely waving free trade as a slogan which covers a multitude of evil practices which are well known to him. Free trade, as it is articulated by President Reagan means, quite simply, that the United States will establish no barriers to goods which are subsidized by the exporting countries; the United States will establish no barriers to goods which are produced by countries which utilize large amounts of semi-slave labor, and the United States will establish no barriers to goods which are produced utilizing American capital which has fled this country to Third World nations where the return is greater because the industries are subsidized and the wages and working conditions are appalling by any contemporary standard of decency.

The United States is a major actor on the world stage. What we do, the policies that we set, create a positive or negative influence on the rest of the world. The very fact that we trade with countries which treat workers as disposable fodder to be tossed back when used up makes a statement to the rest of the world that we accept these practices and that we, as a matter of policy, allow the jobs of American workers to be exported for the profits to be gained by the multinational corporations involved who engage in these practices.

I believe that all Americans could support free trade if it was indeed free. We should be able to trade freely with those nations which see to it that their workers are paid wages comparable to American wages and which also see to it that their workers work under conditions which are not shocking to contemporary standards of decency. These basic standards are clear to all Americans. They include the outlawing of child labor, the establishment of a minimum wage which provides for the basic necessities of food, housing, and health care and the establishment of working conditions such as maximum hours of work and protection from known hazards. Beyond that, workers should be free to organize to improve their own lot without interference by the corporations involved or the Government. The practical reality is that this is not what is happening with our many trading partners today and there is no reason to believe that it will happen tomorrow as long as we bring no pressure to bear on these issues.

Again, I urge my colleagues to override the veto. To allow the current notion of free trade to prevail is to support the freedom to exploit workers abroad while sanctioning the theft of jobs of American workers by those who are unscrupulous enough to take their capital abroad and use it to exploit unprotected workers elsewhere.

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from New Mexico [Mr. RICHARDSON].

Mr. RICHARDSON. Mr. Speaker, I rise in strong support of the efforts to override the veto.

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts [Mr. BOLAND].

Mr. BOLAND. Mr. Speaker, I rise in support of the vote to override the President's veto. Mr. Speaker, how long can the administration continue to bemoan the huge annual trade deficits, and yet take action that only exacerbates the situation?

By now we all know the numbers since 1980, and estimated 2 million American jobs have been lost to imports. Since 1981, textile and apparel imports have doubled and now comprise over 50 percent of the domestic market. Imported footwear accounts for an incredible 71 percent of the U.S. market. In 1985 alone, apparel imports captured half the domestic market and 80 percent of sales. And there is every indication that this year's overall trade deficit will again set a new record. If the present trend of imports continues for the next 4 years, the Commerce Department estimates a loss of 1.8 million U.S. jobs, $40 billion of GNP, and $8 billion in consumer income. In my State of Massachusetts alone, since 1980, 10,000 textile workers have lost their jobs.

What steps has the administration taken to improve our trade posture in our most decimated industries? In 1984, the International Trade Commission found, that the copper industry had been injured by foreign competition and recommended that import relief be granted. The President refused to grant it.

In 1985, the International Trade Commission ruled unanimously, that the footwear industry had been injured by imports and voted

to recommend import relief. Again, the President refused to step in.

While the President evidently has not seen the need to assist U.S. industries suffering under the trade deficit, he has seen fit to allow South African textile imports to this country to continue to increase—even though the 1985 level was 139 percent above the 1984 level. The recently concluded bilateral agreement, with the South African Government, will allow them to substantially increase their textile exports to the United States.

The administration is now singing the praises of its recently negotiated Multi-Fiber Agreement. But this new arrangement is a day late, a dollar short, and, if its enforcement bears any resemblence to that of the prior treaty, it will also be a miserable failure. That earlier agreement was supposed to permit developing countries a healthy 6 percent growth in the U.S. market—since 1980 those imports have risen average of 19 percent each year.

Mr. Speaker, our Nations' $45 billion textile industry—an industry that accounts for one of every eight manufacturing jobs in this country—is in serious trouble. The reasons for the health of foreign textile producers is obvious. Foreign governments offer preferential loans, grants, tax breaks, and other subsidies to attract United States and foreign firms, while banning American products in their countries. Wages paid to foreign workers average one-tenth those paid to U.S. workers.

In the past month, we have seen the administration negotiate no less than four textile trade agreements. This patch-work diplomatic effort is not the type of trade policy this country should be guided by. The comprehensive framework of H.R. 1562 will get us out of the bleachers, and on to the same playing field, as our trading partners. H.R. 1562 is not a protectionist departure from U.S. policy. It would simply require the administration to enforce the objectives of the Multi-Fiber Agreement it just negotiated. This bill should have become law last year. Let's reaffirm our support for the American textile worker today, and override the veto.

Mr GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan [Mr. FORD].

Mr. FORD of Michigan. Mr. Speaker, I rise in strong support of H.R. 1562, the Textile and Apparel Trade Enforcement Act. It is imperative that the House override the President's veto of this important trade bill.

The American people are tired of hearing the public relations campaign of the White House that our Nation does not need legislation to protect us from foreign imports. The people in my district do not believe the administration's advertising campaign. They can see firsthand the closed plants and the job losses in the auto, steel, and rubber industries. They do not need the free traders in the White House to tell them that legislation like this textile bill is not necessary.

My constituents have suffered through the President's free trade policies. They know fair trade when they see it. And they know that when our Nation's 1986 trade deficit is running at an annual rate of $168 billion, there is no such thing as fair trade. They know that when a third of our 1985 trade deficit of $148.5 billion results from our trade with Japan, something must be done. Michigan workers and their families know that Japan, Korea, and Taiwan do not practice fair trade.

Clearly, the administration's tactic of ongoing negotiations has provided little relief. Our trade problem is getting worse, not better. Last year the Congress spoke clearly in favor of a strong trade policy by passing this textile bill, only to have it vetoed by the President. The House again acted earlier this year by passing comprehensive trade legislation. Of course, the White House also threatened to veto that bill.

Mr Speaker, my colleagues may wonder why a Member from Michigan feels so strongly about trade legislation that will help textile, apparel, footwear, and copper mining workers. The key issue here is jobs—American jobs. The jobs of American workers in these industries are moving overseas, and the issue is whether the Congress is going to stand by and watch or take action to halt this job loss. Do we want jobs in the United States or do we want these jobs of continue to move to Asian and Pacific Rim nations? We must act to stem the flood of job losses.

While it is more important to me to protect auto and steel jobs in Michigan, it is also important to protect the jobs of textile workers in Georgia and the Carolinas, shoe workers in Maine and Tennessee and copper miners in the Upper Peninsula and Arizona.

I urge my colleagues to vote to override the President's veto.

The SPEAKER pro tempore (Mr. BROWN of California). The Chair should remind the Members that unanimous consent for all Members to revise and extend their remarks has already been granted. Therefore, these separate requests are necessary.

The Chair recognizes the gentleman from South Carolina [Mr. CAMPBELL].

Mr. CAMPBELL. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. RITTER].

Mr. RITTER. Mr. Speaker, I rise to urge my colleagues in the strongest terms to vote to override the veto of the Textile and Apparel Trade Enforcement Act of 1985. Since 1980, imports of textile and apparel products have grown at an annual rate of 19 percent and now exceed a 50-percent share of our domestic market. Even should the provisions of this bill be implemented, imports would have more than a 50-percent share of the market but the growth of imports will stop. In no other market, autos, steel, microships, and so forth would such an import market percentage be acceptable.

The Lehigh Valley of Pennsylvania, which I represent, has lost as many as 10,000 textile and apparel jobs in recent years and many thousand more are at stake. This legislation does not cut off all imports. What it does is show respect for American jobs—important jobs for the area which I represent, important jobs for Pennsylvania, for America. Jobs which affect not only individuals and families but entire communities in the Lehigh Valley.

The area which I represent is changing. It's job base is adapting to meet our changing society, but these changes do not occur overnight. The precipitous decline of the textile and apparel industry has proven dangerous to the well being of many of the communities in my area of the country. All that these communities, families and individuals ask is that they be given the chance to keep pace with the changing society and not be left behind.

Mr. Speaker, the American textile and apparel industry is doing its fair share. It has worked to keep their prices competitive by investing $8.1 billion on plant modernizations since 1980. What's more—they've been successful.

Some of my colleagues want to make this into a debate between saving jobs or raising prices. I recently asked my constituents a very tough question. "Would you favor higher tariffs and quotas on imports like steel and apparel to protect certain American industries and jobs, even if this would mean higher consumer prices?" My constituents, consumers all of them, voted overwhelmingly by 63 percent yes to 33 percentage no, in support of legislation to restrict unfair foreign trade—even if they had to pay higher prices. They voted to support jobs in the textile and apparel industry.

Mr. Speaker, this legislation is not going to put food on the table tonight or pay this month's rent or mortgage payment for unemployed apparel and textile workers. But this is a step toward helping our domestic textile and apparel industry to turn itself around, not get a government bailout, but to turn itself around. We need this legislation for our workers who average about $5.75 per hour and who are competing with workers overseas who work for as little as 16 cents an hour. We in this country will not tolerate what is virtually slave labor. We don't expect to see it here and we will not support it abroad. Finally, Mr. Speaker, we need this legislation for the dignity of the American apparel and textile worker so that they might continue to say, "Crafted with Pride in the U.S.A."

Mr. CAMPBELL. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. MCGRATH].

Mr. MCGRATH. Mr. Speaker, I rise in support of the veto override.

Mr. CAMPBELL. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. DREIER].

Mr. DREIER of California. Mr. Speaker, I rise in strong support of the President's position.

Mr. Speaker, I rise in opposition to H.R. 1562, to override the President's veto of the Textile and Apparel Trade Enforcement Act. I regret that we have not yet learned the lessons of our past. President Hoover proposed to increase agricultural tariffs in 1929. Unfortunately, his proposal opened the floodgates for other industries to fight for their own protection. By the time the bill passed, one-third of the items in the Tariff Act had been increased. Against the advice of 1,028 economists, President Hoover signed the Smoot-Hawley Tariff Act. As we all know, foreign retaliation followed, bringing world trade down from $66.6 billion to $26.3 billion in just 3 years. U.S. trade dropped from $9.5 billion to only $2.9 billion.

We have all been involved in the ongoing debate to open up foreign markets to U.S. products. A myriad of bills have been introduced on behalf of various industries. And yet, we are here today to restrict textile and apparel imports.

Never mind that by a large majority, the House of Representatives voted, in H.R. 4800, for a new round of multilateral trade negotiations to revise and strengthen the rules and regulations of GATT. Of course, enactment of this bill would violate our international obligations and 38 existing bilateral restraint agreements.

Never mind that 10 former chairmen of successive Presidents' Councils of Economic Advisers have joined together against the textile bill and the veto override.

Never mind that the domestic textile and apparel industry is the most protected industry in the Nation and the U.S. footwear industry has received—on four occasions—import relief under section 201 and other trade statutes.

Never mind that the domestic textile output is up 11 percent and apparel up 3 percent in the first 5 months of 1986. Or that profits doubled both in the first and second quarters of this year over last year.

Never mind that the Council of Economic Advisors estimates that if this bill passes, consumers will pay an extra $44.6 dollars for clothing over the next 5 years—an average of $70,000 for every job protected. Personally, I do not think that we should restrict the consumer's choice. Imports often help lower- and middle-income shoppers clothe their families at a lower cost.

Never mind that this bill, in addition to protecting jobs in the textile and apparel industries, could threaten other jobs throughout the country if our trading partners choose to retaliate. Most vulnerable are those whose jobs are involved with exports, especially our farmers, who export $12 billion worth of products to the 12 countries who would be penalized by the bill.

Never mind that the administration has made significant progress in meeting our objective of more orderly imports of textile and apparel products. Not only will the lower value of the dollar improve our competitive position, but the United States has recently reached agreements with both Hong Kong and Taiwan—our largest suppliers of textiles. Under the new agreement with Hong Kong, import growth will average 1 percent annually until 1991. The agreement with Taiwan will hold the average annual growth rate through 1988 to just over one-half of 1 percent. This is remarkable considering Taiwan's exports have been averaging 15 percent a year since 1981. The 1986 caps are below the most recent import levels—an average of about 7 percent lower.

We have sent our trading partners a very clear message. Our commitment to fair trade has been a hammer by U.S. negotiator Charles Carlisle to win agreement for a tough U.S. stand in the textile talks. As a result, the administration was successful in extending MFA coverage to new fibers, such as silk, and possibly ramie.

I suggest that we consider our past mistakes and reject any attempt that will lead us down the road of protectionism.

Mr. BUSTAMANTE. Mr. Speaker, I rise in support of the motion to override the President's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act. My colleagues, today's vote may well determine the future of America as a manufacturing nation and the future of thousands of workers whose job security is threatened by unsustainable trade deficits and import surges.

Based on its past actions—or, rather, its absence of action—this administration has shown a consistent insensitivity to the deteriorating condition of the Nation's basic industries and to the sputtering performance of our domestic economy.

Following the veto of the Textile and Apparel Trade Enforcement Act last December, we were led to believe from a Presidential directive that the U.S. Trade Representative would "closely consult with the U.S. textile and apparel industries to ensure that their views will be fully represented during renewal of the Multi-Fiber Arrangement." I am sorry to say that that promise was not honored.

In hearings recently held by the House Government Operations Subcommittee on Commerce, Consumer, and Monetary Affairs, ably chaired by Representative DOUG BARNARD of Georgia, it was learned that our United States Trade Representatives failed to consult consistently with industry and labor representatives before agreeing to a precedent setting bilateral agreement with Hong Kong. Failure to consult with industry representatives resulted in a final agreement that substantially changed a more favorable proposal presented to industry representatives just 24 hours earlier. Is this the kind of advisory process that should be employed when forging major international agreements? Does this kind of behavior lend reassurance to our industries that their views are being forcefully represented when America's top trade officer negotiates with their international competitors. Of course not.

It has also become quite disturbing to me that the administration's foreign policy considerations are weighing too heavily in its conduct of international commercial negotiations. A case in point is the recent negotiations for the renewal of our military bases in Turkey. The administration caved in to pressure to increase Turkey's share of the United States textile market in order to gain leverage in the negotiations over our bases. The bases we lease from Turkey are, doublessly, of vital strategic importance, but is it also necessary to abandon our own basic industries with increased imports when we supply that Mediterranean country with $1 billion in foreign aid? It is my understanding that in matters such as these, the U.S. Office of the Trade Representative is supposed to advance and protect American commerical interest, not to undermine them.

These two incidents represent a microcosm of what is happening in international negotiations, in general. The United States must start looking at the world as it is in respect to international trade, and not how we would like it to be. We live in a world of adversarial trade practices, and for some unexplained reason, we find ourselves unwilling to stake out a very tough set of negotiating strategies and objectives. As a consequence, the United States is generally on the losing side of the negotiating process. Too many countries, especially in the Pacific Rim, continue to expand their industiral bases while decreasing their share of foreign imports.

We hear a lot of talk these days of dinosaur industries, and it is all to common to label the textile and apparel sectors as a dying industry. It is an undisputed fact, however, that America's textile and apparel industries are the most efficient in the world.

Opponents of this override motion argue that these industries have benefited from two centuries of protection. What they omit saying is that these industries receive a greater degree of domestic protection and Government support on virtually every continent.

This is an issue that strikes home with me and my constituents. I represent a district that lives and dies on trade with Mexico. Since I became a Member of Congress last year, my district has already seen one apparel plant closing. Since 1982, the 23d Congressional District has lost over 1,100 jobs in the textile and apparel sectors, in large part due to the import surge hitting this country. Our problems are only a fraction of those facing many other textile towns throughout the country.

Two years ago this administration repudiated all congressional efforts to develop a national industrial policy. It did so because the administration said that Government should not be in the business of picking winners and losers. But its trade policies are doing just that—picking winners and losers. And this administration has decided that America's textile and apparel industries are losers.

I reject this attitude and I hope you will to. I, therefore, urge my colleagues to take substantive action today and vote in favor of the override of the veto of H.R. 1562.

Mr. SHUMWAY. Mr. Speaker, I rise in strong opposition to this effort to override the Presidential veto of the textile bill.

We are asked to consider additional protectionist measures for the textile industry which already has more than 300 import quotas and an average tariff for its products of about 22 percent, over four times the average for any other American industry.

The disastrous effects of protectionist measures were clearly demonstrated by the Smoot-Hawley Tariff Act in the 1930's. This law, which imposed an average rate of 53 percent on dutiable imports, represents a protectionist's paradise. The spiraling retaliatory trade measures and the sharp decline in world trade, including a decrease in U.S. exports of almost 70 percent, as a result of this protectionist approach should have settled this debate once and for all.

Yet today we are asked to provide additional protectionist measures for the textile industry in the name of fairness. An evaluation of this issue in terms of fairness requires consideration of the interests of all Americans.

Is it fair to ask consumers to spend an additional $2.4 billion per year on textile products, on top of the $4.4 billion which consumers pay in higher prices as a result of existing textile restrictions?

Is it fair to save 36,000 jobs in the apparel industry at a cost of $66,000 per job and 35,000 jobs in the textile industry at a cost of $27,000 per job?

Is it fair to ask farmers to bear the brunt of retaliatory measures imposed as a result of textile restrictions? In 1983, the United States imposed unilateral restraints on Chinese textile imports. American farmers lost $500 million as a result of Chinese boycotts of American cotton, soybeans, and synthetic fibers, and a 50-percent reduction in their purchases of American grain.

Insulating the textile industry from offshore competition will not solve the industry's problems. In fact it will dampen efforts to strive for greater efficiency and competitiveness which are essential to the growth and development of every industry.

For these reasons, I urge my colleagues to sustain the President's veto of the textile bill.

Mr. YATRON. Mr. Speaker, I want to remind all my colleagues of what our vote to override the President's veto of H.R. 1562 means to the American worker and an important domestic industry. I think we all know quite well how crucial the textile and apparel industry is to our Nation and what a crisis the industry and its work force has been in since the trade deficit began to deteriorate in 1980.

Late last year, the Congress voted decisively to take action against the flood of textile, apparel, and footwear imports choking the life out of our domestic producers and workers. We said in that bill that America should no longer be the dumping ground for the millions of these imports produced in countries which subsidizes their industries. Those same subsidized industries, we knew, also paid their workers a few cents a day for their labor. Subsidized industries and cheap labor were compounded by a number of questionable practices, like country of origin violations, which foreign producers engaged in to get around existing trade laws. All of this, and the knowledge that 388,000 Americans had lost their jobs as a result, gave us the resolve to pass H.R. 1562.

With his veto, the President said that an idealistic notion, "free trade," was more important than the right every nation has to fairness in its commercial dealings in the international marketplace. In the 7 intervening months, the Congress has given the President ample time to try to improve the trade situation. The new Multi-Fiber Arrangement is still a failure. With it, we can expect imports to capture even more of the domestic market and the American textile, apparel, and footwear industries to be in even deeper economic trouble.

Today, we must exercise our constitutional responsibility to override what we know to be an unfortunate decision of an administration clinging to an outdated notion of free trade. What is at stake is nothing less than the continued existence of three crucial industries and the millions of American workers and consumers it benefits. Mr. Speaker, let us send a resounding message to the world that we care about all American industries and workers and that the American marketplace will no longer bear the infinite weight of foreign-made goods. I urge all my colleagues to support the override of H.R. 1562.

Mr. MANTON. Mr. Speaker, I rise in strong support of the motion to override President Reagan's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act.

Mr. Speaker, the U.S. trade imbalance has reached crisis proportions. Last year, the U.S. trade deficit was a recordbreaking $148.5 billion. This year, the trade deficit is expected to exceed $170 billion. Since President Reagan took office, more than 3 million Americans have lost their jobs due to a flood of cheap, subsidized imports which is drowning our economy and swamping our basic industries.

The American textile industry has been particularly hard hit by unfair foreign competition. Since 1980, textile and apparel imports have doubled. More than 350,000 American textile jobs have been lost and 250 textile plants have closed their doors. Textile imports have captured roughly 50 percent of the domestic market.

The Multi-Fiber Arrangement [MFA] was supposed to promote reasonable and orderly international textile trade. Under the terms of the MFA, developing countries were permitted to increase textile imports into the United States by 6 percent each year. However, since 1980, textile imports have surged by a rate of 19 percent a year. Despite the fact that our competitors have blatantly violated the provisions of the MFA, the Reagan administration has failed to respond to this attack on American textile workers. The administration has adopted a "do-nothing" policy which allows textile workers fall victim to the unfair trade practices and closed market policies of our foreign competitors.

Mr. Speaker, this do-nothing policy is bad enough. But to make matters even worse, President Reagan continues to stand in the way of congressional efforts to fight back against unfair trade practices and put Americans back to work.

Last winter, Congress approved a bipartisan measure to stem the flood of cheap subsidized textile imports. This bill, H.R. 1562, would simply require the Federal Government to roll back textile imports to the level where they should be today had the administration properly enforced the MFA. In addition, this bill would provide some desperately needed relief to the domestic footwear industry, which has been crippled by unfair foreign competition. Currently, foreign imports comprise approximately 80 percent of the domestic footwear market.

Even though both Houses of Congress chose to take a stand against these unfair trade practices by foreign nations, President Reagan vetoed this bipartisan legislation. But the administration did not stop there. Indeed, it took additional steps to further erode our trading position in the world textile market. First, the Reagan administration announced that the United States had signed an agreement with the racist South African regime that will permit them to increase textile imports into the United States. Second, the administration recently completed the renegotiation of the MFA. But the administration did not drive a very hard bargain. Under the new terms of the MFA, our competitors will continue to flood the American textile market in a sea of cheap imports. The President has clearly shown that he could care less about American textile workers.

Mr. Speaker, the House must vote today to override President Reagan's veto of H.R. 1562. At stake are the jobs of almost 2 million textile workers. If we fail to act, another 550,000 American textile workers will lose their jobs in the next 6 years.

The U.S. textile industry and its workers are one of the most dedicated, efficient, and productive in the world. Yet they are forced to compete against foreign nations that subsidize their textile industry, subject their workers to unfair labor practices, and close their markets to U.S. exports.

Mr. Speaker, contrary to the assertions of President Reagan, the American textile worker is not looking for protection from foreign imports; they are simply seeking an opportunity to compete on a level playing field. Let us give the American textile industry and its workers that chance. I urge my colleagues to vote to override President Reagan's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act.

Mr. FAWELL. Mr. Speaker, I rise in opposition to the override of the President's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act, and urge my colleagues to sustain the President's veto.

While I sympathize with the problems our domestic textile and apparel industry face, I do not believe that legislated quotas are the solution to those problems. At the expense of "saving" textile and apparel jobs, quotas would lead to job losses in other industries, such as agriculture.

Particularly hard hit by a trade war would be my State of Illinois. Illinois is one of the Nation's leading agricultural and manufacturing export States. We are all aware of the difficulties these sectors are experiencing in exporting overseas. H.R. 1562 would make them worse.

H.R. 1562 also unfairly penalizes consumers. In fact, low- and middle-income consumers will lose many of the low-cost benefits associated with free trade. Retailers estimate that H.R. 1562 would slap at least an extra 3 percent to weighted average apparel prices, foreign and domestic. According to the International Business and Economic Research Corporation [IBERC], apparel consumers would wind up shelling out an additional $2.4 billion a year, while textile consumers would pay $1 billion more a year. These increases are on top of the $5 billion more a year. These increases are on top of the $5 billion in higher prices that the Multi-Fiber Arrangement [MFA] presently imposes on consumers.

There exists little justification for implementing the sweeping quotas proposed by H.R. 1562. The textile and apparel industry is already one of the most protected in this country and will continue to be under the renegotiated MFA. On August 1, the administration successfully renegotiated a comprehensive MFA that is effective through July 31, 1991. The new MFA moderates growth in textile and apparel imports, prevents disruptive import surges, and expands product coverage to previously uncontrolled fibers such as ramie, linen, and silk.

Furthermore, the administration has undertaken numerous measures in the last several years to regulate textile and apparel imports. In 1981, 24 countries were covered by bilateral textile and apparel agreements. Today over 1,300 quotas are in place covering 38 countries; 550 of these quotas have been established since 1981, including 250 in 1985 alone.

More recently, the administration concluded bilateral agreements with Hong Kong, Taiwan, and South Korea. The new agreements expand product coverage and limit import growth to 1 percent or less per year.

Administrative procedures have also been improved to ensure that our textile and apparel agreements are properly enforced. The Customs Service implemented country-of-origin regulations which prevent exporters from circumventing their quotas.

The strides made by the administration during the past few years have benefited the domestic industry. Capacity utilization in textile is 88.4 percent in 1986; the national average is 78.6 percent. Textile output is up 11 percent and apparel output up 3 percent in the first half of 1986. Industry exports were up 13 percent in textile and 19 percent in apparel during the first half of 1986.

The stated purpose of H.R. 1562—to allow the textile and apparel to become competitive—will do just the opposite. Quotas will only lull the domestic industry into complacency, providing little incentive for it to modernize and enhance competition.

Trade problems are best resolved by the administration through negotiation. The U.S. Trade Representative has successfully concluded agreements which rectify many of the textile and apparel industry's concerns. Congressional interference in these sensitive matters is not warranted and will eventually prove counterproductive and harmful to the Nation's economy. The administration has done its part by concluding effective bilateral agreements and negotiating a new MFA. I strongly urge my colleagues to reaffirm this commitment by voting against the veto override.

Mr. KLECZKA. Mr. Speaker, much has been said today, on both sides, about the importance of the vote we are to cast on the veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act. And, indeed, it is an important vote. No matter which side we choose, repercussions will be unavoidable.

It is clear to me, Mr. Speaker, that the "popular" position for me on this issue is to override this veto.

It is equally clear that the "proper" position to take is to sustain this veto.

The temptation to override is strong, but the reasons are wrong. This bill is not the answer to our trade problems, and we cannot afford to allow it to be viewed as a cure-all approach for other domestic industries which will be standing in line if this bill becomes law. H.R. 1562 provides no cures, only false hopes and rude awakenings. It also threatens to cancel out the steady progress we have made this session in addressing the root causes of our trade deficit. Let's look at what we've done so far:

We have passed into law a bill which sets us on a deliberate course toward a balanced Federal budget, without which no domestic exporting industry—not textiles, not steel, not automobile or machine tool manufacturing—can hope to achieve long-term stability and growth in the international marketplace.

We have passed and sent to the Senate a comprehensive trade reform bill (H.R. 4800) which focuses on resolving the major weaknesses of our present trade policies which adversely affect all of our exporting industries, not just a few.

We need a stable international monetary policy to mitigate the effects of volatile fluctuations in the value of the dollar against foreign currencies. H.R. 4800 breaks new ground in this regard.

We need a Trade Representative who is equipped with the tools needed to more aggressively pursue and secure U.S. interests in negotiations with our trading partners. H.R. 4800 speaks to this need.

We need the resolve of the Congress to take decisive action against an importing country which denies its workers internationally recognized rights. H.R. 4800 provides it.

The recently negotiated Multi-Fiber Arrangement [MFA–IV], while far from perfect, gives us some of the protections desired by the textile industry against import surges and circumvention of trade restrictions through the export of certain fibers not covered under previous MFA's.

Perhaps the most ominous signal we will send if we override this veto is that our negotiations on matters such as the MFA and the General Agreement on Tariffs and Trade [GATT], scheduled to commence in September, are not to be trusted, believed, or taken seriously by those countries with whom we negotiate. And why should they?

H.R. 1562 is an injury waiting to be inflicted on the wrong target: ourselves. Mr. Speaker, this veto should be sustained.

Mr. AKAKA. Mr. Speaker, I rise today in support of the President's veto of H.R. 1562, and in opposition to today's effort to override that decision.

Nearly 10 months have passed since I last addressed this body on the dangers of H.R. 1562, and now, more than ever, I stand committed to that message.

Like many of you, I have received countless calls for assistance from our Nation's textile industry, indeed one of the most organized efforts I have seen to date. Unsurprisingly, most of the calls raise the same point—that textile imports are costing our domestic industry jobs, disrupting our own markets, and straining our trade deficit.

The cure, it is asserted, is found in the form of H.R. 1562, a bill purportedly designed to provide a fighting chance for the U.S. textile and apparel industry by simply slowing the rate of import growth.

A protected sector since the early years of the Republic, the textile and apparel industries are, without exception, the most insulated industries in the United States. In truth, it has been noted that these industries are already heavily protected, enjoying tariff protection nearly five times higher than the average for all other domestic industries. This, created on the premise that import limits help save jobs, when, in fact, they do not really do the job at all. Overall, tighter restrictions put thousands of other people out of work. What is most upsetting, indeed, is the blatant refusal to recognize this history, followed by an insistence on the establishment of more protectionist measures as the panacea.

Similarly, it is discouraging to witness an utter disregard for one of the major reasons for which the textile and apparel industries suffer unemployment: extensive modernization programs. Clearly, the declining job levels are directly related to the modernization of plants—investment in more modern equipment—diverting the industry from its former labor-intensive path to one which is instead capital-intensive.

What we have today, therefore, are textile and apparel industries striving to further enhance their shields of protection without acknowledging the costs of that protection.

The Alliance for Fair Trade has adequately researched the situation and found some very interesting cost-associated facts. First, this protection will impose costs on consumers. The existing quota and tariff system, it is found, adds 15.6 percent to the retail cost of a pair of $20 jeans. The cost of obtaining the quota overseas and of paying the U.S. tariff is $3.12. The severe decrease in quota levels required by the bill will, therefore, increase the quota and tariff cost to $8.12 on that same pair of jeans.

This is the case for only one type of apparel. According to the Council of Economic Advisers, the overall consumer cost of the quota and tariff system will be approximately $28 billion, or $450 dollars per family per year.

Second, the cost to the Government will be incredible. With direct Federal costs estimated at approximately $2 billion per year.

Third, we must recognize the cost in exports lost as a result of the measure. In 1984, the 12 nations most adversely affected by the bill imported $53 billion worth of goods from the United States. A total of 34 percent of our countries agricultural exports went to those twelve countries. Direct retaliation is certain.

Fourth, the cost of job creation is great. For each job created at a salary of $10,000 to $15,000, there would be a cost of $140,000. Since recent studies show that as many jobs would be destroyed as created, the economic losses would be substantial.

All of these costs for the sake of two industries whose own vitality seems quite assured. Our colleague, BILL FRENZEL, has brought a number of statistics to our attention, all of which are noteworthy. Textile output, for example, is up 11 percent, and apparel up 3 percent in the first 5 months of 1986. Over last year, profits have doubled both in the first and second quarters of this year, with productivity increasing by more than 7 percent in the first 5 months of 1986.

These figures are sure to be bettered, too, as a result of the administration's recent pacts with the governments of South Korea, Hong Kong, and Taiwan. As you know, these textile accords are tighter now: 0.8 percent growth limits on South Korea shipments, 1 percent on those of Hong Kong, and 0.5 percent on Taiwan's. In fact, the new accords are even more stringent for they have been expanded to control all textile and apparel imports, including previously unregulated fibers.

Isn't this enough?

I care, Mr. Speaker, about the vitality of our own economy, and I am concerned about our strength in the world arena. But, I simply cannot support a measure which disregards these facts, choosing instead to continue a system whose time has long since passed. Neither can my constituents.

Hawaii, in fact, is even more concerned because if this body agrees to override the President's veto, the textile and apparel industry out there will be literally devastated. In fact, I like to think of this measure as one posing a "double-whammy" on Hawaii. For, not only would the industry suffer a minimum 30-percent reduction in imports as a result of the bill, but it is clear that they will not be able to depend on the domestic industry for compensatory assistance.

Members of Hawaii's industry have met with representatives of our country's largest textile manufacturers, and have discovered that, while the domestic manufacturers have the capability to meet Hawaii's needs, they would not be inclined to do so because it would not be economically feasible for them. Hawaiian prints, for example, are small runs which are rarely reprinted. While able to print small runs of yardage, the domestic representatives simply would not unless ensured of repeat orders. Additionally, Hawaii's prints require multiple screens which, while technically feasible, would require long, repeated runs to ensure economic feasibility. Indeed, the domestic representatives noted that the Hawaii industry is unique, and unsupportable by the industry.

There is simply no more to say. Mr. Speaker, as expressed last October, I am truly sympathetic to the plight of our Nation's textile workers. I am also truly sympathetic to the important national issue of controlling our trade deficit. Likewise, I recognize that the legislation before us is less stringent than that passed by the House last year. Nevertheless, I firmly believe that this legislation is not the answer. We must accept the issue for what it really is, no less and no more—an age-old system of protectionism that is finally coming home to haunt us—and work from there. Until we are willing to accept that fact, anything we do will hurt, not help us.

Mr. GRADISON. Mr. Speaker, today the House of Representatives will vote on whether to override the President's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1986. I voted against H.R. 1562 when it was originally before the House, and I will vote to sustain the President's veto.

U.S. textile and apparel industries constitute, without question, the most protected industrial sector in our economy. They enjoy—to the detriment of American consumers—import tariff rate protection four times that of the average rate for other U.S. manufacturing sectors. Since 1974, textile and apparel manufacturers have benefited from very special treatment under the Multi-Fiber Arrangement [MFA], a complex international quota system that severely limits the flow of textile and apparel products into this country.

The MFA was originally intended to be a temporary measure, to give developing countries guaranteed and growing access to markets in Western Europe and North America, while arranging the growth so as to reduce competition to the established textile industries in those markets. The MFA has been extended three times, and with each renewal, the agreement has become more protectionist. The U.S. textile and apparel industries also enjoy special privileges that are not available to other industries. Imports of textile and apparel products, for example, are denied benefits under the Caribbean Basin Initiative [CBI] and the Generalized System of Preferences [GSP]. In addition, the highest import duties in the U.S. tariff structure, on average, apply to textile and apparel products.

While H.R. 1562 has been described by some as a trade enforcement measure, it would, in fact, drastically reduce trade in textiles and apparel. Fewer imports would make the industry less profitable, and result in the loss of thousands of jobs in the retail apparel sector. Jobs in other sectors of the U.S. economy would also be lost.

All of this would be of great cost—in the form of higher prices—to the American consumer. The President's Council of Economic Advisers estimates that the annual cost of H.R. 1562 would be $14 billion. This bill would also violate 38 bilateral trade agreements, thereby inviting retaliation by our trading partners aimed at U.S. agriculture, technology, and aviation exports.

Protectionist actions frequently invite retaliatory measures. In May of this year, for example, the United States imposed a tariff on Canadian cedar shakes and shingles. Canada, then, immediately slapped new restrictions on United States-made books, computers, and semiconductors. Ironically, this altercation took place just as negotiations between the United States and Canada for a free-trade agreement were starting up.

Through enactment of H.R. 1562, the domestic industries seek a guaranteed fixed share of the market by tying import growth directly to growth in the domestic market. Protectionist legislation such as H.R. 1562, however, is not the solution to the woes of the textile and apparel industries. H.R. 1562 would breed more inefficiency and make the industries less, not more, competitive in the future.

Mr. MONTGOMERY. Mr. Speaker, I rise today in support of H.R. 1562, just as I did when the House passed the legislation last October. I will vote today to override the President's veto of this measure. This override effort has the support of 67 percent of the people polled throughout the South.

There is no doubt the fiber, textile, and apparel industries in this country have been hurt by imports. More than 300,000 jobs have been lost in the United States over the past 5 years. During that time, textile and apparel imports have doubled.

A recent Department of Commerce report shows that textile and apparel imports in the first 6 months of 1986 are 22 percent higher than the same period 1 year ago. The textile and apparel trade deficit is expected to exceed $20 billion this year.

Mr. Speaker, that translates into a loss of jobs in my State of Mississippi and throughout the Southeast, where they are such a vital part of the economy. Small textile plants are the life-blood of many small communities in Mississippi. Layoffs and plant closures have a devastating impact on the economy of the entire region. Not only are the textile workers and their families affected by the loss of income, every retail business in those communities feels the impact. It was estimated that 5,000 textile and apparel jobs have been lost in Mississippi. H.R. 1562 will help restrict the flow of those imports and prevent the further loss of jobs and opportunity in Mississippi and throughout the fiber, textile, and apparel industries in this country.

Besides the issue of jobs, Mr. Speaker, there is another very important reason for this country to maintain a strong textile and apparel industry. Production of these goods is essential to our national defense.

The Defense Logistics Agency has said that while problems with the textile and apparel industrial base are confined only to a few specialized items at present, our future ability to meet mobilization requirements will depend on a healthy domestic industry.

The Government spends over $1.5 billion each year on the procurement of clothing and other textile goods, and there are 300 different combat-essential items utilizing textile products.

A weakened textile and apparel industrial base would raise serious questions about how adequately those manufacturers could supply the military and civilian population needs during a conflict. Would the textile and apparel base be broad enough to supply the textile materials needed in a wartime situation? If we continue this growing trend of imports, the answer would clearly be "no."

Mr. Speaker, we are not asking for special treatment. We only want a chance to compete fairly with the rest of the world. This legislation will help provide that opportunity and hopefully, that will save the jobs of textile and apparel workers throughout the country.

Mr. RAHALL. Mr. Speaker, today I rise in strong support of the override of President Reagan's veto of H.R. 1562, the Textile and Apparel Enforcement Act. This legislation would establish permanent quotas on imports of textiles and textile products from all countries except Canada and certain member states of the European Economic Commmunity, impose 8-year global quotas on nonrubber footwear and direct the President to negotiate limitations on worldwide copper production.

This legislation is desperately needed. Since 1980, U.S. international trade problems have increased dramatically. The American textile, apparel, footwear, and copper industries have been especially hard hit. Since that year, over 300,000 workers in the apparel and textile industry have lost their jobs as imports have grown an average of 16 percent each year; 250 plants have closed as a result of foreign imports. These imports now claim over 50 percent of the domestic market, and the textile and apparel trade deficit has hit a record $18 billion.

Additionally, imports captured 71 percent of the American footwear market in 1984 and have continued to increase. The copper industry has suffered from falling world copper prices and the continued overproduction of copper by government-owned foreign producers.

The increasing textile imports are of special concern to many in my district in southern

West Virginia. The hundreds of employees at a Maidenform plant in Princeton and Huntington, WV, have contacted me with their fears about the prospect of their future employment if actions are not taken to stem the tide of imports. I do not want to see outstanding, steady employers of my district forced out of business by foreign imports. The people of West Virginia, who for years have suffered under extremely high rates of unemployment, cannot afford to lose yet more jobs due to unfair foreign competition.

I do not feel that we can rely any longer on existing trade agreements, which have not been enforced, to provide relief for these industries. The New Multi-Fiber Arrangement is too little, too late. Negotiations and bilateral treaties are inadequate to deal with the market disruptions caused by unfair and injurious foreign trade. Our textile and apparel industry and its workers are the most productive and efficient in the world but they cannot compete against foreign governments that subsidize their industries, pay their workers as little as 16 cents an hour and impose restrictions on imports from the United States and other countries. H.R. 1562 would go a long way to help in the fight against such unfair trade practices.

Included in H.R. 1562 is a provision dealing with the copper industry which, although not included in the original House bill, is of special interest to me in my capacity as chairman of the Committee on Interior and Insular Affairs Subcommittee on Mining and Natural Resources. The price of copper has fallen from $1.01 in 1980 to its current price of under 65 cents per pound. Approximately 50 percent of the Nation's copper mines are closed, and it is doubtful that they will ever reopen. Employment in the U.S. copper industry has been halved since 1979 to its present level of less than 20,000 employees.

In the face of falling prices, major foreign copper producers have increased production. They are able to do this, despite the drastic price fall, because of subsidies received from their governments and from international lending institutions.

Under the leadership of the distinguished chairman of the Committee on Interior and Insular Affairs, MO UDALL, my subcommittee held a series of hearings on the legislation introduced by him to address this problem. In June of last year, the subcommittee went to Phoenix, AZ, and Salt Lake City, UT, to see first hand the havoc wreaked on the industry by unfair competition. Outside Salt Lake City, Kennecott's Bingham Pit, formerly the largest open copper pit in the world, lay idle. Labor, industry, and local leaders presented compelling testimony about the plight of the copper industry and the need for legislative action.

H.R. 1562 addresses this need. The copper provisions of the bill do not include tariffs, or quotas. The bill simply directs the President to seek voluntary production restraint agreements with major and significant copper producing countries. It also contains a strong oversight provision which requires a report to Congress every 3 months as to the status of the negotiations.

The copper industry of this country provides another excellent example of an industry decimated by unchecked, unfair trade competition. I strongly urge the override of this veto in order that we may send a clear message to the world that free trade must be fair trade.

Mr. DASCHLE. Mr. Speaker, nobody in the House of Representatives feels more strongly than I do that our current trade policy is weak-kneed and ineffective. Each month, the trade figures tell the same story: exports are down, imports are up, and the trade deficit continues to grow.

A problem as big as this one has many causes, but none are as significant as this administration's trade policy. It is a policy that permits our foreign competitors to block American imports and subsidize their own exports, secure in the knowledge that this administration will never retaliate. Time and time again, the administration has refused to take even the smallest actions to preserve American jobs and overseas markets.

That's why I feel so strongly that the trade bill we in the House passed in May was such an important step. It sends a clear message to our foreign competitors: if you want to enjoy free access to America's markets, you'd better start letting American producers have a fair shot at your markets. I sincerely hope that the other body moves quickly in passing this bill, and then joins us in overriding an almost certain Presidential veto.

The bill before us today is another story. Unlike the House trade bill, it is not comprehensive, and so it invites retaliation. By offering protection to only the textile and copper industries, it leaves all other industries open to retaliation. And that is fundamentally unfair.

I agree wholeheartedly with the concept behind this bill, because like the trade bill, it seeks to end unfair foreign trade practices. But it is somewhat like putting a deadbolt lock on the front door of your house and leaving the windows open. If we want to end our trade imbalance, we need to guard all our industries and all our jobs, not just some of them.

South Dakota and other farm States would be especially hard hit by a selective bill like this one. The countries most likely to be affected by the bill before us today are some of America's largest grain customers. At a time when grain is readily available from numerous other sources, America's farmers will bear the brunt of the retaliation that is sure to follow. Like the American textile industry, they too are suffering from the effects of unfair foreign trade practices and an ineffective trade policy. We need to act in behalf of both.

The solution to this problem must be comprehensive. It must not pit farmers against textile workers. It must show the world that all of us in America—textile workers, miners, farmers, autoworkers, and so on are fed up with the treatment we've been getting, and none of us are going to take it any longer.

Mr. BEDELL. Mr. Speaker, I firmly recognize the need for our Nation to adopt more comprehensive trade programs and policies. Such actions must serve to ensure U.S. competitiveness, as well as to restore a sense of fairness between the United States and its trading partners. In many ways, H.R. 1562, the Textile and Apparel Trade Enforcement Act, represents an attempt to implement such a trading stance. H.R. 1562 also demonstrates the extreme frustration that many of us retain toward this administration's efforts to resolve our Nation's trade deficits.

This measure is now before the House for the third time. In the past, I have voted present on this legislation because it includes provisions affecting the importation of fishing tackles. Because of my past association with Berkley & Co., one of the larger domestic manufacturers of fishing tackle, I cannot in good conscience vote in any other way than present again on this particular issue. I have made this decision so as to avoid any conflict of interest that could be interpreted from a vote in favor of, or in opposition to this measure.

Mr. PANETTA. Mr. Speaker, I rise in strong opposition to H.R. 1562, the Textile and Apparel Trade Enforcement Act.

Like every other Member of this body, I am concerned about the difficulties the apparel, textile, copper, and shoe industries are currently facing. It is now common knowledge that since 1980, the textile and apparel industries alone have lost over 300,000 jobs, creating considerable hardship for working men and women in these industries, and their families.

I am equally disturbed by the administration's unwillingness or inability to address this Nation's trade problems in an effective manner. I, for one, feel that the administration has failed to provide the leadership necessary to bring down the deficit, which many economists feel is the main reason underlying the strength of the dollar and the current trade imbalance. The administration has done far too little to combat unfair foreign trade practices and has failed to adequately encourage foreign governments to dismantle the maze of barriers against American exports. It is my hope that the U.S. Trade Representative undertakes to do more to carry out and enforce our current trade laws and regulations.

H.R. 1562, if it becomes law, will only compound this Nation's trade problems, however. The bill is an obvious violation of U.S. international obligations under GATT and the Multi-Fiber Arrangement. There is nothing in either GATT or the MFA that authorizes the United States to unilaterally impose quotas and freeze textile and footwear imports in the manner contemplated by this legislation. The legislation would also violate more than 38 other bilateral trade agreements.

Moreover, the textile industry is already this Nation's most protected industry. Textiles in the United States have the highest rate of duty in the industrialized world. We already have hundreds of quotas on textiles and they are protected by the overall quotas of the Multi-Fiber Arrangement. Furthermore, tariffs on textile and apparel products average over 22 percent while the average tariff for all other industries stands at only 5 percent.

The bill is clearly discriminatory. As amended, H.R. 1562 would be directed almost exclusively at developing country suppliers in the Far East and Latin America. The bill continues to ignore textile imports from Europe—our largest supplier—and Canada. Under the bill, the big three textile suppliers, Hong Kong, Taiwan, and Korea would sustain cuts of 12, 36, and 29 percent respectively, although combined imports from these three countries

represent only about 18 percent of total United States consumption. Specifically, the nations of Italy, Canada, and Germany, respectively the sixth, eighth, and ninth largest textile and apparel exporters to the United States will be unaffected by the quotas.

H.R. 1562 will also hurt consumers, especially those at lower income levels. Even without the additional costs of this bill, protection in the form of both tariffs and quotas already adds at least 15 percent to the cost of textile products. H.R. 1562 will simply force consumers to pay substantially more. The footwear provisions added by the Senate are even more restrictive than the ITC's recommendation rejected by the President last year. To put this in perspective, the U.S. consumer would be forced to pay an additional $2.8 billion for shoes per year, or $72,000 for each 14,000 job saved.

And finally, H.R. 1562 will invite retaliation on the part of foreign governments. Without question, any relief gained by the textile, apparel, copper, and shoe industries will be more than offset by injury to such U.S. export industries as agriculture, aerospace, timber, and such high-technology industries as telecommunications among others. I think everyone here remembers that in 1983, after the United States imposed restraints on Chinese textile imports, the Chinese boycotted American cotton, soybeans, and grain. The National Association of Wheat Growers subsequently testified that we lost about $500 million in wheat sales because of this. And the dispute was over just 50 million dollars' worth of textile imports.

Clearly Congress, the administration, and the American people must work together to promote the orderly growth of international trade. This legislation will do just the opposite however. It is a legislative boomerang that tries to send a message to the administration but, if adopted, will return to hurt our farmers, our workers, our economy. It promises to signal the start of a renewed trade war that could hold out dire consequences for our trading partners and for ourselves. For that reason I ask my colleagues to support the President's veto of this legislation.

Ms. MIKULSKI. I rise in support of the Textile and Apparel Trade Enforcement Act, and in opposition to the President's veto. Mr. Speaker, our textile and apparel industries are being overwhelmed by a flood of foreign imports. Hundreds of thousands of textile and apparel workers have lost their jobs since 1980.

In 1985, less than half of the clothing, shoes, belts, and other apparel sold in the United States were made by American workers. In some areas of the country, and for some textile and apparel products, American workers made less than 20 percent of the products sold. Less than one shirt in five. Less than one belt in five. Less than one pair of shoes in five.

Unfair trade is costing all American workers their jobs—textile and apparel workers are just the first victims. If the United States does not do something now, we will lose the American textile industry and we will lose the American textile and apparel workers' jobs. And tomorrow we will lose another American industry and more American workers' jobs.

The Textile and Apparel Trade Enforcement Act stands for fair trade. It's not fair when American industry and American workers are forced to compete against nations that pay textile and apparel workers as little as 16 cents per hour. It's not fair that these same countries impose severe import quotas to lock out the products made by our workers and our industry. And it's not fair when American workers and American industry is forced to compete against countries that subsidize their exports.

The Textile and Apparel Trade Enforcement Act preserves orderly, free trade in a world in which some nations do not compete fairly. Without fair trade, free trade has no meaning. Our textile and apparel workers and our textile and apparel industry are the most productive and efficient in the world, but it is not fair for us to insist that they play a free trade game unless they can play on a level playing field. The Textile and Trade Enforcement Act levels that playing field.

Some say this bill will lead to retaliation and a global trade war. They're wrong. The Europeans have reduced textile imports without retaliation. The Canadians have reduced textile imports without retaliation. Taiwan, Hong Kong, and Korea have prohibited textile imports without retaliation. Each time one of our trading partners restricts imports of U.S. products, the administration talks about free trade. Let's start talking fair trade.

In fact, our industries compete against all kinds of quotas, tariffs, and restrictions of our trading partners. Who does free but unfair trade protect? Not our industry. And not our workers. Mr. Speaker, I believe we must start standing up for fair trade and stop worrying so much about free trade. I urge my colleagues to vote to override the President's veto and to vote for fair trade and for American industry and American workers.

Mr. MORRISON of Washington. Mr. Speaker, I urge my colleagues in the strongest possible terms to vote against the override of the President's veto of the Textile and Apparel Trade Enforcement Act. To the extent that textile imports have lowered costs to consumers, they have helped preserve thousands of retail and trade-related jobs, while expanding opportunities to sell American products to the countries of the Pacific Rim. I do not doubt that these imports have exacted a human cost in the textile-producing areas of the country. But let's not fool ourselves into believing that the Textile and Apparel Trade Enforcement Act will help American textile workers at the sole expense of their overseas competitors. This bill will be taking away American jobs in other sectors of the economy and other parts of the country.

The farmers of central Washington have been lucky enough to escape the worst of the agricultural crisis partially because of their ability to sell in foreign markets, and in particular the countries that are the principal targets of H.R. 1562. I know that many of my colleagues are impatient with the administration's efforts to ensure that the trade in textiles is conducted in a fair manner—I note in passing that the President has reached agreements on new and more restrictive Multi-Fiber Arrangement and new and more restrictive bilateral agreements with Hong Kong, Taiwan, and Korea. I won't pretend that I am an expert in textile negotiations. What I do know about is the time and effort it takes to coax the countries of the Pacific Rim into lowering their barriers to our products. We still have much to accomplish, but the markets we have managed to pry open over the course of several years have helped keep the farmers of my district afloat. With one vote today, you could destroy the work of many years by setting off a round of retaliation.

I have heard many complaints about the cost of the 1985 farm bill. Bear in mind, though, that the farm bill delivered the congressional message that farmers can no longer rely on the Federal Treasury to stay in business and must move toward more aggressive marketing of their products around the world. Farm exports of basic commodities have not expanded as rapidly as we hoped and, as a result, the cost to the taxpayer has been great. By passing this bill, however, you will only make the prospects for the American farmer even more dismal.

In conclusion, I note that H.R. 1562 is opposed by the American Farm Bureau Federation, the National Association of Wheat Growers, the National Grange, United Fresh Fruit and Vegetable Association, and other respected farm groups.

Mr. TOWNS. Mr. Speaker, today was a sad day for the American labor force. It has been projected that 550,000 more textile and apparel workers will lose their jobs in the next 6 years. These unemployed workers would be in addition to the 300,000 who have become unemployed since 1980. We had an opportunity, today, Mr. Speaker to preserve these jobs for American workers. Regrettably, the House failed to override the President's veto of the Textile and Apparel Trade Enforcement Act.

Today's vote was particularly disheartening because of the impact that it will have on the textile industry in major urban areas, like New York City. I am especially concerned about the loss of jobs for the many minority and female workers who have benefited from the good wages and benefits in this industry.

Many of my colleagues felt that a vote to override the President's veto would harm efforts to negotiate stronger bilateral textile agreements. In the face of the recent agreement to expand South African textile imports, it is really difficult to accept the notion that the administration is serious about protecting the interests of our domestic textile and apparel industry. With today's vote, we have, in effect, denyed a basic American industry the right to compete on equal terms with its foreign counterparts.

Hopefully, we will have another opportunity to revisit this issue during the 99th Congress. I urge my colleagues to rethink their positions and to support our American workers the next time around.

Mr. KOLBE. Mr. Speaker, today I will cast a vote to sustain the President's veto of the textile bill, H.R. 1562. The bill calls for quotas on imports of clothing and footwear into the United States. It is blatantly protectionist and will invite retaliation costing more American jobs than those it might save through limiting foreign imports.

I voted against the textile bill when it was first considered by the House. When title III, the "Copper Free Market Restoration Act of 1985" was attached to the bill and came up for a second vote it was a time when many of us were doubting the administration's commitment to resolving the problems facing the copper industry. I cast a yea vote on the measure to send a message to the President that we wanted help for our beleaguered copper industry.

Today the bill is presented once more for a vote; this time for an override of the President's veto. I will vote against the override. there are several important reasons for my action. First, this bill would impose limitations and quotas on imports of clothing and footwear into the United States. It has always been my view that the encouragement of exports, not the restraint of imports, is what is needed to correct the current trade imbalance. Second, the strict limitations set forth in the bill do not allow for changing economic conditions, nor for the numerous bilateral and multilateral agreements under which our international trade policy is currently structured.

In addition, the United States has recently reached landmark, negotiated agreements with many of our overseas trading partners which affects not only the textile industry but also the copper industry. Agreements have been reached on a new MFA accord (Multi-Fiber Agreement), a GATT (General Agreement on Tariff and Trade) export action, and individual agreements with several of our most significant importers, including most notably: Korea, Hong Kong, Taiwan, and Japan. These agreements, when enforced, are by far our most effective tools of trade restraint, because as fairly negotiated accords, they do not carry the stigma of being unilateral or one-sided, and as such do not foster an atmosphere conducive to retaliation.

The new MFA which was reached in Geneva last week provides for definite limitations on the levels of imports which will be allowed into the United States. This agreement is entered into by virtually all exporting countries in the free world, and establishes the parameters within which foreign trade in these commodities will be conducted. The new agreement sets very low growth ceilings on all signatories to the MFA who export to America. These levels are a stark contrast to the pattern of exponential import level increases which have caused domestic suppliers to justifiably complain in the past.

It should also be remembered that nearly all of the countries covered in the trade bill are Asian or developing countries. European Economic Community countries and Canada are not included under the terms of the bill. Japan has negotiated to open their market to United States semiconductor exports, in the face of an impending section 301 dispute pursuant to the rules of GATT which is the world's largest body having jurisdiction over such matters. Korea has also come to agreement with the administration on the levels of imports which they will send to the United States market. This agreement allows Korea to maintain their current market share, but does not allow unlimited growth. This also effectively assures domestic firms their own market shares, and thus allows head-to-head competition to transpire in a less volatile marketplace.

In addition to the MFA and GATT agreements, separate negotiations with several other significant importers have recently been successfully completed. Under a new agreement with Hong Kong, import growth from that area will be limited to an average of approximately 1 percent annually between 1985 and 1991. In addition, this agreement covers fibers which were previously exempt from tariffs. In a parallel agreement, negotiations with Taiwan have set import growth to one-half of 1 percent.

With these new agreements in place, I believe it is in the overall best interest of both Arizona and the country as a whole to support the President's veto of the trade bill. By doing so, it is my sincere hope that the benefits of reasonable market protection will be maintained without the potentially catastrophic repercussions which could follow a round of international retaliation in an unneeded trade war.

Mr. DURBIN. Mr. Speaker, I join my colleagues today in supporting this effort to override the President's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985. This bill represents only the first step in developing a comprehensive trade policy that we so badly need.

It is time that this Nation stops exporting American jobs. For too long we have drifted aimlessly on the high seas of international trade without the strong rudder of a trade policy. It is time that rudder becomes proudly labelled "Made in the U.S.A."

Mr. Speaker, as a cosponsor of this bill, I joined a large majority of my colleagues last October in passing this legislation. I remain steadfast in support of the American textile industry by rejecting the President's veto, and I ask my colleagues to join me today.

The fiber, textile and apparel complex is not only this country's largest manufacturing industry, but it is also the world's most productive and modern textile industry. Fiber, fabric, and apparel workers represent 10 percent of the U.S. manufacturing work force. They comprise a fifth of the work force in seven States and a number of large cities and more than 5 percent of the work force in half the States. Yet, although its workers are the most efficient in the world, it simply cannot compete against foreign governments that subsidize their industries, pay workers as little as 16 cents per hour, and impose severe restrictions on imports from the United States and other countries.

Mr. Speaker, given the textile and apparel industry's significant industrial role, it is very troubling that in the last 3 years, imports of fiber, fabric, and apparel have surged at unprecedented rates. Last year, apparel imports climbed to almost 50 percent of the U.S. market. Textile and apparel imports surged in 1984 at a staggering 32-percent growth rate. Imports captured 71 percent of the American footwear market in 1984 and have continued to increase.

The impact of these changes on the textile industry has been dramatic. By 1985, more than 250 textile mills had closed, thereby eliminating more than 200,000 textile and apparel jobs. Since 1973, textile employment is down by half a million. Import penetration is causing massive disruptions through U.S. plant closings and cutbacks. Every billion yards lost to imports represents 100,000 job opportunities lost to American textile, apparel and fiber workers.

My colleagues, I am concerned that imports will capture virtually the entire U.S. market by 1990. If import growth continues at current levels, cotton producers, in four years, will face elimination of most of their domestic market. Wool growers, whose production has dropped 75 percent since World War II, export almost no product at all, leaving every imported item of fabric or apparel to be added to the negative trade imbalance.

I should hope the President realizes that hundreds of thousands of American workers will lose their jobs if his veto of the Apparel Trade Enforcement Act of 1985 remains intact.

Mr. Speaker, the administration continues to be insensitive to the needs of this American industry and its workers. Just last week the administration announced that it completed negotiations on a bilateral textile agreement with South Africa which allows the South African textile industry to increase its exports to the United States.

H.R. 1562 does not represent protectionism. Instead, it esablishes measures to preserve orderly, free trade in a world in which some nations do not compete fairly. If our foreign trading partners do not trade fairly, free trade has little meaning.

We need a policy that will benefit American workers, not one that will scratch names from local payrolls. Given the significant role of the textile industry in this country, and considering the damage that would result by its elimination, I ask my colleagues to support this veto override.

Mr. Speaker, the rapid growth of textile apparel imports, as troubling as it is, represents just a small piece in the U.S. trade imbalance. Trade figures released last week indicate that the trade deficit is running at an annual rate of $170 billion, nearly seven times higher than when the Reagan administration took office.

The Commerce Department reported that in June alone, Americans imported $14.2 billion more than they exported. For the first 6 months of this year, the deficit climbed to a record half-year level of $83.9 billion. My colleagues, this is a crippling situation that needs a prompt and proper remedy—the implementation of an active, rather than a retroactive policy. If left uncorrected, this Nation will slide into a dismal abyss of recession.

President Reagan soon plans to orchestrate another drop in the dollar, hoping that this scheme will produce results. Unless a massive world expansion gets underway, some economists say, the dollar will have to drop by another 25 or 30 percent to produce the necessary correction in the trade deficit.

We cannot wait that long. For even if the dollar devaluation is successful, the United States will still face an enormous trade deficit for years to come. This country needs to take a comprehensive approach to reduce foreign trade restrictions, beef up U.S. export promotion, and improve our long-term competitiveness through better education and training.

There is no room for resignation in this matter. The stakes are simply too high. Mr. Speaker, I have not only witnessed the relevancy of these stakes nationally, but I have seen the effects of the trade imbalance grip my home district in Illinois.

In February of this year, we suffered a record loss of 105,000 jobs in Illinois, stemming primarily from the continuing erosion of our Nation's manufacturing base. In areas across central and western Illinois, we face unemployment rates that are more than 10 percent higher than the national average year after year.

In attending more than 180 town meetings, I have witnessed the human side of these job loss figures. In March, Caterpillar of Decatur announced that it will reduce its work force by some 52 percent over the next several years. Wagner Castings of Decatur, a company that is continuing to struggle against unfair foreign competition, has turned desperately for relief from the International Trade Commission in Washington.

In Sangamon County, more than 600 workers of Fiat Allis lost their jobs to foreign competition last year. As they struggled to get retraining to find new employment, they find this administration calling for a cutoff of trade adjustment assistance funds they greatly need to support their families while they seek retraining.

This administration's policies have simply not produced effective results. I have listened to Illinois farmers who have been hard hit by the value of the dollar and our inability to export as we should. Since 1981, U.S. agricultural exports have dropped more than one-third, and our agricultural balance of trade went into the red in May for the first time in 27 years.

Farmers in central Illinois are particularly dependent on these export markets. In 1983, approximately 35 percent of farm income in Illinois came from exports of feedgrains, soybeans, and wheat. Nearly half of this country's 1986 soybean crop is destined for shipment overseas. This administration's policy of drift continues to erode our agricultural exports.

We need more than negotiation. We need strong trade policies. This trade deficit is absolutely unacceptable and must be reversed. Neither farmers, nor agribusiness, nor even State governments can hope to solve these problems on their own. We must address these problems at the Federal level. We need to work for policies that safeguard U.S. agricultural and industrial competitiveness in the world market.

Mr. Speaker, whether I cite agricultural problems or the demise of the textile industry, all paths converge at a pinnacle—the need for an aggressive, balanced trade policy.

The override of the Textile and Apparel Trade Enforcement Act of 1985 is paramount. At best, it can only spark a beginning in rectifying our trade imbalance. We have to have equality; we have to have fairness. We need reciprocity, and most important, our Nation needs a trade policy.

Mr. LIGHTFOOT. Mr. Speaker, I take this opportunity to share my thoughts on the issue of overriding the President's veto of the Textile and Apparel Protection Act, H.R. 1562.

This is a difficult issue because it seems as though Congress is pitting farmer against textile worker. In fact, this legislation may do just that. After weeks of listening to all sides and reviewing every available bit of information on the subject, I find that I must oppose the veto override.

While a healthy domestic textile industry and the jobs it provides are important, so are exports. The 12 countries on which this legislation imposes quotas also happen to purchase 12 billion dollars' worth of agricultural products from us annually, amounting to 43 percent of all of our agricultural exports; $1.9 billion of that total is corn. The three major countries affected, Korea, Taiwan, and Hong Kong, buy 3 billion dollars' worth of U.S. agricultural products alone.

While some have disputed the argument of retaliation, it is a simple fact that without money, people don't buy. Our country imports 5 billion dollars worth of textile products from the 12 affected countries, but if those countries can't sell their products, they can't earn the foreign exchange to purchase our exports.

Granted, our agricultural exports are down, but I cannot support further endangering agricultural exports. We are already dangerously close to an all-out trade war, and even if we ultimately win the war, we'd lose an awful lot in the individual battles along the way. And farmers have been through enough battles in the last few years—they can't take any more.

I strongly agree with the proponents of H.R. 1562 that existing law has not been enforced. I also agree that the administration has been negligent in this fact. I've asked every representative of the textile industry who visited my office how he or she would feel if the Multi-Fiber Arrangement—MFA trade agreement) had been enforced. Each one told me that he or she would not be in my office if that had been the case.

I've also noted the Congressional Budget Office's [CBO's] estimate that 80 to 87 percent of our trade imbalance is caused by exchange rate imbalances primarily due to the financing of our massive budget deficits.

This is strong evidence that the mechanisms in H.R. 1562 will not be the answer to our trade problems. In fact, H.R. 1562 is likely to cause even more trade problems.

Mr. SWIFT. Mr. Speaker, I rise today in reluctant opposition to the motion to override President Reagan's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act.

My opposition is reluctant because I share my colleagues' concern for the thousands of workers in the textile industry and other industries who have either lost their jobs or are threatened by the loss of their jobs, I also understand the frustration felt by so many Americans over the Reagan administration's unwillingness to confront the serious trade problems facing our country today. Virtually every time our country's trade interests are in conflict with our foreign policy or national security interests, the administration decides that trade will be the loser.

To many of us in the Congress, it appears that the President will turn his attention to trade issues only when there is a gun at his head such as today's textile bill. Last May, for example, when the House was considering H.R. 4800, the omnibus trade bill, the President decided to finally take action on the long-standing complaints of the shake and shingle and machine tool industries. Again, within this past week, the administration has coincidentally found itself suddenly able to negotiate bilateral textile import limitation agreements with our leading foreign suppliers.

Despite all of the above, however, I plan to vote against H.R. 1562. I continue to believe that our country's best interests will be served by opposing sector-specific legislation to hinder or halt the access of foreign products to the U.S. market. Particularly with the strengthening amendments contained in the omnibus trade bill, I believe that our unfair trade laws represent the best avenue to address sector-specific complaints.

In passing the omnibus trade bill, the House has already moved to establish the comprehensive national trade policy we need to protect the comprehensive national foreign competition. In the omnibus bill, we took the vital steps of strengthening the policy tools available to counteract unfair trade practices while limiting the administration's ability to avoid taking such required reciprocal actions. While the administration has been lavish in its criticism of the House trade bill, it has continued to refuse to even work with the Senate to develop a trade bill more to the President's liking. Understandable frustration with such stonewalling has led us to the point of considering override of the textile bill veto. I believe, however, that we in the Congress must oppose this scattershot approach, and continue to work toward passage of comprehensive trade reform legislation.

Mr. GRAY of Pennsylvania. Mr. Speaker, I rise in support of an override of the President's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act. First of all, the bill was truly a bipartisan measure. Since the House accepted the milder Senate quotas, without so much as a conference, no one can really argue that this measure is an extreme reaction to a delicate situation that reflects the views of only one subcommittee, or a strong chairman, or one party's platform.

Nor, can one fairly characterize H.R. 1562 as an impatient reaction to recent disappointments on the trade front. Our trade performance ceased to be just disappointing a long time ago; it is nothing short of disastrous at this stage. Some would argue our fault as a Congress is that we have been too patient for too long.

The prospect of a $170 billion trade deficit by the year's end is too large to ignore. It's nearly five times higher than it was when this administration took office. In the process, we have become a net debtor nation, vital sectors of our manufacturing capacity have been devastated, millions of jobs lost—some forever—and the Nation's growth rate seriously impacted. Some are even talking about a trade-related recession as a real possibility in the not-too-distant future. The three industries covered by this legislation happen to have been harder hit than most.

ITC decisions, showing the problems of these industries can be traced to imports, have been ignored by the President. Instead, those complaining have been told to wait for the just-concluded Multi-Fiber Arrangement

agreement. Unfortunately, it can only be viewed as too little too late. Current agreements have not been adequately enforced and limits are routinely exceeded.

I, for one, am particularly upset by the moral indifference of this administration to South Africa's apartheid policies in negotiating agreements in this area. As everyone knows, by now, a 4-percent increase in imports of that nation's textile products is among the items just recently agreed to by the administration. If for no other reason, I have to look elsewhere for a textile trade policy. Frankly, I would rather take my chances under the provisions of Congress' legislation than the administration's amoral trade negotiations.

While the House-passed sanctions bill would go further and ban all South African trade, the vetoed bill would at least roll back categories of sensitive textile products exported by South Africa by about 38 percent, before allowing increases of any kind. And it would cover all categories. The President's quota agreement does not even set a limit on the categories where the bulk of the imports are occurring—manmade fiber and yarn.

But, my support of veto override in this instance is not just based on overall macroeconomic considerations or South African foreign policy considerations—important as they are. It is firmly grounded on my experience as a member of the Pennsylvania delegation and an inner-city Congressman from Philadelphia. The loss of manufacturing jobs in the Philadelphia metropolitan area alone over the past decade in textiles has been in the tens of thousands. It's already reached the point where, in voting for this override, I'm not protecting much. It's almost too late to be interested in anything more than a principle, where these industries are concerned. I would have preferred the original House bill because it would have covered more industries and more jobs.

In conclusion, I know that national and international economics are complicated sets of interrelationships. But, these relationships cannot be allowed to deteriorate to one-way affairs. We cannot become so obsessed about the delicacy of international diplomacy that we cease to look out for our interests. Recently, I participated in extensive meetings with the Japanese Trade and Finance Ministers and came away with the impression that they do not fully understand how seriously we, in Congress, view the trade imbalance with their nation as well as other nations.

Every now and then, it is good to get our trading partners attention by letting them know the sleeping giant can be provoked to action.

Mr. SUNDQUIST. Mr. Speaker, I am in strong support of the motion to override the President's veto of H.R. 1562. This bill offers what may be the last strand of hope for our Nation's textile and footwear manufacturers.

In west and middle Tennessee, hundreds and hundreds of jobs have been lost in recent years. Losing these jobs is frustrating, but what makes it more, is the fact that these jobs are being lost not because the industries aren't competitive, but in large part because of the unfair trading practices of our foreign allies.

As chairman of the Republican Task Force on International Trade, I take no pleasure in fighting the administration on this issue. In part, I agree with President Reagan's goal of a system of free and open international trade. But, the President, unfortunately, has not aggressively enforced existing trade laws to prevent unfair trading practices. The result has been that free trade isn't fair trade.

There have been sincere attempts to keep international trading practices fair, but they have been largely ineffective. The Multi-Fiber Arrangement, for example, is the international trade agreement governing trade in textiles and apparel. Its purpose is to allow foreign textile and apparel to be exported to the United States at a growth rate that does not disrupt domestic industry.

Unfortunately, U.S. Government agencies have failed to implement this arrangement's provisions forcefully and in a timely fashion. If this had been purposely implemented, we would see a U.S. market free of import disruption, with 6 percent or less annual import growth.

Instead, failure to enforce the law has caused extreme disruption. Textile imports have grown an average of 16 percent per year since 1980. More than 300,000 jobs have been lost since then. Imports now claim over 50 percent of the U.S. clothing market. The situation is even worse in the footwear industry.

Let's save American jobs; vote to override the veto.

Mr. JEFFORDS. Mr. Speaker, I rise in support of overriding the President's veto of H.R. 1562.

I support H.R. 1562 because I share the frustration of the textile industry over the continual violation and evasion of the Multi-Fiber Arrangement [MFA] by many of the major textile producing nations. Textile imports have increased by 19 percent each year since 1980, even though the MFA specifically limits import growth to 6 percent per year. The failure of the administration to enforce this agreement or take action against the major violators led the industry to turn to Congress for relief. In voting for H.R. 1562, I believed that passage of the bill would force the administration to begin enforcing the existing limits of the MFA and would strengthen the hand of the U.S. Trade Representative in negotiating tougher import limits with major textile importing countries.

What has happened since the President vetoed the bill on December 17? First, the administration began enforcing the 6 percent annual import limit under the existing MFA. But this effort lasted only a few months. Second, the administration began to negotiate new limits on textile imports with Korea, Hong Kong, and Taiwan. In the last few weeks, the administration has announced a series of agreements with these three major importing nations that limit import growth to less than 1 percent per year, using calendar year 1985 as a base.

The administration points out that the pacts reached with Taiwan, Hong Kong, and Korea will not, throughout the 4-year life of the agreements, allow imports to reach the current level. However, this ignores the fact that in each of the last 5 years, imports have increased by three times the allowable MFA limits. These violations have driven the level of imports up so high that some measure of relief, beyond simply rolling back imports to the 1985 level, is justified.

As a traditional free trader, I can understand the concerns of those who have spoken up in opposition to this legislation. As a general rule, I favor negotiated international agreements to unilateral legislation to limit imports. We must remember that every action has a reaction in the international trade forum. However, the situation we face today is exceptional. International agreements, concluded and put in place, were ignored by signatory nations and the administration. Reliance upon free trade requires adhering to the agreed-upon guidelines. When the rules have been broken and a vital domestic industry is threatened, Congress must take tough action. I'm not happy that we find ourselves in this situation today. However, it is my hope that a strong override vote today will prevent us from taking similar action in the future.

Mr. APPLEGATE. Mr. Speaker, this body has debated one of the most important pieces of legislation that we'll consider this year, but the strong assurances that we've been given this week from the Reagan administration that meaningful efforts are being expended to restore "free" and "fair" trade will all but evaporate to become broken promises if the House fails to override President Reagan's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act.

It is painfully obvious that failure by the House to override the President's veto of this comprehensive textile and apparel trade measure would result in literally millions of American workers being pushed to the brink of unemployment over the next few years, even though the current administration continues to deny the seriousness of our trade problem while recent estimates place our Nation's trade deficit for this year at $170 billion, a record year for the sixth time in a row—equivalent to the number of years that President Reagan has occupied the White House.

In view of President Reagan's intense efforts to defeat the override by the House today, we have truly witnessed, once again, how the President forsakes the livelihoods of hundreds of thousands of American textile and apparel workers as well as millions of other Americans who have suffered in the past and countless others who will have to suffer in the future because of the massive failure of this administration to enact and enforce a substantive trade policy.

Quite frankly, I am offended by the arguments that come out of the White House in opposition to H.R. 1562, arguments that were completely lacking logic and totally without foundation. The fears that were expressed about possible retaliation by textile exporting nations against American farm exports and other goods that we produce are ludicrous. Obviously, someone in the administration has not told the President of the recent shocking figures showing that the United States is currently importing more agricultural goods than we export—a situation we have not witnessed for over a generation.

It has been estimated that an additional half-million American textile and apparel jobs may be lost over the next 5 years, due primar-

ily to the lack of essential safeguards for these jobs that H.R. 1562 would provide. Such a massive loss of jobs could come in the aftermath of an estimated loss of 300,000 jobs in the American textile and apparel sector since 1980, a loss due primarily to rapidly rising imports.

President Reagan says that H.R. 1562, which is intended to protect American textile workers who, on average, earn $13,000 per year, would possibly cost us $70,000 per worker if enacted. This is ridiculous and meaningless. Would this type of logic be any more persuasive if these workers were earning, on average, half of what they earn today? And does this mean that someone earning a higher salary is somehow more deserving of protection from the impact of imports than someone who receives wages just barely above poverty level?

Quite simply, this administration has taken the easy way out of this national dilemma by pitting American workers, farmers, and consumers against one another for the sake of defending its empty trade policy and its even worse record of protecting American industries and workers. The President is willing to sell taxpayer-subsidized grain to the Soviets, but he cannot even lift a pen to sign into law legislation to assist American businesses and millions of American workers.

So I must ask, What will happen to the many voices of concern that we have been hearing this week throughout this Chamber if we do not override the President's veto? If we fail in this attempt, then what does this say about our concerns about the futures of millions of Americans and the future of American industry?

The time for truly "free" and "fair" trade is now, before one more American becomes unemployed and before one more American business closes its doors for the last time. I strongly urge my colleagues to vote in favor of H.R. 1562.

Mr. AKAKA. Mr. Speaker, I rise today to urge my colleagues to sustain the President's veto of H.R. 1562, the Textile and Apparel Trade Enforcement Act.

I am convinced that H.R. 1562 is a dangerous piece of legislation, and its dismissal by the House comes as a great relief to me.

Like many of you, I have received countless calls for assistance from our Nation's textile industry, indeed one of the most organized efforts I have witnessed to date. It came as no surprise to me, therefore, that most of the calls raised the same point: that textile imports are costing our domestic industry jobs, disrupting our own markets, and straining our trade deficit.

The cure, it was asserted, is found in the form of H.R. 1562, a bill designed to provide a fighting chance for the U.S. textile and apparel industry by simply slowing the rate of import growth.

However, H.R. 1562 is not all that it appears to be. For, it would not necessarily benefit every segment of our textile and apparel industry. Hawaii's textile and apparel industry, in fact, would be literally devastated if H.R. 1562 is allowed to prevail.

Frankly, I think of this measure as one posing a "double-whammy" on Hawaii. For, not only would the industry suffer a minimum 40-percent reduction in imports as a result of the bill, but it is clear that it will not be able to depend on the domestic industry for compensatory assistance.

Members of Hawaii's textile industry have met with representatives of our country's largest textile manufacturers, and have discovered that, while the domestic manufacturers have the technological capability to meet Hawaii's needs, they would not be inclined to do so because it would not be economically feasible for them. Hawaiian prints, for example, are small runs which are rarely reprinted. While able to print small runs of yardage, the domestic representatives simply would not unless ensured of repeat orders. Additionally, Hawaii's prints require multiple screens which, while technically feasible, would require long, repeated runs to ensure economic feasibility. Indeed, the domestic representatives noted the Hawaii industry is unique, and unsupportable by the national industry.

On the national front, the prospects for H.R. 1562's envisioned relief are just as poor. We all know the real implications here. First, this bill would needlessly impose additional costs on consumers. Take, for example, denim jeans. The existing quota and tariff system, it is found, adds 15.6 percent to the retail cost of a pair of $20 jeans. The cost of obtaining the quota overseas and of paying the U.S. tariff is $3.12. The severe decrease in quota levels required by the bill will therefore increase the quota and tariff cost to $8.12 on the same pair of jeans. Quite an increase, isn't it?

Second, the cost to the Government will be astounding. Estimates of the direct Federal costs total approximately $2 billion per year.

Third, we must recognize the cost in exports lost as a result of the measure. In 1984, the 12 nations most adversely affected by the bill imported 53 billion dollars' worth of goods from the United States. A total of 34 percent of our country's agricultural exports went to those 12 countries. Direct retaliation is certain.

Fourth, the cost of job creation is great. For each job created at a salary of $10,000 to $15,000, it is estimated that there would be an associated cost of $140,000. Since recent studies show that as many jobs would be destroyed as created, the economic losses would be substantial.

All of these costs for the sake of an industry whose own vitality seems quite assured.

Statistics brought to my attention by the gentleman from Minnesota, BILL FRENZEL, clearly demonstrate the vigor of the industry. In the first 5 months of 1986, textile output, for example, is up 11 percent, while apparel is up by 3 percent. In addition, in both the first and second quarters of this year profits have doubled, and in the first 5 months of 1986, productivity has increased by more than 7 percent.

These figures are sure to be bettered, too, as a result of the administration's recent pacts with the Governments of South Korea, Hong Kong, and Taiwan. As you know, these textile accords are tighter now: 0.8 percent growth limits on South Korea shipments, 1 percent on those of Hong Kong, and 0.5 percent on Taiwan's. In fact, the new accords are even more stringent for they have been expanded to control all textile and apparel imports, including previously unregulated fibers.

Isn't this enough?

There is simply no more to say. Mr. Speaker, as expressed last October, I am truly sympathetic to the plight of our Nation's textile workers. I am also truly sympathetic to the important national issue of controlling our trade deficit. Likewise, I recognize that the legislation before us is less stringent than that passed by the House last year. Nevertheless, I firmly believe that this legislation is not the answer. We must accept the issue for what it really is, no less and no more—an age-old system that is finally coming home to haunt us—and work from there. Until we are willing to accept that fact, anything we do will hurt, not help us.

The SPEAKER pro tempore. The Chair would notify the Members that there is approximately 15 minutes of debate remaining on this motion. The gentleman from Florida [Mr. GIBBONS] has 3 minutes remaining, the gentleman from Illinois [Mr. CRANE] has 3 minutes and 20 seconds remaining, the gentleman from Georgia [Mr. JENKINS] has 6 minutes and 40 seconds remaining, and the gentleman from South Carolina [Mr. CAMPBELL] has 2 minutes and 30 seconds remaining.

Mr. GIBBONS. Mr. Speaker, I had 4 minutes. I had 4 minutes remaining.

The SPEAKER pro tempore. Unfortunately, the gentleman yielded a good deal of his time to Members for unanimous-consent requests which included short speeches.

Mr. GIBBONS. Mr. Speaker, that is the first time I have ever had the Chair call that on me.

The SPEAKER pro tempore. The Chair set a precedent, then.

The Chair recognizes the gentleman from South Carolina [Mr. CAMPBELL].

Mr. CAMPBELL. Mr. Speaker, may I inquire again as to the time? I had 2 minutes and 45 seconds remaining, and I do not know what is left.

The SPEAKER pro tempore. The gentleman has 2 minutes and 30 seconds remaining.

Mr. CAMPBELL. Apparently, Mr. Speaker, I had a lot of unanimous-consent requests also.

Mr. Speaker, I yield myself the balance of my time, and I will ask unanimous consent to revise and extend my remarks.

The SPEAKER pro tempore. Without objection, the request is agreed to, and the gentleman will not be penalized for that time.

Mr. CAMPBELL. Mr. Speaker, I rise today in support of the 2 million textile and apparel workers that are left in America.

I supported this administration since it has been in office on most issues, but this time they are wrong; they have made a mistake. They have listened to the State Department more than they have listened to the Commerce Department, and it is time that

the Congress of the United States did something to get their attention, as well as the attention of the world.

I rise to ask whether having any textile and apparel industry in America is in the national interest. I have heard that questioned. I believe it is. I have heard the term, "fair trade," today. I have heard those who support the veto speak of fair trade.

I ask you, why is it all right to use the taxpayers' money, money from the textile workers, to subsidize grain to be shipped to Russia and you will not vote with us to help keep those jobs? I ask you that.

I ask you, why is it not fair to have reasonable rules in America for textile and apparel when it was all right to have quotas and rollbacks in the automobile industry? I wonder about fair trade if you are going to use that term.

You have spoken of farm opposition. Then how do you account for the fact that the cotton producers and the corn producers are supporting the override of this veto? Are they not farmers? Are they not interested in the farm problems of America?

You have spoken of consumer opposition. Then how do you account for the fact that the National Consumers League supports the override? Where are your facts coming from?

You spoke of retaliation, and yet you do not mention the fact that the European Community not only rolled back but froze, and it has had only a 20-percent increase in textile and apparel growth in the last 5 years; yet they were not retaliated against, and they are signatories to the same agreements we are. Where are your facts coming from?

You talk about America. We have a 105-percent increase in this country in textile in 5 years. We have lost 300,000 jobs. We are talking about Small Town America going away. There are no jobs. It is time that we started looking at the facts, I say to the Members.

You spoke of open markets. Let me ask you, then, why is it that the great open market of America takes over 55 percent of the developing world's product while Japan and the European Community close them out? What have you done to open the markets? Why can American goods not go into those markets? Why do they block us and it is not all right for us to stand up and fight? I do not understand it.

Mr. Speaker, I can only say that we have an extremely serious matter before us. I can tell you that the future of this industry and these jobs rest on the vote today, and I ask each of you to vote your conscience and, for God's sake, try to help America one time.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. Mr. Speaker, may I make an inquiry as to how much time the gentleman from Florida [Mr. GIBBONS] has remaining?

The SPEAKER pro tempore. The gentleman from Florida [Mr. GIBBONS] has 3 minutes remaining.

Mr. CRANE. And, Mr. Speaker, could the Chair tell me how much time I have remaining?

The SPEAKER pro tempore. The gentleman from Illinois [Mr. CRANE] has 3 minutes and 20 seconds remaining.

Mr. CRANE. Then, Mr. Speaker, I yield 3 minutes and 10 seconds to my distinguished leader, the gentleman from Illinois [Mr. MICHEL] and I relinquish the other 10 seconds to the distinguished gentleman from Florida [Mr. GIBBONS] who gave it to me in the first place.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. MICHEL] is recognized for 3 minutes and 10 seconds.

Mr. MICHEL. Mr. Speaker, this is not only an explosive trade issue, it is an explosive political issue. The time for this bill has come and gone. We are finally waging war against unfair trade practices.

The administration just negotiated a tough Multi-Fiber Arrangement.

The USTR is filing more and more cases against unfair trade practices.

The administration now has in place new agreements with Taiwan and Hong Kong that are, "the tightest and most comprehensive textile agreements the United States has ever negotiated."

For Hong Kong it will reduce imports almost 5 percent from levels prevailing in the most recent 12-month period. For Taiwan the figure is 7 percent lower than most recent levels.

Just the day before yesterday, a 4-year treaty was announced between South Korea and the United States restraining growth in Korea's textile imports to eight-tenths of 1 percent a year.

That means the Koreans must cancel a number of contracts they had already signed for this year under which they were planning to substantially increase their exports to the United States.

Furthermore, we are currently maintaining over 1,300 quotas; approximately 550 of those have been established since 1981 including 250 in 1984 alone. The system of quotas covers more than 100 product categories with more than 80 percent of U.S. imports from low-wage countries subject to restraint.

Truth is, the textile industry is already the most protected of any major industry in the USA so far as quotas are concerned.

So, if you are planning to vote to override the President's veto of H.R. 1562 because you want to send the President a message, I would say: he already has the message and he has acted upon it, maybe late, but he's acted.

If we override this veto our GATT trading partners have a right to reduce, dollar for dollar, our exports to those countries. We can expect harsh retaliation against American exports of wheat, soybeans, cotton, tobacco, and manufactured goods. Is that what we want?

I have to be concerned with our agriculture community, farmers in my district serving once again as the innocent victims of misguided trade policies. They always seem to get it coming and going.

Those of you who would throw a stone at our trading partners, are really throwing a boomerang that surely will come back to hurt us.

No one can deny the very serious circumstances of American textile industies a few years ago. But all of us in manufacturing have been going through a difficult transition period.

No one can deny that things are now improving in the textile industry. It just isn't right to impose a drastic solution for that industry based on circumstances that no longer exist.

Unemployment is higher in my home State of Illinois than it is in most States if not all the States from which we're hearing the complaints today.

Let me conclude with a bit of history:

When the Smoot-Hawley bill became law in 1930, after more than a year of debate, Spain, Italy, Switzerland, France, Canada, Great Britain and Austria raised tariffs within a year or so. The depression continued and expanded.

A substantial body of opinion among scholars holds that these tariffs and the resulting economic disaster were a direct result of Smoot-Hawley.

And now we are being asked to take the same kind of action again.

I would urge you to reject this bad bill by voting "no" on the motion to override.

□ 1330

Mr. JENKINS. Mr. Speaker, I yield myself the balance of the time.

Mr. Speaker, I want to take this very short time to talk with you about the bill, about what the course has been over the past 2 years. Let me explain to you the process. We began in 1981 and 1982 seeking relief. We pleaded with the administration. We pleaded with people on our side saying that the fire was going to get beyond control. We tried again in 1983 and 1984.

This bill itself is not a recent bill. This bill was introduced in this House 20 months ago. We did not introduce this bill last month to come up here and surprise the administration. As a member of the Trade Subcommittee, I

have been pleading with people on my side and this side and down at the White House, saying this is going to get beyond us. We have to have some action to save basic industries in this Nation. We have to have relief not only in this industry, but in all basic industries. If we do not, we shall not be able to lead the free world that all of us want to lead. It is just that simple.

The administration has ignored us. They have done absolutely nothing. They have given us no relief and suddenly in the last 2 weeks agreements have been signed so quickly it sounds like the Fourth of July celebration. Korea, Taiwan, Hong Kong, MFA. We cannot even understand what they are in the last 3 days, they have been signing them so fast.

They have given relief for wheat. They have given relief to micro-computers. They even helped timber a little in the far west.

And they say this is political, from my viewpoint?

I have been asking them for 20 months with this bill, but no action. During that 20 months when this House overwhelmingly from Republicans and Democrats alike passed it, the Senate passed it. And then what did I do? I said I am going to ask that the administration have 8 more months to straighten the matter out. Eight months have passed and imports are up 22 percent during the first 6 months of this year over last year. Is that help for the American working people? Is that the type of trade policy that we in this body on both sides expect of any administration?

Oh, now, you can hear all the arguments that this is Smoot-Hawley all over again. This is the end of the world.

Let me tell you something, if this bill calls for any rollback in imports, which it does against three countries, they would not be rolled back if they had not been rolled up. That is the only reason they are being rolled back.

When Korea, our good ally, complains that this is protectionist and they will not let a single garment in from Thailand, from Bangladesh, from all the little Third World countries, when Japan complains, with a $50 billion to $70 billion surplus and their imports of garments and textiles have remained at 6 percent for the past 5 years, even if you would say to Japan, as I do, that I cannot compete in your market, but Thailand can, Korea can, Bangladesh can. Do something to take some of the excess production of the world.

We in this Nation are taking 70 percent of every piece of clothing manufactured in every developing country on the face of the Earth. I want to help them. I understand their dilemma, but we cannot take it all.

I understand that some industries maybe, according to some people, ought to be phased out. I have heard that.

I want to tell you something about the textile/apparel industry. It is not the biggest industry in my district, but it is symbolic of what is happening today. Those people never ask for much, those workers. They work 8 hours a day. If you really listen to them, there are two things they are interested in: a job, security in their old age, nothing else. And you are eliminating those. Most of them are women and minorities.

You say that they ought to move somewhere, take a high-technology job, move into some other industry. They live 100 miles away from a metropolitan area. Their husbands are working at other jobs. They cannot move.

So what do you do? You eliminate by half their standard of living.

Oh, this industry has been ignored. It has not priced itself out of the market. They have $5.87 an hour average wage.

They have not failed to modernize—a billion dollars every single year for the past 4 years. There are no more efficient industries on the face of the earth than right here in this industry. They have kept pace with all of the modern technology. And you want to write it off?

I simply say this: It is no small industry, 2 million Americans, more than automobiles and steel combined.

Now, I have helped timber. I have helped microchips. I have helped automobiles and I have helped wheat.

I am calling in the chips.

My friends on both sides of the aisle, I simply want to say this. This is not a partisan fight. There might have been a better way to do it if we had the opportunity. I do not now intend to make it a partisan fight, because I could not. I have too many allies here on this issue.

This is an American fight. You can decide to do it today or you can wait and do it on some other issue. At some point, it must be done.

I would hope that it does not cause any great calamities. I do not think it will; but whatever you do, you will be able to defend it in your districts 2 months from now.

Mr. GIBBONS. Mr. Speaker, that is a tough act to follow. I commend my friend, the gentleman from Georgia. I think he will tell you that SAM GIBBONS has never held the gentleman up 1 minute in all his quests for this. I gave him a hearing a few days after he introduced his bill. I got his bill out of the subcommittee when he did not have the votes.

We are not here for any other thing than to talk about the future of America. I have no chips. I do not play poker with my country and its future.

This issue is not a new argument in this Congress. This country for over 200 years has been wracked by this same debate. If you check American history, you will find that when we have had an open and competitive policy, America has prospered. When we have had a restrictive policy, we have had depressions and unemployment.

If you check the 6,500 years of recorded history, you will find that no nation has ever raised it standard of living by restricting its imports, no nation.

I am sorry that there have been so many misstatements about the facts and figures in this debate. My friend, the gentleman from Texas, Mr. KIKA DE LA GARZA, summarized it best when he said, "SAM, don't you know in congressional debate, everybody is entitled to their own figures?" You are, but I think you ought to know what the real figures are.

According to the Department of Commerce, and they have been keeping these figures for a long, long time, imports of finished textile products today are 24.6 percent, not 50 percent, not any of those high percentages. Apparel imports are 35.8 percent. They are up a couple points from last year.

According to the Wall Street Journal, employment has increased in Georgia by over 120,000 in the last 6 months in the textile industry. Employment has increased in South Carolina by over 30,000 in the textile industry. Employment has increased in North Carolina somewhere between those 2 figures.

I regret to say that it has not increased in Alabama and some of the other areas, but it has increased in many regions.

The American textile industry, and the material is right there on the desk, is going through a change, a change that is as American as apple pie. Some win and some lose. There are some big winners out there.

The biggest performer on the stock market last year was the American textile industry, positive performance.

This is a serious matter. The Council of Economic Advisers teils us that if we pass this bill and it becomes law that it will cost $70,000 to preserve each $13,000 job we preserve in the textile industry.

□ 1345

They tell us that our standard of living will drop. They tell us that other Americans will become unemployed. Not just Republican economists, not just Democrat economists, but all economists will tell you that same story. So this is a serious matter.

Now it is serious beyond that because America's reputation is on the line.

The SPEAKER pro tempore (Mr. BROWN of California). The time of the gentleman from Florida [Mr. GIBBONS] has expired.

Mr. GIBBONS. Mr. Speaker, I gave a minute away for Members to make unanimous consent requests. I ask unanimous-consent that I may have 1 additional minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. GIBBONS. I thank all the Members for that courtesy.

Mr. Speaker, America's reputation is on the line. How can we be the leaders of the world—the military and the moral leaders of the world—if we have entered into some 40 agreements, and then unilaterally disavowed them? We cannot. Our word is our bond, and if our word is no good, our bond is no good. No one will trust us, and that is an important thing.

So the American textile industry has got problems, but it is relatively a prosperous industry in America. Employment is going up in that industry. Capital investment is being increased in that industry, and I am glad to say that, because we have some real museum pieces out there that we are producing textiles in. Believe me, I know; I have seen them. We also have some excellent mills.

Our reputation is on the line. I would ask the Members, and I know that it is not a popular request to make, to please sustain the President's veto.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The question is, Will the House, on reconsideration, pass the bill, the objections of the President to the contrary notwithstanding.

Under the Constitution, this vote must be determined by the yeas and nays.

The vote was taken by electronic device, and there were—yeas 276, nays 149, answered "present" 2, not voting 5, as follows:

[Roll No. 290]

ANSWERED "PRESENT"—2

| | |
|---|---|
| Bedell | Foley |

NOT VOTING—5

| | | |
|---|---|---|
| Grotberg | Moore | Siljander |
| Long | Pepper | |

□ 1355

The Clerk announced the following pairs:

On this vote:

Mr. Pepper and Mrs. Long for, with Mr. Foley against.

Mr. FOLEY. Mr. Speaker, I have a live pair with the gentleman from Florida [Mr. PEPPER]. If he were present, he would have voted "yea." I voted "nay." I withdraw my vote and vote "present."

Mr. BEDELL changed his vote from "nay" to "present."

So, two-thirds not having voted in favor thereof, the veto of the President was sustained and the bill was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore (Mr. BROWN of California). The Clerk will notify the Senate of the action of the House.

---

□ 1405

## TREASURY, POSTAL SERVICE AND GENERAL GOVERNMENT APPROPRIATIONS ACT, 1987

Mr. ROYBAL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 5294), making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1987, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from California [Mr. ROYBAL].

The motion was agreed to.

□ 1407

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 5294, with Mr. BEILENSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Friday, August 1, 1986, the bill was open to amendment at any point, and there were 2 hours of debate remaining on the bill and all amendments thereto.

Are there any further amendments to the bill?

AMENDMENT OFFERED BY MR. JACOBS

Mr. JACOBS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JACOBS: Page 32, line 11, strike out "$1,234,000" and insert in lieu thereof "$278,600".

Mr. JACOBS. Mr. Chairman, this amendment strikes out the slush fund for the former Presidents in the amount of nearly $1 million. The venerable chairman of the Committee on Appropriations last week stated that the purpose of this bill was not to spend the taxpayers' money as the sole object, but only to spend the taxpayers' money in a manner in which it will serve the taxpayers, serve the people of this country.

In the case of the former Presidents, the expenditure of this $1 million is exactly the reverse. It is the requirement that the people of this country, the taxpayers of this country, serve the former Presidents.

A former President of the United States now draws from the taxpayers of this country $86,000 a year pension. That is a higher income for not working than 97 percent of their fellow citizens who are working and paying the taxes to pay for it.

I believe that most Americans think that that is a genteel sufficiency; but on top of that, each of these former Presidents receives from the taxpayers a sum of nearly one-third of a million dollars, to pay for secretaries, to pay for office rent and the like.

I think the burning question that this committee ought to answer is: How long after a President leaves office should he still be provided an office by the taxpayers of this country?

A former President, simply because he or she is a former President, commands a speaker's fee on the magnitude of $25,000 a speech. With all due respect, calling the roll of our living former Presidents, I do not know which one can make a $25,000 speech. That is something bestowed upon those people simply because they have been given the honor of serving as President of the United States.

Now, Mr. Chairman, we are headed for troubled times. We have had a lovely time the past few years, with tax cuts and ever-greater expenditures by the Federal Government, but the day of reckoning is at hand.

Some people might say, "Well, a million dollars out of a trillion dollar budget, what does it amount to?" I will say that it amounts to a horrible example to the rest of the people in the Federal apparatus, in particular, and to all American citizens in general.

If the people at the top can get unnecessary spending for themselves, then the story goes all the way down the line, "Why shouldn't I take this Government car home? Why shouldn't I burn a little bit of Government gas? Why shouldn't I use some postage that really belongs to the taxpayers for my private business?"

It is a bad example to set, and I hope the committee will respond to what pole after pole says the overwhelming majority of the American people want. They want a good example from our former Presidents to live up to our former President's speeches.

In the words of mark Twain: "To do good is noble. To advise others to do good is also noble, and much less trouble."

Mr. CONTE. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to the amendment.

I want to emphasize to my colleagues that the appropriation for this account is the same as the amount requested in the President's budget.

The committee did not increase funding for this small program. We're just maintaining the status quo.

I think that it's important to closely examine the legislative history of the "Allowances and staff for former Presidents" before the House decides to make significant reductions in this account.

Let's face it. Unlike most accounts, the constituency for this program is very small. Today, it primarily consists of three men.

In 1958, when the allowance for pensions and office staff was first authorized, there were only two former Presidents.

In fact, when the Post Office and Civil Service Committee held hearings on the legislation 26 years ago, no organization or private individual testified.

However, there was, at the time, a bipartisan effort by the leadership of the House.

Speaker Rayburn, Majority Leader John McCormack and Minority Leader Joe Martin endorsed the program before the committee and on the floor.

They recognized the importance of meeting the demands placed on former Presidents by the American people.

Former Speaker John McCormack testified before the House committee and supported the legislation creating this program.

He said at the time: "The interest of the American people in the President does not cease when his term of office has ended.

"The public demands speeches, conferences, advice, correspondence, and otherwise, after his service as President is over, continues."

Further, as former heads of State, their services continue to be solicited, and they remain a valuable national resource during a time of crisis or great need.

Speaker McCormack recognized that public demands on our former Presidents must be with public support.

At that time, President Truman was receiving 400 letters a day and over 300 invitations a month. To answer these requests, he spent thousands of dollars of his own resources, his pension as a U.S. Senator.

Likewise former President Hoover served this country long after he was President. His most valuable work was as head of the Hoover Commission, a panel charged with reorganizing the executive branch.

Two unmet needs motivated the creation of this program and today justify its continued existence.

First, many people in this country continue to place demands on our Presidents after their term has expired.

They receive thousands of letters and invitations, make hundreds of public appearances for charities and occasionally perform official duties.

Another justification for this allowance can be found in the way our former Presidents were treated as compared to other public servants.

Before this allowance was authorized, former Presidents were the only major office holders or public servants not receiving a pension and other benefits from the Government.

At the same time, Supreme Court Justices could retire at full salary, at any time, no matter how long they served. An even better comparison was our treatment of five-star generals.

These retired military leaders, technically on active duty, not only received full salaries for a pension, but they were allowed a full military staff, a chauffeur, and a secretary.

The question at the time was rightfully asked: Should the Commander in Chief of our Armed Forces be treated less than his subordinates?

□ 1415

Mr. JACOBS. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Indiana.

Mr. JACOBS. I thank the gentleman for yielding.

Mr. Chairman, I do not think the Commander in Chief should be treated less well than the others. I think the others should not be treated that well.

Does the gentleman, would he care to say where ex-President Ford is doing his charitable speaking today? Does the gentleman know where former President Ford is doing his charitable speaking on this very day?

Mr. CONTE. No.

Mr. JACOBS. I am glad to inform the gentleman that it is in Texas, where he is campaigning against one of our colleagues, Mr. BRYANT from Texas.

Mr. CONTE. Well, some days he does that, and some days he does some other things.

In this program, we are only doing the same thing for our past Speakers. We are doing it for Speaker Carl Albert and, hopefully, for other Speakers when they retire. We give them an office; we give them a secretary; we give them an expense account for postage, stationery, and other expenses.

The CHAIRMAN. The time of the gentleman from Massachusetts [Mr. CONTE] has expired.

(By unanimous consent, Mr. CONTE was allowed to proceed for 3 additional minutes.)

Mr. CONTE. The whole program is $1 million for the three Presidents. I was talking with the Secret Service Director, Mr. Simpson. He told me at the subcommittee this year that $28.6 million was spent to protect Presidential candidates during the 1984 campaign.

Mr. JACOBS. Mr. Chairman, will the gentleman yield further?

Mr. CONTE. Sure, I yield to the gentleman from Indiana.

Mr. JACOBS. Historians tells us that no former President of the United States in the entire history of the Republic has ever been the subject of a physical attack with the exception of one, and that was Teddy Roosevelt, but he was a candidate for President at the time. The truth is, I think, that when you are on the stage in politics you do attract nuts. When you have passed beyond that, history tells us that they are more interested in your predecessor and far more interested in terms of violence.

Mr. CONTE. Well, I'm sure that the gentleman wants to protect our former Presidents, especially during this time when international terrorism is a serious threat to our country. Times have changed since the days of Teddy Roosevelt. I hope that we will defeat this measure.

I would also point out that former President Nixon has assumed the cost of his personal protection.

Mr. JACOBS. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Indiana.

Mr. JACOBS. I thank the gentleman for yielding.

Former President Nixon is a well-known student of history. I am sure he understands the safety of his present status according to history.

Mr. CONTE. Well, let me tell you this. I have met him on the road a couple of times, and he has hired his own people to protect him. Maybe the gentleman from Indiana and I can work together in the authorizing process, and cuts may be in order after careful scrutiny. I would be glad to work with him. I have contacted President Ford about this issue, and he is very receptive. In fact, the former Presidents have already made substantial reductions. I think he would be glad to sit down with both of us.

Mr. Chairman, this program addressed many of these needs, but our priorities still seem mixed up today, especially when there is a move to abolish this allowance. It's amazing that we are willing to spend millions of dollars on anyone who wants to be President, yet some are hesitant to spend just over $1 million on former Presidents who have served this country with distinction. In addition, millions of dollars in matching Federal campaign expenses are given to the candidates each election season.

I hope, with so much spent on people who would be President, that we can provide the proper support for our former Presidents.

In closing, let me suggest that the author of the amendment should address this issue in the appropriate legislative committee, not in the appropriations process. Such a change in policy should only come after extensive hearings, close committee scrutiny, and deliberative floor consideration.

Legislation has been introduced to address this issue, and the authorizing committee should act to change the law if there is a problem.

I'm willing to take a close look at this program in the proper context and setting. If there is waste and abuse, it should be stopped. If there's excessive spending, it must be curtailed.

However, the reality is that this recommendation is just slightly above the same amount appropriated last year.

In fact, the former Presidents have made significant reductions in costs for office space, equipment, and staff.

Former President Nixon, for example, has assumed the cost of his protection and many other expenses associated with maintaining his office.

For 27 years, there has been a Federal commitment to former Presidents of the United States. If changes are required, let's do it right and not disable the program.

I urge Members to maintain this commitment and vote against the amendment.

AMENDMENT OFFERED BY MR. SKEEN AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. JACOBS

Mr. SKEEN. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. SKEEN as a substitute for the amendment offered by Mr. JACOBS: On page 32, line 11, strike "$1,234,000" and insert "$1,176,000".

Mr. SKEEN. I thank the chairman.

Mr. Chairman, I have every sympathy in the world for what the gentleman from Indiana is trying to do, but I think a more equitable approach is adoption of my substitute which cuts 5 percent from the budget request for the "allowances of staff" for former Presidents.

A couple of months ago, but after the President's budget was submitted, former Presidents through the GSA presented a revised fiscal year 1987 budget request to the subcommittee. This initiative by the former Presidents, led by President Nixon, sought to control costs and minimize their requirements for fiscal year 1987. Travel was cut, office space was reduced, telephone and other expenses were kept at a minimum.

As reflected in this amendment, this new budget request provides resources for a leaner and more cost-conscious program. We are not talking about a large appropriation. If my amendment is adopted, the funding level of allowances for staff of former Presidents will be set at $1,176,000, basically the fiscal year 1985 level. The committee and former Presidents are working to implement a budget that reflects and implements our goal to control spending. This amendment makes a sizable cut, as I mentioned earlier 5 percent, from the budget request, but it still maintains the integrity of the program, which I think is one essential that we ought to consider when we are dealing with this particular issue.

Mr. Chairman, I urge my colleagues to support this substitute and to reject the Jacobs amendment.

Mr. WISE. Mr. Chairman, I move to strike the last word, and I rise in opposition to the substitute.

Mr. Chairman, I think the issue is quite clear as to whether or not you support ex-Presidents having staffs of the nature that they do. I think it is worthwile to point out, for instance, that this year Federal retirees and black lung recipients had their cost-of-living adjustments frozen. All Federal expenses including those of Members of Congress were cut 4.3 percent. Everybody in this country in some ways has given up something except apparently one group, and that is ex-Presidents. What the Jacobs amendment proposes is simply removing their office expenses, not the Secret Service protection and not their pensions in

any way. I do not really think this is too harsh when you recognize that each one of the ex-Presidents, if you look at them, is doing quite well from the fruits of their retirement. Speeches go for a minimum of $10,000 a night, book rights are in the millions.

Now, every ex-President that I remember when he was President strongly believed in two things, at least they said they did: fiscal conservatism and free enterprise. Well, at times fiscal conservatism demands some fiscal restraint. Free enterprise demands that Federal taxpayers not pay for private gain.

I have to ask what happened to the spirit of Cincinnatus, the Roman counsel who returned to his plow and his fields following his tenure in office. And I might add that, when he returned to his plow and his fields, he did not ask for a taxpayer-paid plant-watering system which one of our ex-Presidents has.

Rome summoned him again in a moment of crisis, and he responded. History records that he did not ask for an honorarium or even a per diem.

How much of an ex-President's obligations came because he was President or because he generated that correspondence, that demand for his attention out of private life? Do our ex-Presidents have recognition today because of their ex-Presidency or because they sold a book? So that which is attributed to their private life, it seems to me, should be paid from their private life.

If an ex-President needs secretarial help, is there anything wrong with using the resources of the closest Federal building? Are there Federal secretaries that can be used? It seems to me everyone needs to share in the spirit of Gramm-Rudman. While the substitute which is offered would have that 5-percent cut, I do not think it gets at the core of the problem.

So the message that goes to taxpayers is clear; some people get a better retirement than others.

Well, unfortunately people have been asked to sacrifice a lot in their retirement in the past few years. Indeed, if the administration's promises for the future hold anything, they are going to be asked to sacrifice even more. So I would think that ex-Presidents would want to share in that also. So I would urge rejection of the substitute and adoption of the Jacobs amendment.

Mr. ROYBAL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this is a subject matter that has been debated every year when this appropriation is before the House. We get all kinds of advice. We are told that there are certain things that are wrong and that certain things should be changed. But every year we recommend that a study be made with regard to this appropriation. Should we, for example, include in that study moneys that are made available to judges, some of whom get full pay after retirement, for certain high-ranking military officers who continue to get full pay, and to include in that study all Federal employees, including those who served as Presidents of the United States.

So far, no one has presented to this Committee or to this House any study. There has been no recommendation that has been made. And the only recommendation is usually that we cut across the board. In this particular instance a tremendous reduction is being made where $955,000 is being deleted from a program that has long been established by the Congress of the United States.

It is true that the pension side of it is the only thing that would remain. But nothing is made available for these former Presidents to continue answering the correspondence and other duties that go to their offices.

I firmly believe that one does not cease to be a public servant even after leaving the Presidency; that there are many throughout the country who still consult with that former President, as well as members of both parties.

I think that this small staff is in part to honor the Office of the Presidency, not to honor the individual. I think it reflects positively on the United States of America and the democratic institutions which are such an essential part of our country.

I think we should give these former leaders a small staff to assist them in their former duties as Presidents, and I do not think they are receiving an excessive amount of dollars.

On the other hand, the studies that have been requested to be made every year have not been made. We do know that if this appropriation is adopted in its original form, it is one that will definitely eliminate the entire support of our former Presidents.

On the other hand, the gentleman from New Mexico [Mr. SKEEN] has proposed a substitute amendment that I think makes more sense. It provides a reasonable level of funding for former Presidents. If in the future we are going to do anything more with regard to this particular appropriation, I think we should continue in our efforts to conduct a study in a reasonable manner and then bring to this House whatever findings are made available. The changes should come in the form of legislation—not on an appropriation bill.

□ 1430

Mr. Chairman, I hope that the substitute amendment does in fact prevail. I think it makes sense and it is more reasonable. Then if anyone would like to continue this idea of a study, let the authorizing committee do it. I think that this is the proper way to proceed in this instance.

Mr. JACOBS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the substitute amendment.

Mr. Chairman, I think the substitute should be put in some perspective. Whether it is a substitute or a motion to table, in essence, it is a kamikaze to shoot down the amendment, obviously. The amendment would delete the slush funds for the former Presidents; the substitute would essentially keep them intact less fifty-some thousand dollars, as I understand it.

It is interesting to note that when the administration proposed this part of the appropriation, it also proposed that charitable institutions be denied their reduced postage privileges, the March of Dimes and the Easter Seals, and so on, that that be cut out altogether and, at the same time, actually asked for an increase in the amount for the slush fund for former President for this year over last year.

Last year and this year again, we have heard almost nothing except all this crushing burden of mail that these former Presidents have to answer. They say even a blind hog will pick up an acorn sooner or later. So I had some friends write to our former Presidents during the past year. We sent 20 different letters from 20 different people to the former Presidents, and of the 20 letter sent, 2 responses were received, nothing for the other 18.

I hope the gentleman from Massachusetts does not suggest that we triple the allowance so they can actually answer their mail.

One of those nonresponses that a friend of mine received I would like to read into the RECORD.

"Dear Ms. Neff: Thank you on behalf of President Ford for your kind letter." That may have been a slight misinterpretation. "Unfortunately, due to an extensive travel schedule," I would expect that would include Texas, "the President is unable to answer personally. President Ford is very grateful that you took the time to write"—of course, he did not have the time to write back—"and deeply regrets that the large amount of correspondence he receives and the nature of his schedule precludes the time necessary to provide the thoughtful and substantive response your letter requires. Your interest is very much appreciated and the President sends his best wishes for success in your endeavor."

In other words, so far as an answer to her letter was concerned, lots of luck; and if she is a taxpayer, and she is, lots of luck again.

That same former President pulled in $1,700,000 of income in 1984. My

question to the committee is a question which I think the American taxpayers would appreciate hearing an exact answer to, and that is: If you come to the Government with not much income, left the Government and were able to command a private income—well, partly private and partly at the taxpayers' expense. President Ford does not just collect a Presidential pension, he collects a congressional pension on top of that—if you can get all that income in one year, $1,700,000, should you not be able to be able to pay your own secretary, or at least pay your own paperboy? These funds even go for subscriptions to publications.

So I ask that the motion to table or substitute or whatever you want to call it be recognized for what it is. It is a hound dog missile to shoot down the purpose of the taxpayers of this country.

Set a good example. When we get into the difficult waters ahead when cutting of Federal budgets is going to be very, very painful, at least let these fellows at the very tiptop with enormous incomes give up the freebies and emoluments that the American public has been forced to provide for them over the past several years. That is not asking a whole lot.

Mr. CONTE. Mr. Chairman, I rise in support of the substitute amendment offered by my good friend from New Mexico, JOE SKEEN.

This amendment is the result of belt tightening and cost cutting by the former Presidents—an initiative lead by President Nixon.

Under the level proposed by the gentleman from New Mexico, significant reductions will be made in many official expenses of the former Presidents. For example, President Nixon cut his official travel budget in half and former President Carter reduced his official expenses by 90 percent. Official telephone costs were also cutback significantly—in one case by 21 percent and in another case by 44 percent.

In fact, the appropriation set by this amendment is basically the same amount enacted in fiscal year 1985. It's not a big program, just $1.2 million for fiscal year 1987.

Mr. Chairman, each year, the House is subjected to this amendment on the Treasury bill. We hear the deep concerns, the outrages, and the cheap shots, but after all the televised floor activity is over, there's little movement by the critics of this appropriation to change the law authorizing this expense. My good friend from Indiana, in his letter to the House, claims that "the overwhelming majority of the American public wants the slush fund cut out." If that's the case, the gentleman should have great support for a bill changing the law authorizing this appropriation. Any radical change in policy should only come after extensive hearings, close committee scrunity and deliberative floor consideration. If changes are required, let's do it right and not just wipe out the program.

I urge the House to adopt the Skeen substitute and reject the Jacobs amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Mexico [Mr. SKEEN] as a substitute for the amendment offered by the gentleman from Indiana [Mr. JACOBS.]

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. JACOBS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 356, noes 61, not voting 14, as follows:

Mr. COYNE changed his vote from "no" to "aye."

So the amendment, as amended, was agreed to.

The result of the vote was announced as above recorded.

□ 1515

AMENDMENT OFFERED BY MR. CONTE

Mr. CONTE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CONTE: On page 46, strike lines 3 through 13, and insert in lieu thereof:

SEC. 521. Effective January 15, 1987, none of the funds made available by this Act or any other Act with respect to fiscal year 1987 and any other fiscal year may be used to store, to maintain or to protect more than 127,911,736 troy ounces of silver deposited in the National Defense Stockpile. The Administrator of General Services, or any federal officer assuming the Administrator's responsibilities with respect to management of the stockpile, shall use all proceeds generated from the disposal of silver to purchase, no later than October 1, 1988, stockpile materials to meet National Defense Stockpile goals in effect on October 1, 1984.

SEC. 521. No later than October 1, 1988, the Administrator of General Services, or any federal officer assuming the Administrator's responsiblities with repsect to management of the stockpile, shall use all funds authorized and appropriated before January 1, 1985 from the National Defense Stockpile Transaction Fund to evaluate, test, relocate, upgrade or purchase stockpile materials to meet National Defense Stockpile goals in effect on October 1, 1984.

Mr. CONTE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. CONTE. Mr. Chairman, I have cleared this amendment with the gentleman from California [Mr. ROYBAL] and the gentleman from Florida [Mr. BENNETT] from the Armed Services Committee. We have compromised on the amendment, and we all agree to it.

Mr. Chairman, this amendment is designed to address the concerns raised by the distinguished gentleman from Florida, Congressman BENNETT, regarding sections 521 and 522 of the bill. These provisions deal with the disposal of silver from the national defense stockpile. I believe that the changes are acceptable to both sides and to Mr. BENNETT.

The first part of the amendment modifies section 521 to ensure that any proceeds from the sale of silver are used to purchase materials required to meet the current stockpile goals. As recommended by the committee, section 521 of the bill prohibits the use of any funds, after January 15, 1985, to store, maintain or protect more than 122.9 troy ounces of sliver deposited in the national defense stockpile. In effect, GSA is left with only one option. The remaining 10 million ounces must be sold before January 15. The committee was concerned that millions of dollars are wasted each year to store unneeded materials, including sliver. Moreover, the proceeds from the sale of some 3.1 billion dollars' worth of unneeded materials, including 156 million ounces of silver, should be used to buy materials currently in short supply and required for national defense needs.

The addition to this section suggested by Mr. BENNETT would direct the administration by law to use the proceeds from the sale of

silver for the purchase of materials required to meet current stockpile goals.

The second part of the amendment strikes section 522 of the bill and inserts a new provision. As recommended by the committee, section 522 prohibits the transfer of any stockpile functions now excercised by GSA to any other agency or Department of the Federal Government. This section was designed to stop any effort to subvert the first provision by transferring the stockpile outside the jurisdiction of the Treasury Subcommittee.

Since section 521 was amended to include "this or any other act," the prohibition would apply to any Federal agency exercising stockpile management functions, and therefore the original prohibition is unnecessary.

The substitute provision directs the GSA or any other agency with stockpile functions to use "all funds authorized and appropriated before January 1, 1985 from the National Defense Stockpile Transaction Fund to evaluate, test, relocate, upgrade or purchase stockpile materials" needed to meet current goals. This provision does not apply to funds authorized or appropriated in fiscal years 1986 and 1987, namely the construction funds appropriated in Public Law 99–190 and the construction funds provided in this bill.

This provision specifically mandates the use of $215.8 million in unexpended obligational authority for stockpile acquisition activities. Over the past few years, the Congress has provided the authority to use receipts deposited in the transaction fund for the purchase of needed materials. However, the administration has failed to use this authority, and as a result, stated stockpile goals remain unmet.

This provision would mandate the use of the remaining obligational authority previously appropriated and authorized for stockpile acquisitions.

Mr. Chairman, the gentleman from Florida has made good suggestions to the committee bill, and I urge my colleagues to support this amendment.

Mr. ROYBAL. Mr. Chairman, I rise in support of the amendment, and I agree with the gentleman from Massachusetts [Mr. CONTE].

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. CONTE].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. MORRISON OF CONNECTICUT

Mr. MORRISON of Connecticut. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MORRISON of Connecticut: At the end of title VI, insert the following new section:

"SEC. 623. Notwithstanding any other provision of this Act, each amount appropriated or otherwise made available by this Act, except for those amounts appropriated or otherwise made available for the United States Customs Service, the Internal Revenue Service, the Bureau of Alcohol, Tobacco and Firearms, the Financial Management Service and the Postal Service, and which is not required to be appropriated or otherwise made available by previously enacted law, is hereby reduced by 9.75 percent."

Mr. MORRISON of Connecticut (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. MORRISON of Connecticut. Mr. Chairman, this amendment is a very moderate amendment, but it continues a process that I think we must follow with respect to the appropriations, and that is to do our best to conform the appropriations to the budget that we have already agreed upon. To do that, unfortunately, we must do more than merely conform these appropriation bills to the budget authority set forth in the budget, because the budget also makes assumptions with respect to outlays, and outlays are what determine the deficit. You cannot set outlays directly; you have to set them by setting budget authority. But if we ignore outlays we can easily find ourselves with a much more significant deficit than we intended in our budget resolution.

This appropriation substantially exceeds the outlay numbers set forth in the budget. Taking the bill as a whole, it exceeds the outlays by $232 million. Dealing just with the discretionary accounts, it is over by $209 million.

It would have been my hope to offer an amendment that would cut that full amount, but I have not done so because to do so would not be prudent. What I have done is propose an across-the-board cut of 9.75 percent, which saves $127 million in outlays. It does so by cutting budget authority by $143 million.

Why have I not gone all the way across the board? Why have I excluded certain accounts?

Well, the fact is that within the Treasury Department a number of the activities that are funded in this bill produce revenue rather than losing it, and to cut such accounts would mean that in fact the deficit would get worse rather than better, because we would lose revenue to counter the losses that we would make by cuts. In fact, losses in revenue would far exceed any savings in outlays.

For that reason, within the Treasury Department I have excluded four of the accounts: the Internal Revenue Service; the Customs Service; the Bureau of Alcohol, Tobacco, and Firearms; and the Financial Management Service. I think that those four accounts are ones in which people could raise substantial objections to any across-the-board cut, and for that reason I have removed them from my amendment.

I also removed the Postal Service revenue-forgone provision, for two reasons. First, that provision is in the nature of a mandatory account. It is not technically mandatory, but the fact is that any cut in that account has to be made up by scientific increases in postal rates charged to charitable organizations and others, and beyond that, already in this account there has been a significant reduction from 1986 to 1987. So to heap another cut on top of this cut that has already occurred and thereby pass on postal rate increases to our citizens really does not make sense.

I think that the rest of this bill can absorb the 9.75-percent cut—not easily, it is not a pleasant chore, it would be nice if we did not have to do it, it would be nice if the Appropriations Committee had found a way to give this particular appropriation a higher 302(b) level, but the Appropriations Committee has set the rules. The Appropriations Committee has decided how much to allocate to this account, and having done so, it has come out with a substantially higher amount of outlays as a result of the policy decisions that are actually allowed in the budget.

For that reason, I think that it is necessary to make this cut. If we do not make these cuts as we go through with respect to the appropriations, we are going to really face a much tougher set of decisions further down the road. It is not a tough decision now as opposed to an easier decision later, it is a small tough decision today, followed, if we do not make it, by an even tougher and deeper decision in September.

For that reason I think that this is an amendment that deserves support.

The amendment today that I am offering, I am offering not only on behalf of myself but also on behalf of Mr. PENNY, Mr. CARPER, and Mr. MACKAY, who will join me today to emphasize the importance of meaning what we say with respect to the budget. The budget is not by any means easy to live within, but it is something we have to do.

(On request of Mr. FRENZEL and by unanimous consent, Mr. MORRISON of Connecticut was allowed to proceed for 2 additional minutes.)

Mr. MORRISON of Connecticut. Conforming to the budget is hard work, it is not easy, but it is something that I think we need to do if we are serious about doing something about the deficit. Many of the problems that we face have to do with problems in shortfalls in revenue, and for that reason I have been sensitive to the revenue provisions with respect to this appropriation. But on the spending side, we cannot let things get worse than they already are.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

Mr. Chairman, the gentleman's cut across the board with four exceptions is what percent?

Mr. MORRISON of Connecticut. The percentage cut is 9.75 percent.

Mr. FRENZEL. And how much BA does that take out?

Mr. MORRISON of Connecticut. It takes out $142.9 million, and that saves $126.8 million in outlays.

Mr. FRENZEL. I see. And you compute that that makes the bill right with the Appropriations Committee's self-appointed 302(b) allocation?

Mr. MORRISON of Connecticut. No, it does not make it right; 209 would make it right if you included only the discretionary accounts. But making it right in my opinion is not doable in a responsible fashion.

Mr. FRENZEL. Mr. Chairman, if the gentleman will yield further, the four accounts that the gentleman eliminated were simply thrown out of the mix. He did not spread that over the remaining cuts that you had?

Mr. MORRISON of Connecticut. I did not spread it over the remaining, because in my best judgment, and I think that of those with whom I have worked on the amendment, the percentage cut required would be too deep to sustain, and to make the cuts in the accounts within the Treasury Department that produce revenue would be unwise, because in fact our net deficit would go up because our collections of revenue would go down.

Mr. FRENZEL. I thank the gentleman for his explanation.

Mr. ROYBAL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, it is rather easy for any Member to take the floor to recommend that a budgetary request be reduced by any particular amount. The truth of the matter is that in this instance the maker of the motion has exempted, and to his credit, some very important agencies, the Internal Revenue Service and the Customs Service, and Alcohol, Tobacco and Firearms Bureau. These are revenue-producing departments, and I think they should be exempted.

On the other hand, if his amendment were to prevail, we would also find ourselves in a situation where other departments would suffer severely. For example, he would reduce the funding for basic law enforcement training. This is training that is definitely necessary, not only for our law enforcement agencies, ATF and others, but it is also training that is needed so that we can combat the terrorism that is going on not only here in the United States but throughout the world. Training would be reduced under this amendment by 54 percent of the necessary cost. This is a tremendous reduction.

Mr. MORRISON of Connecticut. Mr. Chairman, will the gentleman yield on that point?

Mr. ROYBAL. I yield to the gentleman from Connecticut only on that point.

Mr. MORRISON of Connecticut. I think that it is important to emphasize that the Federal Law Enforcement Training Center, to which the gentleman refers, in 1986 had a level of funding of $22,779,000. The proposed increase, which is a very substantial one, almost 30 percent, would take it up to $29,499,000. The cut, after application of my amendment, would take it down to $26,623,000—in other words, a 17-percent increase over last year's level.

I think that it is misleading to suggest that there are not resources here to deal with the priority items that the training center should deal with.

Mr. ROYBAL. Mr. Chairman, I will not yield any further, because I think that the gentleman, while his figures seem to be correct, has not really analyzed the entire matter correctly. First of all, he has not been a member of the committee; he has not taken part in the deliberations that took place; he did not hear any of the testimony that was presented to the committee; he has not heard, for example, that terrorism has increased, not only here in the United States, but throughout the world; he has not heard that rioting continues to increase; and he did not hear from expert witnesses that we must provide the necessary training for our own law enforcement agencies in the United States.

□ 1525

So the 17 percent that he makes reference to can very well not be enough, since all these other things have increased so tremendously.

Another thing that is also in a dangerous situation, and that is that foreign missions in Washington, DC, right here in our own city, will have to be reduced. We would have to reduce also, under this particular amendment, the Government's effort to investigate illegal international arms transactions. I think that that is an important matter that must be considered. Because of testimony that was presented, the committee, in its wisdom, made a recommendation to the full committee and now to the House that these funds be included in the bill.

As we go further, we also find that if this amendment prevails we will have to reduce the number of arson task forces by one-third. Arson, Mr. Chairman, had increased in the United States tremendously, and if this prevails we will have to make that reduction.

I can go on to other departments. I realize I only have 5 minutes to do it in. But the truth of the matter is that the recommendations made by this committee are not only my recommendations, these are the recommendations of every Member of the committee who, after discussion, after debate, after careful consideration, came to the conclusion that there were certain necessities that had to be met, and that is exactly what we have done here.

These departments are funded based on recommendations that have been made, and in some instances they are above the budget. But in most instances they are justified by the great need that arises.

AMENDMENT OFFERED BY MR. FRENZEL AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. MORRISON OF CONNECTICUT

Mr. FRENZEL. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. FRENZEL as a substitute for the amendment offered by Mr. MORRISON of Connecticut: On page 59, after line 11, insert the following new section:

"SEC. 623. Notwithstanding any other provision of this Act, each amount appropriated or otherwise made available by this Act not required to be appropriated or otherwise made available by previously enacted law is hereby reduced by 8.94 percent."

Mr. FRENZEL. Mr. Chairman, if the distinguished chairman of the subcommittee did not like the amendment of the gentleman from Connecticut [Mr. MORRISON] he will probably not be enamored of this one either.

As a matter of fact, the amendment of the gentleman from Connecticut is for sissies. It cuts a little over $100 million in BA and outlays, and attempts to conform the appropriations bill to the 302(b) allocations.

My amendment is a bit sterner. It will cut about $690 million out of budget authority. It does take the bill back to the 1986 BA levels for discretionaries only. About half of this bill of over $13 billion is discretionary. A little more than half is mandatory.

The discretionaries, as is customary for appropriation bills, are increased, however, at a much greater rate of increase than the mandatories. Therefore, this amendment is able to take a pretty good $690 million bite by restricting discretionaries only.

My amendment is not going to be for the faint of heart. The gentleman from Connecticut reduces across the board, but in his exceptions he removes at least one account that amounts to one-third of the bill, and the three others amount to very substantial additional pieces of it. I do not blame him for exercising discretion rather than valor, but I believe an across-the-board cut should cut across the board.

As a statement to the committee, I would suggest that their committee reports are very hard to interpret, particularly in distinguishing between mandatories and entitlements. I think in the future rather than have to dig out this material, my cuts will be

across the board in mandatories as well, and if any of them are successful, it will be a little harder for the committee to repair the damage. I would hope in the future that the committee reports would make the distinction between mandatories and discretionaries so we would have some idea of what we are talking about.

Also, the committee report should make the distinction between mandatories and discretionaries as compared to 302(b) allocations rather than to refer simply to the Budget Committee or CBO statement which often does not reconcile with the committee's figure.

Be that as it may, Mr. Chairman, many people will want to exempt the IRS; they will want to exempt the Customs; and I understand that. But I believe that we should try to get to last year's level.

I think the remarks of the gentleman from Connecticut are extremely important. He says what he is trying to do is to save the House from making a very difficult, much more difficult decision later. He is taking you part way. My amendment will take you a lot farther down the road toward sparing you that decision later, but neither one of us, as heartless as these amendments are described to be, even if they are applied across all of the appropriation bills, is going to spare us the ultimate pain of having to vote a sequester resolution.

So I hope the House will be interested in my amendment, and if not I hope it will adopt unanimously the amendment of the gentleman from Connecticut.

I yield back the balance of my time.

Mr. CONTE. Mr. Chairman, I am inclined to agree with the gentleman from Minnesota to a certain extent. I think if you want to cut this bill, you have got to go ahead and cut across the board.

The gentleman from Connecticut [Mr. MORRISON] exempts the agencies in which we added money, and we felt the money was needed: $150 million for Internal Revenue over the President's budget, $112 million over the President's budget in Customs, $650 million over the President's budget in postal subsidies.

Those were all the moneys we put in, and he exempts them. So I agree with the gentleman from Minnesota [Mr. FRENZEL] as far as he is concerned. If you are going to do this you have to do it across the board—no exceptions.

But across the board is bad. The amendment of the gentleman from Connecticut is bad, but the amendment of the gentleman from Minnesota is wicked.

Mr. Chairman, over the past 2 weeks, we've argued the pros and cons of these Gramm-Rudman across-the-board amendments until nothing made sense, and today is no exception. And let's face it. This amendment is Gramm-Rudman in disguise, running around this House hiding behind a percentage sign.

Some of my colleagues claim that a percentage cut is the fairest way to reduce spending with the least impact. To me, it's bad policy and a cop-out. Every program in this bill or any other bill is not as important as the next. We have to make some choices around here, and yes, sometimes those choices involve spending more than last year. We can't look at these bills in a vacuum or through the narrow prism of a percentage cut.

This amendment is an excellent example of why the sequestration process does not work. This amendment—like the computers at OMB that crunched the numbers for the sequester order—cannot discern the difference between drug enforcement programs and waste in the bureaucracy or between revenue producers and abuses in the postal subsidy. The cuts are equal and across-the-board, but they are also short-sighted and costly in the long run.

Take the sequestration of the IRS, for example. Gramm-Rudman cut the IRS by $157 million. This reduction was targeted at compliance programs, enforcement activities and taxpayer service. Even the administration recognized the absurdity of this cut and requested a supplemental to make up the difference. However, without the supplemental this $157 million Gramm-Rudman cut would have cost the Treasury almost $1 billion in uncollected revenue.

□ 1535

Now, does that make sense? We're going to save $157 million today and add a billion dollars to the deficit tomorrow.

The same is true for this amendment. In the worse case scenario with a 8.9-percent across-the-board cut, the Treasury Department estimated that such an amendment to this bill would add $3 billion to the deficit. Don't forget, the IRS, ATF, and the Customs Service collect almost all of the revenue used to pay the bills around here.

At the same time, this amendment would increase interest payments by $500 million because of late processing and cost $100 million in lost savings because of delayed debt collection activities.

I can't make the point strong enough. These across-the-board amendments make real and substantial cuts in very important programs. You're not just voting for a percentage sign. You're voting to fire people and destroy programs. Everyone who supports these cuts bears the responsibility for their impact.

Look at some concrete examples before you vote for this amendment.

Under the worst-case scenario, the Bureau of Alcohol, Tobacco and Firearms would lay off 510 people. These are agents used in tax collection, law enforcement, and arson investigation. An $18.5 million cut in this agency would reduce revenue protection inspections by 37.5 percent, with a revenue loss of $241 million. This bill only appropriates $190 million for the entire agency.

Look closely at the Secret Service before you vote for the amendment. Under the worst-case scenario, the U.S. Secret Service would have to fire 700 employees. This reduction would eliminate protection of foreign missions in Washington, DC, and for our former Presidents. It would severly curtail protection of Presidential candidates and antiterrorism activities of the Secret Service.

Mr. Chairman, I ask the Members of this House to think about these questions: Who's responsible for an assassination attempt if any embassy goes unguarded or if a former President is injured?

Who's responsible for a higher deficit because taxes are uncollected? Who's resoponsible for preventing the mailing of September checks for Social Security and veteran's benefits?

If this amendment is enacted, this House has the ultimate responsibility. We all know the impact of this cut before the vote is taken and before the reduction is implemented.

I challenge my colleagues to look beyond the first page of this bill and examine the committee's recommendations. Tell me what programs should not be funded.

If you want to put this bill under last year's level, stop hiding behind a percentage sign and offer an amendment to cut the $650 million for revenue forgone. Cut nonprofit groups, the charities, veterans organization, rural newspapers, small libraries and others.

Cut the IRS and increase the deficit by leaving $100 billion in taxes uncollected. Cut the Customs Service and allow drugs to pour across the borders and onto the streets of this country.

If you are interested in cutting, those are the agencies that the committee recommended to increase funding. Almost all of the other programs in this bill were funded as the President requested.

Mr. Chairman, let me remind my colleagues that this bill is under the 302(b) allocation, and these recommendations should be supported by the House.

This amendment is a disgrace. It's irresponsible. And it should be defeated.

(By unanimous consent, Mr. CONTE was allowed to proceed for 5 additional minutes.)

Mr. CONTE. Mr. Chairman, I now yield to my good friend from Connecticut [Mr. MORRISON].

Mr. MORRISON of Connecticut. Mr. Chairman, I thank the gentleman from Massachusetts for yielding, and I commend him on his usual eloquence.

I would say that I think he has stated the case for my amendment and he has stated it quite eloquently and he has talked about all of those agencies which should not be cut; and the gentleman is correct, and the judgment of the committee to add funding in that area is certainly wise.

The decision of the Appropriations Committee not to provide for sufficient 302(b) outlays within the allocation among the subcommittees has left this committee with significant overexpenditures which contributes to the deficit.

When the gentleman says that this is within the 302(b) he is correct as far as budget authority goes, but not as far as outlays. I would say to the gentleman, while it is unfortunate that those other agencies which are not as critical as the ones that he has itemized will have to be cut further than the committee would recommend, the solution to that was earlier in the process, to having a more generous 302(b) allocation. Maybe it was not done.

This House, on the floor at this point, has no alternative, and I think to criticize across-the-board cuts on the one hand and selective cuts on the other, which mine is selective, is to really miss the point. We have to do one or the other if we are going to live within the budget.

I just want to emphasize one other thing. The gentleman from California, in speaking against my amendment, spoke about arson and firearms as two things that would be heard. Both of those are within the Bureau of Alcohol, Tobacco and Firearms, and they are exempted within my amendment and they will not be cut.

Mr. CONTE. Mr. Chairman, I want to respond to the gentleman on that point. Again, if you want to make cuts where this committee has increased spending over, last year and the President's budget, you have to cut IRS, you have to cut Customs, you have to cut Postal subsidies. However, this amendment excerpts those programs.

Why penalize the agencies that did not get any increases? And that is what you are doing. I disagree with both amendments. The gentleman from Connecticut wants to cut the Secret Service by 700 agents. This is no time to cut the Secret Service, when terrorism is running rampant around the world. And you want to knock out 700 agents? Not over my strong objections will you cut this agency. No way.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Minnesota. Now we are getting into a good debate.

Mr. FRENZEL. Mr. Chairman, can the gentleman tell me what the Secret Service has to do that is going to require a 12-percent increase? Have we acquired some newly retired Presidents or President's wives who require more protection? Why we must beef up the Secret Service?

Mr. CONTE. No, we are beefing up the Secret Service because of the reasons I mentioned earlier: increased terrorism. A good portion of the increase is due to costs associated with the protection of candidates for the 1988 election.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CONTE. Look at the money you spend around this Capitol. You have got more policeman around here than you can handle. You trip over them. The Secret Service does a much let better job than the Capitol policeman.

Mr. ROYAL. Mr. Chairman, I rise to oppose the amendment and I move to strike the requisite number of words.

Mr. Chairman, I was somewhat amazed by the remarks I have heard in the last few minutes. For example, I would like to compliment the gentleman from Minnesota for his candor and for his sense of humor.

He told us a little while ago that his amendment was somewhat sterner than that of the gentleman from Connecticut [Mr. MORRISON]. Now, that is the understatement of the year. His amendment cuts across the entire budgetary appropriation by $690 million. Now, that is not somewhat sterner; that is a tremendous cut.

What it does, is to create a devastating situation. It would reduce Internal Revenue Service staffing by approximately 10,000 employees.

This means that there will be 10,000 less people taking care of the returns that are filed by the people of the United States. The truth of the matter is that this is one department that produces revenue at least around the neighborhood of 12 to 1 and some tell me that it is closer to 18 to 1. In other words, for every dollar invested, there is an $18 return.

What does it do to the Department of Customs? It reduces that agency by 3,488 employees. Now, what is going to happen, then, to the contraband, to the narcotics that is coming into this country? Are we just going to let it come in? Just simply because such an amendment is proposed on this floor that will cut Customs by that number of employees, millions of dollars, when the President and the leadership of the House is now actively engaged in an antinarcotics drive?

□ 1545

Are we going to make this kind of a reduction? Are we going to do the same thing to these other departments? ATF, as an example, and other departments that help train our men in AFT, and antiterrorism and antiriot, these are important things that will be cut back if this amendment is adopted.

Mr. Chairman, if we are going to be responsible, I think we should look at the situation the way it really is.

Yes, I like the idea of trying to save as much as we possibly can in the budgetary process, but I do not like the idea of making reductions to the point where down the line it is going to cost us 100-fold. What will actually result if this reduction takes place is that we will have to face a situation later on that we wish we had not created by adopting the amendment before us at the present time.

Both amendments, in my opinion, should definitely be defeated because they are designed not to benefit the regular process of government but to restrict it, to cut it and in many instances eliminate certain services that are important to the well-being of this country.

I oppose both amendments.

Mr. SKEEN. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from New Mexico.

Mr. SKEEN. I thank the gentleman for yielding.

I would like to ask the chairman a question. I think the question arose in the last debate exchange about why the increase in Secret Service? I think it probably is a good opportunity at this point to make mention of the fact that some $5 million, almost $6 million of that increase is gearing the Secret Service up for the 1988 campaigns plus the antiterrorism programs and other things that I think should be mentioned as to why we have increases in this particular area.

Am I correct or incorrect?

Mr. ROYBAL. The gentleman is correct.

Mr. SKEEN. I thank the chairman.

Mr. CARPER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the substitute offered by the gentleman from Minnesota.

I would like to direct a question, if I could, to the gentleman from Minnesota. The question I would like to ask is simply with regard to the cuts in funding for the IRS and with regard to the cuts in funding for the Customs Service: Under his substitute, what effect would that have on our ability to raise revenue in this country?

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. CARPER. I yield to the gentleman from Minnesota.

Mr. FRENZEL. I will be delighted to answer that question. There is obviously a relationship between the

amount of money and the amount of employees in the IRS and how much money is received. On the other hand, I doubt the gentleman would suspect that, if we cut the IRS in half, that our revenues would be cut in half, nor if we doubled it that our revenues would be doubled. In my judgment, if we reduce both of those agencies, we would get them to work harder and smarter and we would get about the same results from both of them.

Mr. CARPER. I thank the gentleman for his response. I can only say that I wish there was some way that we could craft an amendment here that would help bring our budget outlay figure down to what we all, I believe, would like for it to be. Clearly, I think that is just more difficult a task than we are likely to be able to accomplish today.

I want to commend, however, the gentleman from Connecticut for crafting his amendment in a way that I think spares the foolishness of cutting the budget of the IRS and the Customs Service at a time when we clearly need to generate more revenues. This amendment also spares the BATF from further cuts, and we all realize the kind of dangers and problems from which it protects us.

I wish we could get the full loaf of outlay reduction today. I am afraid that going for that second half of a loaf as Mr. FRENZEL suggests, is just not very logical. Indeed, adoption of his substitute would likely increase the budget deficit, rather than reduce.

As a result, I am going to oppose the substitute offered by the gentleman from Minnesota. I would urge its defeat and urge support for the amendment offered by the gentleman from Connecticut.

Mr. COLEMAN of Texas. Mr. Chairman, will the gentleman yield?

Mr. CARPER. I would be happy to yield to my colleague from Texas.

Mr. COLEMAN of Texas. I thank the gentleman for yielding.

Mr. Chairman, I have attempted both with my staff and committee staff to try to answer the question the gentleman from Delaware asked of the gentleman from Minnesota. Some of the current funding levels and what we are able or unable to do in terms of Customs, I think, are relevant questions to ask and that should indeed be answered.

Under the current staffing levels, the United States Customs Service today inspects 1 out of every 98 containers which enter our Nation. I think that is a pretty startling figure. I suggest that the kinds of cuts recommended by the gentleman's sustitute amendment would lower it. The exact number, of course, would be impossible to tell, as the gentleman from Minnesota has pointed out. So perhaps instead of 1 out of every 98, we would be able to inspect 1 out of every 120. I think that becomes all the more difficult for Members of this House to agree to.

So I am trying to answer the question of the gentleman and would only make one further point. While the gentleman, I believe, is correct in opposing the gentleman from Minnesota's substitute to the Morrison of Connecticut amendment, I think the gentleman should also understand that the Morrison of Connecticut amendment itself has some great frailties, and I hope we will be able to discuss those particularly as they relate to the Secret Service.

So I hope that eventually the gentleman will find his way clear to do as I think the majority of this House will do, and that is oppose both amendments.

Mr. CARPER. Let me reclaim my time and thank the gentleman for his observations about the Customs Service. I yield back the balance of my time.

Mr. MORRISON of Connecticut. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think it is important to emphasize the difference between these two amendments. The Frenzel amendment, he says, is bolder and not for sissies. The fact is it is unwise. It will net out with a loss in revenue to the Government. In other words, the deficit will be higher if we vote for the Frenzel amendment than it would be without.

My amendment does not have that frailty. It has exempted those agencies which collect the revenues. That has been described as an additional frailty, to make a judicious choice about where we should cut. I think that is the strength of the amendment. Every agency involved in this matter of terrorism and law enforcement is receiving an increase, not as large an increase as would exist under the committee bill but still an increase despite the cut which is proposed in my amendment. We can afford to save this $127 million in outlays, and we should afford to do it, and I hope the House will reject the Frenzel amendment and adopt my amendment and thereby move us just one little step further to the sanity we need with respect to our budget deficit.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota [Mr. FRENZEL] as a substitute for the amendment offered by the gentleman from Connecticut [Mr. MORRISON].

The question was taken; and on a division (demanded by Mr. FRENZEL) there were—ayes 7, noes 19.

So the amendment offered as a substitute for the amendment was rejected.

Mr. FRENZEL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, my amendment has been rejected by the faint of heart. The seven virile and brave Members have expressed their hope that someday this country will move toward a sound fiscal policy.

It is now, I think, very important that all of those who have any respect at all for the process of the budget, for the Gramm-Rudman targets and for the fiscal integrity of this Congress and the confidence of the people of this country, to vote for the rather less aggressive, not aggressive enough, in my thinking, amendment of the gentleman from Connecticut [Mr. MORRISON].

The gentleman exempts some departments which I do not believe qualify for exemption. He has tried to make as mild and as sensible and rational an attempt as he can to give the House a chance to show some fiscal responsibility. If we don't accept this chance, then I think we can kiss the Gramm-Rudman targets goodbye and start making ready for the high interest rates and inflation which are likely to follow.

Mr. ARMEY. Mr. Chairman, would the gentleman yield?

Mr. FRENZEL. I yield to my distinguished friend from Texas [Mr. ARMEY].

Mr. ARMEY. I thank the gentleman for yielding.

Mr. Chairman, I would just like to associate myself with the remarks of the gentleman, and I think perhaps as the day draws closer when indeed we will have to face a decision to confirm the promise we made on Gramm-Rudman, it becomes increasingly more apparent to us that we have to stay in the well now, do the hard work, try to get the very best cuts, get those cuts along the way, to avoid that $10 billion surcharge which is mandated by the Gramm-Rudman sequestration and the even more—or the even more less-discriminating cuts that come under a sequestration order.

I appreciate the efforts made by both gentlemen today, and I encourage the House to vote for passage of this bill.

Mr. FRENZEL. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut [Mr. MORRISON].

The question was taken, and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. MORRISON of Connecticut. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 269, noes 152, not voting 10, as follows:

[Roll No. 293]

Messrs. BONIOR of Michigan, LAGOMARSINO, BURTON of Indiana, LAFALCE, DORNAN of California, and GUARINI changed their votes from "aye" to "no."

Messrs. LEHMAN of California, LIVINGSTON, and DELAY changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. YOUNG of Missouri. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in strong support of this legislation, particularly with respect to the General Services Administration, and at this time would like to commend the distinguished chairman of the Appropriations Committee, the Honorable JAMIE WHITTEN, the distinguished chairman of the Subcommittee on Treasury, Postal Service and General Government, the Honorable EDWARD ROYBAL, the distinguished ranking minority member, the Honorable SILVIO CONTE, and the distinguished ranking minority subcommittee member, the Honorable JOE SKEEN, for their hard and fine work in bringing before the House today a very cost-effective and workable piece of legislation.

Mr. Chairman, as chairman of the Subcommittee on Public Buildings and Grounds of the House Committee on Public Works and Transportation, charged with the responsibility of overseeing and approving the General Services Administration proposed budget for the construction, alteration and leasing of space necessary to house Federal agencies nationwide, I am very pleased with the contents of this bill. In accordance with the Public Buildings Act of 1959 the Appropriations Committee has included in this bill those projects which have been approved by the House Committee on Public Works and Transportation.

Mr. Chairman, for quite a few years, our committee has become increasingly alarmed over the escalating leasing budget of the General Services Administration. The bill contains $935,100,000 for the rental of space nationwide; however, before we are even into this fiscal year the General Services Administration has indicated they have an immediate need to increase their rental budget by an additional $50.4 million. Mr. Chairman, the leasing of space must be brought under control and decreased because it is preventing the construction and alteration of necessary facilities on a routine basis. In an effort to assist in decreasing this leasing account, our committee authorized the construction of badly needed Federal buildings in Jasper, AL; Paterson, NJ; Miami, FL; Chicago, IL; and Wilkes-Barre, PA, we found by providing for construction of these facilities, as opposed to continuing to lease space to house the activities which eventually are to be housed in these new Federal buildings, the buildings would pay for themselves within 7 to 10 years, and further, at the end of that period our taxpayers would have an asset in hand, as opposed to a handful of rent receipts.

In addition, Mr. Chairman, the House Committee on Public Works and Transportation carefully scrutinized the repair and alteration projects and approved those projects which will provide for critical repairs to existing facilities in order to promote health and safety for Federal workers. These projects include the replacement of transformers containing polychlorinated biphenyls [PCB's], fire safety alterations, and the reconversion of existing vacant space in Federal buildings.

Mr. Chairman, I urge enactment of this measure.

□ 1620

AMENDMENT OFFERED BY MR. DORNAN OF CALIFORNIA

Mr. DORNAN of California. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. DORNAN of California: Page 15, after line 2, insert the following new section:

SEC. 202. (a) Section 2254 of title 18, United States Code, is amended by adding after subsection (b) the following:

"(c) The Postal Service may carry out a forfeiture under this section if the violation involves the mails. The Postal Service shall exercise the authority of the Attorney General under subsection (b) of this section with respect to such forfeiture.".

(b) Section 2003 of title 39, United States Code, is amended—

(1) in subsection (b)(5), by striking out "and";

(2) in subsection (b)(6), by striking out the period at the end and inserting "; and" in lieu thereof;

(3) by inserting at the end of subsection (b) the following:

"(7) amounts (including proceeds from the sale of forfeited items) from any civil administrative forfeiture conducted by the Postal Service under title 18."; and

(4) in the first sentence of subsection (e)(1), by striking out "under this title" and inserting in lieu thereof "as provided by law".

(c) Section 2254 of title 18, United States Code, is amended—

(1) in subsection (a) by inserting before the period at the end of paragraph (1) ", and any property, real or personal, tangible or intangible, which was used or intended to be used, in any manner or part, to facilitate a violation of this chapter";

(2) in subsection (b) by striking "Attorney General," and inserting "Attorney General or the Postal Service,"; and

(3) by adding at the end the following new subsection:

"(d) The authority of the Postal Service under subsection (b) shall be exercised only where the conduct with respect to which such seizure or forfeiture occurs includes use of the mails in violation of this chapter.".

Page 14, line 7, insert "SEC. 201." before "For".

Mr. DORNAN of California (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN (Mr. BEILENSON). Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DORNAN of California. Mr. Chairman, this involves child pornography. There is not a Member of this Chamber who is not sickened by this ugly phenomenon of modern Western civilization.

The leading Government agency in the United States tasked with the responsibility for investigating violations of this horrendous crime is the Postal Service. The only Congress in the last decade that I have not had the honor of serving with was the 98th Congress. It did some good work. It passed the Child Protection Act; but inadvertently, by a sheer mistake, they did not give the Postal Service the teeth that was given in that Child Protection Act to every other agency of Government tasked with the responsibility of protecting our youth.

Now, the Post Office was the only enforcement agency that did not have civil administrative authority to forfeit property used to violate the statutes of child pornography and all the profits from those violations, nor was it given clear authority to request that the Justice Department initiate civil judicial proceedings against such property.

The authority to conduct seizures and forfeitures and thereby take the profits out of this horrendous trafficking in the psychological and physical abuse of children was a major feature of the act to give power to all the agencies and they inadvertently left out the Postal Service.

This amendment of mine corrects these oversights. Moreover, because the Postal Service bears the cost of enforcing the statute rather than relying upon appropriations, this amendment allows it to retain the proceeds of civil administrative forfeitures. Existing statutes requiring that proceeds of judicial forfeitures be deposited in the Treasury, of course, are not effected, so this has no cost effect on our budget process here.

Mr. ROYBAL. Mr. Chairman, will the gentleman yield?

Mr. DORNAN of California. Yes, I gladly yield to my distinguished friend, the gentleman from California.

Mr. ROYBAL. Mr. Chairman, I fully support any amendment which helps stop child pornography.

Now, the gentleman states that the amendment in question is a technical amendment, but it is in fact clearly legislation on an appropriation bill.

Now, may I inquire of the gentleman whether or not he has cleared the amendment with the appropriate legislative committee?

Mr. DORNAN of California. Mr. Chairman, my staff, in sending around the "Dear Colleague" letter did not realize that on the floor we used the words "technical amendment" in a very specific way. He meant that it was a technical oversight that the Postal Service was not given the full teeth in their administrative responsibility on child pornography.

We did send a "Dear Colleague" letter to everyone in the House and talked to the Postal and Civil Service Committee and the Judiciary Committee to let us know if they had any objection. We did not hear of any objection from them and, most importantly, the Post Office Service has all but begged us, these highly motivated officers who are trying to protect our children, they asked please to close this loophole that was an inadvertency in that otherwise excellent Child Protection Act that was passed by the great 98th Congress.

Mr. ROYBAL. Well, Mr. Chairman, under these circumstances, if the gentleman will yield further, I have no objection to the amendment.

Mr. DORNAN of California. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. DORNAN].

The amendment was agreed to.

Mr. JEFFORDS. Mr. Chairman, I rise in opposition to the amendment sought to be offered by the gentleman from North Carolina [Mr. COBEY].

On its face, this amendment prohibits the Federal Election Commission from taking any action which is not in compliance with U.S. Supreme Court decisions and, therefore, contrary to the law of the land.

Certainly, neither I nor any other Member of this body believes that the FEC should act in an unconstitutional fashion. Therefore, I have no problem with the intent of the amendment.

Instead, I oppose this amendment because, first of all, we don't need legislation to prohibit unconstitutional actions—they are already prohibited—and, second, because adoption of this amendment would incorrectly imply that the FEC is now operating in a manner which violates the Supreme Court decisions in the Ellis and Hudson cases. That is simply not the case.

Supporters of this amendment say that the U.S. Supreme Court—in Ellis, Hudson, and other cases—has declared the use of compulsory union dues for political purposes to be unconstitutional. They go on to say that, since the FEC allows compulsory union dues to be used for certain political purposes, the FEC is not complying with those decisions.

Unfortunately, this is an inaccurate characterization of the Supreme Court's holdings. What the Court has consistently held—correctly in my opinion—is that a union may not use compulsory union dues for political purposes or other purposes unrelated to its collective bargaining duties against the objections of dissenting employees. Moreover, the Court has held that this dissent is not to be presumed but must be made known to the union by the dissenting employees.

Supporters of this amendment actually intend to go much further than the Supreme Court by preventing the political use of any compulsory dues, even if the union membership unanimously wants them to be used for political purposes.

Mr. Chairman, the Supreme Court has been very stringent in this area. Once an employee has raised objections, the union must have adequate procedures to ensure that the employee's dues are reduced by the amount attributable to noncollective bargaining activities. The union can't even collect the money in advance and then provide a rebate.

Obviously, this requires some precisely defined procedures on the part of the union and those procedures are being examined by the courts on a case-by-case basis. If the supporters of this amendment wish to establish an administrative mechanism for defining and enforcing these procedural requirements, that is

well worth considering if the case can be made that the courts are not adequately resolving these issues.

What is not worth our consideration are meaningless amendments whose only apparent value is the generation of newsletter headlines, fundraising tirades, and misleading "key vote" ratings. For these reasons, I urge opposition to this amendment.

Ms. MIKULSKI. Mr. Chairman, in the next few weeks, the President will announce a major new initiative to combat drug smuggling on our Southwest border.

I support the President's program in principle and policy. I disagree with the provision of his plan, however, to transfer patrol agents from the Port of Baltimore and other ports on other U.S. coasts to the Southwest.

We are in a war against drug smugglers in Maryland and around the country. But it will do little good to close the front door on drug smuggling and then turn around and open a side door on this problem.

I believe the President is right in wanting to put a Federal fence from Galveston to San Diego. If we remove our specially trained Customs agents from Baltimore, however, we will seriously undermine drug interdiction there and in every other port where these agents are removed to work in the Southwest.

Earlier today, I wrote the President and asked him to support additional funds for Customs border agents which the House has included in H.R. 5294, legislation making appropriations for the Department of the Treasury for fiscal year 1987. A copy of that letter follows my statement.

It is my hope that we can continue to work on a bipartisan basis to stop drug use in this country. The President's support for more Customs agents without removing current agents from ports around the country where they are already working, would be a major step toward this goal.

HOUSE OF REPRESENTATIVES,
*Washington, DC, August 6, 1986.*

The President
*The White House*
*1600 Pennsylvania Avenue, N.W.*
*Washington, D.C.*

DEAR MR. PRESIDENT: I am writing to applaud your upcoming plans for increased drug interdiction efforts along our nation's Southwest border and to encourage you to take additional steps to combat drug smuggling at other ports of entry around the United States. In particular, I am asking you to support additional funding for Customs agents for this purpose in Fiscal Year 1987.

I understand that part of the Customs Service's efforts along the Southwest border as part of this new initiative will require transferring patrol agents from the Port of Baltimore and other ports on other U.S. coasts to the Southwest. We need more Customs personnel along the Southwest, but to remove them without replacement from places like Baltimore will seriously undermine drug interdiction in these ports.

Mr. President, we are engaged in a major war on drug smugglers in Maryland and around the country. It will do us little good to close the front door on drug smuggling and then turn around and open a side door on this problem. We need customs agents in Baltimore and in other parts of the country. We cannot afford to leave any area of our country unstaffed or understaffed. These Customs patrol agents are specially trained in anti-drug and anti-terrorist activities. We need them to patrol our Bay, our seaports and our airports. If we transfer these men and women, drug smugglers will know that we are moving our agents and will target these understaffed ports of entry for illegal drugs and narcotics.

Later today, the House of Representatives will vote on H.R. 5294, legislation making appropriations for the Department of Treasury for Fiscal Year 1987. It includes funds to increase the number of Customs agents next year by 850. Unfortunately, the Office of Management and Budget is opposing increasing this funding for additional law enforcement and drug interdiction efforts. I would ask that you overturn OMB's decision and support these additional funds to help increase our efforts in fighting the war on drugs.

Your efforts, and those of Mrs. Reagan, in bringing this issue to the top of the national agenda, is truly commendable. I look forward to working with you on this in the weeks and months ahead.

Sincerely,

BARBARA A. MIKULSKI,
*Member of Congress.*

Mr. HOYER. Mr. Chairman, it is important that we look at the administration's record on customs. This is because there is much talk now about the war on drugs, and how the President is committed to eradicate this national problem. I applaud his commitment. However, I am concerned when his focus lies only with instituting a massive drug testing program for Federal employees and not with enforcement or efforts to stop drugs where they often can be found—at our borders.

The administration's record of lack of support for Customs drug enforcement efforts over the course of the last 6 years is clear. Each and every budget request made by the Reagan administration to the Congress has proposed substantial reductions in staff positions for the Customs Service.

For example, in fiscal year 1985, the President requested $602 million for Customs, and 12,447 average positions. This was a reduction of 954 positions, 612 out of inspection and control; 310 in tariff and trade enforcement: and 32 in tactical interdiction.

The Congress rejected this recommendation, and instead provided 13,418 positions and $650 million for Customs.

For fiscal year 1986, the President requested only 12,531 average positions, and $639 million for Customs. This was another recommended cut of 887 positions, 351 in inspection and control: 437 in tariff and trade; 60 in tactical interdiction; and 39 in investigations.

Again, the Congress rejected this recommendation and for this year provided 14,041 average positions and $717 million, which was subsequently reduced by Gramm/Rudman to $682 million and 13,264 positions. Fortunately, this cutback was reversed in the supplemental, restoring the original appropriation.

For this year, the year of the "War on Drugs", for which the President has proclaimed his "full" support, he again requested a cutback in customs personnel, only requesting 12,494 positions and $693 million. This represents a cut of 770 positions, 427 out of inspection and control; 241 out of tariff and trade enforcement; 50 in tactical interdiction and 52 in investigations.

It is clear that when it comes to putting money behind the rhetoric, this administration has shied away from the task. How can we expect to control drug trafficking in our country, our communities and schools if we slash the number of inspectors at our borders, cut our tactical interdiction teams and reduce investigations units of the U.S. Customs Service? The answer is simple. We cannot.

That is why the subcommittee has recommended an increase of 2,397 positions above the administration's request. We need these positions. The time has come to put our money where our mouths are, and the time has come for this House to take a clear and decisive step in funding the front line effort in our war on drugs. I would urge Members to support the subcommittee's recommendation and reject any attempt to reduce it through across-the-board reductions.

The CHAIRMAN. Are there further amendments to the bill?

Mr. COBEY. Mr. Chairman, I move to strike the last word.

I wanted these few minutes to tell my colleagues of an important amendment that I would like to offer to this bill. My amendment would instruct the Federal Election Commission to uphold recent Supreme Court rulings such as Abood versus Street, Ellis-Fails, and most recently the Hudson case where the Court ruled against the use of compulsory union dues for politics.

Despite these clear-cut prohibitions against the use of forced dues for politics, the Federal Election Campaign Act remains silent on the problem. Dissenting workers still face complicated, expensive lawsuits to recover misspent compulsory union dues.

There was a hearing on this very issue last year, but still no action has taken place and we do not foresee any statutory remedies to this grave injustice.

It is time that we fulfill our obligation and make the right decision.

I tried to offer my amendment last year, but failed to gather enough support to defeat the motion to rise. Many Members said they would have supported me in my attempt to defeat this procedure, but were unaware of what I was trying to do. This is the third time in the last couple weeks that I have related to this body my intentions.

This is a right-to-work vote and I need your support in order to get an up-or-down vote on my amendment.

Please vote to defeat the motion to rise and thereby allow the working men and women of this country who are forced to pay union dues to be finally treated fairly under the law.

Mr. DANNEMEYER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to congratulate my colleague, the gentleman

from North Carolina [Mr. COBEY] for giving the House the opportunity to vote on a very important matter, namely, the ability of workers in America to have a say as to how their union dues will be used, that is to say, only for the purpose of legitimate organized labor organizing matters relating to collective bargaining and such, and not for political purposes.

The way this issue should be presented to the House for a vote is on an authorization bill. We had the FEC authorization bill up last year, not under ordinary procedures so that an amendment could have been offered to it to reach this issue, no, it was brought on suspension. We defeated it on suspension.

It should come back to the floor, the authorization measure, so that those of us who have the persuasion of our colleague, the gentleman from North Carolina [Mr. COBEY] can have an opportunity to put an amendment to that bill to reach the issue at hand so that substantively we can vote up or down on whether we want to do that; but the leadership of this House does not choose to give us the opportunity of voting up or down. It forces those of us who want to present this issue to the House to utilize the only method available to attempt to place a limitation on a spending bill. Frankly, I do not like that. I think it is awkward. It gives those to whom we are accountable a false message as to whether we are voting on the procedure or whether we are voting on the substance. Maybe that is done deliberately. Perhaps it is.

Now, you may question in your mind, well, do we really need this amendment that the gentleman from North Carolina [Mr. COBEY] seeks to offer?

The regulatory agency that we are talking about proposed some regulations 3 years ago that proposed to authorize union dues to be used for political purposes.

Now, you ask the question, what in the world is the FEC doing in the face of decisions of the U.S. Supreme Court which state clearly that that cannot be done?

The answer is, in our political system the power of those in the organized labor movement to use union dues, some of which are collected over the objection of the employee for political purposes, is so profound that that power has worked itself into proposed regulations of the FEC that are at variance with decisions of the U.S. Supreme Court, the highest court in the land, on the issue. It boggles the mind of the arrogance of the regulators.

So we who are supposed to be setting policy by statute or substantive law should be doing this attached to an authorization measure. For the reasons that I have just related, we cannot do that, so we are here seeking your permission to keep this committee from rising in this convoluted process so that we can offer this amendment, sponsored by my colleague, the gentleman from North Carolina [Mr. COBEY] that will give the Members of the body an opportunity of saying whether or not persons working in organized labor in America can say that their dues shall not be used for political purposes, when those views for political purposes are at variance with the person who pays the dues. It is a very simple, fundamental right.

Mr. Chairman, I would like to congratulate my colleague, the gentleman from North Carolina [Mr. COBEY] for his leadership, and I hope the House will have the judgment and the wisdom to keep the committee from rising so that this amendment can be offered.

Mr. NIELSON of Utah. Mr. Chairman, I move to strike the last word.

Mr. Chairman, a year ago last June, I stood before this body to address a matter I felt very strongly about—the need for the Federal Elections Commission to promulgate regulations to bring its enforcement of Federal election law in line with the Supreme Court. Unfortunately, I find it necessary to speak out once more on the same subject, because the FEC has failed to act responsibly.

The issue concerns the violation of workers' first amendment rights. In 29 States, American workers can be required—as a condition of employment—to contribute financially to a labor organization through compulsory union dues. The assumption is that these nonunion workers derive benefits from the collective-bargaining activities of the union, and therefore should help defray some of the costs involved. Unfortunately, many unions are using this money to further their political agenda rather than for pursuing legitimate economic objectives.

The Supreme Court has declared such political use of compulsory dues money a violation of first amendment rights. No person—whether union or nonunion, Republican or Democrat—should be forced to finance political activities that run contrary to their own personal viewpoint. Is there anyone here who disagrees with this?

Where are the champions of workers' rights when they need us? Or do we only champion workers' rights when the worker carries a union card? This injustice must be corrected. Obviously the FEC is unwilling to act, so Congress must. It's that simple. I urge all of you to join me in voting "no" on the motion to rise, so that we can give the Cobey amendment and this important issue fair and full consideration.

□ 1635

Mr. ROYBAL. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The CHAIRMAN. The gentleman's motion is nondebatable.

The question is on the motion offered by the gentleman from California [Mr. ROYBAL].

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. COBEY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 249, noes 168, not voting 14, as follows:

□ 1645

Mr. PICKLE changed his vote from "aye" to "no."

Mr. TAUZIN and Mr. SPRATT changed their votes from "no" to "aye."

So the motion was agreed to.

The result of the vote was announced as above recorded.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WEAVER) having assumed the chair, Mr. BEILENSON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5294) making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending September 30, 1987, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. Is a separate vote demanded on any amendment?

□ 1655

Mr. FRANK. Mr. Speaker, I demand a separate vote on the amendments adopted on Friday by which $3 million was taken from the Office of the Secretary of the Treasury and transferred to the Coast Guard, the amendments offered by the gentleman from Pennsylvania [Mr. WALKER].

The SPEAKER pro tempore. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The Clerk will report the amendments on which separate vote has been demanded.

The Clerk read as follows:

Amendments: In title I, on page 2, line 17, strike "$55,642,000" and insert in lieu thereof "$52,642,000".

In title I, on page 5, line 16, strike "$793,000,000" and insert in lieu thereof "$796,000,000".

The SPEAKER pro tempore. The question is on the amendments.

The question was taken; and the Speaker announced that the ayes appeared to have it.

RECORDED VOTE

Mr. FRANK. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 387, noes 30, answered "present" 1, not voting 13, as follows:

□ 1705

Mr. AKAKA and Mr. PARRIS changed their votes from "aye" to "no."

Mr. TAYLOR and Mr. ALEXANDER changed their votes from "no" to "aye."

So the amendments were agreed to.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken, and the Speaker announced that the ayes appeared to have it.

□ 1720

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## LEGISLATIVE PROGRAM

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, I take this time so that I may tell the Members what the plan for the rest of the evening is.

Mr. Speaker, there has been ongoing an effort to achieve agreement on the nature of a rule for the further consideration of the Department of Defense authorization bill, and some difficulties have arisen. There still are one or two unresolved questions.

□ 1730

Therefore, it will be the purpose of the leadership at this time to consider the rule on the surface transportation bill. Further program will be announced later.

It is possible that we may continue with consideration of the surface transportation bill. It is possible that we may return to the consideration of additional rules for further debate on

the Department of Defense authorization bill.

At this time, we hope to take up the surface transportation rule. Following that, we will announce any further program for the day.

## GENERAL LEAVE

Mr. ROYBAL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous material, on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

## SURFACE TRANSPORTATION AND UNIFORM RELOCATION ASSISTANCE ACT OF 1986

Mr. BEILENSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 513 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 513

*Resolved*, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3129) to authorize funds for construction of highways, for highway safety programs, and for mass transportation programs, to expand and improve the relocation assistance program, and for other purposes, and the first reading of the bill shall be dispensed with. All points of order against the consideration of the bill for failure to comply with the provisions of sections 302(c), 302(f), and 311(a) of the Congressional Budget Act of 1974, as amended (Public Law 93-344, as amended by Public Law 99-177), and with the provisions of clause 2(l)(3)(B) of rule XI, are hereby waived. After general debate, which shall be confined to the bill and to the amendments made in order by this resolution and which shall continue not to exceed two hours, with one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works and Transportation, and one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Public Works and Transportation now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, said substitute shall be considered for amendment by titles instead of by sections and each title shall be considered as having been read, and all points of order against said substitute for failure to comply with the provisions of section 302(f) of the Congressional Budget Act of 1974, as amended, with the provisions of clause 5(a) of rule XXI, and with the provisions of clause 1(p)(3) of rule X, are hereby waived. After the consideration of all other amendments to said substitute, the amendment adding a new title to said substitute recommended by the Committee on Ways and Means printed in the Congressional Record of July 23, 1986, shall be considered to have been adopted in the House and in the Committee of the Whole, and no further amendment to said substitute shall be in order. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute, subject to the preceding sentence. The previous question shall be considered as ordered on the bill and amendments thereto to find passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER. The gentleman from California [Mr. BEILENSON] is recognized for 1 hour.

Mr. BEILENSON. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee [Mr. QUILLEN], for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 513 is a modified open rule providing for consideration of H.R. 3129, the Surface Transportation and Uniform Assistance Act of 1986. The rule provides 2 hours of general debate, 1 hour to be equally divided and controlled by the chairman and ranking minority member of the Public Works Committee, the other hour to be equally divided and controlled by the chairman and ranking minority member of the Ways and Means Committee.

Mr. Speaker, the rule waives several points of order and these waivers deserve a full explanation. First, the rule waives sections 302(c) and 311(a) of the Congressional Budget Act against consideration of the bill. The reason for both waivers is that the bill, as introduced, provides new budget authority first effective in fiscal year 1986. The Public Works Committee reported a substitute, which the rule makes in order as original text for purposes of amendment. The substitute does not provide spending in fiscal year 1986 and complies fully with sections 302(c) and 311(a) of the Budget Act. Technically, however, we must waive those sections of the Budget Act against consideration of the bill in order to consider the committee substitute.

The rule also waives section 302(f) of the Budget Act against consideration of the bill and the substitute. Section 302(f) prohibits consideration of a measure that would exceed the appropriate program-level allocation of discretionary budget authority. The substitute exceeds the committee's allocation for programs covered in H.R. 3129. However, the Public Works Committee reported H.R. 3129 on the day before the budget conference reached agreement. When the Public Works Committee reported its bill, the committee acted on the basis of an understanding about where the budget conference would come out. At that time, the Public Works Committee believed H.R. 3129 would be $75 million under the subcommittee's 302(b) allocation.

Nevertheless, we have now adopted a budget resolution, and the bill and substitute would exceed the allocation for highway and related programs. In order to consider the bill and the substitute, the House must waive section 302(f) of the Budget Act. It is with reluctance that I support the waiver. During the Rules Committee hearing I expressed my reservations, as did the chairman and other members of the committee. I support the waiver now to allow the House to work its will on the measure and I expect the House to adopt an amendment bringing the bill within the constraints of the budget. In that regard, Chairman HOWARD of the Public Works Committee told the Rules Committee "$290 million would have to be cut from the bill and that would be done by amendment on the floor." I also point out that the Public Works Committee has cut that amount in the committee's portion of the reconciliation bill.

The rule waives clause 2(l)(3)(B), rule XI. Rule XI requires committee reports to compare amounts provided in the bill with amounts in the committee's 302(b) allocation. The Public Works Committee reported long before committees received their allocations or subdivided them. Thus, the committee report does not contain the required comparison. The purpose of the rule, however, is to make sure members are aware of how each measure fits into the broad budget picture. On this bill, we are all aware of the budget situation.

The rule waives clause 5(a) of rule XXI. Clause 5(a) of rule XXI prohibits appropriations in a legislative bill. The rule also waives clause 1(p)(3) of rule X, which prohibits consideration of general legislation containing provisions relating to a specific road.

The rule makes the Public Works Committee's substitute in order as original text for purposes of amendment under the 5-minute rule and the substitute will be read by title.

Finally, Mr. Speaker, the rule provides that after all other amendments to the substitute have been considered, the Ways and Means Committee amendment—printed in the RECORD of July 23—shall be considered to have been adopted.

Mr. Speaker, now that I have explained what is in the rule, I should discuss one matter that is not included. The Public Works Committee requested a rule waiving germaneness so that the House might consider an amendment taking the highway, air-

port, and inland waterways trust funds off-budget. The amendment would also insulate the trust funds from reconciliation and exempt them from Gramm-Rudman reductions. The Rules Committee did not make the amendment in order. The question of Gramm-Rudman exemptions and off-budget status is in the jurisdiction of another committee. The Rules Committee heard from four chairmen of affected committees: They all asked that we not make the amendment in order. Moreover, the Nation faces serious budget constraints. While no one questions the importance of Federal aid to highways, mass transit, and airway and airport development, it is not fair to advantage trust fund financed programs by exempting them from sequestration and from reconciliation. Such action will add to the burden borne by other important programs, like defense and low-income programs, which cannot charge user fees. Last, there is little dobut the issue will be revisited in the near future.

Mr. Speaker, I thank my colleagues for their patience in listening to my explanation of the rule and I urge adoption of the rule.

□ 1740

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, the rule has been ably explained; however, there is one situation that developed in the Rules Committee that I think I should report to the full House.

Mr. Speaker, the majority side of the Rules Committee made a mistake, in my opinion, when this rule was reported out. They refused to allow the House to consider an amendment by the chairman of the Committee on Public Works, the gentleman from New Jersey [Mr. HOWARD], who is one of the most respected chairman in the House. The amendment presented an important issue. It is an issue which is not going to go away. The amendment would have provided for taking the highway, mass transit, aviation and inland waterways trust funds off budget.

Mr. Speaker, these trust funds are self-supporting and the dedicated funds cannot be used for purposes other than transportation improvements as provided by law. To include these funds in the overall budget deceives the public, for it implies that the trust funds are available for other purposes and it understates the real deficit.

Moreover, these programs have not contributed one penny to the deficit. In fact, if all Federal programs worked as well, the entire Federal budget would be in balance.

Mr. Speaker, in the Rules Committee, the objection was raised that if one committee takes these trust funds off budget, all committees will want to take trust funds off budget. What is wrong with that?

The representatives from the Public Works Committee responded by noting that their situation is unique. These trust funds already exist and they cannot be used for any other purpose. They cannot run at a deficit, according to the testimony by the Public Works Committee.

Mr. Speaker, naturally, I was disappointed that the amendment was not made in order, but I am happy to see this surface transportation bill on the floor of the House. I hope the rule will be adopted.

Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding me the time.

Mr. Speaker, there is no excuse for this rule being brought to the House floor. I am disappointed that both the majority and the minority are coming to the floor suggesting that we ought to vote for this rule, because this rule has some of the biggest, "baddest" budget waivers we have ever had brought before this House.

In fact, not only do we have budget waivers in this rule, but we also have the opinion of the Budget Committee that those waivers never should have been granted. I do not remember any other time when the chairman of the Budget Committee has sent a letter to the Rules Committee suggesting that they not approve a rule with these waivers in it, and yet here we have a letter from the chairman of the Budget Committee telling the Rules Committee: "A majority"—meaning a majority of the Budget Committee—"would oppose a waiver of section 302(f) of the Budget Act against consideration of H.R. 3129."

The Budget Committee specifically told the Rules Committee not to approve a 302(f) waiver and the Rules Committee went ahead and approved it anyway. Not only did they approve a 302(f) waiver, they also approved a 302(c) waiver, a 311(a) waiver, and, in addition, they have approved the waivers of rule XI, clause 2; so that we have in this rule a very, very big budget-busting attempt.

These particular provisions that I cite out of the Budget Act are aimed at trying to prevent the committee from bringing to the floor a bill that is over the committee allocation. That is what this does, and also from introducing a bill that is over their spending ceiling. That is exactly what happened here.

Now we have the Rules Committee coming to us with a rule saying, "Forget that. We are going to approve this committee to come to the floor with these major budget waivers."

I do not think that Members who actually believe that we are doing something serious about the budget process can in any way vote for this rule. To vote for this rule is to vote to simply waive the budget process and allow the spending to go forward.

I would hope that Members would reject completely this rule. The Rules Committee has brought to us a terrible bill, if you are interested in preserving the budget process.

Mr. QUILLEN. Mr. Speaker, I urge adoption of this rule if it comes up on the floor this evening so that we can get down to the debate and finish it.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BEILENSON. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 302, nays 102, not voting 27, as follows:

□ 1755

Mr. DELAY, Mr. RALPH M. HALL, and Mrs. SCHNEIDER changed their votes from "yea" to "nay."

Mr. MCKINNEY and Mr. MCCANDLESS changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER. Pursuant to House Resolution 513 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3129.

□ 1804

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3129) to authorize funds for construction of highways, for highway safety programs, and for mass transportation programs, to expand and improve the relocation assistance program, and for other purposes, with Mr. FLIPPO in the chair.

The Clerk read the title of the bill.

□ 1805

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from New Jersey [Mr. HOWARD] will be recognized for 30 minutes, the gentleman from Pennsylvania [Mr. SHUSTER] will be recognized for 30 minutes, the gentleman from Illinois [Mr. ROSTENKOWSKI] will be recognized for 30 minutes, and the gentleman from Tennessee [Mr. DUNCAN] will be recognized for 30 minutes.

The Chair recognizes the gentleman from New Jersey [Mr. HOWARD].

Mr. HOWARD. Mr. Chairman, I yield myself such time as I might consume.

Mr. Chairman, it is with great pride that we bring to the House H.R. 3129, Surface Transportation and Uniform Relocation Assistance Act of 1986. I want to commend our subcommittee chairman, GLENN ANDERSON, the ranking minority member of the committee, GENE SNYDER, the ranking minority of the subcommittee, BUD SHUSTER, and all of the other members of the Committee on Public Works and Transportation who worked so well together on this legislation. Passage of H.R. 3129 will ensure that the progress made in 1982 with enactment of the Surface Transportation Assistance Act will continue into the next decade.

The passage of this bill in the House will also provide the Congress with a unique opportunity to commemorate the 30th anniversary of the world's most extensive and heavily used transportation network, the Interstate Highway System. The Committee on Public Works and Transportation recognized the importance of this occasion on June 25 by approving the bill before the House today. The Interstate System is over 98 percent complete, and new construction is occurring at decreasing rates. However, we must not declare the Interstate System completed as some have suggested. Instead, we must continue to support construction of the remaining mileage and complete what today is known as the greatest public works project in the history of mankind.

Mr. Chairman, H.R. 3129 extends authorizations over the 1987-91 fiscal years for highways, highway safety, and mass transportation programs. A fourth title is also included, entitled the "Uniform Relocation Act Amendments of 1986." This title provides for the fair and equitable treatment for persons displaced as a result of Federal or federally assisted programs or projects. The Committee on Ways and Means will provide the fifth title, the revenue title, to extend the authorization of the highway trust fund through fiscal year 1993.

The highway title authorizes $13.9 billion a year from the highway trust fund. The principal areas addressed are interstate completion, bridge rehabilitation-replacement and the Interstate 4R Program. To complete the Interstate System, $3.3 billion per year through fiscal year 1992 and an additional $1.7 billion in fiscal year 1993 are authorized. Congressional approval of the interstate cost estimate and the interstate substitute cost estimate will authorize completion of interstate and interstate substitute projects. The Bridge Discretionary Program is increased to provide additional funding for high-cost bridge projects.

A major revision of the Interstate 4R distribution formula has been made to correlate the system's need with the level of its use. Funds will be apportioned based 50 percent on vehicle miles traveled and 25 percent each on gasoline and diesel fuel consumption. Furthermore, $200 million is set aside annually from the authorized amounts for the Interstate 4R Program to fund discretionary Interstate

4R projects. Greater flexibility will be allowed in transferring funds between Interstate 4R and primary construction projects.

In addition, $100 million will be added to the unobligated balance of current State entitlements under the Interstate Transfer-Transit Program in order to offset anticipated future inflation in transit construction costs.

Several studies are authorized which will focus on the rural-urban distribution of funds, the equity of apportionment formulas, and the feasibility of constructing certain highway projects. H.R. 3129 also includes a number of highway projects to demonstrate the latest techniques for accomplishing certain safety and transportation objectives.

Title II of the bill continues requirements to encourage and enhance highway safety programs. Since enactment of the 55-mile-per-hour speed limit in 1974, there has been a substantial reduction in fatality rates on the Nation's highways. The committee continues to recognize and support the importance of the 55-mile-per-hour speed limit. As recommended by a recent study of the Transportation Research Board, a compliance formula has been adopted to attach greater emphasis to the higher speed violation and to violations which occur on lower design highways.

The safety belt and alcohol incentive grant programs are continued with minor modifications. Authorizations are extended for the development and implementation of programs to enforce commerical motor vehicle safety laws and regulations. Contract authority out of the highway trust fund in the amount of $50 million annually for each of the fiscal years 1987-91 is provided to the States for the enforcement of motor vehicle safety laws and regulations.

Title III of the bill continues the current structure of the Mass Transit Program, which provides for a greater proportion of the funds to be distributed by formula. The total amount authorized is approximately $4.1 billion per fiscal year for the period 1987-91. The section 3 discretionary captial program, which is funded by the penny-a-gallon gasoline tax authorized by the Congress, will be allocated for traditional public transportation purposes. The section 3 funds will be allocated as follows: 40 percent for new rail starts and extensions to existing systems; 40 percent for rail modernization; 10 percent for bus and bus facilities; and 10 percent for use at the discretion of the Secretary. Statutory criteria is established for new rail projects, relying heavily on such factors as the results of alternatives analysis, local political support for project capital and operation, and cost-effectiveness. The annual process for congressional review and approval of section 3 allocations will permit the Urban Mass Transportation Administration to enter into multiyear contracts for major capital investments. The bill strengthens the Buy America provisions which also pertain to such investments.

Title IV, the Uniform Relocation Act Amendments of 1986, seeks to acheive a degree of uniformity not achieved in the original act; it would do so by vesting responsibility in a lead agency—the Department of Transportation—for development of Governmentwide regulations assuring consistency of, among other things, coverage in terms of eligibility and benefits provided to persons displaced as a direct result of Federal projects or federally assisted programs or projects. A State certification process is also provided in the bill which will result in more effective implementation of the act.

Mr. Chairman, we feel the proposed authorizations in this bill are more than warranted considering our Nation's extensive needs in the area of surface transportation. The committee has reluctantly lowered authorization levels below those for fiscal year 1986 in order to preserve the integrity of the highway trust fund. Funding levels contained in H.R. 3129 are consistent with the funding levels projected by CBO as sustainable by the highway trust fund over the next 5 years at current tax rates. H.R. 3129 represents the committee's efforts to bring forward a realistic and responsible piece of legislation which addresses the increasing transportation needs of the Nation.

Mr. Chairman, I urge my colleagues to support the committee bill.

Mr. SHUSTER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to say to you, and the ranking minority member, Mr. SNYDER, that I am pleased with both the content of this legislation, and the fact that we are bringing it before the Members of the House at this time.

This bill extends the basic programs of highway construction, highway safety, and public transit for 5 years. The funding levels included in this measure are consistent with what will probably emerge from the budget conference. For the outyears of this bill, the funding levels reflect the constraints of Gramm-Rudman, and the projected revenues into the trust fund. These reauthorizations constitute by far the bulk of this measure.

The work on this legislation began months ago. Using as a base, H.R. 5504, which died during the final days of the last Congress due to the other bodies in action, the committee fashioned H.R. 3129. Last week at the subcommittee markup, it was my pleasure to introduce the substitute to H.R. 3129 which is before you today.

The timing of this legislation is of great importance. We must not fail to reauthorize these programs during this Congress. The authorizing legislation expires on September 30, 1986. It would be unthinkable to not extend these programs and the trust funds which back them up; unfortunately, the unthinkable does sometimes happen. We must not leave anything to chance, nor should we leave any excuses out there for anyone on the other side of the Capitol to delay this process. We must move ahead quickly and forcefully. Mr. Chairman, I look forward to acting on this must legislation.

Mr. HOWARD. Mr. Chairman, I yield such time as he may consume to the chairman of our Subcommittee on Surface Transportation, the gentleman from California [Mr. ANDERSON.]

Mr. ANDERSON. Mr. Chairman, I rise in strong support of this legislation, the Surface Transportation and Uniform Relocation Assistance Act of 1986.

H.R. 3129 must be enacted by September 30 at which time our Nation's highway, highway safety, and public transit programs expire. So, this bill which we have before us does reauthorize these programs for 5 years. Among its key features are the following: it assures completion of the Nation's Interstate System, it establishes a 4R Discretionary Program to help assure that our Nation's 4R moneys are focused on projects most in need, it provides some flexibility for the States to shift 20 percent of their 4R money to the primary system, it continues and makes permanent our 85-percent apportionment program, it provides a program to provide additional obligational authority for those States most in arrears, it helps assure that our Nation's highway system continues to be a safe one, and it allows us to more fully utilize the transit account of the highway trust fund.

The transportation needs facing our Nation are great. It has been said by the organization representing State highway and transportation agencies that our highway needs exceed $20 billion a year in Federal assistance. Our transit needs total about $35 billion over the next 5 years. This legislation, frankly, will not meet those needs. But given the budget circumstances which we must work under, it is the best we can do.

Mr. Chairman, H.R. 3129 is not a perfect bill. I support that every Member in this Chamber might like to see some changes in it. But, it is a bill that is in balance. It has been carefully and fairly crafted. It is a bill that should comfortably command the support of all our colleagues. I urge its prompt passage and enactment.

Mr. SHUSTER. Mr. Chairman, I yield such time as he may consume to

the gentleman from California [Mr. PACKARD].

Mr. PACKARD. Mr. Chairman, I rise in strong support of the bill.

Mr. SHUSTER. Mr. Chairman, before yielding to the distinguished ranking member of the full committee, the gentleman from Kentucky [Mr. SNYDER], I want the House to know, as most Members know, that the gentleman from Kentucky has announced his retirement while he is entirely too young to retire. Nevertheless, we hate to see him go. It is going to be quite a loss not only to our committee but to the entire country, and I know all of my colleagues join me in saluting the gentleman from Kentucky, Congressman GENE SNYDER, for an outstanding contribution not only to our committee, but to the United States of America.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. SHUSTER. I yield to the gentleman from New Jersey.

MR. HOWARD. Mr. Chairman, I just wish to state also for the record, during these years when this legislation from our committee has passed, which we think is excellent legislation, it would not have been that good at all without not only the cooperation but the expertise of the gentleman from Kentucky [Mr. SNYDER]. I join with the gentleman from Pennsylvania [Mr. SHUSTER] in his remarks.

Mr. SHUSTER. Mr. Chairman, I yield such time as he may consume to the distinguished gentleman from Kentucky [Mr. SNYDER].

Mr. SNYDER. Mr. Chairman, this bill as reported out of the full committee will provide a 5-year authorization of the Nation's highway and mass transit programs. This bill is an extension of the landmark legislation enacted in 1982 to address the critical transportation needs across this Nation. I believe this legislation represents the will of the House. I say this in a very real sense as we have already voted on a similar bill 2 years ago, H.R. 5504. That legislation passed by a vote of 297 to 73. Our starting point this session was H.R. 5504 with two major differences—reduced funding levels consistent with budgetary considerations and an extension of this program for 5 years.

This bill as reported out of full committee will provide a 5-year authorization of the Nation's highway and mass transit programs. This bill is primarily an extension of the landmark legislation enacted in 1982 to address the critical transportation needs across this Nation. Among the major features of this bill are: completion of the Interstate Highway System started some 30 years ago; continuation of the other major highway and transit programs; and provisions to provide relocation assistance to those displaced by transportation projects.

Mr. HOWARD. Mr. Chairman, I yield such time as he may consume to the gentleman from Oregon [Mr. AUCOIN].

Mr. AUCOIN. Mr. Chairman, I rise in support of H.R. 3129, the Surface Transportation Act of 1986, and I want to commend the Committee on Public Works and Transportation for developing a bill that is essential to continued Federal highway, mass transit, and safety activities.

While I could applaud the committee for so many elements of this bill, I will limit my comments to one particular provision.

Mr. Chairman, the committee has included a provision which to me epitomizes the spirit of cooperation between the public and private sectors in fostering local economic development. I want to thank in particular Chairman JIM HOWARD for his acceptance of the provision I brought to him which I expect will leverage substantial private sector economic growth in Washington County, OR.

Mr. Chairman, this is but one small element in a very good omnibus bill. I appreciate the committee's efforts and urge the House to support this legislation.

Mrs. VUCANOVICH. Mr. Chairman, I rise today in support of a demonstration project that is included in H.R. 3129 and is of utmost importance to the citizens of Nevada. This project is the Sparks Interchange Project and will be located in Sparks, NV.

For several years now, the Nevada delegation, in conjunction with the city of Sparks, has been diligently trying to obtain funding for this demonstration project. The reasons that made this such a worthy project in the past have only been intensified by the passage of time. As the city of Sparks has grown, so has the traffic congestion and, therefore, the need for additional access.

The city of Sparks is bisected by Interstate 80 and a set of railroad tracks. Traveling between the two sides of the city is extremely tedious and difficult. There are a limited number of accesses across or through the I-80 and railroad corridor. During rush hour, the congestion makes quick and rapid passage across town virtually impossible. This is not just a headache and an inconvenience; it presents a severe safety problem as cars are backed up onto the freeway for the on-ramp. Another one of my main concerns is regarding the stress this congestion puts on emergency vehicles that absolutely need to get across town quickly.

Not only is this a problem while in town, access to the city from the interstate poses a greater problem. This access problem has had an adverse impact on the economic development of Sparks. There is documentation that proves prospective businesses have passed Sparks up because of the difficult and unfavorable situation with our interstates. The Sparks Interchange project is imperative for continued economic growth.

A recent development is additional evidence of the importance of this project. The construction of this demonstration project would serve double-duty for flood control. In February of this year, Nevada was plagued by severe floods. The floods were so devastating, Nevada was declared a national disaster and received Federal assistance funds. Had the Sparks Interchange project been funded and completed when requested, it would have acted as a levy and prevented over 300 acres in this area from being flooded.

Mr. Chairman, this is a very important project for the people of Sparks and potential businesses considering doing business there. The city of Sparks has already spent $5 million of its own money to purchase rights-of-way for utilities and to finance the project design. The funding being asked for in H.R. 3129 is to be used totally for the construction of this project.

For all of the above reasons, I strongly urge this body to pass H.R. 3129 as reported from committee.

Mr. ALEXANDER. Mr. Chairman, I rise in strong support of the surface transportation bill. It is a long-awaited piece of legislation which has been carefully crafted.

The bill provides for the improvement of our Nation's highways and roads which are crucial to interstate commerce and business. But more importantly, these improvements will contribute to public safety and will ultimately save lives.

The bill authorizes a badly needed highway project for construction overpasses near Jonesboro AR. The bill also authorizes the appropriation of $13 million to complete this project over the period of 4 years. The bill calls for $2.5 million for fiscal year 1987, $3.2 million for fiscal year 1989, $2.6 million for fiscal year 1990, and $5 million for fiscal year 1991.

The bypass will be constructed along U.S. 63 which is the most traveled road in northeast Arkansas and is the main artery of my district, the First Congressional District of Arkansas. U.S. 63 passes through Jonesboro which is the largest city in the district. The stretch of road that goes through Jonesboro cuts across four major intersections with stoplights. These intersections have been the situs of numerous major traffic accidents causing unnecessary injuries and death. With these four overpasses, these tragic accidents will be avoided and numerous lives saved.

Another important provision of the bill allows States to use a portion of their bridge replacement funds to replace ferries. In Arkansas, drivers must depend on ferries to cross bodies of water in two places. This antiquated method of traversing rivers is unreliable, slow, and dangerous in bad weather. Bridges replacing these ferries will save time and facilitate travel.

Both of these projects reflect the Congress' intention of improving highway and road safety, increasing travel, facilitating commerce, and saving lives. I give my full support to this bill which outlines a wise national policy governing interstate transportation.

Mr. SHUSTER. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. HOWARD. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. The gentleman from Illinois [Mr. ROSTENKOWSKI] is recognized for 30 minutes.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise today in support of H.R. 3129, the Surface Transportation and Uniform Relocation Assistance Act of 1986. The Committee on Public Works and Transportation

has reported H.R. 3129 providing authorizations from the highway trust fund for fiscal years 1987-1991. The Committee on Ways and Means is aware that the antideficit provisions governing trust fund authorizations would require reduction in highway spending commitments beginning on October 1, 1986, unless action is taken to provide further funding for the trust fund. The committee believes that continued funding for the building and maintenance of our Nation's highways system is an important national objective.

Therefore, on July 23, 1986, the Committee on Ways and Means favorably reported an amendment to H.R. 3129, which deals with extension of the highway trust fund, including the mass transit account and the highway-related taxes which support the fund. This revenue amendment has been added as title V to the bill as reported from the Committee on Public Works and Transportation.

Title 5 would extend the present law highway trust fund excise taxes, and the authority to spend from the trust fund, for 5 years—through September 30, 1993. The highway trust fund would be updated to reflect the new authorizations in H.R. 3129, including highway beautification and university transportation research centers.

The committee amendment also reduces the 9-cents-per-gallon exemption for neat methanol and ethanol fuels to 6 cents per gallon, as provided in H.R. 3838, the Tax Reform Act, effective on January 1, 1987. Also included is a technical correction provision in H.R. 3838 with respect to providing a full refund of 15 cents per gallon of the diesel fuel tax for all school buses.

In response to a recent hearing held by the Subcommittee on Oversight on the issue of gasoline excise tax compliance and collection, the committee amendment directs the Treasury Department to submit a report to Congress regarding compliance with excise taxes on gasoline, diesel, and other motor fuels, aviation excise taxes, and tobacco and alcohol product, excise taxes. The report is due by December 31, 1986, with Treasury to expedite the study and report earlier with respect to the gasoline tax.

In order to continue the necessary funding for support of our Nation's highways, therefore, I urge my colleagues to support H.R. 3129.

□ 1815

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman from Tennessee [Mr. DUNCAN] is recognized for 30 minutes.

Mr. DUNCAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the Ways and Means committee amendment to H.R. 3129 was approved by voice vote. As far as I know, there was no controversy surrounding the amendment as it was discussed in committee, and I am aware of no opposition to it.

The amendment would, very simply, extend the Highway Trust Fund provisions, within the jurisdiction of the Committee on Ways and Means, for another 5 years, through September 30, 1993. The amendment also would reduce the special fuels tax on neat methanol and ethanol from 9 cents to 6 cents per gallon.

I support passage of the amendment and I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time for general debate has expired.

Pursuant to the rule, the committee amendment in the nature of a substitute recommended by the Committee on Public Works and Transportation now printed in the reported bill shall be considered by titles as an original bill for the purpose of amendment, and each title shall be considered as having been read.

After the consideration of all other amendments to said substitute, the amendment adding a new title to said substitute recommended by the Committee on Ways and Means printed in the CONGRESSIONAL RECORD of July 23, 1986, is considered as having been adopted and no further amendments to said substitute are in order.

The Clerk will designate section 1.

The text of section 1 is as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

*SECTION 1. SHORT TITLE; TABLE OF CONTENTS.*

*(a) SHORT TITLE.—This Act may be cited as the "Surface Transportation and Uniform Relocation Assistance Act of 1986".*

*(b) TABLE OF CONTENTS.—*

*Sec. 1. Short title; table of contents.*
*Sec. 2. Secretary defined.*

*TITLE I—FEDERAL-AID HIGHWAY ACT OF 1986*

*Sec. 101. Short title.*
*Sec. 102. Approval of interstate cost estimate and extension of interstate program.*
*Sec. 103. Approval of cost estimate and authorization of appropriations for Interstate substitute projects.*
*Sec. 104. Authorizations of appropriations for Interstate System construction.*
*Sec. 105. Obligation ceiling.*
*Sec. 106. Authorization of appropriations.*
*Sec. 107. Interstate 4R and primary formulas.*
*Sec. 108. Elimination of roadside obstacles.*
*Sec. 109. Relocation requirements.*
*Sec. 110. Contracting for engineering and design services.*
*Sec. 111. Limitations concerning South Africa on awards of contracts.*
*Sec. 112. Standardized contract clause concerning site conditions.*
*Sec. 113. Convict produced materials.*
*Sec. 114. Signs identifying funding sources.*
*Sec. 115. Advanced construction.*
*Sec. 116. Interstate discretionary funds.*
*Sec. 117. Flexibility of use of highway funds.*
*Sec. 118. Interstate 4R program.*

Sec. 310. Block grant program amendments.
Sec. 311. University transportation centers.
Sec. 312. Sole source procurements.
Sec. 313. Contracting for engineering and design services.
Sec. 314. Limitations concerning South Africa on awards of contracts.
Sec. 315. Bus remanufacturing and overhauling of rolling stock.
Sec. 316. Limitation on private enterprise participation.
Sec. 317. Bus testing.
Sec. 318. Preaward and postdelivery audit of bus purchases.
Sec. 319. Federal share for elderly and handicapped projects.
Sec. 320. Authorization for appropriations.
Sec. 321. Construction management oversight.
Sec. 322. Bicycle facilities.
Sec. 323. Transit technical amendments.
Sec. 324. Multi-year contract for metro rail project.
Sec. 325. Multi-year contract for transit bridge lanes.
Sec. 326. Increased operating assistance during construction of interstate project.
Sec. 327. Feasibility study.
Sec. 328. Feasibility study of abandoned trolley service.
Sec. 329. Comprehensive transit plan for the Virgin Islands.
Sec. 330. Bus carrier certificates for recipients of governmental assistance.
Sec. 331. Utilization requirement for certificates authorizing intrastate bus operations.

TITLE IV—UNIFORM RELOCATION ACT AMENDMENTS OF 1986

Sec. 401. Short title.
Sec. 402. Definitions.
Sec. 403. Certification.
Sec. 404. Declaration of findings and policy.
Sec. 405. Moving and related expenses.
Sec. 406. Replacement housing for homeowner.
Sec. 407. Replacement housing for tenants and certain others.
Sec. 408. Relocation planning, assistance coordination, and advisory services.
Sec. 409. Housing replacement by Federal agency as last resort.
Sec. 410. Assurances.
Sec. 411. Federal share of costs.
Sec. 412. Duties of lead agency.
Sec. 413. Payments under other laws.
Sec. 414. Transfer of surplus property.
Sec. 415. Repeals.
Sec. 416. Uniform policy on real property acquisition practices.
Sec. 417. Assurances.
Sec. 418. Effective date.

The CHAIRMAN. Are there any amendments to section 1?

If not, the Clerk will designate section 2.

The text of section 2 is as follows:

*SEC. 2. SECRETARY DEFINED.*

*As used in this Act, the term "Secretary" means the Secretary of Transportation.*

Mr. HOWARD. Mr. Chairman, if it is proper, I would like to ask unanimous consent that titles I, II, III, and IV, which I believe are the Public Works titles of the legislation; title V being the Ways and Means title, be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There being no objection.

The texts of titles I, II, III, and IV are as follows:

*TITLE I—FEDERAL-AID HIGHWAY ACT OF 1986*

*SEC. 101. SHORT TITLE.*

*This title may be cited as the "Federal-Aid Highway Act of 1986".*

*SEC. 102. APPROVAL OF INTERSTATE COST ESTIMATE AND EXTENSION OF INTERSTATE PROGRAM.*

*(a) FISCAL YEAR 1988.—The Secretary shall apportion for fiscal year 1988 the sums authorized to be appropriated for such year by section 108(b) of the Federal-Aid Highway Act of 1956 for expenditure on the National System of Interstate and Defense Highways, using the apportionment factors contained in revised table 5 of the committee print numbered 99-39 of the Committee on Public Works and Transportation of the House of Representatives.*

*(b) EXTENSION OF INTERSTATE PROGRAM THROUGH FISCAL YEAR 1993.—*

*(1) EXTENSION OF ICE APPROVAL PROCESS.—Section 104(b)(5)(A) of title 23, United States Code, is amended by inserting after "September 30, 1990." the following: "The Secretary shall make a revised estimate of the cost of completing the then designated Interstate System after taking into account all previous apportionments made under this section in the same manner as stated above, and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1989. Upon the approval by Congress, the Secretary shall use the Federal share of such approved estimates in making apportionments for the fiscal years 1991, 1992, and 1993.".*

*(2) CONFORMING AMENDMENT.—The second paragraph of section 101(b) of such title is amended (A) by striking out "thirty-four years'" and inserting in lieu thereof "thirty-seven years' ", and (B) by striking out "1990" and inserting in lieu thereof "1993".*

*SEC. 103. APPROVAL OF COST ESTIMATE AND AUTHORIZATION OF APPROPRIATIONS FOR INTERSTATE SUBSTITUTE PROJECTS.*

*(a) FISCAL YEAR 1987.—The Secretary shall apportion for fiscal year 1987 the sums to be apportioned for such year under section 103(e)(4) of title 23, United States Code, for expenditure on substitute highway and transit projects, using the apportionment factors contained in the committee print numbered 99-40 of the Committee on Public Works and Transportation of the House of Representatives.*

*(b) AUTHORIZATION OF APPROPRIATIONS; PERIOD OF AVAILABILITY OF APPORTIONED FUNDS; EXTENSION OF SUBSTITUTE ICE APPROVAL PROCESS.—Section 103(e)(4) of title 23, United States Code, is amended to read as follows:*

*"(4) INTERSTATE SUBSTITUTE PROGRAM.—*

*"(A) WITHDRAWAL OF APPROVAL.—Upon the joint request of a State Governor and the local governments concerned, the Secretary may withdraw his approval of any route or portion thereof on the Interstate System which was selected and approved in accordance with this title, if he determines that such route or portion thereof is not essential to completion of a unified and connected Interstate System and if he receives assurances that the State does not intend to construct a toll road in the traffic corridor which would be served by the route or portion thereof.*

*"(B) SUBSTITUTE PROJECTS.—When the Secretary withdraws his approval under this paragraph, a sum equal to the Federal share of the cost to complete the withdrawn route or portion thereof, as that cost is included in the latest Interstate System cost estimate approved by Congress, or up to and including the 1983 interstate cost estimate, whichever is earlier, subject to increase or decrease, as determined by the Secretary based on changes in construction costs of the withdrawn route or portion thereof as of the date of approval of each substitute project under this paragraph, or the date of approval of the 1983 interstate cost estimate, whichever is earlier, shall be available to the Secretary to incur obligations for the Federal share of either public mass transit projects involving the construction of fixed rail facilities or the purchase of passenger equipment including rolling stock, for any mode of mass transit, or both, or projects authorized under any highway assistance program under this section; or both, which will serve the area or areas from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the area or areas to be served, and which are selected by the Governor or the Governors of the State or the States in which the withdrawn route was located if the withdrawn route was not within an urbanized area or did not pass through and connect urbanized areas, and which are submitted by the Governors of the States in which the withdrawn route was located.*

*"(C) DEADLINE FOR APPROVAL AND WITHDRAWAL.—Substitute projects under this paragraph may not be approved by the Secretary under this paragraph after September 30, 1983, and the Secretary shall not approve any withdrawal of a route under this paragraph after such date; except that (i) with respect to any route which on the date of the enactment of the Federal-Aid Highway Act of 1978 was under judicial injunction prohibiting its construction, the Secretary may approve substitute projects and withdrawals on such route until September 30, 1986; and (ii) with respect to any route which on May 12, 1982, was under judicial injunction prohibiting its construction, the Secretary may approve substitute projects and withdrawals on such route until September 30, 1985.*

*"(D) PROJECT APPROVAL; FEDERAL SHARE.—Approval by the Secretary of the plans, specifications, and estimates for a substitute*

project shall be deemed to be a contractual obligation of the Federal Government. The Federal share of each substitute project shall not exceed 85 percent of the cost thereof.

"(E) AVAILABILITY OF FUNDS FOR SUBSTITUTE PROJECTS.—

"(i) TIME PERIOD.—The sums apportioned and the sums allocated under this paragraph for public mass transit projects shall remain available for the fiscal year for which apportioned or allocated, as the case may be, and for the three succeeding fiscal years. The sums apportioned and the sums allocated under this paragraph for projects under any highway assistance program shall remain available for the fiscal year for which apportioned or allocated, as the case may be, and for the three succeeding fiscal years.

"(ii) REAPPORTIONMENT.—Any sums which are apportioned or allocated to a State for a fiscal year and are unobligated (other than an amount which, by itself, is insufficient to pay the Federal share of the cost of a substitute project which has been submitted by the State to the Secretary for approval) at the end of the second fiscal year succeeding such fiscal year shall be apportioned or allocated, as the case may be, among those States which have obligated all sums (other than such an amount) apportioned or allocated, as the case may be, to them for such second succeeding fiscal year. Such reapportionments shall be in accordance with the latest approved estimate of the cost of completing substitute projects, and such reallocations shall be at the discretion of the Secretary.

"(F) ADMINISTRATION OF TRANSIT FUNDS.—The sums obligated for mass transit projects under this paragraph shall become part of, and be administered through, the Urban Mass Transportation Fund.

"(G) AUTHORIZATION OF APPROPRIATIONS FOR HIGHWAY PROJECTS.—For the fiscal year ending September 30, 1983, $257,000,000 shall be available out of the Highway Trust Fund for expenditure at the discretion of the Secretary for projects under highway assistance programs. There shall be available, out of the Highway Trust Fund (other than the Mass Transit Account), to the Secretary for expenditure under this paragraph for projects under highway assistance programs $700,000,000 per fiscal year for each of fiscal years 1984 and 1985, $693,825,000 for fiscal year 1986, and $825,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991.

"(H) DISTRIBUTION OF SUBSTITUTE HIGHWAY FUNDS.—

"(i) BETWEEN DISCRETIONARY AND APPORTIONED PROGRAMS.—Twenty-five percent of the funds made available by subparagraph (G) for each of fiscal years 1984, 1985, 1986, 1987, 1988, 1989, 1990, and 1991 for substitute highway projects under this paragraph shall be distributed at the discretion of the Secretary. The remaining 75 percent of such funds shall be apportioned in accordance with cost estimates approved by Congress.

"(ii) FY 1984 APPORTIONMENT.—The Secretary shall make an estimate of the cost of completing substitute highway projects under this paragraph and transmit the same to the Senate and the House of Representatives as soon as practicable after the date of enactment of the Highway Improvement Act of 1982. Upon approval of such cost estimate by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute highway projects for fiscal year 1984.

"(iii) FY 1985, 1986, AND 1987 APPORTIONMENTS.—The Secretary shall make a revised estimate of the cost of completing substitute highway projects under this paragraph and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1984, and upon approval by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute highway projects for fiscal years 1985, 1986, and 1987.

"(iv) FY 1988, 1989, 1990, AND 1991 APPORTIONMENTS.—The Secretary shall make a revised estimate of the cost of completing substitute highway projects under this paragraph and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1987. Upon approval by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute highway projects for fiscal year 1988. Subject to changes in State estimates in the division of funds between substitute highway and transit projects, subject to amounts made available in prior fiscal years, and subject to the availability and reapportionment of funds under subparagraph (E), the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute highway projects for fiscal years 1989, 1990, and 1991.

"(I) AUTHORIZATION OF APPROPRIATIONS FOR TRANSIT PROJECTS.—There are authorized to be appropriated for liquidation of obligations incurred for substitute transit projects under this paragraph the sums provided in section 4(g) of the Urban Mass Transportation Act of 1964.

"(J) DISTRIBUTION OF SUBSTITUTE TRANSIT FUNDS.—

"(i) BETWEEN DISCRETIONARY AND APPORTIONED PROGRAMS.—Fifty percent of the funds appropriated for each fiscal year beginning after September 30, 1983, for carrying out substitute transit projects under this paragraph shall be distributed at the discretion of the Secretary. The remaining 50 percent of such funds shall be apportioned in accordance with cost estimates approved by Congress.

"(ii) FY 1984 APPORTIONMENT.—The Secretary shall make an estimate of the cost of completing substitute transit projects under this paragraph and transmit the same to the Senate and the House of Representatives as soon as practicable after the date of the enactment of the Highway Improvement Act of 1982. Upon approval of such cost estimate by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute transit projects for fiscal year 1984.

"(iii) FY 1985, 1986, AND 1987 APPORTIONMENTS.—The Secretary shall make a revised estimate of the cost of completing substitute transit projects under this paragraph and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1984, and upon approval by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute transit projects for fiscal years 1985, 1986, and 1987.

"(iv) FY 1988, 1989, 1990, AND 1991 APPORTIONMENTS.—The Secretary shall make a revised estimate of the cost of completing substitute transit projects under this paragraph and transmit the same to the Senate and the House of Representatives within ten days subsequent to January 2, 1987. Upon approval by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute transit projects for fiscal years 1988. Subject to changes in State estimates in the division of funds between substitute highway and transit projects, subject to amounts made available in prior fiscal years, and subject to the availability and reapportionment of funds under subparagraph (E), the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute transit projects for fiscal years 1989, 1990, and 1991.

"(K) REDUCTION OF INTERSTATE APPORTIONMENT.—

"(i) IN GENERAL.—Unobligated apportionments for the Interstate System in any State where a withdrawal is approved under this paragraph shall, on the date of such approval, be reduced in the proportion that the Federal share of the cost of the withdrawn route or portion thereof bears to the Federal share of the total cost of all interstate routes in that State as reflected in the latest cost estimate approved by the Congress.

"(ii) EXCEPTION.—In any State where the withdrawal of an interstate route or portion thereof has been approved under this section prior to the date of the enactment of the Federal-Aid Highway Act of 1976, the unobligated apportionments for the Interstate System in that State on such date of enactment shall be reduced in the proportion that the Federal share of the cost to complete such route or portion thereof, as shown on the latest cost estimate approved by Congress prior to such approval of withdrawal, bears to the Federal share of the cost of all interstate routes in that State, as shown on such cost estimate; except that the amount of such proportional reduction shall be credited with the amount of any reduction in such State's Interstate apportionment which was attributable to the Federal share of any substitute project approved under this paragraph prior to enactment of such Federal-Aid Highway Act.

"(L) APPLICABILITY OF UMTA.—

"(i) SUPPLEMENTARY FUNDS.—Funds available for expenditure to carry out the purposes of this paragraph shall be supplementary to and not in substitution for funds authorized and available for obligation pursuant to the Urban Mass Transportation Act of 1964.

"(ii) LABOR PROTECTION.—The provisions of section 3(e)(4) of the Urban Mass Transportation Act of 1964 shall apply in carrying out this paragraph.

"(M) LIMITATION ON INTERSTATE DESIGNATIONS.—After the date of the enactment of the Federal-Aid Highway Act of 1978, the Secretary may not designate any mileage as part of the Interstate System pursuant to this paragraph or under any other provision of law. The preceding sentence shall not apply to a designation made under section 139 of this title.

"(N) OPEN TO TRAFFIC REQUIREMENT.—After September 30, 1979, the Secretary shall not withdraw his approval under this paragraph of any route or portion thereof on the Interstate System open to traffic before the date of the proposed withdrawal. Any withdrawal of approval of any such route or portion thereof before September 30, 1979, is hereby determined to be authorized by this paragraph.

"(O) LIMITATION ON SUBSTITUTION FOR STATUTORILY DESIGNATED ROUTES.—Any route or segment which was statutorily designated after March 7, 1978, to be on the Interstate System shall not be eligible for withdrawal or substitution under this subsection.".

(c) ADDITIONAL AMOUNT FOR SUBSTITUTE TRANSIT PROJECTS.—

(1) AUTHORIZATION.—In addition to the total amount available to the Secretary under section 103(e)(4)(B) of title 23, United States Code, there is authorized to be appropriated to the Secretary for fiscal years beginning after September 30, 1986, $100,000,000 to incur obligations under such section for the Federal share of either public mass transit projects, or the purchase of passenger equipment, described in such section.

(2) LIMITATION ON OBLIGATIONS.—Any funds appropriated pursuant to paragraph (1) may only be obligated for projects substituted for any segment of an interstate route the approval of which is withdrawn under section 103(e)(4) of such title before January 1, 1986.

(3) APPORTIONMENT FACTORS.—Notwithstanding section 103(e)(4) of such title, funds appropriated pursuant to paragraph (1) shall be made available in accordance with the apportionment factors contained in the committee print numbered 99-40 of the Committee on Public Works and Transportation of the House of Representatives.

(d) CONTRACT DEADLINE FOR SUBSTITUTE PROJECTS.—

(1) ELIMINATION.—Subsection (e) of section 107 of the Federal-Aid Highway Act of 1978 (23 U.S.C. 103 note) is amended—

(A) in the first sentence by striking out "and all Interstate substitute projects pursuant to subsection (e)(4) of section 103 of title 23, United States Code (for which the Secretary finds that sufficient Federal funds are available)"; and

(B) in the second sentence by striking out "and in the case" and all that follows through the period at the end of such subsection and inserting in lieu thereof a period.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall take effect September 29, 1986.

(e) INCLUSION OF CERTAIN COSTS AS NON-FEDERAL SHARE.—If the State of Oregon completes construction of a segment of an east-west highway which segment connects 158th Avenue and Cornelius Pass Road in Washington County, Oregon, with funds made available under section 103(e)(4) of title 23, United States Code, the Secretary shall include as part of the non-Federal share of the cost of construction of such segment all funds expended by private land developers after January 1, 1980, on construction of such segment.

(f) CONFORMING AMENDMENTS.—(1) Section 103(e) of title 23, United States Code, is amended—

(A) by inserting "INTERSTATE SYSTEM.—" before "(1) The Interstate";

(B) in paragraph (1) by inserting "DESIGNATION; MILEAGE LIMITATION.—" before "The Interstate";

(C) in paragraph (2) by inserting "MODIFICATIONS.—" before "In addition";

(D) in paragraph (3) by inserting "ADDITIONAL MILEAGE FOR IMPROVED EFFICIENCY.—" before "In addition";

(E) in paragraph (5) by inserting "LIMITATION ON REFUNDS FOR WITHDRAWALS BEFORE NOVEMBER 6, 1978.—" before "Notwithstanding" and by striking out "; and" at the end of such paragraph and inserting in lieu thereof a period;

(F) in paragraph (6) by inserting "LIMITATION ON REFUNDS FOR WITHDRAWALS ON AND AFTER NOVEMBER 6, 1978.—" before "Notwithstanding" and by striking out the semicolon at the end of such paragraph and inserting in lieu thereof a period;

(G) in paragraph (7) by inserting "ADDITIONAL LIMITATION ON REFUNDS.—" before "In any" and by striking out "; and" at the end of such paragraph and inserting in lieu thereof a period;

(H) in paragraph (8) by inserting "PROTECTION OF PROPERTY RIGHTS.—" before "Nothing";

(I) in paragraph (9) by inserting "LIMITATION ON FUNDING OF MODIFIED MILEAGE PROJECTS.—" before "Interstate mileage";

(J) by indenting paragraph (1) and aligning such paragraph and paragraphs (2), (3), (5), (6), (7), (8), and (9) with paragraph (4) of such section, as amended by subsection (b) of this section; and

(K) by aligning subparagraphs (A) and (B) of paragraphs (5) and (6) with subparagraph (A) of such paragraph (4).

(2) Section 107(c)(2) of the Highway Improvement Act of 1982 (23 U.S.C. 103 note) is amended—

(A) by striking out "the second sentence" and inserting in lieu thereof "subparagraph (B)"; and

(B) by striking out "such sentence" and inserting in lieu thereof "such subparagraph".

SEC. 104. AUTHORIZATION OF APPROPRIATIONS FOR INTERSTATE SYSTEM CONSTRUCTION.

The first sentence of subsection (b) of section 108 of the Federal-Aid Highway Act of 1956 is amended by striking out "and" after "September 30, 1987," and all that follows through the period at the end of such sentence and inserting in lieu thereof the following: ", the additional sum of $3,300,000,000 for the fiscal year ending September 30, 1988, the additional sum of $3,300,000,000 for the fiscal year ending September 30, 1989, the additional sum of $3,300,000,000 for the fiscal year ending September 30, 1990, the additional sum of $3,300,000,000 for the fiscal year ending September 30, 1991, the additional sum of $3,300,000,000 for the fiscal year ending September 30, 1992, and the additional sum of $1,700,000,000 for the fiscal year ending September 30, 1993.".

SEC. 105. OBLIGATION CEILING.

(a) GENERAL LIMITATION.—Notwithstanding any other provision of law (other than subsection (f) of this section), the total of all obligations for Federal-aid highways and highway safety construction programs shall not exceed—

(1) $12,600,000,000 for fiscal year 1987;

(2) $12,600,000,000 for fiscal year 1988;

(3) $12,600,000,000 for fiscal year 1989;

(4) $12,600,000,000 for fiscal year 1990; and

(5) $12,600,000,000 for fiscal year 1991.

(b) EXCEPTIONS.—The limitations under subsection (a) shall not apply to obligations—

(1) under section 125 of title 23, United States Code;

(2) under section 157 of such title;

(3) under section 320 of such title;

(4) under section 147 of the Surface Transportation Assistance Act of 1978;

(5) under section 9 of the Federal-Aid Highway Act of 1981;

(6) under sections 131(b) and 131(j) of the Surface Transportation Assistance Act of 1982;

(7) under section 118 of the National Visitor Center Facilities Act of 1968;

(8) under section 163(p)(2) of the Federal-Aid Highway Act of 1973;

(9) under section 404 of the Surface Transportation Assistance Act of 1982; and

(10) under sections 145, 146, 148, 153, 156, 157, and 161 of this Act.

No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code, or section 147 of the Surface Transportation Assistance Act of 1978.

(c) DISTRIBUTION OF OBLIGATION AUTHORITY.—For each of fiscal years 1987, 1988, 1989, 1990, and 1991 the Secretary shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to all the States for such fiscal year.

(d) LIMITATION ON OBLIGATION AUTHORITY.—During the period October 1 through December 31 of each of fiscal years 1987, 1988, 1989, 1990, and 1991, no State shall obligate more than 35 percent of the amount distributed to such State under subsection (c) for such fiscal year, and the total of all State obligations during such period shall not exceed 25 percent of the total amount distributed to all States under such subsection for such fiscal year.

(e) REDISTRIBUTION OF UNUSED OBLIGATION AUTHORITY.—Notwithstanding subsections (c) and (d), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned or allocated to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1 of each of fiscal years 1987, 1988, 1989, 1990, and 1991, revise a distribution of the funds made available under subsection (c) for such fiscal year if a State will not obligate the amount distributed during such fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during such fiscal year giving priority to those States having large unobligated balances of funds apportioned under section 104 of title 23, United States Code, and giving priority to those States which, because of statutory changes made by the Surface Transportation Assistance Act of 1982 and the Federal-Aid Highway Act of 1981, have experienced substantial proportional reductions in their apportionments and allocations; and

(3) not distribute amounts authorized for administrative expenses and Federal lands highways programs.

(f) ADDITIONAL OBLIGATION AUTHORITY.—

(1) IN GENERAL.—Subject to paragraph (2), a State which after August 1 and on or before September 30 of fiscal year 1987, 1988, 1989, 1990, or 1991 obligates the amount distributed to such State in such fiscal year under subsections (c) and (e) may obligate for Federal-aid highways and highway safety construction on or before September 30 of such fiscal year an additional amount not to exceed 10 percent of the aggregate amount of funds apportioned or allocated to such State—

(A) under sections 104, 144, and 152 of title 23, United States Code,

(B) for highway assistance projects under section 103(e)(4) of such title, and

(C) under section 203 of the Highway Safety Act of 1973,

which are not obligated on the date such State completes obligation of the amount so distributed.

(2) LIMITATION ON ADDITIONAL OBLIGATION AUTHORITY.—During the period August 2 through September 30 of each of fiscal years 1987, 1988, 1989, 1990, and 1991, the aggregate amount which may be obligated by all States pursuant to paragraph (1) shall not exceed 5 percent of the aggregate amount of funds apportioned or allocated to all States—

(A) under sections 104, 144, and 152 of title 23, United States Code,

(B) for highway assistance projects under section 103(e)(4) of such title, and

(C) under section 203 of the Highway Safety Act of 1973,

which would not be obligated in such fiscal year if the total amount of obligational authority provided by subsection (a) for such fiscal year were utilized.

(3) LIMITATION ON APPLICABILITY.—Paragraph (1) shall not apply to any State which on or after August 1 of fiscal year 1987, 1988, 1989, 1990, or 1991, as the case may be, has the amount distributed to such State under subsection (c) for such fiscal year reduced under subsection (e)(2).

(g) CONFORMING AMENDMENT.—Section 157(b) of title 23, United States Code, is amended by striking out the period at the end of the last sentence and inserting in lieu thereof "and section 105(c) of the Federal-Aid Highway Act of 1986.".

SEC. 106. AUTHORIZATION OF APPROPRIATIONS.

(a) FROM THE HIGHWAY TRUST FUND.—For the purpose of carrying out the provisions of title 23, United States Code, the following sums are hereby authorized to be appropriated out of the Highway Trust Fund (other than the Mass Transit Account):

(1) INTERSTATE 4R PROGRAM.—For resurfacing, restoring, rehabilitating, and reconstructing the National System of Interstate and Defense Highways $2,830,000,000 per fiscal year for each of fiscal years 1988, 1989, 1990, 1991, and 1992.

(2) FEDERAL-AID PRIMARY SYSTEM.—For the Federal-aid primary system in rural areas, including the extensions of the Federal-aid primary system in urban areas, and the priority primary routes $2,305,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991.

(3) FEDERAL-AID SECONDARY SYSTEM.—For the Federal-aid secondary system in rural areas $600,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991.

(4) FEDERAL-AID URBAN SYSTEM.—For the Federal-aid urban system $750,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991.

(5) INDIAN RESERVATION ROADS.—For Indian reservation roads $90,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991.

(6) FOREST HIGHWAYS.—For forest highways $57,500,000 per fiscal year for each of fiscal years 1987 and 1988, $57,185,000 per fiscal year for each of fiscal years 1989 and 1990, and $60,000,000 for fiscal year 1991.

(7) PUBLIC LANDS HIGHWAYS.—For public lands highways $20,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991.

(b) PARKWAYS AND PARK HIGHWAYS.—

(1) IN GENERAL.—For the purpose of carrying out the provisions of title 23, United States Code, there is hereby authorized to be appropriated for parkways and park highways $45,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991.

(2) PAYMENT OF COST.—The entire cost of any parkway or park highway on any Federal-aid system paid under the authorization contained in this subsection shall be paid from the Highway Trust Fund (other than the Mass Transit Account).

(c) DISADVANTAGED BUSINESS ENTERPRISES.—Except to the extent that the Secretary determines otherwise, not less than 10 percent of the amounts authorized to be appropriated under this Act shall be expended with small business concerns owned and controlled by socially and economically disadvantaged individuals as defined by section 8(d) of the Small Business Act (15 U.S.C. section 637(d)) and relevant subcontracting regulations promulgated pursuant thereto.

SEC. 107. INTERSTATE 4R AND PRIMARY FORMULAS.

(a) REVISION OF 4R FORMULA.—Section 104(b)(5)(B) of title 23, United States Code, is amended to read as follows:

"(B) For resurfacing, restoring, rehabilitating, and reconstructing the Interstate System:

"50 percent in the ratio that vehicle miles traveled on lanes on the interstate routes designated under sections 103 and 139(c) of this title (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such vehicle miles in all States; 25 percent in the ratio that gasoline used by motor vehicles on highways in such State bears to the total of gasoline used by motor vehicles on highways in all States; and 25 percent in the ratio that diesel fuel used by motor vehicles on highways in such State bears to the total of diesel fuel used by motor vehicles on highways in all States.

The Secretary shall establish such rules and regulations as may be necessary to carry out this subparagraph.".

(b) EXTENSION OF PRIMARY FORMULA.—Section 108 of the Highway Improvement Act of 1982 (23 U.S.C. 104 note) is amended by striking out "and 1986" each place it appears and inserting in lieu thereof "1986, 1987, 1988, 1989, 1990, and 1991".

SEC. 108. ELIMINATION OF ROADSIDE OBSTACLES.

The second undesignated paragraph of section 101(a) of title 23, United States Code, relating to the definition of construction, is amended by inserting after "grade crossings," the following: "elimination of roadside obstacles,".

SEC. 109. RELOCATION REQUIREMENTS.

Section 109 of title 23, United States Code (relating to standards), is amended by adding at the end thereof the following new subsection:

"(p) The Secretary shall not approve any project under this title unless the State agrees that, in connection with the operation, maintenance, or construction of the project, the State will not displace any structure owned by any person, partnership, or corporation that provides rent to the State in consideration for the occupancy by such structure unless—

"(1) such displacement is directly necessitated by the operation, maintenance, or construction of such project,

"(2) the owner of such structure receives relocation assistance in an amount at least equal to the amount that such owner would have received pursuant to the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601 et seq.) if the owner were a displaced person under such Act, or

"(3) such displacement is expressly authorized by State statute and is in accordance with the terms of the rental agreement.".

SEC. 110. CONTRACTING FOR ENGINEERING AND DESIGN SERVICES.

(a) IN GENERAL.—Section 112(b) of title 23, United States Code, is amended by striking out "Construction" and inserting in lieu thereof "(1) IN GENERAL.—Subject to paragraphs (2) and (3), construction" and by adding at the end thereof the following new paragraph:

"(2) CONTRACTING FOR ENGINEERING AND DESIGN SERVICES.—Each contract for program management, construction management, feasibility studies, preliminary engineering, design, architectural engineering, surveying, mapping, and related services with respect to a project subject to the provisions of subsection (a) of this section shall be awarded in the same manner as a contract for architectural and engineering services is negotiated under title IX of the Federal Property and Administrative Services Act of 1949 or equivalent State qualifications-based requirements.".

(b) CONFORMING AMENDMENTS.—Such section is further amended—

(1) by inserting "BIDDING REQUIREMENTS.—" after "(b)"; and

(2) by indenting paragraph (1), as designated by subsection (a) of this section, and aligning such paragraph with paragraph (2), as added by such subsection.

SEC. 111. LIMITATIONS CONCERNING SOUTH AFRICA ON AWARDS OF CONTRACTS.

Section 112(b) of title 23, United States Code, is further amended by adding at the end thereof the following new paragraph:

"(3) LIMITATIONS CONCERNING SOUTH AFRICA ON AWARDS OF CONTRACTS.—A State or local governmental body that is a recipient of Federal funds under this title may prohibit or otherwise limit the award of contracts by including in its contracts terms and conditions related to the contractor's business in South Africa in accordance with a State or local law if the State or local governmental body first enters into an agreement with the Secretary that any costs incurred as a result of such prohibition or limitation which are in excess of the costs that would otherwise have been incurred with respect to such project under this title will not, for purposes of this title, be considered to be a cost of such project.".

SEC. 112. STANDARDIZED CONTRACT CLAUSE CONCERNING SITE CONDITIONS.

Section 112 of title 23, United States Code, is amended by redesignating subsection (e), and any references thereto, as subsection (f), and by inserting after subsection (d) the following new subsection:

"(e) STANDARDIZED CONTRACT CLAUSE CONCERNING SITE CONDITIONS.—The Secretary shall issue regulations establishing and requiring, for inclusion in each contract entered into with respect to any project approved under section 106 of this title—

"(1) a standardized contract clause concerning each of the following conditions:

"(A) site conditions differing from those specified in the contract;

"(B) suspensions of work ordered by the State (other than a suspension of work caused by the fault of the contractor or by weather); and

"(C) material changes in the scope of work specified in the contract; and

"(2) equitable adjustment of contract terms to take into account such conditions.".

SEC. 113. CONVICT PRODUCED MATERIALS.

(a) IN GENERAL.—Subsection (b) of section 114 of title 23, United States Code, is amended to read as follows:

"(b) CONVICT LABOR AND CONVICT PRODUCED MATERIALS.—

"(1) LIMITATION ON CONVICT LABOR.—Convict labor shall not be used in construction

of highways or portions of highways located on a Federal-aid system unless it is labor performed by convicts who are on parole, supervised release, or probation.

"(2) LIMITATION ON CONVICT PRODUCED MATERIALS.—Materials produced by convict labor may only be used in such construction—

"(A) if such materials are produced by convicts who are on parole, supervised release, or probation from a prison; or

"(B) if such materials are produced by convicts in a qualified prison facility and the amount of such materials produced in such facility for use in such construction during any 12-month period does not exceed the amount of such materials produced in such facility for use in such construction during the 12-month period ending July 1, 1985.

"(3) QUALIFIED PRISON FACILITY DEFINED.—As used in this subsection, 'qualified prison facility' means any prison facility in which convicts, during the 12-month period ending July 1, 1985, produced materials for use in construction of highways or portions of highways located on a Federal-aid system.".

(b) CONFORMING AMENDMENTS.—(1) Subsection (a) of such section is amended by inserting "CONSTRUCTION WORK IN GENERAL.—" before "The construction of".

(2) Section 202 of the Departments of Commerce, Justice, State, the Judiciary, and Related Agencies Appropriation Act, 1985 is hereby repealed.

(3) Section 1761(d) of title 18, United States Code, is hereby repealed.

SEC. 114. SIGNS IDENTIFYING FUNDING SOURCES.

Section 114(a) of title 23, United States Code, is further amended by adding at the end thereof the following new sentence: "If a State has a practice of erecting on projects under actual construction without Federal-aid highway assistance signs which indicate the source or sources of any funds used to carry out such projects, such State shall erect on all projects under actual construction with any funds made available out of the Highway Trust Fund signs which are visible to highway users and which indicate each governmental source of funds being used to carry out such federally assisted projects and the amount of funds being made available by each such source.".

SEC. 115. ADVANCED CONSTRUCTION.

(a) LIMITATION.—Paragraph (2) of section 115(a) of title 23, United States Code, is amended to read as follows:

"(2) LIMITATION.—The aggregate amount of funds which the Secretary is authorized to pay to a State with respect to highway substitute projects, projects on a Federal-aid system, or bridge projects under applications approved under this section shall not, at any time during a fiscal year, exceed an amount equal to—

"(A) two times the aggregate amount of funds apportioned or allocated to the State for expenditure under section 103(e)(4), 104, or 144 of this title, as the case may be, in such fiscal year; plus

"(B) the aggregate amount of funds apportioned or allocated to the State for expenditure under such section which, on the last day of the preceding fiscal year, have not been obligated and remain available for obligation by such State; plus

"(C) the aggregate amount which the Secretary determines, by using the most recent apportionment or allocation factors, would be apportioned or allocated to the State for expenditure under such section in each succeeding fiscal year for which funds are authorized to be appropriated to carry out such section; less

"(D) the aggregate amount of funds apportioned or allocated to the State for expenditure under such section which have been obligated in such fiscal year.".

(b) PRIMARY SYSTEM PROJECTS.—

(1) IN GENERAL.—Section 115(b)(1) of such title, is amended—

(A) by inserting before "Interstate System" each place it appears "Federal-aid primary or"; and

(B) by inserting after "Interstate System" the second place it appears ", as the case may be".

(2) EXEMPTION OF FUNDS.—Section 115(a)(1) of such title is amended—

(A) by inserting "and Federal-aid primary funds" after "Interstate funds"; and

(B) by inserting "or a Federal-aid primary system project funded under section 104(b)(1) of this title or section 108 of the Highway Improvement Act of 1982" after "104(b)(5) of this title".

(c) REMOVAL OF LIMITATION ON BOND INTEREST.—Section 115(b)(2) of such title is amended by striking out "under construction on January 1, 1983, on the Interstate System" and inserting in lieu thereof "constructed before, on, or after January 1, 1983, on the Federal-aid primary or Interstate System".

(d) CONFORMING AMENDMENTS.—Section 115 of such title is amended—

(1) in subsection (a) by inserting "AUTHORIZATION OF PAYMENT.—" after "(a)";

(2) in subsection (a)(1) by striking out "When" and inserting in lieu thereof "REQUIREMENTS.—Subject to paragraph (2), when";

(3) in subsection (a) by indenting paragraph (1) and aligning such paragraph with paragraph (2), as amended by subsection (a) of this section;

(4) in subsection (a)(1) by aligning subparagraphs (A) and (B) with subparagraphs (A), (B), (C), and (D) of such paragraph (2); and

(5) in subsection (b)(1) by striking out "When" and inserting in lieu thereof "Subject to subsection (a)(2), when".

SEC. 116. INTERSTATE DISCRETIONARY FUNDS.

(a) CONSTRUCTION FUNDS; ADDITIONAL PRIORITY PROJECT.—Paragraph (2) of section 118(b) of title 23, United States Code, is amended to read as follows:

"(2) INTERSTATE CONSTRUCTION FUNDS.—

"(A) PERIOD OF AVAILABILITY.—Except as otherwise provided in this subsection, sums apportioned for the Interstate System in any State shall remain available for expenditure in that State until the end of the fiscal year for which authorized. Upon request of the State, the Secretary shall reduce the period of availability of such sums by one fiscal year.

"(B) DISCRETIONARY PROJECTS.—Sums not obligated within the time period prescribed by subparagraph (A) shall lapse and be made available by the Secretary for projects on the Interstate System (other than projects for which sums are apportioned under section 104(b)(5)(B)) in accordance with the following priorities:

"(i) First, for—

"(I) high cost projects which directly contribute to the completion of a segment of the Interstate System which is not open to traffic; and

"(II) high cost projects for construction of high occupancy vehicle lanes and other lanes on any highway in Los Angeles County, California, designated as a part of the Interstate System by section 140 of the Federal-Aid Highway Act of 1978 and the costs of construction of which are included in the interstate cost estimate for 1985.

"(ii) Second, for projects of high cost in relation to a State's apportionment.

"(iii) Third, for projects with respect to which the Secretary may make payments under section 115 of this title.

"(C) LIMITATION ON STATES ELIGIBLE FOR DISCRETIONARY FUNDS.—Sums may only be made available under this paragraph in any State in a fiscal year if—

"(i)(I) the Secretary determines that the State has obligated all of its apportionments under section 104(b)(5)(A) of this title other than an amount which, by itself, is insufficient to pay the Federal share of the cost of a project on the Interstate System which has been submitted by the State to the Secretary for approval; or

"(II) the State certifies to the Secretary that the State will obligate before August 1 of the fiscal year all of its apportionments under section 104(b)(5)(A) other than such an insufficient amount; and

"(ii) the applicant for a project with respect to which the Secretary may not make payments under section 115 of this title is willing and able to—

"(I) apply the funds to a ready-to-commence project, and

"(II) in the case of construction work, begin work within 90 days of obligation.

"(D) EXCEPTION TO LIMITATION.—The Secretary may make funds available to the State of California for construction of high occupancy vehicle and other lanes described in subparagraph (B)(i)(II) whether or not such State has met the requirements of clause (i) of subparagraph (C).

"(E) PERIOD OF AVAILABILITY OF DISCRETIONARY FUNDS.—Sums made available pursuant to this paragraph shall remain available until expended.".

(b) SET ASIDE OF 4R FUNDS FOR 4R DISCRETIONARY PROJECTS.—Section 118(c) of such title is amended by inserting "SET ASIDES FOR INTERSTATE DISCRETIONARY PROJECTS.—" after "(c)", by inserting "(1) SET ASIDE FOR CONSTRUCTION PROJECTS.—" before "Before", and by adding at the end thereof the following new paragraph:

"(2) SET ASIDE FOR 4R PROJECTS.—Before any apportionment is made under section 104(b)(5)(B) of this title, the Secretary shall set aside $200,000,000 for obligation by the Secretary in accordance with subsection (b)(3) of this section.".

(c) LIMITATIONS ON STATES AND PROJECTS ELIGIBLE FOR 4R DISCRETIONARY FUNDS.—Paragraph (3) of section 118(b) of such title is amended to read as follows:

"(3) INTERSTATE 4R FUNDS.—

"(A) PERIOD OF AVAILABILITY.—Any amount apportioned to a State for the Interstate System under section 104(b)(5)(B) of this title shall continue to be available for expenditure in that State for a period of one year after the close of the fiscal year for which such sums are authorized.

"(B) DISCRETIONARY PROJECTS.—Sums not obligated within the time period prescribed by subparagraph (A) shall lapse and be made available by the Secretary for projects for resurfacing, restoring, rehabilitating, and reconstructing any route or portion thereof on the Interstate System (other than any highway designated as a part of the Interstate System under section 139 and any toll road on the Interstate System not subject to an agreement under section 105 of the Federal-Aid Highway Act of 1978). Such funds shall be made available by the Secretary to any other State applying for such funds, if the Secretary determines that—

"(i) the State has obligated all of its apportionments under section 104(b)(5)(B) other

than an amount which, by itself, is insufficient to pay the Federal share of the cost of a project for resurfacing, restoring, rehabilitating, and reconstructing the Interstate System which has been submitted by such State to the Secretary for approval; and

"(ii) the applicant is willing and able to (I) obligate the funds within one year of the date the funds are made available, (II) apply them to a ready-to-commence project, and (III) in the case of construction work, begin work within 90 days of obligation.

"(C) PRIORITY CONSIDERATION FOR CERTAIN PROJECTS.—In selecting projects to fund under subparagraph (B), the Secretary shall give priority consideration to any project the cost of which exceeds $10,000,000 on any high volume route in an urban area or a high truck-volume route in a rural area.

"(D) FACTORS TO CONSIDER IN SELECTION OF RECIPIENTS.—In selecting States to receive funds under subparagraph (B) in a fiscal year, the Secretary shall—

"(i) consider whether a State has obligated in such fiscal year and the two preceding fiscal years any funds apportioned to the State under section 104(b)(5)(B) of this title for projects on a segment of the Interstate System designated under section 139(b) of this title and, if so, the amount of such funds;

"(ii) not consider whether a State has transferred funds under section 119(f)(2) of this title in such fiscal year and the two preceding fiscal years; and

"(iii) not consider whether a State has obligated in such fiscal year and two preceding fiscal years any funds apportioned under section 104(b)(5)(B) of this title for projects on a segment of the Interstate System designated under section 139(a) of this title.

"(E) PERIOD OF AVAILABILITY OF DISCRETIONARY FUNDS.—Sums made available pursuant to this paragraph shall remain available until expended.".

(d) CONFORMING AMENDMENTS.—(1) The matter preceding the first colon in section 104(b) of such title is amended by inserting after "subsection (a) of this section" the following: "and the set asides authorized by subsection (f) of this section and sections 118(c) and 307(d) of this title".

(2) Section 118(b) of such title is amended—

(A) in paragraph (1) by inserting "PERIODS OF AVAILABILITY OF FUNDS; DISCRETIONARY PROJECTS.—" before "(1)";

(B) in paragraph (1) by inserting "PERIOD OF AVAILABILITY OF NON-INTERSTATE FUNDS.—" before "Sums";

(C) in paragraph (4) by inserting "OBLIGATION AS EQUIVALENT TO EXPENDITURES; EFFECT OF RELEASE OF FUNDS.—" before "Sums"; and

(D) by indenting paragraph (1) and aligning such paragraph and paragraph (4) with paragraph (2), as amended by subsection (a) of this section.

(3) Section 118(c) of such title is further amended by indenting paragraph (1), as designated by subsection (b) of this section, and aligning such paragraph with paragraph (2), as added by such subsection (b).

SEC. 117. FLEXIBILITY OF USE OF HIGHWAY FUNDS.

Section 118(f) of title 23, United States Code (relating to availability of sums apportioned to the State of Alaska), is amended by inserting "and the Commonwealth of Puerto Rico" after "the State of Alaska".

SEC. 118. INTERSTATE 4R PROGRAM.

(a) IN GENERAL.—Section 119 of title 23, United States Code, is amended by adding at the end thereof the following new subsections:

"(e) TOLL ROAD AGREEMENTS.—The Secretary may approve a project pursuant to subsection (a) on a toll road only if an agreement satisfactory to the Secretary has been reached with the State highway department and each public authority with jurisdiction over such toll road prior to the approval of such project that the toll road will become free to the public upon the collection of tolls sufficient to liquidate the cost of the toll road or any bonds outstanding at the time constituting a valid lien against it, and the cost of maintenance and operation and debt service during the period of toll collections. Such agreement shall contain a provision requiring that if, for any reason, a toll road receiving Federal assistance under this section does not become free to the public upon collection of sufficient tolls as specified in the first sentence of this subsection, Federal funds used for projects on such toll road pursuant to this subsection shall be repaid to the Federal Treasury. Any agreement entered into under section 105 of the Federal-Aid Highway Act of 1978 before the date of the enactment of this subsection shall be treated as an agreement entered into under this subsection.

"(f) TRANSFER OF FUNDS FOR PRIMARY SYSTEM PROJECTS.—

"(1) UPON CERTIFICATION ACCEPTANCE.—If a State certifies to the Secretary that any part of the sums apportioned to the State under 104(b)(5)(B) of this title are in excess of the needs of the State for resurfacing, restoring, rehabilitating, or reconstructing Interstate System routes and the Secretary accepts such certification, the State may transfer such excess part to its apportionment under section 104(b)(1).

"(2) UNCONDITIONAL.—Notwithstanding paragraph (1), a State may transfer to its apportionment under section 104(b)(1) of this title—

"(A) in fiscal year 1987, an amount not to exceed 20 percent of the funds apportioned to the State under section 104(b)(5)(B) which are not obligated at the time of the transfer; and

"(B) in any fiscal year thereafter, an amount equal to 20 percent of the funds apportioned to the State under section 104(b)(5)(B) for such fiscal year.

The Federal share for a project carried out with funds transferred under this paragraph shall be that set forth in section 120(c) of this title, except that the Federal share for a project on a priority primary route designated in the committee print referred to in section 120(k) shall be that set forth in section 120(k).".

(b) CONFORMING AMENDMENTS.—(1) Section 119(a) of such title is amended by striking out "section 105 of the Federal-Aid Highway Act of 1978" and inserting in lieu thereof "subsection (e)".

(2) Section 105 of the Federal-Aid Highway Act of 1978 is amended by striking out all that follows the first sentence.

SEC. 119. FEDERAL SHARE.

(a) CERTAIN HIGHWAY SAFETY CONSTRUCTION PROJECTS.—Section 120(d) of title 23, United States Code, is amended by inserting after "vanpooling" the following: "or for installation of traffic signs, highway lights, guardrails, or impact attenuators".

(b) PRIORITY PRIMARY PROJECTS.—Section 120 of such title is amended by redesignating the second subsection (i) and subsections (j) and (k) (and any reference thereto) as subsections (j),(k), and (l), respectively, and in subsection (k) as so redesignated by striking out "97-61" and inserting in lieu thereof "99-4".

(c) GREAT RIVER ROAD.—Section 120 of such title is amended—

(1) in subsection (k), as redesignated by subsection (b), by striking out ", 148, and 155," and inserting in lieu thereof "and 155"; and

(2) by adding at the end thereof the following new subsection:

"(m) GREAT RIVER ROAD PROJECTS.—Notwithstanding any other provision of this section, this title, or any other law, in any case where a State elects to use funds apportioned to it for any Federal-aid system for any project under section 148 of this title, the Federal share payable on account of such project shall be 95 percent of the cost thereof; except that if a State requests that the Federal share payable on account of such project be a percentage of the cost of such project which is less than 95 percent but not less than 75 percent, such percentage shall be the Federal share payable on account of such project.".

(d) INCENTIVE PROGRAM FOR THE USE OF COAL ASH.—

(1) CONGRESSIONAL FINDINGS.—The Congress hereby finds and declares (A) that it is in the national interest to encourage and promote utilization by the States of materials which are produced from coal ash in highway and bridge construction projects under title 23, United States Code, and (B) that the use of such materials in such projects conserves energy, encourages resource recovery, and reduces the cost of such projects.

(2) INCREASED FEDERAL SHARE.—Notwithstanding sections 119, 120, and 144 of title 23, United States Code, in each of fiscal years 1987, 1988, 1989, 1990, and 1991, the percentage specified in such sections as the Federal share of the cost payable on account of any highway or bridge construction project in which materials produced from coal ash are used in significant amounts shall be increased by adding 5 percent to such percentage; except that in no case shall the Federal share payable on account of any project exceed 95 percent of the cost of such project as a result of increasing such Federal share under this subsection.

SEC. 120. EMERGENCY RELIEF.

(a) OBLIGATION CEILING.—Section 125(b) of title 23, United States Code, is amended by striking out "$30,000,000" and inserting in lieu thereof "$50,000,000" and by inserting after "1985" the following: "or $100,000,000 with respect to natural disasters and catastrophic failures occurring in calendar year 1986".

(b) TERRITORIES.—

(1) TREATED AS STATES.—Section 125 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(d) TREATMENT OF TERRITORIES.—For purposes of this section, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands shall be considered to be States and parts of the United States, and the chief executive officer of each such territory shall be considered to be a Governor of a State.".

(2) LIMITATION ON OBLIGATIONS.—The first sentence of subsection (b) of such section 125 is amended by inserting "(1)" before "obligations" and by inserting before the period at the end the following: ", and (2) the total obligations for projects under this section in any fiscal year in the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands shall not exceed $5,000,000".

(3) EFFECTIVE DATE.—The amendments made by paragraphs (1) and (2) shall take effect April 15, 1983.

(c) ELIGIBLE PROJECT.—A project to repair or reconstruct any portion of an interstate route in the vicinity of Salt Lake City, Utah, which was damaged by flooding of the Great Salt Lake that occurred in 1983 shall be eligible for assistance under section 125 of title 23, United States Code, and the Secretary is authorized to reimburse, with funds made available under such section, the State of Utah for any work carried out on such project. Funds reimbursed to such State pursuant to this subsection shall be treated as if such funds are apportioned to such State under section 104(b)(5)(B) of title 23, United States Code.

SEC. 121. TANK TRUCKS.

(a) EXCEPTION TO GENERAL VEHICLE WEIGHT RULE.—The second sentence of subsection (a) of section 127 of title 23, United States Code (relating to vehicle weight limitations for the Interstate system), is amended—

(1) by inserting "(1)" before "is thirty-six feet or more";

(2) by inserting after "thirty-six feet or more" the following: ", (2) in the case of a motor vehicle hauling any tank trailer or ocean transport container before September 1, 1988, is 30 feet or more, or (3) in the case of any motor vehicle hauling any dump trailer before September 1, 1988, is 32 feet or more"; and

(3) by inserting after "except in the case of the overall gross weight of any group of two or more consecutive axles" the following: "on any vehicle (other than a vehicle comprised of a motor vehicle hauling any tank trailer or ocean transport container or dump trailer on or after September 1, 1988)".

(b) OCEAN TRANSPORT CONTAINER DEFINED.—Such section 127 is amended by adding at the end thereof the following new subsection:

"(c) OCEAN TRANSPORT CONTAINER DEFINED.—For purposes of this section, the term 'ocean transport container' has the meaning given the term 'freight container' by the International Standards Organization in Series 1, Freight Containers, 3rd Edition (reference number IS0668-1979(E)) as in effect on the date of the enactment of this subsection.".

(c) CONFORMING AMENDMENTS.—Such section is further amended—

(1) in subsection (a) by inserting "IN GENERAL.—" before "No funds"; and

(2) in subsection (b) by inserting "REASONABLE ACCESS.—" before "No State".

SEC. 122. EXTENSION OF TOLLS TO FINANCE CERTAIN INELIGIBLE CONSTRUCTION EXPENSES.

(a) IN GENERAL.—Section 129(e) of title 23, United States Code, is amended by striking out the semicolon at the end of paragraph (1) and inserting in lieu thereof the following: ", except for such indebtedness as may be incurred to finance any cost associated with a feature of the project on the toll road in which the Secretary does not permit Federal participation with funds apportioned under section 104(b)(5)(A) of this title and which is recommended to be included as a part of the project by the final environmental impact statement with respect to such project;".

(b) CONFORMING AMENDMENTS.—Such section is further amended—

(1) in paragraph (2) by inserting "(A)" after "applied to", by inserting "(i)" after "only", and by striking out "toll road and" and inserting in lieu thereof "toll road, (ii) any indebtedness incurred to finance any cost of such a feature, and (iii) any funds advanced by the State to finance any cost of such a feature, and (B)"; and

(2) by striking out the period at the end thereof and inserting in lieu thereof "and repay all such indebtedness and funds advanced.".

SEC. 123. HIGHWAY BEAUTIFICATION.

(a) AUTHORIZATION OF APPROPRIATIONS.—Section 131(m) of title 23, United States Code (relating to control of outdoor advertising), is amended by striking out the last sentence and inserting in lieu thereof the following: "There is authorized to be appropriated to carry out the provisions of this section, out of the Highway Trust Fund (other than the Mass Transit Account), $5,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991. All provisions of this chapter that are applicable to Federal-aid primary highways funds, other than provisions relating to the apportionment formula, shall apply to funds authorized to be appropriated to carry out this section, except as determined by the Secretary to be inconsistent with this section.".

(b) FARM PRODUCE SIGNS.—Section 131(c) of such title is amended by striking out "and" at the end of clause (4) and by striking out the period at the end of such section and inserting in lieu thereof the following: ", and (6) temporary or seasonal signs, displays, and devices advertising locations at which consumers may harvest and purchase agricultural commodities from farmers producing such commodities which signs, displays, and devices do not exceed 150 square feet.".

(c) FEDERAL SHARE.—Section 131(g) of such title is amended by inserting after "75 per centum" the following: "or such lesser percentage as may be agreed upon by the Secretary and the State".

(d) JUST COMPENSATION.—Section 131 of such title is amended by adding at the end thereof the following new subsection:

"(r) JUST COMPENSATION IN NORTH DAKOTA.—Any outdoor advertising sign, display, or device erected with the permission of the State of North Dakota under a permit containing a waiver of just compensation, and erected after October 22, 1965, and before the agreement between such State and the Secretary referred to in subsection (d) of this section, irrespective of any such conditions requiring waiver of compensation, whether or not such permit has been renewed, shall not be removed by such State without payment of just compensation.".

SEC. 124. BRIDGE PROGRAM.

(a) DISCRETIONARY PROGRAM.—Section 144(g) of title 23, United States Code, is amended to read as follows:

"(g) SET ASIDES.—

"(1) DISCRETIONARY BRIDGE PROGRAM.—Of the amount authorized per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991 by section 202 of the Highway Safety Act of 1986, all but $250,000,000 per fiscal year shall be apportioned as provided in subsection (e) of this section. $250,000,000 per fiscal year of the amount authorized for each of such fiscal years shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date, except that the obligation of such $250,000,000 shall be at the discretion of the Secretary.

"(2) ELIGIBLE DISCRETIONARY PROJECTS.—Amounts made available by paragraph (1) for obligation at the discretion of the Secretary may be obligated only—

"(A) for a project for a highway bridge the replacement or rehabilitation cost of which is more than $10,000,000, and

"(B) for a project for a highway bridge the replacement or rehabilitation cost of which is less than $10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) for the fiscal year in which application is made for a grant for such bridge.

"(3) OFF-SYSTEM BRIDGES.—Not less than 15 percent nor more than 35 percent of the amount apportioned to each State in each of fiscal years 1987, 1988, 1989, 1990, and 1991, shall be expended for projects to replace or rehabilitate highway bridges located on public roads, other than those on a Federal-aid system. The Secretary after consultation with the State and local officials may, with respect to a State, reduce the requirement for expenditure for bridges not on a Federal-aid system when the Secretary determines that such State has inadequate needs to justify such expenditure.".

(b) APPLICABILITY OF THE GENERAL BRIDGE ACT OF 1948.— Section 144(h) of such title is amended—

(1) by striking out "which are not subject to the ebb and flow of the tide, and" and inserting in lieu thereof "(1)"; and

(2) by striking out the period at the end thereof and inserting in liue thereof ", and (2) which are (a) not tidal, or (b) if tidal, used only by recreational boating, fishing, and other small vessels less than 21 feet in length.".

(c) INVENTORIES AND REPORTS.—Section 144(i) of such title is amended to read as follows:

"(i) INVENTORIES AND REPORTS.—The Secretary shall—

"(1) report to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives on projects approved under this section;

"(2) annually revise the current inventories authorized by subsections (b) and (c) of this section;

"(3) report to such committees on such inventories; and

"(4) report to such committees such recommendations as the Secretary may have for improvements of the program authorized by this section.

Such reports shall be submitted to such committees biennially beginning in January 1987 at the same time as the report required by section 307(e) of this title is submitted to Congress.".

(d) BRIDGES TO REPLACE CERTAIN FERRYBOAT SERVICES.—

(1) IN GENERAL.—Section 144 of such title is amended by redesignating subsection (m), and any references thereto, as subsection (n) and by inserting after subsection (l) the following new subsection:

"(m) BRIDGES TO REPLACE FERRYBOAT SERVICE.—Notwithstanding any other provision of this section or any other law, upon application of the State of Arkansas for assistance for construction of a highway bridge to replace ferryboat service which was being provided in such State for motor vehicles on January 3, 1983, the Secretary may approve under this section a project for such construction at a Federal share payable of 80 percent of the cost thereof.".

(2) CONFORMING MODIFICATION OF APPORTIONMENT FORMULA.—Subsection (e) of such section is amended by inserting after the third sentence the following new sentence: "For purposes of the preceding sentence, the

total cost of deficient bridges in the State of Arkansas and in all States shall be reduced by the total cost of any highway bridges constructed under subsection (m), relating to replacement of ferryboat service.".

(e) DISCRETIONARY BRIDGE CRITERIA.—Section 161 of the Highway Improvement Act of 1982 (23 U.S.C. 144 note) is amended by inserting before the period at the end of the second sentence ", including a bridge replacement of which was partially funded under the Supplemental Appropriations Act, 1983 (97 Stat. 341)".

SEC. 125. MINIMUM ALLOCATION.

(a) PLANNING AS A FUNDABLE ITEM; TREATMENT OF WITHHELD APPORTIONMENTS.—Section 157 of title 23, United States Code, is amended by redesignating subsection (c), and any references thereto, as subsection (e) and by inserting after subsection (b) the following new subsections:

"(c) LIMITATION ON PLANNING EXPENDITURES.—One-half of one percent of amounts allocated to each State under this section in any fiscal year may be available for expenditure for the purpose of carrying out the requirements of section 134 of this title (relating to transportation planning). One and one-half percent of the amounts allocated to each State under this section in any fiscal year may be available for expenditure for the purpose of carrying out activities referred to in subsection (c) of section 307 of this title (relating to transportation planning and research).

"(d) TREATMENT OF WITHHELD APPORTIONMENTS.—For purposes of subsection (a), any funds which, but for section 154(f) or 158(a) of this title or any other provision of law under which Federal-aid highway funds are withheld from apportionment, would be apportioned to a State in a fiscal year under a section referred to in subsection (a) shall be treated as being apportioned in such year.".

(b) EXTENSION OF PROGRAM.—

(1) IN GENERAL.—Subsection (a) of section 157 of title 23, United States Code, is amended by striking out "September 30, 1984, September 30, 1985, and September 30, 1986," and inserting in lieu thereof "on or after September 30, 1984,".

(2) AUTHORIZATION OF APPROPRIATIONS.—Subsection (e) of such section 157, as redesignated by subsection (a) of this section, is amended by striking out "September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986" and inserting in lieu thereof "on or after September 30, 1983".

SEC. 126. NATIONAL BRIDGE INSPECTION PROGRAM.

(a) IN GENERAL.—Chapter 1 of title 23, United States Code, is amended by striking out section 151 (relating to pavement marking demonstration program) and inserting in lieu thereof the following:

"§ 151. National bridge inspection program

"(a) NATIONAL BRIDGE INSPECTION STANDARDS.—The Secretary, in consultation with the State highway departments and interested and knowledgeable private organizations and individuals, shall establish national bridge inspection standards for the proper safety inspection and evaluation of all highway bridges.

"(b) MINIMUM REQUIREMENTS OF INSPECTION STANDARDS.—The standards established under subsection (a) shall, at a minimum—

"(1) specify, in detail, the method by which such inspections shall be carried out by the States;

"(2) establish the maximum time period between inspections;

"(3) establish the qualification for those charged with carrying out the inspections;

"(4) require each State to maintain and make available to the Secretary upon request—

"(A) written reports on the results of highway bridge inspections together with notations of any action taken pursuant to the findings of such inspections; and

"(B) current inventory data for all highway bridges reflecting the findings of the most recent highway bridge inspections conducted; and

"(5) establish a procedure for national certification of highway bridge inspectors.

"(c) TRAINING PROGRAM FOR BRIDGE INSPECTORS.—The Secretary, in cooperation with the State highway departments, shall establish a program designed to train appropriate governmental employees to carry out highway bridge inspections. Such training program shall be revised from time to time to take into account new and improved techniques.

"(d) AVAILABILITY OF FUNDS.—To carry out this section, the Secretary may use funds made available pursuant to the provisions of section 104(a), section 307(a), and section 144 of this title.".

(b) CONFORMING AMENDMENTS.—(1) The analysis for chapter 1 of such title is amended by striking out the item relating to section 151 and inserting in lieu thereof the following:

"151. National bridge inspection program.".

(2) Section 116 of such title (relating to highway maintenance) is amended by striking out subsections (d) and (e).

SEC. 127. INCOME FROM AIRSPACE RIGHTS-OF-WAY.

(a) REQUIREMENT.—Chapter 1 of title 23, United States Code, is amended by striking out section 156 (relating to highways crossing Federal projects) and inserting in lieu thereof the following:

"§ 156. Income from airspace rights-of-way

"Net income received by any State after September 30, 1987, from the use, lease, or sale of any airspace associated with any project carried out before, on, or after the date of the enactment of this section in whole or in part with Federal assistance made available from the Highway Trust Fund (other than the Mass Transit Account) shall be used by such State to carry out projects eligible for Federal assistance under this chapter.".

(b) CONFORMING AMENDMENT.—The analysis for such chapter is amended by striking out the item relating to section 156 and inserting in lieu thereof the following:

"156. Income from airspace rights-of-way.".

SEC. 128. STRATEGIC HIGHWAY RESEARCH PROGRAM.

Section 307 of title 23, United States Code (relating to research and planning), is amended by redesignating subsections (d) and (e) (and any references thereto) as subsections (e) and (f), respectively, and by inserting after subsection (c) the following new subsection:

"(d) STRATEGIC HIGHWAY RESEARCH PROGRAM.—

"(1) ESTABLISHMENT.—The Secretary, in consultation with the American Association of State Highway and Transportation Officials, shall carry out such research, development, and technology transfer activities as the Secretary determines to be strategically important to the national highway transportation system.

"(2) COOPERATIVE AGREEMENTS.—The Secretary may make grants to, and enter into cooperative agreements with, the American Association of State Highway and Transportation Officials and the National Academy of Sciences to carry out such activities under this subsection as the Secretary determines are appropriate. Advance payments may be made as necessary to carry out such cooperative agreements.

"(3) PERIOD OF AVAILABILITY.—Funds set aside to carry out this subsection shall remain available for the fiscal year in which such funds are made available and the three succeeding fiscal years.

"(4) SET ASIDE.—On October 1, of each of fiscal years 1987, 1988, 1989, 1990, and 1991, the Secretary shall set aside to carry out this subsection not to exceed one-quarter of 1 percent of the funds authorized to be appropriated for the Federal-aid systems, for highway assistance programs under section 103(e)(4) of this title, for bridge replacement and rehabilitation under section 144 of this title, for elimination of hazards under section 152 of this title, and for elimination of hazards of railway-highway crossings under section 203 of the Highway Safety Act of 1973. In the case of funds authorized for apportionment on the Interstate System, the Secretary shall set aside that portion of such funds (subject to the overall limitation of one-quarter of 1 percent) on October 1 of the year next preceding the fiscal year for which such funds are authorized for such System.".

SEC. 129. PLANTING OF NATIVE WILDFLOWERS.

Section 319 of title 23, United States Code, is amended by inserting "(a) LANDSCAPE AND ROADSIDE DEVELOPMENT.—" before "The Secretary" and by adding at the end thereof the following new subsection:

"(b) PLANTING OF NATIVE WILDFLOWERS.—Notwithstanding any other provision of law, not less than one-quarter of 1 percent of the funds expended under landscaping contracts under this title in any State in any fiscal year beginning after the date of the enactment of this subsection shall be used for the planting of native wildflower seeds and seedlings. The requirements of this subsection may be waived by the Secretary if the State certifies that such native wildflowers or seedlings cannot be grown satisfactorily or planting areas are limited.".

SEC. 130. HIGHWAY TECHNICAL AMENDMENTS.

(a) SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982.—(1) The third sentence of section 108(d) of the Surface Transportation Assistance Act of 1982 is amended by striking out "this title," and inserting in lieu thereof "title 23, United States Code,".

(2) The second section 126 of such Act (relating to bicycle transportation) is amended by striking out "SEC. 126." and inserting in lieu thereof "SEC. 126A.".

(3) Section 133 of such Act is amended by striking out "(a)" the first place it appears.

(4) The first sentence of section 163 of such Act is amended to read as follows: "Notwithstanding any other provision of this Act or any other law, no funds apportioned or allocated to a State for Federal-aid highways shall be obligated for a project for constructing, resurfacing, restoring, rehabilitating, or reconstructing a Federal-aid highway which has a lane designated as a carpool lane unless the use of such lane includes use by motorcycles.".

(5) Section 165(b) of such Act is amended by inserting "or" after the semicolon at the end of clause (3).

(6) Section 411(d) of such Act (relating to length limitations) is amended by inserting "and boat" after "automobile".

(b) TITLE 23.—(1) The analysis for chapter 1 of title 23, United States Code, is amended

(A) in the item relating to section 127 by striking out "and width", and (B) by striking out the item relating to section 146 and inserting in lieu thereof:

"146. Carpool and vanpool projects.".

(2) The fifth undesignated paragraph of section 101(a) of such title is amended by striking out "forest or trail" and inserting in lieu thereof "forest road or trail". The thirteenth undesignated paragraph of such section (relating to the definition of "park road") is amended by inserting before the period at the end thereof "and that is owned by the United States".

(3) The first sentence of section 120(f) of such title is amended by striking out ": Provided," and all that follows through the period at the end of such sentence and inserting in lieu thereof a period.

(4) The first sentence of section 122 of such title is amended by inserting "or for substitute highway projects approved under section 103(e)(4) of this title" before "and the retirement".

(5)(A) Subsection (b) of section 125 of such title is amended by striking out "the Interstate System, the Primary System, and on any routes functionally classified as arterials or major collectors" each place it appears and inserting in lieu thereof "the Federal-aid highway systems, including the Interstate System".

(B) Subsection (c) of such section is amended by striking out "routes functionally classified as arterials or major collectors" and inserting in lieu thereof "on any of the Federal-aid highway systems".

(6) Subsection (e) of section 144 of such title is amended by adding at the end thereof the following: "Funds apportioned under this section shall be available for expenditure for the same period as funds apportioned for projects on the Federal-aid primary system under this title. Any funds not obligated at the expiration of such period shall be reapportioned by the Secretary to the other States in accordance with this subsection.".

(7) The second sentence of section 204(b) of such title is amended by inserting "the Secretary or" before "the Secretary of the Interior".

(c) MISCELLANEOUS.—Section 104(i)(4)(D) of the Marine Protection, Research, and Sanctuaries Act of 1972, as added by section 424 of the Surface Transportation Assistance Act of 1982, is amended by inserting "to _____" after "grant a permit".

(d) VENDING MACHINES.—Section 111 of title 23, United States Code, is amended by inserting "(a) IN GENERAL.—" before "All agreements" and by adding at the end thereof the following new subsection:

"(b) VENDING MACHINES.—Notwithstanding subsection (a), any State may permit the placement of vending machines in rest and recreation areas, and in safety rest areas, constructed or located on rights-of-way of the Interstate System in such State. Such vending machines may only dispense such food, drink, and other articles as the State highway department determines are appropriate and desirable. Such vending machines may only be operated by the State. In permitting the placement of vending machines, the State shall give priority to vending machines which are operated through the State licensing agency designated pursuant to section 2(a)(5) of the Act of June 20, 1936, commonly known as the 'Randolph-Sheppard Act' (20 U.S.C. 107a(a)(5)). The costs of installation, operation, and maintenance of vending machines shall not be eligible for Federal assistance under this title.".

(e) MARYLAND INTERSTATE TRANSFER.—Section 7 of the Act entitled "An Act to apportion certain funds for construction of the National System of Interstate and Defense Highways for fiscal year 1985 and to increase the amount authorized to be expended for emergency relief under title 23, United States Code, and for other purposes", approved March 9, 1984 (98 Stat. 55-56), is amended—

(1) in the first sentence by inserting "not to exceed" before "$100,000,000";

(2) in the second sentence by striking out "$100,000,000" and inserting in lieu thereof "an amount equal to the amount of such funds"; and

(3) in the third sentence by striking out "$100,000,000" and inserting in lieu thereof "an amount equal to the amount of funds transferred under this section".

(f) PARK ROADS.—(1) Section 303(c) of title 49, United States Code, is amended by inserting before "requiring the use" the following: "(other than any project for a park road or parkway under section 204 of title 23)".

(2) The third sentence of section 138 of title 23, United States Code, is amended by inserting before "which requires" the following: "(other than any project for a park road or parkway under section 204 of this title)".

(g) REPEAL OF OUTDATED PROVISIONS.—

(1) TITLE 23.—The following sections of title 23, United States Code, and the items in the analysis for chapters 2 and 3 of such title relating to such sections are repealed: 211 (relating to timber access road hearings), 213 (relating to Rama Road), 219 (relating to safer off-system roads), and 322 (relating to demonstration project—rail crossings).

(2) OTHER HIGHWAY LAWS.—Section 119 of the Federal-Aid Highway Amendments of 1974 (relating to bikeway demonstration program) and section 141 of the Federal-Aid Highway Act of 1978 (relating to bicycle program) are repealed.

(h) RELOCATION OF UTILITY FACILITIES.—Section 123(a) of title 23, United States Code, is amended by striking out "the Federal-aid primary or secondary" and all that follows through "urban areas," and inserting in lieu thereof "any Federal-aid system,".

SEC. 131. BUY AMERICA.

(a) LIMITATION ON THE USE OF CERTAIN FOREIGN CEMENT.—Section 165(a) of the Surface Transportation Assistance Act of 1982 is amended by inserting before the period at the end thereof the following: "and unless none of the cement used in such project is produced or manufactured in any foreign country which is located in North America".

(b) ROLLING STOCK EXCEPTION.—

(1) INCREASE IN DOMESTIC CONTENT PERCENTAGE.—Section 165(b)(3) of such Act is amended by striking out "50" and inserting in lieu thereof "85".

(2) LIMITATION ON APPLICATION.—The amendment made by paragraph (1) shall not apply to procurements made pursuant to contracts entered into before June 1, 1986.

(c) INCREASE IN PROJECT COST EXCEPTION.—Paragraph (4) of section 165(b) of such Act is amended by striking "10 per centum" and all that follows through the period at the end of such section and inserting in lieu thereof "25 percent.".

SEC. 132. IMPLEMENTATION OF CERTAIN ORDERS.

In implementing any order issued by the President which provides for or requires a percentage reduction in new budget authority, unobligated balances, obligated balances, new loan guarantee commitments, new direct loan obligations, spending authority, or obligation limitations for the Federal-aid highway, mass transit and highway safety programs and with respect to which the budget account activity as identified in the program and financing schedule contained in the Appendix to the Budget of the United States Government for such programs includes more than one specific highway, mass transit, or highway safety program or project for which budget authority is provided by this Act or an amendment made by this Act, the Secretary shall apply the percentage reduction equally to each such specific program or project.

SEC. 133. PROJECT ELIGIBILITY.

(a) PROJECT DESCRIPTION.—Notwithstanding any other provision of law, policy, and regulation and any interpretation thereof, construction of the alternative for any Interstate route which is recommended in any final environmental impact statement (1) submitted by the State of Massachusetts in September 1983, and (2) approved by the Secretary thereafter, shall be eligible for funds authorized under section 108(b) of the Federal-Aid Highway Act of 1956 and is included as an eligible project in the 1985 interstate cost estimate, and the costs of such construction shall be included in any future interstate cost estimate. Subject to the approval of the Secretary of such impact statement, the Secretary shall enter into project agreements consistent with the provisions of title 23 of the United States Code for construction of such project.

(b) APPORTIONMENT ADJUSTMENT.—

(1) AGREEMENT.—Upon agreement of the Secretary and the Governor of the State of Massachusetts, the Secretary shall reduce the amount of funds to be apportioned to such State under section 104(b)(5)(A) of title 23, United States Code, in each of fiscal years 1987, 1988, and 1989 to an amount sufficient to meet the obligation schedule which the Secretary and such Governor establish for construction of the project described in subsection (a) for such fiscal year.

(2) AVAILABILITY OF FUNDS FOR DISCRETIONARY PROJECTS.—Upon making any reduction under paragraph (1) in the amount of funds apportioned to the State of Massachusetts under such section in such fiscal year, the Secretary shall make available for projects in accordance with section 118(b)(2) of such title an amount equal to the amount of such reduction.

SEC. 134. ELIGIBILITY OF PARK AND RIDE FACILITIES.

(a) ELIGIBILITY FOR INTERSTATE CONSTRUCTION FUNDS.—Notwithstanding any other provision of law, policy, and regulation and any interpretation thereof, construction in the vicinity of Fort Lauderdale, Florida, of 4 park and ride facilities and direct access connectors between such facilities and high occupancy vehicle lanes being constructed on a north-south interstate route which connects Miami and Jacksonville, Florida, shall be eligible for funds (not to exceed $84,000,000) authorized under section 108(b) of the Federal-Aid Highway Act of 1956 and is included as an eligible project in the 1985 interstate cost estimate, and the cost of such construction not to exceed $84,000,000 shall be included in any future interstate cost estimate. The Secretary shall enter into project agreements consistent with the provisions of title 23 of the United States Code for construction of such facilities and connectors.

(b) SIZE OF FACILITIES.—The size of each park and ride facility constructed pursuant

to subsection (a) shall be sufficient to accommodate commuter demand anticipated 20 years after the date on which construction of such facility is approved.

(c) ELIGIBILITY FOR 4R FUNDING.—Notwithstanding any other provision of law, if construction of the facilities and direct access connectors described in subsection (a) costs more than $84,000,000, the State of Florida may use funds apportioned to it under section 104(b)(5)(B) of title 23, United States Code, to complete construction of such facilities and connectors.

SEC. 135. PLANNING, DESIGN, AND CONSTRUCTION.

Notwithstanding any other provision of law, the State of Arkansas may use funds apportioned to it under section 104(b)(5)(A) of title 23, United States Code, for the planning, design, and construction from Interstate Route I-40 to the boundary between Arkansas and Missouri of a two-lane north-south highway which is on the Federal-aid primary system in Arkansas and passes through an urbanized area.

SEC. 136. TRANSFER OF INTERSTATE LANES.

(a) ELIGIBILITY OF INTERSTATE LANE PROJECT.—Any project to construct eligible interstate lanes, as defined in subsection (f), shall be eligible for funds authorized under section 108(b) of the Federal-Aid Highway Act of 1956 and shall be included as an eligible project in any future interstate cost estimate unless the costs of such project are made not eligible for such funds by subsection (c).

(b) APPROVAL OF SUBSTITUTE TRANSIT PROJECT.—Notwithstanding any other provision of law, upon the joint request of the Governor of the State of California and the local governments concerned, the Secretary may approve a substitute transit project for construction of a fixed guideway system in lieu of construction of any eligible interstate lanes if such substitute project is in or adjacent to the proposed right-of-way for such lanes.

(c) ELIGIBILITY FOR FEDERAL ASSISTANCE.—Upon approval of any substitute transit project under subsection (b), the costs of construction of the eligible interstate lanes for which such project is substituted shall not be eligible for funds authorized under section 108(b) of the Federal-Aid Highway Act of 1956 and a sum equal to the Federal share of such costs, as included in the latest interstate cost estimate approved by Congress, shall be available to the Secretary to incur obligations under section 103(e)(4) of title 23, United States Code, for the Federal share of the costs of such substitute project.

(d) LIMITATION ON ELIGIBILITY.—By September 30, 1989, any substitute transit project approved under subsection (b) (for which the Secretary finds that sufficient Federal funds are available) must be under contract for construction or construction must have commenced. If any such substitute transit project is not under contract for construction or construction has not commenced by such date, then immediately after such date, the Secretary shall withdraw approval of such project and no funds shall be appropriated under the authority of section 103(e)(4) of title 23, United States Code, for any such project.

(e) ADMINISTRATIVE PROVISIONS.—

(1) STATUS OF SUBSTITUTE TRANSIT PROJECTS.—A substitute transit project approved under subsection (b) shall be deemed to be a substitute transit project for purposes of section 103(e)(4) of title 23, United States Code (other than subparagraphs (C) and (O)), except that the Federal share for such project shall be the Federal share applicable to the construction of the eligible interstate lanes for which such project is substituted.

(2) REDUCTION OF UNOBLIGATED INTERSTATE APPORTIONMENTS.—Unobligated apportionments for the Interstate System in the State of California shall, on the date of approval of a substitute transit project under subsection (b), be reduced in the proportion that the Federal share of the costs of the construction of the eligible interstate lanes for which such project is substituted bears to the Federal share of the total cost of all interstate routes in that State as reflected in the latest cost estimate approved by Congress.

(3) ADMINISTRATION THROUGH FHWA.—The Secretary shall administer this section through the Federal Highway Administration.

(f) ELIGIBLE INTERSTATE LANES DEFINED.—For purposes of this section, the term "eligible interstate lanes" means any high occupancy vehicle lanes and other lanes—

(1) which are to be constructed on any highway in Los Angeles County, California, designated as a part of the National System of Interstate and Defense Highways by section 140 of the Federal-Aid Highway Act of 1978, and

(2) the costs of construction of which are included in the interstate cost estimate for 1985.

SEC. 137. MODIFICATION OF INTERSTATE TRANSFER CONCEPT PLANS.

(a) REQUEST FOR MODIFICATION BY MARYLAND.—The Governor of the State of Maryland may request a modification of the transfer concept plan approved with respect to withdrawal of a portion of a north-south interstate route in such State and withdrawal of an interstate route which is a spur of a north-south interstate route in such State under section 103(e)(4) of title 23, United States Code—

(1) to include a substitute highway project to upgrade an 18-mile segment on the Federal-aid primary system in the vicinity of Cumberland, Maryland, and

(2) to include such substitute highway and mass transit projects which meet the requirements of such section (other than subparagraph (C)) as such Governor may request.

(b) REQUEST FOR MODIFICATION BY CONNECTICUT.—The Governor of the State of Connecticut may request a modification of any transfer concept plan approved with respect to withdrawal of a portion of any interstate route in such State under section 103(e)(4) of title 23, United States Code, to include such substitute highway and mass transit projects which meet the requirements of such section (other than subparagraph (C)) as such Governor may request.

(c) REQUEST FOR MODIFICATION BY MASSACHUSETTS.—The Governor of the State of Massachusetts may request a modification of any transfer concept plan approved with respect to withdrawal of a portion of any interstate route in such State under section 103(e)(4) of title 23, United States Code—

(1) to include substitute highway projects to upgrade a segment on the Federal-aid primary system in the vicinity of Acton, Concord, Lincoln, and Lexington, Massachusetts, and

(2) to include such substitute highway and mass transit projects which meet the requirements of such section (other than subparagraph (C)) as such Governor may request.

(d) CRITERIA FOR APPROVAL.—Notwithstanding section 103(e)(4) of title 23, United States Code, the Secretary shall approve a modification under subsection (a), (b), or (c) if the Governor of the State of Maryland, Connecticut, or Massachusetts, as the case may be—

(1) submits a request for such modification to the Secretary before September 30, 1987; and

(2) such modification will not result in any increase in the amount of funds available to the Secretary to incur obligations for the Federal share of substitute projects under the transfer concept plan.

(e) EFFECT OF APPROVAL.—Upon approval of a modification under this section, substitute projects described in such modification for inclusion in the transfer concept plan shall be deemed to meet the requirements of subparagraph (C) of section 103(e)(4) of title 23, United States Code.

SEC. 138. PAYBACK OF RIGHT-OF-WAY EXPENSES.

(a) EFFECT OF REPAYMENT.—Upon repayment by the State of New York to the Treasurer of the United States of an amount as determined by the Secretary to be equal to the amount of Federal funds expended to acquire property for the portion of I-478 which was withdrawn from the Interstate System in accordance with the provisions of section 103(e)(4) of title 23, United States Code, the State of New York shall be absolved of any further responsibility for repayment and will be deemed to have fully met all of the repayment requirements of section 103(e)(7) of such title.

(b) USE OF REPAID FUNDS.—The amount repaid to the United States under this section shall be deposited to the credit of the appropriation for "Federal-Aid Highway (Trust Fund)". Such repayment shall be credited to the unprogrammed balance of funds apportioned to the State of New York in accordance with section 104(b)(1) of title 23, United States Code. The amount so credited shall be in addition to all other funds then apportioned to such State and shall be available for expenditure in accordance with the provisions of such title.

SEC. 139. EXPENDITURE OF FEDERAL HIGHWAY FUNDS IN VIRGIN ISLANDS.

(a) LIMITATION.—

(1) IN GENERAL.—Notwithstanding any other provision of law and subject to paragraph (2), no Federal funds shall be expended for the planning, design, and construction of any highway which extends eastward from the vicinity of the Windward Passage Hotel on the western fringe of Charlotte Amalie, Virgin Islands, and a segment of which parallels the existing Charlotte Amalie waterfront and requires extensive landfill along the waterfront.

(2) EXCEPTION.—Federal funds may be expended under a project agreement entered into before January 1, 1986, for planning and design of a highway described in paragraph (1).

(b) FEASIBLE ALTERNATIVES.—

(1) REVIEW.—The Secretary, in cooperation with the Virgin Islands Department of Public Works, shall review existing studies relating to traffic congestion in and around Charlotte Amalie, Virgin Islands, for the purpose of determining feasible alternatives to construction of a highway described in subsection (a) which will reduce traffic congestion in and around Charlotte Amalie.

(2) REPORT.—Not later than 180 days after the date of the enactment of this Act, the Secretary shall report to Congress on the results of the review under this subsection.

SEC. 140. EXEMPTION FROM RIGHT-OF-WAY RESTRICTION.

A facility located in part on the right-of-way of Interstate Route I-94 in Michigan and in the vicinity of the interchange of I-94 and Michigan State Route 25 is hereby exempt from the restrictions contained in section 111 of title 23, United States Code, prohibiting certain commercial establishments on rights-of-way of the Interstate System. Such exemption shall be for the purpose of permitting the Michigan Department of Transportation to enter into a lease agreement allowing the use of such facility for the sale of only those articles which are for export and for consumption outside the United States.

SEC. 141. DONATION OF LANDS.

(a) MARKET VALUE OF DONATED LANDS AS PROJECT COSTS.—Notwithstanding any other provision of law, the fair market value of any lands which have been or in the future are donated or dedicated to the State of California and which are necessary for the right-of-way for relocation and construction of California State Route 73 in Orange County, California, from its interchange with Interstate Route I-405 to its interchange with Interstate Route I-5—

(1) shall be included as a part of the cost of such relocation and construction project, and

(2) shall be credited first toward payment of the non-Federal share of the cost of such relocation and construction project.

(b) CREDIT FOR EXCESS VALUE OF DONATED LANDS ABOVE PROJECT COSTS.—If the fair market value of the lands referred to in subsection (a) exceeds the non-Federal share of the relocation and construction project referred to in subsection (a), then the excess amount, upon the request of the State of California, shall be credited toward the non-Federal share of the cost of any other project on the Federal-aid system in Los Angeles, Orange, Riverside, San Bernardino, and Ventura Counties, California.

(c) RECORDED IRREVOCABLE OFFER OF DONATION TREATED AS DONATION.—To further the purposes of this section and section 323 of title 23, United States Code, any recorded irrevocable offer of dedication or donation of property within the right-of-way for the project referred to in subsection (a) shall be considered as part of the State right-of-way acquisition for purposes of this section if such offer is irrevocable and effective no later than such time as the State of California requests final reimbursement for the Federal share.

(d) LIMITATION.—In no case shall the amount of Federal-aid reimbursement to the State of California on account of the relocation and construction project referred to in subsection (a) exceed the actual cost to the State for such project.

SEC. 142. REMOVAL OF LIMITATIONS ON PROJECT APPROVAL.

(a) PROJECT APPROVAL.—The Secretary shall approve construction of any judicially prohibited highway section which closes a gap of approximately 10.7 miles on the National System of Interstate and Defense Highways.

(b) REMOVAL OF LIMITATIONS.—The construction under subsection (a) shall be approved notwithstanding section 138 of title 23, United States Code, and section 303 of title 49, United States Code.

(c) JUDICIALLY PROHIBITED HIGHWAY SECTION DEFINED.—As used in this section, the term "judicially prohibited highway section" means any section of the National System of Interstate and Defense Highways, including interchanges, construction of which, on the date of the enactment of this Act, is prohibited by a judicial injunction which was reinstated by a United States district court after October 1, 1984.

SEC. 143. SHIRLEY HIGHWAY TRAFFIC RESTRICTIONS.

(a) EXPRESS LANES.—

(1) RUSH HOUR RESTRICTIONS.—The State of Virginia and the District of Columbia shall prohibit the use of the Shirley Highway express lanes by a vehicle other than a bus, an emergency vehicle, a vehicle carrying four or more persons, and a motorcycle—

(A) on southbound lanes, during the hours of 6 o'clock ante meridiem to 9 o'clock ante meridiem on Monday through Friday, exclusive of holidays, and

(B) on southbound lanes, during the hours of 3:30 o'clock post meridiem to 6 o'clock post meridiem on Monday through Friday, exclusive of holidays.

The State of Virginia and the District of Columbia may not prohibit the use of such lanes during such hours by a bus, an emergency vehicle, a vehicle carrying four or more persons, or a motorcycle.

(2) USE OF EXPRESS LANES AT OTHER TIMES.—The State of Virginia and the District of Columbia may not prohibit the use of the Shirley Highway express lanes during hours other than the hours described in paragraph (1) by a vehicle which is not also prohibited from using the other lanes of the Shirley Highway.

(b) DEFINITIONS.—For purposes of this section—

(1) EMERGENCY VEHICLE.—The term "emergency vehicle" includes a public utility vehicle on legitimate emergency business.

(2) MOTORCYCLE.—The term "motorcycle" means a motor vehicle designed to travel on not more than three wheels in contact with the ground.

(3) SHIRLEY HIGHWAY EXPRESS LANES.—The term "Shirley Highway express lanes" means the high occupancy vehicle lanes on Interstate Route I-395 in the District of Columbia and Virginia and on Interstate Route I-95 from its intersection with Interstate Route I-395 to Woodbridge, Virginia.

(c) ENFORCEMENT.—The Secretary shall withhold 1 percent of the amount required to be apportioned to the State of Virginia or to the District of Columbia under sections 104 and 144 of title 23, United States Code, on the first day of the fiscal year succeeding any fiscal year in which the State of Virginia or the District of Columbia, as the case may be, is in violation of any provision of this section.

(d) EFFECTIVE DATE.—This section shall take effect on the date of the enactment of this section, except that it shall take effect on October 1, 1986, to the extent that it applies to motorcycles.

SEC. 144. RAILROAD RELOCATION DEMONSTRATION PROGRAM.

Section 163(p) of the Federal-Aid Highway Act of 1973 (23 U.S.C. 130 note) is amended—

(1) by inserting "(1)" after "(p)";

(2) by inserting "and such sums as may be necessary for the fiscal years ending September 30, 1987, September 30, 1988, September 30, 1989, September 30, 1990, and September 30, 1991," after "September 30, 1986,"; and

(3) by adding at the end thereof the following new paragraph:

"(2) There is authorized to be appropriated, out of the Highway Trust Fund (other than the Mass Transit Account), not to exceed $5,000,000 for fiscal year 1987, for acquisition of rights-of-way, construction of a temporary bypass, and initial construction to depress rail lines for the project described in the second sentence of subsection (d) of this section. Funds authorized by this paragraph shall be available for obligation in the same manner as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of the project for which such funds are authorized shall be determined under this section and such funds shall remain available until expended and shall not be subject to any obligation limitation.".

SEC. 145. MAINTENANCE OF CERTAIN RAILROAD-HIGHWAY CROSSINGS.

(a) GRANTS FOR DEMONSTRATION PROGRAMS.—The Secretary shall make a grant to each State which has located within its boundaries a railroad-highway crossing over which the Consolidated Rail Corporation operates rail vehicles to carry out a demonstration program of providing systematic inspection and service of protective devices at such crossings.

(b) PURPOSE OF GRANTS.—Any demonstration program carried out under this section shall reimburse the Consolidated Rail Corporation for 50 percent of the cost of inspecting and servicing protective devices at railroad-highway crossings in such State over which such corporation operates rail vehicles.

(c) APPORTIONMENT OF FUNDS.—Sums made available to carry out this section shall be apportioned among those States which have located within their boundaries railroad-highway crossings over which the Consolidated Rail Corporation operates rail vehicles in the ratio that the number of such crossings with protective devices in each such State bears to the total number of such crossings with protective devices in all such States.

(d) AMOUNT OF GRANT; FEDERAL SHARE.—The amount of a grant made to a State under this section shall be equal to the amount of funds apportioned to such State under this section in any fiscal year and shall be available to pay 50 percent of the costs incurred by such State in developing and conducting its demonstration program in such fiscal year.

(e) REPORTS.—Each State conducting a demonstration program under this section shall report to the Secretary not later than June 30, 1991, on the results of such program and the effectiveness of such program in improving safety at railroad-highway crossings. The Secretary shall submit a report to Congress not later than September 30, 1991, on the results of demonstration programs carried out under this section and the effectiveness of such programs in improving safety at railroad-highway crossings.

(f) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Secretary to carry out the provisions of this section, out of the Highway Trust Fund (other than the Mass Transit Account), $4,500,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991.

(g) APPLICABILITY OF TITLE 23.—Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of a demonstration program under this section shall be determined in accordance with the provisions of subsection (d) of this section, and such funds shall remain available until expended and shall not be subject to any obligation limitation.

SEC. 146. DEMONSTRATION PROJECTS.

(a) PROJECT DESCRIPTIONS.—

(1) PASSAIC COUNTY, NEW JERSEY.—The Secretary shall utilize the procedures adopted to carry out the demonstration project under section 141 of the Federal-Aid Highway Act of 1976 and the methods for processing highway projects required to be established by section 129 of the Surface Transportation Assistance Act of 1982 to accelerate design and construction of a highway project which completes a gap on the Federal-aid primary system in an urban area along the Passaic River in Passaic County, New Jersey, and for which most of the right-of-way has been acquired.

(2) BRICK TOWNSHIP, NEW JERSEY.—The Secretary shall carry out a highway project to demonstrate methods of improving traffic operations and reducing accidents (A) at a high-volume rotary intersection in Brick Township, New Jersey, and (B) on a route connecting such intersection with another high-volume rotary intersection in Wall Township, New Jersey.

(3) JOHNSTOWN, PENNSYLVANIA.—The Secretary shall carry out a demonstration project in the vicinity of Johnstown, Pennsylvania, for the purpose of demonstrating methods by which a highway construction project on a segment of the Federal-aid primary system will enhance highway safety and economic development in an area of high unemployment.

(4) FORT SMITH, ARKANSAS.—The Secretary shall carry out a highway project to demonstrate the economic growth and development benefits of widening a segment of the Federal-aid urban system connecting a community college and a large commercial center in the vicinity of Fort Smith, Arkansas, and of improving traffic signalization on such segment.

(5) MINNESOTA.—The Secretary shall carry out a demonstration project on the Federal-aid urban system for the purpose of demonstrating the economic and safety benefits of constructing a grade separation between a railroad line and a highway in the vicinity of Moorhead, Minnesota, and of reconstructing two deteriorated segments of a major east-west highway on the Federal-aid primary system in the vicinities of Fosston and Bagley, Minnesota.

(6) DRY RIDGE, KENTUCKY.—The Secretary shall carry out a highway project to demonstrate methods of improving traffic flow and safety on a portion of a Kentucky State highway which connects an interstate route in the vicinity of Dry Ridge, Kentucky, with a highway on the Federal-aid primary system in the vicinity of Owenton, Kentucky.

(7) SAN BERNARDINO COUNTY, CALIFORNIA.—The Secretary shall carry out a demonstration project in the vicinity of the Ontario International Airport in San Bernardino County, California, for the purpose of demonstrating methods of improving highway access to an airport which is projected to incur a substantial increase in air service.

(8) ALTOONA, PENNSYLVANIA.—The Secretary shall carry out a highway project to close a gap of approximately 12 miles in a multilane limited access road connecting the city of Altoona to the borough of Tyrone in Blair County, Pennsylvania, for the purpose of demonstrating state of the art delineation technology. For comparison purposes, the highway section to be constructed shall connect a highway section constructed with current delineation technology and an older highway section constructed with traditional delineation technology. The project shall demonstrate the latest horizontal and vertical delineation techniques and utilize innovative techniques in highway delineation treatments to improve traffic control and highway safety. All delineation elements shall be designed to provide the optimum life-cycle costs, thereby maximizing the highway safety benefits and minimizing future maintenance costs. The Secretary shall provide necessary technical assistance in the design and construction of the project. Upon completion of the project, the highway shall be added to the Federal-aid primary system.

(9) LOUISIANA.—

(A) LAFAYETTE.—The Secretary is authorized to carry out a highway project to demonstrate the benefits to traffic flow and transportation of labor and materials by construction of a highway to provide limited continuous access between an interstate route and a highway on the Federal-aid primary system in Lafayette, Louisiana.

(B) SHREVEPORT.—The Secretary is authorized to carry out a highway project which will demonstrate methods of reducing traffic congestion in the central business district of Shreveport, Louisiana, improving access to such district, providing highway continuity, and satisfying national defense requirements by connecting an interstate route with another interstate route which serves as a bypass around such city.

(10) MIAMI, FLORIDA.—The Secretary is authorized to carry out a highway project which will demonstrate the most cost effective method of improving interstate motor vehicle access for passengers and cargo moving to and from the port of Miami, Florida.

(11) ARKANSAS-MISSOURI.—

(A) BELLA VISTA, ARKANSAS.—The Secretary is authorized to carry out a highway project in the State of Arkansas on a segment of a north-south highway on the Federal-aid primary system from the vicinity of the junction of Interstate Routes I-40 and I-540 to the boundary between the States of Arkansas and Missouri in the vicinity of Bella Vista, Arkansas, for the purpose of demonstrating methods of improving highway safety and of accelerating highway construction. Such project shall increase the number of lanes on such segment from two to four.

(B) CARTHAGE, MISSOURI.—The Secretary is authorized to carry out a highway project on a segment of a north-south highway on the Federal-aid primary system from the vicinity of Carthage, Missouri, to the boundary between the States of Arkansas and Missouri in the vicinity of Noel, Missouri, for the purpose of demonstrating methods of improving highway safety and accelerating highway construction. Such project shall increase the number of lanes on such segment from two to four.

(C) DESIGN FEATURES; TECHNICAL ASSISTANCE.—The projects authorized by subparagraphs (A) and (B) of this paragraph shall also demonstrate the latest high-type geometric design features and new advances in highway traffic control and safety hardware. All design elements, including the highway pavement, shall be designed to provide the best life-cycle costs, thereby minimizing future maintenance costs. The Secretary shall provide necessary technical assistance in the design and construction of such projects.

(12) SANFORD, FLORIDA.—The Secretary shall carry out a highway project to demonstrate methods of reducing costs and expediting construction of an interchange in the vicinity of Sanford, Florida, and the intersection of route 46A and an interstate route by contracting with a private business to design and construct such project.

(13) SAN JOSE, CALIFORNIA.—The Secretary is authorized to carry out a demonstration project in the vicinity of San Jose and Santa Clara, California, for the purpose of demonstrating a unified method of reducing traffic congestion on a Federal-aid urban highway which is the result of the intersection of such highway with two other Federal-aid urban highways and a railroad crossing in a one-quarter mile segment of such highway.

(14) DISTRICT OF COLUMBIA.—

(A) PROJECT DESCRIPTION.—The Secretary shall carry out a demonstration project in the vicinity of the C&O Canal in the District of Columbia for the purpose of substantially improving motor vehicle access at a major traffic generator without decreasing the efficiency of a Federal-aid primary highway. The Secretary shall enter into such arrangements as may be necessary to carry out such project with the Secretary of the Interior.

(B) LIMITATION.—No Federal assistance shall be provided to carry out the demonstration project under this paragraph until private sources dedicate at least 2.5 acres of land as a scenic easement for project purposes.

(15) COMPTON, CALIFORNIA.—The Secretary shall carry out a highway project for construction of a grade separation on a route on the Federal-aid urban system in Compton, California, for the purpose of demonstrating methods of relieving traffic congestion and enhancing economic development.

(16) MODESTO, CALIFORNIA.—The Secretary shall carry out a highway project to demonstrate methods by which construction of a grade separation for a railroad crossing of a highway on the Federal-aid primary system enhances urban redevelopment and the effectiveness of a planned transportation center in Modesto, California.

(17) COLUMBIA, MISSOURI.—The Secretary shall carry out a highway project for construction of two additional lanes on a two-lane 106-mile highway on the Federal-aid primary system which begins in the vicinity of Columbia, Missouri, and ends in the vicinity of Lancaster, Missouri, for the purpose of demonstrating methods of improving highway safety, reducing traffic congestion, and encouraging economic development.

(18) EAST MILTON, MASSACHUSETTS.—The Secretary is authorized to carry out a highway project to demonstrate the advantages of joint development and use of air rights in the construction of a deck over a depressed portion of an interstate route in East Milton, Massachusetts.

(19) FAIRHOPE, ALABAMA.—The Secretary, in cooperation with the State of Alabama, shall carry out a highway project in the vicinity of Fairhope and Foley, Alabama, to demonstrate methods of accelerating the widening of a highway traffic segment of highway on the Federal-aid primary system necessary for the rapid evacuation of individuals during emergency weather conditions.

(20) WILDER, KENTUCKY.—The Secretary shall carry out a highway project in the vicinity of Wilder in Campbell County, Kentucky, to demonstrate the economic benefits to a port facility, industrial complex, and foreign trade zone and methods of enhancing highway safety by reconstruction of a segment of a highway on the Federal-aid urban system which connects an interstate route with a port facility. Such project shall increase the number of lanes on such high-

*way from two to four and may include realignment of such highway.*

*(21) JO DAVIESS, ILLINOIS.—The Secretary shall carry out a highway project to demonstrate the safety benefits of providing additional and improved vehicular passing opportunities on, adding truck climbing lanes to, and straightening, a 50-mile segment of an east-west highway on the Federal-aid primary system which carries a high volume of traffic in Jo Daviess and Stephenson Counties, Illinois.*

*(22) ALLENTOWN, PENNSYLVANIA.—The Secretary is authorized to carry out a highway project in the city of Allentown, Pennsylvania, for the purpose of demonstrating methods of accelerating construction to eliminate a major rail-highway crossing at grade, reducing traffic delays for both rail and motor vehicle traffic, and minimizing the impact on the surrounding urban environment.*

*(23) RIVERSIDE, CALIFORNIA.—The Secretary shall carry out a highway project to demonstrate methods of improving safety on a highway on the Federal-aid primary system in Riverside, California, which is designated as a priority primary route under section 147 of title 23, United States Code, by Committee Print numbered 99-4 of the Committee on Public Works and Transportation of the House of Representatives.*

*(24) BUFFALO, NEW YORK.—The Secretary shall carry out a highway project in Buffalo, New York, for the purpose of demonstrating methods of facilitating redevelopment of a waterfront area by construction of a connector off a highway on the Federal-aid primary system. Upon completion of the project, the connector shall be added to the Federal-aid urban system.*

*(25) CLEVELAND, OHIO.—The Secretary shall carry out a highway project to replace a ramp which provides access to an industrial area of Cleveland, Ohio, for the purpose of demonstrating the relationship between infrastructure improvement and economic vitality.*

*(26) PATTON ISLAND, ALABAMA.—The Secretary shall carry out a highway project to construct a bridge to cross the Tennessee River in Lauderdale and Colbert Counties, Alabama, in the vicinity of Patton Island, Alabama, for the purpose of demonstrating methods of improving highway transportation and enhancing economic development.*

*(27) PORT CLINTON, OHIO.—The Secretary shall carry out a highway project to upgrade an east-west State route between Port Clinton and Toledo, Ohio, for the purpose of demonstrating methods of improving traffic flow between a recreational area and a metropolitan area.*

*(28) CHICAGO, ILLINOIS.—The Secretary shall carry out the following highway projects in Chicago, Illinois:*

*(A) A highway project to rehabilitate a drawbridge over the north branch of the Chicago River and realign an adjacent intersection which will demonstrate the use of the latest innovative bridge repair techniques on a bascule bridge.*

*(B) A highway project to remove and replace an existing bridge on Lake Shore Drive in the Jackson Park Historic Landscape District and the Midway Plaissance with a new bridge in the same location and to widen the approach road to such bridge which will demonstrate the historic recreation of a national register bridge and replacement of a deteriorated bridge.*

*(C) A highway project between Chicago Avenue and Claybourn Avenue to disinvest a bridge over Goose Island which will demonstrate methods of reducing municipal and Federal burdens for rehabilitation and maintenance of a surplus highway facility.*

*(29) WAYNE COUNTY, MICHIGAN.—The Secretary shall carry out two road improvement projects in Wayne County, Michigan, to demonstrate the benefits of enhancing safety and improving economic vitality of a depressed area.*

*(30) COOK COUNTY, ILLINOIS.—*

*(A) CHICAGO.—The Secretary shall carry out a highway project which demonstrates methods of utilizing a low cost alternative to reconstruction of a one mile segment of an east-west road between Nagle and Oak Park Avenues, Chicago, Illinois, which is deficient due to soil conditions.*

*(B) SOUTHWEST CHICAGO.—The Secretary shall carry out a highway project to construct three parking facilities adjacent to the Rock Island commuter rail lines in Southwest Chicago, Illinois, which will demonstrate the effectiveness of construction of parking facilities in relieving on-street parking congestion and unsafe parking practices.*

*(C) OAK LAWN.—The Secretary shall carry out a highway project in Oak Lawn, Illinois, which demonstrates methods of improving highway safety by widening and resurfacing a four-lane major arterial with lane widths which are less than minimum State and Federal standards.*

*(D) CALUMET PARK.—The Secretary shall carry out a highway project which demonstrates methods of improving highway safety and access to a segment of the Interstate System by reconstruction of a congested major arterial in Calumet Park and Blue Island, Illinois.*

*(E) CUMBERLAND STATION.—The Secretary shall carry out a highway project to construct the first level of a two level addition to an existing park and ride facility in the vicinity of Cumberland Station on the O'Hare Rapid Transit Line, Chicago, Illinois, which will demonstrate methods of reducing commuter traffic and traffic congestion and increasing utilization of available capacity on a rapid transit line.*

*(F) ELEVATED ROAD.—The Secretary shall carry out a highway project to demonstrate the benefits of utilizing precast, prefabricated concrete structural segments in the reconstruction of an elevated road on a major artery in the southwestern portion of Chicago, Illinois, in order to minimize traffic disruption during the reconstruction.*

*(G) PARKING FACILITIES.—The Secretary shall carry out a demonstration project for the construction of two parking lots at sites (i) where future stations are to be located on the Southwest Rapid Transit Line in Chicago, Illinois, and (ii) to which buses now provide mass transit service. Such project shall be carried out before the beginning of service on such rapid transit line in order to demonstrate methods of facilitating the transfer of passengers between different modes of transportation and of establishing ridership before the opening of a rapid transit line.*

*(31) KANSAS CITY, MISSOURI.—The Secretary shall carry out a highway project on a north-south route on the Federal-aid primary system in Kansas City, Missouri, to demonstrate methods by which construction of the first and southern-most phase of a 5-phase highway project will facilitate construction of the full 5-phase project. Construction of the 5-phase project—*

*(A) will connect the northern terminus of another route on the Federal-aid primary system and an east-west interstate route,*

*(B) will demonstrate the interrelationship between construction of a major urban transportation artery and economic development initiatives in facilitating reinvestment in an urban area experiencing economic decay, and*

*(C) will demonstrate methods of reducing traffic congestion through construction of a roadway that is compatible with adjacent residential neighborhoods and commercial areas.*

*(32) MOUNT VERNON, KENTUCKY.—The Secretary is authorized to carry out a highway project on a segment of the Federal-aid primary system which connects Interstate Route I-75 in the vicinity of Mount Vernon, Kentucky, with Kentucky State Route 80 in the vicinity of Shopville, Kentucky, for the purposes of demonstrating methods of improving highway safety and traffic flow and improving access to a national river and recreation area.*

*(33) PINE CITY, MINNESOTA.—The Secretary is authorized to carry out a highway project in Pine City, Minnesota, to demonstrate methods of enhancing economic development and improving highway safety and traffic flow by construction of an interchange between a highway on the Interstate System and a county State-aid highway.*

*(34) PASO ROBLES, CALIFORNIA.—The Secretary is authorized to carry out a highway project in the city of Paso Robles, California, to construct a two-lane, east-west bridge which will span the Salinas River, a highway, and a railroad line and will be located south of the existing bridges spanning such river in such city, for the purposes of demonstrating methods of improving highway safety and traffic flow and enhancing economic development.*

*(35) SUFFOLK COUNTY, NEW YORK.—The Secretary is authorized to carry out a highway project from Wheeler Road to Veterans Memorial Highway in the town of Islip, Suffolk County, New York, for the purpose of demonstrating construction techniques to accelerate upgrading of an existing highway to freeway standards with minimum disruption of traffic.*

*(36) CONNECTICUT.—*

*(A) SOUTHINGTON.—The Secretary shall carry out a highway project to demonstrate the latest construction techniques in reconstructing a north-south segment of highway on the Federal-aid urban system in the vicinity of Southington, Connecticut.*

*(B) KENT CENTER.—The Secretary shall carry out a highway project to change horizontal and vertical alignment of a north-south highway on the Federal-aid primary system south of Kent Center, Connecticut, to demonstrate methods of solving safety and flooding problems.*

*(37) DOVER TOWNSHIP, NEW JERSEY.—The Secretary is authorized to carry out a highway project to construct a bridge across the Toms River in the township of Dover, New Jersey, for the purpose of demonstrating methods of reducing traffic congestion on an existing bridge and facilitating the redevelopment of the central business district of such township.*

*(38) LOS ANGELES COUNTY, CALIFORNIA.—The Secretary is authorized to carry out a highway project in Los Angeles County, California, for the purpose of demonstrating methods of improving vehicular circulation related to the intermodal transportation of port-related traffic and alleviating congestion caused by increased port activities.*

*(39) GREATER PITTSBURGH INTERNATIONAL AIRPORT.—The Secretary shall carry out in the vicinity of the Greater Pittsburgh Inter-*

national Airport a highway project for construction of a highway which is designated as a priority primary route under section 147 of title 23, United States Code, by Committee Print numbered 99-4 of the Committee on Public Works and Transportation of the House of Representatives to demonstrate methods of improving economic development and airport terminal placement.

(40) STEUBEN COUNTY, NEW YORK.—The Secretary shall carry out a highway project in Steuben County, New York, for the purpose of demonstrating the extent to which the economy of an industrialized high unemployment area can be improved by completion of key elements of a modern, grade-separated access controlled highway which serves such area.

(41) SONOMA AND MARIN COUNTIES, CALIFORNIA.—

(A) SANTA ROSA.—The Secretary shall carry out a highway project for the purpose of demonstrating the extent to which traffic congestion is relieved by reconstruction of a north-south arterial which (i) connects Santa Rosa, California, and Petaluma, California, (ii) is parallel to a major north-south segment of the Federal-aid primary system, and (iii) serves as an alternative for traffic between such cities.

(B) HEALDSBURG.—The Secretary shall carry out a highway project for the purpose of demonstrating the extent to which traffic congestion is relieved on the major north-south segment of the Federal-aid primary system described in subparagraph (A) by construction of high occupancy vehicle lanes along a right-of-way which is parallel to such segment and connects San Rafael, California, and Healdsburg, California.

(42) VOYAGEURS NATIONAL PARK, MINNESOTA.—The Secretary shall carry out a highway project which demonstrates methods of enhancing use of a national park and reducing traffic congestion by reconstruction of an access road to Voyageurs National Park, Minnesota.

(43) SAVANNAH, GEORGIA.—The Secretary, in cooperation with the State of Georgia, shall carry out a highway project for replacing an existing functionally obsolete bridge across the Savannah River in Savannah, Georgia, with a modern, high-level structure for the purpose of demonstrating methods of improving safety and the free flow of both vehicular and waterborne traffic including traffic related to national defense.

(44) NEW SEWICKLY, PENNSYLVANIA.—The Secretary shall carry out a highway project to construct a two-lane highway between the township of New Sewickly, Pennsylvania, and the borough of Conway, Pennsylvania, for the purpose of demonstrating methods of accommodating increasing truck traffic and improving highway safety.

(45) CROYLE TOWNSHIP, PENNSYLVANIA.—The Secretary shall carry out a highway project to upgrade a 1.3 mile access road to the Johnstown Flood National Memorial in the vicinity of Croyle Township, Pennsylvania, for the purpose of demonstrating methods of improving public access to a flood memorial.

(46) LAWRENCE, MASSACHUSETTS.—The Secretary shall carry out in Lawrence, Massachusetts, a highway project to demonstrate methods of enhancing the benefits of an economic rehabilitation project under construction by construction of a service road which provides access between Massachusetts Avenue and Merrimack Street substantially along an alignment located between the Shawsheen River and an interstate route.

(47) BATON ROUGE, LOUISIANA.—

(A) The Secretary shall carry out a highway project in the vicinity of Baton Rouge, Louisiana, for the purpose of demonstrating the benefits of reducing traffic congestion in the immediate vicinity of a split-diamond interchange which connects an east-west highway on the Interstate System, two 4-lane highways not on such System, and a 2-lane highway not on such System by providing—

(i) a direct exit lane from the westbound lanes of the highway on such System to one of such four-lane highways;

(ii) a direct access ramp and acceleration lane from such four-lane highway to the eastbound lanes of the highway on such System; and

(iii) a direct exit lane from the eastbound lanes of the highway on such System to the other of such four-lane highways.

(B) The Secretary shall carry out a highway project in the vicinity of Baton Rouge, Louisiana, for the purpose of demonstrating the benefits of reducing traffic congestion in the immediate vicinity of a convergence of an east-west highway on the Interstate System and a north-south highway on such System by construction of an additional ramp lane.

(C) The Secretary shall carry out a highway project in the vicinity of East Baton Rouge, Louisiana, for the purpose of demonstrating the most cost-effective methods of reducing traffic congestion in the immediate vicinity of (i) a diamond interchange which connects an east-west highway on the Interstate System and a 4-lane highway not on such System, and (ii) a nearby intersection of such 4-lane highway and a 2-lane service road.

(D) The Secretary shall carry out a highway project in the vicinity of northeast Baton Rouge, Louisiana, for the purpose of demonstrating the efficacy of reducing traffic congestion and improving traffic flow in the immediate vicinity of a highway on the Interstate System to connect such highway to a metropolitan airport terminal access road by construction of a direct access off-ramp link.

(48) MINDEN, LOUISIANA.—The Secretary shall carry out a highway project for the purpose of demonstrating methods of enhancing economic development by construction of a frontage road which provides Minden, Louisiana, alternative access to a highway immediately connecting to a highway on the Interstate System.

(49) ANAHEIM, CALIFORNIA.—The Secretary shall carry out a project for research, development, and implementation of a computerized transportation management system to assist the city of Anaheim, California, and adjoining jurisdictions in managing highway traffic congestion caused in part by an interstate route passing through an area of concentrated population and commercial development for the purpose of demonstrating the usefulness of such a system in reducing traffic congestion.

(50) ISLE OF PALMS, SOUTH CAROLINA.—The Secretary shall carry out a highway project connecting the Isle of Palms, South Carolina, to the mainland for the purpose of demonstrating the reduction in traffic congestion, improved emergency preparedness, and increased accessibility to a sea island by construction of a high-level fixed span bridge over a high-volume intracoastal waterway segment.

(51) CLARKSVILLE, TENNESSEE.—The Secretary shall carry out a highway project to demonstrate methods of improving highway safety by making improvements to a road providing direct access from the Fort Campbell Military Reservation to the city of Clarksville, Tennessee.

(52) CLARINDA, IOWA.—The Secretary shall carry out a highway project to reconstruct and rehabilitate a highway between Shenandoah and Clarinda, Iowa, for the purpose of demonstrating methods by which improved highway transportation in an economically depressed rural area will increase economic activity in such area.

(53) SAN DIEGO COUNTY, CALIFORNIA.—The Secretary shall carry out a highway project to expand a highway which connects an interstate route in the vicinity of Oceanside, California, with another interstate route in the vicinity of Escondido, California for the purpose of demonstrating methods of reducing traffic congestion and accidents.

(54) ST. CHARLES COUNTY, MISSOURI.—The Secretary shall carry out a highway project to construct a bypass highway to connect an east-west interstate route in St. Charles County, Missouri, with the interstate beltway around St. Louis, Missouri, for the purpose of demonstrating methods of alleviating traffic congestion, especially commuter traffic congestion.

(55) JONESBORO, ARKANSAS.—The Secretary shall carry out a highway project for construction of four grade separations on a four-lane bypass route in the vicinity of Jonesboro, Arkansas, for the purpose of demonstrating methods of improving highway safety.

(56) ILLINOIS.—

(A) MT. VERNON.—The Secretary is authorized to carry out a highway project to reconstruct a segment of approximately 1.4 miles of a State route connecting to an interstate route in the vicinity of Mt. Vernon, Illinois, for the purpose of demonstrating methods of improving highway safety.

(B) EVANSVILLE.—The Secretary is authorized to carry out a highway project to upgrade a principal route through the village of Evansville, Illinois, for the purpose of demonstrating methods of improving traffic flow.

(C) UNION COUNTY.—The Secretary is authorized to carry out a highway project to improve a road leading to a landmark in the vicinity of the city of Alto Pass, Union County, Illinois, for the purpose of demonstrating methods of improving access to such a landmark and of enhancing tourism.

(57) CONCORD, CALIFORNIA.—The Secretary shall carry out a highway project between Concord, California, and West Pittsburg, California, for the purpose of demonstrating methods of improving highway safety and traffic flow by lowering the grade of, realigning, and widening an existing highway on the Federal-aid primary system.

(58) GEORGIA.—The Secretary shall carry out a highway project which demonstrates methods of improving highway safety and reducing traffic accidents by reconstruction of a 3.8 mile segment of highway between Interstate Route I-285 and the fork of Georgia State Route 141 as a 6-lane controlled access freeway with one-way frontage roads in each direction.

(59) PIKE COUNTY, KENTUCKY.—The Secretary shall carry out a highway project to reconstruct a highway on the Federal-aid primary system between Open Fork Road and Road Fork of Big Creek Road in Pike County, Kentucky, for the purpose of demonstrating methods of improving highway safety in a mountainous area.

(60) MADISON COUNTY, ILLINOIS.—The Secretary shall carry out a highway project to

*demonstrate the economic growth and development benefits of reconstructing a segment of road in Madison County, Illinois, which serves a high-growth industrial area.*

*(61) ERWIN, TENNESSEE.—The Secretary shall carry out a highway project to extend, approximately 15 miles, a highway on the Appalachian development highway system between River View in Erwin, Tennessee, and Sam's Gap on the North Carolina-Tennessee border for the purpose of demonstrating methods of improving transportation in a mountainous area.*

*(62) NEW RIVER, WEST VIRGINIA.—The Secretary is authorized to carry out a demonstration project to construct a parkway connecting to an interstate route, in accordance with the recommendations of the New River Parkway Authority, in the vicinity of the New River, West Virginia, for the purpose of demonstrating benefits to recreation, tourism, and industrial, economic, and community development.*

*(63) KITTANNING-BROOKVILLE, PENNSYLVANIA.—The Secretary is authorized to carry out a project for reconstruction of approximately 30 miles of a two-lane road on the Federal-aid primary system between Kittanning and Brookville, Pennsylvania, for the purpose of demonstrating cost-effective methods of improving rural highways to accommodate wider and longer trucks.*

*(64) AURORA-HOYT LAKES, MINNESOTA.—The Secretary is authorized to carry out a project for construction of a highway connecting Aurora-Hoyt Lakes and Silver Bay, Minnesota, for the purpose of demonstrating methods of reducing traffic congestion in and around a recreational area.*

*(65) KANAWHA COUNTY, WEST VIRGINIA.—The Secretary shall carry out a highway project which demonstrates methods of improving traffic flow in a rural area by reconstruction of the Chelyan Bridge in Kanawha County, West Virginia.*

*(66) ROANOKE SOUND, NORTH CAROLINA.—The Secretary shall carry out a highway project which demonstrates methods of improving tourism, commercial enterprise, and water and highway transportation by construction of a bridge on a east-west Federal-aid primary route which connects Manteo and Whalebone, North Carolina, and traverses Roanoke Sound.*

*(67) LINCOLN, ILLINOIS.—The Secretary shall carry out a highway project which demonstrates methods of improving highway safety and reducing traffic congestion by construction of a controlled access freeway which connects Interstate Route I-55 in the vicinity of Lincoln, Illinois, and Interstate Route I-74 in the vicinity of Morton, Illinois.*

*(68) SPARKS, NEVADA.—The Secretary shall carry out a highway project which demonstrates methods of improving economic development and diversification, and eliminating traffic and highway safety hazards by construction in the city of Sparks, Nevada, of an interchange which connects Interstate Route I-80 and Sparks Boulevard.*

*(69) BURBANK-GLENDALE-PASADENA AIRPORT, CALIFORNIA.—The Secretary shall carry out a highway project which demonstrates methods of coordinating construction of ground access to an airport and construction of terminal and parking facilities at such airport. The Secretary shall carry out such project at the Burbank-Glendale-Pasadena Airport, California, by making a grant for construction of such ground access to the airport authority for such airport.*

*(70) EL SEGUNDO, CALIFORNIA.—The Secretary shall carry out a highway project to increase the capacity of a tunnel in the vicinity of an airport serving El Segundo, California, which will demonstrate methods of mitigating increased traffic congestion which is projected to result from completion of a segment of the Interstate System.*

*(71) ALAMEDA ISLAND, CALIFORNIA.—The Secretary shall carry out a highway project to demonstrate methods of improving access to, and alleviating congestion on, a north-south route designated as part of the Interstate System under section 139 of title 23, United States Code, and its access roads, including access roads from Oakland International Airport and Alameda Island, California, to such interstate route.*

*(72) DOUGLAS COUNTY, KANSAS.—The Secretary shall carry out a highway project in Douglas County, Kansas, to demonstrate methods of reducing traffic congestion and facilitating the usage by motorists on the Interstate System of recreational facilities by construction of a north-south limited access trafficway of approximately 4 miles in length which will connect an east-west interstate route to a reservoir and a university research park.*

*(73) CHADVILLE, PENNSYLVANIA.—The Secretary shall carry out a highway project to relocate and reconstruct a 3.5-mile, 2-lane, north-south segment of the Federal-aid primary system from the vicinity of Uniontown Bypass at Chadville, Pennsylvania, to Pennsylvania Legislative Route 26082 in the vicinity of Fairchance, Pennsylvania, which will demonstrate methods of enhancing the development of a major industrial site.*

*(74) CHAMBERSBURG, PENNSYLVANIA.—The Secretary shall carry out a highway project which demonstrates how construction of an interchange on a north-south interstate route will provide access to Chambersburg, Pennsylvania, and relieve traffic congestion on an existing interchange on such interstate route.*

*(75) BEAUMONT, TEXAS.—The Secretary shall carry out a highway project which demonstrates how construction of an overpass over an interstate route in the vicinity of the city of Beaumont, Texas, will relieve traffic congestion on such interstate route and provide direct access between the central business district of such city and another part of such city.*

*(76) ST. LOUIS COUNTY, MINNESOTA.—The Secretary shall carry out a highway project for the construction of an access road from County Road 413 in St. Louis County, Minnesota, to a recreational complex on the Bois Forte Chippewa Reservation (Vermilion Sector) to demonstrate methods of providing jobs and enhancing economic development in a severely and chronically depressed area.*

*(77) GLOUCESTER COUNTY, VIRGINIA.—The Secretary, in consultation with the Governor of Virginia, the Secretary of Defense, and the Secretary of the Interior, shall carry out site selection and environmental studies and design and engineering for replacement or expansion of a bridge connecting Gloucester County with York County and the cities of Newport News and Hampton, Virginia, for the purpose of demonstrating methods of facilitating the resolution of Federal intra-governmental conflicts.*

*(78) ARCOLA, TEXAS.—The Secretary shall carry out a highway project in Arcola, Texas, which demonstrates methods by which construction of a grade separation project between the intersection of 2 highways and a railroad crossing improves traffic flow and highway safety.*

*(79) HAMMOND, INDIANA.—The Secretary shall enter into such arrangements as may be necessary to carry out a demonstration project in Hammond, Indiana, for the relocation of railroad lines for the purpose of eliminating railroad-highway grade crossings. If the city of Hammond, Indiana, elects to carry out all or any portion of the demonstration project authorized by this paragraph before the funds authorized to be appropriated to carry out this paragraph are made available, the Secretary shall reimburse with such funds the city for the costs of carrying out such project or portion.*

*(80) ERIE COUNTY, NEW YORK.—The Secretary is authorized to carry out a highway project in Erie County, New York, to demonstrate methods of enhancing safety and reducing traffic congestion and delays at the terminus of an interstate route by relocating the terminus of such route.*

*(81) TAMPA, FLORIDA.—The Secretary is authorized to carry out the remaining design work for a highway project for construction of a grade separation on a route on the Federal-aid primary system in the vicinity of Tampa, Florida, for the purpose of demonstrating methods of improving motor vehicle access between rapidly growing urban areas as well as relieving motor vehicle congestion resulting from the transportation of freight to and from areas for the transshipment of waterborne commerce.*

*(b) REPORTS.—*

*(1) IN GENERAL.—Not later than January 31 of calendar years 1988, 1989, 1990, and 1991, the Secretary shall submit to Congress a report on the status of the projects authorized by this section and on the results of any such projects which are completed in the preceding fiscal year.*

*(2) PASSAIC COUNTY, NEW JERSEY.—Not later than 180 days after completion of the demonstration project under subsection (a)(1), the Secretary shall submit a report to Congress on the results of such project (including the timesavings), along with a description of the procedures used to accelerate design and construction of such project, a summary of the manner in which the techniques used in carrying out such project in an urban area differed from the techniques used in the demonstration project carried out under section 141 of the Federal-Aid Highway Act of 1976 in a rural area, and an analysis of the costs and benefits of the accelerated completion of the project conducted under such paragraph (1).*

*(3) ALTOONA, PENNSYLVANIA.—Not later than one year, six years, and 11 years after the completion of the state of the art delineation technology project under subsection (a)(8), the Secretary shall submit reports to the Congress, including but not limited to the results of such project, the effects of using the best delineation technology on safety and other considerations, recommendations for applying the results to other highway projects, and any changes that may be necessary by law to permit further use of such delineation techniques.*

*(4) ARKANSAS-MISSOURI.—Not later than one year, six years, and 11 years after the completion of the projects under subsection (a)(11), the Secretary shall submit reports to the Congress, including but not limited to the results of such projects, the effects of using design features and advances described in such paragraph on safety and other considerations, recommendations for applying the results to other highway projects, and any changes that may be necessary by law to permit further use of such features and advances.*

*(c) AUTHORIZATION OF APPROPRIATIONS FROM HIGHWAY TRUST FUND.—There is authorized*

to be appropriated, out of the Highway Trust Fund (other than the Mass Transit Account)—

(1) to carry out subsection (a)(1) $5,000,000 for fiscal year 1987; $28,000,000 for fiscal year 1988, $12,000,000 for fiscal year 1989, and $5,000,000 for fiscal year 1990;

(2) to carry out subsection (a)(2) $6,800,000 for fiscal year 1987 and $13,200,000 for fiscal year 1988;

(3) to carry out subsection (a)(3) $12,000,000 for fiscal year 1987;

(4) to carry out subsection (a)(4) $8,500,000 for fiscal year 1987;

(5) to carry out subsection (a)(5) $3,000,000 for fiscal year 1987 and $2,000,000 for fiscal year 1988;

(6) to carry out subsection (a)(6) $1,600,000 for fiscal year 1987, $2,300,000 for fiscal year 1988, and $16,600,000 for fiscal year 1989;

(7) to carry out subsection (a)(7) $4,000,000 for fiscal year 1987, $4,000,000 for fiscal year 1988, $4,000,000 for fiscal year 1989, $17,000,000 for fiscal year 1990, and $9,000,000 for fiscal year 1991;

(8) to carry out subsection (a)(8) $3,000,000 for fiscal year 1987, $8,000,000 for fiscal year 1988, $18,000,000 for fiscal year 1989, $26,000,000 for fiscal year 1990, and $35,000,000 for fiscal year 1991;

(9) to carry out preliminary engineering and design, initial utility relocation, and land acquisition under subsection (a)(9) $6,000,000 for fiscal year 1987, $15,000,000 for fiscal year 1990, and $19,000,000 for fiscal year 1991;

(10) to carry out preliminary engineering and design under subsection (a)(10) $1,300,000 for fiscal year 1987, $4,500,000 for fiscal year 1988, and $4,500,000 for fiscal year 1989;

(11)(A) to carry out preliminary engineering and design, utility relocation, land acquisition, and initial construction under subsection (a)(11)(A) $5,000,000 for fiscal year 1987, $5,000,000 for fiscal year 1988, $10,000,000 for fiscal year 1989, $10,000,000 for fiscal year 1990, and $15,000,000 for fiscal year 1991; and

(B) to carry out preliminary engineering and design, utility relocation, land acquisition, and initial construction under subsection (a)(11)(B) $5,000,000 for fiscal year 1987, $5,000,000 for fiscal year 1988; $10,000,000 for fiscal year 1989, $10,000,000 for fiscal year 1990, and $15,000,000 for fiscal year 1991;

(12) to carry out subsection (a)(12) $200,000 for fiscal year 1987, $200,000 for fiscal year 1988, $6,200,000 for fiscal year 1989, and $7,400,000 for fiscal year 1990;

(13) to carry out subsection (a)(13) $8,000,000 for fiscal year 1987, $8,000,000 for fiscal year 1988, $7,000,000 for fiscal year 1989, and $6,000,000 for fiscal year 1990;

(14) to carry out subsection (a)(14) $2,000,000 for fiscal year 1987 and $6,000,000 for fiscal year 1988;

(15) to carry out subsection (a)(15) $8,500,000 for fiscal year 1987;

(16) to carry out subsection (a)(16) $2,000,000 for fiscal year 1987, $5,000,000 for fiscal year 1989, $5,000,000 for fiscal year 1990, and $2,000,000 for fiscal year 1991;

(17) to carry out preliminary engineering and design, utility relocation, land acquisition, and initial construction under subsection (a)(17) $2,000,000 for fiscal year 1988, $4,000,000 for fiscal year 1989, $4,000,000 for fiscal year 1990, and $2,000,000 for fiscal year 1991;

(18) to carry out subsection (a)(18) $3,500,000, for fiscal year 1987;

(19) to carry out subsection (a)(19) $700,000 for fiscal year 1987, $3,100,000 for fiscal year 1989, $8,000,000 for fiscal year 1990, and $9,200,000 for fiscal year 1991;

(20) to carry out subsection (a)(20) $1,200,000 for fiscal year 1987 and $7,800,000 for fiscal year 1988;

(21) to carry out subsection (a)(21) $5,000,000 for fiscal year 1987;

(22) to carry out subsection (a)(22) $1,000,000 for fiscal year 1987, $2,000,000 for fiscal year 1988, and $3,000,000 for fiscal year 1989;

(23) to carry out subsection (a)(23) $3,000,000 for fiscal year 1987, $3,000,000 for fiscal year 1988, and $3,000,000 for fiscal year 1989;

(24) to carry out subsection (a)(24) $1,500,000 for fiscal year 1987 and $11,000,000 for fiscal year 1988;

(25) to carry out subsection (a)(25) $4,500,000 for fiscal year 1990 and $4,500,000 for fiscal year 1991;

(26) to carry out subsection (a)(26) $4,000,000 for fiscal year 1988, $4,000,000 for fiscal year 1989, $4,000,000 for fiscal year 1990, and $4,000,000 for fiscal year 1991;

(27) to carry out subsection (a)(27) $7,500,000 for fiscal year 1987 and $7,500,000 for fiscal year 1988;

(28)(A) to carry out subsection (a)(28)(A) $6,600,000 for fiscal year 1987;

(B) to carry out subsection (a)(28)(B) $4,500,000 for fiscal year 1987; and

(C) to carry out feasibility studies and preliminary engineering and design under subsection (a)(28)(C) $900,000 for fiscal year 1987;

(29) to carry out subsection (a)(29) $3,900,000 for fiscal year 1987;

(30)(A) to carry out subsection (a)(30)(A) $400,000 for fiscal year 1987;

(B) to carry out subsection (a)(30)(B) $1,435,000 for fiscal year 1987;

(C) to carry out subsection (a)(30)(C) $1,700,000 for fiscal year 1987;

(D) to carry out subsection (a)(30)(D) $1,050,000 for fiscal year 1987;

(E) to carry out subsection (a)(30)(E) $3,500,000 for fiscal year 1987; and

(F) to carry out subsections (a)(30)(F) and (a)(30)(G) $2,000,000 for fiscal year 1987 and $3,000,000 for fiscal year 1989;

(31) to carry out subsection (a)(31) $5,000,000 for fiscal year 1989 and $10,000,000 for fiscal year 1990;

(32) to carry out subsection (a)(32) $3,000,000 for fiscal year 1987, $6,900,000 for fiscal year 1988, and $6,100,000 for fiscal year 1989;

(33) to carry out subsection (a)(33) $2,600,000 for fiscal year 1987;

(34) to carry out subsection (a)(34) $1,100,000 for fiscal year 1987, $1,000,000 for fiscal year 1988, $1,000,000 for fiscal year 1989, and $1,000,000 for fiscal year 1990;

(35) to carry out preliminary engineering and design and initial construction under subsection (a)(35) $9,750,000 for fiscal year 1987;

(36) to carry out subsection (a)(36) $3,850,000 for fiscal year 1987;

(37) to carry out subsection (a)(37) $1,500,000 for fiscal year 1987 and $500,000 for fiscal year 1988;

(38) to carry out subsection (a)(38) $4,000,000 for fiscal year 1987, $11,000,000 for fiscal year 1988, $18,000,000 for fiscal year 1989, $19,000,000 for fiscal year 1990, and $22,000,000 for fiscal year 1991;

(39) to carry out preliminary engineering and design under subsection (a)(39) $5,500,000 for fiscal year 1987;

(40) to carry out subsection (a)(40) $4,500,000 for fiscal year 1990 and $4,500,000 for fiscal year 1991;

(41)(A) to carry out subsection (a)(41)(A) $2,600,000 for fiscal year 1988, $2,600,000 for fiscal year 1989, $2,500,000 for fiscal year 1990, and $2,800,000 for fiscal year 1991; and

(B) to carry out land acquisition under subsection (a)(41)(B) $10,000,000 for fiscal year 1987, $10,000,000 for fiscal year 1988, and $5,000,000 for fiscal year 1989;

(42) to carry out subsection (a)(42) $2,000,000 for fiscal year 1988 and $2,530,000 for fiscal year 1989;

(43) to carry out subsection (a)(43) $10,000,000 for fiscal year 1988, $13,000,000 for fiscal year 1989, $17,000,000 for fiscal year 1990, and $14,000,000 for fiscal year 1991;

(44) to carry out subsection (a)(44) $13,400,000 for fiscal year 1990;

(45) to carry out subsection (a)(45) $720,000 for fiscal year 1987;

(46) to carry out subsection (a)(46) $300,000 for fiscal year 1987, $1,000,000 for fiscal year 1988, and $2,700,000 for fiscal year 1989;

(47) to carry out subsection (a)(47) $7,800,000 for fiscal year 1987 and $6,200,000 for fiscal year 1989;

(48) to carry out subsection (a)(48) $750,000 for fiscal year 1987;

(49) to carry out subsection (a)(49) $500,000 for fiscal year 1987, and $400,000 for fiscal year 1988;

(50) to carry out subsection (a)(50) $5,000,000 for fiscal year 1990 and $5,000,000 for fiscal year 1991;

(51) to carry out subsection (a)(51) $5,000,000 for fiscal year 1988;

(52) to carry out subsection (a)(52) $500,000 for fiscal year 1988, $3,000,000 for fiscal year 1989, $3,000,000 for fiscal year 1990, and $2,500,000 for fiscal year 1991;

(53) to carry out subsection (a)(53) $2,000,000 for fiscal year 1988, $5,000,000 for fiscal year 1989, and $5,000,000 for fiscal year 1990;

(54) to carry out preliminary engineering and design under subsection (a)(54) $5,000,000 for fiscal year 1988 and $8,000,000 for fiscal year 1989;

(55) to carry out subsection (a)(55) $2,500,000 for fiscal year 1987, $3,200,000 for fiscal year 1989, $2,600,000 for fiscal year 1990, and $5,000,000 for fiscal year 1991;

(56)(A) to carry out subsection (a)(56)(A) $1,300,000 for fiscal year 1987;

(B) to carry out subsection (a)(56)(B) $308,000 for fiscal year 1987; and

(C) to carry out subsection (a)(56)(C) $350,000 for fiscal year 1987;

(57) to carry out land acquisition under subsection (a)(57) $5,000,000 for fiscal year 1987;

(58) to carry out subsection (a)(58) $5,000,000 for fiscal year 1987, $5,500,000 for fiscal year 1988, and $9,500,000 for fiscal year 1989;

(59) to carry out subsection (a)(59) $1,000,000 for fiscal year 1989, $7,000,000 for fiscal year 1990, and $7,000,000 for fiscal year 1991;

(60) to carry out subsection (a)(60) $2,200,000 for fiscal year 1987;

(61) to carry out subsection (a)(61) $5,000,000 for fiscal year 1987, $2,000,000 for fiscal year 1988, and $13,000,000 for fiscal year 1989;

(62) to carry out subsection (a)(62) $1,000,000 for fiscal year 1987, $3,000,000 for fiscal year 1988, $9,000,000 for fiscal year 1989, and $4,600,000 for fiscal year 1990;

(63) to carry out subsection (a)(63) $2,000,000 per fiscal year for each of the fiscal years 1987, 1988, 1989, 1990, and 1991;

(64) to carry out preliminary engineering and design under subsection (a)(64) $1,500,000 for fiscal year 1987;

(65) to carry out preliminary engineering and design under subsection (a)(65) $2,000,000 for fiscal year 1987;

(66) to carry out subsection (a)(66) $1,000,000 for fiscal year 1988, $800,000 for fiscal year 1989, $12,100,000 for fiscal year 1990, and $6,100,000 for fiscal year 1991;

(67) to carry out subsection (a)(67) $7,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991;

(68) to carry out subsection (a)(68) $4,000,000 per fiscal year for each of fiscal years 1987 and 1988;

(69) to carry out subsection (a)(69) $2,000,000 per fiscal year for each of fiscal years 1987 and 1988 and $3,000,000 for fiscal year 1989;

(70) to carry out preliminary engineering and design under subsection (a)(70) $1,500,000 for fiscal year 1987 and $1,500,000 for fiscal year 1988;

(71) to carry out preliminary engineering and design, environmental analysis, and implementation of environmental mitigation measures under subsection (a)(71) $3,000,000 per fiscal year for each of fiscal years 1987, 1988, and 1990;

(72) to carry out subsection (a)(72) $5,000,000 per fiscal year for each of fiscal years 1987 and 1988;

(73) to carry out subsection (a)(73) $2,500,000 per fiscal year for each of fiscal years 1989 and 1990 and $5,000,000 for fiscal year 1991;

(74) to carry out subsection (a)(74) $5,000,000 for fiscal year 1988;

(75) to carry out subsection (a)(75) $6,000,000 for fiscal year 1987;

(76) to carry out subsection (a)(76) $1,000,000 for fiscal year 1987;

(77) to carry out subsection (a)(77) $5,000,000 for fiscal year 1988;

(78) to carry out subsection (a)(78) $2,500,000 per fiscal year for each of fiscal years 1987 and 1988;

(79) to carry out subsection (a)(79) $2,815,000 for fiscal year 1989 and $2,815,000 for fiscal year 1990;

(80) to carry out subsection (a)(80) $2,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991; and

(81) to carry out subsection (a)(81) $400,000 for fiscal year 1987.

(d) AUTHORIZATION OF APPROPRIATIONS FROM GENERAL FUND.—In addition to amounts authorized by subsection (c), there is authorized to be appropriated to carry out subsection (a)(3) $16,000,000 for fiscal years beginning after September 30, 1987, and ending before October 1, 1991.

(e) APPLICABILITY OF TITLE 23.—Funds authorized by this section (other than subsection (d)) shall be available for obligation in the same manner as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this section shall be 100 percent, and such funds shall remain available until expended and shall not be subject to any obligation limitation.

SECTION 147. DELAWARE RIVER BRIDGES.

(a) REPAYMENT OF FEDERAL FUNDS INVESTED ON I-80 BRIDGE.—

(1) IN GENERAL.—The Delaware River Joint Toll Bridge Commission (hereinafter in this section referred to as the "Commission"), in conjunction with the State highway agencies of the States of Pennsylvania and New Jersey, shall enter into an agreement with the Secretary to repay to the Treasury of the United States any Federal funds which previously have been obligated or otherwise expended by the Federal Government with respect to the Delaware Water Gap Bridge on I-80. Such repayment shall be credited to the Highway Trust Fund.

(2) EFFECT OF REPAYMENT.—Upon such repayment, such States and the Commission shall be free of all restrictions contained in title 23, United States Code, and any regulation or agreement thereunder, with respect to the collection or imposition of tolls or other charges for such bridge or the use thereof.

(b) AGREEMENT TO CONSTRUCT I-78 TOLL BRIDGE.—If the State of Pennsylvania, the State of New Jersey, and the Commission determine to operate the uncompleted bridge under construction in the vicinity of Easton, Pennsylvania, and Phillipsburg, New Jersey, on I-78 as a toll bridge, such States, the Commission, and the Secretary shall enter into an agreement with respect to such I-78 bridge project as provided in section 129 of title 23, United States Code, notwithstanding the requirements of section 301 of such title or any existing agreement.

(c) RIGHT OF REVIEW BY FEDERAL AGENCIES.—The Commission's authority to fix, charge or collect any fees, rentals, tolls, or other charges shall be as provided in its compact and supplements thereto (including the supplemental agreement described in subsection (e)); except that paragraph (c) of such supplemental agreement shall not be construed to eliminate the necessity for review and approval by any Federal agency, as may be required under applicable Federal law, to determine that the tolls charged by the Commission are reasonable and just consistent with the Commission's responsibilities under such compact and supplements thereto.

(d) LIMITATIONS.—

(1) NO TOLLS ON EXISTING NONTOLL BRIDGES.—Nothing in this section shall be construed to grant congressional consent to the imposition of tolls by the Commission on any existing and operating bridge under the Commission's jurisdiction on which tolls were not charged and collected on January 1, 1986.

(2) NONAPPLICABILITY TO I-895 CORRIDOR.—Nothing in this section shall constitute congressional approval to construed any additional toll bridge in the previously designated I-895 corridor.

(e) SUPPLEMENTAL AGREEMENT.—

(1) CONSENT OF CONGRESS.—The consent of the Congress is hereby given to the supplemental agreement, described in paragraph (2), concerning the Delaware River Joint Toll Bridge Commission, which agreement has been enacted by the State of Pennsylvania on December 18, 1984, as Act 206, laws of 1984, and by the State of New Jersey on October 21, 1985, as Public Law 1985, chapter 342.

(2) DESCRIPTION OF AGREEMENT.—The agreement referred to in paragraph (1) reads substantially as follows:

"SUPPLEMENTAL AGREEMENT BETWEEN THE COMMONWEALTH OF PENNSYLVANIA AND THE STATE OF NEW JERSEY

"SUPPLEMENTING THE COMPACT OR AGREEMENT ENTITLED 'AGREEMENT BETWEEN THE COMMONWEALTH OF PENNSYLVANIA AND THE STATE OF NEW JERSEY CREATING THE DELAWARE RIVER JOINT TOLL BRIDGE COMMISSION AS A BODY CORPORATE AND POLITIC AND DEFINING ITS POWERS AND DUTIES, AS HERETOFORE AMENDED AND SUPPLEMENTED, TO ESTABLISH THE PURPOSES FOR WHICH THE COMMISSION MAY FIX, CHARGE, AND COLLECT TOLLS, RATES, RENTS, AND OTHER CHARGES FOR THE USE OF COMMISSION FACILITIES AND PROPERTIES'

"The Commonwealth of Pennsylvania and the State of New Jersey do solemnly covenant and agree, each with the other, as follows:

"(a)(1) Notwithstanding any other provision of the compact hereby supplemented, or any provision of law, State or Federal to the contrary, as soon as the existing outstanding bonded indebtedness of the commission shall be refunded, defeased, retired, or otherwise satisfied and thereafter, the commission may fix, charge, and collect tolls, rates, rents, and other charges for the use of any commission facility or property and in addition to any purpose now or heretofore or hereafter authorized for which the revenues from such tolls, rates, rents, or other charges may be applied, the commission is authorized to apply or expend any such revenue for the management, operation, maintenance, betterment, reconstruction, or replacement (A) of the existing non-toll bridges, formerly toll or otherwise, over the Delaware River between the State of New Jersey and the Commonwealth of Pennsylvania heretofore acquired by the commission pursuant to the provisions of the act of the State of New Jersey approved April 1, 1912 (Chapter 297), and all supplements and amendments thereto, and the act of the Commonwealth of Pennsylvania approved May 8, 1919 (Pamphlet Laws 148), and all supplements and amendments thereto, and (B) of all other bridges within the commission's jurisdiction and control. Betterment shall include but not be limited to parking areas for public transportation services and all facilities appurtenant to approved projects.

"(2) The commission may borrow money or otherwise incur indebtednes and provide from time to time for the issuance of its bonds or other obligations for one or more of the purposes authorized in this supplemental agreement. The commission is authorized to pledge its tolls, rates, rents, and other revenues, or any part thereof, as security for the repayment, with interest, of any moneys borrowed by it or advanced to it for any of its authorized purposes, and as security for the satisfaction of any other obligation assumed by it in connection with such loan or advances.

"(3) The authority of the commission to fix, charge, and collect fees, rentals, tolls or any other charges on the bridges within its jurisdiction, including the bridge at the Delaware Water Gap, is confirmed.

"(4) The covenants of the State of New Jersey and the Commonwealth of Pennsylvania as set forth in Article VI of the compact to which this is a supplemental agreement shall be fully applicable to any bonds or other obligations issued or undertaken by the commission. Notwithstanding Article VI or any other provision of the compact, the State of New Jersey and the Commonwealth

of Pennsylvania may construct a bridge across the Delaware River in the vicinity of Easton, Pennsylvania, and Phillipsburg, New Jersey, within 10 miles of the existing toll bridge at that location. All the rest and remainder of the compact, as amended or supplemented, shall be in full force and effect except to the extent it is inconsistent with this supplemental agreement.

"(b) The commission is authorized to fix, charge, or collect fees, rentals, tolls, or any other charges on the proposed bridge to be constructed in the vicinity of Easton, Pennsylvania, and Phillipsburg, New Jersey, in the same manner and to the same extent that it can do so for other toll bridges under its jurisdiction and control: Provided, That the United States Government has approved the bridge to be a part of the National System of Interstate and Defense Highways with 90 percent of the cost of construction to be contributed by the United States Government: And provided further, That the non-Federal share of such bridge project is contributed by the commission. The commission is further authorized in the same manner and to the same extent that it can do so for all the other toll bridges under its jurisdiction and control to fix, charge, and collect fees, rentals, tolls or any other charges on any other bridge within its jurisdiction and control if such bridge has been constructed in part with Federal funds.

"(c) The consent of Congress to this compact shall constitute Federal approval of the powers herein vested in the commission and shall also constitute authority to the United States Department of Transportation or any successor agency and the intent of Congress to grant and Federal approvals required hereunder to permit the commission to fix, charge, and collect fees, rentals, tolls, or any other charges on the bridges within its jurisdiction to the extent provided in subsections (a) and (b) and this subsection and the compact.

"(d) Notwithstanding the above provisions, the commission shall not fix, charge, or collect fees, rentals, tolls, or any other charges on any of the various bridges formerly toll or otherwise over the Delaware River between the State of New Jersery and the Commonwealth of Pennsylvania heretofore acquired by the commission pursuant to the provisions of the act of the State of New Jersey approved April 1, 1912 (chapter 297), and all supplements and amendments thereto, and the act of the Commonwealth of Pennsylvania approved May 8, 1919 (Pamphlet Laws 148), and all supplements and amendments thereto.

"(e) At any time that the commission shall be free of all outstanding indebtedness, the State of New Jersey and the Commonwealth of Pennsylvania may, by the enactment of substantially similar acts, require the elimination of all tolls, rates, rents, and other charges on all bridges within the commission's jurisdiction and control and, thereafter, all costs and charges in connection with the construction, management, operation, maintenance, and betterment of bridges within the jurisidiction and control of the commission shall be the financial responsibility of the States as provided by law.".

SEC. 148. ENVIRONMENTAL IMPACT STATEMENT.

(a) PREPARATION.—The Secretary is authorized to prepare or have prepared an environmental impact statement in connection with providing additional highway capacity in the Richmond-Willowbrook corridor in Staten Island, New York.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Secretary, out of the Highway Trust Fund (other than the Mass Transit Account), such sums as may be necessary to carry out this section for fiscal years beginning after September 30, 1986.

(c) APPLICABILITY OF TITLE 23.—Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of the preparation of such statement shall be 100 percent, and such funds shall remain available until expended and shall not be subject to any obligation limitation.

SEC. 149. HIGHWAY DESIGNATION.

The portion of Oklahoma State Route 99 between United States Route 70 and Interstate Route I-44 which portion is on the Federal-aid primary system shall hereafter be designated as "United States Highway 377". Any reference in a law, map, regulation, document, record or other paper of the United States to such highway shall be held to be a reference to "United States Highway 377".

SEC. 150. BRIDGE NAMING.

The bridge crossing the Mississippi River on Interstate Route I-80 near Le Claire, Iowa, shall hereafter be known and designated as the "Fred Schwengel Bridge". Any law, regulation, document, or record of the United States in which such bridge is referred to shall be held to refer to such bridge as the "Fred Schwengel Bridge".

SEC. 151. STUDY OF HIGHWAY EXPENDITURES, REVENUES, AND RELATIVE NEEDS.

(a) STUDY DESCRIPTION.—The Secretary shall conduct a study—

(1) to determine the amount and the percentage of the total funds apportioned and allocated to each State in each fiscal year beginning after September 30, 1978, and ending before October 1, 1983, under sections 103(e)(4), 104(b), 144, 152, and 157 of title 23, United States Code, and section 203 of the Highway Safety Act of 1973 which were expended on highway projects carried out in counties of such State with a population of less than 50,000;

(2) to determine the amount and the percentage of estimated tax payments attributable to highway users in the State paid into the Highway Trust Fund (other than the Mass Transit Account) which are attributable to such counties; and

(3) to determine the needs of such counties and the State for improvements of highways on the Federal-aid system and the percentage of the needs of the State for such improvements which are needs of such counties.

(b) CONSULTATION.—In carrying out the study under this section, the Secretary may consult any department, agency, or instrumentality of the United States or any State or local government.

(c) REPORT.—Not later than one year after the date of the enactment of this Act, the Secretary shall submit to Congress a report of the results of the study conducted under this section. Such report shall include, at a minimum, a State by State analysis of the matters referred to in subsection (a).

SEC. 152. STUDY OF APPORTIONMENT FORMULAS.

(a) STUDY DESCRIPTION.—The Secretary shall make a full and complete study regarding the apportionment and allocation of Federal financial assistance made available out of the Highway Trust Fund (other than the Mass Transit Account) under sections 103(e)(4), 104(b), 144, 152, and 157 of title 23, United States Code, and section 203 of the Highway Safety Act of 1973 for the purpose of determining whether or not such assistance is being equitably apportioned and allocated among the States, taking into account the relative needs of the States for highway improvements and the estimated tax payments attributable to highway users in each State paid into the Highway Trust Fund (other than the Mass Transit Account).

(b) CONSULTATION.—In conducting the study under this section, the Secretary shall consult with other agencies of the Federal Government and with agencies of State and local governments.

(c) REPORT.—Not later than one year after the date of the enactment of this Act, the Secretary shall submit a report on the results of such study to Congress, together with recommendations for legislation for modifying the formulas apportioning and allocating the assistance referred to in subsection (a) to conform to the objectives of such study.

SEC. 153. BRIDGE FORMULA STUDY.

(a) CONTRACT WITH TRANSPORTATION RESEARCH BOARD.—The Secretary shall enter into appropriate arrangements with the Transportation Research Board of the National Academy of Sciences to conduct a comprehensive study of the effects of enforcement of the limitations on vehicle weights imposed by application of the formula contained in section 127(a) of title 23, United States Code.

(b) CONSULTATION WITH CERTAIN TRANSPORTATION INTERESTS.—The Transportation Research Board shall conduct the study under this section only after consulting transportation officials, representatives of the motor truck manufacturing industry, and representatives of the trucking industry (including special permit haulers and users of construction and other vehicles which engage in heavy hauling operations).

(c) REPORT.—

(1) DEADLINE.—Not later than 24 months after the date of the enactment of this Act, the Transportation Research Board shall report to the Secretary and Congress on the results of the study conducted under this section.

(2) CONTENTS.—The report shall include—

(A) an assessment of the potential costs and benefits of enforcing the limitations on vehicle weights imposed by application of the formula contained in section 127(a) of title 23, United States Code,

(B) any recommendations of such Board concerning modifications of such formula, and

(C) an examination of alternative means of regulating truck weights on bridges.

The report shall also identify optimal axle loading and spacing requirements taking into account all costs and benefits to business, government, and the general public.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated out of the Highway Trust Fund (other than the Mass Transit Account) $500,000 for fiscal year 1987 for conducting the study under subsection (a).

(e) APPLICABILITY OF TITLE 23.—Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, and such funds shall remain available until expended and shall not be subject to any obligation limitation.

SEC. 154. STUDY OF HIGHWAY BRIDGES WHICH CROSS RAIL LINES.

(a) NEEDS INVESTIGATION.—The Secretary shall conduct a comprehensive study and investigation of improvement and maintenance needs for highway bridges which cross rail lines and whose ownership has been disputed. Such study and investigation shall assess—

(1) railroad and highway needs relating to safety, capacity, and mobility and the needs of communities affected by such bridges;

(2) the feasibility of addressing these needs on a comprehensive, national basis; and

(3) the responsibility of railroad and highway authorities in addressing these needs.

(b) REPORT.—Not later than 30 months after the date of the enactment of this Act, the Secretary shall submit to Congress a report on the Secretary's study and investigation along with recommendations on how the bridge needs referred to in subsection (a) may best be addressed on a long term basis in a cost effective manner.

SEC. 155. PARKING FOR HANDICAPPED PERSONS.

(a) STUDY.—The Secretary shall conduct a study for the purpose of determining—

(1) any problems encountered by handicapped persons in parking motor vehicles; and

(2) whether or not each State should establish parking privileges for handicapped persons and grant to nonresidents of the State the same parking privileges as are granted to residents.

(b) REPORT.—Not later than 180 days after the date of the enactment of this Act, the Secretary shall submit to Congress a report on the results of the study conducted under subsection (a).

(c) DEVELOPMENT OF PROPOSED UNIFORM STATE LAW.—

(1) REQUIREMENT.—If the Secretary determines under subsection (a) that each State should estalbish parking privileges for handicapped persons and grant to nonresidents of the State the same parking privileges as are granted to residents, the Secretary shall develop a proposed uniform State law with respect to parking privileges for handicapped persons and submit a copy of the proposed uniform State law to Congress and each State.

(2) FACTORS TO CONSIDER.—In developing the proposed uniform State law, the Secretary shall consult with the States and shall consider any advantages—

(A) of ensuring that parking privileges for handicapped persons may be utilized whether a handicapped person is a passenger or a driver;

(B) of the use of the international symbol of access as the exclusive symbol identifying parking zones for handicapped persons and identifying vehicles that may park in such parking zones;

(C) of displaying the international symbol of access on license plates or license plate decals and on identification placards; and

(D) of designing any identification placard so that the placard is easily visible when placed in the interior of any vehicle.

(3) REPORT.—If a proposed uniform State law with respect to parking privileges for handicapped persons is developed and submitted to Congress under paragraph (1), the Secretary shall report to Congress within 12 months after the date of such submission and each year thereafter on the extent to which each State has adopted the proposed uniform State law.

SEC. 156. FEASIBILITY STUDY OF USING HIGHWAY ELECTRIFICATION SYSTEMS.

(a) GRANT PURPOSE.—The Secretary shall make a grant to the California Department of Transportation for the purpose of determining the feasibility and applicability of utilizing a highway electrification system as a source of energy for highway vehicles. Such grant shall cover the costs of activities necessary to make such determination, including (but not limited to) necessary land acquisition, construction of a test facility, research, planning, analysis, and engineering.

(b) GRANT CONDITIONS.—A grant may only be made under this section if the California Department of Transportation agrees—

(1) to conduct, through the test facility to be constructed under such grant, a study to determine the feasibility and applicability of using a highway electrification system as a source of energy for highway vehicles, and

(2) to submit to the Secretary a report on the results of such study not later than three years after the date such construction is completed.

(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out subsection (a) of this section, out of the Highway Trust Fund (other than the Mass Transit Account), $970,000 per fiscal year for each of the fiscal years 1987, 1988, and 1989.

(d) APPLICABILITY OF TITLE 23.—Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of acquisition and construction of the test facility described in subsection (a) shall be 100 percent, and such funds shall remain available until expended and shall not be subject to any obligation limitation.

SEC. 157. COST EFFECTIVENESS STUDY OF HIGHWAY UPGRADING.

(a) STUDY.—The Secretary shall conduct a study—

(1) to determine the cost-effectiveness of carrying out a project to upgrade Route 219—

(A) between its intersection with Interstate Route I-80 near Dubois, Pennsylvania, and its intersection with the boundary between New York and Pennsylvania near Bradford, Pennsylvania; and

(B) between its intersection with New York Route 242 near Ellicottville, New York, and its intersection with New York Route 17 (Southern Tier Expressway) in Salamanca, New York;

to the geometric and construction standards adopted for the National System of Interstate and Defense Highways;

(2) to determine the feasibility of partially financing such project with toll revenues, of using reclaimed strip mining lands for right-of-way for such project, and of avoiding encroachment upon national and State forests and State game lands in carrying out such project; and

(3) to determine the alignment on which such project should be carried out.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Secretary shall submit a report to Congress on the results of the study conducted under this section together with any recommendations the Secretary may have concerning the project described in subsection (a).

(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated, out of the Highway Trust Fund (other than the Mass Transit Account) to carry out this section $1,000,000 for fiscal year 1987.

(d) APPLICABILITY OF TITLE 23.—Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of the study under this section shall be 100 percent, and such funds shall remain available until expended and shall not be subject to any obligation limitation.

SEC. 158. BRIDGE MANAGEMENT STUDY.

(a) INVESTIGATION AND STUDY.—The Secretary shall make a full and complete investigation and study of State bridge management programs for the purpose of determining whether or not States participating in the Federal bridge replacement and rehabilitation program under section 144 of title 23, United States Code, need to establish a comprehensive bridge management program.

(b) REPORT.—Not later than 180 days after the date of the enactment of this Act, the Secretary shall submit to Congress a report on the results of the investigation and study conducted under subsection (a) together with recommendations (including legislative and administrative recommendations) concerning State establishment of comprehensive bridge management programs and any minimum requirements of such programs which the Secretary considers appropriate based on the findings of such investigation and study.

SEC. 159. STATE MAINTENANCE PROGRAM STUDY.

(a) INVESTIGATION AND STUDY.—The Secretary shall enter into appropriate arrangements with the National Academy of Sciences to conduct a complete investigation of the appropriateness of establishing minimum Federal guidelines for maintenance of the Federal-aid primary, secondary, and urban systems.

(b) REPORT.—Not later than 180 days after the date of the enactment of this Act, the National Academy of Sciences shall submit to the Secretary and Congress a report on the results of the investigation and study conducted under subsection (a) together with recommendations (including legislative and administrative recommendations) concerning establishment of minimum Federal guidelines for maintenance of the Federal-aid primary, secondary, and urban systems.

SEC. 160. HIGHWAY FEASIBILITY STUDY.

(a) STUDY.—The Secretary, in cooperation with the States of Louisiana, Arkansas, and Missouri, shall study the feasibility and necessity of constructing to appropriate standards a proposed highway along a route from Shreveport, Louisiana, to Texarkana, Fort Smith, and Fayetteville, Arkansas, and Carthage and Kansas City, Missouri. Such study shall update the feasibility study conducted under section 143(6) of the Federal-Aid Highway Act of 1973.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Secretary shall transmit to Congress a report on the results of the study conducted under this section.

SEC. 161. CALIFORNIA FEASIBILITY STUDY.

(a) STUDY.—The Secretary shall study the feasibility and necessity of constructing a bypass highway around the city of Sebastopol, California.

(b) REPORT.—Not later than nine months after the date of the enactment of this Act, the Secretary shall transmit to Congress a report on the results of the study conducted under this section. Such report shall compare the costs and benefits of constructing the highway referred to in subsection (a) and shall include the recommendations of the Secretary concerning the location of such highway and appropriate design standards for such highway.

(c) AUTHORIZATION OF APPROPRIATION.—There is authorized to be appropriated, out of the Highway Trust Fund (other than the Mass Transit Account), to carry out this section $100,000 for fiscal year 1987.

(d) APPLICABILITY OF TITLE 23.—Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code; except that the Federal share of the cost of the study under this section shall be 100 percent, and such funds shall remain available until expended and shall not be subject to any obligation limitation.

SEC. 162. NEW YORK FEASIBILITY STUDY.

(a) STUDY.—The Secretary shall study the feasibility and necessity of constructing a major highway on an inland route as an alternative to New York Route 5 from the central business district of Buffalo, New York, to the towns immediately south of Buffalo, New York, to the towns immediately south of Buffalo, New York.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Secretary shall submit a report to Congress on the results of the study conducted under this section together with any recommendations the Secretary may have concerning the project described in subsection (a).

## TITLE II—HIGHWAY SAFETY ACT OF 1986

SEC. 201. SHORT TITLE.

This title may be cited as the "Highway Safety Act of 1986".

SEC. 202. HIGHWAY SAFETY.

(a) AUTHORIZATIONS OF APPROPRIATIONS.—The following sums are authorized to be appropriated out of the Highway Trust Fund (other than the Mass Transit Account):

(1) BRIDGE REPLACEMENT AND REHABILITATION.—For bridge replacement and rehabilitation under section 144 of title 23, United States Code, $1,755,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991.

(2) ELIMINATION OF HAZARDS.—For projects for elimination of hazards under section 152 of title 23, United States Code, $170,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991.

(3) NHTSA HIGHWAY SAFETY PROGRAMS.—For carrying out section 402 of title 23, United States Code, by the National Highway Traffic Safety Administration $123,000,000 for fiscal years 1988, 1989, 1990, and 1991.

(4) NHTSA HIGHWAY SAFETY RESEARCH AND DEVELOPMENT.—For carrying out section 403 of such title by the National Highway Traffic Safety Administration $33,000,000 for fiscal years 1987, 1988, 1989, 1990, and 1991.

(5) FHWA HIGHWAY SAFETY PROGRAMS.—For carrying out section 402 of such title by the Federal Highway Administration $10,000,000 for fiscal years 1987, 1988, 1989, 1990, and 1991.

(6) FHWA HIGHWAY SAFETY RESEARCH AND DEVELOPMENT.—For carrying out sections 307(a) and 403 of such title by the Federal Highway Administration $10,000,000 per fiscal year for fiscal years 1987, 1988, 1989, 1990, and 1991.

(b) EXTENSION OF NHTSA HIGHWAY SAFETY PROGRAMS FOR FISCAL YEAR 1987.—Section 203(a) of the Surface Transportation Assistance Act of 1982 is amended—

(1) in paragraph (1) by striking out "and" and by inserting before the period at the end of such paragraph ", and $123,000,000 for the fiscal year ending September 30, 1987";

(2) in paragraph (2) by striking out "and" and by inserting "and September 30, 1987" after "1986,"; and

(3) in paragraph (4)(B) by striking out "and September 30, 1986," and inserting in lieu thereof "September 30, 1986, and September 30, 1987,".

(c) MINIMUM OBLIGATIONS OF NHTSA HIGHWAY SAFETY AUTHORIZATIONS.—

(1) ENFORCEMENT OF 55 MPH SPEED LIMIT.—Out of the funds authorized to be appropriated under subsection (a)(3) of this section for each of fiscal years 1988, 1989, 1990, and 1991, not less than $20,000,000 per fiscal year shall be obligated under section 402 of title 23, United States Code, for the purpose of enforcing the 55-miles-per-hour speed limit established by section 154 of such title.

(2) SAFETY BELT PROGRAMS.—Each State shall expend each fiscal year not less than 2 percent of the amount apportioned to it for such fiscal year of the sums authorized by subsection (a)(3) of this section, for programs to encourage the use of safety belts by drivers of, and passengers in, motor vehicles.

(d) OBLIGATION CEILING FOR HIGHWAY SAFETY PROGRAMS.—Notwithstanding any other provision of law, the total of all obligations for highway safety programs carried out by the National Highway Traffic Safety Administration under section 402 of title 23, United States Code, shall not exceed $126,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991, and the total of all obligations for highway safety programs carried out by the Federal Highway Administration under such section shall not exceed $10,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991.

SEC. 203. COMMERCIAL MOTOR VEHICLE SAFETY GRANTS.

Section 404 of the Surface Transportation Assistance Act of 1982 (49 U.S.C. 2304) is amended to read as follows:

"AUTHORIZATIONS

"SEC. 404. (a)(1) To carry out the purposes of section 402 of this title, there is authorized to be appropriated out of the Highway Trust Fund (other than the Mass Transit Account) $10,000,000 for fiscal year 1984, $20,000,000 for fiscal year 1985, and $30,000,000 for fiscal year 1986.

"(2) There shall be available to the Secretary to incur obligations to carry out section 402 of this title, out of the Highway Trust Fund (other than the Mass Transit Account), $50,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991.

"(b) Funds authorized to be appropriated, and funds made available, by this section shall be used to reimburse States pro rata for the Federal share of the costs incurred.

"(c) Grants made pursuant to the authority of this part shall be for periods not to exceed one year.

"(d) Notwithstanding any other provision of law, beginning after September 30, 1986, approval by the Secretary of a grant to a State under section 402 shall be deemed a contractual obligation of the United States for payment of the Federal share of the costs incurred by such State in development or implementation or both of programs to enforce commercial motor vehicle rules, regulations, standards, and orders.

"(e) Funds authorized to be appropriated, and funds made available, to carry out this section shall remain available for obligation by the Secretary for the fiscal year for which such funds are authorized or made available, as the case may be, and the three succeeding fiscal years.

"(f) On October 1 of each fiscal year beginning after September 30, 1986, the Secretary may deduct, from funds made available for such fiscal year by subsection (a)(2), an amount not to exceed one-half of one percent of the amount of such funds for administering section 402 of this title in such fiscal year.".

SEC. 204. 55 MPH SPEED LIMIT.

(a) WEIGHTED COMPLIANCE FORMULA.—

(1) IN GENERAL.—Section 154(f) of title 23, United States Code, is amended to read as follows:

"(f) ENFORCEMENT.—

"(1) DETERMINATION OF COMPLIANCE; PENALTY.—If the compliance score of a State as determined by application of the formula set forth in paragraph (2) to the data submitted by such State pursuant to subsection (e) of this section for any fiscal year exceeds 625, the Secretary shall reduce the State's apportionment of Federal-aid highway funds under each of sections 104(b)(1), 104(b)(2), and 104(b)(6) of this title in an aggregate amount of not less than 2.5 percent but not more than 5 percent, of the amount to be apportioned for the following fiscal year, in the case of the first fiscal year in which the score of such State as so determined exceeds 625, and not less than 5 percent, but not more than 10 percent, in the case of subsequent fiscal years.

"(2) COMPLIANCE FORMULA.—For purposes of this section, the formula for determining the compliance score of a State for any fiscal year under this section shall be as follows:

$$\text{State Score} = \frac{X(A+5B+10C)+Y(2D+20E+40F)}{100}$$

"(3) FORMULA FACTORS.—For purposes of the formula in paragraph (2)—

"(A) X equals the percentage of the vehicle miles of travel in a fiscal year in a State on 55 mph highways which occur on limited access highways;

"(B) Y equals 100 minus X;

"(C) A equals the percentage of vehicles traveling in the fiscal year in the State on limited access highways at speeds in excess of 55 miles per hour but not in excess of 60 miles per hour;

"(D) B equals the percentage of vehicles traveling in the fiscal year in the State on limited access highways at speeds in excess of 60 miles per hour but not in excess of 65 miles per hour;

"(E) C equals the percentage of vehicles traveling in the fiscal year in the State on limited access highways at speeds in excess of 65 miles per hour;

"(F) D equals the percentage of vehicles traveling in the fiscal year in the State on 55 mph highways (other than limited access highways) at speeds in excess of 55 miles per hour but not in excess of 60 miles per hour;

"(G) E equals the percentage of vehicles traveling in the fiscal year in the State on such 55 mph highways at speeds in excess of 60 miles per hour but not in excess of 65 miles per hour; and

"(H) F equals the percentage of vehicles traveling in the fiscal year in the State on such 55 mph highways at speeds in excess of 65 miles per hour.

"(4) DEFINITIONS OF TERMS.—For purposes of this section—

"(A) 55 MPH HIGHWAY.—The term '55 mph highway' means any public highway with a speed limit which is posted on or after January 1, 1983, at 55 miles per hour, except that such term does not include any highway on

which the posted speed limit has been reduced after such date based on legitimate traffic safety requirements as determined by the Secretary.

"(B) LIMITED ACCESS HIGHWAY.—The term 'limited access highway' means any divided 55 mph highway or segment on which access is fully controlled.".

(2) CONFORMING AMENDMENTS.—(A) Section 154(e) of such title is amended—

(i) by striking out "public highways with speed limits posted at fifty-five miles per hour" and inserting in lieu thereof "55 mph highways";

(ii) by striking out "which takes into account the variability of speedometer readings and" and inserting in lieu thereof "which take into account"; and

(iii) by adding at the end thereof the following: "Data submitted under this subsection shall be in such form as the Secretary determines by rule is necessary to carry out subsection (f).".

(B) Section 154(h) of such title is amended by striking out "the percentage" and all that follows through "miles per hour" and inserting in lieu thereof "the compliance score for such State".

(3) APPLICABILITY.—The amendments made by paragraphs (1) and (2) shall apply with respect to—

(A) data collected under section 154(e) of title 23, United States Code, after September 30, 1985, and

(B) reductions in apportionments based on such data.

(b) ADMINISTRATION THROUGH NHTSA.—

(1) IN GENERAL.—Section 154 of such title is amended by adding at the end thereof the following new subsection:

"(i) ADMINISTRATION THROUGH NHTSA.—The Secretary shall carry out this section and section 141(a) of this title through the National Highway Traffic Safety Administration.".

(2) EFFECTIVE DATE.—The amendment made by paragraph (1) shall take effect as soon as practicable after the date of the enactment of this Act but not later than October 1, 1987.

SEC. 205. ALCOHOL TRAFFIC SAFETY PROGRAMS.

(a) MODIFICATION OF PROMPT SUSPENSION REQUIREMENT FOR BASIC GRANTS.—Section 408(e) of title 23, United States Code, is amended by adding at the end thereof the following new paragraph:

"(4) MODIFIED BASIC GRANTS FOR LESS THAN PROMPT SUSPENSION.—For purposes of this section, a State which would be eligible for a basic grant but for the suspension of drivers' licenses referred to subparagraph (A) of paragraph (1) of this subsection not being made promptly shall be eligible for such a grant if the Secretary, under such regulations as the Secretary may issue, determines that such State is suspending drivers' licenses within 120 days of the determination of probable cause and is making reasonable progress in further reducing the time period between such determination and suspension.

"(5) MODIFIED BASIC GRANTS FOR RESTRICTED LICENSES IN HARDSHIP CASES.—For purposes of this section, a State which does not in all cases suspend drivers' licenses of individuals who are determined, as a result of chemical tests, to be intoxicated or who refuse to submit to such tests but which is otherwise eligible for a basic grant, shall be eligible for such a grant if the Secretary, under such regulations as the Secretary may issue, determines that—

"(A) the only cases in which the State does not suspend the drivers' licenses of such individuals are those cases in which—

"(i) a showing of hardship is made, and

"(ii) the driver's license is restricted in a manner which permits the individual to drive only to the extent necessary to relieve such hardship;

"(B) during any calendar quarter, not more than 20 percent of the total number of such cases involving first offenders results in restricted licenses; and

"(C) during any calendar quarter, not more than 15 percent of the total number of such cases involving repeat offenders results in restricted licenses.".

(b) AMOUNT OF MODIFIED BASIC GRANT.—Section 408(d)(1) of such title is amended—

(1) by inserting "(A) IN GENERAL.—" before "Subject"; and

(2) by adding at the end thereof the following new paragraph:

"(B) MODIFIED BASIC GRANTS.—Subject to subsection (c), the amount of a basic grant made under this section for any fiscal year to any State which is eligible for such a grant under subsection (e)(4) or (e)(5) shall equal 20 percent of the amount apportioned to such State for fiscal year 1983 under section 402 of this title.".

(c) AVAILABILITY OF FUNDS.—Section 408(g) of such title is amended by inserting before the period at the end of the second sentence the following: "and except that sums authorized by this subsection shall remain available until expended".

(d) CONFORMING AMENDMENTS.—(1) Section 408(d) of such title is amended—

(A) by inserting "AMOUNTS OF GRANTS.—" after "(d)";

(B) in paragraph (1) by inserting "BASIC GRANTS.—" after "(1)" the first place it appears;

(C) in paragraph (1) by indenting subparagraph (A), as designated by subsection (b) of this section, and aligning such subparagraph with subparagraph (B) of such paragraph, as added by such subsection;

(D) in paragraph (2) by inserting "SUPPLEMENTAL GRANTS.—" before "Subject to";

(E) in paragraph (3) by inserting "SPECIAL GRANTS.—" before "Subject to"; and

(F) by indenting paragraph (1) and aligning such paragraph and paragraphs (2) and (3) with paragraph (4) of subsection (e), as added by subsection (a) of this section.

(2) Section 408(e) of such title is amended—

(A) by inserting "ELIGIBILITY CRITERIA.—" after "(e)";

(B) in paragraph (1) by inserting "BASIC GRANTS.—" before "For purposes";

(C) in paragraph (2) by inserting "SUPPLEMENTAL GRANTS.—" before "For purposes";

(D) in paragraph (3) by inserting "SPECIAL GRANTS.—" before "For purposes";

(E) by indenting paragraph (1) and aligning such paragraph and paragraphs (2) and (3) with paragraph (4), as added by subsection (a) of this section;

(F) by aligning the subparagraphs of paragraphs (1) and (3) with subparagraph (A) of paragraph (5), as added by such subsection (a); and

(G) by aligning the clauses of subparagraphs (A) and (C) of paragraph (3), including subclauses (I) and (II) of paragraph (3)(A)(ii), with clause (i) of paragraph (5)(A), as added by such subsection (a).

SEC. 206. APPLICABILITY OF LENGTH LIMITATIONS TO CERTAIN TRUCK TRACTORS.

(a) PREEMPTION.—Section 411(c) of the Surface Transportation Assistance Act of 1982 is amended by inserting after "prohibit" the following: "maxi-cube vehicles or".

(b) MAXI-CUBE VEHICLE DEFINED.—Section 411(f) of such Act is amended by inserting "(1)" before "For the purposes" and by adding at the end of such section the following:

"(2) For purposes of this section, 'maxi-cube vehicle' means a truck tractor combined with a semi-trailer and a separable cargo-carrying unit which is designed to be loaded and unloaded through the semi-trailer, except that the entire combination shall not exceed 65 feet in length and the separable cargo-carrying unit shall not exceed 34 feet in length.".

(c) CONFORMING AMENDMENT.—Section 411(i) of such Act is amended by inserting "maxi-cube vehicles or" before "motor vehicle combinations" each place it appears.

SEC. 207. SCHOOLBUS SAFETY MEASURES.

(a) STUDY.—

(1) NATIONAL ACADEMY OF SCIENCES.—Not later than 30 days after the date of the enactment of this Act, the Secretary shall undertake to enter into appropriate arrangements with the National Academy of Sciences to conduct a comprehensive study and investigation of the principal causes of fatalities and injuries to schoolchildren riding in schoolbuses and of the use of seatbelts in schoolbuses and other measures that may improve the safety of schoolbus transportation. The purpose of the study and investigation is to determine those safety measures that are the most effective in protecting the safety of schoolchildren while boarding, leaving, and riding in schoolbuses.

(2) REPORT.—In entering into any arrangements with the National Academy of Sciences for conducting the study and investigation under this subsection, the Secretary shall request the National Academy of Sciences to submit, not later than December 31, 1987, to Congress and the Secretary a report on the results of such study and investigation. The report shall contain a list of those safety measures determined by the Academy to be most effective in protecting the safety of schoolchildren while boarding, leaving, and riding in schoolbuses.

(3) REVIEW OF REPORT.—Upon receipt of the report under paragraph (2), the Secretary shall review such report for the purpose of determining those safety measures that are the most effective in protecting the safety of schoolchildren while boarding, leaving, and riding in schoolbuses. Not later than March 1, 1988, the Secretary shall publish in the Federal Register a list of those safety measures which the Secretary determines are the most effective in protecting the safety of such children.

(4) INFORMATION.—Upon request of the National Academy of Sciences, the Secretary shall furnish to the Academy any information which the Academy deems necessary for the purpose of conducting the study and investigation under this subsection.

(b) SCHOOLBUS SAFETY GRANT PROGRAM.—

(1) SET-ASIDE.—Before apportioning any funds made available to carry out section 402 of title 23, United States Code, for each of fiscal years 1989, 1990, and 1991, the Secretary may set aside an amount not to exceed $5,000,000 for making grants to States to implement those schoolbus safety measures published by the Secretary under subsection (a).

(2) APPLICATION.—Any State interested in receiving under this subsection a grant to implement schoolbus safety measures in fiscal year 1989, 1990, or 1991 shall submit to the Secretary an application for such grant. Applications under this subsection shall be submitted at such time and in such

form and contain such information as the Secretary may require by regulation.

(3) LIMITATION.—No State shall receive more than 30 percent of the funds set aside pursuant to this subsection for any fiscal year in grants under this subsection.

SEC. 208. STANDARDS FOR SPLASH AND SPRAY SUPPRESSANT DEVICES.

Section 414 of the Surface Transportation Assistance Act of 1982 (49 U.S.C. 2314) is amended by redesignating subsection (c), and any references thereto, as subsection (d) and by inserting after subsection (b) the following new subsection:

"(c) Notwithstanding subsection (b), the Secretary shall not establish final minimum standards with respect to the performance and installation of splash and spray suppression devices for use on truck tractors, semitrailers, or trailers until—

"(1) the Secretary has determined that there is available technology that can (A) substantially reduce splash and spray from truck tractors, semitrailers, and trailers, and (B) substantially improve visibility of drivers, as demonstrated during testing under wind, rain, and wet roadway conditions in actual highway use;

"(2) the Secretary has determined that the standards based on such technology will result in protecting the public from unreasonable risk of death or injury due to accidents resulting from splash and spray from truck tractors, semitrailers, and trailers; and

"(3) the Secretary has determined that there exists 3 or more unaffiliated manufacturers capable of manufacturing devices meeting the standards to be established.".

SEC. 209. USE OF CERTAIN REPORTS AS EVIDENCE.

Notwithstanding any other provision of law, no report, list, schedule, or survey prepared by or for a State pursuant to section 152 of title 23, United States Code, or section 203 of the Highway Safety Act of 1973 shall be admitted as evidence or used in any suit or action for damages arising out of any matter referred to in such report, list, schedule, or survey.

SEC. 210. EMERGENCY CALL BOXES.

Section 101(a) of title 23, United States Code, is amended in the tenth undesignated paragraph (relating to the definition of highway safety improvement project) by inserting after "pavement marking," the following: "installs or replaces emergency motorist-aid call boxes,".

SEC. 211. RAILROAD-HIGHWAY CROSSINGS AUTHORIZATIONS.

The first sentence of section 203(b) of the Highway Safety Act of 1973 is amended by striking out "and" the first place it appears and by striking out the period at the end and inserting in lieu thereof ", and $140,000,000 for each of the fiscal years ending September 30, 1987, September 30, 1988, September 30, 1989, September 30, 1990, and September 30, 1991.".

SEC. 212. NATIONAL DRIVER REGISTER AMENDMENTS.

(a) 12-MONTH EXTENSION OF DEADLINE FOR FINAL RULES.—Section 203(c)(1) of the National Driver Register Act of 1982 is amended—

(1) by striking out "eighteen months" and inserting in lieu thereof "24 months"; and

(2) by inserting "publish notice of a proposed rulemaking and, within 6 months after the last day of such 24-month period," after "title,".

(b) PILOT TEST PROGRAM.—Section 207 of such Act is amended—

(1) in subsection (a) by striking out "and implement, within two years after the date of enactment of this title,";

(2) in subsection (b)—

(A) by striking out "and shall, within thirty" and insert in lieu thereof ", within 30"; and

(B) by striking out "select" and inserting in lieu thereof "and shall select, within 12 months after the last day of such 30-month period,";

(3) in subsection (d) by striking out "two years after the date of enactment of this title," and inserting in lieu thereof "16 months after the selection of the four pilot States under subsection (b),"; and

(4) by striking out subsection (f) and inserting in lieu thereof the following:

"(f) Not later than 6 months after the conclusion of the pilot program the Secretary shall submit to Congress a report on such program. Such report shall include—

"(1) an evaluation of the technology utilized in such program;

"(2) an evaluation of such program;

"(3) a projection of accomplishments which would result from the acquisition of electronic transfer equipment and methods by States other than those which participated in such program; and

"(4) any recommendations of the Secretary concerning the desirability of extending the authorization of appropriations for this title beyond fiscal year 1987.".

(c) REPORT BY SECRETARY.—Section 210 of such Act is amended—

(1) by striking out "the expiration of the four-year period following the date of enactment of this title," and inserting in lieu thereof "3 years after the establishment of a fully electronic Register system under section 203,"; and

(2) by striking out the last sentence.

SEC. 213. HIGHWAY SAFETY PROGRAM AMENDMENTS.

(a) GUIDELINES.—Section 402 of title 23, United States Code, is amended by striking out "standard" and "standards" each place they appear and inserting in lieu thereof "guideline" and "guidelines", respectively.

(b) WAIVERS FOR EXPERIMENTAL PROGRAMS.—Subsection (a) of such section is amended by striking out the last sentence.

(c) ELIMINATION OF CERTAIN CONDITION.—Subsection (b)(1) of such section is amended by striking out subparagraph (D), relating to comprehensive driver training programs, and by redesignating subparagraphs (E) and (F) (and any references thereto) as subparagraphs (D) and (E), respectively.

(d) RULEMAKING PROCESS.—Subsection (j) of such section is amended to read as follows:

"(j) RULEMAKING PROCESS.—The Secretary shall, not later than September 1, 1987, begin a rulemaking process to determine those programs most effective in reducing accidents, injuries, and deaths. Not later than April 1, 1988, the Secretary shall promulgate a final rule establishing those programs determined to be most effective in reducing accidents, injuries, and deaths. If such rule is promulgated by April 1, 1988, then it shall take effect October 1, 1988. If such rule is not promulgated by April 1, 1988, it shall take effect October 1, 1989. After a rule is promulgated in accordance with this subsection, the Secretary may from time to time thereafter revise such rule under a rulemaking process described in the first sentence of this subsection. Any rule under this subsection shall be promulgated taking into account consideration of the States having a major role in establishing programs described in the first sentence of this subsection. When a rule promulgated in accordance with this subsection takes effect, only those programs established by such rule as most effective in reducing accidents, injuries, and deaths shall be eligible to receive Federal financial assistance under this section.".

SEC. 214. HIGHWAY SAFETY EDUCATION AND INFORMATION.

(a) NATIONAL HIGHWAY SAFETY CAMPAIGN.—Subsection (d) of section 209 of the Highway Safety Act of 1978 is amended to read as follows:

"(d) Utilizing those techniques, methods, and practices determined most effective under subsection (b), the Secretary of Transportation shall conduct a national highway safety campaign utilizing the local and national television and radio to educate and inform the public of techniques, methods, and practices to reduce the number and severity of highway accidents. Not later than the 180th day after the date of submission of the first report to Congress required by subsection (b) of this section, the Secretary shall commence the conduct of such campaign.".

(b) LIMITATION ON OBLIGATIONS.—Subsection (h) of such section is amended by adding at the end thereof the following: "None of the amounts authorized by this subsection shall be available for obligation for any education or information program conducted in connection with the implementation of Federal Motor Vehicle Safety Standard 208 (49 C.F.R. 571.208).".

(c) OBLIGATION CEILING.—Subsection (i) of such section is amended by inserting before the period at the end the following: "and except that the funds authorized to be appropriated to carry out this section shall not be subject to any obligation limitation".

SEC. 215. RAILROAD-HIGHWAY CROSSING NEEDS.

(a) STUDY.—The Secretary, in consultation with the Association of American Railroads and the American Association of State Highway and Transportation Officials, shall conduct a comprehensive study and investigation of national railroad-highway crossing improvement and maintenance needs. Such study and investigation shall assess—

(1) railroad and highway needs relating to crossing safety, capacity, and mobility and the needs of communities affected by railroad-highway crossings;

(2) the feasibility of addressing these needs on a corridor or system basis; and

(3) the responsibility of rail and highway authorities in addressing these needs.

In carrying out such study, the Secretary shall consider the progress and the results of the programs and projects conducted before, on, or after the date of the enactment of this Act to improve safety at railroad-highway crossings.

(b) REPORT.—Not later than 30 months after the date of the enactment of this Act, the Secretary shall submit to Congress a report on the Secretary's study and investigation along with recommendations on how the needs referred to in subsection (a) can best be addressed on a long term and continuing basis in a cost-effective manner. Such report and recommendations shall take into account the results of the programs and projects referred to in subsection (a).

SEC. 216. OLDER DRIVER STUDY.

(a) CONTRACT.—The Secretary shall undertake to enter into appropriate arrangements with the National Academy of Sciences to conduct a comprehensive study and investigation of (1) problems which may inhibit

*the safety and mobility of older drivers using the Nation's roads, and (2) means of addressing these problems.*

*(b) REPORT.—In entering into any arrangement with the National Academy of Sciences for conducting such study and investigation, the Secretary shall request the National Academy of Sciences to report to the Secretary and Congress not later than 24 months after the date of the enactment of this Act on the results of such study and investigation, together with its recommendations.*

*(c) AVAILABILITY OF INFORMATION.—The Secretary shall furnish to such Academy at its request any information which the Academy deems necessary for the purpose of conducting the investigation and study authorized by this section.*

*(d) PILOT PROGRAM.—*

*(1) DEVELOPMENT OF PROGRAM.—The Secretary shall develop, in conjunction with the study carried out under this section, a pilot program of highway safety improvements to enhance the safety and mobility of older drivers. The program shall be designed to apply known technology at sites in rural and urban areas and on different types of highways and to determine the daytime and nighttime effectiveness of such technology.*

*(2) STATES ENCOURAGED TO CARRY OUT PROGRAM.—The Secretary shall encourage the States to carry out the pilot program developed under paragraph (1) with funds available for highway safety improvement projects. In particular, the Secretary shall encourage States with a high percentage of older drivers to give high priority to carrying out the pilot program.*

*(3) EVALUATION AND REPORT.—Not later than three years after the date of the enactment of this Act, the Secretary shall evaluate the pilot program under this subsection and shall report to Congress on the effectiveness of such program in improving the safety and mobility of older drivers.*

*SEC. 217. RESCISSION OF CONTRACT AUTHORITY.*

*Effective October 1, 1986, $148,000,000 of unobligated contract authority available for airport development and planning pursuant to section 505(a) of the Airport and Airway Improvement Act of 1982 is rescinded. This rescission does not reduce the balance in the Airport and Airway Trust Fund.*

## *TITLE III—FEDERAL MASS TRANSPORTATION ACT OF 1986*

*SEC. 301. SHORT TITLE.*

*This title may be cited as the "Federal Mass Transportation Act of 1986".*

*SEC. 302. LETTERS OF INTENT; MULTI-YEAR CONTRACTS.*

*(a) GENERAL RULE.—Section 3(a)(4) of the Urban Mass Transportation Act of 1964 is amended to read as follows:*

*"(4) MULTI-YEAR CONTRACTS.—*

*"(A) PRENOTIFICATION OF CONGRESS.—Subject to the provisions of this paragraph, the Secretary may enter into a multi-year contract with an applicant to carry out a project under this section if, at least 30 days before such contract becomes effective, the Secretary notifies, in writing, the Committee on Public Works and Transportation of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate of such contract and submits a summary and copy of such contract to such committees.*

*"(B) LIMITATION ON AMOUNTS STIPULATED.—The total amount stipulated for any fiscal year (including any future fiscal year) under all multi-year contracts entered into under this paragraph shall not exceed the amount authorized to be appropriated out of the Mass Transit Account of the Highway Trust Fund to carry out this section for such fiscal year, less an amount reasonably estimated by the Secretary to be necessary for grants under this section which are not covered by a multi-year contract.*

*"(C) OPERABLE SEGMENT.—The amount stipulated in a multi-year contract to carry out a fixed guideway project shall be sufficient to complete an operable segment.*

*"(D) APPLICABILITY OF OTHER LAWS.—Notwithstanding any other provision of law, a multi-year contract entered into under this paragraph shall not be subject to—*

*"(i) any future availability of funds for obligation, except as provided in subparagraph (B), subsection (i) of this section, and section 9503(e)(4) of the Internal Revenue Code of 1954, and*

*"(ii) any obligation limitation, except an obligation limitation imposed by section 21(a)(2)(G).".*

*(b) CONFORMING AMENDMENTS.—Section 3(a) of such Act is amended —*

*(1) by inserting "GRANT AND LOAN PROGRAMS.—" before "(1) The Secretary";*

*(2) in paragraph (1) by inserting "GENERAL AUTHORITY.—" before "The Secretary is";*

*(3) in paragraph (3) by inserting "APPROVED PROGRAM OF PROJECTS.—" before "The Secretary";*

*(4) in paragraph (5) by inserting "DECREASED COMMUTER RAIL SERVICE.—" before "The Secretary";*

*(5) in paragraph (6) by inserting "LABOR INTENSIVE PROJECTS.—" before "In";*

*(6) by indenting paragraph (1) and aligning such paragraph and paragraphs (3), (5), and (6) with paragraph (4), as amended by subsection (a) of this section; and*

*(7) by aligning subparagraphs (A), (B), (C), (D), and (E) of paragraph (1) with subparagraph (A) of such paragraph (4).*

*(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) of this section shall take effect October 1, 1986, and shall not affect any letter of intent issued before such date.*

*SEC. 303. APPROVAL OF FUNDING LEVELS AND ALLOCATIONS OF FUNDS.*

*Section 3 of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following new subsection:*

*"(i) FUNDING LEVELS AND ALLOCATIONS OF FUNDS.—*

*"(1) SUBMISSION TO CONGRESS.—Not later than January 20, 1987, and each January 20 thereafter, the Secretary shall prepare and transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate—*

*"(A) a proposal of the total amount of funds which should be made available under section 21(a)(2)(C)(iv) of this Act to finance for the fiscal year beginning on October 1 of such year grants and loans for each of the following:*

*"(i) the replacement, rehabilitation, and purchase of buses and related equipment and the construction of bus-related facilities,*

*"(ii) rail modernization, and*

*"(iii) construction of new fixed guideway systems and extensions to fixed guideway systems; and*

*"(B) a proposal of the allocation of the funds to be made available (including any funds proposed to be made available pursuant to clauses (ii) and (iii) of subparagraph (A)) for such fiscal year to finance grants and loans for rail modernization and for construction of new fixed guideway systems and extensions to fixed guideway systems among applicants for such assistance.*

*"(2) SPECIAL PROVISIONS.—The proposals submitted under paragraph (1) of this subsection shall reflect multi-year contracts entered into under subsection (a)(4) of this section; amounts stipulated for each fiscal year under full funding contracts executed under such subsection before October 1, 1986; and, in the case of projects for which letters of intent have been issued under such subsection before October 1, 1986, but for which full funding contracts have not been executed before such date, amounts stipulated for each fiscal year under such letters of intent.*

*"(3) APPROVAL REQUIRED.—Notwithstanding any other provision of this section, no funds may be made available to finance grants and loans under this section for any fiscal year beginning after September 30, 1987, until a proposal transmitted by the Secretary under this subsection for such year (including any revisions thereof) is approved by law.*

*"(4) EFFECT OF APPROVAL.—Upon approval by law of a proposal transmitted under this subsection for any fiscal year beginning after September 30, 1987, the Secretary shall make the amount of funds approved under this subsection available for obligation for such fiscal year and shall allocate the funds for such fiscal year in accordance with the allocations approved under this subsection.".*

*SEC. 304. ADVANCE CONSTRUCTION.*

*(a) DISCRETIONARY GRANT PROGRAM.—Section 3 of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following new subsection:*

*"(j) ADVANCE CONSTRUCTION.—*

*"(1) APPROVED PROJECT.—Upon application of a State or local public body which carries out a project described in this section or a substitute transit project described in section 103(e)(4) of title 23, United States Code, or portion of such a project without the aid of Federal funds in accordance with all procedures and requirements applicable to such a project and upon the Secretary's approval of such application, the Secretary may pay to such applicant the Federal share of the net project costs if, prior to carrying out such project or portion, the Secretary approves the plans and specifications therefor in the same manner as other projects under this section or such section 103(e)(4), as the case may be.*

*"(2) BOND INTEREST.—*

*"(A) ELIGIBLE COST.—Subject to the provisions of this paragraph, the cost of carrying out a project or portion thereof, the Federal share of which the Secretary is authorized to pay under this subsection, shall include the amount of any interest earned and payable on bonds issued by the State or local public body to the extent that the proceeds of such bonds have actually been expended in carrying out such project or portion.*

*"(B) LIMITATION ON AMOUNT.—In no event shall the amount of interest considered as a cost of carrying out a project or portion thereof under subparagraph (A) be greater than the excess of—*

*"(i) the amount which would be the estimated cost of carrying out the project or portion if the project or portion were to be carried out at the time the project or portion is converted to a regularly funded project, over*

*"(ii) the actual cost of carrying out such project or portion (not including such interest).*

"(C) CHANGES IN CONSTRUCTION COST INDICES.—The Secretary shall consider changes in construction cost indices in determining the amount under subparagraph (B)(i).".

(b) BLOCK GRANT PROGRAM.—Section 9 of such Act is amended by adding at the end thereof the following new subsection:

"(p) ADVANCE CONSTRUCTION.—

"(1) APPROVED PROJECT.—When a recipient has obligated all funds apportioned to it under this section and proceeds to carry out any project described in this section (other than a project for operating expenses) or portion of such a project without the aid of Federal funds in accordance with all procedures and all requirements applicable to such a project, except insofar as such procedures and requirements limit a State to carrying out projects with the aid of Federal funds previously apportioned to it, the Secretary, upon application by such recipient and his approval of such application, is authorized to pay to such recipient the Federal share of the costs of carrying out such project or portion when additional funds are apportioned to such recipient under this section if, prior to carrying out such project or portion, the Secretary approves the plans and specifications therefor in the same manner as other projects under this section.

"(2) LIMITATION ON PROJECTS.—The Secretary may not approve an application under this subsection unless an authorization for this section is in effect for the fiscal year for which the application is sought beyond the currently authorized funds for such recipient. No application may be approved under this subsection which will exceed—

"(A) the recipient's expected apportionment under this section if the total amount of funds authorized to be appropriated to carry out this section for such fiscal year were so appropriated, less

"(B) the maximum amount of such apportionment which could be made available for projects for operating expenses under this section.

"(3) BOND INTEREST.—

"(A) ELIGIBLE COST.—Subject to the provisions of this paragraph, the cost of carrying out a project or portion thereof, the Federal share of which the Secretary is authorized to pay under this subsection, shall include the amount of any interest earned and payable on bonds issued by the recipient to the extent that the proceeds of such bonds have actually been expended in carrying out such project or portion.

"(B) LIMITATION ON AMOUNT.—In no event shall the amount of interest considered as a cost of carrying out a project or portion under subparagraph (A) be greater than the excess of—

"(i) the amount which would be the estimated cost of carrying out the project or portion if the project or portion were to be carried out at the time the project or portion is converted to a regularly funded project, over

"(ii) the actual cost of carrying out such project or portion (not including such interest).

"(C) CHANGES IN CONSTRUCTION COST INDICES.—The Secretary shall consider changes in construction cost indices in determining the amount under subparagraph (B)(i).".

SEC. 305. CRITERIA FOR NEW STARTS.

(a) GENERAL RULE.—Section 3 of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following new subsection:

"(k) CRITERIA FOR NEW STARTS.—No grant or loan for construction of a new fixed guideway system or extension of any fixed guideway system may be made under this section unless the Secretary determines that the proposed project—

"(1) is based on the results of an alternatives analysis and preliminary engineering,

"(2) is cost-effective, and

"(3) is supported by an acceptable degree of local financial commitment, including evidence of stable and dependable funding sources to construct, maintain, and operate the system or extension.

In making grants and loans under this section, the Secretary may also consider such other factors as the Secretary deems appropriate. The Secretary shall issue guidelines that set forth the means by which the Secretary will evaluate cost-effectiveness, results of alternatives analysis, and degree of local financial commitment.".

(b) LIMITATION ON APPLICABILITY.—The amendment made by subsection (a) of this section shall not apply to any project for which a letter of intent has been issued under section 3(a)(4) of the Urban Mass Transportation Act of 1964 before the date of the enactment of this Act.

SEC. 306. RELOCATION REQUIREMENTS.

Section 3 of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following new subsection:

"(l) RELOCATION REQUIREMENTS.—Notwithstanding any other provision of this Act, no State, or local public body or agency thereof which receives financial assistance under this Act shall displace or cause to be removed from the property of a mass transportation system, with respect to which such assistance is being provided, any structure on such property owned by any person, partnership, or corporation that provides rent to such State, or local public body or agency in consideration for the occupancy of such property by such structure unless—

"(1) such displacement is directly necessitated by the operation, maintenance, or construction of such system,

"(2) the owner of such structure receives relocation assistance in an amount at least equal to the amount that such owner would have received pursuant to the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601, et seq.) if the owner were a displaced person under such Act, or

"(3) such displacement is expressly authorized by State statute and is in accordance with the terms of the rental agreement.".

SEC. 307. AUTHORIZATION OF APPROPRIATIONS FOR SUBSTITUTE PROJECTS.

Section 4(g) of the Urban Mass Transportation Act of 1964 is amended to read as follows:

"(g) AUTHORIZATION OF APPROPRIATIONS FOR SUBSTITUTE PROJECTS.—There are authorized to be appropriated—

"(1) not to exceed $600,000,000 for fiscal year 1982,

"(2) not to exceed $365,000,000 for fiscal year 1983,

"(3) not to exceed $380,000,000 for fiscal year 1984,

"(4) not to exceed $390,000,000 for fiscal year 1985,

"(5) not to exceed $400,000,000 for fiscal year 1986, and

"(6) such sums as may be necessary for fiscal years 1987, 1988, 1989, 1990, and 1991, to carry out public transportation projects substituted for Interstate segments withdrawn under section 103(e)(4) of title 23, United States Code.".

SEC. 308. RATES FOR ELDERLY AND HANDICAPPED PERSONS.

(a) EXCEPTION TO GENERAL RULE.—Section 5(m) of the Urban Mass Transportation Act of 1964 is amended by striking out "The" and inserting in lieu thereof "(1) IN GENERAL.—Except as provided in paragraph (2) of this subsection, the" and by adding at the end thereof the following new paragraph:

"(2) EXCEPTION.—An applicant whose existing fare collection system does not reasonably permit the collection of half fares may continue to use a preferential fare system for elderly and handicapped persons which was in effect on or before November 26, 1974, and which incorporates the offering of a free return ride upon payment of the generally applicable full fare, except that such a system may be used after the 120th day following the date of the enactment of this paragraph only if such system is available for use by all elderly and handicapped persons.".

(b) CONFORMING AMENDMENTS.—Such section is further amended—

(1) by inserting "RATES FOR ELDERLY AND HANDICAPPED PERSONS.—" after "(m)"; and

(2) by indenting paragraph (1), as designated by subsection (a) of this section, and aligning such paragraph with paragraph (2), as added by such subsection.

SEC. 309. LONG-TERM FINANCIAL PLANNING.

Section 8(a) of the Urban Mass Transportation Act of 1964 is amended by inserting before the period at the end of the third sentence the following: "and development of long-term financial plans for regional urban mass transit improvements and the revenue available from current and potential sources to implement such improvements".

SEC. 310. BLOCK GRANT PROGRAM AMENDMENTS.

(a) FUNDING OF PARTIAL PROGRAMS OF PROJECTS.—Section 9(e)(2) of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following new sentence: "A grant may be made under this section to carry out, in whole or in part, a program of projects.".

(b) TRANSIT ADVERTISING REVENUES.—

(1) EXCLUSION FROM OPERATING REVENUES.—Section 9(k)(1) of such Act is amended by inserting after the third sentence the following new sentence: "For purposes of the preceding sentence, 'revenues from the operation of a public mass transportation system' shall not include the amount of any revenues derived by such system from the sale of advertising and concessions which is in excess of the amount of such revenues derived by such system from the sale of advertising and concessions in fiscal year 1985.".

(2) ANNUAL REPORT.—Section 9(e) of such Act is amended by adding at the end thereof the following new paragraph:

"(4) ANNUAL REPORT TO SECRETARY.—Each recipient (including any person receiving funds from a Governor under this section) shall submit to the Secretary annually a report on the revenues such recipient derives from the sale of advertising and concessions.".

(c) REMOVAL OF OPERATING ASSISTANCE LIMITATION FOR SMALL URBANIZED AREAS.—

(1) IN GENERAL.—Section 9(k)(2) of such Act is amended to read as follows:

"(2) LIMITATIONS ON AMOUNT OF OPERATING ASSISTANCE.—The amount of funds apportioned under this section which may be used for operating assistance shall not exceed—

"(A) with respect to an urbanized area with a population of 1,000,000 or more, 80 percent of the amount of funds apportioned for fiscal year 1982 under paragraphs (1)(A),

(2)(A), and (3)(A) of section 5(a) of this Act to such area; and

"(B) with respect to an urbanized area with a population of 200,000 or more and less than 1,000,000, 90 percent of funds so apportioned to such area.".

(2) CONFORMING AMENDMENTS.—Section 9(l)(1)(A) of such Act is amended—

(A) by inserting "of funds apportioned under this section to an urbanized area with a population of 200,000 or more" after "any recipient"; and

(B) by striking out the last sentence.

(3) APPLICABILITY.—The amendments made by paragraphs (1) and (2) shall apply to fiscal years beginning after September 30, 1986.

(d) TRADE-IN FOR OPERATING ASSISTANCE.—

(1) LIMITATION ON GENERAL RULE.—Section 9(l) of such Act is amended by striking out paragraph (4) and inserting in lieu thereof the following:

"(4) TRADE-IN FOR OPERATING ASSISTANCE.—Any recipient of a grant under section 3 of this Act in any fiscal year beginning after September 30, 1986, may not carry out a transfer under this subsection in such fiscal year, unless—

"(A) the grant under section 3 is—

"(i) for emergency repairs, as determined by the Secretary;

"(ii) made pursuant to a letter of intent issued, or full funding contract executed, under section 3(a)(4) of this Act before the date of enactment of this subparagraph; or

"(iii) for a project which has a high priority on the plan prepared by the Secretary for allocation of resources under section 3 of this Act for such fiscal year and for an amount which has been reduced in accordance with section 3(a)(7) of this Act; or

"(B) such recipient received Federal assistance under section 1139(b) of the Omnibus Budget Reconciliation Act of 1981 and carried out a transfer under this subsection in the fiscal year ending September 30, 1983, and the percentage of the funds appropriated to carry out section 3 of this Act which such recipient will receive in grants under such section 3 in such fiscal year beginning after September 30, 1986, will not exceed the percentage of the funds appropriated to carry out such section 3 which such recipient received in grants under such section 3 in the fiscal year ending September 30, 1983.".

(2) EXTENSION OF TRADE-IN PROGRAM.—Such section 9(l) is further amended—

(A) in paragraph (1)(A) by striking out "and 1984" and inserting in lieu thereof ", 1984, 1987, 1988, 1989, 1990, and 1991"; and

(B) in paragraph (2)(B) by striking out "three-year" and by striking out "1985" and inserting in lieu thereof "1992".

(3) LIMITATION ON DISCRETIONARY GRANTS.—Section 9(l)(3) of such Act is amended—

(A) by inserting before the period at the end of the first sentence "for the replacement, rehabilitation, and purchase of buses and related equipment and the construction of bus-related facilities"; and

(B) in the last sentence by striking out "discretionary construction grants" and inserting in lieu thereof "such discretionary grants".

(4) CONFORMING AMENDMENT TO SECTION 3.—Section 3(a) of such Act is amended by adding at the end thereof the following new paragraphs:

"(7) LIMITATION ON ELIGIBILITY OF RECIPIENTS USING SECTION 9 TRADE-IN.—Except as provided in paragraph (8) of this subsection, any recipient which carries out a transfer under section 9(l) of this Act for a fiscal year beginning after September 30, 1986, may not receive a grant under this section in such fiscal year, unless such grant is—

"(A) for emergency repairs, as determined by the Secretary;

"(B) made pursuant to a letter of intent issued, or full funding contract executed, under paragraph (4) of this subsection before the date of enactment of this subparagraph; or

"(C) for a project which has a high priority on the plan prepared by the Secretary for allocation of resources under this section for such fiscal year;

and unless, in the case of projects referred to in subparagraph (C), such recipient agrees with the Secretary that the amount of the Federal grants for such projects, as determined under section 4(a) of this Act, shall be reduced in the aggregate by an amount equal to the amount of the capital assistance transferred under such transfer.

"(8) PERCENTAGE OF FUNDS LIMITATION.—Any recipient which—

"(A) carries out a transfer under section 9(l) of this Act for any fiscal year beginning after September 30, 1986,

"(B) received Federal assistance under section 1139(b) of the Omnibus Budget Reconciliation Act of 1981, and

"(C) carried out a transfer under section 9(l) of this Act in the fiscal year ending September 30, 1983,

may not receive in grants under this section in such fiscal year beginning after September 30, 1986, a percentage of the funds made available to carry out this section in such fiscal year greater than the percentage of funds appropriated to carry out this section which such recipient received in grants under this section in the fiscal year ending September 30, 1983.".

(5) EFFECTIVE DATE.—The amendments made by this subsection shall take effect October 1, 1986.

(e) APPORTIONMENTS WITH RESPECT TO SMALL URBANIZED AREAS.—

(1) AVAILABILITY TO GOVERNORS.—Section 9(m)(2) of such Act is amended to read as follows:

"(2) SMALL URBANIZED AREAS.—Sums apportioned under subsection (d) with respect to any urbanized area with a population of less than 200,000 shall be made available to the Governor for expenditure in such area.".

(2) TRANSFERS.—Section 9(n)(1) of such Act is amended to read as follows:

"(n) TRANSFERS OF FUNDS.—

"(1) SMALL URBANIZED AREAS.—The Governor may transfer an amount apportioned under subsection (d) for expenditure in an urbanized area of less than 200,000 population to supplement funds apportioned to the State under section 18(a) of this Act or to supplement funds apportioned to other urbanized areas within the State. The Governor may make such transfers only after approval by responsible local elected officials and publicly owned operators of mass transportation services in each area with respect to which the funding was originally apportioned pursuant to subsection (d); except that, if the period of availability under subsection (o) of the funds proposed to be transferred will end within 90 days, the Governor may make such transfer without such approval if no approvable grant application is pending under this section for any project in such area. The Governor may transfer an amount of the State's apportionment under section 18(a) to supplement funds apportioned for expenditure in the State under subsection (d). Amounts transferred shall be subject to the capital and operating assistance limitations applicable to the original apportionments of such amounts.".

(3) CONFORMING AMENDMENT.—Subsection (d) of section 9 of such Act is amended by striking out "which urbanized areas" and inserting in lieu thereof "which an urbanized area".

(f) DATE OF APPORTIONMENT.—Section 9 of such Act is further amended by adding at the end thereof the following new subsection:

"(q) DATE OF APPORTIONMENT.—Funds appropriated to carry out this section for any fiscal year shall be apportioned in accordance with the provisions of this section not later than the tenth day following the date on which such funds are appropriated or October 1 of such fiscal year, whichever is later.".

(g) TECHNICAL AMENDMENTS.—(1) Section 9(e) of such Act is amended by adding at the end thereof the following new paragraph:

"(5) ACCEPTANCE OF CERTIFICATION.—No grant shall be made under this section to any recipient in any fiscal year unless the Secretary has accepted a certification for such fiscal year submitted by such person pursuant to this subsection.".

(2) Section 9(g) of such Act is amended by striking out paragraph (4).

(h) CONFORMING AMENDMENTS.—

(1) SECTION 9(e).—Section 9(e) of such Act is amended—

(A) by inserting "GRANT REQUIREMENTS.—" before "(1) The provisions";

(B) in paragraph (1) by inserting "APPLICABLE PROVISIONS.—" before "The provisions";

(C) in paragraph (2) by inserting "PROGRAM OF PROJECTS.—" before "To receive";

(D) in paragraph (3) by inserting "ANNUAL CERTIFICATION.—" before "Each recipient";

(E) by indenting paragraph (1) and aligning such paragraph and paragraphs (2) and (3) with paragraph (4), as added to such section by subsection (b)(2) of this section; and

(F) by aligning subparagraphs (A), (B), (C), (D), (E), (F), (G), and (H) of paragraph (3) with subparagraph (A) of section 9(k)(2), as amended by subsection (c)(1) of this section.

(2) SECTION 9(k).—Section 9(k) of such Act is amended—

(A) by inserting "FEDERAL SHARE.—" after "(k)";

(B) by inserting "IN GENERAL.—" after "(1)"; and

(C) by indenting paragraph (1) and aligning such paragraph with paragraph (2), as amended by subsection (c)(1) of this section.

(3) SECTION 9(l).—Section 9(l) of such Act is amended—

(A) by inserting "TRADE-IN PROGRAM.—" before "(1)(A) Notwithstanding";

(B) in paragraph (1) by inserting "IN GENERAL.—" before "(A) Notwithstanding";

(C) in paragraph (1)(A) by inserting "AUTHORIZATION; LIMITATION.—" before "Notwithstanding";

(D) in paragraph (1)(B) by inserting "TRADE-IN OF SECTION 5 CAPITAL APPORTIONMENT.—" before "Notwithstanding any";

(E) in paragraph (2) by inserting "CERTIFICATION.—" before "Any recipient";

(F) in paragraph (3) by inserting "SET-ASIDE FOR DISCRETIONARY GRANTS.—" before "Whenever";

(G) by indenting paragraph (1) and aligning such paragraph and paragraphs (2) and (3) with paragraph (4), as amended by subsection (d)(1) of this section; and

(H) by aligning the subparagraphs of paragraphs (1) and (2) with subparagraph (B) of such paragraph (4).

(4) SECTION 9(m).—Section 9(m) of such Act is amended—

(A) by inserting "RECIPIENTS OF APPORTIONMENTS.—" before "(1) The Governor";

(B) in paragraph (1) by inserting "IN GENERAL.—" before "The Governor"; and

(C) by indenting paragraph (1) and aligning such paragraph with (2), as amended by subsection (e)(1) of this section.

(5) SECTION 9(n).—Section 9(n) of such Act is amended—

(A) in paragraph (2) by inserting "LARGE URBANIZED AREAS.—" before "A designated"; and

(B) by aligning paragraph (2) with paragraph (1), as amended by subsection (e)(2) of this section.

SEC. 311. UNIVERSITY TRANSPORTATION CENTERS.

(a) GRANT PROGRAM; NATIONAL ADVISORY COUNCIL.—Section 11(b) of the Urban Mass Transportation Act of 1964 is amended to read as follows:

"(b) UNIVERSITY TRANSPORTATION CENTERS.—

"(1) GRANTS FOR ESTABLISHMENT AND OPERATION.—In addition to grants authorized by subsection (a) of this section, the Secretary shall make grants to one or more nonprofit institutions of higher learning to establish and operate one regional transportation center in each of the ten Federal regions which comprise the Standard Federal Regional Boundary System.

"(2) RESPONSIBILITIES.—The responsibilities of each transportation center established under this subsection shall include, but not be limited to, the conduct of infrastructure research concerning transportation and research and training concerning transportation of passengers and property and the interpretation, publication, and dissemination of the results of such research. The responsibilities of one of such centers may include research on the testing of new model buses.

"(3) APPLICATION.—Any nonprofit institution of higher learning interested in receiving a grant under this subsection shall submit to the Secretary an application in such form and containing such information as the Secretary may require by regulation.

"(4) SELECTION CRITERIA.—The Secretary shall select recipients of grants under this subsection on the basis of the following criteria:

"(A) The regional transportation center shall be located in a State which is representative of the needs of the Federal region for improved transportation services and facilities.

"(B) The demonstrated research and extension resources available to the grant recipient for carrying out this subsection.

"(C) The capability of the grant recipient to provide leadership in making national and regional contributions to the solution of both long-range and immediate transportation problems.

"(D) The grant recipient shall have an established transportation program or programs encompassing several modes of transportation.

"(E) The grant recipient shall have a demonstrated commitment to supporting ongoing transportation research programs with regularly budgeted institutional funds of at least $200,000 per year.

"(F) The grant recipient shall have a demonstrated ability to disseminate results of transportation research and educational programs through a statewide or regionwide continuing education program.

"(G) The projects which the grant recipient proposes to carry out under the grant.

"(5) MAINTENANCE OF EFFORT.—No grant may be made under this section in any fiscal year unless the recipient of such grant enters into such agreements with the Secretary as the Secretary may require to ensure that such recipient will maintain its aggregate expenditures from all other sources for establishing and operating a regional transportation center and related research activities at or above the average level of such expenditures in its two fiscal years preceding the date of enactment of this subsection.

"(6) FEDERAL SHARE.—The Federal share of a grant under this subsection shall be 50 percent of the costs of establishing and operating the regional transportation center and related research activities carried out by the grant recipient.

"(7) NATIONAL ADVISORY COUNCIL.—

"(A) ESTABLISHMENT; FUNCTIONS.—The Secretary shall establish in the Department of Transportation a national advisory council to coordinate the research and training to be carried out by the grant recipients, to disseminate the results of such research, to act as a clearinghouse between such centers and the transportation industry, and to review and evaluate programs carried out by such centers.

"(B) MEMBERS.—The council shall be composed of the directors of the regional transportation centers and 19 other members appointed by the Secretary as follows:

"(i) Six officers of the Department of Transportation one of whom represents the Office of the Secretary, one of whom represents the Federal Highway Administration, one of whom represents the Urban Mass Transportation Administration, one of whom represents the National Highway Traffic Safety Administration, one of whom represents the Research and Special Programs Administration, and one of whom represents the Federal Railroad Administration.

"(ii) Five representatives of State and local governments.

"(iii) Eight representatives of the transportation industry and organizations of employees in such industry.

A vacancy in the membership of the council shall be filled in the manner in which the original appointment was made.

"(C) TERM OF OFFICE; PAY; CHAIRMAN.—Each of the members appointed by the Secretary shall serve for a term of five years. Members of the council shall serve without pay. The chairman of the council shall be designated by the Secretary.

"(D) MEETINGS.—The council shall meet at least annually and at such other times as the chairman may designate.

"(E) AGENCY INFORMATION.—Subject to subchapter II of chapter 5 of title 5, United States Code, the council may secure directly from any department or agency of the United States information necessary to enable it to carry out this subsection. Upon request of the Chairman of the council, the head of such department or agency shall furnish such information to the council.

"(F) TERMINATION DATE INAPPLICABLE.—Section 14 of the Federal Advisory Committee Act shall not apply to the council.

"(8) ADMINISTRATION THROUGH OFFICE OF SECRETARY.—Administrative responsibility for carrying out this subsection shall be in the Office of the Secretary.

"(9) ALLOCATION OF FUNDS.—The Secretary shall allocate funds made available to carry out this subsection equitably among the Federal regions.

"(10) TECHNOLOGY TRANSFER SET-ASIDE.—Not less than 5 percent of the funds made available to carry out this subsection for any fiscal year shall be available to carry out technology transfer activities.".

(b) AUTHORIZATIONS FOR APPROPRIATIONS; CONTRACT AUTHORITY.—Section 21 of such Act is amended by adding at the end thereof the following new subsection:

"(c) UNIVERSITY TRANSPORTATION CENTERS.—

"(1) AMOUNT OF FUNDS.—There shall be available to the Secretary to carry out section 11(b) of this Act for each of fiscal years 1987, 1988, 1989, 1990, and 1991 $5,000,000 out of the Highway Trust Fund (other than the Mass Transit Account) and $5,000,000 out of such Mass Transit Account.

"(2) CONTRACT AUTHORITY.—Notwithstanding any other provision of law, approval by the Secretary of a grant with funds made available by paragraph (1) shall be deemed a contractual obligation of the United States for payment of the Federal share of the cost of the project.

"(3) EXEMPTION FROM OBLIGATION CEILING.—Funds made available out of the Mass Transit Account of the Highway Trust Fund by this subsection shall not be subject to any obligation limitation.

"(4) PERIOD OF AVAILABILITY.—Funds made available by this subsection shall remain available until expended.".

(c) CONFORMING AMENDMENT.—Section 11(a) of such Act is amended by inserting "GRANT PROGRAM.—" before "The Secretary".

SEC. 312. SOLE SOURCE PROCUREMENTS.

(a) GENERAL RULE.—Section 12(b) of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following new paragraph:

"(3) SOLE SOURCE PROCUREMENT CONTRACTS.—Any recipient of a grant under section 9 of this Act who is procuring an associated capital maintenance item under section 9(j) of this Act may, without receiving prior approval of the Secretary, contract directly with the original manufacturer or supplier of the item to be replaced if such recipient first certifies in writing to the Secretary—

"(A) that such manufacturer or supplier is the only source for such item; and

"(B) that the price of such item is no higher than the price paid for such item by like customers.".

(b) CONFORMING AMENDMENTS.—Such section is further amended—

(1) by inserting "CONTRACT REQUIREMENTS.—" before "(1) All contracts";

(2) by inserting "NONCOMPETITIVE BID CONTRACTS.—" before "All contracts";

(3) by inserting "ROLLING STOCK ACQUISITION CONTRACTS.—" before "In lieu of"; and

(4) by indenting paragraph (1) and aligning paragraphs (1) and (2) with paragraph (3), as added by subsection (a) of this section.

SEC. 313. COTRACTING FOR ENGINEERING AND DESIGN SERVICES.

Section 12(b) of the Urban Mass Transportation Act of 1964 is further amended by adding at the end thereof the following new paragraph:

"(4) CONTRACTING FOR ENGINEERING AND DESIGN SERVICES.—Each contract for program management, construction management, feasibility studies, preliminary engineering, design, architectural engineering, surveying, mapping, and related services with respect to a project for which a loan or grant is made under this Act shall be awarded in the same manner as a contract for architectural and engineering services is negotiated under title IX of the Federal Property and Admin-

istrative Services Act of 1949 or equivalent State qualifications-based requirements.".

SEC. 314. LIMITATION CONCERNING SOUTH AFRICA ON AWARDS OF CONTRACTS.

Section 12(b) of the Urban Mass Transportation Act of 1964 is further amended by adding at the end thereof the following new paragraph:

"(5) LIMITATIONS CONCERNING SOUTH AFRICA ON AWARDS OF CONTRACTS.—A recipient of a grant under this Act may prohibit or otherwise limit the award of contracts with respect to a project under this Act by including in its contracts terms and conditions related to the contractor's business in South Africa in accordance with a State or local law if such recipient first enters into an agreement with the Secretary that any costs incurred as a result of such prohibition or limitation which are in excess of the costs that would otherwise have been incurred with respect to such project under this Act will not, for purposes of this Act, be considered to be a cost of such project.".

SEC. 315. BUS REMANUFACTURING AND OVERHAULING OF ROLLING STOCK.

(a) INCLUSION IN DEFINITION OF CONSTRUCTION.—Section 12(c)(1) of the Urban Mass Transportation Act of 1964 is amended by inserting "(A)" after "such term also means" and by inserting before the semicolon at the end thereof the following: ", (B) any bus remanufacturing project which extends the economic life of a bus eight years or more, and (C) any project for the overhaul of rolling stock (whether or not such overhaul increases the useful life of the rolling stock)".

(b) EXPANSION OF ASSOCIATED CAPITAL MAINTENANCE ITEMS.—

(1) INCLUSION OF LESS EXPENSIVE ITEMS.—(1) The second sentence of section 9(j) of such Act is amended by striking out "1 per centum" and inserting in lieu thereof "one-half of one percent".

(2) INCLUSION OF CERTAIN RECONSTRUCTED ITEMS.—Section 9(j) of such Act is further amended by inserting "ELIGIBLE ACTIVITIES.—" after "(j)", by inserting "(1) IN GENERAL.—" before "Grants", and by adding at the end the following new paragraph:

"(2) INCLUSION OF CERTAIN RECONSTRUCTED ITEMS.—A project for the reconstruction (whether by employees of the grant recipient or by contract) of any equipment and materials each of which, after reconstruction, will have a fair market value no less than one half of 1 percent of the current fair market value of rolling stock comparable to the rolling stock for which the equipment and materials are to be used shall be considered a project for construction of an associated capital maintenance item under this section.".

(c) FEDERAL SHARE OF CONSTRUCTION PROJECTS.—The first sentence of section 9(k)(1) of such Act is amended by striking out "shall not exceed" the first place it appears and inserting in lieu thereof "shall be".

(d) MAINTENANCE REQUIREMENT.—Section 3(a)(2)(A) of such Act is amended to read as follows:

"(2) LIMITATIONS ON ASSISTANCE.—

"(A) MINIMUM QUALIFICATIONS OF APPLICANTS.—No grant or loan shall be provided under this section unless the Secretary determines that the applicant—

"(i) has or will have the legal, financial, and technical capacity to carry out the proposed project;

"(ii) has or will have satisfactory continuing control, through operation or lease or otherwise, over the use of the facilities and the equipment; and

"(iii) has or will have sufficient capability to maintain the facilities and equipment, and will maintain, such facilities and equipment.".

(e) CONFORMING AMENDMENTS.—(1) Section 9(j) of such Act is further amended by indenting paragraph (1), as designated by subsection (b)(2) of this section, and aligning such paragraph (1) with paragraph (2), as added to such section by subsection (b)(2).

(2) The first sentence of section 9(k)(1) of such Act is further amended by striking out "(including capital maintenance items)" and inserting in lieu thereof "(including any project for the acquisition or construction of an associated capital maintenance item)".

(3) Section 3(a)(2) of such Act is amended—

(A) by inserting "LIMITATIONS ON PROPERTY ACQUISITION LOANS.—" after "(B)";

(B) by inserting "LIMITATION ON PAYMENT FOR OPERATING EXPENSES AND PROCUREMENTS.—" after "(C)"; and

(C) by aligning subparagraphs (B) and (C) with subparagraph (A), as amended by subsection (a) of this section.

SEC. 316. LIMITATION ON PRIVATE ENTERPRISE PARTICIPATION.

(a) IN GENERAL.—Section 12(d) of the Urban Mass Transportation Act of 1964 is amended by inserting "(1) LIMITATION ON REGULATION OF RATES.—" before "None" and by adding at the end thereof the following new paragraph:

"(2) LIMITATION ON PRIVATE ENTERPRISE PARTICIPATION.—None of the provisions of this Act shall be construed to authorize the Secretary to prescribe a specific level of private enterprise or competitive bid participation in the provision of mass transportation services and the conduct of mass transportation functions. None of the provisions of this Act shall be construed to infringe on the rights of the recipients of Federal financial assistance under this Act to determine the extent and amount of mass transportation services and functions to be carried out by private enterprise.".

(b) CONFORMING AMENDMENTS.—(1) Section 9(e) of such Act is amended by inserting "12(d," after "12(c),".

(2) Section 12(d) of such Act is further amended—

(A) by inserting "LIMITATIONS ON CONSTRUCTION OF ACT.—" after "(d)"; and

(B) by indenting paragraph (1), as designated by subsection (a), and aligning such paragraph with paragraph (2) of such section, as added by such subsection.

SEC. 317. BUS TESTING.

(a) REQUIREMENT.—Section 12 of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following new subsection:

"(h) BUS TESTING.—

"(1) REQUIREMENT.—No funds appropriated or made available pursuant to this Act after September 30, 1988, may be obligated or expended for the acquisition of a new bus model unless a bus of such model has been tested at a facility established under section 314(b) of the Federal Mass Transportation Act of 1986.

"(2) NEW BUS MODEL DEFINED.—As used in this subsection, the term 'new bus model' means a bus model which has not been used in mass transportation service in the United States before the date of production of such model or a bus model which has been used in such service but which is being produced with a major change in configuration or components.".

(b) BUS TESTING FACILITY.—

(1) ESTABLISHMENT.—The Secretary shall establish a facility for testing new bus models for maintainability, reliability, safety, performance, structural integrity, fuel economy, and noise. Such facility shall be established by renovation of a facility constructed with Federal assistance for the purpose of training rail personnel.

(2) OPERATION.—The Secretary shall enter into a contract with a qualified person to operate and maintain the facility established under paragraph (1) for testing new bus models for maintainability, reliability, safety, performance, structural integrity, fuel economy, and noise. Such contract may provide for the testing of rail cars and other vehicles at such facility.

(3) COLLECTION OF FEES.—Under the contract entered into under paragraph (2), the person operating and maintaining the facility shall establish and collect fees for the testing of vehicles at the facility. Such fees shall be subject to the approval of the Secretary.

(4) NEW BUS MODEL DEFINED.—For purposes of this subsection, the term "new bus model" has the meaning such term has under section 12(h)(2) of the Urban Mass Transportation Act of 1964.

(5) FUNDING.—There shall be available to the Secretary out of the Mass Transit Account of the Highway Trust Fund for establishment of the facility under paragraph (1) $200,000 for fiscal year 1987 and $3,000,000 for fiscal year 1988. Funds made available by this paragraph shall remain available until expended and shall not be subject to any obligation limitation.

SEC. 318. PREAWARD AND POSTDELIVERY AUDIT OF BUS PURCHASES.

Section 12 of the Urban Mass Transportation Act of 1964 is further amended by adding at the end thereof the following new subsection:

"(i) PREAWARD AND POSTDELIVERY AUDIT OF BUS PURCHASES.—For the purpose of assuring compliance with Federal motor vehicle safety requirements, the requirements of section 165 of the Surface Transportation Assistance Act of 1982 (relating to purchases of American products), and bid specifications requirements of recipients of grants under this Act, the Administrator shall issue regulations requiring a preaward and postdelivery audit with respect to any grant under this Act for the purchase of buses and other rolling stock. For the purposes of such audit, manufacturer certification shall not be sufficient, and independent inspections and auditing shall be required.".

SEC. 319. FEDERAL SHARE FOR ELDERLY AND HANDICAPPED PROJECTS.

Section 16 of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following new subsection:

"(e) INCREASED FEDERAL SHARE OF CERTAIN NONREQUIRED PROJECTS.—Notwithstanding any other provision of this Act, the Federal share under sections 3, 9, and 18 of this Act for each capital improvement project which enhances the accessibility for elderly and handicapped persons to public transportation service and which is not required by Federal law (including any other provision of this Act) shall be 95 percent of the net project cost of such project.".

SEC. 320. AUTHORIZATION OF APPROPRIATIONS.

(a) SECTIONS 9 AND 18.—Section 21(a)(1) of the Urban Mass Transportation Act of 1964 is amended by striking out "and" after "1985," and by inserting after "1986," the following: "$2,100,000,000 for the fiscal year ending September 30, 1987, $2,150,000,000

for the fiscal year ending September 30, 1988, $2,200,000,000 for the fiscal year ending September 30, 1989, $2,250,000,000 for the fiscal year ending September 30, 1990, and $2,300,000,000 for the fiscal year ending September 30, 1991,".

(b) SECTIONS 3, 4(i), 8, AND 16(b).—Section 21(a)(2) of such Act is amended by redesignating subparagraph (C) (and any references thereto) as subparagraph (D) and by inserting after subparagraph (B) the following new subparagraph:

"(C) AUTHORIZATIONS FROM MASS TRANSIT ACCOUNT.—

"(i) BUSES UNDER SECTION 3.—There shall be available for obligation from the Mass Transit Account of the Highway Trust Fund to finance grants and loans under section 3 of this Act for the replacement, rehabilitation, and purchase of buses and related equipment and the construction of bus-related facilities not less than $100,000,000 for fiscal year 1987 and $170,000,000 per fiscal year for each of fiscal years 1988, 1989, 1990, and 1991.

"(ii) RAIL MODERNIZATION UNDER SECTION 3.—There shall be available for obligation from the Mass Transit Account of the Highway Trust Fund to finance grants and loans under section 3 of this Act for rail modernization not less than $405,000,000 for fiscal year 1987 and $680,000,000 per fiscal year for each of fiscal years 1988, 1989, 1990, and 1991.

"(iii) NEW CONSTRUCTION UNDER SECTION 3.—There shall be available for obligation from the Mass Transit Account of the Highway Trust Fund to finance grants and loans under section 3 of this Act for construction of new fixed guideway systems and extensions to fixed guideway systems not less than $405,000,000 for fiscal year 1987 and $680,000,000 per fiscal year for each of fiscal years 1988 1989, 1990, and 1991.

"(iv) GENERAL SECTION 3.—In addition to amounts made available by the preceding clauses of this subparagraph, there shall be available for obligation from the Mass Transit Account of the Highway Trust Fund to finance grants and loans under section 3 of this Act not less than $100,000,000 for fiscal year 1987 and $170,000,000 per fiscal year for each of fiscal years 1988, 1989, 1990, and 1991.

"(v) SECTION 8.—There shall be available for obligation from the Mass Transit Account of the Highway Trust Fund to carry out section 8 of this Act not less than $45,000,000 for fiscal year 1987 and $50,000,000 per fiscal year for each of fiscal years 1988, 1989, 1990, and 1991.

"(vi) SECTIONS 4(i) AND 16(b).—There shall be available for obligation from the Mass Transit Account of the Highway Trust Fund to carry out sections 4(i) and 16(b) of this Act not less than $35,000,000 for fiscal year 1987 and $40,000,000 per fiscal year for each of fiscal years 1988, 1989, 1990, and 1991.".

(c) PERIOD OF AVAILABILITY; OBLIGATION CEILING.—Section 21(a)(2) of such Act is further amended by adding at the end thereof the following new subparagraphs:

"(E) PERIOD OF AVAILABILITY.—Funds made available by this paragraph shall remain available until expended.

"(F) OBLIGATION CEILING.—Notwithstanding any other provisions of law, the total of all obligations under the Urban Mass Transportation Act of 1964 (other than sections 9A and 11(b)) from the Mass Transit Account of the Highway Trust Fund shall not exceed $995,000,000 for fiscal year 1987 and $1,795,000,000 per fiscal year for each of fiscal years 1988, 1989, 1990, and 1991.".

(d) SECTIONS 6, 10, 11(a), 12(a), AND 20.—Section 21(b) of such Act is amended by striking out "and" after "1984," and by striking out the period at the end of the first sentence and inserting in lieu thereof ", and $50,000,000 per fiscal year for each of the fiscal years ending September 30, 1987, September 30, 1988, September 30, 1989, September 30, 1990, and September 30, 1991.".

(e) REMOVAL OF LIMITATION ON THE SOURCE OF FUNDING FOR INNOVATIVE MANAGEMENT GRANTS.—Section 4(i) of such Act is amended by striking out ", using sums available pursuant to section 4(c)(3)(A) of this section,".

(f) CONFORMING AMENDMENTS.—(1) Effective October 1, 1986, section 16(b) of such Act is amended by striking out the last sentence.

(2) Section 21(a)(2)(D) of such Act (as redesignated by subsection (b) of this subsection) is amended by striking out "and (B)" and inserting in lieu thereof ", (B), and (C)".

(3) Section 21(a)(4) of such Act is amended by striking out "and 1986" and inserting in lieu thereof "1986, 1987, 1988, 1989, 1990, and 1991".

(4) Section 21(a) of such Act is amended—

(A) by inserting "IN GENERAL.—" before "(1) There is";

(B) in paragraph (1) by inserting "SECTIONS 9 AND 18.—" before "There is";

(C) in paragraph (2) by inserting "SECTIONS 3, 4(I), 8, AND 16(B).—" before "(A) There";

(D) in paragraph (2)(A) by inserting "FISCAL YEAR 1983.—" before "There";

(E) in paragraph (2)(B) by inserting "FISCAL YEARS 1984 AND 1985.—" before "There";

(F) in paragraph (2)(D), as redesignated by subsection (b) of this section, by inserting "CONTRACT AUTHORITY.—" before "Notwithstanding";

(G) in paragraph (3) by inserting "1983 SET-ASIDE FOR SECTION 18.—" before "In";

(H) in paragraph (4) by inserting "SET-ASIDE FOR SECTION 18.—" before "In";

(I) in paragraph (5) by inserting "SET-ASIDE FOR SECTION 8.—" before "Of";

(J) by indenting paragraph (1) and aligning such paragraph and paragraphs (2), (3), (4), and (5) with paragraph (1) of subsection (c) of section 21 of such Act, as added by section 311(b) of this Act; and

(K) by aligning subparagraphs (A), (B), and (D) of paragraph (2) with subparagraph (C), as inserted in such section 21 by subsection (b) of this section.

SEC. 321. CONSTRUCTION MANAGEMENT OVERSIGHT.

(a) IN GENERAL.—The Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following:

"SEC. 23. CONSTRUCTION MANAGEMENT OVERSIGHT.

"(a) AUTHORITY TO USE FUNDS.—The Secretary may use not to exceed one-half of 1 percent of—

"(1) the funds made available for any fiscal year by section 21(a)(2)(C) to carry out section 3 to contract with any person to oversee the construction of any major project under section 3;

"(2) the funds appropriated for any fiscal year pursuant to section 21(a)(1) to carry out section 9 to contract with any person to oversee the construction of any major project under section 9;

"(3) the funds appropriated for any fiscal year pursuant to section 21(a)(1) to carry out section 18 to contract with any person to oversee the construction of any major project under section 18; and

"(4) the funds appropriated for any fiscal year pursuant to section 4(g) to contract with any person to oversee the construction of any major public transportation project substituted for an Interstate segment withdrawn under section 103(e)(4) of title 23, United States Code.

"(b) FEDERAL SHARE.—Any contract entered into under subsection (a) shall provide for the payment by the Secretary of 100 percent of the cost of carrying out the contract.".

(b) CONFORMING AMENDMENTS.—(1) Section 9(a) of such Act is amended by inserting after "section 21(a) of this Act" in paragraphs (1) and (2) the following: "and not used under section 23(a)(2)".

(2) Section 21(a)(4) of such Act is amended by inserting after "subsection" the following: "and not used under section 23(a)(3)".

SEC. 322. BICYCLE FACILITIES.

The Urban Mass Transportation Act of of 1964 is further amended by adding at the end thereof the following new section:

"SEC. 24. BICYCLE FACILITIES.

"(a) ELIGIBILITY.—For purposes of this Act, a project to provide access for bicycles to mass transportation facilities, to provide shelters and parking facilities for bicycles in or around mass transportation facilities, or to install racks or other equipment for transporting bicycles on mass transportation vehicles shall be deemed to be a construction project eligible for assistance under sections 4, 9, and 18 of this Act.

"(b) FEDERAL SHARE.—Notwithstanding sections 4(a), 9(k), and 18(e), the Federal share under this Act for any project to provide access for bicycles to mass transportation facilities, to provide shelters and parking facilities for bicycles in or around mass transportation facilities, or to install racks or other equipment for transporting bicycles on mass transportation vehicles shall be 90 percent of the cost of such project.".

SEC. 323. TRANSIT TECHNICAL AMENDMENTS.

(a) URBAN MASS TRANSPORTATION ACT.—(1) Section 5(h)(1) of the Urban Mass Transportation Act of 1964 is amended by striking out "approach" and inserting in lieu thereof "approval".

(2) Section 5(j)(1) of such Act is amended by striking out "action" and inserting in lieu thereof "section".

(3) Section 5(n)(2) of such Act is amended by inserting "and section 9" after "this section".

(4) Section 9(l)(3) of such Act is amended by striking out "1983" and inserting in lieu thereof "1984".

(5) Section 16 of such Act is amended by redesignating the second subsection (c) as subsection (d).

(6) Section 17(d)(4) of such Act is amended by striking out "; and".

(b) SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982.—Section 303 of the Surface Transportation Assistance Act of 1982 is amended by striking out "(a)" the first place it appears.

SEC. 324. MULTI-YEAR CONTRACT FOR METRO RAIL PROJECT.

Notwithstanding any other provision of law, not later than the 90th day after the publication of the final environmental impact statement prepared as a result of alignment changes necessary to avoid tunneling through the methane risk areas identified in the task force report of the city of Los Angeles dated June 10, 1985, the Secretary shall issue a project record of decision and enter into a multi-year contract under section 3 of the Urban Mass Transportation Act of 1964, as amended by this Act, with the Southern California Rapid Transit District to complete Minimum Operable Segment-1

and to complete the locally preferred Minimum Operable Segment-2 alternative of the Downtown Los Angeles to the San Fernando Valley Metro Rail Project. Notwithstanding any other provision of law, such contract shall include at least $110,000,000 in fiscal year 1987 and $190,000,000 in each of fiscal years 1988, 1989, 1990, and 1991. Notwithstanding any other provision of law, the final environmental impact statement for Minimum Operable Segment-2 shall be completed, approved by the Secretary, and filed with the Environmental Protection Agency not later than March 31, 1987.

SEC. 325 MULTI-YEAR CONTRACT FOR TRANSIT BRIDGE LANES.

Notwithstanding any other provision of law, the Secretary shall enter into a multi-year contract under section 3 of the Urban Mass Transportation Act of 1964, as amended by this Act, with the Mississippi River Bridge Authority of the Louisiana Department of Transportation and Development to complete transit lanes on the Greater New Orleans Bridge No. 2. Notwithstanding any other provision of law, such contract shall include $18,750,000 in fiscal year 1988.

SEC. 326. INCREASED OPERATING ASSISTANCE DURING CONSTRUCTION OF INTERSTATE PROJECT.

Upon request of the State of Florida and the designated recipients under section 9 of the Urban Mass Transportation Act of 1964 for the urbanized areas of Fort Lauderdale and Miami, Florida, the amount of funds apportioned under such section with respect to such urbanized areas which may otherwise be used for operating assistance under such section shall be increased by $4,400,000 for each fiscal year in which onsite construction is being carried out on a 40-mile segment of Interstate Route I-95 in Dade, Broward, and Palm Beach Counties, Florida. The increased operating assistance may only be used for commuter rail service provided as a maintenance-of-traffic measure during the period in which the construction is being carried out.

SEC. 327. FEASIBILITY STUDY.

Section 314(a) of the Surface Transportation Assistance Act of 1982 is amended to read as follows:

"SEC. 314. (a) Upon request of a local public body eligible to receive a grant under the Urban Mass Transportation Act of 1964, the Secretary of Transportation shall make a grant to such public body to conduct a feasibility study to examine the possibility of constructing and operating an electric bus line with the advanced and environmentally sound electric bus technology that is being developed in the State of California for the Santa Barbara transit system.".

SEC. 328. FEASIBILITY STUDY OF ABANDONED TROLLEY SERVICE.

(a) STUDY.—The Secretary, in cooperation with the city of Philadelphia, Pennsylvania, shall conduct a study of the feasibility of restoring trolley service to corridors on which trolley service has been abandoned in such city.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Secretary shall transmit to Congress a report on the results of the study conducted under subsection (a).

SEC. 329. COMPREHENSIVE TRANSIT PLAN FOR THE VIRGIN ISLANDS.

(a) STUDY.—The Secretary, in cooperation with the Virgin Islands Department of Public Works, shall study and analyze the mass transportation needs of the Virgin Islands for the purpose of developing a comprehensive mass transportation plan for the Virgin Islands.

(b) REPORT AND PLAN.—Not later than one year after the date of the enactment of this Act, the Secretary shall transmit to Congress a report on the results of the study and analysis conducted under subsection (a) together with a copy of the mass transportation plan which the Secretary recommends for the Virgin Islands.

SEC. 330. BUS CARRIER CERTIFICATES FOR RECIPIENTS OF GOVERNMENTAL ASSISTANCE.

(a) GENERAL RULE FOR NEW ENTRANTS.—Section 10922(c)(1) of title 49, United States Code, is amended to read as follows:

"(c) MOTOR COMMON CARRIERS OF PASSENGERS.—

"(1) INTERSTATE TRANSPORTATION.—

"(A) REGULAR-ROUTE TRANSPORTATION.—The Commission shall issue a certificate to a person (including any private recipient of governmental assistance) authorizing that person to provide regular-route transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title as a motor common carrier of passengers if the Commission finds that the person is fit, willing, and able to provide the transportation to be authorized by the certificate and to comply with this subtitle and regulations of the Commission, unless the Commission finds, on the basis of evidence presented by any person objecting to the issuance of the certificate, that the transportation to be authorized by the certificate is not consistent with the public interest.

"(B) SPECIAL AND CHARTER TRANSPORTATION.—

"(i) PRIVATE RECIPIENTS OF ASSISTANCE.—The Commission shall issue a certificate to a private recipient of governmental assistance authorizing that recipient to provide special or charter transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title as a motor common carrier of passengers if the Commission finds that the recipient is fit, willing, and able to provide the transportation to be authorized by the certificate and to comply with this subtitle and regulations of the Commission, unless the Commission finds, on the basis of evidence presented by any person objecting to the issuance of the certificate, that the transportation to be authorized by the certificate is not consistent with the public interest.

"(ii) OTHER PERSONS.—The Commission shall issue a certificate to a person (other than a private recipient of governmental assistance) authorizing that person to provide special or charter transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title as a motor common carrier of passengers if the Commission finds that the person is fit, willing, and able to provide the transportation to be authorized by the certificate and to comply with this subtitle and regulations of the Commission.

"(C) PUBLIC RECIPIENTS FOR CHARTER TRANSPORTATION.—The Commission shall issue a certificate to a public recipient of governmental assistance authorizing that recipient to provide special or charter transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title as a motor common carrier of passengers if the Commission finds that—

"(i) the recipient is fit, willing, and able to provide the transportation to be authorized by the certificate and to comply with this subtitle and regulations of the Commission; and

"(ii)(I) no motor common carrier of passengers (other than a motor common carrier of passengers which is a public recipient of governmental assistance) is providing, or is willing and able to provide, the transportation to be authorized by the certificate; or

"(II) the transportation to be authorized by the certificate is to be provided entirely in the area in which the public recipient provides regularly scheduled mass transportation services.

"(D) PUBLIC RECIPIENTS FOR REGULAR-ROUTE TRANSPORTATION.—The Commission shall issue a certificate to a public recipient of governmental assistance authorizing that recipient to provide regular-route transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title as a motor common carrier of passengers if the Commission finds that the recipient is fit, willing, and able to provide the transportation to be authorized by the certificate and to comply with this subtitle and regulations of the Commission, unless the Commission finds, on the basis of evidence presented by any person objecting to the issuance of the certificate, that the transportation to be authorized by the certificate is not consistent with the public interest.

"(E) TREATMENT OF CERTAIN PUBLIC RECIPIENTS.—Subject to provisions of section 12(f) of the Urban Mass Transportation Act of 1964, any public recipient of governmental assistance which is providing or seeking to provide transportation of passengers subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title shall, for purposes of this subtitle, be treated as a person which is providing or seeking to provide transportation of passengers subject to such jurisdiction.

"(F) DEFINITIONS.—In this subsection—

"(i) PUBLIC RECIPIENT OF GOVERNMENTAL ASSISTANCE.—The term 'public recipient of governmental assistance' means—

"(I) any State,

"(II) any municipality or other political subdivision of a State,

"(III) any public agency or instrumentality of one or more States and municipalities and political subdivisions of a State,

"(IV) any Indian tribe,

"(V) any corporation, board, or other person owned or controlled by any entity described in subclause (I), (II), (III), or (IV), and

"(VI) any corporation, board, or other person owned by, controlled by, or under common control with, any entity described in subclause (I), (II), (III), (IV), or (V),

which before, on, or after the date of the enactment of this paragraph received governmental financial assistance for the purchase or operation of any bus.

"(ii) PRIVATE RECIPIENT OF GOVERNMENTAL ASSISTANCE.—The term 'private recipient of governmental assistance' means any person (other than a person described in clause (i)) who before, on, or after the date of the enactment of this paragraph received governmental financial assistance in the form of a subsidy for the purchase, lease, or operation of any bus.".

(b) PUBLIC INTEREST FINDING.—Section 10922(c)(3) of title 49, United States Code, is amended by striking out "and" at the end of subparagraph (C), by striking out the period at the end of subparagraph (D) and inserting in lieu thereof "; and", and by adding at the end thereof the following new subparagraph:

"(E) the amount and extent of governmental financial assistance which the applicant for the certificate received before, on, or after the date of the enactment of this sub-

paragraph for the purchase or operation of buses.

In addition, in making any finding relating to public interest under paragraph (1)(D) of this subsection, the Commission shall consider whether or not the person objecting to issuance of the certificate is a motor common carrier of passengers which is providing, or is willing and able to provide, the transportation to be authorized by the certificate.".

(c) CONFORMING AMENDMENT.—Section 10922(c)(3) of title 49, United States Code, is amended by striking out "(1)(A)" and inserting in lieu thereof "(1)".

SEC. 331. UTILIZATION REQUIREMENT FOR CERTIFICATES AUTHORIZING INTRASTATE BUS OPERATIONS.

(a) GENERAL RULE.—Section 10922(c)(2) of title 49, United States Code, is amended by adding at the end thereof the following new subparagraph:

"(J) LIMITATION ON INTRASTATE CERTIFICATES.—Each certificate issued under this paragraph to provide intrastate transportation of passengers on any route shall be subject to a condition which limits the authority of the carrier to provide intrastate transportation service under the certificate only if the carrier provides regularly scheduled interstate transportation service on the route.".

(b) RETROACTIVE APPLICABILITY.—The amendment made by subsection (a) shall apply to any certificate issued under section 10922(c)(2) of title 49, United States Code, before, on, or after the date of the enactment of this Act.

## TITLE IV—UNIFORM RELOCATION ACT AMENDMENTS OF 1986

SEC. 401. SHORT TITLE.

This title may be cited as the "Uniform Relocation Act Amendments of 1986".

SEC. 402. DEFINITIONS.

(a) FEDERAL AGENCY DEFINED.—Section 101(1) of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (hereinafter in this title referred to as the "Uniform Act") (42 U.S.C. 4601(1)) is amended to read as follows:

"(1) The term 'Federal agency' means any department, agency, or instrumentality in the executive branch of the Government, any wholly owned Government corporation, the Architect of the Capitol, the Federal Reserve banks and branches thereof, and any person who has the authority to acquire property by eminent domain under Federal law.".

(b) STATE AGENCY DEFINED.—Section 101(3) of the Uniform Act (42 U.S.C. 4601(3)) is amended to read as follows:

"(3) The term 'State agency' means any department, agency, or instrumentality of a State or of a political subdivision of a State, any department, agency, or instrumentality of two or more States or of two or more political subdivisions of a State or States, and any person who has the authority to acquire property by eminent domain under State law.".

(c) INTEREST REDUCTION PAYMENTS AS FEDERAL FINANCIAL ASSISTANCE.—Section 101(4) of the Uniform Act (42 U.S.C. 4601(4)) is amended by inserting ", any interest reduction payment to an individual in connection with the purchase and occupancy of a residence by that individual," after "insurance".

(d) DISPLACED PERSON DEFINED.—Section 101(6) of the Uniform Act (42 U.S.C. 4601(6)) is amended to read as follows:

"(6) The term 'displaced person' means—

"(A) any person who moves from real property, or moves his personal property from real property—

"(i) as a direct result of a written notice of intent to acquire or the acquisition of such real property in whole or in part for a program or project undertaken by a Federal agency or with Federal financial assistance, or

"(ii) as a direct result of rehabilitation, demolition, or such other displacing activity as the lead agency may prescribe, under a program or project undertaken by a Federal agency or with Federal financial assistance in any case in which the person is a residential tenant and the head of the displacing agency determines that such displacement is permanent; and

"(B) solely for the purposes of sections 202 (a) and (c) and 205 of this title, any person who moves from real property, or moves his personal property from real property—

"(i) on which such person conducts a business or farm operation, as a direct result of a written notice of intent to acquire or the acquisition of such real property in whole or in part for a program or project undertaken by a Federal agency or with Federal financial assistance; or

"(ii) on which such person conducts a small business or a farm operation or a business defined by section 101(7)(D), as a direct result of rehabilitation, demolition, or such other displacing activity as the lead agency may prescribe, under a program or project undertaken by a Federal agency or with Federal financial assistance where the head of the displacing agency determines that such displacement is permanent.

Such term does not include a person who has been determined, according to criteria established by the head of the lead agency, to be either in unlawful occupancy of the displacement dwelling or to have occupied such dwelling for the purpose of obtaining assistance under this Act. Such term also does not include, in any case in which the displacing agency acquires property for a program or project, any person (other than a person who was an occupant of such property at the time it was acquired) who occupies such property on a rental basis for a short term or a period subject to termination when the property is needed for the program or project.".

(e) COMPARABLE REPLACEMENT DWELLING, DISPLACING AGENCY, LEAD AGENCY, AND APPRAISAL DEFINED.—Section 101 of the Uniform Act (42 U.S.C. 4601) is amended by adding at the end thereof the following new paragraphs:

"(10) The term 'comparable replacement dwelling' means any dwelling that is (A) decent, safe, and sanitary; (B) adequate in size to accommodate the occupants; (C) within the financial means of the displaced person; (D) functionally equivalent and substantially the same as the replacement dwelling with respect to number of rooms and living space; (E) in an area not subject to unreasonable adverse environmental conditions; and (F) in a location generally not less desirable than the location of the displaced person's dwelling with respect to public utilities, facilities, services, and the displaced person's place of employment.

"(11) The term 'displacing agency' means any Federal agency carrying out a program or project, and any State, State agency, or person carrying out a program or project with Federal financial assistance, which causes a person to be a displaced person.

"(12) The term 'lead agency' means the Department of Transportation.

"(13) The term 'appraisal' means a written statement independently and impartially prepared by a qualified appraiser setting forth an opinion of defined value of an adequately described property as of a specific date, supported by the presentation and analysis of relevant market information.".

(f) CONFORMING AMENDMENT.—Section 101(7)(D) of the Uniform Act (42 U.S.C. 4601(7)(D)) is amended by striking out "(a)" after "202".

SEC. 403. CERTIFICATION.

Title I of the Uniform Act is amended by adding at the end thereof the following new section:

"CERTIFICATION

"SEC. 103. (a)(1) Notwithstanding sections 210 and 305 of this Act, the head of a Federal agency may discharge any of his responsibilities under this Act, by accepting a certification by a State agency that it will perform such responsibility if the head of such Federal agency finds that such responsibility will be performed in accordance with State laws, regulations, directives, and standards which will accomplish the purpose and effect of this Act. Prior to accepting a certification under the preceding sentence, the head of the Federal agency shall provide interested parties with an opportunity for public review and comment and shall consult with interested local general purpose governments.

"(2) The head of the lead agency shall issue guidelines and regulations to carry out this section.

"(3) The head of the lead agency shall, in coordination with other Federal agencies, monitor from time to time, and report biennially to the Congress on, State agency implementation of this section. A State agency shall make available any information required for such purpose.

"(4) After consultation with the head of the lead agency, the head of a Federal agency may rescind his acceptance of any certification under this section, in whole or in part, if the State agency fails to comply with such certification or with State law.

"(b) The head of a Federal agency may withhold his approval of any Federal financial assistance to or contract or cooperative agreement with any displacing agency found to have failed to comply with any certification under this section or with a State law.".

SEC. 404. DECLARATION OF FINDINGS AND POLICY.

Section 201 of the Uniform Act (42 U.S.C 4621) is amended to read as follows:

"DECLARATION OF FINDINGS AND POLICY

"SEC. 201. (a) The Congress finds and declares that—

"(1) displacement as a direct result of programs or projects undertaken by a Federal agency or with Federal financial assistance is caused by a number of activities, including rehabilitation, demolition, code enforcement, and acquisition;

"(2) relocation assistance policies must provide for fair, uniform, and equitable treatment of all affected persons;

"(3) the displacement of businesses often results in their closure;

"(4) minimizing the adverse impact of displacement of businesses is essential to maintaining the economic and social well-being of communities; and

"(5) implementation of this Act has resulted in burdensome, inefficient, and inconsistent compliance requirements and procedures which will be improved by establishing a lead agency and allowing for State certification and implementation.

"(b) This title establishes a uniform policy for the fair and equitable treatment of persons displaced as a direct result of programs or projects undertaken by a Federal agency or with Federal financial assistance. The primary purpose of this title is to ensure that such persons shall not suffer disproportionate injuries as a result of programs and projects designed for the benefit of the public as a whole and to minimize the hardship of displacement on such persons.

"(c) It is the intent of Congress that—

"(1) Federal agencies shall carry out this title in a manner which minimizes waste, fraud, and mismanagement and reduces unnecessary administrative costs borne by States and State agencies in providing relocation assistance;

"(2) uniform procedures for the administration of relocation assistance shall, to the maximum extent feasible, assure that the unique circumstances of any displaced person are taken into account and that persons in essentially similar circumstances are accorded equal treatment under this Act; and

"(3) the improvement of housing conditions of economically disadvantaged persons under this title shall be undertaken, to the maximum extent feasible, in coordination with existing Federal, State, and local governmental programs for accomplishing such goals.".

SEC. 405. MOVING AND RELATED EXPENSES.

(a) BUSINESS REESTABLISHMENT EXPENSES.—Section 202(a) of the Uniform Act (42 U.S.C. 4622(a)) is amended—

(1) by striking out the matter preceding paragraph (1) and inserting in lieu thereof the following:

"(a) Whenever a program or project to be undertaken by a displacing agency will result in the displacement of any person, the head of the displacing agency shall provide for the payment to the displaced person of—";

(2) by striking out "and" at the end of paragraph (2);

(3) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and"; and

(4) by adding at the end thereof the following:

"(4) actual reasonable expenses necessary to reestablish a displaced farm, nonprofit organization, or small business at its new site, but not to exceed $10,000.".

(b) ALTERNATIVE RESIDENTIAL ALLOWANCE.—Section 202(b) of the Uniform Act (42 U.S.C. 4622(b)) is amended by striking out all that follows "may receive" and inserting in lieu thereof "an expense and dislocation allowance, which shall be determined according to a schedule established by the head of the lead agency.".

(c) ALTERNATIVE BUSINESS ALLOWANCE.—Section 202(c) of the Uniform Act (42 U.S.C. 4622(c)) is amended to read as follows:

"(c) Any displaced person eligible for payments under subsection (a) of this section who is displaced from the person's place of business or farm operation and who is eligible under criteria established by the head of the lead agency may elect to accept the payment authorized by this subsection in lieu of the payment authorized by subsection (a) of this section. Such payment shall consist of a fixed payment in an amount to be determined according to criteria established by the head of the lead agency, except that such payment shall not be less than $1,000 nor more than $20,000.".

SEC. 406. REPLACEMENT HOUSING FOR HOMEOWNER.

Section 203(a) of the Uniform Act (42 U.S.C. 4623(a)) is amended—

(1) by striking out "Federal" in the portion of paragraph (1) preceding subparagraph (A) and inserting in lieu thereof "displacing";

(2) by striking out "$15,000" and inserting in lieu thereof, "$22,500";

(3) by striking out "acquired by" and all that follows through "market" in paragraph (1)(A) and inserting in lieu thereof "acquired by the displacing agency, equals the reasonable cost of a comparable replacement dwelling";

(4) by striking out paragraph (1)(B) and inserting in lieu thereof the following:

"(B) The amount, if any, which will compensate such displaced person for any increased interest costs and other debt service costs which such person is required to pay for financing the acquisition of any such comparable replacement dwelling. Such amount shall be paid only if the dwelling acquired by the displacing agency was encumbered by a bona fide mortgage which was a valid lien on such dwelling for not less than one hundred and eighty days immediately prior to the initiation of negotiations for the acquisition of such dwelling."; and

(5) by striking out paragraph (2) and inserting in lieu thereof the following:

"(2) The additional payment authorized by this section shall be made only to a displaced person who purchases and occupies a decent, safe, and sanitary replacement dwelling within one year after the date on which such person receives final payment from the displacing agency for the acquired dwelling or the date on which the displacing agency's obligation under section 205(c)(3) of this Act is met, whichever is later, except that the displacing agency may extend such period for good cause. If such period is extended, the payment under this section shall be based on the costs of relocating the person to a comparable replacement dwelling within one year of such date.".

SEC. 407. REPLACEMENT HOUSING FOR TENANTS AND CERTAIN OTHERS.

Section 204 of the Uniform Act (42 U.S.C. 4624) is amended to read as follows:

"REPLACEMENT HOUSING FOR TENANTS AND CERTAIN OTHERS

"SEC. 204. (a) In addition to amounts otherwise authorized by this title, the head of a displacing agency shall make a payment to or for any displaced person displaced from any dwelling not eligible to receive a payment under section 203 which dwelling was actually and lawfully occupied by such displaced person for not less than ninety days immediately prior to (1) the initiation of negotiations for acquisition of such dwelling, or (2) in any case in which displacement is not a direct result of acquisition, such other event as the head of the lead agency shall prescribe. Such payment shall consist of the amount necessary to enable such person to lease or rent for a period not to exceed four years, a comparable replacement dwelling, but not to exceed $6,000. At the discretion of the head of the displacing agency, a payment under this subsection may be made in periodic installments. Computation of a payment under this subsection to a low-income displaced person for a comparable replacement dwelling shall take into account such person's income.

"(b) Any person eligible for a payment under subsection (a) of this section may elect to apply such payment to a down payment on, and other incidental expenses pursuant to, the purchase of a decent, safe, and sanitary replacement dwelling. Any such person may, at the discretion of the head of the displacing agency, be eligible under this subsection for the maximum payment allowed under subsection (a), except that, in the case of a displaced homeowner who has occupied the displacement dwelling for at least ninety days but not more than one hundred and eighty days immediately prior to the initiation of negotiations for the acquisition of such dwelling, such payment shall not exceed the payment such person would otherwise have received under section 203(a) of this Act had the person occupied the displacement dwelling for one hundred and eighty days immediately prior to the initiation of such negotiations.".

SEC. 408. RELOCATION PLANNING, ASSISTANCE COORDINATION, AND ADVISORY SERVICES.

Section 205 of the Uniform Act (42 U.S.C. 4625) is amended to read as follows:

"RELOCATION PLANNING, ASSISTANCE COORDINATION, AND ADVISORY SERVICES

"SEC. 205. (a) At an early stage in the planning of a program or project undertaken by a Federal agency or with Federal financial assistance and before the commencement of any actions which will cause displacements, a relocation analysis shall be developed by the displacing agency to assist it in the recognition and successful resolution of those problems associated with the displacements of individuals, families, businesses and farm operations in order to minimize adverse impacts on displaced persons and to expedite program or project advancement and completion.

"(b) The head of any displacing agency shall ensure that the relocation assistance advisory services described in subsection (c) of this section are made available to all persons displaced by such agency. If such agency head determines that any person occupying property immediately adjacent to the property where the displacing activity occurs is caused substantial economic injury as a result thereof, the agency head may make available to such person such advisory services.

"(c) Each relocation assistance advisory program required by subsection (b) of this section shall include such measures, facilities, or services as may be necessary or appropriate in order to—

"(1) determine, and make timely recommendations on, the needs and preferences, if any, of displaced persons for relocation assistance;

"(2) provide current and continuing information on the availability, sales prices, and rental charges of comparable replacement dwellings for displaced homeowners and tenants and suitable locations for businesses and farm operations;

"(3) assure that a person shall not be required to move from a dwelling unless the person has had a reasonable opportunity to relocate to a comparable replacement dwelling, except in the case of—

"(A) a major disaster as defined in section 102(2) of the Disaster Relief Act of 1974;

"(B) a national emergency declared by the President; or

"(C) any other emergency which requires the person to move immediately from the dwelling because continued occupancy of such dwelling by such person constitutes a substantial danger to the health or safety of such person;

"(4) assist a person displaced from a business or farm operation in obtaining and becoming established in a suitable replacement location;

"(5) supply (A) information concerning other Federal and State programs which

*may be of assistance to displaced persons, and (B) technical assistance to such persons in applying for assistance under such programs; and*

*"(6) provide other advisory services to displaced persons in order to minimize hardships to such persons in adjusting to relocation.*

*"(d) The head of a displacing agency shall coordinate the relocation activities performed by such agency with other Federal, State, or local governmental actions in the community which could affect the efficient and effective delivery of relocation assistance and related services.*

*"(e) Whenever two or more Federal agencies provide financial assistance to a displacing agency other than a Federal agency, to implement functionally or geographically related activities which will result in the displacement of a person, the heads of such Federal agencies may agree that the procedures of one of such agencies shall be utilized to implement this title with respect to such activities. If such agreement cannot be reached, then the head of the lead agency shall designate one of such agencies as the agency whose procedures shall be utilized to implement this title with respect to such activities. Such related activities shall constitute a single program or project for purposes of this Act.*

*"(f) Notwithstanding section 101(6) of this Act, in any case in which a displacing agency acquires property for a program or project, any person who occupies such property on a rental basis for a short term or a period subject to termination when the property is needed for the program or project shall be eligible for advisory services to the extent determined by the displacing agency.".*

*SEC. 409. HOUSING REPLACEMENT BY FEDERAL AGENCY AS LAST RESORT.*

*Section 206 of the Uniform Act (42 U.S.C. 4626) is amended to read as follows:*

*"HOUSING REPLACEMENT BY FEDERAL AGENCY AS LAST RESORT*

*"SEC. 206. (a) If a program or project undertaken by a Federal agency or with Federal financial assistance cannot proceed on a timely basis because comparable replacement dwellings are not available, and the head of the displacing agency determines that such dwellings cannot otherwise be made available, the head of the displacing agency may take such action as is necessary or appropriate to provide such dwellings by use of funds authorized for such project. The head of the displacing agency may use this section to exceed the maximum amounts which may be paid under sections 203 and 204 on a case-by-case basis for good cause as determined in accordance with such regulations as the head of the lead agency shall issue.*

*"(b) No person shall be required to move from his dwelling on account of any program or project undertaken by a Federal agency or with Federal financial assistance, unless the head of the displacing agency is satisfied that comparable replacement housing is available to such person.".*

*SEC. 410. ASSURANCES.*

*Section 210 of the Uniform Act (42 U.S.C. 4630) is amended by striking out "State agency" the first place it appears and inserting in lieu thereof "displacing agency (other than a Federal agency)", by striking out "State agency" the second place it appears and inserting in lieu thereof "displacing agency", and by striking out "decent, safe, and sanitary" in paragraph (3) and inserting in lieu thereof "comparable".*

*SEC. 411. FEDERAL SHARE OF COSTS.*

*(a) GENERAL RULE.—Section 211(a) of the Uniform Act (42 U.S.C. 4631(a)) is amended to read as follows:*

*"(a) The cost to a displacing agency of providing payments and assistance pursuant to titles II and III shall be included as part of the cost of a program or project undertaken by a Federal agency or with Federal financial assistance. A displacing agency, other than a Federal agency, shall be eligible for Federal financial assistance with respect to such payments and assistance in the same manner and to the same extent as other program or project costs.".*

*(b) LIMITATION.—Section 211(b) of the Uniform Act (42 U.S.C. 4631(b)) is amended to read as follows:*

*"(b) No payment or assistance under title II or III of this Act shall be required or included as a program or project cost under this section, if the displaced person receives a payment required by State law which is determined by the head of the lead agency to have substantially the same purpose and effect as such payment under this section.".*

*SEC. 412. DUTIES OF LEAD AGENCY.*

*Section 213 of the Uniform Act (42 U.S.C. 4633) is amended to read as follows:*

*"DUTIES OF LEAD AGENCY*

*"SEC. 213. (a) The head of the lead agency shall—*

*"(1) develop, publish, and issue, with the active participation of other Federal agencies responsible for funding relocation and acquisition actions, and in coordination with State and local governments, such regulations as may be necessary to carry out this Act;*

*"(2) ensure that relocation assistance activities under this Act are coordinated with low-income housing assistance programs or projects by a Federal agency or a State or State agency with Federal financial assistance;*

*"(3) monitor, in coordination with other Federal agencies, the implementation and enforcement of this Act and report to the Congress, as appropriate, on any major issues or problems with respect to any policy or other provision of this Act; and*

*"(4) perform such other duties as may be provided by law as relate to the purposes of this Act.*

*"(b) The head of the lead agency is authorized to establish such regulations and procedures as he may determine to be necessary to assure—*

*"(1) that the payments and assistance authorized by this Act shall be administered in a manner which is fair and reasonable and as uniform as practicable;*

*"(2) that a displaced person who makes proper application for a payment authorized for such person by this title shall be paid promptly after a move or, in hardship cases, be paid in advance; and*

*"(3) that any aggrieved person may have his application reviewed by the head of the Federal agency having authority over the applicable program or project or, in the case of a program or project receiving Federal financial assistance, by the State agency having authority over such program or project or the Federal agency having authority over such program or project if there is no such State agency.".*

*SEC. 413. PAYMENTS UNDER OTHER LAWS.*

*Section 216 of the Uniform Act (42 U.S.C. 4636) is amended by inserting after "Federal law" the following: "(except for any Federal law providing low-income housing assistance)".*

*SEC. 414. TRANSFER OF SURPLUS PROPERTY.*

*Section 218 of the Uniform Act (42 U.S.C. 4638) is amended by inserting "net" after "all".*

*SEC. 415. REPEALS.*

*Sections 214, 217, and 219 of the Uniform Act (42 U.S.C. 4634 and 4637) are hereby repealed.*

*SEC. 416. UNIFORM POLICY ON REAL PROPERTY ACQUISITION PRACTICES.*

*(a) WAIVER OF APPRAISAL.—Section 301(2) of the Uniform Act (42 U.S.C. 4651(2)) is amended by inserting the following before the period at the end thereof: ", except that the head of the lead agency may prescribe a procedure to waive the appraisal in cases involving the acquisition by sale or donation of property with a low fair market value".*

*(b) ACQUISITION OF UNECONOMIC REMNANT.—Section 301(9) of the Uniform Act (42 U.S.C. 4651 (9)) is amended to read as follows:*

*"(9) If the acquisition of only a portion of a property would leave the owner with an uneconomic remnant, the head of the Federal agency concerned shall offer to acquire that remnant. For the purposes of this Act, an uneconomic remnant is a parcel of real property in which the owner is left with an interest after the partial acquisition of the owner's property and which the head of the Federal agency concerned has determined has little or no value or utility to the owner.".*

*(c) Section 301 of the Uniform Act (42 U.S.C. 4651) is amended by adding at the end thereof the following new paragraph:*

*"(10) DONATIONS.—A person whose real property is being acquired in accordance with this title may, after the person has been fully informed of his right to receive just compensation for such property, donate such property, any part thereof, any interest therein, or any compensation paid therefor to a Federal agency, as such person shall determine.".*

*SEC. 417. ASSURANCES.*

*Section 305 of the Uniform Act (42 U.S.C. 4655) is amended by inserting "(a)" after "SEC. 305.", by striking out "a State agency" the first place it appears and inserting in lieu thereof "an acquiring agency", by striking out "State agency" the second place it appears and inserting in lieu thereof "acquiring agency", and by adding at the end thereof the following new subsection:*

*"(b) For purposes of this section, the term 'acquiring agency' means—*

*"(1) a State agency (as defined in section 101(3)) which has the authority to acquire property by eminent domain under State law, and*

*"(2) a State agency or person which does not have such authority, to the extent provided by the head of the lead agency by regulation.".*

*SEC. 418. EFFECTIVE DATE.*

*This title and the amendments made by this title shall take effect two years after the date of enactment of this Act, except that the amendment made by section 412 of this title (to the extent such amendment prescribes authority to develop, publish, and issue rules and regulations) shall take effect on the date of enactment of this Act.*

AMENDMENT OFFERED BY MR. HOWARD

Mr. HOWARD. Mr. Chairman, I offered an amendment.

The Clerk read as follows:

Amendment offered by Mr. HOWARD: Page 23, line 21, strike out "$3,300,000,000" and insert in lieu thereof "$3,000,000,000"; page

24, line 3, strike out "$1,700,000,000" and insert in lieu thereof "$2,000,000,000".

Mr. HOWARD. Mr. Chairman, the Committee on Public Works had been advised by the Budget Committee as to the numbers that we would be required to have in our legislation in order to comply with the Budget Act.

The following day, the full Committee on Public Works and Transportation passed out our bill, at which time we were $75 million below the requirement for the Budget Act.

However, subsequent to that, the budget conference met again and cut our numbers further so that when we did go to the Rules Committee, we were over the Budget Act. The Rules Committee did give us a waiver of this 302(f) section of the Budget Act.

However, I stated at that time, and this amendment is to follow up that statement, that I would offer an amendment that would bring our legislation this year in compliance with the Budget Act; and that is what this amendment does.

Mr. SHUSTER. Mr. Chairman, I move to strike the last word simply to agree with the distinguished chairman of our committee. This amendment does precisely that; it brings the legislation into conformity with the Budget Act, just as we said we would do in the previous debate on the rule.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey [Mr. HOWARD].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. MC CURDY

Mr. McCURDY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McCURDY: Page 172, after line 17, insert the following:

(c) DEMONSTRATION OF 65 MPH SPEED LIMIT ON CERTAIN RURAL INTERSTATE ROUTES.—

(1) IN GENERAL.—A State may have a maximum speed limit not in excess of 65 miles per hour on any portion of a highway on the National System of Interstate and Defense Highways within the State which is located in a rural area designated under paragraph (3), if the Governor of the State determines that—

(A) an increase to such limit is not likely to have a significant adverse affect on highway safety on such portion; and

(B) for each point along the portion, the road surface characteristics, shoulder condition, grade, alignment, sight distance, and the condition of required roadside safety appurtenances meet current Federal standards.

A State in which a speed limit in excess of 55 miles per hour is established under this subsection shall not be in violation of section 154 of title 23, United States Code, if such State otherwise meets the requirements of section 154 of title 23, United States Code.

(2) REGULATIONS.—Not later than 6 months after the date of the enactment of this Act, the Secretary shall, after consultation with Governors of the States, issue regulations—

(A) establishing criteria for determining rural areas for purposes of this subsection; and

(B) establishing criteria for determining affects on highway safety on a highway, which may include, but need not be limited to, criteria on—

(i) the number of vehicles using the highway and the degree of congestion on the highway;

(ii) the number, rate, and severity of accidents on the highway and an analysis of the accident rate on the highway based on speed of the vehicles involved;

(iii) the number of points of access to the highway and the amount of development at such points; and

(iv) the distance between each portion of the highway and any urbanized area.

(3) DESIGNATION OF RURAL AREAS AND ESTABLISHMENT OF HIGHER SPEED LIMITS.—After the issuance of regulations under paragraph (2), a State may, in accordance with such regulations—

(A) designate areas in the State as rural areas for purposes of this subsection; and

(B) establish speed limits in accordance with paragraph (1).

(4) REPORT.—Not later than 4 years after the date of the enactment of this Act, the Secretary shall report to Congress on the results at that time of the implementation of this subsection.

(5) TERMINATION OF THE DEMONSTRATION PROGRAM.—This subsection shall cease to be in effect 5 years after the date of the enactment of this Act.

Page 169, lines 8 and 9, strike out "55 mph" and insert in lieu thereof "maximum speed limit".

Page 169, lines 14 and 15, strike out "55 miles per hour but not in excess of 60 miles per hour" and insert in lieu thereof "the posted maximum speed limit but not in excess of 5 miles per hour above such limit".

Page 169, lines 18 and 19, strike out "60 miles per hour but not in excess of 65 miles per hour" and insert in lieu thereof "5 miles per hour above the posted maximum speed limit but not in excess of 10 miles per hour above such limit".

Page 169, lines 22 and 23, strike out "65 miles per hour" and insert in lieu thereof "10 miles per hour above the posted maximum speed limit".

Page 170, lines 2 and 3, strike out "55 mph" and insert in lieu thereof "maximum speed limit".

Page 170, lines 4 and 5 strike out "55 miles per hour but not in excess of 60 miles per hour" and insert in lieu thereof "the posted maximum speed limit but not in excess of 5 miles per hour above such limit".

Page 170, line 8, strike out "55 mph" and insert in lieu thereof "maximum speed limit".

Page 170, lines 8 and 9, strike out "60 miles per hour but not in excess of 65 miles per hour" and insert in lieu thereof "5 miles per hour above the posted maximum speed limit but not in excess of 10 miles per hour above such limit".

Page 170, line 13, strike out "55 mph" and insert in lieu thereof "maximum speed limit".

Page 170, lines 13 and 14, strike out "65 miles per hour" and insert in lieu thereof "10 miles per hour above the posted maximum speed limit".

Page 170, line 17, strike out "55 MPH HIGHWAY" and insert in lieu thereof "MAXIMUM SPEED LIMIT HIGHWAY".

Page 170, line 17, strike out "55 mph" and insert in lieu thereof "maximum speed limit".

Page 170, line 20, insert after "55 miles per hour" the following: "(or at a greated speed authorized under subsection (c) of section 204 of the Highway Safety Act of 1986)".

Page 170, line 22, insert "below 55 miles per hour" after "reduced".

Page 171, line 3, strike out "55 mph" and insert in lieu thereof "maximum speed limit".

Page 171, strike out lines 7 through 9 and insert in lieu thereof the following:

(i) by striking out "fifty-five miles per hour on public highways with speed limits posted at fifty-five miles per hour" and inserting in lieu thereof "the posted maximum speed limit on maximum speed limit highways";

Mr. McCURDY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. McCURDY. Mr. Chairman, my colleagues, I understand that this is a rather hastily called bill to the floor, and that not everyone was prepared for this consideration and debate tonight.

However, many of us on a bipartisan basis have been working with Members and Governors of a number of States to consider the amendment which we have offered today, which would raise the speed limit on rural interstate highways. Let me repeat: rural interstate highways, to 65 miles per hour for a period of 5 years at which time the Secretary of Transportation will report as to the effect of this amendment, the effect of the increase in the speed limit.

I might say at the outset, Mr. Chairman, that there are many proponents in this body of a speed limit of a much greater limit.

□ 1825

Some have advocated 70, some have advocated no speed limit whatsoever. What we have tried to fashion here in this amendment is a reasonable, rational compromise position that, one, protects the safety of those individuals driving on our interstate highways and, second, considers the States rights position of being able to determine if there own best interests are in the interest of not only safety but in the interest of time and business on those highways, an issue that I believe the States could and should be able to make.

We are basing this amendment not out of just a desire to go and speed on the highways. There have been a number of highly respected and credible studies including the Transportation Research Board, the National Research Council that recently reported

that the Congress should consider raising the speed limit on rural interstate highways. Again let me distinguish: We are not talking about raising the speed on State highways or two-lane highways or highways around congested urban areas. We are only considering this for those areas that are not in a congested area, that meet the safety criteria as determined by the Secretary of Transportation and that have not had a high incidence of fatalities or accidents in that particular area.

We believe that this amendment can provide a very balanced approach to solve what I consider to be the "Prohibition law" of the 1980s.

You remember prohibition in the 1920's; we had a law that said that there could not be any manufacture, use or consumption of alcoholic beverages.

Historians have shown that that was the most ridiculous law that the American public could not support. I know my colleague, the chairman and my friend will state that there are national polls and will cite figures which I believe are somewhat dated indicating that a majority support 55. I would like to submit to my colleagues that a recent poll on July 14, 1986, a Statewide poll in the State of Oklahoma, indicated that over 70 percent of the respondents favor increasing the speed limit on the so-called superhighways. It is clear, my colleagues, that in one State, and I think in many States throughout this country, it is clear that people do not believe in the 55-mile-an-hour speed limit, and they want to see an increase to a safe and reasonable level. I believe this amendment, as cosponsored by my colleagues, Mr. HANSEN, and Mr. GRAY of Illinois and a number of other cosponsors, is a very balanced approach. This provision would only be in effect for 5 years. Some people do not like that. But what it does is say there is a sunset on here and if it does not work, if there are increased fatalities, if the States indicate it is not working satisfactorily, then the provision can expire.

But we believe, Mr. Chairman, and I think the highway commissioners of a number of States have indicated to us that they believe that this could be successfully implemented, that it would not increase the risk of fatalities.

Mr. Chairman, I urge support of the amendment.

Mr. SHUSTER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I was one of the Members of this body who originally was opposed to the 55-mile-an-hour speed limit. Mr. Chairman, I was wrong, I was dead wrong because the evidence is overwhelming. The 55-mile-an-hour speed limit saves lives. Now it is true there are those who say, "But people do not drive 55 miles an hour, they exceed the 55-mile-an-hour speed limit." This is a fact. But it is also a fact that because the speed limit was reduced to 55, the average speed was reduced to about 64 miles an hour, and if we were to increase the speed up to 65, we would see the average speed increase up to about 74 miles an hour.

The effect of 55 is a saving of thousands of lives. Now this is not simply my opinion; this is the considered judgment of the Transportation Research Board, who say that between—and I am quoting now—"between 2,500 and 4,500 lives are saved each year and another equivalent fewer serious, severe, and critical injuries and 34,000 fewer minor and moderate injuries occur each year because of 55." But it is not just the highly respected Transportation Research Board that says that, it is also the National Safety Council.

The National Safety Council says, and again I quote, "We strongly support the 55-mile-an-hour speed limit because of the substantial public health benefits of lowered speeds, not only in terms of lives saved but also in terms of dramatic reductions in spinal cord and crash-induced epilepsy from high-speed head injuries."

The evidence is overwhelming. What did we find the year after 55 was passed? We found the most dramatic drop in fatalities on our highways in the history of our Nation, from about 56,000 fatalities to about 46,000 fatalities.

I hasten to add that the 10,000 fewer fatalities are not all attributable to the 55-mile-an-hour speed limit, indeed only about 2,000 to 4,000 of them are. The balance are attributable to the improved highway conditions, the newer highways, the divided highways, the increased usage of seat belts, the emphasis on removing drunk drivers from our highways. All of these play together, but they all play together along with 55, which according to virtually every expert safety group in the world and in this country has brought about very substantial savings.

Also, in the year when 55 was passed we were told that, "Yes, but the reason the fatalities dropped was because of the Arab oil embargo and the fact," and it was a fact, "there was a reduction for the first time in many years in the total number of miles driven." And that is true. Instead of having an increase of 8 or 9 percent in the total miles driven in that year, we had a decrease. And do you know what that decrease was precisely? It was a 1-percent decrease in total miles driven. But what was the decrease in fatalities? Ladies and gentlemen, it was an 18-percent decrease in fatalities.

So once again the evidence is overwhelming. The 55-mile-an-hour speed limit is saving lives. I say this to you not only as the ranking member of our committee and author of much of our highway safety legislation, but as a member, I remind you, who originally stood on this floor and opposed the 55-mile-an-hour speed limit. I was wrong, ladies and gentlemen. This law works, it saves lives. Defeat this amendment and save lives.

Mr. WRIGHT. Mr. Chairman, will the gentleman yield?

Mr. SHUSTER. I would be happy to yield to the majority leader, the gentleman from Texas [Mr. WRIGHT].

Mr. WRIGHT. I thank the gentleman for yielding.

Mr. Chairman, I certainly compliment the gentleman from Pennsylvania for his statement. He is exactly right. I was chairman of the Highway Investigating Subcommittee of the Committee on Public Works prior to the time of the establishment of the 55-mile-per-hour speed limit. Year after year after year there had been approximately 56,000 highway fatalities taking lives of Americans; more in 1 year died on highways of the United States than Americans died in all the years of the Vietnam war all put together.

It was the biggest killer of young Americans.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. SHUSTER] has expired.

Mr. WRIGHT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to continue the colloquy with the distinguished gentleman from Pennsylvania.

Mr. Chairman, I did a film at that time for the committee, and the committee distributed this film, based upon studies of highway safety and what saves lives, how to save lives.

Little did I realize that a 55-mile-per-hour speed limit would make such a dramatic difference. The loss of life had been almost constant from the 1930's year after year. We would build better highways, safer highways, but there would be more traffic on those highways. So year after year, 56,000 Americans died on the highways. No other factor took as many lives of young Americans. It was the third-biggest cause of death in the United States right after heart, heart disease, and stroke. But then when the 55-mile-per-hour speed limit was established, principally for the purpose of conserving energy, dramatically the number of highway fatalities dropped. There was no other explanation for it, none whatsoever. The number of highway fatalities dropped in 1 year from 56,000 to 48,000.

Now if we want carnage on the highways, we can do away with this 55-mile-per-hour speed limit.

Mr. HANSEN. Mr. Chairman, will the distinguished majority leader yield to me?

Mr. WRIGHT. Of course I yield to the gentleman from Utah.

Mr. HANSEN. May I ask a question of the distinguished majority leader?

Does the gentleman realize that the particular legislation that we are talking about does not do away with the 55-mile-per-hour speed limit?

Mr. WRIGHT. I am responding to the comments of the gentleman from Pennsylvania, and I would yield to him for a response.

Mr. HANSEN. The distinguished gentleman's speech is very eloquent. I enjoyed it immensely. This particular piece of legislation, I am saying, will not do away with the 55-mile-an-hour speed limit.

Mr. SHUSTER. Mr. Chairman, will the gentleman from Texas, the distinguished majority leader, yield to me?

Mr. WRIGHT. Of course I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. I thank the gentleman for yielding.

This lays the groundwork for doing away with it. This says that you can have 65-mile-an-hour speed limits on rural highways through our 50 States.

Mr. HANSEN. Will the gentleman yield for just a moment?

Mr. WRIGHT. I yield to the gentleman from Utah.

Mr. HANSEN. I thank the gentleman for yielding.

Mr. Chairman, as you look at this piece of legislation, you will find this is only talking about those remote areas on rural interstates. This specifically says that in the congested area it is 55. Having spent 3 years on the Presidential Commission on Drunk Driving, where we got into as much of this as we did drunk driving, which was a step forward, we found that that was not the case. I agree wholeheartedly with you on 55, but we really are not talking that in this amendment.

Mr. WRIGHT. Let me ask the gentleman because maybe I misunderstood. I thought this amendment was aimed at doing away with the 55-mile-per-hour speed limit on rural sections of the interstate highways, is that correct?

Mr. SHUSTER. That is correct.

Mr. WRIGHT. That is what I object to. I think it would be a serious mistake.

Mr. SHUSTER. Mr. Chairman, will the gentleman from Texas yield to me?

Mr. WRIGHT. I yield, of course, to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, the so-called rural remote areas of our Interstate System that our friend refers to represent 95 percent of our Interstate System. So this is a backdoor way to eliminate 55.

Mr. McCURDY. Mr. Chairman, will the majority leader yield?

Mr. WRIGHT. Certainly I yield to my friend from Oklahoma.

Mr. McCURDY. Mr. Chairman, the leader is correct when he indicates that the number of fatalities declined dramatically once the speed limit was changed. We agree with that and concede it is a very remarkable statistic. But the statistics also indicate that there is a steady decline, from 3.5 percent in 1974 to 1983, 2.76, a decline. During that same time the average speed driven on the highway actually increased to over 64 miles per hour. So it is the case that it was not just 55, the reason for increased safety and reduced fatalities, in spite of the average increase in the driving, in the speed, was the improvement in the highway system which the majority leader and everybody else here took part in. It was the change in cars. It is improving the whole safety factor, it is not just 55.

Mr. WRIGHT. I would agree that highway fatalities are caused by a number of factors, not alone speed. But speed is a contributing factor. I do not think there is any question about that.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. I thank the gentleman for yielding.

Mr. Chairman, apparently I did not do a very good job in my speech because I was citing point by point the very points that the distinguished gentleman from Oklahoma makes. Of course 55 alone is not the cause for that 10,000 fatality drop.

□ 1840

As the experts say from the National Transportation Research Board to the Safety Council, of the 10,000 lives saved, only between 2,000 to 4,000 can be attributed to the 55-mile-an-hour speed limit. If you want to play with 2,000 to 4,000 lives a year, that, of course, is everybody's own decision.

Mr. HANSEN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I really think there is a mistake going on here. What has been the past is people have thought you are either going to drive at 55 or you are going to drive at 70. I think that is an unreasonable thing to look at.

We are trying to say what we want you to do, in effect, is have the Department of Transportation do a 6-month study to determine what is a congested area.

I agree with the distinguished majority leader. People should drive at 55, and especially in those congested areas. Speed kills. We all realize that.

But let us not be unrealistic enough to know, and especially those from Texas and Utah and Nebraska and those other areas, we know, as Abraham Lincoln and others have said, do not pass laws that people will not obey.

We find ourselves, talk about a modern prohibition, we have found it. If you want to go around 495 this afternoon, you will find very, very few people driving 55, probably including, and I say this very respectfully, many Members of Congress.

Mr. WRIGHT. Mr. Chairman, will the gentleman yield?

Mr. HANSEN. I yield to the distinguished majority leader.

Mr. WRIGHT. Mr. Chairman, I only want a clarification of a question the gentleman posed to me in a earlier colloquy, in which the gentleman asked if I understood what was proposed in this amendment.

I have examined a copy of the amendment, and I would just like to read from it. It does permit the doing away with the 55-mile-per-hour speed limit. These words are in the amendment:

> A State may have a maximum speed limit not in excess of 65 miles per hour on any portion of a highway on the National System of Interstate and Defense Highways within the State which is located in a rural area designated under paragraph 3.

So it would indeed authorize the doing away with the 55-mile-per-hour speed limit in selected areas.

Mr. HANSEN. Mr. Chairman, if I may say so, did the gentleman also notice in there that a State has the right to veto it? If the Governor and the legislature does not want it, they can veto this particular piece of legislation.

I would suggest to those who live in these small Eastern States that your Governor does veto. It makes a lot of sense to me.

However, out in our particular areas where everyone is violating the law, I think we could take a good look at this.

Let me point out now, if I may, it has been stated that if you go to 70, as the gentleman from Pennsylvania said, they will just drive 75 and 80. When I sat for 3 years on the Presidential Commission on Drunk Driving, we found that was not the case. People were saying in those days 70 is a safe speed. Our cars can drive at 70 miles an hour, so why can we not have the option to drive at 70 ourselves?

Now we are not going to 70. We are saying 65. Keep in mind it can be vetoed. Keep in mind that we are asking that they strictly enforce 55 in the congested areas. This is a half step. It does not go at all to the question that was brought up: Will they go faster? Obviously they did not at that particular speed.

So we are looking at this 55 miles per hour in a congested area, 65 in the remote areas.

Did you also notice as you read this we have 4 years in which we try it, and then it sunsets out. So it is not going in and turning it all over and making it loose. We are simply saying, State legislature, we are giving you a try. If it does not work, we will do a study, and in 5 years we will come back. And if we are wrong, then we are going to withdraw this.

Mr. MARLENEE. Mr. Chairman, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from Montana.

Mr. MARLENEE. Mr. Chairman, the gentleman made a statement that we could go to 65 in the rural areas. But that is not mandating that we go to 65. Do not we also have a lot of State law enforcement officials and people who make those determinations, who set the speed limit, so that they could set them anywhere between 55 and 65, or down to 45 or down to 35, because of their concern for safety? Is that not still left up to the State up to 65?

Mr. HANSEN. Mr. Chairman, basically that would be correct on an interstate with a minimum of 55, but they could be anywhere in between predicated on what their study would show. In the bill it says we will do a study in conjunction with the State legislative body and the Governor and determine where would be the safe speeds in their areas.

I would like to add, if I may, with regard to the gentleman from Pennsylvania's statement, we have found in those rural, remote areas that there has not been that kind of accident. When there are a lot of people, like when you drive through New Jersey or Illinois and those areas, you can well understand that. But when you get out in areas like traveling across Nebraska and traveling across Wyoming, you do not see that quite as much.

I used to investigate accidents and do that trial type of thing like many of you.

Mr. GLICKMAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the McCurdy amendment.

I would like to talk a little bit about the issues beyond the safety issues. Safety is important and relevant. But I guess the underlying issue, as far as I am concerned, is that until 1973, I believe, we gave the States the authority to set speed limits. We thought that was uniquely a State function.

And then we had an energy crisis in 1973, and so then we made the judgment that we better let Uncle Sam set the speed limit because we had a national energy emergency and we wanted to reduce the utilization of fuel. I think that was an appropriate use of the commerce clause of the Constitution.

The question you have to ask yourself is, is the energy emergency over? If it is over, then the authority ought to go back to the States to set the speed limit. It is a unique function of the States to set speed limits, not the Federal Government; only in those unique circumstances where we have the national interest being served, and that was being served by a terrible energy emergency.

So I say to you that, in addition to all the other reasons why we ought to pass this very moderate amendment which would give the States the authority to go up, and they do not have to do it, this has traditionally been their function to set speed limits. This is not the Federal Government's function.

The second thing I would say to my colleague, the gentleman from Pennsylvania, and others is there must be a feeling here that the States cannot do it very well. There must be an inherent distrust of the States to set the speed limits, to decide what is safe on what interstates and what is not. Why else would anyone fear the ability of the States going to their local roadways and making that judgment.

Now we know that very few people comply with the 55-mile-an-hour speed limit on interstate roads. The cars are passing this all the time. Perhaps we even are exceeding that speed limit on occasion. But I submit to you that you are going to get a lot more enforcement of that law, particularly on interstates, if you get the States into the act of setting the speed limits on those roads which we kind of by gut and by intuition and also by knowledge allow them to have the role in setting that limit.

So I would make to you two points. One is that safety ought to be our concern, but it also ought to be our concern that we no longer have a national energy emergency. We now have cars that make much better mileage than we ever did before. They are much safer than they ever were before. And there is good reason to give the States back their power to set speed limits. They will do a better job at it, particularly on a balanced moderate approach, as Mr. McCURDY has stated.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, when we talk about a tradition, it has been a tradition for the past 12 years now for the 55-mile-an-hour limit to be followed as law, according to the U.S. Congress.

But I would point out to the gentleman that we are talking about an interstate system, a system, 90-percent funded by the Federal Government, a system which is engaged not only in interstate commerce, but more importantly, your children and my children are driving from State to State and, if one of my children or one of your children happens to be killed in a State other than Kansas or Pennsylvania, they are just as dead.

So we have a responsibility here.

Last, I would say the very States that seem to be complaining most, the scoff-law States, according to the National Safety Council, are the States with the highest fatality rates. I have every States right here and, virtually without exception, the scoff-law States are the States with the highest fatality rates.

□ 1850

Mr. GLICKMAN. Let me just make two comments and then I will be glad to yield.

No. 1, notwithstanding the interstate nature of the highway system, traffic laws are uniquely local and State. They are one area of laws that we have not ceded to the Federal Government for the most part.

I would say to the gentleman that the burden is showing why there should be a national interest and a national law. We had that burden when the energy crisis was here. It is not gone, at least for the time being.

The authority ought to revert back to the States. I would venture to say that when we went to the 55-mile-an-hour speed limit, the implication and the understanding was that we would revert back to the States when the energy crisis was over.

I say to the gentleman that it looks to me like this balanced, moderate amendment by Mr. McCURDY, giving the States the authority on interstate highways, the rural portions of which no abrogation of the 55 limit across-the-board is a very reasonable approach; one that ought to be passed by this House.

Mr. McCURDY. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Oklahoma.

Mr. McCURDY. I thank the gentleman for his support and his leadership in this area, and I want to restate for our colleagues that this again, is not mandatory.

The CHAIRMAN. The time of the gentleman from Kansas [Mr. GLICKMAN] has expired.

(By unanimous consent, Mr. GLICKMAN was allowed to proceed for 1 additional minute.)

Mr. GLICKMAN. Mr. Chairman, I continue to yield to the gentleman from Oklahoma.

Mr. McCURDY. I thank the gentleman.

Mr. Chairman, I think it is clear that a number of Members support this amendment. Again, it is permissive statute; we are trying to allow the

States to make the determination. Not the Federal Government, but the States, complying with safety standards that would be developed by the Secretary of Transportation.

Mr. GLICKMAN. And only on the rural portion of interstate highways. So it is very, very limited. I just think as a matter of Federal preemption this is one thing we ought to give back to the States.

Mr. CHENEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to identify with the sponsor of this amendment. I think it is an excellent offering here today. It seems to me that it is important for our friends who live in the more congested parts of the country to remember the enormous differences that exist on the interstate system.

The gentleman from Pennsylvania, [Mr. SHUSTER], made the point that it is a Federal system; it is funded by the Federal Government; it is an interstate system that moves from State to State. But there are enormous differences between circumstances, for example, in eastern Pennsylvania or in the Washington, DC, metropolitan area and a State like Wyoming.

In Wyoming we have half a million people living in an area of almost 98,000 square miles where we are approximately the size of the Federal Republic of Germany. The notion that somehow we should operate the same way on our Interstate System that States do in far more congested areas, it seems to me, is extremely unwise.

I would like to also endorse the remarks of Mr. GLICKMAN. It seems to me, Mr. Chairman, that it is important for us to remember that the stimulus for the original effort to impose the 55 mile-an-hour limit was indeed the energy crisis and the need to improve our efficiency with respect to the consumption of gasoline.

Mr. Chairman, I think the amendment is a good one. It seems to me that it does preserve the State option. It does place a certain amount of trust in our State legislatures and our Governors. A great many Members who serve in this body used to serve at the State level. I am certain they would not want to suggest that somehow our State authorities are incapable of making these decisions.

I think we ought to let the authority revert back to the States. I think the amendment is sound and I think it deserves our support.

Mr. HANSEN. Mr. Chairman, will the gentleman yield?

Mr. CHENEY. I yield to the gentleman from Utah.

Mr. HANSEN. I thank the gentleman for yielding to me.

Mr. Chairman, I would like to ask the gentleman from Wyoming: What would be the average speed in the State of Wyoming? Has anyone told you that?

Mr. CHENEY. I do not have the figures in front of me, but I can assure you on stretches of interstate that were built for 75 or 80 miles an hour, where it is 100 miles between towns and it is a straight shot, that 55 miles an hour is not often observed.

Mr. HANSEN. If the gentleman will continue to yield, I think the point I may be driving at, if I may bring this up, is in the West, I cannot speak for the East, but when we did the Presidential Commission on Drunk Driving we found that the average speed was about 65 miles an hour and has been for a long time. So I appreciate what all these gentlemen have said when they stand and say, "55 miles an hour saves lives;" the facts of the matter are, we are not driving at 55 miles an hour. A better and more correct statement would be 65 miles an hour saves lives because that seems to be the average speed.

Out in our areas, as you made the very great distinction between Wyoming and the East or Utah and the East, people, when there is a straight shot, will travel for miles without seeing another car in some instances on a wide open space. I guess in effect 55 does not save lives if the average speeds in the Western States seems to be 65 miles an hour.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. CHENEY. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. I thank the gentleman.

Mr. Chairman, I would like to point out that the National Safety Council indicates the fatality rate in Wyoming is 3.2 which is about 50 percent higher than the national average. Something must not be being done right in the State of Wyoming on the highways.

Mr. CHENEY. I am sure all of those accidents do not happen on the interstate, Mr. Chairman.

Mr. RAHALL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, one of the original authors of the 55-mile-per-hour speed limit in the other body was a former senior Senator from my home State of West Virginia, Jennings Randolph. He acted at that time with good reason and based on what has proven to be sound fact.

I shall not go into all those facts and figures and polls. My colleagues from Pennsylvania and California have very adequately done that as have others who are in opposition to this amendment. Those facts indeed do show that 55-miles-per-hour does save lives and it is working.

My good friend from Oklahoma's amendment, as I understand it, is directed toward the rural interstate highways of this Nation as he has stressed in his opening remarks. In a mountainous State such as I represent, we do have rural interstate highways, particularly in my congressional district, and upon the completion of Interstates 64 and 77, we hope to have even more rural interstate highways in the years ahead of us.

One of those is currently the West Virginia Turnpike for many of my colleagues that may have transversed that road in going to their congressional districts from Washington. We have severe curves on many of our rural interstate highways in a mountainous State such as West Virginia. For us to allow the speed limit to be increased to 65-miles-an-hour on these curves I say creates a very dangerous and unsafe condition.

If we allow the 65-mile-per-hour speed limit to take effect, my colleagues must remember that we are talking about in reality 70 or 75 miles per hour because we know the leeway that law enforcement officials give when the speed limits are set at certain limits.

I realize, and the gentleman will come back and say that the State has the option not to raise the speed limit to 65-miles-per-hour on such highways. But that, in my opinion, is only going to create a very crazy-quilt pattern of different speed limits throughout our States. It has been referred to that we are talking about interstate travel; we are talking about interstate highways funded 90 percent by the Federal Government. I believe what we need here is consistency in our speed limits.

Motorists coming from the western part of the United States, accustomed to traveling perhaps 65, 70, 75 miles per hour are going to find it, are not going to be concentrated enough to realize the dangers they are entering into when they start driving on these rural interstate highways in a mountainous State such as Pennsylvania, Ohio, Virginia, Kentucky, West Virginia and the neighboring States in the Appalachian region of this country.

I submit that it is going to create very uncertain and unsafe conditions, and why should we even open the door and that is what this amendment does really, is to open the door for future increases in the speed limits to a 70-miles-per-hour speed limit.

Mr. McCURDY. Mr. Chairman, will the gentleman yield?

Mr. RAHALL. I yield to the gentleman from Oklahoma.

Mr. McCURDY. I thank the gentleman for yielding.

Mr. Chairman. I just want to state at this point that those of us in Oklahoma who happen to come to West Virginia and see all these mountains, it is such a monumental sight to us that I can guarantee you that we will not

drive more than 55 because we do not know how to drive on those kinds of curves.

It is clear that the States have the option. But they have to do it based on certain criteria. If the grade is not designed for maximum safety, then those sections should not have. It is clear to me that it is not always 55 on highways. We should not drive 55 in rain or snow. Individuals should have that judgment and States should have that judgment.

All I ask is that the States have the opportunity to exercise the judgment authorized to them by their constituents. It is not a question of consistency. My district is over 225 miles long. It is flat; there are not many mountains in our area. What is good for Oklahoma is not necessarily good for West Virginia, so I really challenge the question of inconsistency between West Virginia and Oklahoma and Wyoming.

Mr. RAHALL. If I may reclaim my time, let me say to the gentleman that my concern is that with residents of your State coming into West Virginia, enjoying the tremendous beauty that we do have and that you have attested to, may forget that their speed control is set on 70 or 75 miles an hour. That, I am afraid, is going to make them unaware of the curves that are going to come up and face them on our interstates. It is a dangerous situation.

I yield to the gentleman from Pennsylvania [Mr. SHUSTER].

□ 1900

Mr. SHUSTER. Mr. Chairman, I thank the gentleman.

I would point out, we talk about the sharp curves in West Virginia. The Interstate System is built to standard specifications. The curves on the interstate in West Virginia are precisely the same engineeering standards as the curves in Oklahoma or somewhere else.

The grades are exactly the same. The Interstate System is built to the same standards.

Now, it is true you have long level stretches, but when we talk about sharp curves, that simply is not the case. All the curves are built to the same standards.

Mr. RAHALL. The gentleman is correct.

Mr. GRAY of Illinois. Mr. Chairman, I move to strike the requisite number of words.

(By unanimous consent, Mr. GRAY of Illinois was allowed to proceed for 1 additional minute.)

The CHAIRMAN. The gentleman from Illinois [Mr. GRAY] will be recognized for 6 minutes.

Mr. GRAY of Illinois. Mr. Chairman, I hope that we can disagree without being disagreeable, because as far as I am personally concerned, this is one of the most nostalgic moments of my life because 31 years ago I stood in this very well, along with the distinguished majority leader, the gentleman from Texas [Mr. WRIGHT] and the gentleman from Michigan [Mr. DINGELL], who are the only three sitting Members of Congress now who helped write the first Interstate Highway Act in 1956, so it is a nostalgic moment to be able to say 31 years later that this has been the greatest public works program in the history of the world.

There are 42,500 miles of interstate highways connecting every major city and certainly bringing millions of new jobs and billions of dollars in private capital investments.

I also was here in 1974 when we put on the 55-mile-an-hour speed limit for an explicit purpose: to conserve fuel.

Before I say another word, I would like to point out that this debate concerns only 6 percent of the highways in the United States that are posted at 55 miles an hour.

I want to repeat that. Although we have 31,500 miles of the 42,500 miles of interstates affected in rural areas, when you talk about a posted 55-mile-an-hour limit, this amendment, if adopted, only affects 6 percent of the roads in this country where we would have the alternative of increasing that to 65.

Now, let us be honest. No one can stand in this well or in this House and say that the 55-mile-an-hour speed limit is saving lives. Last weekend I took my camper and went down to Richmond, VA. I set my cruise control on 58 miles an hour, and there was not one truck or one car that did not pass me from 10 to 15 miles an hour faster.

Three weeks ago I went out to Illinois. The same thing, zip, 65 and 70.

I say to you without fear of contradiction that the increasing flow of traffic at different speeds is causing far more accidents and monotony is causing far more accidents to people driving 55 and going to sleep. If we have a uniform 65 limit on rural interstates where the flow of traffic is going, I think we will save lives, because those State policemen in Illinois, and I have 500 miles of interstates in my congressional district, have told me that when they stop someone for speeding, they always say, "Why aren't you reasonable with the speed limit and we will adhere to it?"

The American people are very, very reasonable people, but they rebel when they think something is not reasonable.

After gas became plentiful, they decided that it was unreasonable to expect them, like in Illinois where you have a road going from Chicago all the way down to Cairo, over 400 miles without a curve in it, to go along at 55 and then we take down the billboards, there is nothing for them to see along the road, and it causes monotony, it causes accidents.

So I say this is a reasonable compromise.

I had a straight, flat out 65 amendment for all rural interstates, and my chairman friend looked at me with a jaundiced eye and said, "Please don't offer that," so I did not.

So we got together as a bipartisan effort to make this permissive, not mandatory. If a State after studying this for 6 months does not feel they want to change the speed limit, it can stay at 55, notwithstanding that it is in a rural area. What is wrong with that?

The American people are crying out for an increase. What is wrong with giving the States the right, as the gentleman from Kansas pointed out, of self-determination of whether they want to go ahead and increase the speed limit.

Let me give you some very quick statistics. Before we wrote the Interstate Highway Act, listen to me, before we passed the 55-mile-an-hour speed limit, we were killing 2.6 people on the highways of this country for every 100 million miles driven. That was before the interstate. At the same time, that was on a four-lane divided road, California as an example has led this Nation in building freeways long before 1956, so we went out and studied that system. We found that they were killing on an average of two people for every 100 million miles driven, but on the small, antiquated two-lane roads, they were killing 9.7 per 100 million miles traveled.

So what is cutting down on the statistics is the fact that every year we are adding from 150 to 200 miles more of interstate highways. That is what is bringing the fatality rate down. We are getting them off the small, antiquated roads and we are putting them on the nice four-lane interstate highways. That is why you are seeing the fatality rate go down, not because of the 55-mile-an-hour limit, but because we are putting in new safety features, better guard rails, we are putting in better bridge abutments. We are putting in all types of facilities.

The CHAIRMAN pro tempore (Mr. DE LA GARZA). The time of the gentleman from Illinois has expired.

(By unanimous consent, Mr. GRAY of Illinois was allowed to proceed for 1 additional minute.)

Mr. GRAY of Illinois. Mr. Chairman, when we wrote the Interstate Highway Act, we said at that time to the engineers throughout this country to design this system for 70 miles an hour, and that is what they designed it for.

Now, the cars have seatbelts, they have airbags, they have all kinds of safety features. So I say, let us give it a test. Let us let the States have a

little States rights here by saying, "OK, we think we can go to 65 without doing any harm."

Mr. GLICKMAN. Mr. Chairman, will my colleague yield for 1 minute?

Mr. GRAY of Illinois. I yield to my friend, the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, I compliment the gentleman on his statement.

Since the gentleman was here when we wrote the original bill, did we not take the authority to set speed limits away from the States on an emergency basis and on an emergency set of circumstances that dealt with the energy crisis?

Mr. GRAY of Illinois. That is absolutely correct. It was 12 years ago in 1974. After the crunch was over, we never gave it back to them.

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. GRAY of Illinois. I yield to my friend, the gentleman from Massachusetts.

Mr. FRANK. Mr. Chairman, I am going to vote for the gentleman's amendment.

I just wonder if the gentleman would speculate from his long experience, if there were a rule of the House that required Members to vote the way they drove, what does the gentleman think would happen to his amendment?

Mr. GRAY of Illinois. Well, I think it would pass by acclamation.

Mr. EMERSON. Mr. Chairman, will the gentleman yield?

Mr. GRAY of Illinois. I yield to my friend, the gentleman from Missouri.

Mr. EMERSON. Mr. Chairman, I thank my colleague from across the river for his outstanding historical perspective on this issue. I would like to associate myself with the gentleman's remarks.

Mr. MARLENEE. Mr. Chairman, I move to strike the requisite number of words.

I rise in support of the amendment.

Mr. Chairman, I know of nothing that is creating more regional animosity or animosity toward the Federal Government than the 55-mile-an-hour speed limit. Trying to force a speed limit appropriate to New Jersey or winding, woody Pennsylvania on Montana or Wyoming or Oklahoma is like forcing a law on the general population that would not allow homes with two stories in them because people could fall out of windows or off balconies or down the stairs.

There is some inconsistency here today. We heard the gentleman from West Virginia say, well, we are concerned that people who drive out in these areas that are wide open and flat do not have the ability—and I resent that—do not have the ability to drive where there are more crowded conditions and more winding roads, and yet the gentleman from Pennsylvania comes in and says, well, all the interstates that we are dealing with are built to the same standards and same curves, same gradations, and we have a set of standards that these interstates are built to.

So I see a great deal of inconsistency in their testimony.

I also resent the inference that States which want the coercion of the Federal Government lifted are not concerned about safety, so we have to have big brother in there setting the speed limits and concerned about our safety because we in Montana, Wyoming, Oklahoma, and some of those in Oregon and Washington and those other States are not concerned about safety.

We are not mandating the raising of the speed limit to 65 miles an hour. We are simply saying that the States have the ability to make the evaluation and these States will, in fact, be concerned about safety and we will do a study and that then they will set the speed limit up to 65 miles an hour, or anywhere in between.

This body kicked the Federal Government out of the business of interfering with law-abiding citizens who own guns. I think they ought to do the same thing here.

Let us get the Federal Government out of the business of mandating safety, mandating speed limits, mandating the regulation of our lives. Let us let them out of that and allow the States to make the safety evaluation necessary and set the speed limits at a safe, reasonable and prudent speed.

Mr. DURBIN. Mr. Chairman, I move to strike the requisite number of words.

I rise in support of the amendment which is before the body at this moment.

I would defer to my colleagues who have spoken already about the historical and statistical reasons for this amendment. I would like to address it from a slightly different perspective. I wonder how long those of us in this National Legislature can expect the people of this Nation to have respect for our laws if in fact those laws have lost their reason for being, or the laws are not being enforced. We all know from practical experience that the people that we represent across this Nation are violating the 55-mile-an-hour speed limit on a regular basis. In some States it has become common knowledge that one will not be arrested until they have passed 65 miles per hour.

What message does that send to the people we represent?

It does not end there. The Federal Government has encouraged States to pass mandatory seatbelt laws. I think those are entirely positive, but we have had announcement after announcement in my home State of Illinois that they will not be enforced, that the police are instructed by the State legislature not to arrest a person who violates that law, except in the most extraordinary circumstances.

There is another aspect to the problem. Since this law was passed, there has been a technological phenomenon. We now have, and it is estimated that there are some 80 percent truckers in this country who use them, radar detectors. Have we passed a national law to outlaw those? No. I doubt that we will. Very few States have. It would be highly unpopular, but by allowing radar detectors and telling people that we are going to pass off with a wink when they drive 65 miles an hour, what message do we send?

I think the amendment of the gentleman from Oklahoma is entirely sensible. Fifty-five miles an hour is a great idea on the right highway, but 65 miles per hour I think can be shown to be equally safe on another set of roads.

I think it is important now that we allow this law to catch up with the reality of today. I think the approach taken here is sensible, one that we can live with. It is experimental and it is certain that in a period of time we will at least be able to sit down and evaluate the results.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. DURBIN. I am happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I thank the gentleman for yielding.

The gentleman brings up the issue of the radar detectors, which I think is very interesting, because in fact it is a whole technology that has almost been spawned by a law that people will not obey.

I just want to pose an interesting question to the gentleman. If we were to take the technological route to enforce the law, what does the gentleman think the reaction would be if, for example, we required the automobile manufacturers to put governors on the cars that would not allow the car to go more than the national speed limit, namely, 55 miles an hour?

It is this gentleman's judgment that we would probably all get thrown out of here in the next election if we really did that to people, and yet that would be the technical solution to the cause advocated by the gentlemen on the floor. They say the 55-mile-an-hour speed limit saves lives. Well, then we ought to put the governors on the cars and not allow anybody to go faster than that, if in fact that is the reality of the situation.

Mr. DURBIN. Mr. Chairman, I think the gentleman from Pennsylvania raises an excellent point but it points out the dilemma we face as we try to pass and enforce laws that are sensible, when the people of this country

obviously want to entertain their own personal freedom.

□ 1915

Mrs. SMITH of Nebraska. Mr. Chairman, I move to strike the requisite number of words.

Chairman, I come from a district which is 425 miles long. The interstate which stretches across that district is constantly being driven on by cars driving 70 or more miles an hour.

This speed limit is not practical in an area like this. A Federal law that sets the speed limit the same for New Jersey, for example, as it does for Nebraska is not practical.

I think that this amendment is an excellent one. It provides that the State can make its own decision. It provides that the increased speed will only be allowable in rural areas. I am very much for it, and let me say that my State is one that is concerned about safety. We have a seatbelt law. We had great controversy about a helmet law for motorcycle drivers. We try hard to enforce safety in our State, but we do not think that a 55-mile speed limit is the answer.

Mr. BEREUTER. Mr. Chairman, will the gentleman yield?

Mrs. SMITH of Nebraska. I am happy to yield to the gentleman from Nebraska [Mr. BEREUTER], my good friend and colleague.

Mr. BEREUTER. I thank the gentleman for yielding.

Mr. Chairman, I certainly rise in support of the McCurdy amendment.

Mr. Chairman, I do believe that the points in favor of this amendment given by all of the Members expressing themselves add up to a very convincing case. I have believed from the beginning that the impact of the mandatory 55-mile-an-hour speed limit was discriminatory against people living in sparsely settled parts of the Nation, and I have believed from the beginning that there should be a drop of say 10 miles per hour from whatever it was at that time at maximum.

It is no real loss if you are moving from, in Connecticut, from 60 miles an hour, but on the Kansas Turnpike it was 80, and most of the interstate areas of the West it was 75. This is a remarkable drop.

In the mid-1970's I served on the Governmental Affairs Conference of the Council of State Legislatives, and as we had our meetings each year there was a vote on this issue. The representatives of all the States west of Missouri River exceot California continually asked for a change in the speed limit, and most of the States east of the Missouri River felt differently about it—not all of them.

I think that it bears out the very different nature of this country. Sparsely settled parts of the Nation ought to have an option to move to what is reasonable within the limits that would be set by the McCurdy amendment.

This is an amendment that is fair, it is equitable, and finally, it is reasonable and it no longer discriminates against people that live in sparsely settled parts of the Nation.

Mr. RICHARDSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Speaker, many reasons have been given for supporting this good amendment. There is another reason that I do not think has been given which may not sound solidly based by facts and statistics, but it is kind of a cultural thing for many people, especially in the West—those of us that drive and have hundreds and hundreds of square miles and not too many people.

I think that this is a law whose time has passed. It was probably a good, necessary law in the past, but not it has outlived its usefulness.

There is no issue that comes up more often in town meetings that I have than the 55-mile-an-hour speed limit. We come from a small State, and you can sense the rebellion in many other States. I think you already see a number of provisions in several ballots. I think you also see situations where arguments can be made that the economic development of a State is disadvantaged by this kind of an amendment.

If you have a pickup truck and you are hauling wood, a certain number of hauls that you can make—yes, maybe to many it does not seem like this is something that is important, but it is, and I think that the beauty of this amendment is that it gives everybody the flexibility to do what they want.

On Fifth Avenue in New York City you are not going to have a 65-mile-an-hour speed limit, but that is your decision to make. The Governor will make that, and the Governor of New Mexico in consultation with its legislature and with the Secretary of Transportation can make that decision. And still there may be a Governor in the West who may not want to do it. So they have that prerogative.

You take a small State also—we are talking about drugs, illegal aliens—in my State there are 300 State police officers. About 70 percent of their time they are chasing people violating the 55, including people like myself. This to me does not make sense. I think it is important that we look at this and give every State the flexibility to make their own decision.

We do have a new era in automobile safety—seatbelts, new equipment, safety standards have improved. But I cannot point in my small State to relevant statistics that say that highway deaths because of this amendment, because of this 55-mile-an-hour speed provision, have lessened. But I think nationally compelling statistics have been different.

All we are saying with this amendment is, "Let's not make it regional issues; let's just let every individual State make their own decisions."

So I submit the cultural argument, the argument that many men and women have out there that simply says, "Government, let us run our own lives. We can drive safely, but don't put this law on us that is outdated, that doesn't work anymore, that we deeply resent."

So I ask strong support for this amendment, which is a freedom-of-choice amendment for every American.

Mr. Chairman, I rise in support of this amendment. The issue of the 55-mile-per-hour speed limit is very important to my home State of New Mexico.

Mr. Chairman, I realize this point has been made many times over but I feel very strongly that I must make it once more—those of us in rural areas and States have been clearly disadvantaged by this law. I am sure many of my colleagues share my sentiments—it is time to reevaluate a law passed in a time of crisis and whose impacts have been felt by different regions of the country in very unequal ways.

Mr. Chairman, a CBS news story on the 55-mile-per-hour issue was filmed on I-40 in my district—where, with the exception of Albuquerque, no New Mexico country traversed by an interstate highway has more than 40 people per square mile. The New Mexico State Legislature recently passed a memorial urging Congress to enact legislation permitting a higher speed limit. We take this issue very seriously in New Mexico because it has serious consequences for New Mexicans.

A vote for this amendment will benefit law enforcement in remote areas. In New Mexico, we have a total of 300 State police officers for the entire State—they cover very large geographic areas and their responsibilities are many. Under " 55-mile-per-hour duress," they spend a great deal of time issuing speeding tickets to comply with Federal law. I am sure my colleagues would agree with me that our law enforcement officer's time could be better spent fighting crime and protecting citizens.

I urge my colleagues to support this amendment.

Mrs. VUCANOVICH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the McCurdy-Hansen Amendment.

Mr. Chairman, this is a compromise amendment for many of us. As has already been stated by my respected colleague, the gentleman from Oklahoma [Mr. MCCURDY] and some of the other Members who have spoken, it is not mandatory.

If I had my choice, I would like to see the 55-mile-per-hour speed limt repealed. I believe that setting speed limits should be solely determined by the States. I do not believe that the Federal Government should be allowed to threaten to withhold Federal

highway funds from States which experience difficulty in meeting Federal enforcement standards. I have introduced specific legislation to accomplish these goals.

The one issue that is topmost in my State when I go back and I have a hot town hall meeting and talk about other issues, and we talk about South Africa and we talk about the budget, one of the first questions that somebody asks in the audience is, "When are you going to get the 55-mile-an-hour speed limit raised?

This amendment offered by my colleagues, Mr. HANSEN and Mr. MCCURDY modifies the mandatory 55-mile-per-hour speed limit through a 5-year demonstration project. While it still allows for continued Federal supervision, States have a significant input as to which rural interstate highways can safely handle speeds up to 65-miles-per-hour. Let me emphasize to my colleagues that this is a demonstration project and this amendment requires the Department of Transportation to report the results of the project to Congress after 4 years.

Many have stated that the 55-mile-per-hour speed limit has, since its enactment in 1974, drastically decreased fatalities on our Nation's highways. I will not dispute that lower speeds have contributed to lower fatalities. However, I believe that other factors have also contributed to reduced fatalities during the same time period. Certainly, traveling at a slower rate of speed can and does contribute to a lessening of the severity of many collisions. However, improvements in road construction, improvements in automobile engineering, mandatory seatbelt laws, and the national war against drunk drivers also play a significant and important role in highway safety.

I therefore believe that the mandatory 55-mile-per-hour speed limit should be increased on our rural highways and should be lifted to 65-mile-per-hour when the States determine that.

Mr. MARLENEE. Mr. chairman, will the gentlewoman yield?

Mrs. VUCANOVICH. I am very happy to yield to my colleague from Montana.

Mr. MARLENEE. Mr. Chairman, if I am not mistaken, if the gentlewoman's State of Nevada is like Montana, they have passed a resolution within the State legislature by almost unanimous approval to request that the Federal Government allow the States to set the limits. Is that true?

Mrs. VUCANOVICH. That is true, and one of the restrictions also in my State is that they are very happy to have the mandatory seatbelts if we can be allowed to raise the speed limit, because they do think that the seatbelt does determine it.

Mr. ROWLAND of Connecticut. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I might not get out of here alive. There seem to be Members in favor of the amendment.

Mr. Chairman, I think that the point is very simple, and that the facts are the facts, and I see many of the opponents or proponents of the amendment agreeing with that. The likelihood of a fatality occurring actually doubles when the speed limit is increased from 45 to 60 miles per hour.

□ 1925

My friend from Pennsylvania quoted the Transportation Research Board that says that some 2,000 to 4,000 lives per year are saved because of the 55-mile-per-hour speed limit. Between 35,000 and 62,000 less injuries occurred per year, and an estimated net savings in medical and welfare assistance programs which are reduced by $65 million per year.

If that is not enough, there is the added bonus that the law continues to save about 167,000 barrels of oil per day.

I have heard arguments about energy, I have heard arguments about time, and I would argue that changing the speed limit from 55 to 65 is not going to have any impact on time. I do not think we should be regulating the speed limit in this Nation based on the cost of oil. I agree with the fatality arguments, I agree with the economic arguments, but I think the point is: If you are traveing 100 miles, the 2 or 3 minutes saved are not going to make a considerable difference.

All the statistics show that we will save lives. If we increase the speed limit, there will be up to 500 to 600 people actually injured.

I think the other point we have not argued yet is with reference to our automobiles. Twenty years ago the cars were much bigger, they had more steel, they had bigger engines, they could travel 70, 80, 90 miles per hour without any problems whatsoever. I think we all knows from our personal experiences that the cars of today are half the size, half the weight, and probably half as safe.

I do not think there is any way to get around these arguments, and I think that the bottom line is that the 55-mile-an-hour speed limit saves lives. I think we should keep it.

It is not broken and we should not try to fix it.

Mr. LUNGREN. Mr. Chairman, will the gentleman yield?

Mr. ROWLAND of Connecticut. I yield to the gentleman from California.

Mr. LUNGREN. Mr. Chairman, the gentleman talked about traveling 100 miles or traveling 2 hours. The gentleman ought to join with some of us that are from the Western States as we drive out to our districts to take our families back. We are not driving for an hour, we drive for 5 days straight to get out there. We drive for several thousand miles. Let me tell the gentleman, it does make a difference.

I think we should not be, in essence—and I am not accusing the gentleman—but it seems to me somewhat hypocritical when you see people driving far faster than 55, and you just do it to keep up with the traffic, and you are trying to get across the country, and then you realize you are part of a body that has said there will be no exceptions to the 55-mile-per-hour limit. It just flies in the face of common sense, with all due respect.

Mr. ROWLAND of Connecticut. I think reality has a part to play in this argument also, and the reality is I do not think the gentleman drives back and forth to California every week between votes. He just could not make it.

The reality is that the public now travels by plane, and when people are traveling from California to the east coast, 9 out of 10 are probably traveling by plane versus automobile. So I do not think that argument is valid.

Mr. SWINDALL. Mr. Chairman, will the gentleman yield?

Mr. ROWLAND of Connecticut. I yield to the gentleman from Georgia.

Mr. SWINDALL. Mr. Chairman, I would like to thank the gentleman from Connecticut and make one strong disagreement with him. He just said it is not broke so do not fix it.

It is broken every day. That is the whole point. The law is broken every day.

Let me tell the gentleman why I think that is very significant. I think it relates to a much bigger problem, and that is when a law is patently unreasonable, people do begin to violate it.

Will Rogers once made the statement, humorously, but nonetheless I think it was an accurate statement, that the IRS has made more liars out of the American people than the game of golf. I think that the 55-mile-an-hour speed limit has made more liars out of the American people.

Let me tell the gentleman the seriousness of that. Every day we tell our young people to follow the law, and then they see us get in our cars and patently drive 65 miles an hour. They say, "Well, Dad, Mom, why don't you follow the law?"

"Well, it's not really a reasonable law."

Here's what happens: Your Johnny or your Susie goes home and finds out that there is some marijuana available. Then someone says, "That is against the law." So they say, "Well, Mommie and Daddy don't follow the law; why should I?"

My point is this: If the law is unreasonable, change it to the point that it

is reasonable so that we do not set an example that I think has some very serious ramifications in terms of setting an example for our young people to follow the law.

Mr. ROWLAND of Connecticut. If I can reclaim my time, I would use that same logic and say yes, out there in the real world people are using drugs, and because people are using drugs and drinking under the age of 21 does not mean that we should be changing the law to accommodate the public.

The CHAIRMAN pro tempore (Mr. DE LA GARZA). The time of the gentleman from Connecticut [Mr. ROWLAND] has expired.

(On request of Mr. GRAY of Illinois and by unanimous consent, Mr. ROWLAND of Connecticut was allowed to proceed for 1 additional minute.)

Mr. GRAY of Illinois. Mr. Chairman, will the gentleman yield?

Mr. ROWLAND of Connecticut. I am glad to yield to the gentleman from Illinois.

Mr. GRAY of Illinois. I thank my friend for yielding.

The gentleman might be interested in a Park Service study a couple of years ago. Of 20 million people that visit Washington every year from all over the country, 74 percent come by automobile, 5 percent fly, and the other 20 percent come by train or bus.

So I have the greatest respect for my fellow committee member, but I think his statistics are a little wrong when he says most people fly.

Mr. ROWLAND of Connecticut. If I may reclaim my time for a quick moment, I would tell the gentleman from Illinois, in responding to the gentleman from California, driving back and forth to California, I would argue that more people fly from California to the east coast than probably drive.

Mr. GRAY of Illinois. That may be true about Members of this body. But I am talking about 20 million people that visit Washington every year. Seventy-four percent of them drive.

Mr. WILLIAMS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

My colleagues, let us settle down and take a look at this amendment. This is not a bad amendment. It calls for a demonstration project for 5 years. It asks the Department of Transportation to just deal with the Governors, sit down, see if we cannot find some long stretches of rural interstate where we can raise the speed limit to 65, no more, and go from there.

Not too long ago I went back to Montana during one of these 3-week breaks, and I traveled 2,500 miles and never crossed the same highway, not even once, 2,500 miles all on different highways. Our towns are 120 to 400 miles apart.

On some interstates there are long, wide, well-paved, good shouldered, through areas where there are no people—I mean, I killed 35 jackrabbits on the way to talk to a crowd of 20 people—there are long interstates and the speed limit ought to be 65 miles an hour.

One other thing before I yield to my neighbor from the West. It is not just in Montana that people want to go 65 miles an hour. It is not just in Idaho. Have my colleagues been out on the beltway that surrounds Washington, DC? If they go 65 miles an hour, the truck behind them is going right over their trunk, right over their trunk.

People drive faster on the beltway around the metropolitan areas of America than they do in rural America, absolutely.

But we can do it more safely at 65 miles an hour because we have long stretches of good interstate. You cannot see a turn in the road. You can see the curve at the end of the Earth 30 miles down the road. We ought to be able to go 65 miles an hour, and then we will come back 4 or 5 years from now and report to you and tell you how we did.

Mr. CRAIG. Mr. Chairman, will the gentleman yield?

Mr. WILLIAMS. I yield to my friend, the gentleman from Idaho.

Mr. CRAIG. Mr. Chairman, I appreciate my colleague from Montana yielding.

I used to tell my wife that I was leaving to go to Montana for the day, and I would be back in the evening. Now I say I am leaving and I will be back next week, and that was before the 55 and now with the 55-mile-per-hour speed limit.

What my colleague from Montana speaks of is reality. Those of us who live in the West, with these long stretches of open, safe, straight, clear highway, find it very difficult to understand that to be a law-abiding citizen, you are endangered by those who choose to travel at the speed the road accommodates in a safe manner.

I join with my colleague in support of this amendment. I hope we can convince the balance of our colleagues here in the House that this is a demonstration project to serve that purpose, to see whether we, in fact, should be doing this in our rural, long stretches of highway.

Mr. WILLIAMS. I thank my colleague from Idaho.

I just ask my colleagues to give us a break here and let us try this out West. We would appreciate it.

□ 1935

Mr. PORTER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I do not represent a Western State, but neither do I think that this is a regional issue. I think the best argument in support of the amendment is the one expressed by the gentleman from Georgia not a minute ago when he said it is simply not being observed.

I know the statistics; I have seen them; I think they are lies. You go out and drive, you are going to find very quickly that people are not observing the speed limit. I drove not long ago from Chicago to Washington on interstates; I could not find more than 1 or 2 percent of the people that were following the speed limit of 55.

What it does, as the gentleman said so eloquently, it breeds disrespect for the law in general. I think that is a very great problem for our society.

The gentleman from Connecticut said that speed limits being reduced save lives; they only save lives if they are being observed. It is the speed that is being driven that might save lives, but if it is not being driven, no lives are being saved.

The law, in fact, I think is being violated by virtually everyone, and therefore the savings in energy or the savings in lives simply are not happening.

I think this amendment is a very moderate one. I, myself, if you asked me this moment, would vote to increase the limit on rural interstates to 70 miles per hour everywhere in our country. I think that would be a law that would be observed by the people because it is reasonable. Let us pass this amendment; let us see what happens.

Mr. SHUMWAY. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Oklahoma to permit States to increase the speed limit to 65 miles per hour (mph) on interstate routes in rural areas. I do so on States rights grounds.

As a fellow westerner, I am only too familiar with the hardship the Federal Government has created for drivers by mandating a 55-mile-per-hour highway speed limit on interstate routes. In my view, individual States are in a far better position to determine driving conditions, speed limits, and to meet safety concerns than is a distant Congress unable to respond to differing area needs across the country. Significantly, both the Transportation Department and Highway Patrol of California—a national leader in transportation—have recommended that the State establish a speed limit of 65 miles per hour for automobiles along the 1,840 miles of California highway outside the metropolitan areas.

While a national speed limit may have been appropriate during the 1974 oil embargo, it has ceased to be effective today. Perhaps more importantly, it is extremely difficult to enforce, requiring the highway patrol to expend an unnecessary and frustrating amount of time apprehending those exceeding the unrealistic limit. A study submitted this year to the California Legislature makes it clear that the 55-mile-per-hour limit is generally ignored on rural highways: A staggering 95 percent of all motorists routinely exceed the limit, with traffic averaging 63-65 miles per hour in such areas. No doubt there are even Members of this body who exceed the 55-mile-per-hour speed

limit. Additionally, the extra time it takes motorists to reach their destination can often cost more than the fuel savings.

Viewed from these perspectives, it would be more logical for highway speed limits to be determined by State officials who are more familiar with local traffic and road conditions, not by Washington bureaucrats. I urge a "yea" vote on this important amendment.

The CHAIRMAN pro tempore (Mr. DE LA GARZA). The question is on the amendment offered by the gentleman from Oklahoma [Mr. MCCURDY].

The question was taken; and the Chairman pro tempore announced that the yeas appeared to have it.

RECORDED VOTE

Mr. DONNELLY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 198, noes 218, not voting 15, as follows:

[Roll No. 298]

□ 1945

Messrs. STOKES, TORRES, PASHAYAN, and Ms. KAPTUR changed their votes from "aye" to "no."

Mr. FRENZEL changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. HAMMERSCHMIDT

Mr. HAMMERSCHMIDT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HAMMERSCHMIDT. Page 31, line 13, strike out "as defined" and insert in lieu thereof a period and the following: "The term "socially and economically disadvantaged individuals" has the meaning such term has under".

Page 31, line 16, before the period insert the following: "; except that women shall be presumed to be socially and economically disadvantaged individuals for purposes of this subsection".

The CHAIRMAN pro tempore. (Mr. DE LA GARZA). The gentleman from Arkansas [Mr. HAMMERSCHMIDT] is recognized for 5 minutes in support of his amendment.

Mr. HAMMERSCHMIDT. Mr. Chairman, in 1982, as part of the Surface Transportation Assistance Act, Congress required that 10 percent of the funds in the bill for highways and mass transit be set aside for socially and economically disadvantaged individuals as defined by the Small Business Act.

The bill before us today, H.R. 3129, would continue the 10-percent set-aside for disadvantaged business enterprises.

My amendment is quite simple. It would make women's business enterprises eligible for the 10-percent set-aside.

Mr. Chairman, since the enactment of the Surface Transportation Act of 1982, the contracting opportunities in transportation programs for minorities have increased dramatically. Unfortunately, the same is not true for women business enterprises. In fact, some women-owned firms believe they have suffered at the expense of the disadvantaged business enterprise program.

The total amount of the set-aside would remain the same—10 percent. However, under my amendment, organizations owned by women would be on the same footing as disadvantaged business enterprises. Both would be eligible to participate in the set-aside program.

This amendment should not be controversial. I don't think that there is any question that over the years women-owned businesses have been discriminated against, especially in areas such as highway construction.

My amendment would go a long way toward righting this wrong. I urge my colleagues to support the amendment.

□ 2000

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, I just want to say that this side is very willing to accept the amendment.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the distinguished ranking member of the subcommittee.

Mr. SHUSTER. Mr. Chairman, we have examined this amendment and support it fully.

Mrs. MARTIN of Illinois. Mr. Chairman, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentlewoman from Illinois.

Mrs. MARTIN of Illinois. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I want to commend the gentleman from Arkansas, Mr. HAMMERSCHMIDT, for his leadership on what has been a very difficult issue in the past. I applaud the House on its courageous decision today to recognize a segment of our population which has been subjected to economic and social discrimination quite similar to that experienced by minorities. I am referring to women contractors in the construction industry.

As a former member of the House Public Works and Transportation Committee which drafted the historic Surface Transportation Assistance Act of 1982, many of us in the Congress had worked to include women in the then newly established Disadvantaged Business Enterprise [DBE] Program. Section 105(f) of the STAA established a 10-percent set-aside for small businesses owned and controlled by socially and economically disadvantaged individuals. Women were excluded from this program because they were not presumed to be "disadvantaged."

Although our initial efforts were slow in gaining acceptance, years of hard work and the tireless efforts of some very dedicated businesswomen have today set the stage for some greatly expanded economic opportunitites for women. I congratulate the Public Works Committee and the House for their wisdom in correcting this previous inequity.

Mr. SUNDQUIST. Mr. Chairman, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from Tennessee.

Mr. SUNDQUIST. Mr. Chairman, I rise in support of the amendment.

The CHAIRMAN pro tempore (Mr. DE LA GARZA). The question is on the amendment offered by the gentleman from Arkansas [Mr. HAMMERSCHMIDT].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DONNELLY

Mr. DONNELLY. Mr. Chariman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DONNELLY: Notwithstanding any of the provisions of title 23, section 111, the Commonwealth of Massachusetts is authorized to construct a State police barracks including customary access and egress on State owned property at the intersection of I-93 and Route 3, in Quincy, Massachusetts.

Mr. DONNELLY. Mr. Chairman, this amendment is technical in nature. It costs no money and, hopefully, is noncontroversial. It exempts the Commonwealth of Massachusetts on a State-owned piece of property from the egress and access restrictions of title XXIII, section 111.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. DONNELLY. I yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, this amendment does not require any additional funds. We checked the amendment and we accept the amendment.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. DONNELLY. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, we have examined this amendment and find it acceptable.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Massachusetts [Mr. DONNELLY].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. MURPHY

Mr. MURPHY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MURPHY: Page 124, strike line 9 and insert the following: "reconstruct to 4 lanes a 3.5 mile north-south segment of".

Mr. MURPHY. Mr. Chairman, this is a technical amendment which has been examined and agreed to by both sides concerning this segment of road.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. MURPHY. I yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, this is a technical amendment. We have checked this amendment and we accept it.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. MURPHY. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, we have examined this amendment and accept it.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. MURPHY].

The amendment was agreed to.

Mr. WISE. Mr. Chairman, I move to strike the last word for the purpose of engaging in a colloquy with the chairman of the subcommittee.

As the chairman knows, I had tried to have included in the report to accompany H.R. 3129 language to urge that priority consideration be given to providing funds for the repair of the Southside Bridge in Charleston, WV, from the fiscal year 1987 discretionary bridge account. As the chairman knows, this is my congressional district.

Mr. ANDERSON. Mr. Chairman, if the gentleman will yield. I am aware of the gentleman's interest in this particular bridge.

Mr. WISE. Would the chairman state, for the record, that it is the committee's intention to give such direction to the Secretary of Transportation.

Mr. ANDERSON. Could the gentleman tell me if he knows if the Southside Bridge qualifies for the Discretionary Bridge Program?

Mr. WISE. I can assure the chairman that, based upon the information that I have from the State of West Virginia, the Southside Bridge meets the criteria suggested in the Public Law 97-424, section 161, the "Discretionary Bridge Criteria."

Mr. ANDERSON. Knowing of the gentleman's history of supporting this much needed artery for the city of Charleston, WV, I can tell the gentleman that it is the direction of the Public Works and Transportation Committee that the Secretary of Transportation give the Southside Bridge high priority for the Discretionary Bridge Program.

Mr. WISE. I thank the chairman.

AMENDMENT OFFERED BY MR. JEFFORDS

Mr. JEFFORDS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JEFFORDS: Page 170, line 24, before the period insert:

, and (ii) such term means any undivided public highway with a speed limit of 50 miles per hour which is on the Federal-aid primary system, and on which access is not fully controlled, in a State in which the statutory State maximum speed limit is 50 miles per hour.

Page 172, after line 5, insert:

(4) APPORTIONMENT OF CERTAIN WITHHELD FUNDS.—In the case of any State described in section 154(f)(4)(A)(ii) of title 23, United States Code, from which funds are or have been withheld under section 154(f) of such title based on data collected before the effective date of the amendments made by this section, the Secretary shall promptly apportion such funds to such State if the Secretary determines, based on data collected during the first fiscal year in which the amendments made by this section are in effect, that the State is in compliance with such section 154(f).

Mr. JEFFORDS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Vermont?

There was no objection.

Mr. JEFFORDS. Mr. Chairman, today I am offering an amendment to

correct a flaw in the formula for determining compliance with the national 55 mile per hour speed limit which, contrary to the intent of the law, penalizes States which have general speed limits below the national maximum of 55 miles per hour.

Back in 1974, Congress reduced the national speed limit to 55 miles per hour in an effort to conserve fuel and reduce highway fatalities. In order to insure that States comply with the Federal mandate, the apportionment of Federal-aid highway funds is contingent upon State enforcement of the 55-mile-per-hour speed limit.

A 1978 amendment to the law and subsequent Department of Transportation rulemaking established specific criteria for determining State compliance with enforcement provisions of the law. The Secretary of Transportation has discretionary authority to withhold up to 10 percent of certain noninterstate Federal-aid highway funds if data submitted by the States shows that more than 50 percent of the vehicles sampled are exceeding the 55-mile-per-hour speed limit.

The problem lies in the selection of highways used to monitor for compliance with the law. Only State, Federal, and interstate highways which are posted at the 55-miles per hour speed limit may be included in the sample of highways monitored for compliance.

The 1978 amendments require State transportation officials to monitor a representative sample of 55-miles-per-hour, State, Federal-aid, and Federal highways for compliance with the law. States are given maximum flexibility in choosing where to monitor. Thus, States may monitor two-lane undivided highways as long as they are posted at 55 miles per hour. The average speeds on these highways are much lower than on divided highways built to Federal specification. By weighting the sample with data from undivided State highways, many States have been able to bring their overall compliance rate down below 50 percent.

My home State of Vermont has a general speed limit of 50 miles per hour. Only 371 miles of Vermont's 12,000-mile network are posted at 55 miles per hour. All monitoring for compliance with the national speed limit is conducted on four highways in Vermont. All segments of highway posted at 55 miles per hour in Vermont meet Federal interstate specifications, and are the best maintained and safest in the State. States with general speed limits below the national maximum must do all monitoring on highways built for high-speed travel.

Anyone who has driven in the Northeast knows that the speeds on Vermont's interstates are the same or less than others in the region. Vermonters are frustrated that we are being singled out for punishment, not because we are lax in enforcing the 55-miles-per-hour law, but because of a quirk in the compliance formula.

States with general speed limits below the national maximum are placed in a ridiculous catch-22 situation. They can increase the general speed limit in order to include undivided highways in the compliance sample. However, this would come at the expense of fuel consumption and safety and be contrary to the intent of the maximum speed limit law. Or they can keep the general speed limit below 55 miles per hour, conserve fuel and improve safety, but risk losing Federal highway aid. Either way, safety conscious States are the losers.

My amendment would remedy this situation without hampering Federal efforts to insure compliance with the maximum speed limit. It would allow States which have a general speed limit less than the national maximum to monitor, for purposes of compliance with the national 55-miles-per-hour speed limit, Federal-aid primary highways posted at less than 55 miles per hour. This amendment would reward, rather than penalize, States like Vermont which go further than the Federal Government in promoting conservation and highway safety.

I urge all Members to support this perfecting amendment which will reinforce the goals of the national maximum speed limit.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, we have examined this amendment, and we accept it.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from California.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Vermont [Mr. JEFFORDS].

The amendment was agreed to.

Mr. ANDERSON. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, we have examined this amendment and we have no objection to it.

AMENDMENT OFFERED BY MR. ROWLAND OF GEORGIA

Mr. ROWLAND of Georgia. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROWLAND of Georgia: Page 44, after line 11, insert the following:

"(e) LIMITATION ON SECRETARY'S DISCRETION.—If, within 365 days after any sums become available for obligation under this paragraph, the Secretary does not make such sums available for first priority projects under subparagraph (B)(i) of this paragraph, the Secretary shall make such sums available for carrying out second and third priority projects under subparagraph (B) of this paragraph.

Page 44, line 12, strike out "(E)" and insert in lieu thereof "(F)".

Mr. ROWLAND of Georgia (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. ROWLAND of Georgia. Mr. Chairman, what this amendment is to refer to funds that lapsed or may lapse that are made available to the Secretary under the Interstate System.

There are certain priorities that the Secretary can use in distributing these funds. Under the present legislation, or the committee bill, the Secretary would be allowed to hold these funds and not make them available. What my amendment does is simply require that at the end of each year the Secretary shift the funds that the succeeding category, either one, two, or three. He cannot keep them in the highway trust fund.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. ROWLAND of Georgia. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, we have examined this amendment and find it acceptable.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. ROWLAND of Georgia. I yield to the gentleman from California.

Mr. ANDERSON. Mr. Chairman, I have just seen the amendment for the first time, but it looks OK and I think we will accept it.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Georgia [Mr. ROWLAND].

The amendment was agreed to.

AMENDMENT OFFERED BY MRS. BENTLEY

Mrs. BENTLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. BENTLEY: Page 75, line 8, insert "finished cement an cement clinker" after the word "the" and strike the word "cement" and page 75, line 9, insert a period after the word "country" and strike all that follows.

□ 2010

Mrs. BENTLEY. Mr. Chairman, today I am introducing an amendment to the surface transportation reauthorization legislation designed to respond to the crisis of foreign imports invading our shores. We have before us today, the surface transportation reauthorization bill, which includes language to exclude foreign cement from Canada and Mexico being used to construct public highway structures using Federal funds derived from this highway bill.

I wish to commend the leadership of the committee, Chairman ANDERSON, of the subcommittee and its ranking minority member, Mr. SHUSTER, and Chairman HOWARD of the full committee and its ranking minority member, Mr. SNYDER, for working to include language in the bill to promote American industry under the "Buy American" provisions.

My amendment would simply go one step further by excluding all foreign cement material and finished cement from being used to construct public construction projects under this Federal-aid highway bill. Do keep in mind that the purpose of "Buy American" provisions is to ensure that federally funded projects are contracted to American firms and all purchases of material will be American. Therefore, by contracting only American cement firms to construct these federally funded projects, jobs will be guaranteed throughout the economy for American labor.

This amending language is needed. The American cement industry is losing business because of the rise in foreign imports. In this country, imports are increasing rapidly as a percent of domestic consumption. There is a pattern of closing domestic cement facilities and unemployment.

Mr. Chairman, while our Nation's industrial base continues to erode even further and the trade deficit continues to grow, it is time that our Government begin to act responsively to unfair foreign competition. The dumping of cement on U.S. markets by foreign producers continues to strain our domestic cement industry.

About 20 percent of all cement consumed in the United States is for highway and highway related—bridges, overpasses, and so forth—construction.

While in America there is an ever increasing market and rise in competition for cement, U.S. cement producers are at a disadvantage in their own market against foreign producers. U.S. cement producers are in need of facility improvements necessary to compete and are currently experiencing a low return on investment as a result of high-production costs and stiff competition.

In 1983, the United States filed cement dumping violations against Japan and Australia (sales at less than fair value were found) and countervailing duty investigations against Mexico were also found. Additional petitions by domestic cement producers are expected in 1986.

In 1985 and 1986 the United States will be the world's largest cement importing country for the first time in history. This is a startling statistic.

For this reason, my proposed amendment will reverse the decline in our domestic industrial base. It will come to the rescue of domestic production of cement by requiring that all cement in the United States for highway and highway related construction be American produced cement.

I urge my colleagues to join me in support of the amending language. This language is needed to respond to the key competitive factors that U.S. producers must face. Unfair trade practices by foreign nations, ineffective existing U.S. laws, ineffectiveness of agency enforcement, dumping and subsidies are factors that this Congress must face and vote to reverse.

Mr. Chairman, I urge my colleagues to vote and pass my amendment designed to protect our domestic cement industry and in so doing promote American jobs.

Mr. ANDERSON. Mr. Chairman, I rise in strong opposition to the amendment.

Mr. Chairman, while I am sympathetic to the goals being addressed by my committee colleague, I feel that Members of the House should recognize the impact of the amendment.

First, as a very simple fact, that this could drive up the cost of building and rebuilding our Nation's highways and transit systems quite a bit. Second is the indisputable fact that the domestic supply of cement does not begin to meet the domestic needs. That being the case, price will be driven up. Not only will prices go up, but there will not be sufficient cement available to meet our needs.

Again, needs exceed supply, and so domestic highway projects will be delayed. Finally, I would remind our colleagues that our bill already prohibits the use of Mexican and Canadian cement in transportation projects funded in the bill.

Mr. SHUSTER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in strong support of the amendment of my friend from Maryland. I would like to point out that this is consistent with the "Buy-American" language of other amendments and legislation which we have overwhelmingly adopted in this House over the past several days and weeks. If we already are singling out two countries, Mexico and Canada, to prohibit the importation of their cement, then I believe it is fair that we should extend this to other countries as well.

If you supported "Buy-American" provisions in the legislation that came through this body in the past 2 weeks, I believe consistently, this legislation should be supported as well.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentlewoman from Maryland [Mrs. BENTLEY].

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mrs. BENTLEY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 300, noes 102, not voting 29, as follows:

[Roll No. 299]

□ 2030

Messrs. ROBERTS, THOMAS of California, GLICKMAN, WAXMAN, HOYER, and DICKS changed their votes from "aye" to "no."

Messrs. LIGHTFOOT, JONES of Oklahoma, and KRAMER changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. YOUNG of Missouri. Mr. Chairman, I move to strike the last word.

Mr. Chairman, would the distinguished chairman of the Subcommittee on Surface Transportation engage in a brief colloquy with me?

Mr. ANDERSON. I am pleased to respond to the gentleman from Missouri.

Mr. YOUNG of Missouri. Mr. Chairman, I thank the gentleman from California.

Mr. Chairman, the Committee on Public Works and Transportation recognized the need for repair and rehabilitation of the Martin Luther King Bridge in Public Law 97-424, the Surface Transportation Assistance Act of 1982. In section 134 of that law, Congress stated that the bridge, which spans the Mississippi River between the cities of East St. Louis in Illinois and St. Louis in Missouri, would become eligible for assistance under section 144 of title XXIII, United States Code, upon the satisfaction of three conditions. The conditions were the transfer of the bridge from the city of East St. Louis, the present owner, to one or both of the States of Missouri and Illinois; the termination of tolls on the bridge; and that the bridge otherwise meet the eligibility requirements for funding.

Mr. Chairman, I am pleased to report that this bridge, which is located at a major transcontinental crossroads for traffic proceeding north and south and east and west across the United States, is now very close to meeting the conditions of Public Law 97-424. Agreement has been reached with the city of East St. Louis allowing for the transfer of the bridge to the States of Missouri and Illinois upon retirement of the bonded indebtedness. Negotiations with the bondholders are continuing, and we expect an agreement shortly. Upon transfer, the tolls will be terminated.

Mr. Chairman, as you are aware, four major interstate highways converge in the vicinity of the Martin Luther King Bridge, routes 64, 55, 70, and 44. Because of the significant deterioration of the Martin Luther King Bridge, the traffic from these major routes has been funneled across one bridge, the Poplar Street Bridge, which is now well above capacity.

Mr. Chairman, it is my understanding that, recognizing the importance of this bridge to the region and to transcontinental traffic, the committee is prepared to recommend that the Martin Luther King Bridge be accorded priority for repair and rehabilitation funding under the Secretary of Transportation's discretionary bridge fund if the conditions are met. Is that correct?

Mr. ANDERSON. Yes, provided that the bridge satisfies the criteria under section 161 of the 1982 act.

Mr. YOUNG of Missouri. Mr. Chairman, I thank the gentleman. It is my further understanding that the legislation includes an increase in bridge discretionary funding from $200 million to $250 million and one of the reasons is to help fund this additional bridge. Is that correct?

Mr. ANDERSON. The answer again is yes, assuming that the bridge satisfies the criteria.

Mr. YOUNG of Missouri. Mr. Chairman, I thank the gentleman very much.

Mr. SHUSTER. Mr. Chairman, will the gentleman from Missouri yield?

Mr. YOUNG of Missouri. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Mr. Chairman, I thank the gentleman.

I would say that it is my understanding that the honorable gentleman from Missouri, Mr. GENE TAYLOR, also strongly supports the gentleman's position on a bipartisan basis. I think that should be made a part of the record.

Mr. YOUNG of Missouri. Mr. Chairman, I appreciate that and I appreciate the comments of the gentleman from Pennsylvania.

AMENDMENT OFFERED BY MR. SEIBERLING

Mr. SEIBERLING. Mr. Chairman, I offer an amendment.

Mr. SHAW. Mr. Chairman, I am a member of the committee, and I have been seeking recognition.

The CHAIRMAN pro tempore [Mr. DE LA GARZA]. the Chair had not noticed the gentleman and had recognized the gentleman from Ohio.

Mr. SHAW. Mr. Chairman, I had told both parliamentarians about this.

Mr. SEIBERLING. Mr. Chairman, this should not take but 30 seconds, if the gentleman will withhold.

Mr. Chairman, who is recognized?

The CHAIRMAN pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. SEIBERLING: At the end of title I add the following new section:

SEC. 163. PROHIBITION ON WIDENING CERTAIN ROUTES THROUGH HISTORIC DISTRICT.

None of the funds authorized by this Act or any other Act or any amendment made by this Act may be obligated for a project to widen any State route through the historic district of the village of Hudson, Ohio, or for a project to construct an alternative or bypass route for such a route within one mile of such historic district, unless specifically approved by the village council of the village of Hudson, Ohio.

Mr. SEIBERLING (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. SEIBERLING. Mr. Chairman, this is a very simple amendment. It simply says in substance that Federal funds cannot be used to extend or enlarge a highway through the village of Hudson which is a historic village, without the approval of the village council.

I believe it is acceptable to both sides.

Mr. ANDERSON. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I am happy to yield to the gentleman from California.

Mr. ANDERSON. Mr. Chariman, we have checked the amendment and are willing to accept it.

Mr. SEIBERLING. Mr. Chairman, as I understand, it is also acceptable to the gentleman on the other side.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Ohio [Mr. SEIBERLING].

The amendment was agreed to.

□ 2045

PREFERENTIAL MOTION OFFERED BY MR. SHAW

Mr. SHAW. Mr. Chairman, I offer a preferential motion.

The CHAIRMAN pro tempore (Mr. DE LA GARZA). The Clerk will report the preferential motion.

The Clerk read as follows:

Mr. SHAW moves that the Committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken out.

The CHAIRMAN pro tempore. The gentleman from Florida [Mr. SHAW] is recognized for 5 minutes in support of his preferential motion.

Mr. SHAW. Mr. Chairman, I regret that I have to use this type of motion to get the attention of the Chair and of this Chamber. I have a very important amendment at the desk which is most controversial; it was most controversial in the committee, and I am sure that it is going to be most controversial here this evening, but I am entitled to be heard upon it.

I regret that I have to do that type of thing, but this is a most important amendment which has to do with highway beautification and the removal of billboards along the Federal highways.

Mr. Chairman, I ask unanimous consent to withdraw my motion, and I do have an amendment at the desk.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Florida?

Mr. HOWARD. Mr. Chairman, reserving the right to object, I would like to state to the Committee that we are aware that the gentleman does have an amendment or a series of amendments, and some of us on this side were preparing a reaction to or a substitute for the gentleman's amendment.

We have been led by the leadership, as many people know, to believe that we would not be able to come up with this legislation until the House had completed work on all of its appropriation bills and the defense bill, and so there was a question of whether we would even get up before the middle of September. So when the leadership asked us to bring this bill up at the very last moment during the final vote, about an hour or so ago, we agreed.

We asked the gentleman from Florida, since we would not complete the bill this evening, to withhold his amendment until the next time we met on this legislation so we would have time to prepare our substitute for his amendment. That is why we had urged him to not bring up his amendment at this time, knowing that he has every right to and apparently will.

So the situation is, instead of taking up an amendment that could be debated and voted on tonight, the Davis-Bacon amendment, which is an anti-labor amendment we were prepared to go through with that and have the Committee rise. Should the gentleman's amendment be offered and be read, then the Committee would rise immediately.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

AMENDMENT OFFERED BY MR. SHAW

Mr. SHAW. Mr. Chairman, I offer three amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Florida?

Mr. SNYDER. Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

Mr. SHAW. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SHAW: Page 57, strike out line 16 and all that follows through line 4 on page 58 and insert in lieu thereof the following:

SEC. 123. HIGHWAY BEAUTIFICATION.

(a) IN GENERAL.—Title 23 of the United States Code is amended by inserting after section 131 the following new section:

"§ 131A. Control of outdoor advertising

"(a) FINDINGS.—The Congress hereby finds and declares that outdoor advertising signs, displays, and devices in rural areas adjacent to the Federal-aid primary system and the Interstate System should be controlled in order to protect the public investment in such highways, to promote the safety and recreational value of public travel, and to preserve natural beauty.

"(b) EFFECTIVE CONTROL REQUIREMENT.—The States and Federal agencies shall effectively control the erection and maintenance of outdoor advertising signs, displays, and devices in rural areas adjacent to the Federal-aid primary system and the Interstate System.

"(c) EFFECTIVE CONTROL DEFINED.—For purposes of this section, the term 'effective control' means that the States and Federal agencies shall limit signs, displays, and devices that are visible from the main traveled way of the Federal-aid primary system and the Interstate System in rural areas and erected with the purpose of their being read from such main traveled way to the following types of signs, displays, and devices:

"(1) DIRECTIONAL.—Directional and official signs, displays, and devices as permitted by such regulations as the Secretary may issue.

"(2) PROPERTY SALE.—Signs, displays, and devices advertising the sale or lease of property upon which they are located.

"(3) ON-PREMISE.—On-premise signs, displays, and devices, including those which may be changed at reasonable intervals by electronic process, advertising activities conducted on the property on which they are located.

"(4) LANDMARK.—Signs lawfully in existence on October 22, 1965, and determined by the State or Federal agency, subject to the approval of the Secretary, to be landmark signs. Such signs may include signs of historic or artistic significance on farm structures or natural surfaces the preservation of which would be consistent with the purposes of this section.

"(5) COMMERCIAL AREA.—Signs, displays, and devices in areas actually used primarily for commercial and industrial purposes. Not later than 180 days after the date of the enactment of this section, the Secretary shall issue regulations defining 'actual use' and 'commercial and industrial purposes' for purposes of this paragraph. Before allowing the erection of any sign, display, and device in any area used primarily for commercial and industrial purposes, each State, in consultation with the Secretary, shall issue statewide criteria which are consistent with such regulations and define such areas and the signs, displays, and devices to be allowed in such areas.

"(6) TOURIST-ORIENTED.—Tourist-oriented directional signs, displays, and devices in areas specifically identified by a State or Federal agency, and approved by the Secretary, as appropriate for this type of sign, display, or device and consistent with the purposes of this section. Not later than 180 days after the date of the enactment of this section, the Secretary shall issue regulations defining 'tourist-oriented directional signs, displays, and devices' for purposes of this paragraph. Each State shall control the erection and maintenance of such signs, displays, and devices by a permit system. Any such permit system must provide that no permits will be granted to any applicant owning signs in rural areas adjacent to the Federal-aid primary system or the Interstate System which do not conform to this section unless such applicant demonstrates that it has voluntarily removed, without compensation or other cost to the State, at least as many nonconforming signs in such rural areas as the number of signs for which it seeks permits.

"(7) FREE COFFEE.—Signs, displays, and devices advertising the distribution by nonprofit organizations of free coffee to individuals traveling on the Federal-aid primary system and the Interstate System. For the purposes of this paragraph, the term 'free coffee' includes coffee for which a donation may be made, but is not required.

"(8) FARM PRODUCE.—Temporary or seasonal signs, displays, and devices advertising locations at which consumers may harvest and purchase agricultural commodities from farmers producing such commodities which signs, displays, and devices to not exceed 150 square feet.

"(d) LIMITATION ON VEGETATION REMOVAL.—For purposes of this section, a State shall be treated as failing to provide effective control of the erection and maintenance of outdoor advertising signs, displays, and devices if the State allows vegetation located on any land on which the State (or any political subdivision of the State) owns a right-of-way for any highway on the Federal-aid primary system or the Interstate

System to be cut, altered, or removed for the purpose of improving the visibility of any outdoor advertising sign, display, or device which is described in paragraph (2), (5), or (7) of subsection (c).

"(e) INFORMATIONAL SIGNS.—The Secretary shall, in consultation with the States and Federal agencies, provide—

"(1) within the rights-of-way on the Federal-aid primary system, and

"(2) within the rights-of-way at appropriate distances from interchanges on the Interstate System, for areas in which signs, displays, or devices giving specific information in the interest of the traveling public may be erected and maintained. Such signs, displays, or devices shall conform to national standards promulgated by the Secretary.

"(f) TRAVEL INFORMATION.—In order to provide information in the specific interest of the traveling public, the State highway departments and Federal agencies are authorized to maintain maps and to permit information directories and advertising pamphlets to be made available at safety rest areas. Subject to the approval of the Secretary, a State may also establish information centers at safety rest areas and other travel information systems within the rights-of-way for the purpose of informing the public of places of interest within the State and providing such other information as a State may consider desirable. The Federal share of the cost of establishing such an information center or travel information system shall be that which is provided in section 120 of this title for a highway project on that Federal-aid system to be served by such center or system.

"(g) REMOVAL OF NONCONFORMING SIGNS.—Any lawfully erected and maintained sign, display, or device in a rural area adjacent to the Federal-aid primary system or the Interstate System which does not conform to the requirements of this section on October 1, 1988, shall be removed no later than September 30, 1991. Any such sign, display, or device which becomes nonconforming after October 1, 1988, shall be removed no later than the end of the fifth calendar year after it becomes nonconforming.

"(h) REMOVAL OF ILLEGAL SIGNS.—Any illegally erected sign, display, or device adjacent to the Federal-aid primary system or the Interstate System in a State shall be removed no later than 90 days after the date on which this section takes effect with respect to such State.

"(i) STRICTER STATE AND FEDERAL CONTROLS.—Nothing in this section shall prohibit a State or Federal agency from imposing stricter controls than those set forth in this section.

"(j) FEDERAL RESPONSIBILITY.—Outdoor advertising signs, displays, and devices on all public lands and reservations of the United States, including Indian lands and reservations, in rural areas adjacent to the Federal-aid primary system and Interstate System shall be controlled in accordance with the provisions of this section by the Federal agency with jurisdiction over, or responsibility for, such land or reservation pursuant to procedures developed by such agency in consultation with the Secretary. Procedures required by this subsection shall be in effect within 90 days after the effective date of this section.

"(k) CONTINUING REQUIREMENT.—Any State highway department which, under section 131 of this title as in effect on June 30, 1965, entered into an agreement with the Secretary to control the erection and maintenance of outdoor advertising signs, displays, and devices in areas adjacent to the Interstate System must continue to comply with such agreement. If a State fails to continue to comply with such an agreement, such State shall return to the United States any payments received pursuant to such agreement.

"(l) ENFORCEMENT AUTHORITY.—The Secretary may withhold approvals under this chapter and take such other actions as are necessary to obtain compliance with this section.

"(m) FEDERAL PAYMENTS FOR REMOVAL.—Beginning with funds apportioned for fiscal year 1987 and for each of the fiscal years 1988, 1989, and 1990, the Secretary may approve the payment to a State out of funds apportioned to such State under section 104(b)(5)(B) of this title for costs incurred by the State for the following:

"(1) Physically removing signs, displays, and devices which are located in any area required to be effectively controlled by this section and are illegal under State law or do not conform to the requirements of this section.

"(2) Acquiring signs, displays, and devices which are located in any such area and required by this section to be removed and were lawfully erected and have been lawfully maintained under State law.

The Federal share of such costs shall be the same as that which is provided in section 120 of this title for projects on the Federal-aid system which is adjacent to such area.".

(b) CONFORMING AMENDMENTS.—(1) The analysis for chapter 1 of title 23, United States Code, is amended by inserting

"131A. Control of outdoor advertising."

after

"131. Control of outdoor advertising.".

(2) Effective September 30, 1988, section 131 of title 23, United States Code, is repealed.

(c) PENDING BONUS PAYMENTS.—Any claim for a bonus payment submitted by a State under section 131(j) of title 23, United States Code, before October 1, 1988, shall be paid in accordance with the provisions of such section as such section was in effect before such date.

(d) EFFECTIVE DATE.—This section and the amendments made by this section shall take effect on the 365th day following the date of the enactment of this Act, except that the Secretary shall issue regulations required to be issued by section 131A of title 23, United States Code, on or before such date, and such section 131A shall, before October 1, 1988, only apply with respect to a State if such State has in effect a law which the Secretary determines provides for effective control of outdoor advertising, signs, and displays in accordance with such section.

(e) LIMITATION ON APPLICABILITY OF EXISTING LAW.—Section 131 of title 23, United States Code, shall not apply to any State with respect to which the provisions of section 131A of such title apply.

Mr. HOWARD (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HOWARD. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore [Mr. WRIGHT] having assumed the chair, Mr. DE LA GARZA, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3129) to authorize funds for construction of highways, for highway safety programs, and for mass transportation programs, to expand and improve the relocation assistance program, and for other purposes had come to no resolution thereon.

## COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore (Mr. MURTHA) laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, DC,
*August 5, 1986.*

Hon. THOMAS P. O'NEILL, Jr.,
*Speaker, House of Representatives, Washington, DC.*

DEAR MR. SPEAKER: I have previously notified you of my receipt of a subpoena issued by the United States District Court for the District of Columbia calling for the production of certain records in my files.

After consultation with my General Counsel, I have determined pursuant to Rule L of the Rules of that House, that compliance with the subpoena is consistent with the privileges and precedents of the House of Representatives.

Sincerely,

BENJAMIN J. GUTHRIE,
*Clerk, House of Representatives.*

## MAKE ENGLISH THE OFFICIAL LANGUAGE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. LIPINSKI] is recognized for 5 minutes.

Mr. LIPINSKI. Mr. Speaker, I rise before my colleagues today to read an editorial written by Joan Beck for the Chicago Tribune on July 7, 1986. The issue refers to a resolution before Congress to make English the official language of the United States by an amendment to the Constitution. As a cosponsor and strong supporter of this resolution, I feel that this editorial is a timely and relevant piece that would interest my fellow Members of Congress. The piece follows in a slightly edited form:

AMERICA NEEDS A COMMON VOICE—ENGLISH

Almost all of us are immigrants or immigrants' children, 1st or 2d or 5th or 10th generation. Immigrants—at least 70 million by now—have nourished this country with energy, enterprise, intellect, and fresh commitment to our unique national heritage.

That commitment to becoming part of one nation, indivisible, is even more essential today. Immigration—legal and illegal—is at an alltime high. The melting pot ideology that served us well historically is being pushed aside by sentimental insistence on preserving a Balkanizing of other languages and cultures.

But if this Nation is to survive the diverse new waves of immigration, it is essential that the process of assimilation go on, at least in the public life we share. And the key to being a united nation is a common language.

This is not as clearly understood now as it has been in the past. Sympathy for newcomers, sentiment, and concerns about the civil rights of minorities have weakened the historic assumption that newcomers should be helped to learn English as quickly and efficiently as possible and should do so as part of their responsibility to become citizens.

Bilingual education programs sometimes spend as much effort maintaining students' native language as encouraging their fluency in English. And the great concentrations of immigrants in some American cities—especially those with foreign-language TV—are making it easy for people to live in the United States a lifetime and never learn English.

So critical is it that people in the United States share a common language that support is growing to make English this Nation's official language—either by constitutional amendment or by State and Federal laws.

Low-key efforts to use a constitutional amendment to make English the Nation's official language are also underway. The amendment was introduced in Congress in 1981 by S.I. Hayakawa, a semantics scholar and then Senator from California. But enthusiasm for using the cumbersome amendment process for this purpose has been slow to develop. Hayakawa also heads U.S. English, a national, nonprofit, nonpartisan organization that pushes the amendment and wants to speed up bilingual education, repeal laws requiring bilingual ballots, insist on being able to speak English as a requirement for naturalization and encourage the use of English by the entire Nation. "Government should foster the similarities that unite us rather than the differences that separate us," the organization insists.

Making English the official language is essentially a proimmigrant policy. It aims at integrating newcomers into the mainstream of American life as quickly as possible, not keeping them linguistically isolated and powerless in semantic segregation. The intention is to open the doors to American success for immigrants and push them to share the rich cultural life, literature and history of the country they have chosen to be their home.

Those who claim the right to settle in the United States—and who often get tax-paid benefits—have a responsibility, too. Making English the official language serves notice on newcomers and prospective immigrants that they are expected to become Americans in the fullest sense.

## PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. GILMAN] is recognized for 5 minutes.

Mr. GILMAN. Mr. Speaker, I was unavoidably detained last evening, August 5, 1986, and missed rollcall vote No. 285. Had I been present I would have voted "aye" on the Mavroules amendment making reforms in the procurement, research, development, test, and evaluation procedures of the Armed Forces.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. DAUB) to revise and extend their remarks and include extraneous material:)

Mr. GILMAN, for 5 minutes, today.

Mr. LUNGREN, for 60 minutes, on August 11.

Mr. BURTON of Indiana, for 60 minutes, today.

Mr. LEACH of Iowa, for 60 minutes, on August 7.

(The following Members (at the request of Mr. HOYER) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. LAFALCE, for 15 minutes, today.

Mr. PEPPER, for 5 minutes, on August 7.

Mr. OWENS, for 60 minutes, on August 11.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. DAUB) and to include extraneous matter:)

Mr. GILMAN.
Mr. GRADISON.
Mr. LENT.
Mr. GEKAS.
Mr. KINDNESS.
Mr. SHUMWAY.
Mr. GALLO.
Mr. LIGHTFOOT.
Mr. DAUB.
Mr. TAUKE.
Mr. KEMP in two instances.
Mr. COUGHLIN.
Mr. DANNEMEYER.

(The following Members (at the request of Mr. HOYER) and to include extraneous matter:)

Mr. DORGAN of North Dakota.
Mr. KOLTER in two instances.
Mr. FOWLER.
Ms. MIKULSKI.
Mr. DARDEN.
Mr. HAMILTON.
Mr. CONYERS.
Mr. FLORIO.
Mr. STOKES.
Mr. TALLON.
Mr. VENTO.
Mr. DERRICK.
Mr. DYSON.
Mr. DINGELL.
Mr. SKELTON.

## ENROLLED BILLS SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 1740. An act to direct the Secretary of the Interior to release a reversionary interest in certain lands in Orange County, FL, which were previously conveyed to Orange County, FL, and

H.R. 1795. An act to exempt certain lands in the State of Mississippi from a restriction set forth in the act of April 21, 1806.

## ADJOURNMENT

Mr. HOYER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 54 minutes p.m.), the House adjourned until tomorrow, Thursday, August 7, 1986, at 10 a.m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4007. A letter from the Director, the Office of Management and Budget, transmitting a supplementary summary of the fiscal year 1987 budget, pursuant to 31 U.S.C. 1106(a)(1) (H. Doc. No. 99-254); to the Committee on Appropriations and ordered to be printed.

4008. A letter from the Secretary of the Air Force, transmitting a report that because of the precision location strike system [PLSS] production program cancellation it has been determined that the program acquisition unit cost for the PLSS Program has increased by 25.5 percent, and a copy of the required abbreviated unit cost report which addresses the incurred increased, pursuant to 10 U.S.C. 139b(e)(1); to the Committee on Armed Services.

4009. A letter from the Secretary of Defense, transmitting a report on the effects of foreign export subsidies on the U.S. defense industrial base, pursuant to Public Law 99-145, section 1440(c) (99 Stat. 759); to the Committee on Armed Services.

4010. A letter from the United States Army Chief of Staff and the Secretary of the Army, transmitting a report concerning the production of the Bradley fighting vehicle; to the Committee on Armed Services.

4011. A letter from the Secretary of Education, transmitting a copy of notice of final priorities for educational media research, production, distribution, and training, pursuant to 20 U.S.C. 1232(d)(1); to the Committee on Education and Labor.

4012. A letter from the Secretary of Education, transmitting a copy of final regulations—National Direct Student Loan Program, pursuant to 20 U.S.C. 1232(d)(1); to the Committee on Education and Labor.

4013. A letter from the Director, Defense Security Assistance Agency, transmitting a copy of the price and availability report for the quarter ending 30 June 1986, pursuant to 22 U.S.C. 2768; to the Committee on Foreign Affairs.

4014. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting notification of a new computer matching program, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

4015. A letter from the Director of Benefits, Farm Credit Banks of Texas, transmitting a report for the year ended December 31, 1985, for the Farm Credit Banks of Texas pension plan; also a copy of the audit of the pension plan for the year ended December 31, 1985, pursuant to 31 U.S.C. 9503(a)(1)(B); to the Committee on Government Operations.

4016. A letter from the Assistant Secretary of the Interior—Land and Minerals Management, transmitting a report describing royalty management and collection activities under the Federal Oil and Gas Royalty Management Act of 1982, pursuant to Public Law 97-451, section 302(a); to the Committee on Interior and Insular Affairs.

4017. A letter from the Chief Justice, Supreme Court of the United States, transmitting a draft of proposed legislation to preserve the authority of the Supreme Court police to provide protective services for Justice and Court personnel; to the Committee on the Judiciary.

4018. A letter from the Secretary of Health and Human Services, transmitting a report on increasing the Social Security retirement age; effect on older workers in physically demanding occupations or ill health, pursuant to 42 U.S.C. 416 nt (Public Law 98-21, section 201(d)); to the Committee on Ways and Means.

4019. A letter from the Acting Assistant Secretary for Civil Rights, Department of Education, transmitting the fifth annual report of the compliance and enforcement activities of the Office for Civil Rights [OCR] and identifying significant civil rights or compliance problems, pursuant to 20 U.S.C. 3413(b)(1); jointly, to the Committees on Education and Labor and the Judiciary.

4020. A letter from the Secretary of Transportation, transmitting a report of the actions taken with regard to Manila International Airport, pursuant to 49 U.S.C. app. 1515(e)(3); jointly, to the Committees on Public Works and Transportation and Foreign Affairs.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FUQUA: Committee on Science and Technology. H.R. 2889. A bill to amend the Act establishing the National Bureau of Standards to provide for a computer security research program within such Bureau, and to provide for the training of Federal employees who are involved in the management, operation, and use of automated information processing systems; with amendments (Rept. 99-753, Pt. 1). Ordered to be printed.

Mr. BROOKS: Committee on Government Operations. H.R. 2889. A bill to amend the Act establishing the National Bureau of Standards to provide for a computer security research program within such Bureau, and to provide for the training of Federal employees who are involved in the management, operation, and use of automated information processing systems; with an amendment (Rept. 99-753, Pt. 2). Referred to the Committee of the Whole House on the State of the Union.

Mr. HAWKINS: Committee on Education and Labor. H.R. 5185. A bill to make certain amendments to the Job Training Partnership Act; (Rept. 99-754). Referred to the Committee of the Whole House on the State of the Union.

Mr. RODINO: Committee on the Judiciary. H.R. 822. A bill to provide for a General Accounting Office investigation and report on conditions of displaced Salvadorans, to provide certain rules of the House of Representatives and of the Senate with respect to review of the reports, to provide for the temporary stay of detention and deportation of certain Salvadorans, and for other purposes; with an amendment (Rept. 99-755, Pt. 1). Ordered to be printed.

Mr. HAWKINS: Committee on Education and Labor. H.R. 4154. A bill to amend the Age Discrimination in Employment Act of 1967 to remove the maximum age limitation applicable to employees who are protected under such Act, and for other purposes; with an amendment (Rept. 99-756). Referred to the Committee of the Whole House on the State of the Union.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BOLAND:

H.R. 5341. A bill to waive the required congressional review period for a natural gas pipeline to be built by Tennessee Gas Pipeline Co. across certain Army Corps of Engineers lands in Massachusetts; to the Committee on Interior and Insular Affairs.

By Mr. DE LA GARZA:

H.R. 5342. A bill to amend the Immigration and Nationality Act with respect to the liability of owners and operators of international bridges and toll roads to prevent the unauthorized landing of aliens; to the Committee on the Judiciary.

By Mr. HUGHES:

H.R. 5343. A bill to designate certain segments of the Maurice and the Manumuskin Rivers in New Jersey as study rivers for inclusion in the national wild and scenic rivers system; to the Committee on Interior and Insular Affairs.

By Mr. GALLO:

H.R. 5344. A bill to amend title XIX of the Social Security Act to require skilled nursing facilities and intermediate care facilities that participate in the Medicaid Program to make available at least the average proportion of beds available in the State to Medicaid patients; to the Committee on Energy and Commerce.

By Mr. LANTOS:

H.R. 5345. A bill to amend title 10, United States Code, to provide military retired pay to certain persons who were members of the U.S. merchant marine during World War II; jointly, to the Committees on Armed Services, and Merchant Marine and Fisheries.

By Mr. LOWERY of California:

H.R. 5346. A bill to designate the Federal building located in San Diego, CA, as the "Jacob Weinberger Federal Building"; to the Committee on Public Works and Transportation.

By Ms. MIKULSKI:

H.R. 5347. A bill to provide for the establishment of ocean wilderness areas, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. PENNY (for himself and Mr. BARNARD):

H.R. 5348. A bill to provide relief to State and local governments from Federal regulation; jointly, to the Committees on Government Operations, and Rules.

By Mr. SENSENBRENNER:

H.R. 5349. A bill to affirm the findings and recommendations of the Presidential Commission on the space shuttle *Challenger* accident, to require the National Aeronautics and Space Administration to take the actions necessary to ensure a return to safe flight in the shuttle program as recommended in the report of such Commission, and to make certain other administrative changes in furtherance of the objectives of such report; to the Committee on Science and Technology.

By Mr. TAUKE (for himself, Mr. TAYLOR, Mr. HORTON, Mr. YOUNG of Alaska, Mr. BEDELL, Mr. EVANS of Iowa, Mr. LEACH of Iowa, Mr. LIGHTFOOT, Mr. SMITH of Iowa, Mr. VOLKMER, Mr. WHITTAKER, Mr. BEREUTER, Mr. ROBERTS, Mr. STANGELAND, Mr. STENHOLM, Mr. WORTLEY, and Mr. SKELTON):

H.R. 5350. A bill to amend title 39 of the United States Code to restore the limited circulation second-class rates of postage for copies of a publication mailed to counties adjacent to the county of publication, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. WILLIAMS:

H.R. 5351. A bill to provide for improved disclosure of certain rail transportation contracts, and for other purposes; to the Committee on Energy and Commerce.

By Mr. GARCIA (for himself and Mr. MICA):

H.J. Res. 697. Joint resolution to proclaim October 23, 1986, as "A Time of Remembrance" for all victims of terrorism throughout the world; to the Committee on Post Office and Civil Service.

## ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 1402: Mr. WORTLEY and Mrs. JOHNSON.

H.R. 1453: Mr. VENTO, Mr. MOAKLEY, and SCHEUER.

H.R. 2076: Mr. COBEY.

H.R. 2708: Mr. GRAY of Illinois.

H.R. 2952: Mr. TRAFICANT and Mr. GARCIA.

H.R. 3040: Mr. RANGEL.

H.R. 3395: Mr. PORTER.

H.R. 3661: Mr. SHUMWAY.

H.R. 3842: Mr. SMITH of New Hamphire, Mr. CHAPPELL, and Mr. PANETTA.

H.R. 3866: Mr. GUNDERSON.

H.R. 3886: Mr. PURSELL.

H.R. 3894: Mr. SAVAGE, Mr. MADIGAN, Mr. REID, Mr. BEVILL, Mr. SMITH of Florida, Mr. CARPER, and Mr. NIELSON of Utah.

H.R. 4085: Mr. SCHUETTE.

H.R. 4300: Mr. PEPPER, Mr. WALDON, and Mr. BONIOR of Michigan.

H.R. 4393: Mr. CHAPPELL, Mr. GIBBONS, Ms. KAPTUR, Mr. LEWIS of Florida, Mr. MCCAIN, Mr. MONSON, Mr. OWENS, Mr. SKELTON, and Mr. WEISS.

H.R. 4405: Mr. FRANKLIN.

H.R. 4478: Mr. BLILEY.

H.R. 4482: Mr. HEFNER, Mr. SOLARZ, Mr. OLIN, and Mr. ARMEY.

H.R. 4495: Mr. BADHAM, Mr. PACKARD, Mr. LAGOMARSINO, Mr. MILLER of Washington, Mr. WYDEN, Mr. MONSON, Mr. STENHOLM, and Mr. TRAFICANT.

H.R. 4558: Mr. DENNY SMITH, Mr. GRAY of Illinois, Mr. DEWINE, Mr. GILMAN, Mr. VOLKMER, Mr. KOLTER, Mr. MCGRATH, Ms. KAPTUR, Mr. STENHOLM, Mr. COATS, Mrs. BOXER, Mr. LEVIN of Michigan, Mr. NELSON of Florida, Mr. DORNAN of California, Mr. TORRICELLI, and Mr. ROE.

H.R. 4630: Mr. ERDREICH, Mr. NEAL, Mr. BONER of Tennessee, and Mr. BEVILL.

H.R. 4715: Mr. ROSE, Mr. THOMAS of Georgia, Mr. BARNARD, Mr. WHITTEN, Mr. CHAPMAN, Mr. GRAY of Illinois, Mr. MCCLOSKEY, Mr. KILDEE, Mr. JACOBS, and Mr. DYMALLY.

H.R. 4762: Mr. BORSKI, Mr. JACOBS, and Mr. CONYERS.

H.R. 4766: Mr. MARLENEE.

H.R. 4776: Mrs. MARTIN of Illinois.

H.R. 4788: Mr. STANGELAND and Mr. HUTTO.

H.R. 4856: Mrs. MARTIN of Illinois, Mr. MOLLOHAN, Mr. BLILEY, Mr. STAGGERS, and Mr. GEKAS.

H.R. 4871: Mr. BORSKI and Mr. RINALDO.

H.R. 4893: Mr. FASCELL.

H.R. 4922: Mr. HUTTO and Mr. BOEHLERT.

H.R. 5098: Mr. MOLLOHAN.

H.R. 5112: Mr. MOLINARI, Mr. SMITH of Florida, Mr. FUSTER, Mr. DENNY SMITH, Mr. LUNDINE, Mrs. BENTLEY, Mr. LAGOMARSINO, Mr. WORTLEY, Mr. DAUB, Mr. COURTER, and Mr. MONSON.

H.R. 5156: Mr. CROCKETT, Mr. MONSON, and Mr. EDWARDS of Oklahoma.

H.R. 5183: Mr. MORRISON of Connecticut, Mr. RANGEL, Mr. HAYES, and Ms. MIKULSKI.

H.R. 5185: Mr. DYMALLY.

H.R. 5218: Mr. EVANS of Illinois.

H.R. 5275: Mr. FUSTER, Mr. WORTLEY, Mr. LAGOMARSINO, and Mr. TOWNS.

H.R. 5305: Mr. ACKERMAN, Mr. FAZIO, and Mr. LOWRY of Washington.

H.J. Res. 49: Mr. SWINDALL.

H.J. Res. 167: Mr. CONTE, Mr. BATES, Mr. MARKEY, Mr. GEJDENSON, Mrs. BYRON, Mr. PERKINS, Mr. RANGEL, Mr. KRAMER, Mr. SNYDER, Mr. GINGRICH, Mr. GUARINI, Mr. WIRTH, Ms. SNOWE, Mr. LIVINGSTON, Mr. BLAZ, Mr. FIELDS, Mr. TRAXLER, Mr. DEWINE, Mr. TAUZIN, Mr. HENRY, Mr. WOLPE, Mrs. BENTLEY, Mr. BOUCHER, Mr. HANSEN, Mr. PRICE, Mr. PEPPER, Mr. CONYERS, Mr. APPLEGATE, Mr. BILIRAKIS, Mr. BONER of Tennessee, Mrs. BOXER, Mr. FISH, Mr. FUSTER, Mr. SILJANDER, Mr. MCMILLAN, Mr. LATTA, Mr. ST GERMAIN, Mr. SAXTON, Mr. VALENTINE, Mr. BROOKS, Mr. MOORE, Ms. MIKULSKI, Mr. GLICKMAN, Mr. ACKERMAN, Mr. SYNAR, Mr. DAUB, Mr. LEVINE of California, Mr. SOLARZ, Mr. EDGAR, Mr. WEBER, Mr. HAMMERSCHMIDT, Mr. WORTLEY, Mr. JONES of Tennessee, Mr. WILLIAMS, Mr. MINETA, Mr. BONIOR of Michigan, Mr. ATKINS, Mr. BARNARD, Mr. YOUNG of Florida, Mr. BOLAND, Mr. MACK, Mr. EVANS of Illinois, Mr. PENNY, Mr. SABO, Mr. TORRES, Mr. SHUMWAY, and Mr. MOAKLEY.

H.J. Res. 512: Mr. BENNETT, Mr. FLORIO, Mr. HALL of Ohio, Mr. SMITH of New Jersey, Mr. NEAL, Mr. NELSON of Florida, Mr. TALLON, Mr. FORD of Tennessee, Mr. COATS, Mr. CALLAHAN, Mr. SOLARZ, and Mr. DANIEL.

H.J. Res. 645: Mr. CROCKETT and Mr. FRANK.

H.J. Res. 670: Mr. FROST, Mr. SKELTON, Mr. TALLON, Mr. YOUNG of Alaska, and Mr. ROSE.

H.J. Res. 678: Mr. CALLAHAN, Mr. RICHARDSON, and Mr. LEVIN of Michigan.

H.J. Res. 688: Mr. WILSON, Mr. NICHOLS, Mr. AKAKA, Mr. VISCLOSKY, Mr. ANNUNZIO, Mr. FEIGHAN, Mr. RAHALL, Mr. WHITTEN, Mr. BUSTAMANTE, Mr. HENRY, Mr. KINDNESS, Mr. HUTTO, and Mr. REID.

H. Con. Res. 26: Mr. GILMAN and Mr. WALDON.

H. Con. Res. 129: Mr. ORTIZ, Mr. FAUNTROY, Mr. VENTO, Mr. OLIN, and Ms. MIKULSKI.

H. Res. 430: Mr. MINETA.

## PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

456. By the SPEAKER: Petition of the Texas State Council of Carpenters, Austin, TX, relative to immigration; to the Committee on the Judiciary.

457. Also, petition of the Chairman, Quinault Indian Nation, Taholah, WA, relative to taxes on tribal commercial fishermen; to the Committee on Ways and Means.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1309

By Mr. KINDNESS:

—Page 6, after line 19, insert the following new paragraph (and redesignate the succeeding paragraphs accordingly):

(7) the term "agency" when used with respect to the Federal Government has the meaning given such term by section 552(e) of title 5, United States Code;

—At the end of the bill add the following new section:

SEC. 12. TERMINATION DATE.

The provisions of this Act shall cease to be effective three years after the effective date of this Act.

—Page 5, line 15, insert before the comma the following: "on a regular, full-time basis".

Page 5, line 16, insert "so" after "formerly".

—Page 8, line 11, strike out "from this review".

—Page 8, line 19, strike out "that may be toxic" and insert in lieu thereof "that are known or are proven to be toxic,".

—Page 13, line 10, strike out "and data".

—Page 22, line 2, after the period insert the following: "Penalties collected pursuant to this subsection shall be deposited in the Treasury of the United States, and credited to miscellaneous receipts.".

—Page 16, after line 8 insert the following new subsection:

(j) PROHIBITION ON USE OF NOTICE AS EVIDENCE.—Notification given under subsection (b) to a population at risk of an occupational disease shall not be admissible in any court or administrative proceeding as evidence that an employee was exposed to hazardous occupational exposure.

H.R. 4428

By Mr. WEAVER:

[47]—Amendment to Title 10; on page 239, after line 5, add a new section at the end thereof as follows:

SEC. 1033. PROCUREMENT OF MILITARY GRAIN RESERVE.

Whereas, a secure food supply is essential to the operation and maintenance of our armed services; and

Whereas, subsidized grain sales to the Soviet Union will provide military advantage to the Soviet Union by helping to keep their troops in Afghanistan and by freeing their funds for weapons production; Now therefore be it

*Resolved*, That it is the sense of the House of Representatives that the Secretary of Defense submit to the Congress a proposal to create a Military Grain Reserve to secure focd supplies for the Armed Services in times of emergency; and that such proposal shall include provisions for procurement and storage of grain which otherwise would be sold to the Soviet Union, as such subsidized grain sales to the Soviet Union are against the national security interest of the United States.

# SENATE—*Wednesday 6, 1986*

*(Legislative day of Monday, August 4, 1986)*

The Senate met at 10:15 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Father in Heaven, I pray for the people watching the Senate in operation, who are critical or discouraged with the legislative process. Bring to their recall the difficulties encountered by their small neighborhood organization in settling a zoning problem * * * or the divisions arising in parents and teachers meeting * * * or finding concensus in their local church congregation. Then help us all Lord, to comprehend the uncommon wisdom and vision of our Founding Fathers in giving us this incredible political system with its built-in protection for all. Fill our hearts with gratitude for this Government by Constitution—their legacy to us. Move the people to pray for their representatives in Washington who take seriously the Constitution and their stewardship of the public trust. In the name of Him Who life was ordered by love for all people and obedience to the will of God. Amen.

## RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The able and distinguished majority leader, Senator ROBERT DOLE, of Kansas, is recognized

Mr. DOLE. Mr. President, I thank the distinguished Presiding Officer, the President pro tempore, the distinguished Senator from South Carolina, Senator THURMOND.

I also thank the Chaplain for praying for people who watch Senate television. I must say I guess it could be compared to a lot of things but even despite all the differences we have, sooner or later we get things done. That is the important thing. I am an optimist or I would not be here.

## SCHEDULE

Mr. DOLE. Mr. President, I suggest today the leaders have 10 minutes each and then we have seven special orders for Senators HAWKINS, PROXMIRE, CHAFEE, GORE, HUMPHREY, BAUCUS, and DIXON of 5 minutes each.

We have routine morning business not to extend beyond 11:30 a.m., and then at 11:30 a.m., hopefully we will be back on S. 2638, the DOD authorization bill.

Pending is the Dole amendment 2417 in the second degree to the Byrd amendment 2414.

I assume by then maybe we could agree to set those amendments aside if it is all right with the minority leader and the managers could go on with whatever they had in mind.

At 1 p.m., it will be the intention of the majority leader to receive the articles of impeachment on Judge Claiborne from the managers on the part of the House of Representatives. We have not quite worked out the second and third stages of that but we have agreed that at 1 o'clock we will accept the message, and they will be here with the articles.

Also, it would be my intention, if there is a vote on the textile bill, if the President's veto is overridden in the House of Representatives, that we would take action on that today.

I think that is the will of the principals.

I have not yet had a chance to visit with the distinguished Senator from South Carolina, Senator HOLLINGS, but I have visited with Senator THURMOND from South Carolina, and others.

□ 1020

It is my hope that we can reach some agreement on the two big issues that have been sort of hanging up everything around here the past couple of weeks, and that is South Africa and Contra aid. We had a caucus last evening, the Republicans, with 41 Members attending. I think it is fair to characterize that meeting as a willingness to proceed with these two issues. Even some who are strongly opposed to South Africa, I think would be willing to proceed if there could be some agreement on the Contra vote; and some who are opposed to the Contra vote would be willing to vote for cloture on the Contra bill itself on the basis that we had it before the Senate before, we passed it, and we should have the opportunity to vote on it again.

So it seems to me that, on our side of the aisle, we at least have the seeds of potential agreement on these two highly controversial issues. I will be giving the distinguished minority leader the results of our meeting and see if we can work out some agreement.

I certainly want to reiterate and underscore the comments of Senator DOMENICI last night with reference to the debt ceiling and the necessity of going to conference, hopefully today. If we could work out some agreement and release the debt ceiling from the Contra and South Africa controversy, then they could start the conference on the debt ceiling as soon as they could, because there are some major issues. In addition to all the Christmas tree ornaments that were hung on the debt ceiling, there are some amendments that I assume will be seriously considered in the conference, one being the modification of Gramm-Rudman-Hollings. That is another reason I think it is incumbent that we try to reach some agreement on South Africa and the Contra aid problem.

But, having said that, there is a 2 o'clock vote scheduled on the cloture motion relating to S. 2638. Again, there is a possibility that may be withdrawn or postponed if we can either reach an agreement or indicate that we are serious about reaching an agreement.

Mr. BYRD. Mr. President, while the distinguished majority leader has the floor, may I indicate to him that I stand ready to talk about an agreement. There have been no discussions with me or with my staff since last night. And I think there is good reason for there not having been. We were late getting out last night and, of course, we had no opportunity this morning. There have been no discussions. I have seen no proposed agreement this morning.

I am ready, willing, and able at any time. As far as I am concerned, discussions could very well begin with the principals, with the Senators rather than staffs, and then go from there, if the majority leader would like that suggestion.

## RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. DENTON). The minority leader is recognized.

## THE TRADE CRISIS—TEXTILES AND BEYOND

Mr. BYRD. Mr. President, today, the House of Representatives will face a decision on whether or not to override the President's veto of the textile bill. It is very likely that the Senate, then, will deal with this issue soon thereaf-

ter. This is the latest evidence of the mounting congressional—and public—anger with the administration's indifference—indifference—to the trade crisis.

I told several hundred textile, apparel, and shoe workers last week on the steps of the Capitol that they were not alone in their plight. American working people—from farmers to coal miners, to steel workers, to ferroalloy workers, to glass workers, to computer workers—are suffering from our lagging exports and the rising tide of imports.

Just look at the major sectors of our economy:

In agriculture a $23 billion surplus in 1980 has collapsed—collapsed—so that the 1986 surplus to date, is below $1 billion. That surplus was $23 billion in 1980. And for the past 2 months, the United States actually ran a deficit in agricultural trade, thus raising the once unthinkable—unthinkable—prospect that when all the data are in for the entirety of 1986, the "breadbasket of the world" may have imported more food than it exported this year.

And so the administration now advocates subsidizing grain to the Soviet Union—the Soviet Union that has its troops in Afghanistan, slaughtering men, women, and children, and driving millions of Afghanistans from their homeland. That is what is happening in Afghanistan. All that is behind the Iron Curtain. The news media of the world are shut out. The Western press has little to say about what is going on in Afghanistan. And it is because the Soviets have from 120,000 to 150,000 troops in Afghanistan.

And what a big play they made recently when Mr. Gorbachev said he might remove 5,000 or 6,000 troops from Afghanistan. What a big play—remove 5,000 or 6,000 troops. And what were they? Antiaircraft units. It is preposterous. Why did they have antiaircraft units in Aghanistan in the first place? The Afghans only have rocks and stones and a few old bazookas and World War I rifles. Now he is pulling out 5,000 or 6,000 troops.

Why, they turn over their troops from time to time. But what a big play. The news media all over the world made this front-page news, reminding me of the fly in "Aesop's Fables," which, sitting on the axle of a chariot, said, "My, what a dust I do raise."

So what a dust that little announcement raised. And yet we are now going to subsidize the Soviets.

But what really got us into the situation was the lack of a trade policy on the part of this administration that would encourage the continuing exports of our foodstuffs to other countries while other countries subsidize their industries, not only agriculture, as the Soviet Union does, but also machinery, steel, and other goods.

So the administration brought itself to this place of subsidizing the grain to the Soviets simply because of its trade policies that really add up to a nontrade policy.

In manufacturing, the healthy $17 billion surplus that the United States enjoyed in 1980 has been replaced now by a deficit running at a $138 billion annual rate this year. While the United States is exporting fewer manufacturing goods today than it did in 1980, the Nation is importing twice as much—twice as much—as it did in 1980 and almost twice as much as we export today.

So while the service jobs may have increased—there are more people working at McDonald's and at Sears and at K-Mart; more people working in those jobs perhaps, and we are all glad for that—there are fewer people working in the steel industries where the furnaces have gone cold and the doors have closed forever.

The same can be said of other manufacturing industries in this country.

In petroleum, the volume of imports is up 20 pecent over the same period last year and escalating rapidly, thus devastating the American petroleum industry.

Last week, Federal Reserve Chairman Paul Volcker said "that trade imbalance has been the most fundamental factor in the sluggishness of the economy." American steel workers, coal miners, textile workers, shoe workers, auto workers, farmers, and many other working men and women say a loud "amen" to that.

When is the administration going to come up with a trade policy to answer this crisis and to get these people out of the unemployment lines? How can we expect to deal with the Federal budget deficit if we do not first deal with the Federal trade deficit? These people are not working. They are not paying taxes into the State treasuries. They are not paying taxes into the Federal Treasury. No. They are in the unemployment lines. They are drawing unemployment compensation. For some of them in many instances the unemployment compensation has run out. So they are not producing, they are not paying taxes, and they are siphoning away the revenues from the Treasury as a result.

When is the administration going to wake up? When is it going to awaken? How many more jobs will it take before they decide that we have a real problem on our hands? I anticipate and hope that the House will override the veto today, and that the Senate will follow suit.

These votes, Mr. President, will be a tangible expression of sentiment across the land that something has to be done if the administration will not. If the administration will not act using the tools already available under current law, then the Congress will act.

I hope the House will override the veto. Let the message be heard down at the White House. Perhaps it will bring the administration back to a world of reality where men and women are unemployed, where they suffer because of inadequate health care, not enough food on the table, unable to pay the rent, seeing their farms sold out from beneath them, seeing their automobiles taken back because they cannot pay their debts. That is the world of reality. I hope the House will override this veto. Let that message be heard down at the White House. I hope then thereafter the Senate will also override.

Mr. President, I yield the floor.

Mr. DIXON addressed the Chair.

## RECOGNITION OF SENATOR HAWKINS

The PRESIDING OFFICER. The Senator from Illinois is informed that according to the previous order Senator HAWKINS, No. 3 after the Democratic leader, is recognized for a period not to exceed 5 minutes.

Mrs. HAWKINS addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

## OUR COUNTRY'S ATTITUDE TOWARD DRUGS

Mrs. HAWKINS. Mr. President, a revolution is quietly taking place and that is our country's attitude toward drugs. More and more Americans are coming to realize the danger posed by drugs to society—danger to our health, our economy, our social structure and our institutions.

Another step forward was taken last Monday when President Reagan called for mandatory drug testing of all Federal employees in sensitive posts—areas such as law enforcement, national security, safety and public health. At this point, the President would not go so far as to require testing for all Federal workers. But most Federal agencies would set up volunteer testing programs and Federal hiring procedures could be changed to require drug screening of prospective employees.

What the United States needs, the President explained, is:

> A sustained national effort to rid America of this scourge—by mobilizing every segment of our society against drug abuse.

The President made it clear that the Federal Government is not going to embark on a drug witchhunt:

> We mean to reach out to the drug user. Our goal is not to throw users in jail but to free them from drugs. We will offer a helping hand, but we will also pressure the user at school and in the work place to straighten up, to get clean.

In making this last point, the President served notice that the antidrug campaign will go far beyond the confines of the Federal workplace. He detailed six goals: A drug-free workplace, drug-free schools, treatment of drug abusers, international cooperation, strengthening law enforcement and expanded public awareness.

The strategy involved in achieving these goals would be an intensified campaign to identify users of illegal drugs in the public and private sectors by a combination of mandatory and voluntary testing. Once drug users have been identified, rather than face arrest or dismissal from jobs, they would be offered treatment. The Government's role would be one of providing leadership and a helping hand instead of punitive retaliation.

The reasoning behind the President's concern about drugs lies in the horrendous statistics involved. There are between 3 and 5 million regular cocaine users in the United States. There are 18 million regular users of marijuana. In the past 5 years, the number of drug-related deaths and hospital emergency room visits stemming from drug use has tripled. The cost of drug use in economic terms runs into the billions; the cost in human terms is immeasurable.

Curbing drug use is everybody's job: the parent, the teacher, the pupil, business, labor, service organizations, and professional groups. There is a role for everyone in this crusade. And the sooner we get on with it, the better.

I applaud the President for his leadership in launching this farsighted project. I earnestly hope that he can count on the full cooperation of the Senate when the time comes to mobilize the resources that will be required to insure the success of this campaign.

## RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 5 minutes.

## THREAT OF NUCLEAR TERRORISM GROWING; SUPERPOWERS SHOULD ACT

Mr. PROXMIRE. Mr. President, on June 25 an expert international task force on nuclear terrorism released its report on the prevention of nuclear terrorism. The first paragraph of this report adds a fourth imperative to "mankind's effort to exploit and control the energy of the atom." Since the dawn of the nuclear age, the three imperatives have been:

"The prevention of war between the superpowers.

"The prevention of the further spread of nuclear weapons.

"The prevention of catastrophic nuclear accidents."

This task force report recognizes and adds a fourth imperative: "The prevention of nuclear terrorism." The report finds neither the public nor governments have given serious consideration to nuclear terrorism. The explosion of terrorism in recent years should remind us of the catastrophic threats that nuclear terrorism may pose to millions of persons throughout the world. The superpowers have devoted many billions of dollars every year to an increasingly costly effort to deter a nuclear attack by the adversary superpower. Costly as that deterrence has been, it has been the major factor in preventing a superpower nuclear war.

But as the task force report points out, deterrence may not work against terrorists who "go nuclear." In spite of this, the report finds the probability of nuclear terrorism remains low. But while the threat of nuclear terrorism may be low, the report finds that the probability of this terrorism is increasing. And, in fact, it poses an exceptional global danger. Why does the task force find the threat of nuclear terrorism increasing? First, because terrorism itself is increasing. It is more sophisticated. It is more lethal. It has state support. It even has state sponsorship. Nuclear weapons have been stored in substantial number in areas of intense terrorist activity. And there is a big and growing black and gray market in nuclear equipment and materials.

In view of all this why does the task force find that the threat of nuclear terrorism still remains low? This is because the construction of nuclear weapons is more difficult and costly for terrorists than was previously thought. The task force found that the old "coffee can bomb" that relies on a few kilograms of oxide powder wrapped around some high explosives would not provide the nuclear grade detonation that had previously been assumed. Terrorists would need more. They would need the resources to recruit a team of three or four technically qualified specialists. They would need chemical high explosives and a big enough quantity of weapon usable nuclear material, probably in metallic form.

This means the most vulnerable target of terrorists intent on acquiring their nuclear arsenal are depots where nuclear weapons and nuclear weapons material are stored. The task force found that civil and military nuclear sectors have improved their security in recent years. Plutonium is less available also because plutonium fuel has not proceeded as quickly as was expected in power programs in recent years. The task force does not mention it. But the International Atomic Energy Commission has been far more successful than even its champions expected in policing the handling and storage of weapons grade nuclear material developed from nuclear powerplants. The report does say that the challenge is for government and industry to build on the technical and organizational successes to date particularly in arms control negotiations between the superpowers.

Mr. President, that last observation is much too optimistic. It is obvious that whoever is at fault the arms control negotiations between the superpowers is about as successful as the Edsel. Negotiations have slowed to a standstill. It is even worse. The ABM Arms Control Treaty has become a victim of our onrushing star wars program. If and when we begin production and deployment of star wars hardware, the Antiballistic Missile Arms Control Treaty will be a dead letter.

The President has announced that he has no intention of negotiating an agreement to end nuclear weapons testing. How about SALT II? The second Strategic Arms Control Treaty has already been interred and buried by the Reagan administration. So what is left? Not much. Negotiations continue at Geneva. There may be a superpower summit meeting. From that meeting some kind of arms control agreement may develop. If nothing else it should be easy for the superpowers to agree on measures that would keep both nuclear weapons and nuclear materials out of the hands of terrorists. It should be equally simple to persuade both superpowers to agree to act swiftly and jointly together to punish any act of nuclear terrorism. How could any Russian or American object to that?

## DEFENSE CONTRACTING NEEDS THE SHOULD-COST APPROACH

Mr. PROXMIRE. Mr. President, I strongly support the work measurement amendment adopted last year. It should not be repealed. It should be strengthened, and it should be implemented in an overall should-cost approach to defense contracting. I have been urging adoption of the should-cost approach to estimating and evaluating defense contract costs for many years. Anyone who has studied defense contracting knows that much of it is done on a cost-plus basis. There are cost-plus contracts and fixed price contracts. But even the fixed priced contracts are based on cost-plus principles.

For example, when a new contract is about to be awarded, there is a strong tendency on the part of Government negotiators to accept as the basis of the contractor's cost estimates whatever was spent on the most recent comparable contract. What if the con-

tractor was very wasteful and inefficient in the performance of the prior contract? What if the contractor experienced cost overruns because of mismanagement? What if the contractor's productivity was significantly worse than that of a commercial manufacturer producing comparable equipment?

All of those factors can be and usually are ignored during defense contract negotiations. Typically, Pentagon negotiators do not consider waste, inefficiency, mismanagement, or productivity when contractors' cost estimates or performance are being evaluated. That is why the should-cost approach is vital. If Pentagon negotiators used this approach, they would evaluate a contractor's proposal not on the basis of what it would cost to do the work according to the low-efficiency standards of prior performance, but what it should cost to do the work according to reasonable standards of efficiency.

The Defense Department ought to have the facts about any contractor's efficiency, and it ought to be able to make comparisons between jobs, between contractors, and between contractors and commercial manufacturers.

If Pentagon negotiators had this information and acted on it, it would be possible to bring down contract costs. We have to remember that the defense sector is different from the rest of the economy. Market forces keep commercial manufacturing costs from getting out of hand. If a commercial producer does not control his costs, he is likely to lose his market to a competitor who controls costs and offers a better price. Price competition hardly exists in defense production. Market forces do not impose a cost discipline on defense contractors. If the Defense Department does not insist on a cost discipline, there will be none.

The should-cost approach is a way that the Pentagon can provide a cost discipline for its contractors. Requirements for a work measurement system are a step in the right direction. Without a work measurement system, there is no way to use should-cost techniques. The goal should be to make work measurement a part of a should-cost approach, and to implement the should-cost approach.

Should cost is bitterly opposed by many defense contractors because they do not want measures of efficiency applied to their performance. That is an understandable position, from the standpoint of the defense contractors' special interests. But it is not an acceptable position from the standpoint of the taxpayer's interests.

## SALUTING WISCONSIN'S GREAT NUMISMATISTS

Mr. PROXMIRE. Mr. President, the State of Wisconsin has made many contributions to the numismatic hobby, not the least of which has been people who have generated interest in the hobby far beyond the State's borders. And, for the first time since 1950, Wisconsin will play host to the largest and most eagerly awaited coin convention of the year.

From August 6–10, 1986, Milwaukee will be the site of the 95th Convention of the American Numismatic Association. Wisconsin people over the years have held every elected and appointed office and position in the ANA except for legal counsel. Wisconsin and the ANA share a very interesting numismatic heritage. I do not think any other State can make a similar claim. Let me present a little background on the ANA.

The American Numismatic Association was founded on October 7, 1891. Since that meeting, more than 120,000 persons and corporate members have been listed on the ANA membership lists; and today the American Numismatic Association—a nonprofit educational association—is the largest numismatic organization of its kind in the world.

One of its founders, George F. Heath, M.D., of Monroe, MI, originated the idea of a numismatic convention where members could make personal contacts with fellow numismatists, and exchange ideas and coins. These small-scale meetings were held annually from 1891 to 1895, in 1901, and in 1904. The 1907 Columbus, OH, convention was so successful that it was decided to hold annual meetings from then on. Annual conventions have been scheduled with the exception of the war years 1918 and 1945.

The American Numismatic Association achieved national prominence when, on May 9, 1912, the association was granted a Federal charter, signed by President Taft. Representatives Arthur Kopp, Wisconsin, and William Ashbrook, Ohio, both ANA members themselves, worked tirelessly to get this legislation passed. In March 1962 the ANA was granted perpetual succession.

In the past, the ANA convention's commemorative medal usually depicted scenes of the location of the convention. For the first time in its history, the American Numismatic Association's official convention medal will honor living numismatists. The obverse of the official medal bears the likenesses of Henry O. Granberg, Chester L. Krause, and R.S. "Dick" Yeoman. The legend gives the medal's theme—saluting Wisconsin's great numismatists. The medal was executed by Frank Gasparro, formerly chief sculptor-engraver of the U.S. Mint, who has continued to accept private commissions in his retirement. The reverse is dedicated to 18 additional numismatists from Wisconsin who have had a significant impact on the hobby.

Mr. President, I ask unanimous consent that an excerpt from the July 23, 1986, Coin World newspaper, highlighting these honored numismatists, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

### NUMISMATISTS HAVE WISCONSIN CONNECTIONS

#### BIOGRAPHIES OF HONOREES

Brief biographical sketches outlining major contributions of individuals honored on the offical convention medal follow:

Hawkins Olsen Granberg was born in Norway. He assembled one of the finest cabinets of United States coins which included pioneer gold coins and an 1804 dollar. Granberg served on the board of the ANA and as chairman and president. He also served on the ANA grading committee in 1912 to investigate grading discrepancies. Later in Granberg's life he had an intense interest in mining and acquired several mine claims in Colorado and spent a lot of time there.

Chester L. Krause, who today presides over a publishing firm specializing in hobby publications and books, traces his interest in numismatics to his boyhood in Iola, the small farming community in which his family settled more than 100 years ago. A carpenter/mason by trade, Krause conceived the idea of a monthly classified-advertising publication to serve coin collectors and launched *Numismatic News* in 1952. Later the newspaper became a weekly and he turned to publishing as a full-time business. Today, his firm is Iola's largest employer and publishes periodicals and reference books in the field of numismatics and other collectibles. ANA Life Member No. 318, he received the Medal of Merit in 1967 and the ANA's top honor, the Farran Zerbe Award, in 1977.

R.S. "Dick" Yeoman is best known for his landmark work, *A Guide Book of United States Coins*, whose 40th edition just rolled off the presses in Racine. Dubbed the "Red Book," most collectors look upon it as the "bible" of U.S. coins. Born in Milwaukee, Yeoman began collecting stamps when he was young. His appetite for coins was sparked by his keen interest in history and the fact that his father was a coin collector. He joined Whitman Publishing Co. (then a subsidiary of Western) in 1932, originally working in sales. When the firm purchased the rights to a coin card which it had been producing for a Neenah, Wis., businessman, Yeoman was given the responsibility for developing it. He is generally credited with developing the card into the popular Whitman folder, which put coin collecting "on the map" as one of the nation's foremost hobbies. In 1964 he was appointed by President Johnson to the U.S. Assay Commission, for which he served as chairman when it convened at the Philadelphia Mint.

A.P. "Del" Bertschy is known as Wisconsin's "numismatic dean." At the age of 90, he is still active in numismatics and is "honorary chairman" for the ANA's 95th Anniversary Convention in Milwaukee. He became a collector in the late 1930s and is perhaps best known for heading up more successful Milwaukee coin shows than anyone else over the decades, including several Central States conventions. He and the Milwaukee Numismatic Society were early pioneers with organized coin shows as early as 1941. He has participated in National

Coin Week displays annually since its inception and has served in many numismatic offices over the years, including the presidency of CSNS.

Kenneth E. Bressett is currently director of education for the ANA and formerly served as head of the ANA's Certification Service. For more than two decades he has served as editor of Yeoman's *A Guide Book of United States Coins.* He also arranged and edited with Abe Kosoff *The American Numismatic Association Grading Standards for United States Coins.* A native of Keene, N.H., Bressett's ties to Wisconsin stem from his stint as managing editor of *Whitman Numismatic Journal* and the many collector references he has authored that have been published by the Racine firm.

Colin R. Bruce II is described by many as perhaps having the most extensive grasp of world coinage and currency of any individual today. He began cataloging during his early days as a dealer in New York. He is the single most important force behind most of Krause publications' foreign titles including *The Standard Catalog of World Coins* and *Standard Catalog of World Paper Money,* Observes Kreuger: " 'The tougher the subject, the better' is one way of describing Colin as evidenced by his interest in Indian and Asian issues. His research and coordination abilities have opened untold tens of thousands of numismatic doors for people from all over the world."

Lillard W. Culver, ANA No. 6806, joined the ANA in 1938. He served as president of the Central States Numismatic Society and the Milwaukee Numismatic Society. He received the Central States Award of Merit in 1953. He was a frequent promoter of numismatics through his teaching profession and through National Coin Week activities. He served as general chairman of the 1950 ANA convention in Milwaukee and died in 1962.

Virginia Culver was the first woman president of the ANA. Prior to becoming the organization's 38th president, she served eight years on the ANA Board of Governors. She was a charter member of the Token and Medal Society and her principal collecting interest was in the field of exonumia. She was elected the first woman president of TAMS in 1964 and later served as editor of the *TAMS Journal.* She was the first recipient of the TAMS Medal of Merit and also received the Joseph M. Segal Gold Literary Award and the TAMS Bronze Literary Award for her extensive writings on exonumia. She co-authored with Chester L. Krause the *Guidebook of Franklin Mint Issues.* She was appointed by President Johnson and served on the 1968 United States Assay Commission. She died in October 1985.

Erv Gerber was an early member of the Milwaukee Numismatic Society. He served as MNS president and also served a term as president of Central States Numismatic Society. He was a math teacher and was an avid outdoorsman. In the summer he ran a camp for boys in Canada, which probably was the primary reason for his intense interest in Canadian coins and currency, according to Krueger. Gerber was the chairman of the 1962 Central States Convention. He died in 1978.

Arthur Gordon Gill was the co-founder of the Madison Coin Club in 1934. For nearly 60 years he talked about, exhibited and promoted the hobby at the local, state, regional and national levels. He served as president of the Madison Coin Club and Numismatists of Wisconsin. He served the ANA as a district representative for many years. He died in 1985.

David Harlowe was member No. 6 of the American Numismatic Association. As a young man he was selected to serve as founding treasurer of the ANA. Little is known regarding his collecting interest; however, the Milwaukee-based numismatist was instrumental in guiding the fledgling ANA.

Gale D. Highsmith began collecting in 1930. Over the years his natural curiosity led him to many collecting topics. He is well-known for sharing his insight with his fellow collectors. An engineer by vocation, he has produced many displays and medallic designs over the years. A seven-term veteran of the Milwaukee Numismatic Society's presidential post, Gale was also honored two years ago as one of the top five Numismatists of Wisconsin members at the organization's 25th Anniversary Convention.

Gerald Johnson for more than two decades has been the driving force behind the Numismatists of Wisconsin, serving the state organization in every office over the years. He has edited "NOW News" for most of its existence. A prolific author and exonumia cataloger, he is the recipient of several TAMS literary awards.

Kurt R. Krueger in 1977 became the youngest person to become elected to the ANA Board of Governors in four decades. He currently serves on the ANA Board of Governors and is general chairman of the ANA's 95th Anniversary Convention in Milwaukee. In 1971 he was named ANA's "Outstanding Young Numismatist of the Year" and in 1976 was selected "Outstanding Adult Advisor." He has served in a variety of leadership positions in local, state and regional numismatic organizations, including a term as president of the Numismatists of Wisconsin and various offices in the Central States Numismatic Society. His first book, *Meet Me in St. Louie,* catalogs and evaluates the tokens, medals, buttons, badges and ribbons of the 1904 St. Louis World's Fair. He has served as a contributing editor to a number of catalogs about world coins and world paper money. He formed the Numismatic Editors and Writers Society and the Wisconsin Numismatic Writers Association. His numismatic articles have been published throughout the United States and Great Britain. A coin dealer, he is member No. 295 of the Professional Numismatists Guild Inc.

J.V. McDermott was ANA Life Member No. 135. He was among the best-known men in the hobby from the late '50s until his death in 1966. He was a professional numismatist and is best remembered for his ownership of one of five 1913 Liberty Head 5-cent pieces and his generosity in sharing it with others. Even though it was valued at $50,000—an incredible sum at the time—he frequently made the coin available for display. The current owner, Aubrey Bebee, will have that particular coin on display at the Milwaukee convention.

Clifford Mishler, publisher of *Numismatic News* and co-author with Krause of the *Standard Catalog of World Coins,* is a native of Michigan. He joined Krause Publications based in Iola in 1963. His collecting specialty is medals and tokens, about which he began to compile and publish information in the 1950s. In 1960 he authored *United States and Canadian Commemoratives.* He is a founding member of the Token and Medal Society, was its first curator-historian, became editor of the *TAMS Journal* in 1965 and was awarded the TAMS Medal of Merit in 1966. He became TAMS president in 1976. He was awarded the ANA's Farran Zerbe Award in 1984.

Herbert Polzer was Milwaukee's primary dealer in the 1930's and '40s. He is described by Krueger as an "exceptional numismatist who guided many of the great Milwaukee collectors in the 'right' direction." Polzer operated a jewelry store on Walnut Street in the early 1930s. Over the years he inventoried more and more numismatic material until he finally had one of the best stocks in the upper Midwest. The early meetings of the Milwaukee Numismatic Society were held in his back room. He was a constant promoter of numismatics to both the advanced collectors and interested youngsters. He died in 1981.

J.K. Post was a member of the middle management team of Kimberly-Clark from 1929 to 1940. While not an immediately recognized name, the J.K. Post name is very familiar to collectors of early coin boards. Post designed and held the copyright to the early coin boards which ultimately became albums. His design was marketed widely by Whitman as early as 1934. In the true sense of the word, Post is a creator of the coin album, an item which introduced millions of collectors to numismatics over the years.

Edward C. Rochette is completing his 20th year as a professional staff member of the American Numismatic Association. He joined the ANA in 1966 as editor of its official journal, *The Numismatist,* and became the organization's chief executive officer in 1972. He relinquished his executive duties in August 1985 but remains a paid consultant to the ANA. A native of Massachusetts, his ties to Wisconsin are via his editorship of *Numismatic News* from 1960 to 1966. Among the many recognitions accorded him in more than 25 years of hobby involvement are appointment to the 1965 United States Assay Commission, one of three panelists to select the official U.S. Bicentennial Medal, member of the Advisory Panel, General Services Administration, for the disposal of surplus silver dollars, and American delegate to the Federation Internationale de la Medaille Conference in Florence, Italy. He is a recipient of the ANA's Medal of Merit. His syndicated column, "Coin Roundup" appears in major daily newspapers throughout the United States. His books include *Medallic Portraits of John F. Kennedy* and *The Other Side of the Coin.*

Russell Rulau has devoted some 47 years of his life to numismatics, 21 of which were spent in numismatic journalism. He retired in 1984 as editor-in-chief of *World Coin News* and *Bank Note Reporter* published by Krause Publications. Earlier in his career he served as editor of *Numismatic Scrapbook,* and *World Coins* and also wrote for *Coin World,* all published by Amos Press Inc. Rulau, who continues to reside in Iola as North American representative of the Isle of Man's Pobjoy Mint Ltd., has authored a number of reference catalogs on American tokens and medals. His works include *Early American Tokens, Hard Times Tokens, U.S. Merchant Tokens 1843-1860, U.S. Trade Tokens of 1866-1889,* and *Medallic Portraits of George Washington.* He is credited with having coined the word "exonumia." He is a founder of the Token and Medal Society.

Neil Shafer will introduce at the Milwaukee convention a new publication "devoted to the furtherance of all types of numismatic research:" *The New England Journal of Numismatics,* and will serve as its editor-in-chief. Shafer, of Milwaukee, has been actively involved in numismatic publishing since 1957 when he became associate editor of the *Middle Atlantic Numismatic Association Journal.* He later served as associate

editor of Western Publishing Co.'s *Whitman Numismatic Journal.* At Krause Publications, where he worked exclusively on paper money publications, he served as numismatic editor. He has authored numerous books including *Philippine Emergency and Guerilla Currency of World War II,* and co-authored with R.A. Mitchell the *Standard Catalog of Depression Scrip of the United States.* He is a three-time winner of the Society of Paper Money Collectors' Award of Merit.

Mr. PROXMIRE. Mr. President, I yield the floor to my good friend from Illinois.

□ 1040

## RECOGNITION OF SENATOR DIXON

The PRESIDING OFFICER. Under the previous order, the Senator from Illinois [Mr. DIXON] is recognized for not to exceed 5 minutes.

## THE GRAIN STORAGE CATASTROPHE

Mr. DIXON. Mr. President, there is a catastrophe brewing in the corn and soybean fields in Illinois, as well as in other Midwestern States.

I am not talking about grain prices. We all know they are too low now, and, Heaven forbid, probably will be going lower as we move into harvest.

Mr. President, we have another grain crisis facing us. Illinois farmers and agricultural groups are growing more and more concerned every day because not enough is happening to head off this crisis. The problem is the lack of storage for grain this fall. The Department of Agriculture has been warned for months that this problem has to be met—and met head-on!

If action is not taken—and taken quickly—there is not going to be anyplace to store this year's grain—except on the ground. This is going to be an intolerable situation. Outdoor storage will seriously impair the quality of our grain.

Elevators are full. Farm bins are full. Farmers and elevator operators are expanding storage space, but there is just no way that storage space will catch up with supply.

In short, inadequate storage is a catastrophe just waiting to happen.

My good friend, State Senator Jerry Joyce, who serves admirably as chairman of the Illinois Senate Agriculture Committee, estimates that Illinois grain storage capacity is about 75 percent full. We can dredge up a lot of statistics to back up his estimate, but he keeps such close tabs on the Illinois agricultural scene, that it is not necessary to bore you with those.

Well, Mr. President, I have stated the problem. What can we do about it? The answer to that question, Mr. President, is going to have to come from the Department of Agriculture, which thus far has been extremely slow to take any really meaningful steps to anticipate and alleviate this catastrophe in the making.

Farmers, elevator operators, agricultural organizations and others involved in Illinois agriculture have been appealing to the Department of Agriculture to take a look at the storage debacle.

Time is short. It takes time to load rail cars; it takes time to load barges; it takes time to locate and fill storage capacity available in other parts of the country.

Second, we are all aware of the special problems of the farmers in the South. The Department of Agriculture has announced a limited program of assistance. However, the Department should give careful consideration to whether massive amounts of CCC surplus grain stored in the Midwest could be transferred to the South to alleviate the crisis there. The spontaneous effort by farmers and the private sector to supply hay to hungry cattle serves as a good example of what can be done to help farmers in distress through no fault of their own.

Finally, Mr. President, I suggest that the Secretary of Agriculture immediately convene a small emergency task force devoted solely to the problem of grain storage. This task force should present a plan for coping with this problem within a matter of days, not weeks, Mr. President—not months, Mr. President, but days.

Illinois farmers cannot wait! Midwestern farmers cannot wait! All of us must work together—immediately—to avert this grain storage catastrophe. If we do not, we are not going to see fields of grain this fall; we are going to see mountains of grain. All of us must resolve not to let those mountains of grain materialize.

There is an excellent article in yesterday's New York Times highlighting the grain storage crisis in the Midwest. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MIDDLE WESTERN FARMERS CONFRONT A NEW PROBLEM: NO STORAGE SPACE

(By William Robbins)

KANSAS CITY, MO., Aug. 3.—Already beset by heavy debt and low prices, many Middle Western farmers are now facing a grain storage squeeze of historic proportions.

From giant terminals along the region's major waterways to smaller rural warehouses and even to make-shift bins and converted tool and equipment sheds on many farms, nearly every available space in many corn-growing states, experts say, will soon be overflowing with the bounty of two successive bumper harvests.

It is a situation that presents many farmers with difficult options, economists, farmers and grain dealers say. Those who have grown more than they can house can either dump grain onto a glutted market, accepting heavy losses from distress prices, or put their surplus production either in makeshift shelters or in unprotected heaps on the ground, risking spoilage.

"WORST STORAGE SITUATION"

"It is going to be the worst storage situation we have ever seen in the history of this country," said Merrill Marxman, a consultant who until recently was a commodities administrator at the Federal Agricultural Stabilization and Conservation Service.

"We will make it," he continued. "We always do. But we won't make it this year without a lot of grain on the ground."

Government moves, such as shipments of surplus grain to Southern and Middle Atlantic states afflicted with drought and the sale of subsidized wheat to the Soviet Union, may alleviate the problem, but critics have described the efforts as too little and too late.

Farmers and grain handlers voice concerns similar to those of Mr. Marxman. "It just scares the heck out of me," said Dick Thomas, manager of a cooperative grain elevator in Bement, in eastern Illinois, not far from Decatur. "It could be that a year from now we'll still be looking at grain piled on the ground."

His elevator's capacity is for 4.5 million bushels of grain, Mr. Thomas said, and he is building a new silo for 400,000 more and setting up temporary storage platforms for 1.2 million bushels. But even the new space will have to be rationed, he said.

"We're taking in 60 percent of their corn and 60 percent of their soybeans, and that's all we can handle," Mr. Thomas said. The farmers can deal with the excess, he said, by building new bins on their farms, heaping their excess grain in the ground or on makeshift outdoor platforms or hauling the harvest directly from the fields to glutted markets.

The risk of exposing unsheltered grain to the elements would be minimal in a cold and dry winter, experts say. But a moist winter with wide swings of temperature could cause substantial spoilage.

Melvin Balster, 63 years old, is one who has already been forced to rush to market, he said the other day as he waited to empty his truckload of grain at the Madison Farm Service grain elevator at Edwardsville, on the other side of the state.

The farmer was emptying the bins on his farm of last year's corn while there was still space enough in the local elevator to hold it. But after a summer of ideal growing weather, the bountiful crop his land is now producing will overflow the vacated space. "I'll just have to take it straight to market," Mr. Balster said, "and take whatever they will give me."

Selling under such circumstances is likely to result in a price drop of 50 to 60 cents a bushel, Mr. Balster said. Prices are already depressed to a level substantially below last year's prices, which varied around $2.30 a bushel in his area.

In a nearby field, Mr. Balster's neighbor David Grotefendt, 33, illustrated one reason for the storage problem. As he stood beside eight-foot-tall stalks, he peeled back the husks of a corn ear to reveal heavy kernels covering the cob to its tip.

SLUGGISH SALES AND BIG CROP

Last year, his 420 acres of corn averaged about 160 bushels an acre. "I thought that was good," Mr. Grotefendt said. "But this corn is going to run 170 bushels to the acre."

Such yields, while welcome to the farmers who produced them, are a price-depressing element of a complex national farm picture.

It is a situation that began to develop in 1982, with bumper grain harvests at a time when exports were beginning to decline.

Then as now, despite a long buildup in storage capacity on farms as well as at grain dealers' terminals, sluggish sales and a big crop produced a space crunch.

Prices plunged and farmers complained. The Reagan Administration responded in 1983 with a novel plan under which farmers who agreed to reduce their 1983 plantings received grain from Government stockpiles, which many sold on the open market and others used to feed their livestock.

1985 CORN CROP WAS BIGGEST

But the planting cutbacks promoted by this payment-in-kind program coincided with a severe drought. The reduced American supplies and rising prices that resulted encouraged foreign competitors to increase production and undersell American farmers. Declining exports have been blamed for many of the current problems on the farms.

The decline in exports accelerated in 1985 at a time when the United States was again producing bumper harvests, including a corn crop of nearly 8.9 billion bushels, the biggest ever.

Much of that corn wound up in storage under a Government price-support program, in which farmers pledge their crops as collateral for what are known as price-support loans. In the case of corn, they were able to get loans of $2.55 a bushel from the Government.

The idea is that, if prices should rise, farmers can pay off the loans, redeem their crops and sell them.

GRAIN COLLATERAL FORFEITED

The problem now is that prices have remained low. Loans made last October are coming due, farmers are forfeiting the grain, the Government is taking it over, and it is being moved into storage in commercial space that normally would be used for the bumper corn crop that is now maturing.

The Government demand for space is often leaving little room for farmers, as several grain dealers noted the other day. "We have 22 million bushels of capacity," said Joseph Allen of the Consolidated Grain and Barge Company of St. Louis. "But if you asked us today for space for the fall harvest, we couldn't promise you an inch."

Craig Huss, manager of an Archer Daniels Midland terminal at St Louis, said, "We are committed to the Government," adding, "We have no space to offer for new-crop corn."

About four billion bushels of last year's corn will still be on hand when this year's crop comes in, noted Conrad Leslie, a Chicago grains analyst.

RISING ESTIMATES ON NEW CROP

Meanwhile, ideal growing weather keeps raising expectations on the new corn crop. Until recently, experts were expecting about 7.5 billion bushels.

Now, "my seat-of-the pants estimate," said Mr. Leslie, "is a crop of about 8.2 billion bushels."

Timely rains, he noted, have given Iowa, the leading corn producer, crop conditions that are rated good to excellent across 95 percent of its fields, while 99 percent of the crop in Illinois, the No. 2 state, is rated good to excellent. Similar conditions prevail in other corn belt states.

The magnitude of the storage problem was illustrated recently by data assembled by Mr. Marxman's consulting firm. He said 14 states would have more grain after the fall harvest than they will have space to put it.

California, for example, will have 89 million bushels more in grain and soybeans than it has storage space. Illinois's space deficit is put at 115 million bushels; Indiana, 205 million; Michigan, 64 million; Missouri, 99 million, and Ohio, 121 million. Mr. Marxman's figures indicate adequate space in Iowa and Nebraska.

Government steps may alleviate the situation somewhat. On Friday the Reagan Administration said it would sell subsidized wheat to the Soviet Union and, responding to the drought in Southern and Middle Atlantic states, would supply some surplus grain and financial aid to help save livestock.

Senator Tom Harkin, Democrat of Iowa, expressed skepticism that the drought region could provide storage enough to make a difference in the Middle West's space crunch.

The Agriculture Department has also approved use of emergency storage, such as idle barges and rail cars, as well as outdoor platforms for its own grain. The use of more than 1,000 barges, for example, has been approved for the purpose.

But that will take care of only 50 million bushels, Mr. Marxman noted. "Last week's growth gave us more additional corn than that," he said.

Mr. DIXON. Mr. President, I note the absence of anyone else in the Chamber to proceed with a special order. How many minutes does this Senator have remaining?

The PRESIDING OFFICER. The Senator has 30 seconds remaining.

Mr. DIXON. Mr. President, may I proceed with another statement in the absence of any other Senator?

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIXON. I thank the Chair.

## THE ARMY NEEDS TO GET ON WITH AIR DEFENSE

Mr. DIXON. Mr. President, I would like to take a few minutes to inform my colleagues of the status of a critical defense mission in the Army—that is air defense. This is a matter of particular concern to me because of my work last year on the Divad air defense gun. Senator GOLDWATER asked that I specifically study the Divad system and report back my findings to the Armed Services Committee. I went to Fort Bliss, TX, the headquarters for air defense in the Army. I spent a long day in briefings on air defenses and went to the test range and fired the Divad gun.

It was apparent to me from that moment that the Divad gun was in deep trouble. The gun jammed while I was firing it. But more than that, it was a complex system that was difficult to operate.

I returned from that visit convinced of two things. I was convinced that the Army needed improvements in the air defense area. We need more capability than we have today, and the situation today is very serious. Second, I was convinced that we should not proceed with the Divad system until thorough testing had been completed and the system had passed those tests.

In the Armed Services Committee, I sponsored an amendment which restricted the continued funding of this program until all of the testing was completed. As a member of the House-Senate conference committee, I worked to craft the strongest restrictions ever imposed on the Divad system.

The Divad gun was subjected to detailed tests, and everyone knows now that it failed those tests. Secretary Weinberger, to his credit, terminated the program last August.

I think that was the correct course of action. But now we need to return to my first concern, and that is the need to get on with the business of modernizing our capabilities for air defense for the Army.

During the past year, the Army has conducted a comprehensive review of the air defense problem. The Army has developed a fivefold program to address the problem. The components include:

Systems for the forward combat zones to defend against helicopters and fighters that are in the direct line of sight of U.S. forces;

Systems for attacking helicopters that are hovering behind hills and cannot be seen, but which can attack forward forces suddenly;

Improvements for other existing combat systems, such as tanks and helicopters, to give them capabilities in the air defense area;

Air defense systems for areas behind the forward combat zones; and

Improved command and control systems—the brain and nervous system—to bind together this network of capabilities.

Mr. President, the Divad system would have fit in the first component of this five-component program. The Army had other programs underway for the other components. I should note that this is not an inexpensive undertaking. Altogether, this combined program would cost over $11 billion. My colleagues will remember that Divad alone cost $4 billion plus, but the cost of the other related systems were not included in that estimate. The combined requirements of the earlier program roughly equal the combined cost of the current Army plan.

Having said that, Mr. President, I do not completely exonerate the Army in its search for a new effective air defense system. I believe the Army is spending far too much time flailing about looking for a "son of Divad." The search for the son of Divad is holding up the rest of the air defense program.

I believe that the Army should place immediate emphasis on proceeding

with certain components of the air defense program. I specifically urge the Army to press forward vigorously with the pedestal mounted Stinger program and with the command and control programs. The pedestal mounted Stinger is the system designed for rear area air defense and can be an important intermediate system for use in the forward combat zones. The command and control systems are the indispensable framework that will make the entire system work. This approach should enjoy much greater priority with the Army and DOD.

Together, these two components are the key to prompt, responsive, and capable air defense systems and will be the core of any comprehensive program. The Army should spend less of its time searching for Divad's replacement and more time getting on with these critical components to the air defense problem.

□ 1050

Mr. President, I would conclude by noting that the bill reported by the Armed Services Committee has specific proposals for expedited procedures for acquisition of new systems. Under the label "defense enterprise programs," this bill establishes the framework for shorter, more responsive lines of authority and responsbility for program managers, and more stability in funding within DOD by Congress. This is a key feature of the recommendations of the Packard Commission.

I mention this, Mr. President, because I strongly support these initiatives, and I believe they are very well suited to use for the pedestal mounted Stinger program. I encourage the Army to look at this as a candidate system for designation as a defense enterprise program this year.

Mr. President, I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the role.

The assistant legislative clerk proceeded to call the roll.

Mr. WILSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## CALIFORNIA JURIST SUPPORTS JUSTICE REHNQUIST

Mr. WILSON. Mr. President, many people have entered the fray over the nomination of Justice William Rehnquist to be Chief Justice. Unfortunately, despite his broad and distinguished record established over a 15-year tenure on the Court, some in the liberal community have labeled him "too conservative" to serve as Chief Justice; that he is "too extreme"; that he does not properly appreciate the rights of the individual as set forth in their view of constitutional guarantees.

To those who have uttered such criticisms, I commend the distinctly different views of a celebrated liberal jurist, one well known in my State. Those who are inclined to oppose Justice Rehnquist on those grounds would do well to read the views of a very well-known liberal jurist from California, State Supreme Court Justice Stanley Mosk.

Justice Mosk states that he would vote to confirm Justice Rehnquist as Chief Justice because "he is a thoroughly competent craftsman and a thoughtful legal scholar."

Mr. President, I ask unanimous consent that the Los Angeles Times article by Justice Mosk, which appeared on July 30, 1986, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Los Angeles Times, July 30, 1986]

A LIBERAL FOR REHNQUIST—HIS FEDERALISM SERVED THE CAUSE OF INDIVIDUAL RIGHTS

(By Stanley Mosk)

My good friend Pat Brown, for whom I have the utmost respect and affection, put his foot in his mouth the other day. While advocating retention of all justices on the California Supreme Court regardless of their philosophy or political origin, the former governor confessed that he would oppose William H. Rehnquist's nomination as chief justice of the United States. Why? Because Rehnquist is too conservative. Inconsistent? Well, yes, Pat conceded with his characteristic and lovable candor.

I must respectfully disagree. If I were in the Senate, I would vote to confirm the nomination of Justice Rehnquist. Though I have often found fault with his conclusions, in my view he is a thoroughly competent craftsman and a thoughtful legal scholar. The concepts that he advances, though often not to my taste, deserve to be ventilated and discussed.

It is assumed that Rehnquist is a diehard reactionary whose philosophy is totally out of step with modern reality. A thoughtful appraisal of his opinions does not confirm that assumption, at least not all of the time.

The Warren court, perhaps encouraged by the civil-rights movement of the 1950s and '60s abandoned the previous pathetic approach to overt injustice in our society and elected to employ the federal Constitution to achieve a liberating effect in the areas of political opportunity, criminal justice and racial equality. The states were compelled to fall in line, often reluctantly.

The Burger court, however, appears to have abandoned the role of keeper of the nation's conscience. There have been numerous retreats in the use of the Constitution to advance individual rights.

As a result, states have faced a difficult choice. They could react to the ebb and flow of the tide on the Potomac, and also reduce protection of individual rights. Or they could abandon dependence on the federal Constitution, and employ state constitutions as authority for preserving expanded rights. Many states, including California, opted for the latter. Indeed, the California Constitution provides that "Rights guaranteed by this Constitution are not dependent on those guaranteed by the United States Constitution."

Some conservative politicians, disturbed at the use of the state Constitution to provide greater individual rights than the high court required, used the initiative process to compel California courts to employ only the federal charter in criminal cases. Nevertheless, the principle of federalism is still adopted whenever possible, so that the federal Constitution sets the floor below which individual rights may not fall, but the state establishes the ceiling.

This problem came to the attention of Rehnquist and his colleagues in a significant context. Where two constitutional rights conflict, which is to prevail? If a few orderly persons seek signatures on political petitions in a privately owned shopping center and the owner seeks to bar them, this conflict arises. The citizens are asserting their freedom of speech and their right to petition the government for a redress of grievances. The shopping center's owner is defending his right to determine the use of his private property.

In the case of Robin vs. Pruneyard, the state Supreme Court said that the rights of the petition circulators should prevail as long as there was no interference with the business of the shopping center. The case went up to the federal Supreme Court.

In this conflict between free speech and private property rights, where was Rehnquist? Forthrightly on the side of free speech and, more significantly, in defense of the right of the states to define the limits, if any, on speech and related activity. His court, he wrote, "does not limit the authority of the state to exercise its police power or its sovereign right to adopt in its own Constitution individual liberties more expansive than those conferred by the federal Constitution." This was true federalism.

It was interesting that some of his colleagues took a more conservative approach. Justices Lewis F. Powell Jr. and Byron R. White asked: What if the speakers advocated views seriously antithetical to the owner, as, for example, Ku Klux Klan Spokesman invading a shopping center owned by a black? A provocative question, but fortunately that issue was not involved in the Pruneyard case.

In the recent session of the court, Rehnquist demonstrated his concern for the environment. In Japan Whaling Assn. vs. Baldridge, he joined with Justices Thurgood Marshall, William J. Brennam Jr. and Harry A. Blackman in a dissent that excoriated President Reagan's secretary of commerce for not enforcing congressional regulations concerning the protection of whales.

I could cite other examples of Rehnquist opinions that would satisfy, or at least not offend, traditional liberals like Pat Brown. But, if I did, I would be falling into his error of weighing competence on the basis of agreement with case results.

The bottom line is that William Rehnquist has the academic background and the judicial experience to justify his elevation to chief justice. The quality of his opinions amply demonstrates judicial competence.

Yes, Pat Brown, you were wrong. Liberals can support the confirmation of Justice Rehnquist

Mr. WILSON. I thank the Chair. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative called the roll.

□ 1100

Mr. BAUCUS. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER (Mr. KASTEN). Without objection, it is so ordered.

## RECOGNITION OF SENATOR BAUCUS

The PRESIDING OFFICER. Under the previous order, the Senator from Montana [Mr. BAUCUS] is recognized for not to exceed 5 minutes.

## UNITED STATES PRODUCTIVITY

Mr. BAUCUS. Mr. President, this country is facing a crisis of competitiveness. And if there was ever any question about that, we received dramatic evidence of it just the other day.

A few days ago, the Bureau of Labor Statistics released a report on U.S. manufacturing labor productivity, output produced by an American worker per hour.

To be sure, our labor productivity in the manufacturing sector has increased over the years. The BLS figures show that, between 1960 and 1985, U.S. labor productivity in manufacturing industry increased at an annual rate of 2.7 percent.

On its own, 2.7 percent does not seem to be too low a figure. A 2.7 percent annual increase means that the productivity can be doubled within 27 years.

However, compared with other countries, our 2.7 percent is pitifully low. Within the same period, Japan registered an average growth rate of 8 percent, nearly 3 times the U.S. figure. Whereas it takes the United States 27 years to double its labor productivity, it takes Japan only 9 years.

Some might think Japan is an exception. It's not. Of the 12 major Western countries studies by the Bureau, the United States has the lowest growth rate.

Even Britain, which some view as an empire in decline, boasts a higher rate of 3.6 percent.

Productivity figures are not some abstract, academic conceptions. They affect jobs; they affect manufacturing; they affect the money we put in our pockets. They affect our standard of living.

Because of the low productivity, many jobs have been lost. Since 1979, U.S. manufacturing jobs decreased by 7.5 percent. Japanese employment has increased by 10.5 percent.

Because of the low productivity, our manufacturing output has also increased at a much slower pace than most other countries.

Between 1950 and 1985, manufacturing output in the United States grew by 132 percent. In Japan, the comparable figure is a staggering 815 percent. Almost 8 times more.

Because of the low productivity, we are no longer able to provide pay raises for our workers. According to the New York Times, the average annual pay raise after inflation for nonfarm workers was 2.5 percent in the 1950's. In the next decade, the percentage dropped to 1.7 percent. The 1970's witnessed an even bigger dive: the pay raise was merely 0.2 percent a year.

Tiny as the raise was, it was still a raise. But since 1980, U.S. nonfarm workers not only have not had any raise at all; they have actually suffered a net cut in pay of 0.3 percent per year.

This trend must be reversed. Make no mistake about it: If we do not increase productivity, we will be an empire in decline ourselves.

Mr. President, the more I look at our competitiveness problems, the more strongly I feel that our Nation must wake up to the fact that we are rapidly losing our No. 1 position in the world. If nothing is done about it, we will soon become a second rate nation.

To get U.S. industry back on its competitive track is a national endeavor. We in Congress can alter our country's course.

For this reason, I introduced the Young Commission Act several weeks ago. That bill incorporated several of the excellent recommendations of the President's Commission on Competitiveness, the Young Commission. I hope more of the recommendations of that Commission will be adopted.

If we do not, we will leave future generations of America a legacy of declining productivity and declining living standards.

That is a legacy we must not accept.

□ 1110

Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1130

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## NATIONAL HOSIERY WEEK

Mr. HELMS. Mr. President, the week of August 10-16 marks the 15th annual observance of "National Hosiery Week." Inasmuch as Congress is scheduled to be in recess part of that time, I choose this time to take note in advance of this upcoming event, and to pay my respects to an industry that has played an enormously important role in the free enterprise system of our Nation.

It often occurs to me, Mr. President, that the textile and apparel industry is too often taken for granted by the American people. This has been a tragic mistake; this is an industry that needs and deserves the support of all Americans at this difficult time.

Consider, for example, that in many instances hosiery manufacturers are the major employers in their communities, and that the average hosiery company is a small or medium-sized business. Many of them are family owned. Most are in the smaller towns and cities of America.

Mr. President, National Hosiery Week is of special significance to me since North Carolina is the leading textile State in the Nation. I am proud that 56 percent of all American-made hosiery is produced in North Carolina. Incidently, the average hosiery plant produces about 9 million pairs a year, and employs an average of 161 workers.

Like other sections of the American textile and apparel industry, the hosiery industry today is facing import competition. Statistics show that imports of foreign hosiery in 1985 were 68 percent greater in units than in 1984.

The hosiery industry is doing everything it can to counter these imports by improving productivity in the mills, by investing in new and more efficient machinery, by continuing to stress the best styling of product, and by sharpening the industry's marketing skills.

These manufacturers provide revenue for operating State and local governments, family incomes, employment for the local residents, tax revenue from their incomes, lowered unemployment, less crime—by providing jobs—and industrial development where there might otherwise be nothing.

Mr. President, North Carolina is proud of its distinctive leadership in the hosiery industry, and we are grateful for the fine quality of life this industry has provided for so many people.

On behalf of my fellow North Carolinians, I extend my sincere thanks and congratulations to the hosiery industry for the outstanding job it is doing for the people of our State and Nation.

## SUPERFUND: A HAZARDOUS WASTE OF TAXPAYER MONEY

Mr. HELMS: Mr. President, in September the Senate is likely to consider the conference report to S. 51, the Superfund Reauthorization Program. Before Senators revisit this issue—which, incidentally, will authorize $8.5 billion—I suggest they take note of the remarks by Fred L. Smith, Jr., in his

article entitled, "Superfund: A Hazardous Waste of Taxpayer Money."

Mr. President, Mr. Smith hits the nail on the head. This Congress needs to clean up the Superfund Program before it can expect Superfund to clean up America's dump sites. Blindly throwing money at a program that is not working, Mr. President, is just plain irresponsible. The taxpayers deserve better, Mr. President. We should face up to our responsibility.

Mr. President, I ask that the text of Mr. Smith's article appear in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

SUPERFUND: A HAZARDOUS WASTE OF TAXPAYER MONEY

(By Fred L. Smith, Jr.)

House and Senate conferees are nearing agreement on an $8.5-billion, five-year reauthorization of the Superfund law (the Comprehensive Environmental Response, Compensation and Liability Act of 1980). Such a massive expansion of federal toxic waste cleanup efforts promises to unleash the largest pork barrel program in history, expend great sums to little result, and preempt more effective solutions to the problems posed by abandoned chemical dumps.

If this bill is enacted, the Reagan Administration will largely be to blame. The Environmental Protection Agency (EPA) and the White House have been remarkably feeble in challenging the hysterical zero-risk, antibusiness, technology-fearing advocates of this legislation. Instead, they have retreated into a defensive shell. Rather than opposing the waste cleanup legislation as bad environmental policy—regardless of its pricetag—White House officials have argued for a lower reauthorization increase (from the current $1.6 to $5.3 rather than $8.5 billion) and have quibbled over the proposal to finance Superfund with a new, broad-based business tax.

In addition, the Administration has provided conflicting signals to Congress—threatening a veto if the funding level, tax problems and liability rules aren't corrected, while simultaneously allowing EPA to send Congress a threatening letter of the "We're going to close the Washington Monument" variety unless new legislation is soon enacted. Its inconsistencies and failure to challenge the overall program have once again made it easy to caricature the Administration as an anti-environmental, pro-business penny-pincher standing in the way of congressional defenders of American health and safety.

Enactment of this bill would provide dramatic evidence of the failure of the Administration to develop any coherent approach to environmental policy.

As detailed below, the Administration knows full well that:

(1) Superfund stems from a total misreading of the Love Canal incident (a situation where private protections were thwarted by public mismanagement),

(2) The magnitude of health risks addressed by Superfund are small to non-existent,

(3) The legislation contains few features designed to target funds to the more significant cleanup sites,

(4) The liability provisions encourage a "no-fault" concept that undermines the basic principle that polluters—not the innocent taxpayer—should pay pollution costs.

(5) The new taxes embodied in this bill constitute a serious threat to the business community, and

(6) The bill will preempt far more effective solutions to the problems posed by hazardous wastes.

For these reasons, the Administration should veto the proposed Superfund reauthorization bill, accept a short-term interim extension of the program, and seek aggressively to reframe the Superfund debate in the 100th Congress. Environmental policy is far too important to be transformed into another public works boondoggle.

ORIGINS OF SUPERFUND: LOVE CANAL DISASTER

Superfund from its beginnings has been little more than a Superfraud. Launched in 1980 as a hastily concocted response to the Love Canal incident, the program is founded upon erroneous assumptions about the cause and nature of the hazardous waste threat.

Love Canal was an area near Buffalo in which the Hooker Chemical Co. had once discarded toxic chemical wastes. As chemical substances from the waste disposal site began to leach into the water table and infiltrate the soil in the surrounding residential community, the national media learned of the event and the "Love Canal Disaster" was born.

The EPA leadership seized upon this incident to garner political support for their then-languishing Superfund legislative proposal. EPA contracted for a "quickie" medical survey which appeared to show increased health risks for Love Canal residents and released these results at an "emergency" press conference covered by all the major television networks.

Americans were bombarded with powerful media images of oozing, noxious chemicals juxtaposed with nervous, concerned families. Love Canal and "chemical threats to your health" became national concerns and Superfund was approved by Congress.

Moreover, Hooker Chemical seemed the perfect corporate villain, with its "no comment" response to the adverse publicity. Once more (so it appeared), a private firm motivated only by short-term profits had sought to economize by dumping deadly waste on an innocent and unsuspecting citizenry. The market having failed, so went the argument, the Superfund Act should be implemented as swiftly as possible.

As detailed in an investigative story by the Reason Foundation ("Love Canal: The Truth Seeps Out"), and as was known at the time to EPA, Hooker Chemical had no direct control or responsibility for the incident. In 1953, Hooker was forced, under threat of eminent domain, to deed over the site to the local school board, which wanted the land for a new school.

Hooker protested the land transfer. It argued that a hazardous waste disposal site was no place for a school. The company gave way only after further pressure from local officials and acknowledgment in the deed transfer document that the school board had been warned of the chemical wastes buried on the site.

At the time of the transfer, Hooker had taken considerable care in disposing of its waste materials. The company placed them in a clay-lined trench (the former canal) which was then capped with an additional four feet of clay. Today, such a landfill would probably receive EPA operating approval. Hooker undertook such relatively expensive precautions because, as a private property owner, it feared eventual damage claims if its wastes ever came into contact with third parties.

Thus, private ownership of a potential hazard in a litigious society seemed to perform exactly as we might hope—a private party acted in a publicly responsible manner to protect its own self-interest.

On the other hand, the local school board politicos of Niagara Falls—as "public servants"—had few concerns about being sued and thus felt free to ignore any problems their carelessness might create.

Thus, the board began its school, but soon found that declining school populations required less land than originally anticipated. Acting more like stereo-typical rapacious capitalists than disinterested public servants, the board then sought to sell the remaining land (including the dump site itself) to a residential developer. Despite Hooker's repeated warnings that the site contained potentially life-threatening materials and should not be used for residential housing, the board eventually found a local realtor unaware of the controversy and swiftly transferred the hot potato to him.

Unlike Hooker, neither the school board nor the unaware new owner concerned himself with preserving the integrity of the landfill. Much of the clay cap was scraped away, at first during construction of the school and then again for a housing development. Sewers and roads to serve the latter were allowed to be built through the site itself.

All these activities eventually combined to allow the buried hazardous materials to leach from the disposal site into the surrounding water table, thereby triggering the Love Canal "disaster" story.

The real facts of Love Canal contradict the "evil capitalist" myth. When a private company (Hooker) owned the property, it was seriously concerned about the long-term consequences of its activities, and justifiably so, since it expected to be around for many decades and was fully aware of potential legal claims that could be brought against the firm.

On the other hand, political officials obsessed with the short run (holding down tax assessments) and having little concern over possible financial liability proved irresponsible guardians of public safety.

The neglected lesson of Love Canal is that it actually showed how private property rights encourage consideration of low-probability, long-range risks. But the "conclusions" promoted by Superfund advocates and the national media were that the free market had failed to handle the hazardous waste threat and a major new federal program was essential.

THE HEALTH HOAX

Love Canal convinced Americans that hazardous waste dumps posed a serious health risk and required an immediate, emergency response. Yet followup studies at Love Canal turned up no evidence of abnormal levels of morbidity or mortality.

For example, a distinguished panel of scientists appointed by New York Gov. Hugh Carey reported in October 1980 that "there has been no demonstration of acute health effects linked to exposure to hazardous wastes at the Love Canal site. The panel has also concluded that chronic effects of hazardous waste exposure at Love Canal have neither been established nor ruled out yet."

A study by the New York State Department of Health published in the journal Science in June 1981 concluded: "Data from

the New York Cancer Registry show no evidence for higher cancer rates associated with residence near the Love Canal toxic waste burial site in comparison with the entire state outside of New York City."

In June 1983, the Center for Disease Control (CDC) noted no excess illness among persons living close to the Love Canal. Another CDC report in March 1984 found "no increase in the frequency of chromosomal abnormalities . . . of residents in the Love Canal area."

The hysteria and political pressures that have led to the rapid expansion of Superfund reflect an extremely successful effort to repackage a traditional pork barrel program as a human health and cancer prevention measure.

Superfund defenders have convinced a lot of Americans that we are dealing with emergency situations and any effort to correct the program's problems will intolerably slow down urgent cleanup efforts. Unfortunately, such voodoo environmentalism remains largely unchallenged.

For many hundreds of years, mankind has produced waste materials that, if improperly handled, could create health problems and reduce the quality of the environment. The early dye works involved noxious chemicals, as did the alchemist shops of the Middle Ages. Superfund is predicated on the belief that this hazardous waste problem has reached crisis proportions and now poses an unusually severe risk to human health and the environment. The Superfund program embodies a sense of urgency in which normal requirements of proof and cost-benefit analysis are suspended. The house is on fire and there is no time for careful consideration.

Yet we really know little about the quality of underground water in the United States, and even less about the actual health hazards that might arise from toxic waste dumps. Six years after Love Canal, we still don't know which toxic materials in what doses are dangerous to human beings, not whether these dosages are likely to occur given groundwater flows and normal countermeasures.

Evidence that hazardous materials in dump sites have migrated into groundwater and damaged human health has been difficult to produce. The original Superfund legislation charged the Department of Health and Human Services with investigating such toxic health hazards, but almost nothing has been done (in keeping with a long tradition of self-ignorance directing federal environmental policy).

The health threat of greatest salience in fueling reflexive support for Superfund is cancer, which accounts for about one-fourth of all deaths in the United States. But to the best estimates now available, lifestyle factors such as smoking, diet, and sunshine exposure account for the overwhelming portion of all cancer fatalities.

The small fraction of cancers attributable to man-made chemicals via all modes of exposure—both workplace and environmental—is perhaps 6 percent. Since the levels of exposure are likely to be far higher in occupational settings, there is little evidence to date that environmental levels of contamination are at all linked to human cancer.

Even using a common estimate that about 1 percent of all cancer can be traced to environmental pollution, one must recognize that such a figure includes pollution from airborne carcinogens, from surface contaminants, from food additives, from pesticide residuals, and other sources. Only a fraction of such risks can be associated with groundwater contamination. Superfund thus addresses a tiny speck of the cancer problem in the United States.

Moreover, there are no data that cancers caused by manmade substances are increasing. Epidemiological evidence, of course, cannot absolutely rule out the possibility of future risks from manmade substances; however, existing data coupled with the lack of any evidence of higher cancer incidence in Europe (where hazardous chemicals have a much longer history) suggest that any such risk is small. Indeed, growing research indicates that mankind actually lives, and has lived for thousands of years, in the midst of many natural carcinogenic materials. The argument that human beings are at risk primarily from novel, manmade chemicals (appealing to nostalgic fanciers of preindustrial society) now appears to be dead wrong.

Since the human health benefits from Superfund appear small, the case for a massive federal program in this area must rely on its value in protecting vital groundwater supplies. Certainly, some wastes are leaching into some acquifers which somewhat reduces their utility and such damages should be disciplined. However, here as elsewhere, data are extremely limited on the extent to which acquifers are actually threatened. There is certainly no evidence that hazardous wastes are a major or even significant threat in comparison to other factors endangering this vital resource: excessive depletion (allowing saltwater contamination, for example), government subsidized water supply (encouraging waste), government subsidized development (threatening water sheds), and the inefficient ownership rights which make it difficult for individuals to manage this resource privately.

Even in the area of contamination, the major health risk continues to be "natural" bacterial and viral contamination of water supplies, rather than chemical waste contamination. These risks are managed in a decentralized fashion, with each water supplier and each individual well user taking precautions directly. Nonetheless, there is no federal Sanitary Waste Superfund dedicated to digging up abandoned outhouses throughout the United States. (At least not yet.)

The health threat from hazardous waste sites addressed by Superfund appears small. What little we know suggests that any massive expansion of Superfund based on health reasons is unjustified.

### HAZARDOUS WASTE CLEANUP: POLITICAL GROWTH INDUSTRY

Despite the deliberate misreading of the Love Canal incident and its human health consequences, Congress rapidly enacted the Superfund legislation to address "emergency" cleanup situations and orphan dumps and provided an initial funding of $1.6 billion. The program promised to make hazardous wastes "go away," at no cost to local communities. The federal government pays 90 percent, and the state picks up the remaining expense. To the local citizenry, Superfund is a "free good" of all benefit and no burden. Naturally, the program has become extremely popular.

The number of sites "needing" attention has increased from the initial 400 priority sites (about one for every congressional district) to EPA's current estimate of 2,000 such locations. Superfund's sponsors further encouraged this feeding frenzy by avoiding any clear definition of starting or stopping rules in addressing risk management responsibilities, site selection, and determination of appropriate cleanup strategies.

The Superfund Act provides very little guidance on how serious threats are to be distinguished from mere nuisances. Under Superfund, hazards include any materials that are flammable (e.g. charcoal lighters), toxic (insecticides), corrosive (Clorox or Oven Off), or reactive (Drano—or any substances that EPA designates as hazardous. Moreover, the legislation suggests and EPA has adopted a definition of "hazardous" that gives considerable weight to extremely unlikely situations. If something might happen, Superfund assumes it will happen. Under this worse case analysis, too many sites are classified as "hazardous" even though, as noted above, the evidence suggests that the overall human risk associated with all chemical wastes is low.

Since Superfund fails to target the most serious problems, EPA finds itself selecting projects based on their political and public relations value. In case after case, EPA has rushed to spend money for "cleanups" where the threat to health has been low to non-existent or where responsibility could obviously be assigned. In Times Beach, Missouri, for example, EPA purchased all the homes in the area for $30 million on the basis of studies finding dioxin contamination of soil in the area. Experimental animal studies do show dioxin to be extremely toxic; however, as is often the case, animals respond differently from humans, and there is no evidence that any humans have ever suffered any chronic health problem from exposure to this substance. That finding is based on epidemiological studies of industrial accidents in which exposures have been many times those encountered at Times Beach. Elizabeth Whelan in her book Toxic Terrors noted, "Times Beach, like Love Canal, is an environmental fiasco. Decisions and subsequent actions were based as much on political considerations as on public health realities". A recent Scientific American article on the dioxin scare noted:

"What the agency [EPA] has not done—and might be said to have a responsibility to do—is to try to dispel the public's fear on the basis of the evidence that exposure to low concentrations of TCDD (dioxin) in the environment appears not to have a serious chronic effect on human beings."

EPA might have taken such prudent actions, but given the value of scare tactics to an expanding Superfund budget, we can understand why it did not.

Superfund has also encouraged communities to seek federal funding rather than go after responsible parties. After all, the program was originally intended to clean up a small number of "abandoned, orphan" sites. However, as the Love Canal incident indicates, EPA has made Superfund monies available whenever penalizing the polluters (the public officials in that case) would be politically difficult. As a result, Superfund's "priority" list now includes a number of sites operated by viable companies and even by the Department of Defense.

The "worst case" criterion for risk assessment also encourages EPA to add low-risk sites to the Superfund program. James Bovard, an investigative journalist, identifies one site, an inactive city dump in Windom, Minnesota, that was closed in 1974. As one would expect, the wells on site were indeed contaminated, but Bovard notes that EPA found that off-site municipal and residential wells were not. Nonetheless, the site was added to the "priority" list. Bovard

notes: "If finding of noncontamination justifies adding this site to the Superfund list, why wouldn't every past and present city dump in the U.S. be included?"

With so few restraints on spending, it is not surprising that the Administration's initial request for a threefold Superfund funding increase to $5.3 billion was dismissed out of hand by both houses of Congress as "too modest." Indeed, most believe even the $8.5 billion "compromise" now being considered will prove inadequate given the spending incentives now built into Superfund. A recent study by Putman, Hayes & Bartlett estimates that total Superfund program costs could jump to as much as $81 billion. A 1985 Office of Technology Assessment study foresaw a "need" for over $100 billion to get the hazardous waste cleanup job done. But even this study admitted that increased spending might have little if any effect on the disposal of hazardous waste, because of bottlenecks in the supply of sufficiently trained technical personnel and a lack of rational standards for cleanup.

"Spending large sums before specific cleanup goals are set and before permanent cleanup technologies are available leads to a false sense of security, a potential for inconsistent cleanup nationwide, and make little environmental sense," the report concluded.

FEEDING FUND'S APPETITE: SEARCH FOR DEEP POCKETS

Although the political popularity of Superfund has resulted in major pressures to increase funding, finding a way to finance such demands has delayed final congressional reauthorization of the program.

The initial funding sources for Superfund—taxes levied on the standard pariahs of American industry, the oil and chemical industries, and recoveries from "responsible parties," again largely oil and chemical companies—have been stressed by demands encouraged by this legislation. As a result, Congress has begun to consider new revenue sources.

Until recently, House conferees insisted upon increasing taxes on the oil and chemical industry while Senate conferees sought a broad-based tax on manufacturers, similar to a national value-added tax (VAT). Concern over the uncompetitive status of the financially strapped oil and chemical industries finally seems to have won out over the desire of many House members to bleed them dry. As a result, there is basic agreement upon using a broad-based business profits tax to supplement the existing oil and chemical tax.

But the inequity of the initial Superfund burden on the oil and chemical sector (why should anyone be singled out to address the problems of "orphan" dumps?) should not blind one to the equally inequitable decision to address pollution problems by taxing everybody from ice cream to furniture manufacturers. Two wrongs don't make a right and singling out any group of innocent parties and imposing on them the costs of cleaning up the pollution created by someone else is bad public policy.

Enactment of any new broad-based revenue measure, even on a limited basis, is akin to introducing a tactical nuclear weapon into a conventional war. Once unleashed, this seemingly "painless" taxation almost certainly will rapidly increase. It threatens uncontrollable escalation of the tax burden. Imagine the combination of Superfund's unquenchable thirst for popular pork barrel projects with such a renewable revenue resource—the fiscal equivalent of an out-of-control breeder reactor!

DEFINING "RESPONSIBILITY" IRRESPONSIBLY

Part of Superfund's cleanup expenses, of course, are supposed to be financed by those parties "responsible" for creating hazardous waste problems. The Superfund Act required EPA to identify such parties—no easy task in the case of what are after all supposed to be abandoned sites. But Superfund officials simply eliminated in practice any normal usage of the term "responsibility" from decisions as to who is to be held "responsible."

The program treats as a responsible party anyone who has any economic connection with the dumpsite. If a company is found to have deposited a single barrel of waste at a dumpsite, it can be held liable for all site cleanup costs. These rules make the jobs of EPA and Justice Department lawyers easier, at the sacrifice of fairness and efficiency.

In a recent hearing, an EPA enforcement lawyer noted that the legal responsibility standards now prevailing under Superfund have largely eliminated all arguments about guilt and innocence. The focus of attention is on who can pay.

A high-ranking EPA official recently admitted that the program was custom-made to go after big oil and chemical companies. Superfund's loose interpretation of joint and several liability makes it all too easy and all too tempting to prosecute wealthier firms, rather than the most responsible parties. But trying to impose legal responsibility on parties who feel they have done nothing wrong can create costs of its own—resistance in the form of lengthy litigation which delays actual cleanup operations and may actually exceed the latter's cost.

In practice, Superfund's liability rules make every party involved with hazardous wastes—the original source, the transporter, the site operator—potentially liable. Spreading the blame over such a wide range of individual parties not only diffuses responsibility, it also undermines safety incentives. After all if individual actions can do little to reduce liability, there is little reason to adopt risk reduction measures. Why bother if your ultimate responsibility is determined largely by the acts of others outside your control?

Superfund abandons the "Polluter Pays" principle (the costs of pollution should be borne by the polluter) in favor of a "Deep Pocket" theory of justice. This approach may make it easier to recover revenues in the short run. But the move toward a "no-fault" pollution policy drastically weakens incentives for individual parties to adopt less polluting policies over time. Profitable "tax" policy isn't good environmental policy.

INSURERS: BEWARE

The heavy legal club created by Superfund may well put the fear of God into accused parties, but it almost certainly causes more harm than good. The unlimited liability that might fall upon anyone associated with a waste site has seriously damaged the insurance market for hazardous waste manufacturers, transporters and disposers. In the late 1970s, several private companies had sprung up to provide such parties with liability insurance coverage, and to encourage more effective hazardous waste management techniques. But with the onset of Superfund's megaliability threat the insurers ran to the hills.

If the private insurance business for these risks had been allowed to develop, we would have seen far more progress in procedures to gauge the risk of various waste-handling techniques. Private insurers would have had every incentive to spend the money to find out exactly what the dangers were. Their efforts would have nicely supplemented EPA's work. Thanks to the revenue-hungry, joint-and-several liability approach of Superfund, we wind up with neither private insurance nor the market-based regulation that it could provide.

NOTHING NEW UNDER THE GROUND

Instead of cleaning up hazardous waste, and protecting groundwater, Superfund remains more likely to produce financial waste. Its parallels to the Clean Water Act fiasco are alarming.

In 1972, Congress responded to the public outcry over fish kills and flaming rivers by expanding the Clean Water Act of 1963. It set such new goals as making all U.S. surface water "fishable and swimmable" by 1983, and requiring all firms and municipalities to achieve "zero discharge" by 1985.

Congress voted to cover 75 per cent of the capital construction costs for municipal waste treatment facilities. This encouraged thousands of communities to construct new and expanded sewage treatment plants. As a result total wastewater spending by all levels of government exceeded $100 billion from 1972 to 1983.

Unfortunately, the Construction Grants Program under the amended Act proved to be highly inefficient and expensive. With little money of their own at stake, local politicians often elected to spend the federal largess to achieve local pork barrel benefits at the cost of real environmental improvements. Despite the massive governmental investment, overall national water quality has changed little since 1972.

A 1981 investigative series by the Washington *Post* ("Dirty Water: A Federal Failure") observed: "Elaborate hunks of expensive and failing machinery litter the American landscape—the wreckage of Washington's good intentions." It continued: "After nine years of massive federal investment to build or upgrade sewage treatment works in 18,000 communities, about 2,000 of the projects have been completed, and most are small plants in small communities where pollution threats are often the least serious."

In some localities, federal funding simply replaced money the community had already been prepared to spend directly. Other communities chose to wait for their representatives to finagle federal financing, while deferring local efforts that would have resulted in earlier cleanups. Moreover, when the federal government paid, there was less concern about designing local solutions that worked. The *Post* review of the wastewater treatment program discovered that up to 91 per cent of the new plants "don't perform up to anti-pollution requirements more than half the time."

Nonetheless, EPA and the environmental lobby kept pushing for more, more, more. Congress, driven by pork barrel politics, was much more eager to award further sums of money than to evaluate what these funds might be achieving.

Finally, after 10 years of increasing scandals and failed plans, the Administration, the Congress, and even the environmental community came to their senses. Among the substantial changes made in the Clean Water Act were these key adjustments: the federal share of construction costs was dropped to 55 per cent and the range of eligible projects was reduced. It was recognized that local governments were far more likely

to build appropriately sized and designed facilities if their own funds were at risk.

Indeed, in many ways the design of Superfund is far inferior to the deeply flawed design of the Construction Grants Program. The latter, after all, required substantial local cost sharing (up to 25%) compared to a zero requirement under Superfund. Moreover, waste treatment plants engender some local opposition—they can create a local nuisance. In contrast, no one is likely to oppose a project to move a dump (hazardous or not) from his neighborhood. Moreover, the technology of waste water cleanup is far more developed and the ability to monitor what one has achieved far easier. The leakproof dump and the zero-pollution treatment facility have not yet been invented and it is extremely difficult to determine what is happening under-ground. In fact, Superfund overkill may actually make the environment a more dangerous place. A "public health" program that begins by disturbing chemical graveyards raises serious questions. Extensive monitoring via test wells could create infiltration channels for groundwater contamination where none existed before. The movement of hazardous wastes is itself a hazardous activity, in many cases more risky then simply leaving the material where it was originally.

SUPERFUND NEEDS RETHINKING, NOT REAUTHORIZATION

The Superfund "debate" has barely moved beyond the proposition that hazardous wastes are potentially harmful and therefore more federal spending is necessary. But Congress, having learned little from its past environmental policy failures, should not be allowed to write another blank check to pursue an undefined concept of cleanliness.

To sustain a veto of the reauthorization measure likely to come out of conference later this month, the Reagan Administration must seriously fight the Superfund steamroller on environmental, not just fiscal, grounds. It must make clear that although sharing the stated goals of Superfund's patrons, it finds serious problems in their means.

The Administration should express grave doubts about the benefits obtained from the $1.6 billion already expended, and assert that it sees no likelihood additional spending will be used more efficiently without major reform of the program's design flaws. At a minimum, it should insist upon higher local cost-sharing, more careful weighing of costs and benefits, and better targeted liability rules.

Tactically, the first step is to gain time to educate the public by substituting a short-term extension of Superfund (until the next Congress) in place of the sweeping five-year reauthorization. But if the Administration merely plays for time and exercises damage control with no larger sense of purpose, it will have achieved little.

Strategically, the Administration must use the time wisely to come to grips with its greatest weakness in environmental policy—its failure to develop a market-oriented environmental policy. In the Superfund area, this means taking off the green eyeshades and arguing boldly for more imaginative, less intrusive alternative to address the problems posed by hazardous dumps, primarily the protection of the nation's groundwater supplies. Developing an adequate strategy will take time; however, it would include reorganizing aquifer property rights, "labeling" of suspect site materials to ensure self-identifying of contamination, and reconsideration of other governmental policies (pricing, subsidies, conservation) which affect water quality.

More than five years into the "Reagan Revolution," it's time to stop running for cover on the environmental front and start taking the offensive.

## TRIBUTE TO SENATOR MITCHELL FOR EFFORTS REGARDING SOVIET JEWS

Mr. HATCH. Mr. President, I rise today to acknowledge the fine work of our colleague, Senator MITCHELL, who is the coordinator of the 1986 Congressional Call to Conscience Vigil for Soviet Jews. The Senator from Maine has been instrumental in further sensitizing the United States Senate and the American people to the tragic plight of Soviet Jews. As coordinator, the Senator from Maine has succeeded in his central task by encouraging Senators to provide statements for the CONGRESSIONAL RECORD on behalf of Soviet refuseniks.

Mr. President, I too, am working for the release of Soviet Jews wanting to emigrate. Some time ago I adopted a refusenik family, the Khassins who live in Moscow. Dr. Gennady Khassin and his wife Natasha, and their two daughters, Helen and Yehudith, have been refuseniks for nearly 10 years since they first applied for emigration in 1976. Before they lost their jobs, because of their interest in emigrating, Dr. Khassin was a university professor and Mrs. Khassin worked with the Jewish Cultural and Emigration Movement. The Khassins are now under continuing and intense pressure from the KGB, and are in real danger of arrest and imprisonment. Mr. President, as long as the Khassin family remains in the U.S.S.R. and subsequently in danger, I will be working for their release.

Along with Senator MITCHELL from Maine, I encourage my colleagues to work for the release of those Soviet Jews wishing to emigrate. At this point, Mr. President, I wish to include in the RECORD a copy of a letter I recently sent to Soviet General Secretary Gorbachev, on behalf of the Khassin family. Should the General Secretary respond to my letter, I will be sure to share it with my colleagues here in the Senate.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
*Washington, DC, July 11, 1986.*

His Excellency MIKHAIL GORBACHEV,
*General Secretary of the Central Committee of the Communist Party of the Soviet Union, The Kremlin, Moscow, RSFSR, U.S.S.R.*

DEAR MR. GENERAL SECRETARY: It has been several months now since my most recent correspondence to you concerning Gennady and Natasha Khassin and their two daughters of Shossenaya 40, apartment 74 Moscow. As you know, I am deeply concerned about the Khassins' welfare. They have been awaiting OVIR's permission to emigrate for nearly ten years now.

I am deeply distressed that the Khassins have not been allowed to emigrate. They have endured severe persecution for practicing the Jewish faith and standing up for human rights. I understand that the KGB has even made death threats against them. As you know, religious persecution is a violation of the Helsinki Accords and the International Covenant on Civil and Political Rights. The U.S.S.R has signed both of these agreements. Why don't Soviet officials live up to those international agreements?

As a United States Senator who shares your concern for peace and improved relations between our two countries, I appeal to you to do everything in your power to bring about the speedy emigration of the entire Khassin family. Your efforts in this regard will send an important signal to the world that the U.S.S.R. takes its international agreements seriously.

I eagerly await your reply.

Sincerely,

ORRIN G. HATCH,
*U.S. Senator.*

## 40TH ANNIVERSARY OF FULBRIGHT INTERNATIONAL SCHOLARSHIP PROGRAM

Mr. MATHIAS. Mr. President, last Friday marked the 40th anniversary of the Fulbright International Scholarship Program named for its founder and main supporter, J. William Fulbright. Fulbright grants are a living testimony to a great man's desire to advance world understanding. Influenced by the two World Wars and the devastation of Hiroshima and Nagasaki, Senator Fulbright, then a young legislator from Arkansas, secured passage of the foreign exchange program on August 1, 1946. Since that time, more than 155,000 persons—54,000 Americans and 101,000 foreigners—have received Fulbrights to study, teach, lecture, or conduct research.

Future American leaders, scholars, Nobel laureates, athletes, writers, and even one of our colleagues, Senator MOYNIHAN, have spent time abroad with the aid of a Fulbright grant. Foreign alumni of the Fulbright program have risen to the highest positions in their own countries, including the current prime minister of Sweden, Ingvar Carlsson.

Senator Fulbright originally began the program with the hope that better world understanding would allow people to avoid the tragedies of world war which had afflicted the first half of the 20th century. A Fulbright grant, as the Senator explained last week in the Washington Post, was simply "to make people stop looking at one another as things—things like 'Communists' or 'imperialists' or 'socialists' or what not—names that connote something other than human beings. If we can do that, we will be a little less inclined to kill one another."

Unfortunately, 40 years after the establishment of the Fulbright scholarships, the fact that people are still looking at each other as Communists, imperialists, or socialists is disappointing, but not discouraging. On the 40th anniversary of this important occasion, it is time to reaffirm our commitment to Senator Fulbright's dream. As a great admirer of his, I sponsored the International Scholarship Program last year as a small step to widen the opening for world cooperation that Senator Fulbright began 40 years ago.

Mr. President, last week two articles appeared in the Washington Post and the Baltimore Evening Sun noting the anniversary of the Fulbright program. I ask unanimous consent that they be inserted in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Baltimore Evening Sun, Aug. 2, 1986]

FULBRIGHT AT 40

(By Ray Jenkins)

He complains that he is "getting old," that he can't read as much as he used to, that aches & pains make it an ordeal to get around 18 holes on the Burning Tree golf course. But even as he speaks you catch a glint of mischief in the undimmed eyes. The fact is, he can still post a 93 on a good day at Burning Tree, and his applications of history's lessons to contemporary affairs are as trenchant and biting as ever. And you sense that his references to "cranky old men" are intended as a subtle judgment of the man who, only six years his junior, occupies the White House today.

At 81, J. William Fulbright basked this week in a moment of deserved glory as a grateful world observed the 40th anniversary of the student exchange program which he brought into being. It was his first major undertaking as a young United States senator in 1946, and he still regards it as the most important achievement in a life of public service which included the longest tenure in history—15 years—as chairman of the Senate Foreign Relations Committee.

The guiding idea behind the program, he noted in a reflective interview this week, was simple: To avoid nuclear war, "That may sound pretentious," he said, "but that was its main purpose."

He was ideally suited to the task. Although he had grown up in the "parochial" environment of small-town Arkansas, he was bright enough to win a coveted Rhodes scholarship. Through exposure to history at the great English university at Oxford, he began to form his ideas about the perverse human tendency to confuse power, especially military power, with virtue and morality. What he witnessed in the next two decades—the extermination camps of Europe, the use of atomic bombs in Japan—reinforced his sense of doom.

It was out of his pessimism that arose the idea of the educational foreign exchange program.

Fulbright maintains there was a good deal of "luck" involved in establishing the program, but a larger measure of the success lay in his tenacity and imagination. Operating among senators who were "so conservative that they didn't believe that anything should happen for the first time," he concocted a device which required no appropriation of money: War surplus materials would be sold off abroad for foreign currencies and credits which would then support the sending of American students abroad and bringing foreign students here. Much political and legislative dexterity was required to get around such formidable figures as Tennessee's isolationist and reactionary Sen. Kenneth McKellar, who warned Fulbright, "Young man, you are doing a dangerous thing to expose American students to 'foreignisms'."

The program was still in its infancy when Fulbright had to fight off the assault of Sen. Joe McCarthy, who delighted in referring to "Sen. Halfbright." But the bullyism of the briefcase demagogue was no match for the cool and measured logic of Fulbright: McCarthy soon dropped the exchange program from his "list" of subversive menaces.

The last major battle for survival came with the advent of Ronald Reagan, who first tried to cut the program's $43 million budget in half. But the proposal backfired, serving to arouse the growing body of Fulbright alumni and other supporters, and instead of being cut, the appropriation was increased.

A few years ago Webster's Third International Dictionary entered the word "Fulbright" as a new common noun defining the scholarship. There are today 155,000 "Fulbrights" throughout the world, two-thirds of them foreigners, and many of whom are new reaching the highest levels of government and academia—such diverse figures as, to name a representative sample, Sen. Daniel P. Moynihan of New York, President Derek Bok of Harvard, and Ingvar Carlsson, the new prime minister of Sweden.

His greatest hope, the former Senator explained this week to a group of foreign journalists which included several "Fulbrights," was simply "to make people stop looking at one another as *things*—things like 'communists' or 'imperialists' or 'socialists' or whatnot—names that connote something other than human beings, if we can do that, we will be a little less inclined to kill one another."

---

[From the Washington Post, Aug. 1, 1986]

BY DEFINITION, AN ENDURING PROGRAM—EACH YEAR, 4,500 COVETED FULBRIGHT SCHOLARSHIPS ARE AWARDED

(By Jonathan Karp)

Becoming an entry in an encyclopedia is tough enough, but you have to do something really special to crack the dictionary. Forty years ago today, former Senator J. William Fulbright accomplished just that, when President Harry S Truman signed his act to award scholarships to students with funds owed the United States by Western Europe.

Here's what a 1984 edition of "Webster's New World Dictionary" has to say:

Ful-bright (fool'brīt') adj. [after J.W. *Fulbright* (1905- ), U.S. Senator from Arkansas] designating, of, or holding a scholarship or grant in a U.S. government program for the exchange of U.S. and foreign scholars, teachers, etc.: the funds are largely derived from the sale of U.S. surplus property abroad —n. a Fulbright scholarship, grant, or scholar.

"I didn't anticipate all the developments, by no means," said Fulbright, 81, now counsel to the law firm Hogan and Hartson after serving 30 years in the Senate. That his name rolls off the tip of many an aspiring scholar's tongue seems almost incidental to him.

Today, more than 155,000 persons—54,000 Americans and 101,000 foreigners—have participated in the program. Originally, part of the plan was to enable Western Europe to work off war debts by housing and educating Fulbright scholars. These days, it is funded by the U.S. Treasury and other governments. Congress appropriated $82 million for the program in 1985.

About 4,500 new grants are awarded annually to students, teachers and scholars, who study, teach and conduct research in 120 participating countries. Their pursuits range from setting up a dance studio in Zimbabwe to examining the use of the harp among turn-of-the-century Viennese composers while studying in Austria.

For Fulbright, the program's goal is to foster better understanding among countries. Fulbright said he was inspired to propose the legislation by the two world wars, the bombing of Hiroshima and Nagasaki, and his own experiences as a Rhodes Scholar studing history at Oxford.

"I think in the long run, if we don't have a nuclear war in the meantime . . . this kind of activity will contribute significantly to the development of people who have judgment about these affairs," Fulbright said. "Better judgment than to resort to World War I or World War II."

It took Fulbright almost a year to gain passage of the act, which passed the Senate easily but stalled in the House. According to Fulbright, subcommittee chairman Rep. William M. Whittington (D-Miss.) would not support the program because it did nothing for the schools in Mississippi.

Fulbright said he had almost given up when a common friend, William F. Clayton, then undersecretary of state, persuaded Whittington to support the program.

Meanwhile, Fulbright said, he "talked to anybody I could" about the program, gained former president Herbert Hoover's endorsement and wooed the press. "On my agenda it was big, but it wasn't on anyone else's," Fulbright said.

Among the many distinguished Americans who have won Fulbright Scholarships are Harvard University President Derek Bok and University of Chicago President Hanna H. Gray; economists Martin Feldstein and Milton Friedman; Nobel laureate scientists Hans Bethe, James Watson and Joshua Lederberg; writers Joseph Heller, John Updike and Eudora Welty; composers Aaron Copland and Philip Glass; Sen. Daniel Patrick Moynihan (D-N.Y.) and Michael Armacost, under secretary of state for political affairs.

"I think it made us more internationally minded, more cosmopolitan, more aware of intellectual complexities and more aware of what was particularly American on one's background and experiences," said Hanna Gray, who studied history at Oxford from 1950 to 1952.

The Fulbright program plans to celebrate its 40th anniversary with a series of exchanges between foreign and American scholars and artists. Also planned is a series of international satellite teleconferences with educators and academics and a Washington conference to bring together leaders in higher education.

Fulbright considers the program his top legislative accomplishment, although he thinks his constituents might disagree. "I got more public approval in Arkansas for removing the tax on oil margarine then I get from the exchange," he said.

Above all, he's modest about his role. "I just introduced the legislation," said Fulbright; it was the press, he believes, that

turned his surname into an adjective. "They've done it on so many bills," he said, and, drawing a parallel with the 1985 deficit-reduction legislation, added, "That Rudman bill. What do you call that?"

## CONCLUSION OF MORNING BUSINESS

Mr. GOLDWATER. Mr. President, parliamentary inquiry. The hour of 11:30 having arrived and passed, am I correct in assuming that the order of business is now the defense bill?

The PRESIDING OFFICER. The time scheduled for morning business has elapsed at 11:30, the Senator is correct.

## NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1987

The PRESIDING OFFICER. The clerk will report the pending legislation.

The legislative clerk read as follows:

A bill (S. 2638) to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes.

The Senate resumed consideration of the bill.

Pending:

(1) Byrd (for Kennedy and Weicker) Amendment No. 2414, to set forth a comprehensive and complete framework to guide the efforts of the United States in helping to bring an end to apartheid in South Africa and lead to the establishment of a nonracial, democratic form of government.

A motion was entered to close further debate on Amendment No. 2414 and, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, a vote on the cloture motion would occur on Thursday, August 7.

(2) Dole Amendment No. 2417 (to Amendment No. 2414), of a perfecting nature, to promote economic and political development, peace, stability and democracy in Central America, to encourage a negotiated resolution of the conflict in the region, and toward these ends, to enable the President to provide additional economic assistance for the Central American democracies as well as assistance for the Nicaraguan democratic resistance, subject to certain terms and conditions.

A motion was entered to close further debate on Amendment No. 2417 and, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, a vote on the cloture motion would occur on Thursday, August 7.

Mr. GOLDWATER. Mr. President, when we left last night, I made the statement, together with my friend from Georgia, that our staff, both of the staffs, would work during the night and this morning on the amendments that we had. There were a number, I believe it reached 138. Now there are a great deal of these amendments that were filed with no intention of ever calling them up. They were protecting amendments that were filed.

While I cannot get an exact number from our staffs yet that they feel can be expeditiously handled on the floor, I do believe that we might get that number down to somewhere around 70 to 80. Now that sounds like quite a reduction, but it leaves a great amount of work to be done in a time that is rather confusing, where we have a vote coming up on South Africa, where we have a vote coming up on the Contras, together with the debt limit, which is still pending. So I am not anticipating any real quick completion of this bill.

However, the bill is open for amendment and I would urge Members who have amendments to call them up at this time.

Does the Senator from New Mexico have an amendment?

Mr. BINGAMAN. Mr. President, I was conferring with the Senator from West Virginia to determine whether he had a much shorter amendment that he would want to offer at this point. If he does not, then I do have an amendment.

Mr. BYRD. Mr. President, I do have an amendment; as a matter of fact, I do have two amendments, but I want to wait until the distinguished Senator from Georgia is here before I call them up. I am ready.

Mr. STEVENS. If the Senator will yield, I have an amendment we have discussed, the Coast Guard amendment, that is going to be accepted, as I understand it. If I can present that early on, I would like to do it. I do not know if the others are more controversial, but if I could get the Coast Guard amendment out of the way soon, I would appreciate that.

Mr. BYRD. Mr. President, at the time Mr. NUNN is here, I will ask unanimous consent to set the pending amendment aside, if that is agreeable, and proceed on my amendment or amendments, and then I know the Senator from New Mexico has an amendment. He has very graciously consented to allow me to go ahead, may I say to the distinguished chairman.

Mr. GOLDWATER. Mr. President, I might say to my friend from Alaska, we did discuss this amendment. I would be the first to recognize that the Coast Guard needs help. It needs far more help and attention than this Congress gives it.

But unfortunately, to include these sums in this bill, I am afraid would be impossible. We just do not have it.

Mr. STEVENS. Mr. President, I appreciate the Senator's statement. My amendment would authorize the appropriations if we can find them. As the Senator knows, the current circumstances are such that often, as we go through these bills in the appropriations process, we find the other body will not agree to some of the moneys that we have authorized but they would agree to other things like the Coast Guard.

We have an agreement now this year. If it is not authorized, there will be no new money. And the Coast Guard has been given additional tasks in the Caribbean, in the Pacific, along the Atlantic coast. They have been now mandated by new bills, we have the High Seas Drug Enforcement Act, the act to prevent pollution from ships, the National Gas Pipeline Safety Act, the Port and Tanker Safety Act, and the 200-mile limit bill.

They are stretched beyond their capabilities now, and unless we can find a way to meet some of their needs through an authorized appropriation, some of those functions will have to be cut out in the appropriations process.

I call the Senator's attention specifically to the fact that this bill authorizes a 4-percent increase for the military. The Coast Guard is a military entity. This means that if this bill passes we will have to fund out of the existing level of appropriations the funds for the Coast Guard. In terms of the defense function, the Senator's bill funds that for the Department of Defense. They do not have to absorb it.

This bill, in and of itself, will reduce the Coast Guard level of available funds by about $100 million; a 4-percent increase is $100 million. We believe that there is a necessity to add the authorization for the money.

So I hope the Senator will consider what we are trying to do. We are trying to have the authority there to provide the funding if it becomes available in the appropriations process. We are not trying to bust the budget. As a matter of fact, as the Senator knows, the appropriations bill will be subject to both the budget ceilings in terms of budget authority and outlays. This bill is not subject to either.

I know the Senator is trying to meet those targets but it is just a target for the Senator's bill. It is an absolute limitation for the appropriations bill that I manage. I am urging that the authorization committee recognize the need for an authorization here to make the money available if it becomes available in the appropriations process.

Mr. GOLDWATER. Mr. President, I do not think there is anyone in this body that has a higher regard for the Coast Guard than I have. I have attended their schools throughout the years. I know that they are not adequately recognized. But here is the problem that we are facing. This is a

defense bill. All of these new projects that the Coast Guard has been assigned are not defense projects. In fact, they have nothing to do with defense. But I might say the Defense Department is now being asked to join in some of these projects. There is no money that I know of in the defense bill that could be diverted.

If the Senator can find money in another place, and we can move, there is no problem. I just cannot take it out of the defense bill in order to finance this particular item.

Mr. STEVENS. I say to my friend that one of the Coast Guard's responsibilities is the administration of the Atlantic and Pacific maritime defense zones. There is no funding in the defense bill for that activity. The Coast Guard must maintain the same pay scale as the military by law and I think that is good. They are military officers in wartime. They are civilian officers in peacetime. But unless the defense bill will fund the responsibilities that the defense establishment puts on the Coast Guard, then we will have no alternative but to cut the Coast Guard loose from the military in peacetime, and tell the military that the Coast Guard cannot do these. The High Seas Drug Enforcement Act puts the Coast Guard in a role that takes them far beyond their prior zone of activity.

As the Senator knows, they were involved in all of these Caribbean and South American activities, and I think justifiably so. We now put Coast Guard people on naval vessels and use the naval vessels under the command of the Coast Guard in drug interdiction. All of that involves expenses that ought to be borne by the Department of Defense, in my judgment. We have been successful 3 out of the last 4 years in providing approximately $300 million to $375 million a year out of the defense bill. Because of our agreement with the Senator's committee this year, we cannot do that.

I am raising the issue on the floor primarily so everyone will know that the Coast Guard will be cut approximately $375 million unless I put an amendment on the Senator's bill to authorize us to use the funds from the defense if we can find it.

As the Senator knows, last year we found savings from prior years and funded that. It did not impede the current year.

Mr. GOLDWATER. Mr. President, I think what the Senator is suggesting be done is a proper thing. I think it is time that the administrative branch of our Government recognizes the Coast Guard in a better way than it has. I happen to have discussed this item with the President yesterday, the fact that we needed money for this because the State Department has authorized the use of the Coast Guard. In fact, when you get right down to it, we are talking about our military helping stop the flow of narcotics. The Coast Guard is the only thing we have, the only body that wears uniforms that can make an arrest. Until we can change that we are going to have some problems.

Let me make a suggestion to the Senator from Alaska. Our staffs have been working on this. Let our staffs continue during the day to see if we can find some money. I can tell the Senator, and I know the Senator knows it as well as I do that the defense money is absolutely dried up. We do not have another dime. But if we can find it, let us look for it, let our staffs work on it.

Mr. STEVENS. I appreciate, Mr. President, what the Senator from Arizona said. I want to do what he wants to do. It is his bill. I will not offer this amendment if the Senator opposes it. But, again, I would like to bring to his attention that quite often in the appropriations process we find items that have been authorized by the Senator's armed services bill that for one reason or another cannot go forward. We take that money and apply it to areas that have been in need. In the past, those have been unauthorized.

Because of our long disagreement over the 1986 bill we have entered into an agreement that I intend to observe; that is, we will not appropriate money for unauthorized accounts. This is the only one of these that I will attempt to get it authorized so that in the event money becomes available in our process, which the Senator does not identify yet in his, we can fund the Coast Guard. We will not take money away from those items which the Senator has given higher priority to, and have committed that to the Armed Services Committee. But in this process we have to have some extra authorization so that we can in fact use money that is either savings from prior years that materializes, or savings that materialize because of some project that the Senator has authorized for which it is not possible to go ahead.

If we do not, then all I can say again is without this authorization there will be an effective reduction in the amount of money available to the Coast Guard in the amount of $375 million.

Incidentally, it is more than that, because we also funded some other items in the bill that were not controversial that are not authorized.

Mr. PELL. Will the Senator yield?

Mr. STEVENS. The Senator from Arizona has the floor.

Mr. GOLDWATER. Yes.

Mr. PELL. I want to provide very strong support to the Senator from Alaska. I speak perhaps personally. I think I am the only Coast Guard officer in the Chamber.

Mr. STEVENS. My colleague is one.

Mr. PELL. Good. Actually I'm a retired captain in the Coast Guard Reserve.

I well remember in World War II, enlisting in the Coast Guard considerably before Pearl Harbor, and doing normal law enforcement and Coast Guard work. Bingo; the war started. The whole ship's company painted that ship gray. We did it in 36 hours because we could not go on liberty until we had, and we were part of the Navy. For 5 years we were part of the Navy.

At the beginning of the war, I believe we were losing more ships than the Navy on a percentage basis.

So one of the strengths of the Coast Guard and for the military is that you have here a military service doing useful law enforcement, life saving work between wars. This one cannot say about the Army, Navy, Air Force, and Marine Corps. In between wars, they are keeping themselves ready for war. On the other hand, the Coast Guard is doing useful work for law enforcement, and for the saving of lives in between wars. One of our Nation's strength, and the beauty of it is you have the useful Coast Guard as a military reserve. And, when a war comes, bingo, we get painted gray and we become part of the military services.

Mr. GOLDWATER. Mr. President, I could not agree with the Senator from Rhode Island more. As I said before the Senator came on the floor, I have long, long been active with the Coast Guard. I have always believed, I believe right now, that we ought to provide more funds for the Coast Guard, and I think a good way of doing it is charging people that the Coast Guard teaches about the rules of the road. Even in a State like mine, in Arizona, which is a dry State, I think they operate something like 12 different Coast Guard schools.

□ 1150

Nobody pays a nickle for it. I did not intend to get into this subject, but today all you have to have to get out on the ocean is enough money to buy a boat. You do not have to know which way to go. You do not have to know if it flies or just sails. That is why we lost so many lives.

For example, where I used to sail a lot on the Pacific Ocean between the mainland and Catalina Island, we averaged almost 20 deaths a year that could be traced to people who did not know what they were doing.

I proposed several times charging people who go to these schools and charging a fee for the use of a boat on the waters of America. But we have too many people in here who have harbors in their States and do not like that.

Mr. STEVENS. I might say I had that bill out.

Mr. GOLDWATER. If the Senator will excuse me, I was going to tell the Senator from Alaska, if he will allow our two staffs to continue looking at this, maybe we can find something. We are not like any other organization in this Senate. We have been buffeted around by the Budget Committee, the Appropriations Committee and by the House of Representatives until the Defense Department is looking at a $30-billion deficit in the way of money for this year. We can struggle along on it but we are not going to do very well. To ask for another $250 million—and I would like to do it. The Senator is not finding opposition from me. He is finding opposition from the fact that that old money is dead.

Please, let our two staffs work together on this. This is just the second amendment we have had up. Maybe we can come up with something.

Mr. STEVENS. Mr. President, I am delighted to cooperate with the Senator from Arizona. On behalf of our Appropriations Subcommittee, we have already notified him that we will live within the terms of the understanding agreed to previously, that we would not appropriate for unauthorized accounts unless he concurs. That is the agreement.

The problem really on this one is that the Coast Guard has now, I am told, an $11 billion capital inventory and it takes about $400 million to $600 million a year to maintain that inventory. They have a $4.5 billion account of assets, their fiscal assets, their shore maintenance and rehabilitation program now reaching the level of over $100 million.

The Senator knows the Kodiak Naval Station. The Coast Guard took that over and in peace time they now run that. That is a substantial investment. It is the only naval station in Alaska that is capable of servicing the large vessels of our Navy. There is no such base now.

The Coast Guard maintains that in peace time. In the event of war, that would become a naval station again. Those kinds of expenditures are military expenditures in part, but there is no funding for them.

Mr. President, this is the Senator's last bill that he will manage for the Department of Defense. I want to give him every cooperation I can give him, not only to assist him in getting it passed, but to make sure it is fully funded. I make that commitment.

I appreciate what he is saying about our staffs working together. I hope that somehow or other we can find a way for that relief valve which we need in the event we find money that otherwise cannot be spent for as high a priority item in 1987 and we can make it available to the Coast Guard.

Mr. GOLDWATER. I appreciate what the Senator from Alaska has said. He does not have to sell me. I am already sold. As I have said, the staffs will work together. If we can find any money that can be applied to this, we will apply it.

Let me make the suggestion that next year the Senator from Alaska and the Senator from Rhode Island, and other Senators who have a vital interest in the Coast Guard, prepare legislation that will force the Government to give this group the recognition that it deserves. I want to tell you I am ashamed of the fact that our Coast Guard does not rank right up there with the other four services. I would like to see something happen.

I promise the Senator from Alaska we will do all we can. I thank him.

The bill is open to further amendment, Mr. President.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BYRD. Does the distinguished Senator have the floor? If he does, I will not seek recognition.

Mr. GOLDWATER. I just said that the bill was open to further amendment. I believe the Senator from New York had an amendment.

Mr. BYRD. I had indicated that I had an amendment.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BYRD. Mr. President, I ask unanimous consent that, notwithstanding the fact that there are amendments in the first and second degrees pending, I may be permitted to set those amendments aside temporarily and offer an amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 2558

(Purpose: To Require an Assessment by the Joint Chiefs of Staff of the Military Impacts of U.S. Non-Compliance With Existing Strategic Offensive Arms Agreements)

Mr. BYRD. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD] proposes an amendment numbered 2558.

Mr. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate point in the bill, add the following new section—

SECTION . MILITARY IMPACT STATEMENT BY THE JOINT CHIEFS OF STAFF ON U.S. NONCOMPLIANCE WITH EXISTING STRATEGIC OFFENSIVE ARMS AGREEMENTS.

(a) Not later than November 1, 1986, the Joint Chiefs of Staff, of the armed forces of the United States shall submit to Congress a report, in both classified and unclassified versions, containing a comprehensive assessment, including their individual views, of the military impacts on the national security of the United States, of the possible military responses of the Soviet Union to an American decision to no longer comply with major provisions of existing strategic offensive arms limitation agreements, including the central numerical sublimits on strategic nuclear delivery vehicles contained in the SALT II accord. This assessment shall concentrate on possible Soviet military responses during the period between fiscal year 1987 and fiscal year 1996, inclusive, and shall address, among other considerations, the following:

(1) the impact on the ability of U.S. strategic forces to accomplish their nuclear deterrent mission, including the impacts on the survivability of U.S. strategic forces and on the ability of U.S. strategic forces to achieve required damage expectancies against Soviet targets, of any expansion of Soviet military capabilities undertaken in response to a U.S. decision to abandon compliance with existing strategic offensive arms agreements;

(2) the additional cost to the United States, above currently projected military expenditures for those periods for which such budget projections are available, of research, development, production, deployment, and annual operations and support for any additional strategic forces required to counter any expansion in Soviet military capabilities undertaken in response to a U.S. decision to abandon compliance with existing strategic offensive arms agreements;

(3) under average annual real growth projections in defense spending of 0%, 1%, 2%, and 3%, the percent of the annual defense budget in each year between FY 87 and FY 1996 which would be consumed by increased U.S. strategic forces needed to counter the Soviet force expansions;

(4) the military impacts on U.S. national security of the diversion the funds identified in subsection (a)(1) away from non-strategic defense programs and to strategic programs to counter expanded Soviet strategic capabilities, including the military impacts of such a diversion on the ability of U.S. conventional forces to meet the nation's specific non-nuclear defense commitments as a member of the North Atlantic Treaty Organization, and under the 1960 Treaty of Mutual Cooperation and Security with Japan.

(b) Notwithstanding any other provision of law, none of the funds authorized or appropriated by this or any other act may be obligated or expended, directly or indirectly, by the Organization of the Joint Chiefs of Staff for studies and analyses to be accomplished by individual civilian contractors or civilian contractor entities, after November 1, 1986, if the report mandated in subsection (a) has not been received by the Congress; and,

(c) The prohibition contained in subsection (b) on the obligation or expenditure of funds after November 1, 1986, shall cease to have effect upon the receipt by Congress of the report mandated in subsection (a).

Mr. BYRD. Mr. President, the President's announcement that the United States no longer will comply with the existing strategic offensive arms agreements could have major implications for our national security, our defense spending requirements, the future of arms control, and the nature of our re-

lationship with our principal adversary—the Soviet Union.

To properly assess these implications, the Senate needs the most comprehensive information about the military impacts of the President's SALT noncompliance policy from the most authoritative and expert sources.

My amendment is designed to provide the Senate with that essential information from just such a source—our Nation's highest-ranking military leaders, the Joint Chiefs of Staff. Without such information, the Senate is severely handicapped in assessing the advantages and disadvantages to our Nation of the administration's "no-SALT" policy.

My amendment requires the Joint Chiefs to submit, by November 1, 1986, classified and unclassified reports containing a comprehensive assessment of the military impacts on the United States of the possible Soviet military responses to the President's policy. That report, which would be due just before the newly announced policy may take effect—would cover the fiscal year 1987-96 period encompassing the Pentagon's proposed 5-year budget plan, and the period immediately following.

The lengthy research, development, procurement, and deployment cycles for strategic nuclear weapons systems—and the many years needed to expand or contract the deployment levels of these forces in response to future arms control agreements or a changing Soviet threat—require that the Senate evaluate the impacts of the President's policy for such a long period.

What does my amendment do? It requires the Joint Chiefs to provide, among other considerations, the following information the Senate and the American people need in order to make an informed judgment about the wisdom of the administration's intended policy:

First, the impact on the ability of United States strategic forces to accomplish their nuclear deterrent mission, including impacts on the survivability of United States strategic forces and on their ability to achieve required damage expectancies against Soviet targets, of any expanded Soviet military capabilities developed in response to a United States decision to abandon compliance with existing strategic offensive arms agreements;

Second, the additional cost to the United States above current defense projections, of any additional strategic forces required to counter any expanded Soviet military capabilities that were developed in response to American abandonment of existing strategic offensive arms limits;

Third, the percent of the annual defense budget which would be consumed by increased United States strategic forces needed to counter the Soviet force expansions, for each year between fiscal year 1987 and fiscal year 1996, in each case under average annual real growth projections in defense spending of zero percent, 1 percent, 2 percent, and 3 percent;

Fourth, the military impacts on United Sates national security of diversion from nonstrategic defense programs to strategic programs of the additional funds needed to counter the expanded Soviet threat.

This latter category of required information is to focus particularly on impacts of the United States SALT noncompliance policy on our conventional defense capabilities and on our NATO allies and Japan.

The Joint Chiefs of Staff are required to address the impacts of a funding diversion from conventional programs to strategic forces, caused by the non-SALT policy, on the ability of United States conventional forces to meet our Nation's specfic nonnuclear defense commitments under the NATO Treaty and the Mutual Security Treaty with Japan.

We all know how strongly the NATO allies disagree with the President's policy, and warning signals already have appeared about the possible harm it could cause to our conventional defenses.

For example, I just received a letter from former Defense Secretary James R. Schlesinger, who warned against this latter, "probably highly negative" ramification of an accelerated stategic arms competition caused by the no-SALT policy. I had written to Mr. Schlesinger inquiring about the policy.

Given likely future limits on Federal spending, "any expansion of spending on strategic forces will mean a shrinkage of spending on theater and conventional forces," said Mr. Schlesinger, who is one of our Nation's most respected defense experts. "On balance," he concluded, "I do not believe that would be in the interest of our overall defense posture."

However, neither our allies nor the Senate has focused specifically on these particular military impacts of the policy, which I believe is the least we must do to exercise properly our constitutional responsibilities.

Mr. President, there is serious doubt that all these significant military implications of the no-SALT policy were considered sufficiently by the administration before the policy was announced on May 27, 1986.

Indeed, there was disturbing evidence to the contrary in two articles by the Washington Post's respected military correspondent, George C. Wilson. On June 16, 1986, the Post reported that the Joint Chiefs of Staff avoided making a direct recommendation to the President about whether SALT compliance should continue.

On June 22, an article entitled, "The Chiefs take a dive—ducking SALT, The Joint Chiefs of Staff puts self-interest ahead of Security" appeared. This article reported that the Chiefs agreed that they did not have to make an "up-or-down recommendaton" to the President on the SALT Treaty.

Mr. Wilson wrote:

> What was lost in this cop-out by the Chiefs was their considered judgment on which course is best for the Nation from a military point of view. And, so far, it appears that neither the President nor the Congress will learn about the qualms some of the Chiefs have about discarding the weapons limits.

Concerned about the report in the initial article, soon after it appeared, I pursued this matter with the chairman of the Joint Chiefs of Staff, Adm., William J. Crowe, Jr., at a Defense Appropriations Subcommittee hearing.

I attempted to determine the extent to which the critical military issues connected with the no-SALT decision were studied, debated, and discussed by the JCS, and whether they fully communicated such analyses to the President before his announcement. I also tried to obtain the Admiral's personal professional opinion about the military implications and impacts of the noncompliance policy.

Unfortunately, Mr. President, and the record of the hearings will show, once they are printed and ready for Senators to study them, the Admiral never gave me straightforward answers, especially about the key issue of whether the United States should continue to abide by SALT's central numerical sublimits on strategic weapons.

When the Admiral did respond, he provided an assessement based on Soviet intentions and not on Soviet weapons production and deployment capabilities.

I remember reading the SALT II hearings a few years back. I read those hearings "from kiver to kiver, every jot and tittle." I did not assign the reading thereof to staff people. I read the hearings that were conducted both by the Foreign Relations Committee and by the Armed Services Committee. And we were warned repeatedly by the military then, not only under the Carter administration, but also under previous administrations, to judge the capabilities of the Soviets—to judge the capabilities of the Soviets—and not the intentions of the Soviets, as we decide defense budget issues.

In the course of their military planning, our top military people usually indicate that it is far more prudent to judge the capabilities of the Soviet Union, not its intentions—because who can judge what its intentions are?—when assessing the Soviet threat.

Our top military leaders usually have stated that predicting Soviet intentions is much less certain than measuring Soviet military capabilities.

My amendment is intended to provide the Congress with a comprehensive military impacts assessment of the no-SALT policy based on Soviet capabilities not intentions.

The Admiral's unwillingness to provide direct responses was doubly disappointing in view of the answer he gave at his Armed Services Committee confirmation hearings to a question Chairman BARRY GOLDWATER asked on my behalf—asked on my behalf during those confirmation hearings—about the Admiral's willingness to share his views with the Senate.

Chairman GOLDWATER asked the Admiral the following question:

I have one question, Admiral, that we always ask on behalf of the minority leader of the Senate, Senator BYRD. Admiral, if confirmed, do you agree to appear before this and other appropriate committees and give us your candid views and answer all appropriate questions relative to your position?

Admiral Crowe responded: "I agree, Mr. Chairman."

Mr. President, the Joint Chiefs have a statutory responsibility to advise the President on military matters, and they traditionally have shared their candid, personal professional military opinions with the Senate. That advice has been very useful to the Senate in deciding important national security questions in the past.

Two years ago, in the conference report statement of managers for the fiscal year 1985 Defense Authorization Act, the Senate and House Armed Services Committees formally asked the Chairman of the JCS to answer 14 detailed questions about reforming the Pentagon's organizational structure. Those answers were due by a date certain. Thus, there is ample precedent for my amendment.

Furthermore, there should be no doubt that it is appropriate to address arms control compliance questions to the Joint Chiefs of Staff. Annual military posture statements to the Congress by the Joint Chiefs of Staff Chairman contain repeated references to arms control matters.

According to the Library of Congress, various members of the Joint Chiefs of Staff testified extensively six times before the Armed Services Committee on the military implications of the SALT I and antiballistic missile treaties, and four times before the Armed Services Committee and twice before the Foreign Relations Committee about the military implications of the proposed SALT II accord.

Admiral Crowe and the rest of the Joint Chiefs of Staff may have come perilously close to shirking their responsibilities to the President and to the Senate regarding the administration's SALT noncompliance policy. My amendment might rectify this situation as far as the Senate is concerned, and that is a further cogent reason for its passage.

As the detailed description of my amendment demonstrates, there are highly important military questions about the no-SALT policy which should be answered, and to which the Senate should receive the answers—and to which the Senate is entitled on behalf of the people of these United States to receive the answers— if it is to evaluate this policy properly. At the least, the Senate should know if any one of the Joint Chiefs is concerned about the negative military implications of this policy.

My amendment will provide the Senate with the information it needs on these issues of great national security significance.

Finally, Mr. President, the Senate needs this information without undue delay, because it probably will be making decisions about the no-SALT policy and strategic weapons programs and budgets very shortly after the date by which my amendment requires the Joint Chiefs of Staff report to be submitted.

Because of this requirement for timely information, I have included a provision in my amendment which would enforce the due date. That provision would prevent any funds from being spent by the Joint Chiefs of Staff to contract for studies and analyses by civilian contractors after November 1, 1986, if the report has not been received by Congress. As soon as the report is received, this funding prohibition would no longer be effective.

This provision would encumber only a small amount of funding, less than $10 million according to the Joint Chiefs of Staff organization. However, it would demonstrate that unless the Joint Chiefs of Staff perform a military mission for which they are paid, Congress sees little reason for them to hire outside civilian contractors—who exist only to produce paper studies for the Government—to accomplish that task. If the Joint Chiefs of Staff cannot do this paperwork in their own offices and supply it to the Congress, why should they contract it out to civilian contractors to accomplish the task?

This provision is more than justified by Congress' most recent experience in soliciting information from the executive branch about the implications of a U.S. SALT noncompliance policy.

Last year, the Senate adopted a provision urging continuation of U.S. SALT compliance and requiring a report about the expected dismantlements of Soviet and American strategic forces with and without such a continuation. That report was due February 1, 1986.

After almost 6 months delay, and repeated efforts to obtain the report it finally was delivered in June. That report was a more narrowly defined report which does not address many of the issues which would be covered in the report mandated by my amendment.

Given its schedule, and the importance of the issues involved, the Senate cannot afford a delay in receiving the information required by my amendment if it is to fully understand and assess the national security ramifications of the President's no-SALT policy.

The final provision in my amendment recognizes this requirement for timely information.

I am confident that if the Joint Chiefs of Staff will approach my amendment with a spirit of cooperativeness, rather than a spirit of stonewalling, such that with which I met when I asked questions of the Chairman of the Joints Chiefs of Staff a few weeks ago before an appropriations subcommittee, the problem can be resolved to the good interests of all. I met with very little forthrightness in answering my questions. Instead there was dancing around on the head of a pin. That is about all I got. The Senate is entitled to this information. The people of the United States are entitled to this information. If the report is submitted on time, the funding prohibition will never take effect, under my amendment.

I urge adoption of my amendment, and I ask unanimous consent that the letters and newspaper articles to which I referred earlier be printed in the RECORD at this point.

There being no objection, the documents were ordered to be printed in the RECORD, as follows:

[From the Washington Post, June 16, 1986]

JOINT CHIEFS BACK REAGAN SALT PLAN: HILL TO SEEK PERSONAL OPINIONS OF DECISION

(By George C. Wilson)

The Joint Chiefs of Staff have sent a secret policy document to President Reagan that supports any SALT II decision he makes without disclosing that some of them favor adhering to the weapons limits in the agreement, according to Pentagon sources.

The chiefs carefully crafted the document in hopes of avoiding an open policy split with Reagan and keeping themselves out of the political storm they foresaw if the president abandoned the arms pact, sources said.

But House Armed Services Committee Chairman Les Aspin (D-Wis.) and other lawmakers are expected to drag them into the storm by demanding to know their personal views on the wisdom of abandoning the limits in SALT II. Aspin said he intends to summon the chiefs before his committee.

Several senators also are pressing to question the chiefs. But Senate Armed Services Committee Chairman Barry Goldwater (R-Ariz.) said in an interview that he has no intention of letting his committee be a forum for such cross-examination of military leaders, contending that what Reagan did on the SALT limits "is none of Congress' business."

Adm. William J. Crowe Jr., chairman of the Joint Chiefs, engineered the document sent to Reagan. Sources said it states that the chiefs' primary interest is to get new generations of strategic missiles, bombers and submarines deployed. The question of whether this can be done better inside or outside SALT II is a political call for the president, not the military, the document contends.

Under this approach, whether Reagan stuck with the weapons limit in SALT II or abandoned them, as he has done, the White House and the chiefs can say that the Joint Chiefs of Staff, the nation's highest military body, support the president's decision. An earlier group of chiefs supported the SALT II treaty, support that President Jimmy Carter considered essential, but which was not enough to win Senate ratification.

The chiefs, in debating their positions on SALT II, knew from frequent meetings with Defense Secretary Caspar W. Weinberger—who usually meets with them as a group on Tuesday and Thursday and sees Chairman Crowe more frequently—that he strongly opposed continuing to observe SALT II. Just as their predecessors felt heavy political pressure to support SALT II, today's chiefs felt pressure to oppose it, according to knowledgeable officials.

Also, according to sources, there was widespread agreement among the chiefs that the Soviet Union had been flagrantly violating SALT II by encrypting telemetry and deploying the SS25 blockbuster missile. They sympathized with the president's plight in which he would seem to tolerate such violations if he continued to observe the pact.

A counterargument in "the tank," the big room in the Pentagon where the chiefs deliberate, sources said, was that anything that limited how many nuclear warheads the Soviets targeted on the United States would ease the military's problems in countering them. The Soviets do scrap missiles to comply with the treaty. Without SALT II, these missiles would be available for "breakout," a sudden deployment of warheads, this argument went, sources said.

As for new strategic weapons, the chiefs agreed and told Reagan, sources said, that the Soviets in the near future are not likely to build them any faster without SALT II than with the limits being observed.

Under traditional procedure, the chiefs support presidential decisions in testifying before Congress. Only when they are asked for their personal opinions do they sometimes break ranks with the president. Lawmakers critical of Reagan's abandonment of SALT II have dug up past testimony of military leaders endorsing the treaty limits in hopes of drawing out the qualms of today's chiefs.

Such research, sources said, has revealed that in late March Gen. Larry D. Welch, then head of the Strategic Air Command and now Reagan's nominee to be Air Force chief of staff, told a secret session of the Senate Armed Services Committee's strategic and theater nuclear forces subcommittee that he thought it would be militarily advantageous to the United States to continue complying with the arms limits of SALT II.

At his confirmation hearing before the committee on Friday, Welch said the Soviets, in deploying the SS25 and encrypting its telemetry, had "not only violated the letter but the spirit of SALT II." No senator asked him if the violations had reversed his support of the treaty limits, however, a question he and other military leaders are expected to be asked in the coming weeks as the SALT II conflict between Reagan and Congress escalates.

A Pentagon official said that whatever personal concerns the chiefs may have about abandoning SALT II, Weinberger feels vindicated in advocating the scrapping of the treaty because the Soviets, since the president's decision, have put a new arms-control proposal on the table at Geneva.

---

[From the Washington Post, June 22, 1986]

THE CHIEFS TAKE A DIVE—DUCKING SALT, THE JCS PUTS SELF-INTEREST AHEAD OF SECURITY

(By George C. Wilson)

The Joint Chiefs of Staff are ducking their professional responsibilities by refusing to say whether the nation is better or worse off in abandoning SALT II weapons limits. They are, in fact, politicizing themselves by saying the question is a political one that they, the nation's top military officers, are not obligated to answer.

Their predecessors advised the president and Congress that adhering to the provisions of the unratified SALT II was, on balance, advantageous militarily. In contrast, today's chiefs recently decided against making an up-or-down recommendation to President Reagan. They rationalized that whether to continue abiding by SALT II was a political decision to be made by the head politician, Reagan, and not the nation's military leaders.

"Reagan is supposed to be the best politician in the world," one of the chiefs told me. "Why not let him make this political decision?"

Yet, theoretically, the Joint Chiefs of Staff—composed of a chairman and the heads of the Army, Navy, Air Force and Marine Corps—are the nation's wise men on military questions. They are supposed to be professional military leaders with professional advice to help the politicians make sound decisions in a world where nuclear incineration of the planet is the biggest threat of all.

It is true, of course, that in the real world of the military, especially in peacetime, generals and admirals play politics to get ahead. The new chairman of the Joint Chiefs, Adm. William J. Crowe Jr., has far more political and diplomatic experience, for example, than seagoing time. And the way he tried to finesse the chiefs' SALT II recommendation to the president showed this political orientation. He knew that Defense Secretary Caspar W. Weinberger wanted to scrap the SALT II. And Crowe wanted to avoid an open split between the chiefs and Weinberger.

The chiefs debated the pros and cons of sticking with SALT II. A paper full of wishy-washy prose and on-the-other-hand argumentation distilled their views, according to administration officials. The paper did not come down hard one way or another on the SALT II question. Crowe, sources said, thus was able to use the paper like a stretch sock to cover his key political problem: a potential split between the chiefs and Weinberger, the defense secretary who has raised so much money for the services over the past five years.

"Weinberger wouldn't have to say anything directly to the chiefs for them to feel under pressure to go along on scrapping SALT II," said one retired flag officer who spent years in "the tank"—the room in the Pentagon where the chiefs meet Tuesdays and Thursdays. "You don't get to be a four-star without knowing what's expected."

The chiefs agreed that since the military advantages and disadvantages of sticking with the SALT II limits were practically a wash, the nation's highest military body need not make an up-or-down recommendation to the president on the treaty. They would let the president make the call and then go along with it, no matter which way he went.

What was lost in this cop-out by the chiefs was their considered judgment on which course is best for the nation from a military point of view. And, so far, it appears that neither the President nor the Congress will learn about the qualms some of the chiefs have about discarding the weapon limits.

"I was worried about breakout if we abandoned the limits," one of the chiefs told me in reconstructing the debate. "The Russians don't throw their old stuff away like we do."

With SALT II being observed by the United States and Soviet Union, he said, at least some Soviet weapons and launching facilities would be junked. With no such limits, he reasoned, the Soviets would store up all their old missiles and perhaps suddenly deploy them, tipping the balance their way through what the military calls "breakout."

The incoming chief of staff of the Air Force, Gen. Larry D. Welch, told a secret session of the Senate Armed Services Committee on Mar. 20 that he favored sticking with the SALT II limits as long as they proved to be military advantageous to the United States.

Last Thursday, before the Senate Appropriation Defense subcommittee, Crowe visibly angered Senate Minority Leader Robert C. Byrd (D-W.Va.) by refusing to tell him what recommendations the chiefs had made to Reagan on SALT II. Crowe, when asked his personal view on the wisdom of abandoning the SALT II limits, continued to stonewall, even though tradition calls for military leaders to give their personal views when Congress asks for them.

Crowe did tell Byrd that he did not believe the Soviets would change their weapons-building plans appreciably whether or not SALT II continued to be observed. U.S. military leaders usually discuss and adversary's capabilities, not intentions, when justifying defense preparations.

Byrd's reaction to Crowe—the first chief to appear publicly since Reagan made his SALT II decision—suggested that the chief's manuevering may have avoided a fight with Weinberger while starting one with Congress.

"They are being their own worst enemy," Byrd said, as he angrily paced back and forth across his office after failing to get Crowe to answer his questions. "Crowe didn't answer one of my questions."

Byrd said that both the president and Congress are entitled to the up-or-down recommendation of the chiefs on abandoning the SALT II limits, and added: "Unless the chiefs advise the president, he is not well served. If we in Congress can't get the chiefs' advice, whose advice are we to take on these military questions? Crowe is trying to put a classified cloak over this thing."

At the end of Crowe's Senate confirmation hearing on July 30, 1985, Barry Goldwater (R-Ariz.), chairman of the Senate Armed Services Committee, asked this question on behalf of Byrd:

"Admiral, if confirmed, do you agree to appear before this and other appropriate committees and give us your candid views

and answer all appropriate questions relative to your position?"

"I agree, Mr. Chairman," Crowe replied.

---

U.S. SENATE,
OFFICE OF THE DEMOCRATIC LEADER,
*Washington, DC, July 9, 1986.*

Dr. JAMES SCHLESINGER,
*Center for Strategic and International Studies, Georgetown University, Washington, DC.*

DEAR DR. SCHLESINGER: As you know, the Senate soon will be considering the Fiscal 1987 Defense Authorization Act, and it is expected that arms control issues will be a major focus of our deliberations. Your insights in the past on national security matters have been of great assistance to me personally, and to many other Senators, and I know we would find your guidance very helpful again during the upcoming floor action.

If it is not too burdensome, I would be most interested in obtaining your views, which I hope you would permit me to share with my colleagues, about the following issues:

(1) Is it in U.S. national security interests—or against them—if the United States chooses to exceed the central numerical sublimits of the SALT agreements later this year, by deploying the 131st bomber equipped with air launched cruise missile (ALCM), and why?

(2) Which nation—the U.S. or the U.S.S.R.—is in a better position to increase its production and deployment of strategic weapons in the next 3-5 years in the absence of SALT constraints?

(3) What are other positive or negative ramifications for the national security of the U.S. and its allies if the U.S. chooses to exceed the central numerical sublimits of the SALT agreements later this year by deploying the 131st ALCM-equipped bomber?

Should you be able to share your thoughts with me in the near future, I would appreciate it greatly, since our deliberations on such matters may begin as early as July 21. My thanks in advance for your consideration.

Sincerely,

ROBERT C. BYRD.

---

JAMES R. SCHLESINGER,
*Washington, DC, July 28, 1986.*

Hon. ROBERT C. BYRD,
*Office of the Democratic Leader*
*U.S. Senate, Washington, DC.*

DEAR SENATOR BYRD: These brief comments are in response to your letter of July 9. I trust that they will be of use in illuminating for you and your colleagues the issues that you posed.

At a general level, the chief advantage that might be embodied in the Administration's announcement that it would no longer be bound by the restraints of SALT II is that the Soviets might become more eager to negotiate—and thereby hypothetically improve the outcome at the bargaining table from our perspective. Of course, in order to exploit this potential advantage in the Administration's announcement we ourselves must be prepared to negotiate seriously. Thus, the principal justification for the action taken by the Administration can only be diplomatic tactics: putting pressure upon the Soviets.

Offsetting this advantage are a very clear political disadvantage and a possible military disadvantage. On the political front, the Administration's move caused considerable concern amongst our allies and other parties in the outside world regarding what it was taken to imply about the American attitude towards arms control and about the nature of the American decision process. (The timing of the announcement, which was unfortunate, was determined solely by when the opponents of SALT II could win a decision rather than by any development on the international scene.) The allies' dissatisfaction was reflected immediately in the meeting of the North Atlantic Council in which the United States was isolated. Needless to say, the Soviets have been moving to exploit what they see as a propaganda windfall.

On the military front, there is greater uncertainty. However, if the Soviet Union does regard this as a pretext for further expanding its own strategic forces, it is in a better position to compete short-term than is the United States. Consequently, under those conditions the short-term military balance would move to our disadvantage. Of course, if the Soviets were to do so, they would forfeit much of the political windfall that has now come their way. I think therefore that, for the obvious political motive, the Soviets will exercise restraint in order to maintain their propaganda offensive on the arms control issue. In my judgment, the political consequences are more significant by far than the military consequences.

All of this by way of background to your specific questions.

(1) In my judgment whether the United States proceeds to deploy the 131st bomber equipped with ALCMs at yearend is less important than the original announcement that we would no longer be bound by SALT II, although it will probably not even then be in the national security interest of the United States. Much of the political damage would already have been sustained. Since the United States has ample weapons against Soviet targets in the Soviet Union, it would provide little in the way of military advantage.

(2) Since the Soviet Union has greater throw-weight in its missile force and since it maintains a warmer production base than the United States, I believe that there is little question that the Soviet Union can increase its production and deployment of strategic weapons more than the United States can near-term.

(3) The other ramification of a reinforced competition is strategic arms between the United States and the Soviet Union would be budgetary—and probably highly negative from our standpoint. Given the magnitude of the budget deficit, and the goal of deficit reduction (either within or without the framework of Gramm-Rudman), it is evident that the real resources available to the Department of Defense will be at best stable and are likely to decline. Consequently, any expansion of spending on strategic forces will mean a shrinkage of spending on theater and conventional forces. On balance, I do not believe that would be in the interest of our overall defense posture.

I pointed out earlier that the dramatic move by the Administration represents a stimulus to the Soviets to negotiate. If the Administration is willing to make the adjustments unavoidable in the negotiating process, this move could prove to be advantageous. On balance, I think that the odds are against such an outcome.

Respectfully yours,

JAMES R. SCHLESINGER.

Mr. BYRD. I yield the floor.

Mr. GOLDWATER. Mr. President, I am going to ask Senator WARNER of Virginia, who is our expert in this field, to answer the distinguished minority leader.

Mr. WARNER. Mr. President, the minority leader very courteously acquainted me with that amendment earlier today and I have read it. I would recommend to the chairman of the committee, Mr. GOLDWATER, that we would be prepared to accept it.

However, I suggest that we invite the minority leader to look at one or two possible technical changes to the amendment, the first being in paragraph A. In view of the fact the Senate and the House have passed reorganization bills, there may be a manner in which we should revise this to be consistent with the thrust of those two bills and the new role of the chairman and at the same time explicitly have the views of other Members.

I suggest that given a little time here I am certain we can reach a rewording of that paragraph so it comports with the Senate's objectives in the reorganization bill which, as you know, under the direction of our chairman and the distinguished ranking member from Georgia, passed with a strong vote in this body.

Mr. President, the minority leader is now accepting the recommendations that I have offered, and I am certain shortly will address possible technical clarifications of paragraph A.

Mr. NUNN. If the Senator will yield, I agree with the Senator's observations on this, the reason being we are trying to encourage—and I think this is exactly what the Senator from West Virginia wants—we want to encourage not the corporate view but individual views. We want the chairman to give his view.

□ 1220

We want the chairman to present the other views that are different from his views. I think that is exactly what the Senator from West Virginia wants, too. We do not want to force them to believe they have to have the lowest common denominator.

Mr. WARNER. I think this is the first piece of legislation ever adopted by the Senate—and I anticipate that it will be—under the new reorganization plan. Although that is not the law, we should start now in tailoring our own pieces of legislation to comport with the objective.

Mr. BYRD. Mr. President, I should like to respond to this, if the Senator will yield.

The distinguished Senator from Virginia, the manager of the bill, and the distinguished ranking manager have made some good suggestions, and I will modify my amendment accordingly, to read as follows, and I believe this will comport with the suggestions made by the distinguished Senator from Virginia and others.

In paragraph (a), on the line in which the reading presently is as follows, "containing a comprehensive assessment," it would read "containing a detailed assessment," and it would proceed as follows: "including the individual views of each of the Chiefs."

It seems to me, as I have listened to the distinguished Senators, that those changes should meet with their suggestions.

Mr. NUNN. Will the Senator from West Virginia include one other word in the first line? After "not later than November 1, 1986," insert "the Chairman of the Joint Chiefs of Staff * * * shall submit."

Mr. BYRD. Yes.

Mr. President, I modify my amendment to include the words "Chairman of" following "the," and prior to "Joint Chiefs of Staff," as the distinguished Senator has suggested.

Mr. NUNN. "Chairman of the" will be inserted.

Mr. BYRD. The additional article "the" will be inserted: "not later than November 1, 1986, the Chairman of the Joint Chiefs of Staff."

Mr. WARNER. I thank the distinguished minority leader.

Addressing another section of paragraph (a), "major provisions of existing strategic offensive arms limitation agreements." This Senator interprets that to mean SALT I and SALT II—primarily SALT II—and not to include the ABM Treaty, as part of the legislative history we are establishing.

Mr. BYRD. Yes, because the ABM Treaty is a defensive agreement.

Mr. WARNER. It is worded that way, but I wanted to make that point clear.

Mr. BYRD. Yes.

Mr. WARNER. Proceeding to paragraph (b), where it is the desire of the minority leader to curtail the use of funds for studies in this area or other areas, I would like to have it made clear. Suppose a study were midway. Is that to be terminated, or is it all further studies, in the event they fail to comply with this?

Mr. BYRD. It would apply prospectively, and to read "no new studies."

Mr. WARNER. The language, then, can be clarified to that effect.

Mr. BYRD. Mr. President, I would modify my amendment, if this would meet with the proposal by the distinguished senior Senator from Virginia [Mr. WARNER]. On line 5 of paragraph (b), I would insert between the words "for" and "studies" the word "prospective."

Mr. WARNER. I thank the minority leader. I believe that clarifies my point.

Another observation: In paragraph (c), the presentation or submission to Congress of the report called for in (a) terminates any further action in paragraph (b). In a spirit of being helpful to the minority leader, and in view of the statements he made about his personal discouragement in previous efforts to obtain this information, I address a hypothetical question: Suppose the report came and it was a page and a half, and it was the judgment of the Senator from West Virginia and other Members of this body that it was totally inadequate. Technically, paragraph (b) is terminated, and whatever leverage, we might say, is under this amendment would cease to exist. It seems to me that possibly the Senator might want some review already in there, such that the Senator individually, or Senators collectively, could take further action.

Mr. BYRD. I think that is a good suggestion.

Mr. WARNER. And the Senator might want some time to study how to rephrase that.

Mr. BYRD. Does the Senator have a suggestion?

Mr. WARNER. No; I just point that out.

Mr. BYRD. I like the idea. I had not thought of it. Perhaps a 30-day review period.

Mr. WARNER. It seems to me that then Congress might not be in session. I point that out.

Mr. BYRD. That is another good observation.

Mr. WARNER. Perhaps the Senator will need a little time to look at this.

Mr. BYRD. Very well.

Mr. WARNER. As I understand it, the proponent of this amendment desires a record vote. I am not certain on our side as to the timeliness of that.

Mr. BYRD. Mr. President, I do desire a record vote. I do not necessarily desire that at this moment. I want to await the convenience of other Senators in that regard. Other Senators have amendments to call up. I want a rollcall vote because I want the JCS to hear this downtown. I want a rollcall vote, let us say, so that they can hear and understand it better. I would be agreeable and very happy to await the convenience of the distinguished manager and the ranking manager as to a time later in the day for a rollcall vote.

Mr. WARNER. I am not suggesting what it is, but that is up to the managers and the majority leader.

Mr. GOLDWATER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Will the Senator withhold?

Has the Senator from West Virginia modified his amendment?

Mr. BYRD. I ask unanimous consent that I be permitted to modify the amendment following the adoption of the yeas and nays. I may have it ready in a moment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there a sufficient second for the yeas and nays?

Mr. WARNER. Mr. President, may we ask that that action not be taken? I have a further suggestion for the minority leader.

Mr. BYRD. Yes.

Mr. WARNER. I am fully supportive of the purport of this amendment, but I also suggest that, at an appropriate place, we include in the amendment the requirement that the report shall address the military implications for the United States of the Soviet strategic force modernization and include violations, alleged or otherwise, of the existing arms control agreements.

It seems to me that that would add a balance and a proper perspective to this, if the Senate takes this valuable report into consideration.

Mr. BYRD. I am sorry—I was temporarily distracted. I beg the Senator's pardon. Will the Senator repeat that?

Mr. WARNER. I will be happy to repeat it.

I suggest to the proponents of the amendment that we include language along these lines: that the report shall include, in addition to what is required now, the military implications for the United States of the Soviet strategic force modernization, and another section, or in the same section, the burden cast on the United States by virtue of the alleged—verified or otherwise—violations of the existing offensive arms control agreements. That, I think, would give more balance to the report.

Mr. NUNN. I say to my friend from Virginia, if he will yield on that point, that I believe I understand the Senator's point. I think there are already reports that are required on Soviet violations that are rather comprehensive in nature.

Mr. WARNER. But if they were brought into the context of this report, it seems to me that we would have in one document a balanced assessment of both of these issues.

□ 1230

Mr. NUNN. I certainly do not object. In light of the effort to cut down on the number of reports, I do not think we want them to have to make two separate violations reports.

Mr. BYRD. It seems to me as being repetitive.

Mr. NUNN. You could incorporate in this report whatever the other report has that has been estimated. I am not sure of the dates of the submission of that other report, but I know there is a rather comprehensive report required on Soviet violations.

Mr. BYRD. I would hope we would not make this so cumbersome that the Joint Chiefs could not comply with it in a timely way for Congress to take the actions that may be visible in view of such reports.

Mr. WARNER. Mr. President, I share those concerns of the proponents of this amendment, but I draw to their attention it is my understand-

ing that the current requirements proposed by Congress for the reports on violations, and I use that in a generic sense, do not include specific requirements that we have their military assessment of the impact on our strategic programs of those violations.

Mr. NUNN. I have no objection whatsoever to putting that in there. I think as we take this into conference, though, we need to try to get staff to look at it closely and try to avoid duplications. If there is additional assessment here it seems to me it would be appropriate but if it is the same thing that we are already getting then I would not want to require a duplicative report.

Mr. WARNER. Bear in mind the President's decision announced recently with reference to SALT II is predicated in large part on the alleged verified and other violations of the Soviet Union of the specific documents addressed in this amendment.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. WARNER. Yes.

Mr. GOLDWATER. Mr. President, I think what the Senator from West Virginia has asked if complied with would have to contain the information the Senator from Virginia is interested in. I see no way of avoiding it. I think you will find it in making the military answer whether we ask for it or not.

Mr. WARNER. Well, perhaps this can be addressed. Do I understand the Senator from West Virginia is going to at this time come forward with all of these changes, or is he going to further study the amendment?

Mr. BYRD. The distinguished Senator had suggested another change that we were working on which may be ready, if the Chair would indulge us momentarily.

(Discussion off the record.)

Mr. WARNER. Mr. President, again I address the desirability of incorporating in this amendment, and I propose it occur in paragraph (a) as a sentence just preceding the last full sentence, and this inclusion would read as follows:

In addition, this report shall address the military implications for the U.S. of the Soviet strategic force developments and modernization program, including any alleged or otherwise violations by the Soviets of the existing offensive arms control agreements.

(Discussion off the record.)

Mr. WARNER. Mr. President, having now conferred with the proponents of this amendment I will revise my inclusion at the appropriate place in paragraph (a) to read as follows:

In addition, this report shall address the military implications of the U.S. of determined Soviet violations of offensive arms control agreements.

Mr. BYRD. Mr. President, I certainly accept that language and so modify my amendment.

The PRESIDING OFFICER. The amendment is so modified.

Will the Senator send the modification to the desk?

Mr. BYRD. Yes.

Mr. WARNER. Mr. President, there is another modification which I think will be proposed by the author of the amendment; namely to change the date in paragraph (c) from November 1 to October 1.

Mr. BYRD. Yes.

Mr. NUNN. Mr. President, will the Senator yield the floor?

Mr. WARNER. I have one additional comment.

Mr. NUNN. Mr. President, I support this amendment. I think it is a good amendment. As to the information being requested, I will be very surprised if the Joint Chiefs have not already addressed these issues. Certainly they should have. It seems to me the President of the United States would want this information before he made the decision he made.

□ 1240

If the President did not have this information when he made the decision, it seems to me that something is badly amiss in terms of getting military advice that any Commander in Chief should seek before making a decision that has profound military implications.

So I hope, and I would expect, that the information is already available. I regret the Senator from West Virginia was not able to secure this information, because it also should be made available to the Congress.

I agree with the October 1 date because that would give the Senator from West Virginia and others a chance to review the information before we adjourn. I hope the Joint Chiefs, if they have any intelligence in terms of what is going on on the floor of the Senate, would go ahead and provide this information to the Senator from West Virginia immediately, if it is available, and if not, compile it very rapidly. I see no need to wait until October 1 if the information is available. But I hope they would not wait until this bill was enacted to pay attention to this request, because if they do wait they would not have time. It may be a long time before this bill is enacted. I hope the message has been heard over in the Pentagon.

Mr. BYRD. Mr. President, I accept the proposed changes and so modify my amendment accordingly. The additional modification changing the dates, which appear in the amendment at least twice, from November 1 to October 1, 1986, has also been included in the modification. I send them to the desk.

The PRESIDING OFFICER. The modifications are accepted.

The amendment (No. 2558), as modified, reads as follows:

At the appropriate point in the bill, add the following new section—

SECTION . MILITARY IMPACT STATEMENT BY THE JOINT CHIEFS OF STAFF ON U.S. NONCOMPLIANCE WITH EXISTING STRATEGIC OFFENSIVE ARMS AGREEMENTS.

(a) Not later than October 1, 1986, the Chairman of the Joint Chiefs of Staff of the Armed Forces of the United States shall submit to Congress a report, in both classified and unclassified versions, containing a detailed comprehensive assessment, including the individual views of each of the chiefs, of the military impacts on the national security of the United States, of the possible military responses of the Soviet Union to an American decision to no longer comply with major provisions of existing strategic offensive arms limitation agreements, including the central numerical sublimits on strategic nuclear delivery vehicles contained in the SALT II accord. This assessment shall concentrate on possible Soviet military responses during the period between fiscal year 1987 and fiscal year 1996, inclusive, and shall address, among other considerations, the following:

(1) the impact on the ability of U.S. strategic forces to accomplish their nuclear deterrent mission, including the impacts on the survivability of U.S. strategic forces and on the ability of U.S. strategic forces to achieve required damage expectancies against Soviet targets, of any expansion of Soviet military capabilities undertaken in response to a U.S. decision to abandon compliance with existing strategic offensive arms agreements;

(2) the additional cost to the United States, above currently projected military expenditures for those periods for which such budget projections are available, of research, development, production, deployment, and annual operations and support for any additional strategic forces required to counter any expansion in Soviet military capabilities undertaken in response to a U.S. decision to abandon compliance with existing strategic offensive arms agreements;

(3) under average annual real growth projections in defense spending of 0%, 1%, 2%, and 3%, the percent of the annual defense budget in each year between FY 87 and FY 1996 which would be consumed by increased U.S. strategic forces needed to counter the Soviet force expansions;

(4) the military impacts on U.S. national security of the diversion the funds identified in subsection (a)(2) away from non-strategic defense programs and to strategic programs to counter expanded Soviet strategic capabilities, including the military impacts of such a diversion on the ability of U.S. conventional forces to meet the nation's specific non-nuclear defense commitments as a member of the North Atlantic Treaty Organization, and under the 1960 Treaty of Mutual Cooperation and Security with Japan;

(5) in addition, this report shall address the military implications for the U.S. of determined Soviet violations of offensive arms control agreements.

(b) Notwithstanding any other provision of law, none of the funds authorized or appropriated by this or any other act may be obligated or extended, directly or indirectly, by the Organization of the Joint Chiefs of Staff for prospective studies and analyses to be accomplished by individual civilian contractors or civilian contractor entities, after October 1, 1986, if the report mandated in subsection (a) has not been received by the Congress; and,

(c) The prohibition contained in subsection (b) on the obligation or expenditure of funds after October 1, 1986, shall cease to have effect upon the receipt by Congress of the report mandated in subsection (a).

The PRESIDING OFFICER. The yeas and nays have not been ordered on the amendment.

Mr. BYRD. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BYRD. I yield the floor.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from West Virginia [Mr. BYRD]. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] and the Senator from Virginia [Mr. TRIBLE] are necessarily absent.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 97, nays 1, as follows:

[Rollcall Vote No. 178 Leg.]

NAYS—1

Lugar

NOT VOTING—2

Laxalt Trible

So the amendment (No. 2558), as modified, was agreed to.

□ 1300

Mr. BYRD. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Madam President, if we may have order, it had been our intention at 1 o'clock to be visited by the managers of the House with reference to the impeachment. But I understand they may not arrive now until about 1:30. They are in the midst of a quorum call before a vote. I assume we can go ahead and start another amendment. When they arrive, we can interrupt that.

Mr. BYRD. Madam President, will the distinguished majority leader yield?

Mr. DOLE. Yes.

Mr. BYRD. Could we get an agreement now to delay the vote on cloture? This will be crowding it.

POSTPONEMENT OF VOTE ON CLOTURE UNTIL 6 P.M.

Mr. DOLE. Madam President, I ask unanimous consent that the vote on cloture be delayed from 2 o'clock until 6 o'clock.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER. Madam President, the bill is now open for further amendment.

The PRESIDING OFFICER. There are two amendments which are pending. They would have to be temporarily set aside.

□ 1310

Mr. BINGAMAN. Madam President, I ask unanimous consent that the pending amendments be temporarily laid aside so the amendment I have may be considered.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the Dole and Byrd amendments be laid aside so we may deal with this one.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. Madam President, will the Senator repeat his request? I am looking for Senator THURMOND. I do not see him on the floor.

Mr. GOLDWATER. There are amendments that have been offered by the majority and minority leaders. I asked unanimous consent to move them aside so we may consider this amendment.

Mr. STENNIS. My point is I expected Senator THURMOND to be here when these matters were called up.

I understand my information was not correct. I beg the Senator's pardon.

The PRESIDING OFFICER. Hearing no objection, it is so ordered.

Mr. DOLE. Will the Senator from New Mexico yield?

Mr. BINGAMAN. I yield.

Mr. DOLE. I understand there was a consent agreement that at 1 p.m., we would receive the managers. Is that correct?

The PRESIDING OFFICER. We had adopted an order asking them to be here at 1 o'clock. Business on the floor of the House has prevented them from being here.

Mr. DOLE. I am advised that they will be here at 1:30, so I ask unanimous consent that the time of 1 o'clock be changed to 1:30.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2563

(Purpose: To revise the method for pricing tobacco products for sale in commissaries, exchanges, and ships' stores and revise use of proceeds)

Mr. BINGAMAN. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Mexico [Mr. BINGAMAN] for himself and Mr. BOREN, proposes an amendment numbered 2563.

Mr. BINGAMAN. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 229, between lines 14 and 15, insert the following:

SEC. 1221. SALE OF TOBACCO PRODUCTS IN COMMISSARIES, EXCHANGES, AND SHIPS' STORES.

(a) IN GENERAL.—(1) Chapter 147 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 2486. Sale of tobacco products in commissaries, exchanges, and ships' stores; use of proceeds

"(a) Tobacco products may be sold in commissary stores, military exchanges, or ships' stores subject to the requirements prescribed in subsections (b) and (c).

"(b)(1) In the case of a commissary store, military exchange, or ship's store located in the United States, the price charged for any tobacco product shall be the prevailing price charged by private commercial businesses for the retail sale of such tobacco product in the retail market area in which the exchange or ship's store is located.

"(2) In the case of a commissary store, military exchange, or ship's store located outside the United States, the price charged for any tobacco product shall be the average amount charged by private commercial businesses for the retail sale of such product in the United States.

"(3)(A) In determining the prevailing price charged or the average price charged by a commercial business, applicable State and local taxes shall be included.

"(B) The prevailing price or the average price may be determined under an appropriate sampling procedure.

"(c)(1) The Secretary of a military department may use the profits from the sale of tobacco products by commissary stores under the Secretary's jurisdiction to promote health and fitness for members of the armed forces and their dependents.

"(2) Amounts made available under paragraph (1) shall remain available for obligation without fiscal year limitation.

"(d) The Secretary of Defense shall prescribe regulations to carry out this section.

"(e) In this section:

"(1) The term 'profits' means the amount which represents the difference between the price charged by commissary stores for the sale of tobacco products and the cost incurred by such commissary stores for such products.

"(2) The term 'tobacco product' includes cigarettes, cigars, tobacco processed for cigarette or pipe smoking, and tobacco processed for oral use.

"(3) The term 'United States' includes the Commonwealth of Puerto Rico and the territories and possessions of the United States".

(b) CONFORMING AMENDMENT.—The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new section:

"2486. Sale of tobacco products in commissaries, exchanges, and ships' stores; use of proceeds.".

(c) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect October 1, 1986.

Mr. GOLDWATER. Madam President, may we have order, please?

The PRESIDING OFFICER. The Senator from Arizona is correct. There is no order in the Senate.

Mr. McCONNELL. Madam President, will the Senator from New Mexico yield?

Mr. BINGAMAN. Madam President, I yield to the Senator from Kentucky for the offering of a short amendment.

AMENDMENT NO. 2564

Mr. McCONNELL. I thank the Senator from New Mexico.

Madam President, I have an amendment at the desk numbered 2274 as modified. The modification I would like to send to the desk has been cleared on both sides of the aisle.

This amendment, Madam President, is sponsored by my senior colleague from Kentucky.

Mr. FORD. Will my colleague yield?

Mr. McCONNELL. Yes; I yield.

Mr. FORD. I ask unanimous consent that the pending amendment be set aside so we may consider the amendment of the junior Senator from Kentucky.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kentucky [Mr. McCONNELL], for himself and Mr. FORD, proposes an amendment numbered 2564.

Mr. McCONNELL. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 229, between lines 14 and 15, insert the following new section;

(1) No chemical weapons, agents, or components used in chemical weapons may be shipped by any means into the Lexington-Bluegrass Depot in Richmond, Kentucky, for any purpose, including disposal;

(2) Following disposal of the chemical weapons stockpile stored at the Lexington-Bluegrass Depot, as required by Public Law 99-145, the facility may not be used for assembly, construction, testing, storage, or disposal of any chemical or biological weapon;

(3) The Secretary of Defense shall have the authority to waive these provisions in the event that he determines it is in the national security interest.

Mr. McCONNELL. Madam President, I have listened with great interest to my colleagues eloquently discuss defense issues of national importance. Whether we are debating SDI's defensive shield in the sky or the defensive shield our carrier battle groups provide at sea, my colleagues and I all share one concern. We want to guarantee our Nation's security.

But, I would like to take a minute or two of my colleagues' valuable time and bring this discussion out of the sky, back from the sea, and down to Earth. I ask my colleagues to imagine how they would feel if they learned that a facility next door to their children's school and playground housed rockets leaking a deadly nerve agent. I do not want to overstate my case nor do I wish to create undue alarm among my colleagues. However, I do want to point out that a quiet community in the heart of Kentucky bluegrass country has what, it considers, a time bomb ticking literally in its backyard. Tens of thousands of rockets containing mustard gas and a variety of nerve agents are stored at the Army's Lexington-Bluegrass Depot in Kentucky.

Although these aging rockets pose no significant, immediate danger, Congress has mandated they should be destroyed before 1994 and the arrival of our next generation of chemical weapons. I will not trouble my colleagues with the details of the Army's difficult and controversial decision on how these weapons should be destroyed. In fact, the Army has not reached a final decision about what to do with the chemical stockpile in Kentucky. While the Army tries to figure out what to do, the clock is running. My greatest fear is the final decision will not be made for another year or 18 months, further delaying building an incinerator or shipping the rockets out of the State. I am worried that faced with the pressure of the 1994 congressional deadline, the Army will abandon safety measures, rush to complete destruction, and risk a chemical accident of nightmare proportions.

Needless to say, the Army's decision is of paramount importance to the citizens of Kentucky. When the Army estimates 18,860 people will die if a train transporting these munitions crashes, people obviously pay attention.

Beyond the grim casualty estimates, there are several factors at work which trouble the community surrounding this depot. Historically, the Army has been less than straightforward with these citizens. A few year ago, when a huge, black cloud of smoke drifted over the town from the depot, the Army initially denied it was even happening. It was only after repeated—and I might add panicked phone calls—that the Army acknowledged they were burning up nontoxic smoke pots. Apparently, in trying to meet a scheduled deadline for destruction, too many smoke pots were ignited which caused this frightening, however nonlethal, cloud.

There have been other similar cases which have fostered anger and mistrust. For example, recently the Army released tentative plans to build incinerators and destroy the national stockpile where it is currently stored. The Army did not conduct a site-specific environmental assessment at the Lexington Depot nor did they study the risk associated with the community's unique characteristics such as population density or proximity of schools. Mistrust, confusion, frustration, and anger have resulted.

The amendment I have introduced does not dictate the Army's choice for disposal of these munitions. I have neither the expertise nor the legislative ability to make this decision. What this amendment does is offer a frightened community two rays of hope. First, if a final decision is made to build an incinerator in Kentucky, no chemical weapons from any other site can be shipped into Kentucky for disposal. The Army claims they have no intention of moving any chemicals into Kentucky. I intend to legislate their word. Second, once this stockpile is disposed of, the Lexington-Bluegrass facility cannot be used in the future for assembling, testing, or storing chemical weapons. Given the fear and anxiety that this community has suffered for years, I think it is only fair to reassure them that the end of their problem is in sight. Chemical weapons will not be an issue for Kentucky after 1994.

I recognize this issue does not loom as large on my colleagues agendas as, for example, SDI. Billions of dollors are not involved, we are not relocating infantry divisions nor building new Navy ports. However, what this amendment offers, is just as important to the citizens of Kentucky as ports or parts for new weapons. It offers them peace of mind.

Madam President, this amendment deals with the Lexington-Bluegrass Army Depot, which is currently the site of about 2 percent of the Nation's stockpile of chemical weapons. There is an on-going discussion at this time about what to do in terms of the disposal of the existing stockpile of chemical weapons. My amendment does not deal with that. It deals with the future in terms of the Lexington-Bluegrass Army Depot being the site for additional chemical weapons or a site for the disposal of chemical weapons in the future.

This amendment has been cleared by both sides of the aisle. What it

would do is simply eliminate this particular facility, which is surrounded by schools and a number of people in close proximity, unlike any other five sites in the country. It would eliminate it as a site for future storage or disposal of chemical weapons.

I yield to my colleague [Mr. FORD].

Mr. FORD. I thank my colleague.

Madam President, this amendment would codify the assurance I received last year and again in June from the Secretary of the Army Ambrose in response to legislation I introduced on March 14, 1985. Under Secretary Ambrose has stated it is not the Army's intention to transport any additional chemical agents or munitions into the Lexington-Bluegrass Army Depot for storage or disposal. Furthermore, if an incinerator is ever built in Madison County—I underscore if ever built—to demilitarize chemical weapons, the Army will use it for no other purpose than the destruction of chemical munitions already stored at the depot.

Madam President, what this amendment does is codify the assurances that we have already received.

I ask unanimous consent that the original bill introduced and introductory remarks and subsequent correspondence with Mr. Ambrose be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

By Mr. FORD:

S. 662. A bill to place certain restrictions on the storage and demilitarization of chemical munitions and lethal chemical agents at Lexington-Bluegrass Army Depot, KY, and for other purposes; to the Committee on Armed Services.

RESTRICTIONS ON CHEMICAL MUNITIONS AND LETHAL CHEMICAL AGENTS AT LEXINGTON-BLUEGRASS ARMY DEPOT

Mr. FORD. Mr. President, the U.S. Army has proposed building a demilitarization facility at Lexington-Bluegrass Army Depot [LBAD] in Richmond, KY, to dispose of chemical weapons stored at the depot—most urgently, the deteriorating M-55 rocket. This facility is to be built in conjunction with five others across the United States and on Johnston Island in the Pacific, all colocated with chemical weapons storage sites.

I do not speak for any other jurisdiction today but that in my one State. It would be an understatement to say that strong objections to the Army proposal have been raised in the Richmond area. The citizens are understandably alarmed. Theirs is a highly populated part of Kentucky, and, should an accident occur during the incineration process, thousands of people would be immediately and adversely affected by it. These feelings are compounded by a deep mistrust of the Army that existed throughout Madison County prior to the demilitarization announcement.

Naturally, one of the first public responses to the Army was "get them out of here; burn the munitions somewhere else." When the proposal was first made, I suggested that the Army study the transportation option, and I am pleased that it is being done at this very moment. The Army has drawn samples of M-55 components from Richmond—agent, fuze, burster, and propellant, and is analyzing them in order to make an assessment of the condition of our current stockpile and its potential mobility.

While we await the release of the draft Environmental Impact Statement, however, a persistent question remains among my constituents that has not been satisfactorily answered and that will not, I believe, be found in the EIS:

"Is the Army going to build a multimillion dollar facility to dispose of only the munitions currently stored at LBAD? Surely the plant will be used to dispose of other toxic weapons and materials."

Of particular concern to me is the bulk nerve agent that is stored at Edgewood Arsenal in Aberdeen, MD, at Newport Army Ammunition Plant in Newport, IN, and at Pueblo Army Depot in Pueblo, CO. Since no plans are in the offing to dispose of this material onsite, I feel that LBAD may be the logical candidate to receive the bulk agent of the first two facilities for demilitarization.

It is this fear that I address today. The legislation I am introducing would place restrictions on the storage and demilitarization of additional chemical munitions and lethal chemical agents at LBAD by prohibiting such activities except under the very limited instances of a national emergency or for purposes of research. In other words, under my language, no new lethal materials, whether military or civilian, may be brought into Madison County for storage or disposal at Richmond—but anything that is stored there right now may be brought out. My legislation leaves open the option of transporting the Richmond stockpile to another disposal site.

This is in direct contrast to H.R. 1430, recently introduced by Representative Beryl Anthony, which would foreclose the transportation option by simply mandating that existing chemical munitions be burned at their present site. I cannot support this legislation, Mr. President. It is absolutely contrary to the best interests of my constituents.

The choices available to the residents of Madison County are three: leave the chemical weapons in storage as they exist today, dispose of them onsite, or transport them to another facility. Each one has obvious drawbacks. Each is currently being evaluated by the Army and I anxiously await the results of the study. But I want to make certain that, whatever the ultimate solution is, LBAD does not become a dumping ground for chemical weapons and other materials. Under my legislation, if the final decision is to demilitarize onsite, Madison County will not be burdened by any more toxic substance than it already has.

---

S. 662

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress asembled,* That (a) notwithstanding any other provision of law and except as provided in subsection (b), the Secretary of Defense may not use the Lexington-Bluegrass Army Depot, Kentucky—

(1) for the temporary or permanent storage or for the demilitarization of any chemical munitions or lethal chemical agents; or

(2) for the temporary or permanent storage or disposal of any nondefense toxic or hazardous materials;

which were not stored at such depot on the date of the enactment of this Act.

(b) Subsection (a) does not restrict the storage of chemical munitions at the Lexington-Bluegrass Army Depot—

(1) during a period of war or a period of national emergency declared by Congress or the President; or

(2) if the storage of such munitiions at such depot is for a research, testing, or training program and is in limited quantities (as defined under regulations prescribed by the Secretary of Defense).

SEC. 2. As used in this Act—

(1) The term "demilitarization", with respect to chemical munitions or chemical agents, means—

(A) the destruction of such munitions or agents by incineration or by any other means; or

(B) the dismantling or other disposal of such munitions or agents so as to make them useless for military purposes.

(2) The term "chemical munitions" means chemical warfare weapons containing lethal chemical agents.

---

DEPARTMENT OF THE ARMY,
*Washington, DC, April 8, 1985.*

Hon. WENDELL H. FORD,
*U.S. Senate,*
*Washington, DC.*

DEAR SENATOR FORD: The question you raised on the potential importation of other chemical munitions into the Lexington Blue Grass Depot for demilitarization is answered as follows:

1. The study of transportation options for demilitarization is limited to transporting *from* other depots *to* Pine Bluff and/or Tooele Depots in the Continental United States and/ or *to* Johnston Island in the Pacific. The attached Notice of Intent to be published in the Federal Register sets this forth quite clearly in paragraph 2.c.

2. The Army has never intended to transport chemical munitions *into* Lexington Blue Grass. The Army studies of transportation options have been fully described previously to Congress, most recently in a public hearing held by the Investigations Subcommittee of the House Armed Services Committee on 13 March 1985.

3. The possible advantage of transporting these munitions to Pine Bluff or Tooele is related to taking advantage of existing chemical munitions facilities and availability of isolated land for construction of larger scale demilitarization facilities than would be feasible at the other storage sites, such as Lexington Blue Grass. I emphasize "possible" advantage because the studies are not complete and no conclusion has been reached, but no consideration is being given, or should be given, to Lexington Blue Grass for such larger scale operations.

You also asked about the possible use of Lexington Blue Grass Depot for destruction of other hazardous wastes. The Army has no plans for such work. The introduction of nondefense (civilian or other government agency) toxic and hazardous waste materials into our facilities for destruction is prohibited by law (10 USC 2692). Further, we will do all we can to resist the use of Army chemical munition destruction facilities for disposal of other wastes generated within the Defense Department. We have enough to do for the foreseeable future to clean up our unitary chemical stockpile problems. These problems are so extensive that they should be dealt with independently. I would be greatly concerned that the introduction of other hazardous waste disposal considerations would give rise to delay and confusion of the issues which are contentious

enough as it is, especially at Lexington Blue Grass.

I trust that this response is satisfactory to the Kentucky Congressional Delegation and to the public it serves. Please let me know if anything additional is needed.

Sincerely,

JAMES R. AMBROSE,
*Under Secretary of the Army.*

---

DEPARTMENT OF THE ARMY,
*Washington, DC, May 1, 1985.*

Hon. WENDELL H. FORD,
*U.S. Senate,*
*Washington, DC.*

DEAR SENATOR FORD: This is in response to your letter of April 11, 1985, concerning transportation and demilitarization of bulk chemical agents at Lexington-Blue Grass Depot Activity, Kentucky.

The Army does not intend to transport either chemical munitions or lethal chemical agents (to include bulk quantities) into Lexington-Blue Grass Depot Activity for demilitarization.

I trust this clarifies our previous statement and satisfies your request.

Sincerely,

JAMES R. AMBROSE,
*Under Secretary of the Army.*

---

JUNE 18, 1986.

Hon. JAMES R. AMBROSE,
*Under Secretary of the Army, Department of the Army, Washington, DC.*

DEAR MR. SECRETARY: The Army will soon be releasing its draft Environmental Impact Statement for the disposal of the national chemical stockpile. It is extremely important that the Lexington-Blue Grass Army Depot not become either a point of transit or a final resting place for additional chemical munitions or chemical agents, whether they be military or civilian.

Last April you stated in writing that no further chemical munitions will be transported into LBAD—I presume this means neither binary nor unitary, and that the Army has no plans for the destruction of other hazardous wastes than the chemical munitions already stored at the depot if an incinerator were to be built on site. At this critical time I respectfully request that you reaffirm to me personally your earlier commitment, a copy of which is enclosed.

With deep appreciation for your assistance, I am

Sincerely,

——— ———.

---

DEPARTMENT OF THE ARMY,
*Washington, DC, June 30, 1986.*

Hon. WENDELL H. FORD,
*U.S. Senate,*
*Washington, DC.*

DEAR SENATOR FORD: This is in response to your June 18, 1986, letter requesting assurance that no chemical weapons will be moved into the Lexington-Blue Grass Army Depot (LBAD).

As stated in my previous letter, the Army will not transport chemical agents or munitions into LBAD for storage or disposal. This also applies to binary weapons.

Any disposal facility built to carry out the provisions of Public Law 99-145 may not be used for any purpose other than the destruction of lethal chemical weapons and munitions. These facilities will be cleaned, dismantled, and disposed of when no longer needed for chemical destruction. We will abide by the provisions of the law.

I hope that this clarifies the Army's position in regard to destruction of chemical weapons and munitions at LBAD.

Sincerely,

JAMES R. AMBROSE,
*Under Secretary of the Army.*

Mr. FORD. Madam President, I urge my colleagues to accept this amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. GOLDWATER. Madam President, the Army had assured me in the Armed Services Committee that they had no intention of putting additional gas at that place. We have absolutely no objection to this amendment. Senator NUNN has told me he has no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2564) was agreed to.

Mr. PRYOR. Madam President, I am sorry I did not get in on the beginning of this debate; if I may just pose this question: If we are going to go into the production of a new generation of gas or nerve gas, chemical warfare, I wonder if the chairman of the Armed Services Committee might inform the Senator from Arkansas exactly where the new nerve gas will be stored.

Mr. GOLDWATER. Madam President, I might say to my friend that that is information we do not have. But I can assure him that it will not be in the area that we are talking about now. I feel relatively safe in saying that it will not be stored east of the Mississippi River.

Mr. PRYOR. Well, what about 60 miles west of the Mississippi River, in Pine Bluff, Arkansas? We have a very large facility there.

Mr. FORD. May I respond, Madam. President.

Mr. PRYOR. Yes.

Mr. FORD. I say to my friend from Arkansas that this has nothing to do with any binary weaponry. All this has to do with is consideration about bringing in new nerve gas and storing it in a location. It handles this incineration question. I think that is all the intent of this legislation is. But the Senator's question is a good one.

Mr. PRYOR. I do not want to delay this vote and I am certainly not going to ask for the yeas and nays on this, but I was very curious about it, because the Senator from Arkansas may, before this bill has been concluded and disposed of, want to introduce an amendment stating the same for the Pine Bluff arsenal in Pine Bluff, AR. I do not know whether I would or not but I wonder, should I do that, would there be an objection to the introduction of that amendment and would it be accepted?

Once again, I have no intention of doing it but would the same roughly apply to the Pine Bluff, AR, arsenal as it does here?

□ 1320

Mr. McCONNELL. Will the Senator yield for an observation before the Senator responds to that? I think it is important to know that at the Lexington-Bluegrass Depot only 2 percent of the Nation's stockpile is currently located. So this facility has not been a player, if you will, in this whole business of the storage of chemical weapons in the past. And the Army says it would not have built the facility there in the first place had it known it was going to become such a heavily populated area. So the elimination of this facility as to the future does not have much of an impact on the question that the Senator asked.

Mr. PRYOR. I know that as we produce the new chemical weapons, and it appears that we are—I hope that we will not, but as we do produce it, under the law we must destroy the present stockpile. Now, the issue is where do we destroy it? How do we destroy it? When do we destroy it? And I just want to make absolutely certain it is not decided that, "Well, we will just destroy it all in Pine Bluff, AR." I do not want Pine Bluff, AR to become the national or international dumping ground for all of this nerve gas and chemical warfare that we have built over the years, and this is what I am very, very concerned about. Like I say, I may well want to have a similar amendment that would spell out Pine Bluff as an area where we do not want any additional nerve gas to be stored or disposed.

That is my concern. I do not want to slow up the debate. I have no objections to this amendment offered by the two Senators from Kentucky, but I did want to express that concern and I appreciate the patience of the distinguished chairman of the Armed Services Committee.

Mr. GOLDWATER. This subject, Madam President, has not even been discussed. There will be an amendment relative to binary gas. We are not going to make, I can say this for sure, any more loose gas, and the disposal of what we have left, which is not a great amount, has not been completely discussed yet by the Defense Department.

Mr. WARNER. Madam President, last year the senior Senator from Kentucky [Mr. FORD] brought this amendment to the attention of those of us on the Military Construction Subcommittee. At that time, I indicated my intention to oppose it. He then, recognizing the opposition, withdrew the amendment. Of course, it has been brought back again this year by the junior Senator, and has been accepted by the managers. So much for that. I just wish to have the RECORD to recite my

objection to this amendment for the following reasons.

This amendment is brief, and I shall read it.

On page 229, between lines 14 and 15, insert the following new section;

(1) No chemical weapons, agents, or components used in chemical weapons may be shipped by any means into the Lexington-Bluegrass Depot in Richmond, Kentucky, for any purpose, including disposal;

(2) Following disposal of the chemical weapons stockpile stored at the Lexington-Bluegrass Depot, as required by PL 99-145, the facility may not be used for assembly, construction, testing, storage, or disposal of any chemical or biological weapon;

(3) The Secretary of Defense shall have the authority to waive these provisions in the event that he determines it is in the national security interest.

Madam President, my concern is that there are roughly 840 military installations throughout the United States. While I have considerable empathy for the Senators from Kentucky, and they have done a noble job in representing their constituents, I fear that they have established a precedent here which may cause problems in the future. This community for reasons that I know not was selected by the Department of the Army a long time ago for the purpose of providing a base to deal with the chemical weapons. It may well pose a threat to the community. I am not able to address those facts. I am certain that the RECORD reflects the statements of the two Senators from Kentucky.

Madam President, of the 841 communities across the United States, there are many where the local population have concern about the activities on that base. On a scale of 1 to 10 I do not doubt that the chemical poses perhaps the more serious problem. But there are other areas where people are dissatisfied with what takes place on those bases. If the Congress of the United States is going to begin to legislate, and legislate in a manner which really sets up a job description for that base, then it is incumbent on every Member of the U.S. Senate to look at the bases in their State and determine what risk those bases pose to the local inhabitants, and perhaps come in and get comparable protection for their communities.

This one addresses the chemical weapons. There are other bases, many of them, that have nuclear weapons. I dare say that the occupants of the local towns and villages have concerns as great as the ones here in Kentucky.

I just think as a matter of principle it is wrong for the Congress of the United States to specifically legislate with respect to a base and what may be done on that base. Now that it has been accepted, it seems to me it is an obligation for other Members of the Congress if this eventually becomes law to examine the military installations in their jurisdictions and States, and determine whether or not comparable legislation is needed to protect their residents.

Mr. PRYOR. Madam President, will the Senator from Virginia yield to me?

Mr. WARNER. Yes.

Mr. PRYOR. Madam President, commenting on the comments of the distinguished Senator from Virginia relative to the chemical waste disposal or chemical warfare storage and disposal offered by the two distinguished Senators from Kentucky, I would like the Senator from Virginia to know that I happened to walk onto the Senate floor just as that discussion was concluded. I stepped to my desk and for just a moment or two I expressed a reservation about what we were doing.

I did not know precisely the impact of this particular amendment offered by our friends, the very distinguished Senators from Kentucky. Somehow or another representing a State that does have a very, very large depot there where we have a considerable amount of what we call the unetary nerve gas, the old chemical agent stored, now, Madam President, they are considering massive incineration of this old supply as we bring on the new binary supply. I hope we will be very careful and conceivably relook at the amendments just as the Senator from Virginia has recommended.

I commend him for it. I think his comments are certainly well-taken.

Mr. WARNER. Madam President, I thank the distinguished colleague from Arkansas. I know in my own State while we are very proud of the military installations, there are certain installations that operate aircraft around the clock, 7 days a week, all hours of the day and night. Frequently that brings a certain amount of inconvenience to the local residents through noise, and indeed safety. Regretably we have had air accidents which have impacted on the communities.

I know of one case that I handled several years ago here in the Senate as a member of the Subcommittee on Military Construction in which a church was to be built at the end of a runway. It was a prime piece of land. The Department of the Air Force did not want that church built there because it was in the direct flight path, take off and let down of our bomber force. The Air Force recognized the dangers to that community. And legislation was brought in which had the impact of directing the Department of Air Force to acede to the construction of this church. I opposed that legislation at that time saying that I think it would be ill-advised and fortunately the community had the wisdom to get together with the Department of the Air Force and find another piece of land, perhaps not as suitable but nevertheless it did not pose any risk to the operation of the aircraft, the air base, nor to the future location of this church.

Madam President, having made those comments, I yield the floor.

Mr. GOLDWATER. Madam President, I think that amendment passed?

The PRESIDING OFFICER. Yes, it did. It was agreed to.

Mr. GOLDWATER. I move to reconsider the vote by which the amendment was agreed to.

Mr. FORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2563

Mr. BINGAMAN. Madam President, what is the pending business?

The PRESIDING OFFICER. Amendment 2563.

Mr. BINGAMAN. Is that the amendment I just sent to the desk?

The PRESIDING OFFICER. Yes; that is correct.

Mr. BINGAMAN. Mr. President, the amendment, which Senator BOREN and I are offering would raise the price of tobacco products in military commissaries, exchanges, and ships' stores to the local prevailing price outside of the military facility and use the increased revenues which this would generate for military health, welfare, and recreation purposes in each of the services. The goal of this amendment is simply to take away the current incentive which exists within the military community to use tobacco products to a greater extent than the rest of our society uses those products.

Madam President, the damage to our society from smoking is well recognized. It amounts to tens of billions of dollars annually. As a result of efforts by Senator STEVENS and Senator BOREN last year on this same issue, the Defense Department carried out a study which they submitted to Congress in March on smoking and health in the military. That report documented the damage which smoking does within the military community to military health and military readiness of this country. According to the DOD study, smoking added an estimated $210 million in direct military health care costs in fiscal year 1984. The report documented that smokers in the military do worse on physical fitness tests than do nonsmokers. The report documented just how much more prevalent smoking is in the military today than it is in the civilian community. Fifty-two percent of adult males in the services smoke compared to 36 percent of adult males in our civilian society. Forty-seven percent of adult females in the services smoke as opposed to 29 percent in the rest of our society. Perhaps most disturbing, Madam President, 52 percent of service members aged 17 to 19 smoke, whereas only 21 percent of those in

that age group in the society at large do.

There are undoubtedly many factors which contribute to the prevalence of smoking in the military. But one very important factor clearly is the price differential which military families see when they go to purchase cigarettes in commissaries and exchanges. Within the United States, cigarettes are 35 percent cheaper in commissaries and 20 percent cheaper in exchanges than they are in civilian stores on the average. Overseas, tobacco products are 40 to 60 percent cheaper than the average U.S. price. One can get a carton of cigarettes in a commissary overseas for $4.13 compared to a U.S. price of $10.06.

Madam President, the amendment which I am offering today, with Senator BOREN, is very similar to the provision included in the Senate version of last year's Defense Appropriations Act as a result of the initiative of Senators BOREN and STEVENS. I have drawn heavily on the voluminous DOD report which was submitted to the Congress in March of this year. I do not agree, of course, with the decision which Secretary Weinberger took upon receiving that study; namely, not to raise the price of tobacco products in the military resale system and instead to only launch an antismoking campaign. What sort of signal is sent to a service member, Madam President, if, on the one hand, he is told not to smoke and on the other hand, he is encouraged to smoke through the DOD pricing policy. This amendment seeks to end that contradiction between tobacco pricing policy and the services' antismoking campaigns in a way that I believe is fairest to the military community. While smokers will face increased prices under this amendment, all military members and their families, smokers and nonsmokers, will reap the benefit of the additional funds applied to their morale and welfare activities.

Let me say, Madam President, that I do not regard this amendment as an erosion of military benefits. As U.S. Surgeon General C. Everett Koop has put it, how can a lifetime of poor health and premature death be regarded as a benefit? To the extent that my amendment will discourage smoking in the military community, that will prove to be a benefit for those who stop smoking. And the extra morale and welfare funds are a benefit to all.

I would also note that there is no question about this amendment affecting a service member's freedom of choice on whether to smoke or not to smoke. Under the amendment, tobacco will continue to be sold in commissaries and exchanges and ships' stores but just not at a subsidized rate. I strongly believe that we should stop the social engineering in which we have been engaged with our military community. We should stop the encouragement of ill health and premature death within the military community.

Mr. President, I might note on the question of freedom of choice that I personally am concerned with the coercive nature of some of the new antismoking regulations in the Army and the Navy. I do think that it is very important to end the culture within the services of "If you've got 'em, smoke 'em." I am not convinced that new coercive regulations would be as effective as what we are proposing here today, which is simply to raise the price of cigarettes to the same level inside the gate at military facilities as outside the gate.

Mr. President, the amendment that we are offering has been endorsed by the Coalition on Smoking OR Health, which includes the American Cancer Society, the American Lung Association, and the American Heart Association. I ask unanimous consent that a letter which I have received from the Coalition on Smoking OR Health in support of my amendment be included in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COALITION ON SMOKING OR HEALTH,
*Washington, DC, May 29, 1986.*

Hon. JEFF BINGAMAN,
*U.S. Senate. Senate Hart Office Building, Washington, DC.*

DEAR SENATOR BINGAMAN. The Coalition on Smoking OR Health and its member organizations, the American Cancer Society, the American Lung Association and the American Heart Association, strongly endorse your proposed Amendment to the FY87 DOD authorization bill to prohibit tobacco sales in military commissaries and increase tobacco product prices in base exchanges and ship stores.

Earlier this year, we urged the Secretary of Defense, as you did, to adopt restrictions on military tobacco sales and to increase the cost of tobacco products sold to military personnel as part of the Department's new anti-smoking health initiative. While we are supportive of the anti-smoking campaign launched by the March directive, we were disappointed at the Secretary's inaction on the pricing issue, and look forward to assisting with passage of your amendment. To this end, we will be contacting each member of the Armed Services Committee in advance of the mark-up to request support for your proposal.

Thank you again for your initiative on this issue; your ongoing involvement and support is deeply appreciated.

Sincerely,

ALAN C. DAVIS,
*Vice President, Government Relations, American Cancer Society, Chairman, Coalition Steering Committee.*

Mr. BINGAMAN. I also ask unanimous consent that an editorial which appeared in the Army Times in January 20 of this year with regard to the cigarette pricing policy in the Defense Department also be entered in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From The Army Times, Jan. 20, 1986]

CIGARETTE PRICES

Military smokers have a bone to pick with William E. Mayer, assistant secretary of defense for health affairs.

As the Pentagon's top medical official, Mayer wants to warn military people about the dangers of smoking.

More than that, he wants to discourage people from smoking by boosting cigarette prices in military commissaries. Higher prices, he argues, will reduce the incentive for service people to smoke. He wants the habit to be no more attractive for the military than it is for other consumers.

This gets a lot of service people riled up. For smokers, it's pretty easy to lump Mayer's effort in with what service people generally perceive as a steady "erosion of benefits." We've complained as loud as anyone about lost military benefits over the years. Not this time.

If only one out of every 100 smokers decides to quit because prices increase, then Mayer, as a physician and director of military medicine, succeeds. Although he is a pipe smoker himself, Mayer thinks the tobacco habit is killing people, and the medical community has plenty of statistics to back him up. Those who smoke are more prone to develop cancer, heart disease, lung disease and other illnesses. Smokers add to service health-care costs and probably are less ready than are nonsmokers to respond to military emergency.

Mayer thinks smoking should be discouraged as a matter of policy. That's hard to do, he argues, if the military offers cut-rate prices on tobacco products. Impressionable young people, and perhaps even some older smokers, may see cheap cigarettes in commissaries as a kind of back-handed endorsement that it is all right to smoke. How serious can the health risk be if the military, which routinely encourages exercise regimens and diet programs to keep healthy, also provides cigarettes at a 35 percent discount?

Defense health officials say that when the price of cigarettes goes up, hard-line smokers may not change their habits but younger smokers do. Some of them quit. Mayer thinks that's worth the grief he's getting for endorsing higher cigarette prices in commissaries.

While we are sensitive to the complaints of military consumers that the last thing they need is higher commissary prices, how can Mayer be faulted? For not believing tobacco industry claims that the dangers of smoking are unproven? Virginia Congressman Dan Daniel calls Mayer a "brass nanny" who enlisted families don't need and urges him to examine his motives. Daniel should take his own advice. He not only serves on the House panel that oversees commissary operations but represents voters of a major tobacco-growing region.

During this latest flap over cigarette prices, some in the Pentagon have raised a long-standing argument that higher cigarette prices will mean fewer shoppers in the commissaries and this in turn will reduce sales and perhaps endanger commissary operations altogether. Lower sales at a minimum could mean staff reductions and maybe less convenient store hours. Certainly the impact cannot be ignored.

But can you blame Mayer if he labels this argument cockeyed? After all, can't the military find a better way to keep commissaries from closing than by pumping money from the lungs of service families? Only five of 80 Navy commissaries sell cigarettes. The rest survive without them.

Higher cigarette prices indeed will place a financial strain on many family budgets. No doubt, tens of thousands of service personnel and dependents are addicted to tobacco products and do not plan to give them up, no matter how high prices climb. But some will.

And when those health benefits are measured against any combination of complaints—smokers' rights, implied guarantees on shopping discounts, the potential effect on commissary operations—the scale still tips in Mayer's favor. He's doing his job.

Mr. BINGAMAN. Madam President, I would also ask unanimous consent that several tables which describe the effect of the amendment on the military resale system and its sales of tobacco products and its profits be included in the RECORD at this point as well.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

AVERAGE PRICE FOR A CARTON OF CIGARETTES [1]

| | Commissaries | Exchanges | Ship's stores |
|---|---|---|---|
| Current system: | | | |
| United States | $6.62 | $8.00 | $7.25 |
| Overseas | 4.13 | 5.70 | 4.50 |
| Bingaman plan: | | | |
| United States | 10.06 | 10.06 | 10.06 |
| Overseas | 10.06 | 10.06 | 10.06 |

[1] Under both plans the average cost of a carton of cigarettes for the military resale system is $6.30 in the United States and $3.93 overseas.

| Total | 61.60 | 619.70 | 339.70 | 280.00 | 202.27 |

Mr. BINGAMAN. These tables, Madam President, are derived from tables that were in the March 1986 DOD report. They indicate—and I think this figure is very revealing—that there are some $202 million in additional profits that will be generated in the military resale system if this amendment is adopted.

Madam President, I urge my colleagues to support the principle that tobacco products should not be sold at discount within the military system. Let us get to the point where cigarettes and other tobacco products are as expensive on the base as they are off the base. Let us stop the social engineering and experimenting with the lives of military members and their families. This amendment would not affect the freedom of choice of members to smoke if they wished. The amendment is not an erosion of benefits for military members and their families because of the additional profits generated from the amendment being designated to go into the military morale and welfare funds.

□ 1330

Madam President, as Members make up their minds on how to vote, I hope they will keep the health benefits of the amendment foremost in mind.

The Army Times editorial concluded:

When those health benefits are measured against any combination of complaints, smokers' rights, implied guarantees on shopping discounts, the potential effect on commissary operations, clearly the scale still shifts in favor of this approach.

Madam President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. GOLDWATER. Madam President, we would like a time agreement on this amendment, I am not ready to suggest anything, because I have no particular interest in it. I just want to announce that we are interested in a time agreement; and if we get the people for and against it together, we can work it out.

Mr. FORD. Madam President, there will be other Members who wish to speak. I have talked to the distinguished chairman of the Agriculture Committee, Senator HELMS, and we are in agreement, I think basically, on the proposal, since it relates to an agricultural product. The distinguished Senator from Virginia will be interested, too. I do not want to take too long, but some accusations have been made here, and I am the one who is supposed to defend tobacco, I guess, because tobacco is grown in my State.

The distinguished Senator from New Mexico has gone too far this time. Social engineering: What does he think he is doing in his amendment? It is social engineering. What does he think he is doing in his amendment as it relates to the health of military personnel?

Let us take overseas, for example. You prohibit military personnel to buy cigarettes at the commissary or at the PX. What is that person going to do if he wants to buy something? He will go outside the post where it is cheap, buy a much harsher cigarette. He does not know what is in it. There are no regulations as it relates to cigarettes, high tar, high nicotine. That is what the Senator from New Mexico wants to do.

What he is doing, also, is putting a chink into the armor of what the military offers its personnel. The salary is not great, but they have some perks, and those perks are reasonably low prices on products. Commissaries add 5 percent. Now what the Senator from New Mexico wants to do is add about 40 percent to the cost of a carton of cigarettes. He can walk downstairs and get a carton of cigarettes cheaper in the Capitol Building, cheaper than he wants our personnel to buy cigarettes. Why do you not add on to the amendment and eliminate your credit card over in the stationery office?

That is the reason we are defending this position, defending a position for the military personnel. What he is trying to do is say to military personnel: "You pay a higher price than anybody else. We are going to include local taxes. We are going to include State taxes." But you do not have to pay any of them. If you are not going to pay any of them, why collect them?

He is going to take the money, and they are going to have better facilities. He has been around here long enough to know that the minute you get additional money in the funds, we are going to cut the appropriations; we are going to reduce the appropriations; and save money under Gramm-Rudman-Hollings.

I can tick these things off: one, two, three, four, five, six, seven. But why should we? Let us not do this to our military personnel—the privates, corporals, and sergeants—and tell them: "You can't do anything. You have to go off the post. You have to go to a bar somewhere."

What do we expect these people to do? They will have vending machines on the post that will be cheaper than they can buy them from the commissary. You can go to the club and buy them cheaper than you can buy them from the commissary. That is exactly what would happen under this amendment.

Check around town and see what it would cost our military personnel for a carton of cigarettes if we applied the local price. Think of the cost that would be added when you have to monitor the prices. A supermarket has at one price, a drug store at another. We just added $2.40 a carton to cigarettes on the Federal tax. It is just an additional cost.

Every volunteer for active duty and every person who elects to continue his obligation to service has considered, in conjunction with that decision, the right to utilize military commissaries as a basic supplement to his military pay. The Federal Government has held out this promise as an incentive for obligated service. Now we are beginning to put a chink in the armor. We are saying to the military personnel: "We in Congress are beginning to break our obligation to you by saying, 'You don't have that little perk any more. You don't have the incentive to come into the service because you can buy your food and clothing at a reasonably low price.'"

To artificially increase the prices of tobacco products because some Members of Congress are opposed to smoking would breach the understanding that members of the U.S. military service have when they begin their enlistment of the right to shop and save in commissaries.

So, Madam President, this is an amendment that needs to be defeated. If this amendment is adopted, what product will be singled out by Congress for price increase next?

I have a letter I received from Secretary of Defense Caspar Weinberger, and I want to read just a few lines from his letter to me as he refers to the joint letter that was sent to him on the Army's policy on the controlling of smoking. He says this:

> There is to be no general ban on smoking, however, nor have we restricted availability of tobacco products. Thus, while we do seek to educate our service members and civilian employees about the health risks of smoking, to discourage them from smoking, and to make available a healthy environment for nonsmokers, ultimately whether service members and employees smoke will remain a matter of personal choice.
>
> The focus of the Army's antismoking campaign is on education and assistance to those who want to stop using tobacco products. The intent is not to restrict individual freedom.

That is what you are doing. You are saying to a fellow on a ship that will be gone for 16 months, "You are going to pay more than the landlubbers."

Mr. President, I hope my colleagues will support me when I move to table the amendment of my distinguished colleague, when the speakers have had an opportunity to speak.

□ 1340

Mr. McCONNELL. Madam President, I think my senior colleague from Kentucky has covered this issue quite well.

The issue is not whether personnel in the military will smoke. Those who choose to do so will.

The issue is, of course, one of fairness and one of price.

I think my senior colleague covered it much better than I could when he pointed out that by raising the prices you simply send the personnel off base to look for other cigarettes, many of which will not be of nearly the high quality that American cigarettes are.

It has been, of course, a major perk for the members of the military to have the advantages that are provided for them in the PX's around the world. It is one of the ways in which we encourage people to stay in the service, give them a chance to purchase a variety of different items at a cost below that that they would have to pay out in the community.

So I think the issue here is one of fairness, one of fairness. It is simply not fair to say to those who are serving our country that you must pay more for a legal product than any other of the products in the commissary which are benefiting from the reduced prices.

Madam President, I will not elaborate further. I think it is simply a question of fairness.

I yield the floor.

Mr. BROYHILL. Madam President, I join in the remarks of the Senator from Kentucky who states that this issue does not address whether military personnel are going to smoke. It is an issue of fairness. That is exactly what it is.

I think we have to remember the purpose of what the commissaries are all about. The commissaries provide a source for military personnel to buy groceries and to buy related items. They do realize a savings and it is part of the contract when they come in. It is really one of the fringe benefits that they have for being in the service.

All this is going to do is raise the price of tobacco products. It will only raise the price on this one particular product. It is going to result in an administrative nightmare.

I just got to the floor and found out about this amendment a few minutes ago. I do not know if the Senator from Kentucky [Mr. FORD] has discussed that issue.

But as I understand it, the amendment would require separate bookkeeping with respect to the tobacco products in every different commissary in the country and every ship at sea. It is going to result in a real administrative bookkeeping nightmare. I expect the actual cost when you get down to it will not realize the kinds of profits that the Senator is talking about.

I really cannot say what the purpose of it is. But if its purpose is to try to discourage people from smoking, I do not think that result will be accomplished.

As the Senator from Kentucky, Senator McCONNELL, pointed out, it is an issue of fairness. I would hope we would table this amendment.

I yield the floor.

Mr. WARNER. Madam President, I rise in opposition to this amendment and in doing so, I remind the Senate that the men and women wearing the uniform of the United States, be they here stationed in the United States or all over the world, have no lobbyists. They have no trade association. The Congress of the United States are the ones who must speak forth and defend their rights and prerogatives.

I happen to be sympathetic with my colleague from New Mexico in that I myself have practically curtailed the use of tobacco because it is a personal decision. But I made that decision as a result of my own personal study and desire to limit the use, not because somebody or some organization came and directed me to do that.

That is precisely the manner in which the Secretaries of Defense, the Navy, the Army, and the Air Force are proceeding to deal with this ever-increasing controversy on smoking and health.

The Secretary of Defense has put out the famous DOD directive referred to by the troops as "ten-ten dot ten," which is essentially an educational program and following a period of time in which that has been implemented, it is the tentative decision of the Secretary to determine whether other measures need be taken.

Having at two points in my lifetime served as an enlisted person and then as a junior officer I know what it is to learn from Washington that Congress has once again dictated a change in your lifestyle.

I feel at this time Congress should not dictate that change but allow the individuals in whom we entrust the lifestyles of the men and women of the Armed Forces; namely, the Secretaries and the Chiefs of Staffs of the various services, to proceed under "ten-ten dot ten" and determine what if necessary are the steps to be taken to bring into a proper balance the need for education in the use of tobacco.

We could well establish a precedent here today that could be advocated by those who are opposed to any form of use of alcohol the similar imposition of a cost structure.

Our distinguished colleague from Kentucky mentioned the administrative problems placed upon the armed services, and I associate with those administrative problems additional costs at the very time when we are looking in every possible way to reduce the cost of the Armed Forces of the United States.

So I conclude by saying that this issue is being handled by the senior civilian and uniformed personnel in the Department of Defense and that we should wait a period of time to allow the directives now in force to be assessed and also bear in mind that we are the ultimate caretakers of the men and women in uniform and this time we do not have before the Senate of the United States that body of evidence, in my judgment, to justify taking this action.

Mind you, there is a certain uniqueness to this action. We, the Senate, deliberating on an authorization bill approaching $300 billion, are reaching down and making decisions with respect to just one commodity being sold in the commissaries.

We are actually putting ourselves in the position of pricing clerks walking up and down the aisles now fixing the price of an item in a commissary. I say that we have more important things to deal with than establishing the price section in the commissaries, and I

71-059 O-87-6 (Pt. 14)

hope in making this decision we come back to my original observation; namely, that we are the ultimate persons responsible for the lifestyle of these individuals wearing the uniforms, and I think that they will receive with considerable misgiving any judgment that we might render in support of this amendment which would affect those lifestyles and not having received that body of evidence in fact that would be required to make an informed decision.

For that reason, I strongly oppose the amendment of my distinguished colleague from New Mexico.

Mr. BINGAMAN. Madam President, let me just briefly respond to the statements that were made by my colleagues to clarify what the amendment does. I think there may be some confusion on it.

This is not an amendment that prohibits anybody from smoking or using tobacco products. It makes it clear that those products are available today and will remain available wherever they have been sold. There is no prohibition involved in this.

The question then arises is this unfair. It has been alleged here this is unfair to the military personnel to suggest that they should pay the same for these products as the civilian citizens of this country have to pay, that this is taking a perk away from the military personnel; that they have this perk of cheap tobacco products and this was an incentive that brought them into the service and for us to step in and require that the price be the same in the military facility that it is in the civilian facility nearby is somehow unfair to military personnel.

□ 1350

I have difficulty believing that anyone takes that argument very seriously. We are not arguing that the military should pay more than the civilian personnel in any sense. We are just saying they should pay the same. We are saying whatever additional incentive exists for military personnel to smoke should be eliminated. They should have the same incentive or discouragement or whatever factors affecting them that the civilian population experiences.

On the administrative argument, I would point out that this is not the only product that this is done on. As I understand it, there are no alcoholic beverages sold in the commissaries today. Alcoholic beverages are sold in PX's and there is a regulation that the Department of Defense has which requires that the price of those package alcoholic beverages be within 10 percent of the lowest average prevailing shelf price of civilian outlets in the area.

So there is a precedent for this. This is not the new administrative nightmare that some would suggest it is. It is something that the military has done in the past and is doing at the present time with regard to alcohol and could easily do with regard to tobacco products as well.

Finally, let me say that we have now two reports done by the Department of Defense, one a blue ribbon panel on health in the Department of Defense and one this study which was just completed this March, which make it very clear that tobacco products are not just another product sold in the PX's, that smoking and the use of tobacco products is one of the most severe health problems our military faces today.

And for us to step in and say we believe that we should bring some rationality to the pricing of these products on military facilities, I think, is an appropriate step. I urge my colleagues to support the amendment.

Mr. FORD. Madam President, I just want to make two points if I may. We may have something here that will delay the vote, but I am ready.

Service personnel, by entering upon or continuing their obligation, relied upon the promise to be able to shop at commissaries at reduced prices. If these price increases continue, it will be easy to understand if they consider that Congress has broken that promise.

Madam President, I agree with my distinguished friend from Virginia who says we are debating the $300 billion defense authorization bill and we have gone down to walking through the commissaries, putting price tags on items.

(The VICE PRESIDENT assumed the Chair.)

Mr. FORD. Mr. President, I move to table the amendment of the distinguished Senator from New Mexico and I ask for the yeas and nays.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The VICE PRESIDENT. The majority leader is recognized.

Mr. DOLE. Mr. President, I ask unanimous consent that we suspend for the impeachment process and that the vote occur after that.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BOREN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded in order that I might be allowed to be allocated 2 minutes to speak on the Bingaman amendment at this time.

The VICE PRESIDENT. Without objection, it is so ordered, and the Senator from Oklahoma is recognized for 2 minutes.

Mr. BOREN. Mr. President, I thank the Chair and I thank the distinguished majority leader and the managers of the bill for allowing me this time to speak in behalf of the Bingaman amendment.

I think the facts are very, very simple. I have offered an amendment very similar to this last year that was included in the committee report and then stripped out in the conference. We are dealing with a situation in which we are indirectly subsidizing and encouraging the members of the Armed Forces to smoke. It obviously constitutes a hazard to their health. By offering the sale of cigarettes at the military installations below their real cost, below the prevailing cost in the surrounding community, we are encouraging military personnel to do something that is hazardous to their own health.

The recent study by the Department of Defense itself indicates that 54 percent of military personnel smoke cigarettes, while only 32 percent of the general public are smoking cigarettes. While subsidizing with one Government program the use of cigarettes, we then have to turn around with another Government program and pay over $210 million a year to take care of the health problems, the direct health problems created in the military alone from the use of cigarettes.

Mr. President, I recently received a letter from a retired Naval officer in Oklahoma who indicates to me that he was a heavy smoker and that he could afford to do so because of the low price of cigarettes at the Naval bases where he was stationed. He said:

On the 16th of December I quit smoking the hard way—I suffered a minor heart attack and had quadruple bypass open heart surgery.

His cardiologist and surgeon told him that the greatest single contributor to his problem was smoking. He goes on to say that he strongly supports the kind of action that has been proposed by Senator BINGAMAN and myself. I wish it had been taken a long time ago so that people in his circumstance would not have been indirectly encouraged to continue a habit hazardous to their own health by a subsidy, an indirect subsidy program of their own Government.

I ask unanimous consent, Mr. President, that the letter from Mr. C. Dennis Grady, from Oklahoma City, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

C. DENNIS GRADY,
*Oklahoma City, OK, March 18, 1986.*

DEAR SENATOR BOREN, I am writing to let you know that I fully support your position on taxes for cigarettes and other tobacco related products at military installations.

Your position on this very sensitive issue was brought to my attention by Jim Buchanan at a recent chamber of commerce luncheon here in Oklahoma City. Jim felt that I should write and tell you why I am supporting this issue even though I am a retired Naval Officer.

I was a heavy smoker and could afford to be because of the low price of cigarettes at the Naval bases where I was stationed. Even as inflation continued to rise and the national debt increased, my cigarettes were cheap!

On the 16th of December I quit smoking the hard way—I suffered a minor heart attack and had quadruple by-pass open heart surgery. My Cardiologist and Surgeon told me that the single greatest contributor to my heart disease was smoking.

I really feel that if I had had to pay the normal price for my cigarettes I might have had a little more incentive to stop smoking. Monetary reasons are not the greatest of all motives, but it might have helped. For this reason I believe that the military are almost encouraged to smoke due to the very low cost of tobacco on military installations. I firmly believe that the military should pay the full price for their tobacco products. This might only increase revenues by several millions but at least it's a start at reducing the national debt, and may help someone to stop smoking; I learned my lesson too late.

I hope my writing to you has given you the impetus to keep campaigning to eliminate the military tobacco subsidy.

Sincerely,

C.D. GRADY,
*CW03 USN (ret).*

Mr. BOREN. Mr. President, again I thank my colleagues for allowing me this time. I hope we will seriously consider this matter. This is not something of benefit to the military.

The funds that would be generated by charging the prevailing price for cigarettes will go into the moral and welfare fund to truly help our people in uniform, instead of contributing to their own health problems.

I thank the Chair.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the role.

The assistant legislative clerk proceeded to call the roll.

□ 1400

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

## IMPEACHMENT OF JUDGE HARRY E. CLAIBORNE

At 2:03 p.m., the managers on the part of the House of Representatives of the impeachment of Harry E. Claiborne appeared below the bar of the Senate, and the secretary to the majority, Howard O. Greene, Jr., announced their presence, as follows:

Mr. President, I announce the presence of the managers on the part of the House of Representatives to conduct the proceedings in the impeachment of Harry E. Claiborne, U.S. district judge in and for the district of Nevada.

The VICE PRESIDENT. The managers on the part of the House will be received and assigned their seats.

The managers, accompanied by the Sergeant at Arms of the House of Representatives, Jack Russ, were thereupon escorted by the Sergeant at Arms of the Senate, Ernest Garcia, to the seats assigned to them in the area in front of the Chair.

The VICE PRESIDENT. The Sergeant at Arms will make the proclamation.

The Sergeant at Arms, Ernest Garcia, made the proclamation, as follows:

Hear ye! Hear ye! Hear ye! All persons are commanded to keep silent, on pain of imprisonment, while the House of Representatives is exhibiting to the Senate of the United States articles of impeachment against Harry E. Claiborne, U.S. district judge for the district of Nevada.

The VICE PRESIDENT. The managers on the part of the House will proceed.

Mr. Manager RODINO. Mr. President, the managers on the part of the House of Representatives are here present and ready to present the Articles of Impeachment which have been preferred by the House of Representatives against Harry E. Claiborne, a district judge of the United States for Nevada.

The House adopted the following resolution, which with the permission of the Senate I will read.

H.R. 501

IN THE HOUSE OF REPRESENTATIVES, U.S.,
*July 22, 1986.*

*Resolved,* That Peter W. Rodino, Jr., Robert W. Kastenmeier, William J. Hughes, Romano L. Mazzoli, Dan Glickman, Hamilton Fish, Jr., Henry J. Hyde, Thomas N. Kindness, and Michael DeWine, Members of the House of Representatives, are hereby appointed managers to conduct the impeachment trial against Harry E. Claiborne, judge of the United States District Court for the District of Nevada. These managers are hereby instructed to appear before the Senate of the United States and at the bar thereof in the name of the House of Representatives and of all the people of the United States to try the impeachment of Harry E. Claiborne of high crimes and misdemeanors in office and to exhibit to the Senate of the United States the articles of impeachment against that judge which have been agreed upon by the House of Representatives. These managers shall demand that the Senate take order for the appearance of Harry E. Claiborne to answer such impeachment, and demand his conviction and appropriate judgment thereon.

With the permission of the President of the Senate, I will now read the Articles of Impeachment, House Resolution 461.

H. RES. 461

IN THE HOUSE OF REPRESENTATIVES, U.S.,
*July 22, 1986.*

Impeaching Harry E. Claiborne, Judge of the United States District Court for the District of Nevada, of High Crimes and Misdemeanors

*Resolved,* That Harry E. Claiborne, a judge of the United States District Court for the District of Nevada, be impeached for misbehavior, and for high crimes and misdemeanors; that the evidence heretofore taken by a subcommittee of the Committee on the Judiciary of the House of Representatives sustains articles of impeachment, which are hereinafter set out; and that the articles be adopted by the House of Representatives and exhibited to the Senate:

Articles of Impeachment exhibited by the House of Representatives of the United States of America in the name of itself and all of the people of the United States of America, against Judge Harry E. Claiborne, a judge of the United States District Court for the District of Nevada, in maintenance and support of its impeachment against him for misbehavior and for high crimes and misdemeanors.

ARTICLE I

That Judge Harry E. Claiborne, having been nominated by the President of the United States, confirmed by the Senate of the United States, and while serving as a judge of the United States District Court of the District of Nevada, was and is guilty of misbehavior and of high crimes and misdemeanors in office in a manner and form as follows:

On or about June 15, 1980, Judge Harry E. Claiborne did willfully and knowingly make and subscribed a United States Individual Income Tax Return for the calendar year 1979, which return was verified by a written declaration that the return was made under penalties of perjury; which return was filed with the Internal Revenue Service; and which return Judge Harry E. Claiborne did not believe to be true and correct as to every material matter in that the return reported total income in the amount of $80,227.04 whereas, as he then and there well knew and believed, he received and failed to report substantial income in addition to that stated on the return in violation of section 7206(1) of title 26, United States Code.

The facts set forth in the foregoing paragraph were found beyond a reasonable doubt by a twelve-person jury in the United States Court of the District of Nevada.

Wherefore, Judge Harry E. Claiborne was and is guilty of misbehavior and was and is guilty of a high crime and misdemeanor and, such conduct, warrants impeachment and trial and removal from office.

ARTICLE II

That Judge Harry E. Claiborne, having been nominated by the President of the United States, confirmed by the Senate of the United States, and while serving as a judge of the United States District Court for the District of Nevada, was and is guilty of misbehavior and of high crimes and misdemeanors in office in a manner and form as follows:

On or about June 15, 1981, Judge Harry E. Claiborne did willfully and knowingly make and subscribe a United States Individual Income Tax Return for the calendar year 1980, which return was verified by a written declaration that the return was made under penalties of perjury; which return was filed with the Internal Revenue Service; and which return Judge Harry E. Claiborne did not believe to be true and correct as to every

material matter in that the return reported total income in the amount of $54,251 whereas, as he then and there well knew and believed, he received and failed to report substantial income in addition to that stated on the return in violation of section 7206(1) of title 26, United States Code.

The facts set forth in the foregoing paragraph were found beyond a reasonable doubt by a twelve-person jury in the United States District Court for the District of Nevada.

Wherefore, Judge Harry E. Claiborne was and is guilty of misbehavior and was and is guilty of a high crime and misdemeanor and, by such conduct, warrants impeachment and trial and removal from office.

ARTICLE III

That Judge Harry E. Claiborne, having been nominated by the President of the United States, confirmed by the Senate of the United States, and while serving as a judge of the United States District Court for the District of Nevada, was and is guilty of misbehavior and of high crimes in office in a manner and form as follows:

On August 10, 1984, in the United States District Court for the District of Nevada, Judge Harry E. Claiborne was found guilty by a twelve-person jury of making and subscribing a false income tax return for the calendar years 1979 and 1980 in violation of section 7206(1) of title 26, United States Code.

Thereafter, a judgment of conviction was entered against Judge Harry E. Claiborne for each of the violations of section 7206(1) of title 26, United States Code, and a sentence of two years imprisonment for each violation was imposed, to be served concurrently, together with a fine of $5000 for each violation.

Wherefore, Judge Harry E. Claiborne was and is guilty of misbehavior and was and is guilty of high crimes.

ARTICLE IV

That Judge Harry E. Claiborne, having been nominated by the President of the United States, confirmed by the Senate of the United States, and while serving as a judge of the United States District Court for the District of Nevada, was and is guilty of misbehavior and of misdemeanors in office in a manner and form as follows:

Judge Harry E. Claiborne took the oath for the office of judge of the United States and is required to discharge and perform all the duties incumbent on him and to uphold and obey the Constitution and laws of the United States.

Judge Harry E. Claiborne, by virtue of his office, is required to uphold the integrity of the judiciary and to perform the duties of his office impartially.

Judge Harry E. Claiborne, by willfully and knowingly falsifying his income on his Federal tax returns for 1979 and 1980, has betrayed the trust of the people of the United States and reduced confidence in the integrity and impartiality of the judiciary, thereby bringing disrepute on the Federal courts and the administration of justice by the courts.

Wherefore, Judge Harry E. Claiborne was and is guilty of misbehavior and was and is guilty of misdemeanors and, by such conduct, warrants impeachment and trial and removal from office.

□ 1410

**The VICE PRESIDENT. The Senate will take proper order and notify the House of Representatives.**

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

□ 1420

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GRASSLEY). Without objection, it is so ordered. National Defense Authorizations for Fisal Year 1987

AMENDMENT NO. 2563

Mr. GOLDWATER. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. GOLDWATER. Have the yeas and nays been ordered on the tabling motion?

The PRESIDING OFFICER. The yeas and nays have been ordered on the tabling motion.

Mr. GOLDWATER. I suggest we proceed with the vote.

The PRESIDING OFFICER. The question is on agreeing to the motion to table. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

The PRESIDING OFFICER (Mr. MURKOWSKI). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 57, nays 43, as follows:

[Rollcall Vote No. 179 Leg.]

YEAS—57

So the motion to lay on the table was agreed to.

□ 1450

Mr. FORD. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. HELMS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2565

(Purpose: To make various amendments regarding authorizations of appropriations for activities of the Coast Guard)

Mr. STEVENS. Mr. President, I send an amendment to the desk, and I am happy to yield to the distinguished chairman if he has anything.

Mr. GOLDWATER. No.

The PRESIDING OFFICER. There are currently two amendments pending.

Mr. STEVENS. Mr. President, I move to lay aside temporarily the two pending amendments in order that I may offer this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS] for himself, Mr. D'AMATO, Mr. DODD, and Mr. BYRD proposes an amendment numbered 2565.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 229, insert the following after line 14:

SEC. 1221. COAST GUARD

(a) Of the amounts authorized to be appropriated for the Department of Defense in fiscal year 1987:

(1) $200,000,000 shall be for the acquisition and maintenance of United States Coast Guard investories related to the national defense; and

(2) $100,000,000 in operating funds for the performance of defense readiness responsibilities of the United States Coast Guard. Funds made available pursuant to the authorizations specified in this section shall be attributed to functional category 050 (National Defense) of the Budget of the Government of the United States.

(3) Of these amounts authorized, $15,000,000 shall be available for transfer to the Secretary of Transportation and shall be available only for the program described in paragraph (b).

(b) ENHANCED DRUG-INTERDICTION ASSISTANCE.

(1) ASSIGNMENT OF COAST GUARD PERSONNEL ON NAVAL VESSELS.—Chapter 18 of title 10, United States Code, is amended by adding after section 378 the following new section:

"Sec. 379. Assignment of personnel to naval vessels for drug enforcement purposes

"(a) The Secretary of Defense and the Secretary of Transportation may provide that there be assigned on board surface naval vessels at sea in a drug-interdiction

area members of the Coast Guard who are trained in law enforcement and have power to arrest, search, and seize property and persons suspected of violations of law.

"(b) Members of the Coast Guard assigned to duty on board naval vessels under this section shall perform such law enforcement functions (including drug-interdiction functions—

"(1) as may be agreed upon by the Secretary of Defense and the Secretary of Transportation; and

"(2) as are otherwise within the jurisdiction of the Coast Guard.

"(c) No fewer than 500 active duty personnel of the Coast Guard shall be asssigned each fiscal year to duty as provided in subsection (a).

"(d) As used in this section, the term 'drug-interdiction area' means an area outside the land area of the United States in which the Secretary of Defense (in consultation with the Attorney General) determines that activities involving smuggling of drugs into the United States are ongoing."

"(c) CONFORMING AMENDMENT.—The table of sections at the beginning of such chapter is amended by inserting immediately below the item relating to section 378 the following new item: "378. Assignment of personnel to naval vessels for drug enforcement purposes."

Mr. STEVENS. Mr. President, this is the amendment that I discussed briefly with the Senator from Arizona earlier and the distinguished manager of the bill has explained his situation.

I am offering this in order to have an authority for additional funding for the Coast Guard to cover those aspects of the Coast Gard that are defense related that they can no longer support out of their current budget because of the additional duties they have been given.

The Coast Guard has the administration of the Altantic and Pacific Maritime Defense Zone. I believe that is a defense activity.

They have high seas drug enforcement duties under the act of 1980. They have under the act to prevent pollution from ships on sea in 1980, a substantial increase in activity. The Natural Gas Pipeline Safety Act of 1978, the Port and Tanker Safety Act of 1978 gave additional duties.

Those two acts gave additional duties to the Coast Guard and, of course, the Magnuson Act, the Fishery Conservation Act of 1976, gave them duties.

The difficulty is, as I said to other Members on the floor, the Coast Guard currently is neither fish nor fowl. In peace time, they are a civilian agency with military men and women, military personnel.

They are people in the Coast Guard. When the Department of Defense requests a pay increase—and in this bill there is a 4-percent pay increase—when the defense personnel pay is increased, the Coast Guard personnel have a pay increase and justifiably so, because in war time, they are automatically defense people.

But the civilian side of the budget has not been increased to meet that.

Every year now for 4 years we have dealt with this problem on a basis of authorization in the appropriations bill and it has led to a great deal of disagreement, an unfortunate coalition between the two committees of the Senate that deal with the defense activities, namely the defense authorization bill, with a committee which is the parent committee. Ours is a subcommittee on defense of the Appropriations Committee.

We want to have the authority of this bill to allocate such funds as we may be able to find without increasing the budget because if you read this amendment it says from the amounts already authorized to be appropriated to the Department of Defense in fiscal year 1987. It means we have to find money within this bill that is not going to be made available because of various circumstances that might develop to the activities outlined in this bill. We want to use those moneys for the Coast Guard.

This amendment would authorize up to $200 million for acquisition and maintenance of U.S. Coast Guard inventories related to national defense and $100 million in operating funds that are the readiness funds for the Coast Guard.

The Coast Guard has an $11 billion capital inventory. It takes between $450 and $600 million a year just to maintain that inventory in usable condition. They also have $4½ billion in shoreside assets. They have a maintenance cost now of over $100 million a year. We have each year authorized them to acquire new equipment, whether it be helicopters or C-130's or new patrol ships. Those are primarily related to drug enforcement.

As they have come in they have had to have increased money. It is time now to do what the Senator from Arizona says and I hope that the Senator from Georgia and I can cooperate in this next year and frame a new piece of legislation to do just what Senator GOLDWATER has requested. That is a new authorization for the Coast Guard which directs both the Department of Defense and the Department of Transportation to adequately request the funds to fund the activities performed for each department by the Coast Guard. If that happened we would not be on the floor here today but we are, and I appreciate very much the exchange I have had with my good friend and again I honor him for the way he has handled this bill.

Mr. GOLDWATER. Mr. President, since the Senator from Alaska and I had a colloquy this morning, I have visited with the Secretary of Defense and he has agreed that he and I will get together and discuss this general problem of putting the Coast Guard someplace. Right now, it technically comes under the Department of Transportation. That is wrong.

I would like to see the Coast Guard become a recognized member of the uniformed forces.

Mr. President, the Senator knows I have mixed emotions about this amendment. On the one hand, I have always supported the Coast Guard. On the other hand, I think everyone ought to be advised that we are about to reduce the defense budget request by nearly $30 billion.

At the same time, we are proposing to fund the Coast Guard an additional $300 million when they should be funded by the Department of Transportation.

We are funding a special operations force, unrequested funding for the Coast Gurad and reserve forces, a drug enforcement capability, all of which are noble and normally supportable efforts.

□ 1500

However, funding was not requested by the administration. I do not think my colleagues were listening yesterday when Senator NUNN and I explained how many programs will be terminated if we must adhere to the outlay ceilings in the budget resolution. There is no doubt the Coast Guard is underfunded. But does it make sense to reduce active military and civilian personnel, reduce operations and maintenance and terminate programs in the defense budget, and then fund an admittedly good cause but one that should be included in the budget of the Department of Transportation?

I will reluctantly agree to this amendment, but I would like some assurance that this will be funded in the Department of Transportation budget next year.

Mr. NUNN. Mr. President, I, too, will support the amendment of the Senator from Alaska and the Senator from New York. I, too, have the same concerns expressed by Chairman GOLDWATER. We outlined yesterday to the President of the United States, and I made a very lengthy speech here early in the morning on the floor of the Senate, about the very serious situation we have with the defense budget, not just this year, but particularly in the next 3 or 4 years.

Starting next year, the squeeze is going to be beyond what most people even imagined. I do not believe this has soaked through to the people in the Navy and the Department of Defense—they are going to have to take budget cuts if their budget is held to zero growth, and as we are looking down the budget line, it looks like all the defense budgets are going to be held to that unless something changes. The Navy is going to have to take cuts, if their budget is held to zero growth, of $112 billion less than

what they are planning right now. I do not think the Navy understands that.

That is not an argument against the amendment of the Senator from Alaska, but it is an argument for the latter point made by Chairman GOLDWATER. The defense budget has been looked upon as a place where you can get help for many other agencies. I do not think that is going to be the case any more in the environment we are in. We are going to have the defense budget under a greater squeeze than any other part of the overall budget, in my view.

I hope that the message will go through to the Department of Transportation and the Secretary of Transportation that next year we need this request for Coast Guard funding.

I am very much for adequate Coast Guard funding. It was my amendment that we have called the posse comitatus amendment that allows the military to give assistance to drug interdiction efforts. I know the Senator from New York has pushed on this, the Congressman from Florida, Congressman BENNETT, and the Senator from Florida, Senator CHILES, they have all been very hard pushers for this overall concept of utilizing the military in an effective way for drug interdiction.

The way that we have arrived at what I think is a sensible program, which is now doing a considerable amount of good, is, instead of giving the military the power to arrest, which causes all sorts of potential problems, we decided to put the Coast Guard personnel on Navy ships. Now, that is a very expensive proposition for the Coast Guard. They have a small budget. The Navy has a large budget.

But I want to reemphasize the point that in the future we are going to have to look to the Department of Transportation to fund this adequately and make the budget requests, because the Navy budget is going to be under more squeeze, in my opinion, in the coming years, than the Coast Guard budget.

So I agree with the amendment. I know the Senator from Alaska and the Senator from New York have worked on it and worked on this overall program. It is a very important part of our drug interdiction efforts. There are other duties the Coast Guard also performs, as well. They really are part of the military in wartime.

Not many people recognize this, but I have been told—and I believe this is historically correct—if you take the percentage of casualties in World War II of each of the military services—the Army, Navy, Air Force, and the Marine Corps—and add the Coast Guard in, the Coast Guard had the highest percentage of casualties of any branch of the service in World War II. Of course, there was not really an air force during that period, but they had the highest percentage of casualties because they were performing the most hazardous duties. They were landing those boats where they were going back and forth under fire and they took a tremendous number of casualties.

So they are trained well. They are a great branch in peacetime as well as in wartime. I think they are doing noble work in drug interdiction.

But we must warn our colleagues that this Navy funding of this program, I think, has to be a temporary not a permanent kind of proposition.

Mr. BYRD. Mr. President, during consideration of the fiscal year 1986 Department of Defense appropriation bill, I was the principal coauthor of a letter to the distinguished chairman of the Defense Appropriations Subcommittee, Mr. STEVENS, dated September 18, 1985, and signed by 36 Senators, including the distinguished junior Senator from New York [Mr. D'AMATO] urging that funds be added to the Defense appropriation bill for Coast Guard military equipment, including several C–130 aircraft.

Subsequently, the committee, in response to this request and with the strong support of the subcommittee chairman, Mr. STEVENS, added $375 million to the fiscal year 1986 Navy appropriation for Coast Guard equipment, including funds for several C–130 aircraft, parts of which will be assembled in the Lockheed-Clarksburg plant in West Virginia.

Again, with the strong support of Senator STEVENS, the conferees adopted the Senate amendment and the provision was enacted into law on December 19, 1985, as part of the fiscal year 1986 continuing resolution.

The amendment now being proposed by Senators STEVENS, D'AMATO, and myself follows up on the above-mentioned effort during fiscal year 1986 and would authorize an additional $300 million for fiscal year 1987 for acquisition and maintenance of U.S. Coast Guard inventories as well as operating funds related to the increased national defense readiness of the U.S. Coast Guard.

The amendment would also facilitate the law enforcement functions of the Coast Guard, especially with respect to drug interdiction.

Mr. President, I urge the adoption of the amendment.

Mr. D'AMATO. Mr. President, I would like to commend Senator STEVENS for his outstanding leadership in making these dollars available during this very difficult time and also thank the chairman of the committee, Senator GOLDWATER, and Senator NUNN.

I think we move in a very positive step and positive direction. I have heard Senator NUNN's admonitions about the future, but certainly I would like the Senator from Georgia for his support in the law enforcement efforts in terms of interdiction, particularly as it relates to the drug area.

I believe, in time, the actions that the Senate undertook last year and we make today by way of this legislation will have some very meaningful results in drug interdiction efforts and really begin to put the muscle in what heretofore has been rhetoric in fighting for that.

So I am pleased to see the committee move in this direction.

Mr. NUNN. Mr. President, will the Senator from New York yield for a brief comment?

Mr. D'AMATO. Certainly.

(Mr. HECHT assumed the chair.)

Mr. NUNN. Mr. President, may I say that the Senator from New York has been a real leader in this area. Senator CHILES from Florida and the Senator from New York and the Senator from Alaska have really taken a great deal of initiative that has resulted in much improved drug enforcement efforts.

I would say also that the mayor of New York. Mayor Koch, has been outspoken in this area and has been a real leader. I met with both the mayor and the Senator from New York on at least one occasion; I believe two occasions. I would like to take the opportunity to commend Mayor Koch for his concern and for his outspoken support for a vigorous drug enforcement program.

Mr. D'AMATO. Mr. President, I know the mayor will appreciate that, as he has been very active in this effort in moving us toward this historic occasion.

I think Senator WILSON would like to speak on this.

Mr. WILSON. Mr. President, in the interest of time, I will simply say that I think that the Senator from Alaska is to be congratulated on this initiative. If there are no other Senators desiring to speak, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2565) was agreed to.

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WARNER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I rise, but I see perhaps other colleagues have been here before I was here. I am glad to yield the floor and allow the Chair to recognize them.

Mr. D'AMATO addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

AMENDMENT NO. 2566

(Purpose: To require the Secretary of Defense to identify facilities where certain aliens could be detained.)

Mr. D'AMATO. Mr. President, I ask unanimous consent that the pending amendments be set aside for the purposes of considering an amendment that I submit on behalf of myself, Senator CHILES, Senator HAWKINS, and Senator MURKOWSKI.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, it is my understanding the amendments will be temporarily set aside and they will become the pending amendments after this amendment is disposed of.

The PRESIDING OFFICER. That is correct.

The clerk will report.

The legislative clerk read as follows:

The Senator from New York [Mr. D'AMATO], for himself, Mr. CHILES, Mrs. HAWKINS, and Mr. MURKOWSKI, proposes an amendment numbered 2566.

Mr. D'AMATO. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 229, between lines 14 and 15, insert the following new section:

SEC. 1221. FACILITIES FOR THE DETENTION OF CERTAIN ALIENS.

Not later than 60 days after the date of the enactment of this Act, the Secretary of Defense shall transmit to the Attorney General of the United States—

(1) a list of facilities under the jurisidction of the Department of Defense which are suitable for use for the detention of Marielito criminal aliens;

(2) a statement of the estimated costs of using such facilities for the detention of such aliens; and

(3) a statement identifying the agencies of the Federal Government which would bear such costs.

A copy of this report shall be made available, unpon request to the Attorney General, to Members of the United States Senate and the United States House of Representatives.

Mr. D'AMATO. Mr. President, I rise today to offer an amendment requiring the Secretary of Defense to provide the Attorney General with a list of facilities now under the control of the Department of Defense that are now, or could be made, suitable for the detention of Marielio criminal aliens.

This report shall be made available upon request to Members of Congress and shall include a statement of the estimated costs of using such facilities for the detention of Marielito criminals, as well as a statement identifying the agencies of the Federal Government that would bear such costs.

Mr. President, the recent breakout of five Marielito Cuban criminals from the INS detention center in New York is only the most recent example of a worsening national security problem. There have been about 30 escapes by Marielitos around the country in the last year. The number of escapes, riots, and violent attacks by Marielito criminals held in INS detention facilities is increasing as they see themselves being held indefinitely, without any hope of return to Cuba.

Not counting the 1,826 Marielito criminals at the overburdened and crowded Federal prison in Atlanta, there are now 903 Marielito criminals under the jurisdiciton of INS in 70 other facilities around the country; 348 are in minimum security INS detention centers and an additional 555 are in non-INS jails and other detention facilities, from which the INS has to rent space at between $25 and $65 per day.

The number of Marielito criminals coming under the jurisdiction of INS is growing at the rate of almost 100 per month. The associated cost to INS will double by next year. By the end of this fiscal year, there will be 1,100 Marielito criminals in INS custody. Detaining them will cost INS $7 milion this year. By the end of fiscal year 1987, there will be nearly 2,500 Marielito criminals in INS custody. The cost to INS will then reach approximately $15 million.

Mr. President, there is no way INS can perform its mission well while its funding is being drained away by the cost of incarcerating Marielito criminals. Increasingly, Marielito criminals are placing a severe burden on an already overburdened Immigration and Naturalization Service. These individuals may be returned to Cuba. Unfortunately, however, we cannot state with certainty today that such a return will take place. Meanwhile, nearly 1,000 Marielito criminals—some of the most violent and dangerous criminals our law enforcement agencies have ever encountered—are being housed in minimum security INS detention facilities and other buildings that are clearly inadequate. Hundreds more are nearing the end of their sentences in State prisons. Immigration authorities believe that they will soon need space to detain 2,500 Marielitos in maximum security.

Mr. President, we have a choice. We can wait for a national emergency to explode in our faces, and then launch an expensive crash building program that will take another year or two to complete at a cost of tens of millions of dollars, or we can begin to plan now and identify existing facilities that we may be able to use for this purpose in a relatively short time and at comparatively low cost.

All my amendment does is to help us get ahead of this problem. It is my understanding that preliminary discussions already have been under way between the Justice Department and the Defense Department on this matter. With passage of this amendment, the Senate can express its support for these ongoing efforts and the meaningful involvement and cooperation of the Defense Department, to the extent feasible, in finding a solution to a growing national security threat.

I urge my colleagues to give this amendment their full support.

Mr. GOLDWATER. Mr. President, both sides have discussed this amendment. It is not an amendment that requires money. It is not an amendment that requires really a tremendous amount of work. I think it is a very good idea, although I think the Senator is going to find that we do not have as many little holes in the ground as he thinks we have.

This side is perfectly willing to accept the amendment.

Mr. NUNN. Mr. President, the Senator from New York has a very thorough pattern of following through on his amendments. The first amendment is to get more people arrested and this amendment is to find a place to house them. So I have no problem with the amendment. I think we will benefit from that study.

Mr. D'AMATO. I thank the chairman of the committee and the ranking member for their support.

Mrs. HAWKINS. Mr. President, I urge my colleagues to support the amendment proposed by the Senator from New York [Mr. D'AMATO] to require the Department of Defense to provide a list of facilities suitable for detaining the criminals Fidel Castro dumped on our shores during the Mariel boatlift to the Attorney General.

The amendment of the Senator from New York requires the Secretary of Defense to make a list of facilities that are now, or could be made, suitable for the detention of Mariel criminals available to the Attorney General. The report must be completed by 60 days after the date of enactment of the pending measure. The amendment also requires that the report be made available to Members of Congress and identify the Federal agencies that would bear the costs of using the facilities.

Mr. President, a number of weeks ago there was a riot at the Immigration and Naturalization Service's Krome Detention Facility near Miami. This riot was a natural result of putting extremely dangerous criminals in a minimum security facility, as the Krome facility was designed, along with less dangerous detainees captured by the Immigration and Naturalization Service. While I would prefer that these criminals be returned to Cuba where they properly belong, there seems to be no practical way to return these criminals at this time. Until the time that these criminals can be returned to Cuba, we must find a way to keep them away from our local com-

munities, out of inappropriate facilities, and put where they pose no danger to the people of the United States.

Unfortunately, Mr. President, the currently untenable situation at the Immigration and Naturalization Service for detaining and controlling these Cuban criminals only shows signs of getting worse. The number of Mariel criminals becoming the responsibility of the Immigration and Naturalization Service is rising at the rate of almost 100 persons a month. By the end of fiscal year 1987, there will be nearly 2,500 Mariel in the custody of the Immigration and Naturalization Service. The problem is also complicated by the tendency of State and local prison officials to unilaterally declare all Mariel criminals in their systems the responsibility of the Federal Government and release them. While this kind of action by State and local officials is irresponsible, the Federal Government must be able to keep these dangerous criminals in detention. Local communities must not be left exposed to a criminal element that is the most violent and dangerous our law enforcement agencies have ever encountered.

Mr. President, this problem is obviously not going to go away. If we do not address it now, we will only leave innocent citizens in our local communities vulnerable to dangerous, violent criminals. I commend the Senator from New York for taking the lead in what is a very difficult problem and proposing an immediate solution. I urge my colleagues to support this amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from New York.

The amendment (No. 2566) was agreed to.

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. D'AMATO. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. COHEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine is recognized.

Mr. COHEN. Mr. President, I ask unanimous consent that the two pending amendments be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2567

(Purpose: To enhance the capabilities of the United States to combat terrorism and other forms of unconventional warfare)

Mr. COHEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Maine [Mr. COHEN] for himself, Mr. NUNN, and Mr. DURENBERGER, proposes an amendment numbered 2567.

Mr. COHEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 229, between lines 14 and 15, insert the following new section:

SEC. 1221. SPECIAL OPERATIONS FORCES.

(a) CONGRESSIONAL FINDINGS.—The Congress finds—

(1) that the threat to the United States and its allies from unconventional warfare, including terrorism and insurgency, continues to increase at an alarming rate;

(2) that, although the United States must continue to maintain and improve its strategic and conventional force capabilities in order to deter aggression and to protect the security of the United States and its allies, the use of armed force by the United States since the end of the Korean conflict has principally been in response to insurgencies against allies of the United States and to terrorist attacks directed at the United States and American citizens;

(3) that the most likely use of armed force by the United States in the foreseeable future will be counterterrorist, counterinsurgency, and other unconventional operations;

(4) that the capabilities needed to respond to threats from unconventional warfare are not those traditionally fostered by the armed forces of the United States;

(5) that the Department of Defense has failed to recognize that conventional force capabilities can seldom be effectively employed in unconventional warfare missions;

(6) that conventional force commanders have a limited understanding of special operations forces capabilities and have misemployed such forces;

(7) that the Department of Defense has not given sufficient emphasis to the planning and preparation for unconventional warfare missions or to the appropriate integration of special operations forces capabilities into the national security strategy of the United States;

(8) that the National Security Council and the Office of the Secretary of Defense have not given sufficient attention to the formulation of policies to guide the development of special operations forces capabilities;

(9) that the Department of Defense has not provided adequate resources or support for special operations forces, particularly in airlift capability;

(10) that the Department of Defense has not given sufficient attention to ensuring the provision of adequate intelligence support for unconventional warfare missions;

(11) that the Department of Defense has not given sufficient attention to the tactics, doctrines, and training associated with unconventional warfare missions;

(12) that problems of command and control have repeatedly beset military forces of the United States engaged in unconventional warfare operations;

(13) that such problems were evident during the Mayaguez incident, the Iranian hostage rescue mission, the Grenada operation, and the Beirut peacekeeping mission;

(14) that the cooperation and coordination among the special operations forces of the Army, Navy, and Air Force are seriously deficient; and

(15) that the Department of Defense has not given sufficient attention to personnel policies, practices, and procedures to ensure the availability of sufficient numbers of officers with the skills required for unconventional warfare.

(b) ESTABLISHMENT OF SPECIAL OPERATIONS FORCES.—(1) The President shall establish, not later than 180 days after the date of the enactment of this Act, a unified combatant command for special operations forces.

(2)(a) The commander of the unified combatant command established pursuant to paragraph (1) shall hold the grade of general or, in the case of an officer of the Navy, admiral if appointed to that grade by the President, by and with the advice and consent of the Senate.

(B) The commander of such command shall be responsible for and shall have the authority necessary to conduct all affairs of such command relating to special operations forces, including the following matters:

(I) Developing strategy, doctrine, and tactics.

(ii) Training of assigned forces.

(iii) Prescribing professional military education.

(iv) Planning resources (including validating requirements).

(v) Ensuring combat readiness.

(vi) Developing special equipment.

(vii) Ensuring the interoperability of equipments and forces.

(viii) Tasking of intelligence support.

(ix) Monitoring the promotions, assignments, retention, training, and professional military education of special operations forces officers.

(C) The commander of such command shall be fully prepared to assume operational command of selected special operations missions if directed to do so by the National Command Authority.

(3) The President shall assign to the unified combatant command established pursuant to paragraph (1) all active and reserve special operations forces of the Army, Navy, and Air Force based in the United States.

(4) The President shall assign special operations forces located outside the United States to the unified combatant command in whose geographic area such forces are stationed.

(5) Except in special cases determined by the Chairman of the Joint Chiefs of Staff, special operations missions shall be conducted under the operational command of the unified combatant commanders in whose geographic areas such missions are to be conducted.

(6) The Secretary of Defense shall create for the special operations forces a major program category for the Five-Year Defense Plan of the Department of Defense.

(7) The Secretary of Defense shall substantially augment the capabilities of the Office of the Secretary of Defense to provide effective policy and resource oversight of special operations forces.

(c) MINIMUM GRADE FOR COMMANDERS OF SPECIAL OPERATIONS COMMANDS.—Commanders of the special operations command assigned to the United States European Command and the United States Pacific Command shall hold the grade of general or, in the case of an officer of the Navy, admiral if appointed to that grade by the President, by and with the advice and consent of the Senate.

(d) BOARD FOR UNCONVENTIONAL WARFARE.—The President shall establish within

the National Security Council a board to be known as the "Board for Unconventional Warfare". The principal duty of such board shall be to coordinate the unconventional warfare policies of the United States.

(e) DEPUTY ASSISTANT TO THE PRESIDENT FOR NATIONAL SECURITY AFFAIRS FOR UNCONVENTIONAL WARFARE.—The President shall designate within the Office of the President a Deputy Assistant to the President for National Security Affairs for Unconventional Warfare.

(f) FUNDING.—Programs and activities under the Special Operations Forces Master Plan shall be paid for with funds appropriated to the Department of Defense for such purposes.

(g) REPORT.—(1) The President shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report on the actions that the President and the Secretary of Defense have taken to correct the deficiencies identified in subsection (a) and to implement the provisions of subsections (b) through (e).

(2) Such report shall be submitted not later than March 1, 1987.

Mr. COHEN. Mr. President, the amendment Senator NUNN and I and the chairman of the Intelligence Committee are proposing is aimed at enhancing the capabilities of the United States to combat terrorism and other forms of unconventional warfare.

A new form of warfare has emerged in recent years, a form of warfare that we have not properly understood, and that we have not effectively deterred. This war has not been openly declared, but is being waged across the globe. It takes the form of terrorist attacks and guerrilla insurgencies.

In both cases, the objectives and modes of operation are similar. Terrorists and guerrillas, both operating from sanctuaries, seek to attract media attention, to instill fear, to undermine the stability and prosperity of target governments, and in some cases to drive a wedge between the United States and its allies.

The dimensions of this problem are clear, as is the threat to U.S. interests. Currently, over 40 nations and 4 million people are engaged in some form of armed conflict. In our own hemisphere, there are at least nine active insurgencies, in addition to serious problems created by drug-traffickers and other armed subversive groups.

International terrorism has now reached epidemic proportions. In 1968, the year that statistics on terrorism were first compiled, there were 20 fatalities worldwide attributed to terrorism. Last year, there were over 900 deaths resulting from terrorism. At the same time, guerrilla forces, often actively nurtured and supported by the Soviet Union and client states, continue to undermine stability in various parts of the world. While the threat to U.S. interests from a single insurgent movement or terrorist incident may be small, the cumulative impact of these assaults is potentially devastating.

This situation has highlighted a new term in the lexicon of war: "low-intensity conflict." Such conflicts—irregular battles and attacks perpetrated by irregular armies and individuals—are a lethal product of a world in which ideas and beliefs are pushed on the world's consciousness by grisly acts of violence.

Hence, while the United States must remain well prepared to deter nuclear and conventional warfare, the day-to-day challenge for the foreseeable future seems destined to fall in that gray area between millenial peace and all-out war. This places a premium on our ability to conduct "special operations"—missions carried out through forces which must be specially trained and equipped to engage in this new type of conflict.

The task is difficult but by no means impossible. Israeli successes in special operations are legendary. The British, too, have had marked success in this area. They have defeated Communist insurgencies in Malaya and Oman. They stormed the Iranian Embassy in a counterterrorist operation in 1980, killing all of the terrorists involved without the loss of life to any of their military personnel or civilian hostages. The British also demonstrated the value of special operations forces during the Falkland Islands campaign.

The United States, by contrast, for all its resources, has suffered repeated setbacks. During the mission to rescue the United States merchant vessel *Mayaguez* from Cambodia, we lost more men than we saved. The Iranian hostage rescue mission ended in confusion and disaster. In the Grenada operation, which pitted overwhelming United States forces against a tiny island nation, disturbing questions have been raised by the unexpected difficulty of our victory, including the failure of some of our special operations forces to achieve their objectives.

I do not believe that this record is attributable to persistent bad luck or an inadequate caliber of men in the armed services. In my view, we have not been effectively organized to fight the most likely battles of the present or the future.

U.S. special operations forces are scattered among the armed services, underfunded, and misunderstood. There are serious problems in the way we are organized to conduct the planning of special operations and provide the necessary personnel and equipment. The United States also lacks the necessary coordination among different government organizations to implement a coherent strategy for combating unconventional warfare.

In short, we are not well organized for unconventional conflicts—and it shows.

The amendment Senator NUNN and I propose will not solve all these ills. We must, however, go to the root of the problem and revamp the organization on which our special forces are built. We must also address problems in the coordination of our military, political, and economic efforts.

This amendment would establish a joint military organization for special forces, create a structure within the National Security Council to coordinate planning for low-intensity conflict, and establish an office in the Defense Department, headed by a high-level official, to ensure that funding needs and policy considerations related to low-intensity warfare are factored into U.S. planning.

Earlier this year I introduced a bill, S. 2453, nearly identical to this amendment. That measure currently has 28 cosponsors, including the distinguished chairman and ranking members of the Armed Services Committee, as well as the chairman of the Intelligence and Appropriations Committees. It also has broad bipartisan support; at the present time there are 13 Republican and 15 Democratic cosponsors.

This amendment is the product of considerable thought and discussion dating back to the deliberations of the Armed Services Committee concerning defense reorganization. The report accompanying the Barry Goldwater Act reflects these concerns, noting the operational deficiencies besetting special operations forces, as well as shortcomings in planning and resource allocation. As the chairman of the Seapower and Force Projection Subcommittee, I have also held discussions with and received testimony from administration officials and outside experts. In addition, as a member of the Select Committee on Intelligence, I have devoted considerable time to examining the threat to the United States from unconventional warfare as well as the policies of our Government with respect to low-intensity conflicts.

Mr. President, I believe we must take immediate steps to repair a flawed organizational structure that leaves special operations forces at the mercy of interservice rivalries and a military bureaucracy in which support for special operations runs counter to mainstream thought and careers. We also need to more effectively coordinate the efforts of the various civilian institutions which have roles to play in low-intensity conflict. I urge my colleagues to support this amendment.

The amendment that we are offering deals with special operations and unconventional warfare. I believe, and I think this belief is widely shared in this Congress, that the United States is ill-equipped to deal with the problem of terrorism and guerrilla warfare. U.S. special operations forces are scattered among the services, underfunded, and misunderstood. In addition, we

lack the necessary coordination among the different government agencies and organizations necessary to develop and implement a coherent strategy for the types of the conflicts that we are most likely to confront—not only in the present but in the coming years.

Essentially, the Cohen-Nunn legislation is an effort to begin to get at the root of the problem by revamping the organizational structure on which our special operations forces are built.

Very briefly, this legislation would establish a joint military organization—a unified command for special operations forces, and it would also set up within the NSC an organization capable of dealing with the formulation of policy and the implementation of that policy, as well as a high-level officer within the Department of Defense.

Essentially, what we are trying to do is achieve the necessary coordination. We are trying to get a higher visibility for the need for special operations forces. We are trying to establish a role for an advocate on behalf of special operations forces. We believe this is essential in order to accomplish the objectives of deterring, and indeed fighting, the kind of conflicts we are going to be faced with in the future.

I do not know of any opposition to this particular legislation. We have had hearings. The House has passed a much more far-reaching measure, but we believe this is the more responsible course of actions to pursue.

As I indicated, I ask unanimous consent to add some 25 other cosponsors to the legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

The cosponsors are as follows:

Chiles, Dixon, Hatch, Thurmond, Andrews, Boren, Bradley, Ford, Johnston, Bentsen, Exon, Danforth, Hollings, Rudman, Simon, Goldwater, Gramm, Kasten, Mitchell, Stevens, Wilson, Bumpers, DeConcini, Gore, and Laxalt.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I wholeheartedly support this amendment. The special operations forces are indeed unique in our overall military structure. We are devoting a great deal more attention to them now. I think more and more we are recognizing that these forces are the most likely to be used in the near future. Not only that, but the special forces are the most likely to be perceived by the public as representing our military capability. I say "public" in broad terms not only in this country but around the world. These forces do not have an adequate command structure now.

I know the Senator from Maine had hearings yesterday on this subject. We were on the floor on this bill. But I talked with the Senator from Maine after the hearings. And I talked with some of the witnesses about some of the command structural problems we have had in last several episodes where those forces either had to be used or were planned to be used, and it was really profoundly disturbing to say the least.

Those hearings were closed, and much of the testimony closed. But we are going to be in conference on this. The House has a recognition of this problem. But they have an entirely different approach.

I wholeheartedly support the amendment of the Senator from Maine. This will give the special operations forces the kind of overall command structure that will give them not only the flexibility and prestige they need in a wartime type situation but also in a peacetime budget situation.

We have had a number of hearings on this subject. Chairman GOLDWATER and I wrote a very strong letter about 6 or 8 months ago expressing our dismay that several years—in fact, I believe it is 6 years—after the Iranian hostage rescue attempt we still are woefully short of the transportation assets needed to conduct that kind of operation. This, when we have been spending hundreds of billions of dollars every year.

So the special operations forces have not gotten the kind of budgetary attention that they deserve. They have not had the kind of high-level prestige they need or are in need of in terms of the overall structure of the Department of Defense. This amendment will go a long way in doing that.

I do not know where we will come out of conference on the amendment, but I congratulate the Senator from Maine.

I am delighted to support the amendment.

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I would like to, if I may, address several questions to the propounder of the amendment.

Let me start off by saying that I start at the approach of this with some reluctance for the Congress to mandate types of commands, new joints commands, on the Pentagon. It is far preferable to me it seems to work out these matters with the Pentagon and let them take the initiative.

I just do not from my experience think that Congress is necessarily the place to start the setup of a new command. What troubles me and perhaps the distinguished senior Senator from Maine could help me on this, I notice some testimony by Admiral Crowe who is the Chairman of the Joint Chiefs and has been in his position perhaps 4 months. In that testimony he notes that we are going to give the special operations forces, he says, that push with both the creation of a special operations forces command, and the commitment of the Chiefs of the services to a more vigorous special operations force.

Thus, he says, the JCS have developed what we consider to be a forward-looking plan of action to deal with these challenges and opportunities. This plan may not go as far as some would like. And many of the specifics are yet to be fleshed out but it does have several qualities to commend it. So, therefore, the admiral who is the head of our overall Armed Forces says he urges the Congress to give this plan of action a fair chance to succeed. Nothing prevents us from reviewing the situation annually, near the end of our special operations forces revitalization program or whenever Congress considers it necessary to ensure that the special operations forces community is moving smoothly and effectively into the 21st century.

My question to the distinguished Senator from Maine would be in light of this, I wonder why he feels it necessary to press ahead with the mandatory legislative program that is encompassed by his legislation.

Mr. COHEN. Let me say to my friend from Rhode Island that it was this legislation and indeed the threat of legislation that has moved the Pentagon to do anything. I would quite agree with the Senator that this sort of organizational effort ought to take place within the Department of Defense. The fact is that it has not. The fact is, as Senator NUNN was mentioning just a moment ago, we are no better off today than we were 6 years ago. If we had a need for a similar type of rescue mission as occurred in the deserts of Iran, we would be in trouble, because we have no more helicopters than we had 6 years ago, and we have no more airlift capability. We have maybe slightly more but not nearly enough.

So I say yes, this legislation is necessary because the Department of Defense has not moved quickly enough. In fact, the proposal does not go nearly far enough to satisfy this particular Senator.

We had testimony from Admiral Crowe yesterday. They have moved somewhat. But I believe that unless we make this mandatory and set this particular organizational structure up, the job will not get done. They have proposed creating, for example, a three-star officer to be in charge of this particular command. There are no rules or regulations written for that particular type of command. It is totally unique. At least with a separate unified command we have departmental rules and regulations in effect and standardized. I might say this legislation is far more modest, and I think far more responsible, than that passed by the other body. So I would think this is not only desirable, but it is es-

sential if we are going to come to grips with the need to deal with unconventional warfare.

So I appreciate the sentiments expressed by my colleague from Rhode Island. But I believe this is imperative.

□ 1520

Mr. CHAFEE. Let me say I share his concern. I had the opportunity to read a monograph on the raid that was attempted in Iran, and that was a disaster. The attempt to blend these organizations together has not proven successful.

Mr. COHEN. If the Senator will yield further, I would hope that at some point we could perhaps reveal to him, a former Secretary of the Navy, some of the classified testimony that we heard yesterday in a closed session, showing the problem extends well beyond just the Iranian rescue mission. It went into Grenada as well, in our most recent endeavor. Even though a success by most standards, we had serious, serious problems during that particular mission which had not been corrected by the time of the proposal outlined by the Department of Defense.

Mr. CHAFEE. It is not my purpose here to attempt to delay or frustrate the attempts that are being made by the distinguished senior Senator from Maine and the ranking member of the Armed Services Committee.

I just do want to convey my own thoughts that going into these matters I think is something that should be done with a great deal of caution and not try to micromanage the Defense Department.

I do not know what the legislation exactly does, but I would appreciate it if the Senator would reasonably tell me that. It is my understanding that it gives broad outlines. However, they do have to carry out the job. Admiral Crowe may not have been doing the job you want, but on the other hand he has only been there for 4 or 5 months. What do you mandate them to do?

Mr. COHEN. What we do is set up a so-called unified command for special operations forces. We also recommend the establishment of a structure within the National Security Council to coordinate the planning for unconventional warfare. That can be handled administratively quite easily.

In fact, it is mandatory. It seems to me we have really found ourselves in great difficulty by having an absence of a coordinating body within the NSC to be looking at the military, economic, social and political forces within the areas we are going to be confronted by new challenges in the coming years.

The need for that structure, I think, is recognized by the Secretary. In fact, he conceded that point yesterday in the hearings.

An Office within the Defense Department will be headed by a high-level official to assure that the funding needs of conventional warfare are taken into account. We need someone to argue in behalf of the special forces and their resources, in order to elevate them to a level that will be appreciated by the regional commanders and service Chiefs.

We had a situation in Grenada, for example, where the commanding officer, the head of the command, did not fully appreciate the capabilities of our special operations forces, as such, to carry out their mission.

As a result of that, I think we encountered some difficulties that could have been avoided. So there is a lack, at the top levels of our military structure, for an awareness and an appreciation of both the abilities and perhaps even the limitations of the special operations forces involved.

By contrast, if you look at the Israeli military, every one of their general officers has a special operations background. That is just the reverse of our own situation, where few, if any, of our top military personnel have had special operations training.

So there is a mismatch between the recognition on the part of our senior military officials of the kind of expertise and mission that can be carried out by the special operations forces.

This legislation is designed to ensure better intelligence support for special operations, and the necessary personnel and equipment for such operations.

We are trying to improve the coordination and cooperation between the military structures which have a need for special operations forces.

Mr. CHAFEE. Let me just say, Mr. President, from my own experience, I cannot recall—and somebody can rebut this, perhaps—when Congress has dictated the creation, and as I understand this is a dictation, that the President shall establish a special joint command such as this. I view it with some trepidation. I know it has a head of steam up and seems to be on its way.

Mr. COHEN. If the Senator will yield, I would point out that it was the Congress which initiated the establishment of a new command for the rapid deployment force. You may recall that was only through the initiation of the Senate and the House that we established a separate command for the rapid deployment force.

In our lifetime, this is not precedent-setting.

Mr. CHAFEE. I recall that. That is one more command we have out there. What happened to the rapid deployment force, I do not know. I do not know whether it exists.

But the creation of command after command causes us to wonder why there are so many flag officers in the military services.

Mr. COHEN. There should be more concern about why we are having so many disasters in carrying out these particular missions.

Mr. CHAFEE. Someone once told me that it is not always the organization that is at fault. Sometimes it is the people at fault. Do not change the structure. Change the people.

Mr. COHEN. It seems to me you have to have both, the structure and the people. As testified yesterday, you have to have an attitudinal change. If that is not there, the structure and resources will not matter. We have been increasing the resources of special operations forces but we do not have the kind of organization necessary to be effective. What we are trying to do is to establish an organizational change, hopefully to get more resources in special operations and hopefully to effect the attitudinal change that will be fundamentally necessary if we are to be effective.

Mr. CHAFEE. We had some changes recently in the overall structure in which you and the ranking member of the committee were so deeply involved. I would hope that would make our fighting forces even more effective.

Let me ask one final question. So we are going ahead and mandating this. I am reluctant to do it and I am not enthusiastic. So be it.

Would the Senator be good enough to assure me that he would conduct some oversight hearings on this after some legitimate period of time? He can name the period. Give the thing a chance to be set up. I would hope he would have some oversight hearings because we propagate these commands and then we forget about them. There they are, out there, whatever it might be.

Mr. COHEN. This is something that both Senator NUNN and I feel very strongly about, and we indeed intend to hold oversight hearings on this particular command because this is the most likely type of conflict we are going to have in the coming years.

Mr. CHAFEE. I could not agree more. Indeed, that is the type of conflict we have had. But to think that our entire military forces have to be mandated from the U.S. Senate or the House of Representatives to do something, which is a very vital part of their mission right now, is either a severe reflection on the military services or an overreaching by this body, one or the other.

Mr. NUNN. I would say to the Senator from Rhode Island I had the same reluctance about a mandate and I have some misgivings about a mandate now. But I am convinced that we are going to have to do it. I would have to

say that if we do not do it, nothing will happen. Some things have happened.

I do not think we will get a special operations command structure that makes sense out of the Department of Defense. I have come to that decision slowly and reluctantly.

As the Senator from Maine knows, my preference was to have a sense-of-the-Senate resolution. But we have had a good bit of testimony just in the last few days. The extent of the problem, the magnitude of the problem, is much worse than I had imagined. We are finding out things now that happened 3 or 4 years ago, even 2 or 3 years ago, that are just coming to light that greatly and adversely affected certain operations that the sepecial operations forces were engaged in.

It always is a matter of people in the final analysis. Good people can take any structure and somehow or another make it work. But human nature also comes into play and you are never going to have perfect people. You really have to have an organization that facilitates human nature. That is what we are trying to do. We are trying to take into account the overall human nature here and I think this is the best approach.

We are going to be in conference. We are going to continue to have a dialog with the administration. It would be my preference that the administration take strong action in this regard. If the Pentagon does, it seems to me that the House and Senate could fall back. But if they do not do it, they know something will happen by law. That is the purpose here.

Mr. CHAFEE. Just on the last statement of the Senator, I do not know how the Pentagon can fall back because this is a mandatory piece of legislation. It is not suggestive. It requires. "The President shall."

Of course, you have not finished your conference. I presume that the House bill is mandatory, also.

□ 1530

Mr. NUNN. But it is a totally different concept. We are going to be in conference on something that is totally different.

Mr. WARNER. Mr. President, may I ask the managers—the Senator from Maine said hearings were held, I think yesterday, at the height of and in the intensity of the debate on SDI. I could not attend, nor could the Senator from Georgia. I do not mean to denigrate the chairman of the subcommittee that handled it. My point is that a decision of this importance was not referred to full committee. Was there a reason for that?

Mr. COHEN. I believe it was referred to the full committee. In fact, under the aegis of Senator GOLDWATER, I conducted hearings on behalf of the full committee.

Mr. WARNER. I thought yesterday it was the subcommittee.

Mr. COHEN. No, it was the full committee. I had no control over what was on the floor at the time.

Mr. WARNER. My question is with regard to the haste with which it was happening. During the committee consideration, was there any debate? Was this focused on with any intensity?

Mr. COHEN. The Senator is right. We have been discussing it with a great deal of intensity. We have had negotiations going on for several months. As a result, we came up with this proposal, which Senator NUNN and I feel does not go nearly far enough.

Mr. WARNER. At this point, Mr. President, I would like to address the testimony given yesterday, which is a major departure from this piece of legislation and the recommendations by the Assistant Secretary of Defense Armitage and the chairman. It was their recommendation that a special operating force be established as opposed to a new unified command. Is that correct?

Mr. COHEN. That is correct, a special operations command.

Mr. WARNER. Would that be any different——

Mr. COHEN. From a unified command, it would be different.

Mr. WARNER. It would then fall into what category?

Mr. COHEN. It falls into a category that has no precedent that we can understand. They have set up an entirely new structure to deal with this problem.

Mr. WARNER. The Senator feels their present structure is inadequate?

Mr. COHEN. We do.

Mr. WARNER. During the course of our deliberation, which was extensive over many, many days on reauthorization, I recall the distinguished chairman of the committee saying time and time again, let us cut back on the number of Assistant Secretaries. Yesterday it was recommended that the existing Assistant Secretary, Mr. Armitage, who is in this area of work, as he said in his own testimony here—his office is most nearly directed toward the issues that might arise that would necessitate the implementation of these forces.

But the Senator wishes not to repose the authority in that Assistant Secretary but to create a new one in the face of the work we did with reauthorization to reduce the number of Assistant Secretaries?

Mr. COHEN. We felt the need was so compelling in dealing with low-intensity conflict that it required the full time and attention of an Assistant Secretary within the Defense establishment. Secretary Armitage is a very capable individual who has had special operations training and background himself. But the fact is, he has many, many duties.

The fact is also that his office is divided between policymaking and working with Donald Latham's office on command, control, and communications. We do not feel the splitting of that particular job in two different functions will really help to achieve the kind of coordination we are looking for. If we look at that, as a matter of fact, I do not think there is serious disagreement on the part of DOD with our proposal, but we feel it is important to have someone whose sole obligation and responsibility is to focus upon low-intensity conflict. I do not believe Mr. Armitage is solely concerned with that.

Mr. WARNER. What would be the downside risk on the part of the United States if we were to revert to the Senators' original proposition, which was a sense of the Senate, then reconsider what the Department of Defense did or did not do in connection with our 1988 authorization bill when Congress convenes again in the spring? It seems to me we have at least given the executive branch the opportunity to react to what I perceive to be a very positive recommendation on the Senators' part and at the same time, possibly, that would enable this body and others to figure out how we do not add another Assistant Secretary.

We have already added an Under Secretary for Procurement this year. This is another Presidential appointment. That is two Presidential appointments to DOD.

Mr. COHEN. The question is what kind of priority we place on this question of terrorism and guerrilla warfare. If you believe, as Senator NUNN and I and a number of others do, that this is the major type of conflict we are going to face in years to come, then it warrants establishing that kind of Assistant Secretary position. That to me is far more likely than the kind of issues we are devoting time to now, to SDI and conventional capabilities; this is unconventional warfare or, as they call it, low-intensity conflict.

I was prepared to proceed on the basis of a sense-of-the-Senate resolution. I was not happy with it but was prepared to proceed along those lines. Until yesterday, listening to the testimony, particularly that revealed in closed session, which persuaded me that unless we move and mandate in this direction, it is not going to be done. I think yesterday changed my mind, I say to my friend from Virginia, to go from a wait-and-see-how-it-evolves attitude to one saying, we have had enough of this type of process in the past, we are going to move forward and proceed along managerial lines.

Mr. WARNER. Mr. President, I would assign the highest priority to this potential threat to the United

States but I share the thoughts of my colleagues here that we have a tremendous amount of military position today and we would like to think they are able to handle the situation, although the record of success is not too great.

Mr. CHAFEE. Mr. President, could I ask one question of the proponents?

Mr. WARNER. Yes, Mr. President.

Mr. CHAFEE. What is the command structure and particularly, are you adding general officers? What are the requirements on that level, flag or general officers? Is there to be a new flag or general officer created and at what level?

Mr. COHEN. It would be a four-star officer as opposed to a three-star proposed by DOD. The reason we did that, frankly, was the testimony yesterday, and I hope the Senator from Rhode Island will take advantage of speaking with some of the individuals involved. The reason for that was to give that four-star the same sort of clout he would have to have in dealing with the other unified commanders. This is why we propose a four-star, otherwise, he would be lacking that kind of clout and prestige within the military structure. To create a three-star to try to contend with the four-stars who might overrule him, we felt, was inconsistent with the objectives of the bill.

Mr. NUNN. May I give the Senator from Rhode Island one example of the frustration we have had? This is not a new problem.

The Senator from Virginia makes good points. I am not trying to refute the points. There is some apprehension about how far the legislative branch ought to go in directing that unified commands be created.

For about 3 years, we have been waiting on the 5-year defense plan to reflect the needs of the special operations forces. The 5-year defense plan always comes down, it never goes up. So if you are not in there, you are in pretty bad shape. We had the Iranian hostage mission and had a woeful inadequacy of transportation for the forces at that stage.

A year ago, after waiting, Senator GOLDWATER and I had written letters, done everything we could to try to focus on the need for transportation for the special operations forces. The regular forces were not interested. The special operation forces were unable to get to the scene of the crime, so to speak. So we mandated in the bill that they include transportation for special operations forces in the 5-year defense plan. And we held up certain aircraft programs until they did.

Guess what happened. They finally decided they needed the aircraft so they had to come up with the 5-year defense plan so they put the special operations forces in the plan. They got the aircraft released.

What happened then? They came back and now they have taken those special operations forces' aircraft out of the plan. They are no longer in the defense plan. The reason is that there is nobody over there to fight for them.

This is a sad commentary, but the way you get resources in the Pentagon is to have somebody high up on the totem pole who goes to bat for you in resource allocation. If you do not, they just cut you out. That is what has happened over and over again with the forces. I think most people in the United States would say, for goodness sakes, these are the ones we are going to use. Why not give them priority? A perfectly logical question. But, it never happens.

Mr. WARNER. The person ultimately accountable is the Secretary of Defense. He should be held accountable for those misdoings. If he is going to take action such as the Senator from Georgia says, or inaction with the present situation, just layering on another Assistant Secretary—whom he will have to select, by the way—and another four-star general, does that solve the problem if the motivation does not rest with top man?

Mr. NUNN. The answer to it is, I do not think you can solve the problem unless you motivate the top man. The question is how do you motivate him. I do not know how many three stars officers he sees. He sees some four stars before he sees three stars. I hate to create another four-star officer. I hope to have a build-down on this so if we create a new one we take one away. I would like to do that with an Assistant Secretary of Defense. I know of a couple. Maybe we could have two for one.

I do not like the net addition. But I nevertheless do not know at this stage how you get the attention of the high levels of the Department of Defense about the need for special operation forces. We have written the Secretary of Defense. We have talked to him. He has made speeches endorsing this subject, but a strange thing happens after the Secretary of Defense makes a speech. Nothing happens, unless it is on money. If it is on money, something happens, but if it is on resources within that budget, nothing happens.

Mr. WARNER. I ask what is it the Senate can do endorsing this legislation to force it to happen? Why would this action by the Senate be any stronger than any other action?

Mr. NUNN. We may have to think of something else. If the Senator from Virginia has an addition with which we can put more leverage in here, I welcome it.

Mr. CHAFEE. Mr. President, we have debated this for quite a while, or discussed it. I do not want to say debate it. But I just do not want to hear any voices around here raised as to why we have got so many generals and admirals in the military services.

Mr. NUNN. I make a pledge to the Senator. I will find one to do away with so we have no net addition.

Mr. CHAFEE. That is a pledge I will accept and I will vote for it.

Mr. NUNN. The Senator may have to. It may just be two of us voting for it. I tried that one before.

Mr. CHAFEE. Well, I think the Senator is right in the position now. We have got a very distinguished comanager of this bill and I am sure he is in a mood to accept some amendment the Senator suggests and move right through with dispatch.

Mr. COHEN. Take him out of the Navy.

Mr. CHAFEE. So, Mr. President, I thank the managers of the bill for the explanation. This is an area I am interested in obviously or I would not be here. I am interested in what happened in Grenada, what did not seem very successful. I am interested in what happened in Iran, which was clearly a disaster, and some changes should be made. So I look forward both to reading the testimony that the distinguished Senator from Maine suggested and also discussing with these fine gentlemen what they find in their oversight as we proceed.

Mr. NUNN. I might say to the Senator from Rhode Island if we can get the Department of Defense to focus on this problem, resource-wise and organization-wise, between now and the time we go to conference, I think the Department of Defense and our colleagues will find the Senator from Maine and the Senator from Georgia very flexible.

Mr. WARNER. Mr. President, on that subject, one of the purposes of the reorganization bills, House and Senate, now pending was to strengthen the JCS and that may well solve this problem, as opposed to setting up all of this new structure.

Mr. COHEN. I think we recognized in the report language, as a matter of fact, that the reorganization bill did not deal with special operations forces and that we would come forward at a later time with legislation to deal with this issue. It is in our report. I think we all recognized that reorganization itself would not solve the problem.

I move the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2567) was agreed to.

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. COHEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PRYOR and Mr. WILSON addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. Mr. President, I ask unanimous consent to temporarily lay aside the pending amendments to send to the desk an amendment which has been cleared on both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2568

(Purpose: To require an extended benchmark testing acquisition strategy in the procurement of the Department of Defense Composite Health Care System)

Mr. WILSON. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from California [Mr. WILSON] proposes an amendment numbered 2568.

Mr. WILSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 118, after line 16, add the following new section:

SEC. 705. ACQUISITION OF COMPOSITE HEALTH CARE SYSTEM.

(a) Section 1203 of the Department of Defense Authorization Act, 1986 (Public Law 99-145) is repealed.

(b) The Secretary of Defense shall immediately undertake the acquisition of the Composite Health Care System utilizing the acquisition strategy described in Department of the Army Request for Proposal Number DAH 26-85-R-0009.

Mr. WILSON. Mr. President, for more than 10 years the Department of Defense has been seeking to acquire a computer system to assist in its medical records keeping and to assist in monitoring the quality of care being provided in DOD hospitals.

The program has been slow, but finally last year, the Department issued an RFP for a comprehensive system. The RFP is several hundred pages long and I do not pretend to have reviewed it all. But, I believe the RFP calls for a valid acquisition strategy utilizing an extended benchmark test among competing systems, a sort of computer system flyoff.

Unfortunately, there are those in the other body who are seeking to insure that a particular system be selected for acquisition and that system is one which was created by some Veterans' Administration employees and is now being utilized in a few Veterans' Administration hospitals.

The other body has included a provision in its companion bill which would further delay the Defense acquisition by requiring numerous demonstration projects of various competitors. However, individual hospital demonstration will produce little of value, except to further delay any real competition among systems.

Mr. President, this amendment directs the Secretary of Defense to immediately proceed with the acquisition strategy set forth in the Department's RFP utilizing the extended benchmark testing. Mr. President, this amendment will give the Senate the appropriate flexibility in conference with the House to resolve this matter in an appropriate way.

This amendment has been cleared on both sides. It will give the Senate appropriate flexibility to deal with this matter in conference with the House. Mr. President, I ask for its adoption.

Mr. NUNN. Mr. President, we have looked at the amendment. We have discussed it with the Senator from California. I have no objection to the amendment, and I urge its adoption.

Mr. GOLDWATER. Mr. President, I have no objection to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2568) was agreed to.

Mr. WILSON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GRAMM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PRYOR and Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, as chairman of the Military Construction Subcommittee——

Mr. GOLDWATER. Will the Senator yield just for a moment?

Mr. THURMOND. I will be happy to yield.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the pending amendments be put aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from South Carolina.

Mr. THURMOND. Mr. President, as chairman of the Military Construction Subcommittee of the Senate Armed Services Committee, I want to briefly discuss the committee's recommendation on division B of S. 2638, which pertains to military construction. The committee authorized $8.5 billion for military construction out of a budget request of $10 billion by the Defense Department. The committee was forced to make major reductions in the military construction budget.

There were difficult policy decisions that were made in order to meet the required reductions. The committee funded facilities associated with our strategic modernization. It supported troop and family housing. Funds were included for the new Navy bases at Staten Island, NY, and Everett, WA as well as the continuation of the light infantry division at Fort Drum, NY and initial construction for the stationing of the light infantry division in Alaska. Funds were denied for projects with insufficient justification. Due to severe budget constraints, the committee deferred may projects that would have improved the quality and efficiency of our military bases.

There are a number of legislative proposals that I wish to highlight:

To avoid micro-management, the commmittee has recommended that we raise the threshold for minor military construction to $2 million. We also authorized minor construction on a lump sum basis the way we currently authorize all projects in the Guard and Reserve, rather than by line item

The committee recommended the establishment of a Presidential Commission to develop base closure recommendations since the Department of Defense has refused to take any action on their own.

Other details of the committee action are in the committee's report and explanatory statement, and I do not intend to discuss the committee's action in any detail. I would invite my colleagues attention to the report and would be pleased to respond to any question members might have.

I want to take this opportunity to acknowledge the efforts of Senator BINGAMAN, who served with me as the ranking minority member on the subcommittee. It has been a real pleasure to work on this bill with Senator BINGAMAN. He has worked hard to develop a sensible military construction program within the severe fiscal contraints with which we had to deal. His dedication to this formidable task is very much appreciated. Let me also acknowledge the efforts of staff members Russ Milnes, Ken Johnson, Bob Bayer, and Ed McGaffigan, who handled the staff work on this bill, as well as special recognition to Marie Dickinson who provided staff support. They all proved to be competent and dedicated and very helpful.

Mr. President, I understand that it is agreed, if it suits the distinguished Senator from New Mexico, we could take maybe 1 hour and 15 minutes on each side, 2½ hours; is that agreeable?

□ 1550

Mr. BINGAMAN. Mr. President, if the Senator will yield, that kind of time agreement is perfectly acceptable to me.

I believe the Senator from Arkansas is anxious to go forward with a proposal with regard to reprogramming. He has been on the floor for some time. I do not know if that is something that can be done prior to our debate on this issue. I would favor that, if it is possible.

Mr. THURMOND. Mr. President, would an hour on each side be agreeable?

Mr. BINGAMAN. I have no problem with an hour on a side.

Mr. THURMOND. Mr. President, I ask unanimous consent that 2 hours, equally divided, be available on the amendment to be offered by the Senator from New Mexico [Mr. BINGAMAN] concerning the Navy strategic home porting plan and that no amendment to the amendment be in order.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, reserving the right to object, I do not know whether this has been cleared with Senator BYRD. We request that he be on the floor when there is any unanimous-consent requests. I ask the Senator from South Carolina to withhold the unanimous-consent request until we can notify the minority leader. I think Senator STENNIS has certain reservations, and he wants a time allocation. I would like to see the unanimous-consent request.

Mr. THURMOND. We are ready to start, if we do not have a time limitation.

Mr. NUNN. I have no objection to going ahead on the amendment. In the meantime, we will notify the minority leader.

Mr. STENNIS. Mr. President, will the Senator from South Carolina yield?

Mr. PRYOR. Mr. President, reserving the right to object—

The PRESIDING OFFICER. The Senate will be in order.

Mr. PRYOR. Mr. President, I am having a difficult time understanding what is going on, and I cannot hear the distinguished Senator from South Carolina. Is the Senator from South Carolina proposing a unanimous-consent request that we immediately go to the home porting amendment and establish a time for debate? Is that the issue before the Senate?

The PRESIDING OFFICER. Not on the bill but an amendment.

Mr. PRYOR. Mr. President, all I can say is that I have been standing on my feet since, I think, 2:30 this afternoon, trying to get the attention of the Chair to offer an amendment. For the life of me, I do not know why we are not recognizing Members on this side of the aisle. I respect very much the Senator from South Carolina, but this Senator has been here since 2:30.

Mr. THURMOND. Mr. President, I am not offering the amendment. Senator BINGAMAN is offering the amendment, and I am opposed to it.

Mr. PRYOR. Mr. President, I hate to do this—and I have never done this—but right now, if there is a request for unanimous consent, I temporarily object.

Mr. THURMOND. We will go ahead without it.

The PRESIDING OFFICER. Objection is heard.

Mr. THURMOND. Senator BINGAMAN may proceed with the amendment.

Mr. LEVIN. Mr. President, I think if Senator BINGAMAN is going to offer an amendment, he should seek the floor, like anybody else. As a matter of fact, he wanted to yield to the Senator from Arkansas for the purpose of the Senator being recognized.

I think people ought to be recognized by the Chair. We should not parcel out the floor. I do not care who is doing it, whether it is done on our side or the other side. If Senator BINGAMAN wants to offer an amendment, he should seek the floor to do so, and so should the Senator from South Carolina or anybody else.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina has the floor.

Mr. THURMOND. I got the floor to speak on the military construction bill. That is the matter we are taking up now. We are on it now. Senator BINGAMAN rose to offer an amendment to that, so I presume he has the floor.

The PRESIDING OFFICER. The Senator from South Carolina has the floor.

Mr. PRYOR. Mr. President, a point of order. The point of order I raise is this: Is the Senate now on the military construction bill or the Department of Defense authorization bill?

Mr. THURMOND. As part of the defense authorization bill.

Mr. PRYOR. It is all in one package?

Mr. THURMOND. It is, yes.

Mr. LEVIN. Mr. President, who has the floor?

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I now yield to the able Senator from New Mexico to offer his amendment, and I will respond to it.

The PRESIDING OFFICER. The Senator can only yield for a question.

Mr. BINGAMAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. I inquire of the Senator from South Carolina, who has the floor, whether it would be possible, while this unanimous-consent request is being considered, to allow the Senator from Arkansas to go forward with his proposal right now, and then we would take up the home port amendment at the conclusion of that. Is that possible?

Mr. GOLDWATER addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. Mr. President, having been here all day, I have to say that the Senator from South Carolina was here as early as I was. He was ready to proceed. He had other business to attend to. He has been in and out of the Chamber.

This bill is of such a nature that whether we finish it today, tomorrow, or the next day really does not make much difference.

I know that what the Senator from Arkansas has to offer is not going to be decided quickly. It involves the Rules Committee; it involves the whole Senate. I would much rather see us proceed the way we are going. I think it will work out all right.

The PRESIDING OFFICER. The Senator from South Carolina has the floor.

Mr. THURMOND. Mr. President, we are ready to pass the military construction bill now—we are on it—unless somebody has an amendment. If anybody has an amendment, I suggest they come forward with it.

Mr. NUNN. Mr. President, if the Senator will yield, we do not have this military construction bill as a part of the overall bill. We are not breaking it out and passing it separately, so it will continue to be available for amendment.

I agree with the Senator from South Carolina that if we can have an orderly procedure and consider everything affecting the military construction bill, that would be fine. But we do not have a time agreement, and therefore any Senator can offer an amendment to the military construction portion of this bill at any point—this afternoon, tonight, tomorrow. So we are not able to break that out.

I would like to cooperate with the Senator from South Carolina and the Senator from New Mexico in having a unanimous-consent agreement on the home porting issue. It is very important. Senator STENNIS has been on the floor and is concerned about this matter, as is Senator GRAMM and others.

I believe the best way for us to proceed now is to notify the minority leader that there will be a unanimous-consent request propounded in 5 or 10 minutes. In the meantime, I do not know whether the Senator from New Mexico would like to proceed now.

It is up to the Chair to recognize Senators. The unanimous-consent request will have to wait, in terms of being approved, until the Senator from West Virginia is present.

Mr. THURMOND. Since there is objection to the unanimous-consent request, we will go ahead without it, if Senator BINGAMAN wants to offer his amendment at this time.

Mr. BINGAMAN. Mr. President, I am not prepared to offer my amendment until there is some resolution of

the concern of the Senator from Arkansas. So I yield the floor.

The PRESIDING OFFICER. The Senator from South Carolina has the floor.

Mr. THURMOND. Mr. President, I understand that the distinguished Senator from Arkansas has been trying to get the floor. We can accommodate him by letting him proceed now, and in the meantime we can follow with our unanimous-consent request.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. Mr. President, I am very grateful to the Senator from South Carolina. I appreciate his patience.

AMENDMENT NO. 2569

Mr. PRYOR. Mr. President, I do not think this amendment will take long.

First, I ask unanimous consent that the pending amendment be temporarily set aside.

The PRESIDING OFFICER. That has been done.

Mr. PRYOR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arkansas [Mr. PRYOR] proposes an amendment numbered 2569.

Mr. PRYOR. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate point in the bill add the following new section:

SEC. . It is the sense of the Senate that no reprogramming of funds shall occur in any federal agency unless a notification of such reprogramming has appeared in the Congress ional Record and has been approved through procedures approved by the Senate.

□ 1600

Mr. PRYOR. Mr. President, I am going to read this very simple one sentence amendment to my colleagues in the Senate. It is very simple. It is very short, and I must say it is very much of a reform amendment, not reform of the Pentagon, but the reform of this body in the way that we reprogram funds for not only the Department of Defense but also all agencies of the Federal Government.

This is a sense-of-the Senate resolution, Mr. President, and it states very simply and I quote:

It is the sense of the Senate that no reprogramming of funds shall occur in any federal agency unless a notification of such reprogramming has appeared in the Congressional Record and has been approved through procedures approved by the Senate.

On July 16, Mr. President, the General Accounting Office furnished upon my request a very exhaustive study of how funds are reprogrammed in the Department of Defense and some other agencies of the Federal Government.

In fact, Mr. President, in the past 5 years we have seen $29 billion, not million, $29 billion of taxpayers' money reprogrammed through a process for which there are no formal procedures or written rules. These are not my figures. These are the figures of the General Accounting Office.

Over $14 billion of those funds were never approved at all; they were only notified to us after the fact. Over $14 billion was approved before the fact.

Mr. President, in the Department of Defense alone, because that Department gets more dollars, of course, than just about any other entity of the Federal Government, we have seen $14 billion reprogrammed without any approval.

In fact, Mr. President, further, we have seen even worse. We have seen in these 4 or 5 years in reprogrammed dollars 314 new budget line items being created through reprogramming and we have seen 261 budget line items terminated or suspended.

Mr. President, in fact, come October 3, when we adjourn sine die, if we make it to that time, and frankly I doubt that we will, when we adjourn sine die and go home for October, November, and December, we are still going to see reprogramming of millions and millions of dollars in the Department of Defense and other agencies of Government.

According to the General Accounting Office, we will also see that there is a very slipshod method here in Congress of making those reprogrammed dollars go through the system.

Mr. President, we have six different committees or subcommittees of Congress monitor defense reprogrammings. However, each of the committees of Congress that reprogram defense dollars and other Federal agency dollars has a different set of informal procedures for their monitoring. These vary from formal hearings in markups to staff approval and reprogrammings over the telephone.

Mr. President, you and some of our colleagues might be saying now, Senator PRYOR, from Arkansas, certainly this is not the case. Certainly we have accountability and certainly we have a method of looking at each of these dollars, especially if they are being expended for different purposes than Congress had originally intended. But, the fact is that we have neither accountability nor even a consistent method of looking at these requests.

Mr. President, the case is this: According to the General Accounting Office, some committees have hearings on these dollars that are to be reprogrammed. But most of the committees have none. Some committees have markups. Most of the committees have none.

In some committees all of the members take a look at the reprogrammings, but in most of the committees there is only a very select few members of those committees who see where these dollars are going to be spent.

Senators not on the right committees have no voice on reprogramming at all. In some committees in some instances, the staff, not the Senators, not the Congressmen, are the only ones who look at or have anything to do whatsoever with the reprogramming of millions and millions and millions of taxpayers' dollars. And, no committee has any formal or written rules.

Mr. President, we are in a chaotic situation here. It is a situation that people find hard to believe. It is also a situation that my amendment addresses. My amendment is very simple. It stops reprogramming in its tracks and it says that when the Senate adopts the necessary procedures with the oversight, with the accountability built into those procedures, then we might continue in reprogramming these dollars in the Department of Defense and other agencies.

I know of no amendment that makes better common sense. I do not know of any other amendment, Mr. President, that deals with a larger number of defense dollars than we are dealing with in this particular amendment here.

I think, also, it would be certainly a vast step forward, a stab at attempting to reform Congress and our procedures, in the same year that Senator GOLDWATER and Senator NUNN and others have led the fight to reform the Pentagon., We in Congress need reform also.

I think this is the type of amendment that would certainly inspire the coming into being of rules and procedures we need.

At this point, Mr. President, I temporarily yield the floor.

Mr. NUNN. Mr. President, will the Senator from Arkansas yield for a brief observation?

Mr. PRYOR. I am glad to yield to the Senator from Georgia.

Mr. NUNN. The Senator has identified a serious problem. It is one that has been perplexing to me as the ranking minority Member because the chairman and I have to sign off on a lot of reprogrammings. At times I held a number of them up. I held some up that were meritorious reprogrammings because we were about to pass a defense bill and we also had a rule for quite a while, at least an informal rule, that we would not approve any new programs under reprogramming. That rule sometimes is adhered to and sometimes not.

It has been deviated from rather frequently. So we have a number of committees involved in this. The procedure is very loose. It is not a good procedure. We do not have good discipline. I think we on the Armed Services Committee do as well with it as others, maybe better, but overall the Senator is correct in terms of the looseness of the procedure and in terms of the lack of discipline and the fact that we do not have a disciplined procedure here also because of that indiscipline in the executive branch.

I do not know how much this applies to other agencies. I expect it is throughout the Government and not just the Department of Defense. The Senator would have a better idea than I on that.

I do not know whether the Senator's CONGRESSIONAL RECORD notice would cure part of the problem, all of the problem, or none of the problem, but it is an area that we ought to focus on, and I for one would pledge my cooperation in trying to address this issue and trying to do it in a meaningful way.

I think that the appropriate forum for the real hearings is the Rules Committee because they would have jurisdiction beyond our own committee and would apply throughout.

So I would think this is certainly something that I for one would be willing to pledge to the Senator from Arkansas that we would do what we could in the Armed Services Committee to take a real close look at our reprogramming procedures to keep the Senator from Arkansas advised of them and listen to his suggestions.

I would prefer this amendment not be attached to this bill now because I do not know that we are really solving the problem with that but that would be up to the Senator from Arkansas as to whether to pursue it at this time.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. NUNN. I yield.

(Mr. EVANS assumed the Chair.)

Mr. GOLDWATER. The Senator from Arkansas and I have discussed this, and I said to him essentially what the Senator from Georgia has just told him. Really as far as the Armed Services Committee goes we have a little problem, but it is not any kind of a problem with reprogramming.

But I serve on other committees where it is almost a constant go around, go around, what do they want to reprogram, and they cannot come up and tell you why. But I do think it is something we ought to study.

I also have a very strong feeling that this would have to be shown to the Rules Committee. I am not certain. I just have a feeling that it would be.

I think the subject the Senator raises is of great importance, again not because of the military side of it, but the overall problem with it.

I would suggest that we refer it as an item of study. I do not even know who to send it to.

□ 1610

Maybe the Rules Committee could answer the question, maybe GSA or OMB, but I do not think it is anything that we should attach on to a military authorization bill. If it is attached to the military authorization bill as an overall movement, then you are going to hear all kind of squawks from every other committee on the Hill.

I would merely make that as a suggestion. I think it is something that should be studied, but from the committee that I am convinced has the least problem with it, we should not be the one saying to every other committee we want you looked at. I think the Senator understands that.

Mr. PRYOR. I thank the Senator from Arizona for his comments.

Mr. LEVIN. Will the Senator from Arkansas yield for a question?

Mr. PRYOR. I am glad to yield to the Senator from Michigan.

Mr. LEVIN. This has been something that has troubled the Senator from Arkansas, and rightly so, for a long time. And he, as always, is in the forefront of trying to protect critical defense dollars and taxpayers' dollars.

I looked into this sometime back and I may be a bit rusty. Perhaps the Senator from Arkansas can refresh my recollection. But my recollection is, to some extent, these informal procedures, very loose, as the Senator from Arizona has pointed out and the Senator from Georgia in agreeing with my friend from Arkansas, that to some extent the looseness of these procedures was the fallout of the Supreme Court decision in Chadha. If we do not have some informality in it, we may run into a Chadha problem where we have authorized some reprogramming to the Pentagon and unless we have an informal check on Pentagon reprogramming, we might not have any legal check at all. Now is my recollection correct that that is at least partly the problem that we have and one of the reasons for the informality and looseness in these proceedings?

Mr. PRYOR. Let me respond to my friend from Michigan by saying the Chadha situation was one which was more recent than the reprogramming process that has been with us for decades. This reprogramming situation has been with us for a very, very long time prior to Chadha.

Now, let me further respond to the distinguished Senator from Michigan, who is a member of the Armed Services Committee, and a very fine member, that when the Department of Defense—and the Congress not agreeing or disagreeing, when we do not have anything to do with it—when they can create 304 new budget line item programs through reprogramming, then there is something desperately wrong. Or, without the Congress' consent, when they can terminate 261 line item programs or line item expenditures in their budget, there is also a total loss of oversight and accountability by the House and by the Senate.

My amendment simply says that we will terminate, we will suspend, all of reprogramming until we adopt a system that will be acceptable to the majority of the Senate.

I am somewhat concerned. I have heard both the very distinguished Senator from Arizona, who I respect so dearly, and the Senator from Georgia, the ranking minority member, say that this is a problem. And I am a little bit perplexed as to why we do not suspend the reprogramming of millions, or perhaps billions, of dollars until we can find a better system that we can all support in this Senate to do it.

I certainly wish that we could get the support of the Senator from Arizona and the Senator from Georgia in adopting this sense-of-the-Senate resolution. Let us suspend this reprogramming and come forward with procedures that will be fair and acceptable and certainly workable with the Rules Committee and the rules of the U.S. Senate.

Mr. GOLDWATER. Mr. President, I move to table the amendment of the Senator from Arkansas.

Mr. LEVIN. Mr. President, will the Senator from Arizona withhold that for just one moment?

Mr. GOLDWATER. Yes.

Mr. LEVIN. I would like to ask my friend from Arkansas one more question. I have been talking to staff on it and I would like to clarify one point.

My understanding is that if we suspend Congress' role, this loose, informal, chaotic role that we have—and the Senator is so right about that—that will leave us with no role at all and that the Pentagon will have greater authority than it has now. Because, even though our role is chaotic and informal and we do it on a committee basis quite informally, it is something. It is better than nothing. And if you take us out of it and leave us in limbo, without putting a system into place, you will create, unwittingly—because I know what you are after—a situation where the Pentagon has unchecked authority, because we have given them authority to spend within accounts. Unless we can look at that reprogramming that they go through, we will be actually yielding, unwittingly, I believe, some authority to the Pentagon in a check over their spending. I know that is not the intention of my friend from Arkansas.

I am wondering if there is not some way that, in the next few months, we can hold some hearings on this repro-

gramming issue, and perhaps join hearings with the Rules Committee and with other committees involved, to address a problem which you have put your finger on which I think is a critical problem. There is a lot of loose spending of money. I am afraid it will be even looser if you take away and put in limbo this very informal congressional role that we now have.

I am wondering whether hearings in the next few months might take us the next step toward getting Congress into the situation that I know you want us to be in.

Mr. PRYOR. Mr. President, I thank my friend from Michigan for his remarks. Certainly, it is not the Senator from Arkansas' intent or the hope that we are going to create a greater chaotic condition, nor that we will give any more unlimited powers to reprogram to the Pentagon.

The strange thing about this issue, Mr. President, is that for once the Pentagon is doing what it is supposed to do. They have a form called, form 1415. They fill out the form and they say, "Here is what we want to reprogram," and it comes up here. And through some mysterious means, finally, some of those forms are rejected, some are accepted, and the reprogramming that they have requested takes place. The Defense Department has written rules on reprogramming, and there is no evidence that they do anything but obey them. Here in Congress, we have no written rules.

Now, they are abiding by the law at the Pentagon under this whole system. But of the six committees in the Congress that deal with reprogramming, we have six different procedures. We have six different sets of informal procedures. There are no written rules; in some, according to the GAO, those reprogramming approvals are simply made over the telephone by staff.

When we are gone from this city, from the Capital city, we see time and time again not Senators, not Congressmen, but staff aides making the decisions as to where these defense dollars or other Federal agency dollars are going to be expended.

Now, I have a fairly good idea, Mr. President, about how votes are going to stack up on this issue. It is an issue that is new. This General Accounting Office report is dated July 16.

I frankly think it would be not in the best interests of trying to get some reform in this institution if I called this matter to a vote right now. So if I might, with the understanding of the Senator from Michigan and the Senators from Arizona and Georgia that we will consult with the respective committees and have hearings on this matter and look into how we might make this system better, I would, Mr. President, ask that the pending amendment be withdrawn.

The PRESIDING OFFICER. The Senator has a right to withdraw his amendment.

Mr. GOLDWATER. Mr. President, I move to table the amendment.

The PRESIDING OFFICER. The amendment has been withdrawn by the sponsor.

Mr. PRYOR. If I might inform the Senator, I have withdrawn my amendment.

The PRESIDING OFFICER. The amendment has already been withdrawn.

Mr. GOLDWATER. Let me understand what the Senator is asking. Is he asking the Armed Services Committee to hold these hearings?

□ 1620

Mr. PRYOR. Mr. President, I would respond to the distinguished chairman of the Armed Services Committee that I think this is a matter that is even larger than armed services. It is a matter for the Rules Committee of the Senate, for this body to establish procedures for those funds being reprogrammed. I just think the biggest problem is going to be in trying to find the mechanics and the proper way to reprogram defense expenditures because that is where the biggest dollars are. I hope the Armed Services Committee will be sympathetic.

Mr. GOLDWATER. If the Senator will offer legislation only for this study, I would be glad to go along with him. But I know that no reprogramming is accomplished during a recess without my permission. And they chase me wherever I am before it is allowed, and less than $1 billion was ascertained last year, but I know other committees would go over that. If the Senator would propose legislation to create such a study, I would be glad to go along with it.

Mr. PRYOR. I appreciate very much the remarks of the distinguished chairman. We already have a study: I have sent it to the Senator. We have just agreed to seek hearings in the Rules Committee.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

AMENDMENT NO. 2308

(Purpose: To delete the authorization to dispose of fluorspar from the National Defense Stockpile)

Mr. DIXON. Mr. President, I ask unanimous consent to set aside the two pending amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIXON. Mr. President, I have an amendment at the desk and I ask for its immediate consideration. It has been cleared on both sides. It will take 1 minute.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON] proposes an amendment numbered 2308.

Mr. DIXON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 195, in the list of materials between lines 4 and 5, strike out the following:

"Fluorspar, Metal Grade 33,750 short dry tons
Fluorspar, Acid Grade .... 22,500 short dry tons ."

Mr. DIXON. Mr. President, I have what I believe is a technical amendment to the list of strategic materials currently in the national defense stockpile authorized for disposal by the committee bill.

There is a great deal of controversy at the present time over what the inventory goals should be for materials in the national defense stockpile. There is one set of inventory goals, drawn up as the result of a lengthy interagency process in the executive branch, which have been relatively unchanged since 1979. There is a very different set of goals coming out of a recent study by the National Security Council, which would drastically reduce the inventory goals for almost every strategic material currently held in the national defense stockpile.

The Preparedness Subcommittee of the Armed Services Committee has been reviewing these conflicting sets of inventory goals for the national defense stockpile. I serve as the ranking member of this subcommittee, and the senior Senator from New Hampshire, Senator HUMPHREY, is the chairman. We have had one oversight hearing on the management of the national defense stockpile this year, and we will be having additional hearings this fall. I think it is fair to say that the Preparedness Subcommittee has serious reservation about the new inventory goals for the national defense stockpile proposed by the National Security Council study, but we have not reached a final conclusion on this matter yet.

Despite the unresolved issue of what the inventory goals for strategic materials in the stockpile should be, the committee bill includes a list of excess materials for disposal from the stockpile. The stockpile managers need the flexibility to dispose of materials in the stockpile that are no longer needed, and so the committee authorized for disposal those materials which would be excess under both the 1979 inventory goals and more recent goals derived from the National Security Council study.

Unfortunately, Mr. President, there are a few items inadvertently authorized for disposal by the committee bill which do not meet the criteria of being considered excess on both sets of inventory goals.

My amendment deletes two items from the list of items authorized for disposal—metal grade fluorspar and acid grade fluorspar—because these items are still required in the stockpile under the 1979 inventory goals.

I urge the adoption of this amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Illinois.

The amendment (No. 2308) was agreed to.

Mr. DIXON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WARNER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

□ 1630

Mr. GOLDWATER. Mr. President, it is now 4:30. The chairman thinks it is time that we get moving.

I would like to ask the chairman of the Military Construction Subcommittee if he will get this thing off the ground and go with it.

Mr. BINGAMAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

AMENDMENT NO. 2571

(Purpose: To delete funds for homeporting facilities at Staten Island, NY, and at Everett, WA, and to provide funds for Navy munitions procurement.)

Mr. BINGAMAN. Mr. President, before I send an amendment to the desk, I would like to repond to the comments which the Senator from South Carolina made earlier about the work of our Armed Services Subcommittee, the Military Construction Subcommittee.

First, let me commend the Senator from South Carolina, the chairman of that subcommittee, for the fair and bipartisan way that he conducted the meetings of that subcommittee.

I want to also commend the staff—Bob Bayer, Russ Milnes, and Marie Dickinson—for their excellent work in preparing the military construction parts of this Department of Defense authorization bill.

We have had agreement on virtually everything. There is one major item that we did not agree upon, and that is the subject of the amendment which I sent to the desk at this time.

The PRESIDING OFFICER. There are two amendments now pending.

Mr. BINGAMAN. I ask unanimous consent, Mr. President, that the amendment now pending be temporarily set aside so that we may consider the amendment I have sent to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. BINGAMAN], for himself, Mr. EXON, Mr. GLENN, and Mr. DIXON, proposes an amendment numbered 2571.

Mr. BINGAMAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 317, after line 22, insert the following new section:

SEC. 2191. STRATEGIC HOMEPORTING.

Notwithstanding any other provision of law, funds appropriated pursuant to an authorization in this or any other act may not be used to construct homeporting facilities at Staten Island, New York, or Everett, Washington, and funds authorized to be appropriated for such purpose in this Act are instead authorized to be appropriated for Navy munitions procurement.

Mr. BINGAMAN. Mr. President, the amendment I have sent to the desk I fear will be controversial. It will delete funds proposed in this bill for the construction of facilities at two new Navy home ports, one in Staten Island, NY, and one at Everett, WA, in the total amount of——

Mr. STENNIS. Will the Senator yield for a moment?

Mr. BINGAMAN. Yes, I yield.

Mr. STENNIS. Mr. President, will the Senator from New Mexico please suggest the absence of a quorum to clarify a procedural situation?

Mr. BINGAMAN. Mr. President, I suggest the absence of a quorum so we can clarify the procedural situation.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. Mr. President, as I was indicating to the Senate, the amendment that I have sent to the desk calls for the deletion of $141.6 million, which is designated in the pending bill for two new Navy home ports, one at Staten Island, NY, and one at Everett, WA. The proposal in my amendment is to transfer those funds to the Navy weapons account for purchase of munitions for the Navy.

My colleagues and I, who are offering this amendment, are convinced that the strategic rationale for this so-called strategic homeporting initiative is really very much lacking.

This is a program, in my view, which the Navy on its own should have cut from its budget long ago. Yet, as its budget has shrunk from the levels that were expected, and as this program has come under increasing criticism from many fronts, the Navy has come forth with nothing but additional rhetoric about how critical the program is.

To hear the Navy's point of view on this, particularly the Secretary of the Navy's, it would appear that this is the highest priority item in the Navy budget, more important than the people needed to man the 600-ship Navy, more important than the munitions needed to sustain the 600-ship Navy, and more important than the readiness of the 600-ship Navy, perhaps more important even than the shipbuilding program.

The reason for this attention to this particualr item in the Navy budget, and the priority given to it by the Navy, has much more to do with domestic politics, I fear, than it does with the fighting capability of our Navy or with deterrence of the Soviet threat.

Today, we are asking the Senate to reject the politics that traditionally have prevailed in favor of maximizing the Navy's warfighting potential. We are asking the Senate to join the House in rejecting this homeporting plan of the Navy.

I note that the House rejected the funds for homeporting on a bipartisan basis. Both the Democrats and the Republicans by majority vote turned thumbs down on this proposal when it was discussed in the House on July 25.

Let me discuss the Navy homeporting plan for those who are not familiar with it. This is a plan, very simply, to build nine new naval bases. The Navy is proposing to open a new port in Staten Island, NY, for the battleship *Iowa*'s surface action group of seven ships. They are proposing to open a new port in Everett, WA, for the *Nimitz* carrier battle group of 13 ships. They are proposing to place 27 ships, including a carrier battle group and the battleship *Wisconsin*'s surface action group in the Gulf of Mexico at seven new ports and one existing port. Finally, strategic homeporting involves the placing of 17 ships, including the battleship *Missouri*'s surface action group, at existing ports in Pearl Harbor and California.

Thus, we are talking about how best to accommodate 64 ships many of which are already in our fleet today.

Those of us who oppose the opening of new ports believe that the Navy is seriously overstating the benefits of this proposal, and they are also grossly underestimating the costs involved, especially the ongoing base support and personnel costs of the new ports.

We do not oppose that part of the Navy's homeporting plan that involves existing ports in San Francisco, Long Beach, and Hawaii, and we rather think that should have been the model which was used around the entire Nation. The new ports in which they are proposing to accommodate

the other 47 ships are simply a political luxury that we cannot afford.

Mr. President, the fact is that today we are already accommodating 556 ships in our existing port structure and, in fact, we are scheduled to have a 600-ship Navy by fiscal year 1989, which is long before these new ports, all of them except New York, would be ready to accept ships.

Indeed, simply by maintaining the number of ships at San Diego at 118, which is the level it had in 1980, rather than decreasing the number to 99 as the Navy would propose, and by maintaining Norfolk's present ship loading at 123 ships rather than dropping to the 115 proposed by the Navy, 27 of the 47 ships we are talking about could be accommodated. The other 20 ships could also easily be handled in existing ports.

□ 1640

Using existing ports will cost some money, Mr. President. It would cost about $500 million in military construction cost. But that is a far smaller sum than would be required at the new ports that are proposed, a sum of over a billion dollars, and the real cost we are talking about at the new ports is not the billion dollars in military construction that will be required, but the annual base operating and personnel costs that we are going to be facing forever as long as these ports are open. Those costs are estimated by the Senate Armed Services Committee's staff to be in the range of $250–$300 million annually.

PROBLEMS OF TOO MANY BASES—INEFFICIENCY IN BASE STRUCTURE

Ever since I came to the Senate, 3½ years ago now, I have heard our chairman [Mr. GOLDWATER] talk about the inefficiency in our current base structure and the fact that there are numerous bases around the country that really should be closed. There is a provision, in fact, included in this bill that Senator THURMOND and I put together calling for a Presidential blue ribbon task group to be set up to look into this problem and make recommendations for base closures to the President and to the Congress. The savings that could be realized from closing unneeded or duplicative military facilities have been estimated to be in the range of hundreds of millions of dollars if not over a billion dollars a year. Last year, the Secretary of Defense submitted a notional base closure list consisting of 22 Army, Navy, and Air Force bases around the country. The estimated annual savings from closing these bases were almost $400 million and the annual savings were over $220 million for the seven Navy facilities on the list.

We all know that defense budgets are going to be very tight in the coming years, barring a major new development on the international scene. Indeed, with the specter of Gramm-Rudman hanging over the defense budget, we could see the budget cut in nominal terms for the second year in a row in fiscal year 1987. This is a time to seriously consider base closures, as this administration has thus far not been willing to do. It is not a time to be talking about opening up nine new bases in New York, Washington, and along the gulf coast.

The Navy claims that the annual additional operating, support, and personnel costs for all the new home ports combined will only be $35 to $50 million a year. That frankly flies in the face of even minimal analysis. The same Navy that told us last year it could save hundreds of millions annually by closing a few bases would have us believe opening bases doesn't cost anywhere near as much. The claim is that the annual additional cost of opening up and operating nine new ports to house over 10 percent of our surface Navy will be about the same amount as they said last year could be saved by closing one base, the Naval Air Development Center in Warminster, PA, and relocating its mission at another site. Those savings were supposed to be $45 million a year. Frankly, such a claim cannot be taken seriously. Moreover, according to the Navy's own study of homeporting submitted to the Congress last October, the Navy will need 836 more military personnel if the Iowa battleship surface action group is homeported in Staten Island than would be needed if it was homeported in Norfolk. The cost of those 836 military personnel for that one port would come to almost $30 million annually.

And that does not take into account the additional civilian support structure and contractor support structure that would be needed in New York compared to the more efficient structure that already exists in Norfolk. The point is that nobody should vote against this amendment on the assumption that the additional operating and personnel costs are only going to be $35 to $50 million annually for all of the new ports. New York alone is going to cost more than that.

STRATEGIC BENEFITS

Let me now turn to a brief discussion of the so-called strategic benefits of homeporting which the Navy has put forward to justify this. The crux of the Navy's argument is that we need to disperse these 47 ships to New York, Everett, and the gulf coast to reduce the vulnerability of the Navy to a conventional surprise attack. They invoke the tragic memory of Pearl Harbor, but that is obviously a mistaken historical analysis. We spend today billions of dollars to have the intelligence capability necessary to know where the Soviet threat is located over, on, or under the sea. Indeed, I recall the Navy's reaction a couple of years ago when, following deployment of Pershing missiles and cruise missiles to Europe, the Soviets threatened to increase deployment of their ballistic missile submarines off of our coast. Secretary Lehman's response at that time was that that was fine by him since it would simplify the Navy's mission of locating and dealing with those subs.

The GAO report on the Navy homeporting plan points out that Naval Intelligence Command officials with whom they talked indicated that the conventional threat to U.S. ports is relatively low and that during a crisis, Soviet forces would be assigned higher priority missions than mining or attacking U.S. home ports. I believe that, rather than preparing to fight the last war, we should be devoting our limited resources for the Navy to meeting its real needs.

Just for the record, let me note that dispersal of the fleet could, in fact, marginally increase its vulnerability. This is because of our terribly limited mine countermeasure capability which would today, and indeed for quite a long time in the future, require ports to be cleared in a serial fashion one at a time. Moreover, all of the nine new ports the Navy proposes to establish are open to Soviet bloc merchant shipping unlike most of our existing naval ports. My colleague from Ohio will go into this question of whether the homeporting plan is going to increase vulnerability or decrease vulnerability in more detail when he speaks on this amendment.

The Navy has also thrown out a variety of other arguments for homeporting. They claim that homeporting will somehow help them to exploit our industrial base. One senior Navy admiral told me in my office that this was the main reason for the Staten Island home port. He, once again, appeared to be assuming that we would be engaged in a long conventional war with the Soviets which would turn on our ability to turn out new ships like the World War II Liberty ships and to repair damaged ships as the war dragged on for months and years. I honestly do not think very many of us expect a future world war to last as long as World War II or World War I did.

In any case, all we are doing with the industrial base is redistributing it; there will be no more total shipyard work than there would be otherwise. And there is more than adequate capability in our existing port structure to handle the needs of the 600-ship Navy. Indeed, the Philadelphia Navy Yard appeared on last year's notional list of base closures.

The Navy has also claimed that the strategic homeporting plan will enhance battlegroup integrity, but the fact of the matter is that battlegroup

integrity would be best served by having fewer, larger ports as would be the case in the alternative scenario we are calling for.

The Navy also has made the case that the new ports would be closer to potential wartime operating areas. This argument is of dubious merit because responses to a fast-developing contingency are made generally not by ships in port but by ships already at their forward station. Indeed, this is the rationale for the current policy of continuous peacetime forward deployment. Moreover, even for small contingencies, such as Grenada, task forces must be assembled from an entire coast. Fleet responsiveness is thus determined not by the ships that are based closest to the operating area, but by the ships that are based furthest away. Having a few ships closer makes little difference.

But what the Navy has not focused on in its arguments, are many of the negative effects of homeporting on training, on logistic support, and on the morale and welfare of service members and their families.

Opening up all of these new ports is going to greatly complicate training and make it more expensive by dispersing personnel away from the major fleet centers which have many important training facilities. Dispersed personnel will have to be flown to these fleet centers for much of their training and this will increase the amount of time that they are separated from their families.

From the point of view of logistics and support activities, the new ports are going to be far inferior to our existing ports. Spare parts are going to have to be brought in from the large naval supply centers located in the large existing ports. The poor logistic support in the widely dispersed ports is going to translate into lost efficiency and lower readiness.

But perhaps the most serious cost of the Navy Homeporting Plan is the profoundly negative effect that it will have on Navy personnel. Adm. Tom Hayward, the Chief of Naval Operations from 1978 to 1982, places great emphasis on the effect that homeporting would have on personnel. In a letter dated February 4, 1986, to Senator THURMOND, Admiral Hayward referred specifically "to the numerous detrimental aspects which such wide dispersal to new bases will have on most military personnel, especially the career-oriented family Navy person."

Those numerous negative effects include increased time away from families because of remote training requirements, increases in the number of geographic moves which will require uprooting of families and relocation, relative austerity at the new bases in terms of community services traditionally available at Navy ports. I have several documents which I shall place in the RECORD at the end of my statement in which several retired Navy officers address these family issues in greater detail. But let me just quote one section from a letter I received from retired Rear Adm. Stan Fine on this point:

> I am disappointed that leadership of the Navy has obviously and with forethought discounted the impact that this homeporting (at Staten Island) will have on the morale and well-being of the personnel involved. I am even more disappointed that the senior military leadership of the Navy's surface warfare community (of which I was a member) has not stepped forward and taken a strong position against the entire strategic homeporting concept in view of what it will do to their best and brightest . . . I can only conclude that they either do not care for the welfare of their personnel (which I doubt is true) or that the political pressures on them to support the homeporting concept with its less than complete facilities are so intense that they have to go along despite knowing better.

Mr. President, let me say just a word about the whole issue of politics, since I think it is intimately involved with this proposal. One of my colleagues who voted in favor of the homeporting concept in a recent conversation pretty much dismissed the strategic rationale for homeporting but said he voted as he did because he thought it was a legitimate goal on the part of the Secretary of the Navy to seek to broaden the base of political support for the Navy. That is really what homeporting is all about in my opinion. The strategy in strategic homeporting has little to do with the Soviet Union and everything to do with our domestic politics.

I honestly question that we can afford politics as usual in this case. The Navy budget is coming under increasing pressure. The squeeze is potentially going to be most serious in the areas of operating and support costs and personnel costs, precisely the areas where homeporting is most going to increase our inefficiency. The current Chief of Naval Operations, Admiral Trost, is already attacking the Congress for not granting him the personnel he needs. He is quoted in Defense News as saying that military personnel at our current bases are already being forced to work 75 to 80 hour weeks as he seeks to man the fleet. He fears the effect this will have on retention. I am afraid that as Congress focuses more and more on defense outlays, Admiral Trost is only seeing the tip of the iceberg of the personnel problems to come. And yet the Navy is proposing new bases.

I think the comments of the Senator from Arizona and the Senator from Georgia, the chairman and ranking member of this committee, on the constraints in budgets that we are going to see in the future are extremely relevant to this debate today.

The question of politics and military bases has obviously been around for a very long time. Mr. President, but this is a very serious question we are dealing with today. I recently came across a letter from the turn of the century naval strategist Thayer Mahan, dated December 26, 1910, in which he deplored the politicization of our naval base structure. Let me quote briefly from his letter:

> Our whole naval expenditure is depreciated by the disposition to look upon it as so much plunder, to be distributed, not as a simple military disposition, but with reference to the supposed claims of different localities to have money spent in them. In other words, that the distribution of naval stations is to be not national, but sectional. Localities at the present Secretary's effort to change this; and I have little doubt it counts for much in the opposition he encounters.

That Secretary, George Meyer, obviously came from a very different school of politics than Secretary Lehman.

There is a very serious question which Admiral Fine raises in his letter as to why there has not been more organized opposition in the active and retired military to this homeporting initiative. The fact is that there are many active and retired military out there who are dead set against this idea of homeporting, but who are reluctant to go public on the issue. Some of them believe that the problem eventually will go away without their intervention. They take heart in the House's vote on June 25. Others, in speaking to me or my staff have pointed to the Larry Korb affair and said that they cannot afford to speak publicly for fear of Navy retribution. Let me note that one person not intimidated by the Larry Korb affair is Dr. Korb himself. Mr. President, I ask unanimous consent to place in the RECORD at this point a letter that he sent to me in support of the amendment that I am offering today.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

UNIVERSITY OF PITTSBURGH,
*July 18, 1986.*

HON. JEFF BINGAMAN,
*U.S. Senate,*
*Washington, DC.*

DEAR SENATOR BINGAMAN: At your request, I am writing this letter to support your efforts to transfer $142 million from the Navy's construction budget, that is currently earmarked toward providing facilities for homeporting Navy ships in New York, New York and Everett, Washington, to the Navy's ammunition account.

The dispersal of Navy ships to new homeports does not make sense strategically or economically. In an era of smart weapons and sophisticated defenses, I am not persuaded that anything is gained by placing small numbers of ships in New York, Everett, or the Gulf. The Pearl Harbor analogy is no longer relevant in 1986.

The economic justification for this move is even weaker. Using the Navy's own figures, it is much cheaper to put the additional Navy ships into expanded facilities in cur-

rent ports. Moreover, I believe that the Navy has seriously underestimated the actual costs of constructing the new facilities in New York, Everett, and the Gulf. In an era of constrained resources, we could find ourselves spending $1 billion merely to show the flag.

Conversely, there is a great need for additional ammunition for the new ships and planes that have been authorized in the first Reagan administration. Transferring these funds into the ammunition account will ensure that all the new ships and planes can carry out these assigned missions. This is much more important than providing a new home for a few ships.

Sincerely,

LAWRENCE J. KORB,
*Dean.*

Mr. BINGAMAN. I remind my colleagues that Dr. Korb, until last year, was the senior civilian official in the Defense Department with responsibility for our military base structure as Assistant Secretary of Defense for Manpower and Installations. I also ask unanimous consent to place in the RECORD at this point the letter from Admiral Hayward and the letter from Admiral Fine, both of which I have previously quoted from in part and the testimony which retired Vice Adm. C.E. Bell presented to the Armed Services Committee earlier this year at our hearing on homeporting.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THOMAS B. HAYWARD ASSOCIATES, INC.,
*February 3, 1986.*

Hon. STROM THURMOND,
*U.S. Senator, Chairman, Subcommittee on Military Construction, Committee on Armed Services, Hart Senate Building, Washington, DC.*

DEAR SENATOR THURMOND: Thank you for your letter of January 21, 1986 in which you seek my views on the current homeporting initiative that has been undertaken by the United States Navy.

I am most pleased that the Armed Services Committee is looking carefully at this extensive homeporting initiative to determine its overall viability at a time of significant fiscal constraint on the defense budget.

It is not difficult to understand why the Navy believes a strategic homeporting program makes sense. Wide dispersal of the fleet around the nation obviously provides a certain modicum of decreased vulnerability. However, there surely are many reasons to question the concept these days. With your usual perception, you have focused accurately on the substantive issues related to (1) ships' vulnerability, (2) battle group integrity, (3) proximity to operating areas, (4) base overcrowding and (5) exploiting the industrial base. I would add one other: effect on personnel. I refer specifically to the numerous detrimental aspects which such wide dispersal to new bases will have on most military personnel, especially the career oriented family navy person.

I am assuming that your Committee is examining the important, if not critical, issue of the added dollar costs, costs which are not trivial in any era—certainly not the present.

Thank you for informing me of the investigation plans of the Senate Armed Services Subcommittee under your leadership. I wish you well in this important work.

With high regard,

THOMAS B. HAYWARD.

---

UNITED-GUARDIAN, INC.,
*July 29, 1986.*

Senator JEFF BINGAMAN,
*Ranking Minority Member, Subcommittee on Military Construction, Senate Armed Services Committee, Washington, DC*

DEAR SENATOR BINGAMAN: The purpose of this letter is to respond to your request that I comment on the Navy's plan to establish a homeport base in New York for the Battleship IOWA and a group of escorts.

In Jaunary, 1984, soon after the original announcement was made with great hype, I coauthored an article for the New York Daily News opposing the proposed homeporting on the basis of its obvious aura of politics, having little to do with a true National Security need. I have read most of the GAO and Navy, reports since that time. I have not changed my mind; in fact, as time has gone by, the agruments for the need for the base have become less and less pursuasive.

I would like to make a few points which I hope the Commttee will consider in its deliberations.

Clearly, despite a bit of fuzzing around the edges by those attempting to argue for the New York base, the rational for its establishment can only be justified on the basis of a non-nuclear war between the NATO and Warsaw pact Forces. In a nuclear scenario, basing the ships in New York, Norfolk or anywhere would be irrelevent to any prevention of their inport destruction. So if the purpose of the base is to avoid another conventional war Pearl Harbor, then our extensive intelligence communities, National Programs, NSA and for that matter, the entire Defense Establishment have wasted countless billions of dollars over the last few decades. I doubt if there is any serious, conventional war scenario in our current warplans which does not anticipate a period of tension and buildup prior to any NATO/Warsaw Pact conflict. In view of our continuous surveillance of Soviet Forces on a worldwide basis, I doubt if any serious planner would even consider a conventional war surprise attack as a viable assumption. Yet the Navy has proposed to spend hundreds of millions of dollars to avoid the consequences of a surprise attack, an event which, in order to prevent, we are already spending billions annually so as to reduce its probability of happening to zero. (This comment is also applicable to the proposed new home ports other than New York.)

If the dispersion of Naval Forces is to avoid a "terrorist" incident in current ports, then placing these ships into New York harbor, a port open to all of the world's vessels including Warsaw Pact ships, in a city open to international travelers and tourists, in a location with no shoreside land buffer or restricted waters, makes these ships even more vulnerable than they would be in Norfolk or Charleston or Mayport with already established security infrastructures built and refined over decades. By putting these ships into New York, we would not be diminishing the probability or impact of terrorist incidents . . . we would be giving potential terrorists easy and attractive targets aboard which could be nuclear weapons. (have we forgotten so soon the attempted mortar attack on the UN Headquarters of some years ago?)

A conventional scenario which calls for the New York Battlegroup to operate independently should the other Navy bases be blocked or put out of action is also a questionable assumption. The IOWA group could not operate against Pact forces by itself without the train of support ships and aircover that can only be provided by U.S. forces that originate from these other ports. In other words, the IOWA and its ships need these other forces as well as contiguous supply and repair facilities to be truly insulated from the consequences of a repetition of Pearl Harbor.

The affordability of the New York Base as well as the other new bases should also be considered by the Committee. When the New York base was announced in early 1984, the Secretary of Defense's proposed five year budget plan (FY-85) was as follows:

| Fiscal year: | *Billion* |
|---|---|
| 1985 | $305.0 |
| 1986 | 349.6 |
| 1987 | 379.2 |
| 1988 | 411.5 |
| 1989 | 446.1 |

The appropriations for FY-85 and FY-86 and the Budget Authority projected by the First Resolution for FY-87 to FY-89 for DOD are as follows:

| Fiscal year: | *Billion* |
|---|---|
| 1985 | $286.8 |
| 1986 | 278.4 |
| 1987 | [1]285.0 |
| 1988 | [1]297.0 |
| 1989 | [1]309.0 |

[1] Estimated DOD portion of Resolution amount.

In other words, it appears that the Congress is willing to provide the Department of Defense only 1% more in FY-89 than DOD requested for FY 1985, with a gap of $137B in 1989 alone. While much of this reduction is probably the result of lower inflation estimates, it also appears as if much has changed between the time the New York base was announced and the current capability of the Department to execute plans that were made 2-3 years ago. While the base might have been considered to be affordable in early CY 1984, that it has retained its priority while forces and readiness and weapons and manpower have been cut to accommodate lower budgets should raise many questions in the minds of the Committee members as to the reality of the process within the Department for establishing program priorities. That the Navy appears to prefer to put its resources into concrete and pier pilings rather than steel and weapons when it faces certain, future austerity should not be automatically accepted by the Congress as the best National Security decision.

The number and composition of the future Fleet should also be of concern to the Committee before it authorizes resources for a new base. If we examine the numbers of ships projected to fill the Navy piers in the future, the Department, in the FY-85 Budget submission to the Congress, projected the following shipbuilding program for Fiscal Years 1987-89:

| Fiscal year— | 1987 | 1988 | 1989 | Total |
|---|---|---|---|---|
| New Construction | 22 | 24 | 25 | 71 |
| Conversion | 4 | 4 | 5 | 13 |
| Total | | | | 84 |

The Fiscal Year 1987 Budget provided the following projections for the same years:

| Fiscal year— | 1987 | 1988 | 1989 | Total |
|---|---|---|---|---|
| New Construction | 21 | 24 | 21 | 66 |
| Conversion | 3 | 4 | 4 | 11 |
| Total | | | | 77 |

With only 20 new ships per year projected for FY-1990 and 1991.

While the Navy will probably achieve 600 ships by 1990, the ability to sustain that number in the years following needs to be the subject of considerable additional analysis. It would appear that the reductions in the planned ship construction/conversion schedule will result in the current home ports being underutilized as older ships will be retired without replacements.

Another major factor which I feel has not been sufficiently considered is the projected useful operational life of the base itself. The IOWA was recommissioned in April, 1984 and is currently over 40 years old. At best, it will be surprising if she is still in commission in the year 2000. If we accept the Navy's IOC date of September, 1988 for the bare bones New York home port, then hundreds of millions of dollars will be spent for a base with a twelve year operational life expectancy.

To my knowledge, there is no Navy plan to build more battleships or increase the number of carriers beyond 15, or to turn New York into a carrier homeport or take a battleship from another port to replace the IOWA until that replacement also becomes too aged to keep around. What are the Navy's plans to fill the future alongside gap?

After the IOC date, the Navy will still be required to spend additional millions of dollars on facilities, housing, etc. to make the base complete . . . to base an IOWA with a limited remaining lifespan. Considering the time it will take to budget for and construct these additional facilities, the base may be completed in time to decommission the IOWA. Yet even during the limited years after IOC, the facilities will probably be empty at least 50% of the time as the ships deploy overseas, train in areas where ranges and services are available, and receive maintenance in Navy or Private Shipyards outside of homeport.

In other words, it appears that the Navy is proposing to build a homeport for a battlegroup with a limited future, with pier facilities that will be empty of ships much of the time, and support facilities that will be underutilized or unutilized waiting for ships to return to port.

Your Committee should insist on knowing what the Navy's plans for the port will be in the long term, not just for the nearterm post IOC date. How will the base be used when the IOWA and the escorts are at sea for long periods of time? What will the military personnel and civilians attached to the base do productively when the ships are absent? With shortages projected in military personnel needed to man the Fleet, should the Congress be a party to situations where many military will be ashore at marginal, underutilized bases?

Most distressing to me personally is the Navy's apparent lack of concern for the welfare of the thousands of officers and enlisted who would have to live with the decision to go ahead with the base.

New York City has just about reached the point where only the very wealthy or very poor can afford to live there. It is one of the most expensive cities in the world. Housing for the middleclass is at a premium and for the poor, a disgrace. Yet the Navy is proposing to place thousands of military into this environment to fend for themselves in the housing market. If private housing cannot be found on Staten Island (and I doubt if it can except for a very lucky few), the others will be required to search for housing in Brooklyn or Queens or Nassau County or New Jersey. Anyone who suggests that this is an acceptable course of action has obviously never been involved in commuting into and out of New York during morning and evening rush hours, or had to pay the high tolls on the bridges on a daily basis or faced the problem of finding parking on City streets in residential neighborhoods or paid hundreds of dollars per month for garage space or lived in small, non-airconditioned apartments in the summer or ridden the buses or subways on hot days. How many junior officers and enlisted would be forced to leave their families elsewhere rather than bring them to New York or its suburbs?

Add to this problem the lack of commissary and exchange facilities, or even when they are established later on one of the bases, the distances families would have to travel and the costs that they would incur to take advantage of these facilities.

Add to this problem the paucity of medical facilities that would be available to dependents in a port without a military hospital. (This is a consideration that must be taken most seriously. In my seagoing days, the availability of a military hospital to my dependents when I was out of port relieved a great many anxieties, especially when I was deployed to the Sixth and Seventh Fleets.)

Add to this problem the lack of recreational, moral and welfare facilities on nearby bases, requiring those stationed aboard ship and on the base to travel away for any relaxation or try to make do in an expensive city.

Add to this the lack of individual and team training facilities (Firefighting, damage Control, ASW Team Training, etc.) which will require that the ships' crews spend a great deal of time in Norfolk, separating married men from their families even when the ships will be alongside in New York.

Add to this the everyday expenses of living in New York such as high automobile insurance, high rents, high sales taxes, high income taxes (for the dependents who work), high child care costs, high dental costs, etc.

Add to this the already crowded and in many cases, inadequate schools that the children of ships' and base military personnel will have to attend.

I could continue but I am sure that you and your colleagues are aware of many more negative human factors beyond those that I have listed.

I am disappointed that the leadership of the Navy has obviously and with forethought discounted the impact that this homeporting will have on the morale and wellbeing of the personnel involved.

I am even more disappointed that the senior military leadership of the Navys' Surface Warfare Community (of which I was a member) has not stepped forward and taken a strong position against the entire strategic homeporting concept in view of what it will do that the Navy expended on personnel amenities when the two Trident bases were established, as well as the funds in this year's MILCON Budget for housing and personnel support facilities at bases throughout the world.) I can only conclude that they either don't care for the welfare of their personnel (which I doubt is true) or that the political pressures on them to support the homeporting concept with its less than complete facilities are so intense that they have to go along despite knowing better.

I cannot understand why the Navy, having gotten itself into the unsupportable position of having to justify a politically motivated, unneeded base, with many local residents of New York and much of the city's Congressional delegation opposing it, and with many direct and indirect negative factors attached to it, continues to pursue the base's construction. I cannot understand why the Congress continues to ever consider building a bayside, concrete monument to pork barrel at a time when future austerity in Defense Budgets is all but certain, when the number of ships and aircraft to be constructed will be less than planned just a short time ago, when readiness funds will most certainly be reduced, when personnel costs will increase as the need to attract volunteers will face a declining manpower pool, and when the achievement of objectives for conventional force sustainability keeps receding into the future.

During the markup of the Defense Authorization Bill, the Committee reduced or eliminated or stretched out many valuable and needed programs that would have provided real strength for our nation's security. I would urge you to use the funds requested for this misbegotten, homeporting project to restore programs that will truly add to the Navy's readiness and sustainability.

Please pay my respects to Senator Stennis, who, as chairman during the era I testified before the Committee, always treated me with the greatest of courtesy and to Senator Warner, with whom I toiled many long hours in the "E Ring" in bygone days.

Very respectfully,

STANLEY S. FINE,
*Rear Admiral, USN (Ret), Senior Vice President, United-Guardian, Inc.*

---

ADMIRAL BELL'S TESTIMONY

Good afternoon, I am Vice Admiral C.E. Bell, US Navy, retired. For the past twelve years I have served the City of Norfolk, Va. as Director of Civic Facilities, managing an 11,500 seat convention center, a 2,500 seat theater, the Gen. MacArthur Memorial, and the Metro baseball parks. My prior experience as a naval officer covered thirty five years and included five tours of duties in the Pentagon in such positions as Executive Assistant to the VCNO; Director, General Planning and Programming, OP-9 and finally as Director Navy Program Planning, OP-090.

In 1957, as Operations Officer of Submarine Forces Atlantic Fleet, I was responsible for planning the dispersal of submarine forces during a fleet dispersal effort similar to that anticipated in the current proposed strategic homeporting initiative.

As a native resident of the Washington scene, a reasonably seasoned naval officer and at present a fifteen year resident of Norfolk, Virginia, I feel I am well balanced enough in my thinking to talk with you today on the subject of the Navy's Proposed Strategic Homeporting Plan.

We in Hampton Roads have confidence in our military leaders and feel that their judgments must be free of domestic political

considerations. Therefore, although the fleet dispersal inherent in the strategic homeporting policy announced in 1982 was clearly not in the economic interest of Hampton Roads, we did not attempt to influence the decision making process regarding it. We view the current situation, however, as considerably different from that existing in 1982. We have concluded that continuing deficits and weaker budgetary support for defense dictate that strong consideration be given to the economic factors favoring expanding the Navy presence in Hampton Roads, even at the expense of the Strategic Homeporting initiative.

We are unaware of any reason advanced by the Navy for this proposed dispersal other than implied strategic considerations. In our view, every other factor involved is degraded 'including training, logistic support, deployment, repair, morale, family support, etc. In my opinion, the dispersal suggested to Staten Island and the Gulf of Mexico of the Atlantic Fleet, does not seriously impair an adversary's ability to attack or to hinder our movements.

I understand that as an integral part of the strategic homeporting plan the Navy proposes to conduct a higher percentage of its operational training exercises in the North Atlantic. It is my experience that increased training exercises in the North Atlantic would result in valuable training days being lost to weather and the increased logistical problems of bringing the required forces together. In addition it will involve greater risk to men and equipment. Further, all of the Navy's existing Atlantic Fleet at sea training support facilities are located in the sea areas of the Caribbean Islands. It appears to me that Naval forces remotely based in the Gulf of Mexico would have little opportunity to operate with the rest of the fleet, and their requirement for possible activity in the Caribbean can be met more easily from Atlantic Coast ports.

From my perspective, it appears that the decreased services, reduced morale, and increased costs associated with fleet dispersal ultimately could create a greater threat to the Navy's ability to respond to an enemy than that posed by increasing fleet concentration in existing ports.

However, I recognize that in my present status as a civilian I am not knowledgeable of all the current military factors that must be considered in a decision such as this. I have come today to address only those factors of which I am knowledgeable. And, while I am concerned with the pros and cons of the Strategic Homeporting question overall, the moving of a Battlegroup to Staten Island is of greatest concern today.

We have reviewed a draft of the GAO report on this subject. We note that the GAO has examined the ship berthing capacity at the Naval Station Norfolk and concluded that berthing capacity for 70 ships exists currently. We agree with this evaluation. Based on information available to the general public, we are aware of a number of occasions when that number of ships has been berthed there. Further, to our knowledge, the Little Creek Amphibious Base in Norfolk has not been considered in any of the Navy or GAO capacity analyses for berthing of Naval Ships in Norfolk. We note this with concern and find this quite surprising since Little Creek has unused capacity available for berthing a number of the Naval Ships normally berthed at the Naval Station Norfolk.

We cannot judge whether the construction of new ship berthing facilities at great expense while existing ship berthing facilities are adequate represents the best use of the limited defense funds available. However, as interested and knowledgeable citizens, we are able to judge the complexity of the Norfolk Naval installation. This installation is much more than a facility. It is a grouping of many related organizations and facilities which has developed over a great many years and whose overall relationships are not completely appreciated by most.

We are certain that the establishment of new naval complexes where no base of expertise exists involves considerable risk. We hope that this body recognizes these risks when it considers the advisability of establishing new bases.

The Congressional Research Service Issue Brief on the Navy's Strategic Homeporting Program quotes a Navy estimate of about 5.8 million dollars as the steady state operating and support cost increase for Staten Island over existing facilities. This is only a very small portion of the annual costs, in our estimation.

Certainly one has to think of the loss of efficiency and increased costs associated with operating, servicing and logistically supporting ships remotely located from the nearest Navy complex. The increased costs associated with training alone must be staggering. The Training Command for the entire U.S. Atlantic fleet is located in Norfolk. This command provides instruction to over 115,000 officers and enlisted personnel each year. Courses vary from one day to 16 weeks and average six to eight weeks in duration. These schools and courses run the full gamut of naval warfare and operational skills at sea.

These courses are vital to assuring that each ship is manned with a crew capable of making it perform its function in todays sophisticated operational modes.

On average each Atlantic Fleet Officer and enlisted person spends almost one month each year in training. For ships homeported in Norfolk, this process is easily accommodated since it is possible to live at home or aboard ship and commute. The training doesn't involve leaving families and friends. It is done without added travel or per diem costs.

By contrast, personnel based on ships in newly established homeports will experience additional family separation in order to take advantage of the necessary training. The Navy will experience considerable additional costs for travel and per diem. How many millions of dollars this will be, and to what degree fleet readiness will suffer, I cannot begin to estimate.

Aside from training, a ship and its crew located in Norfolk is serviced locally by a vast array of logistic and support activities, an infrastructure unsurpassed in its ability to provide service. The naval complex today includes more than 3,000 buildings on over 4,500 acres of land with ten miles of water front. Obviously the Navy does not intend to duplicate those facilities else where. It will, to a large extent, be the Hampton roads facilities that are relied upon by a Staten Island battlegroup although at a much lower level of efficiency than when serving Norfolk based ships.

The Naval Supply Center in Norfolk is the world's largest store. It provides ships in the fleet with 570,000 items from food stuffs and clothing to tools and replacement parts. It is manned by over 4,000 employees, mostly civilian civil service.

Ships based locally can arrange bearer pick ups of urgently needed parts or supplies rather than wait for normal delivery. What would the sailor on Staten Island do? Even when provisioning in a normal fashion, transportation to Norfolk based ships involves considerably less time and resources than transportation to ships outside the Hampton Roads area.

The Norfolk Naval Shipyard with over 12,000 civilian employees is the world's largest shipyard that specializes exclusively in the repair and modernization of Navy ships. It is the single best source of Naval ship repair expertise in the nation. Its employees work on and are familiar with the full range of Navy ships.

The capability of the shipyard's employees and the shipyard's shop and laboratory facilities are most accessible to ships homeported in Norfolk.

The Navy has several other shore based ship repair activities located in the Norfolk area including the Readiness Support Group and its two Shore Intermediate Maintenance Activities at the Norfolk Naval Station and Little Creek Amphibious Base. In addition, there are always at least two repair ships in port providing services for surface ships and one for submarines.

Services from all these activities are much more timely, efficient and effective when provided to ships homeported in Norfolk.

Measuring lost efficiency while servicing remotely located ships is speculative at best. Would a 20% loss be overstating the issue? And would this equate annually to $10 million dollars?—20 million? The real price, though, is in the impact on the crews and their families and in the subsequent reduced readiness of the ships.

From living with Navy men and women we know the importance to the Navy of their morale. Their retention on active duty is seriously affected by several factors including:

Time away from families;

Number of geographic moves which require uprooting of families and relocation;

Availability of suitable housing and schools;

Availability of personal services and recreation; and

Acceptance by the community at large.

Retention of Navy members will clearly be reduced if they perceive any of these factors to be negatively impacted. How much a shift to Staten Island or another non-traditional port might affect retention is speculative but any decrease at all would have serious economic consequences due to the high cost to the Navy of retraining replacements.

Most time away from family is dictated by operational and repair periods which would be relatively unaffected by a strategic homeporting decision. However, a substantial portion of family separation is related to the training periods which necessitate temporary relocation to training centers, primarily Norfolk.

Rotation from ship to ship and from sea to shore is another necessary part of Navy life. In Hampton Roads, because of the number of ships homeported there and because of the number of shore billets available, the chances of relocation being required during these transitions is considerably less than would exist in one of the newly established homeports with just a few ships and no shore billets. This means that the children can progress in one school and the family doesn't have to endure the wrenching and often expensive experience of a move.

Equally important, there is significant cost to the Navy when each rotation results

in relocation. These costs certainly amount to millions of dollars per year.

The Navy provides extensive medical care in Hampton Roads to members of the Navy and their dependents. The primary delivery vehicle is the Portsmouth Naval Hospital which had approximately 30,000 admissions and 500,000 out-patients in 1985. This care is supplemented by three Navy medical clinics and four Naval dental clinics located throughout Hampton Roads.

There are seven Navy credit unions, four commissary stores and six Navy Exchanges located thoughout Hampton Roads. There is also a Legal Services Office, three Family Service Centers and six Military Housing Offices to assist Navy families with their problems.

The Navy operates several fleet recreation parks locally together with a number of officer and enlisted clubs. Combined with several gymnasiums, these facilities offer superior opportunities for the leisure time of Navy personnel located in Hampton Roads.

All of these facilities and their operating organizations were created over a long period of time, most when the dollar would buy much more than it will today. The construction and operating costs were made possible only by the concentration of Navy personnel in Hampton Roads. Their re-creation to support relatively few ships in a new homeport such as Staten Island would obviously not be feasible and is not included in the 400 million dollar Staten Island facility cost. But they are vital to the readiness and morale of ships and crews to perform their function. We cannot afford to lose sight of that fact.

Today, active and retired military and civil service workers and their families make up about half of the population of Hampton Roads. Much of the remaining half has some direct involvement with either Navy facilities or Navy/Marine Corps. personnel. It's a population which tends to be unusually supportive of our military and its leadership during bad times as well as good. The Navy is a part of our community and has been an integral part as long as I can remember.

This is more important in the long run than the bricks and mortar which dollars can buy and fashion into facilities. This community support and acceptance add immeasurably to the quality of life experienced by our Navy families in Hampton Roads. Equally important these Navy families add to our quality of life. Navy men are leaders of our Boy Scout troops; Navy men and women sing in our choirs; Navy men run our Little League teams—and their sons and daugthers star on those same teams. The total Hampton Roads Navy/Community story is one of synergism of military/public/private sector efforts by many organizations and individuals. It can not be duplicated. It has been building for many, many years and today is the result of investments, not of money, but of lifetimes of energy on the part of hundreds of thousands of people. This legacy does not exist elsewhere.

The total Navy presence on Staten Island would amount to only one tenth of one percent of the New York regional population. The diversity of interests normal to such a situation will conflict with development of community support comparable to that existing in Hampton Roads.

In conclusion—

First, we don't represent that we are able to perform a sophisticated evaluation of the additional operating and support costs of a newly established ship basing facility. We have absolutely no doubt, however, that the $30 million per year per facility estimated by the GAO is much closer to reality than the $6 million estimated by the Navy. And of course even this higher figure disregards the start up costs which are a part of any new facility.

Second: No ship should be homeported where there is less than complete community backing. Navy families should not be forced to live where the Navy is not wanted by substantial and vocal elements of the community. Is adequate housing available? Can it be found at rates Navy families can afford? A few year ago lower rated Navy men in the New York area were in the poverty group and had to be subsidized with food stamps. If this deployment is approved, will the Navy have to come back to you Senators for additional allowances for families because of the high costs of living?

Finally, let me remind you that, since 1798 when the Navy established the Gosport Navy Yard, Hampton Roads has been the Navy's first choice for the creation of facilities to moor and service its ships and to house, train and support its personnel. The original choice was made because of Hampton Roads' strategic location at the center of the nation's East Coast and because of its natural harbor, considered by many to be the finest in the world. None of that has changed. In addition we now can proudly point to an unequaled existing ship and crew support complex plus total community backing for Navy ships and their families. We are ready, today, to support those ships being considered for inclusion in the Navy's strategic homeporting program.

We recognize that the Staten Island Navy Base would have strong support from elected city and federal representatives who have the best interests of the nation and the New York area in mind. And, we, of course acknowledge that the Navy presence will bring a positive economic benefit wherever it goes—whether to Staten Island, Hampton Roads or elsewhere.

However, we are convinced that the real issue here is not what the Navy contributes to the region but rather, what the region contributes to the Navy. In 1957 the Navy effected a re-distribution of the Fleet to new home ports only to reverse the process when budgets became tighter again. To quote the great Yogi Berra, "This is deja vu all over again." We urge you to consider all factors, especially economics, fleet readiness and fleet security and make your decision on that basis.

Mr. BINGAMAN. Mr. President, as I have said earlier, it is truly preplexing to see the Navy place such emphasis on this ill-thought-out program. It is particularly so when you look around and see what the Navy is doing to adjust to our more stringent fiscal circumstances elsewhere in its budget. My amendment would transfer the funds intended for facilities at Staten Island and Everett to the Navy munitions account. Let me just briefly tell my colleagues why we chose the Navy munitions account.

The Navy is today terribly short of munitions. Adm. Lee Baggett, Commander in Chief of the U.S. Atlantic Command, stating in testimony before the Armed Services Committee earlier this year that:

Correcting ordnance deficiencies, both in inventory levels and weapons capabilities, is my number one sustainability issue. Although our inventories are improving, as the initiatives of the past few years result in deliveries of ordnance items, shortages will continue to exist in both level of effort and threat munitions into the 1990's.

The fact is that today the Navy is still cross-decking ammunition. That is, they are taking ammunition off of one ship that is coming into port to put it on another ship that is ready to leave.

Last spring the then Chief of Naval Operations, Admiral Watkins, stated before the Armed Services Committee that this cross-decking practice would continue until 1989. But that was before the Navy decided to strip over $5 billion out of its plans for munitions purchases in fiscal years 1987 to 1990. The GAO has completed a report for Senator GLENN which compares the Navy's plans at this time last year for the 4-year period 1987 to 1990 with this year's budget request. What the GAO has discovered is that the Navy cut 25 percent of its munitions request. Last year, the Navy planned to buy 49,721 missiles and torpedos over that 4-year period. This year, for the same period they are projecting purchases of 37,238 torpedos and missiles, which is 12,483 or 25 percent less than projected last year.

The Navy made these serious reductions in munitions procurement because of the overall funding limits that they are now facing. But this will obviously have an effect on whether the Navy will ever be able to eliminate cross-decking of its munitions. Cross-decking or serious munitions shortages are going to continue well into the next decade. The precise numbers in the GAO report are classified, but let me tell my colleagues we are very far short of meeting our requirements. We are not just a few percentage points short, but substantially short, and I would be happy to review the numbers with any of my colleagues who would like to do so privately.

So Mr. President, I hope that rather than pouring almost a billion dollars over the next 4 years into opening up new and unneeded Navy ports, we can address the very real needs of the Navy for sustainable levels of munitions. Avoiding a hollow, toothless Navy has to be a higher priority than the political luxury of new ports.

Unfortunately, I know as I stand before the Senate that there is far stronger political constituency for the new ports than any constituency that may exist for munitions sustainability. But at a time of no growth defense budgets, I firmly believe we must come down in favor of maximizing our naval war-fighting capabilities. That is what today's debate is about. If the Senate goes along with the homeporting initiative and if then, the homeporting ini-

tiative is implemented, I am firmly convinced that we will come to regret it very greatly in just a few years time.

I have not been around here long enough to go through all the cycles of base openings and base closings, as some of my more senior colleagues have. But those cycles are probably as inevitable in a democracy as the business cycle. And they are probably every bit as painful for the citizens involved. Admiral Bell concluded his testimony before the Armed Services Committee by referring to his own experience in the Navy and let me quote from him:

In 1957, the Navy affected a redistribution of the fleet to new homeports only to reverse the process when budgets became tighter again. To quote the great Yogi Berra, this is deja vu all over again.

Yogi Berra and Admiral Bell have it right. I hope the Senate, on a bipartisan basis, will join the House in rejecting the opening of new bases in New York in Staten Island and in rejecting the concept of spreading seven new ports along the gulf coast. This homeporting initiative is going to look more and more unaffordable as time goes on and the cost of reversing it, both economic and political, will continue to increase.

Mr. President, I know there are many others wishing to speak both for and against this particular amendment. Before I yield the floor, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I will just take about 30 seconds. I know there are other Members here who are deeply involved in this issue. But I wanted to take time to note for all of my colleagues that the distinguished occupant of the Chair, the junior Senator from the State of Washington [Mr. EVANS], has presided over the Senate now for 100 hours, a remarkable task, and he will be awarded the golden gavel award for the time he has dedicated to the Senate by presiding during the 99th Congress. So I certainly offer my congratulations and to those who understand that 100 hours is 100 hours around this place, this is a long time. All of us are grateful for the Senator's dedication.

(Applause.)

The PRESIDING OFFICER. The Chair appreciates those remarks. Some of those hours have been more interesting than others.

Mr. GRAMM addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Mr. President, I rise in opposition to the amendment. I am not going to spend a long time here today, since I know many people want to speak, in order to respond to the statements made by the distinguished Senator from New Mexico, but I would like to simply point out several relevant facts and let them speak for themselves. These relevant facts respond to people who will not come forward to express their views or the people who in casual conversation pass on rumors. Let me set the record straight, Mr. President. We have two former Secretaries of the Navy who serve in this body. Both of those former Secretaries of the Navy have endorsed the new home port concept. We hear from those who say they oppose it, but when we held hearings, comprehensive hearings, only one person came forward to testify in opposition to it. We had people testify on behalf of it. We had letters sent by five former Chiefs of Naval Operations.

□ 1700

Let me read a simple statement from Admiral Crowe as to the importance of Navy homeporting:

The strategic homeporting plan will make a significant contribution to our national strategy and to our military capacity to respond effectively during crisis or war. I urge your support for its implementation.

So, Mr. President, let me quickly respond to all the statements about politics by saying that the only people in this body who have served in such a high capacity in the Navy as to be Secretary of the Navy both support it. Five former Chiefs of Naval Operations, who no longer serve in active duty, who have retired, whose retirement is secure, have endorsed it.

We held a hearing and gave everybody an opportunity to come forward and make their case. The only person who made a case in opposition to it, represented the Norfolk Chamber of Commerce.

So, if you are simply going to try to cite authority, we can line up brass forever; we can cite decisions made by people who have more knowledge on this subject than most Members have, who clearly support this on strategic grounds. So I am going to limit my comments not to this area but to two other areas.

First, I should like to talk about the fact that we have committed almost $50 billion during the Reagan administration to build 130 new warships. We currently have about 100 ships stationed at Norfolk and about 100 ships stationed in San Diego. We are berthing ships three abreast in San Diego. I do not believe there is anybody here who would argue that we do not have substantial crowding in Norfolk, that we are not double-berthing and in some cases triple-berthing there; and that if we do not build new home ports for these 130 ships that will be built by 1992, we are going to end up with roughly 150 ships at Norfolk, 150 ships at San Diego which would be half of the ships in the American fleet in two home ports.

I do not believe that makes sense strategically, and I know it does not make sense in terms of economy of scale or in terms of quality of life of those who serve in the uniform of this country.

The second point is that the siting of these home ports has been made with great involvement by those who have demonstrated leadership in national defense. We are here today debating and will vote on the overall homeporting concept. We will debate here and vote on the funding for the first two homeports—one at Everett, WA, and one in the New York Harbor. But, Mr. President, we are not just debating those two home ports. We are debating the entire concept, which includes gulf coast homeporting.

Mr. President, so strong was the competition for homeporting along the gulf that Corpus Christi raised its taxes to put up $25 million. That is not promises; that is money on the decks. The Texas Legislature, which meets this very day to debate how it is going to deal with a $3 billion deficit, put $25 million on the deck as our commitment for cost sharing.

In fact, on the gulf coast, 40 percent of the cost of homeporting will be paid by the local taxpayers, and the local and State governments. I submit, Mr. President, that never has the U.S. Navy gotten the buy that it will get in gulf coast homeporting.

I believe that if you go back and look at the overall package in terms of commitments made for housing provided through municipalities and bond sales, commitments made for infrastructure in the various home ports, you will find that over $150 million of commitments have been made by those who want to play a leadership role in providing for the defense of the Nation.

Mr. President, I believe homeporting is important. It is important strategically. We have invested almost $50 billion to build a new fleet. Does it not make sense to invest $800 million to put the fleet where it will be needed, to put it in areas where we can maintain the quality of life that has been essential in recruiting and retaining the finest young men and women who have ever worn the uniform of this country? I think it makes sense.

The truth is that we are not going to solve the overcrowding at San Diego and Norfolk as a result of this decision. The number of ships there will grow; the crowding problem will continue. But the crowding problem will not be as bad as it would be in the absence of this action.

I believe that if you look at the local contribution and the local support for the quality of life in the areas that are

being planned for homeporting, you are going to find that this is a good decision, a good decision strategically, a good decision economically, a good decision in terms of quality of life.

After having invested $50 billion in building a fleet, let us not fail to provide $800 million to put that fleet in an area where it can be used. To do that, Mr. President, would be equivalent to buying a fancy car, spending tremendous amounts of money on it, and not building a garage.

I believe this is a reasonable proposal. I strongly support it.

My State is not going to be directly affected by the vote today. But I want my colleagues to know that I have looked at this proposal, that I have looked at it strategically and in terms of dollars and cents, quality of life, and I strongly support the overall homeporting concept.

Mr. President, I hope that in the vote today, we will not just defeat this amendment. I hope that we will defeat it overwhelmingly and, in doing so, approve, once and for all, Navy homeporting. This must be done so that we may get on with the job of building the home ports that will be needed to project American power into the Caribbean, to project American power into the northern Pacific and through the Atlantic sealanes, to keep Ivan back from the gate, to keep the world free, and to keep the peace.

Several Senators addressed the Chair.

The PRESIDING OFFICER (Mr. BOSCHWITZ). The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, I join my distinguished colleague from Texas, who I think has made an excellent statement.

Mr. President, one of the most interesting arguments I have heard today is that those who are for the home port are for it for political reasons; whereas, the other side, those who oppose it, somehow have this mantle of national interest. That would make sense if the proposal did not originate with the Navy, was not strongly supported by the Navy itself.

Mr. President, the Secretary of the Navy made a special appointment with me, as he may have with other Members in this body, for the specific purpose of talking about homeporting and securing my support for the homeporting issue.

□ 1710

In fact, it was the Secretary of the Navy who asked that I come out here and speak on the issue. I must say I was a very easy mark because it so happens that the city of Lake Charles has a very modest but important investment in the home port.

Mr. President, it makes perfect sense for the Secretary of the Navy to be for home port. You do not have to be a strategic genius to understand that if you put all your eggs in one basket, you make a more lucrative target. You make a more lucrative target not only for nuclear attack but for being able to bottle up two ports. If you have all your strategic assets in two ports you can bottle it up by air attack, by submarine attack, by blockade, by mines. By whatever way there is, you can blockade or block up and prevent from moving if you have all of your strategic eggs in two baskets.

What the Secretary of the Navy says is that it is a very high priority for him to disperse those assets.

Mr. President, he makes good sense.

Second, Mr. President, I find it especially interesting and almost amusing that we should have the argument that Navy people are against this movement because of austerity.

Mr. President, surely there are some people I guess in San Diego who do not want to move and some in Norfolk who do not want to move, and there are also probably scores of them who are thinking about having to move to San Diego or having to move to Norfolk who would strongly support this because those happen to be two of the most crowded bases in the country. As the Senator from Texas pointed out, you have double berthing and triple berthing at San Diego and, Mr. President, in terms of housing it is especially crowded and I can tell you—I was just out in San Diego about 3 weeks ago—that is one of the most expensive places in the country to live.

If you want a cheap place to live, you go to a place that does not have a huge military complex like the gulf coast, and I can tell you, you can buy housing for a song on the gulf coast compared to the west coast or indeed compared to Norfolk.

In terms of quality of life, I think the best place you could possibly move would be on the gulf coast and in Everett, WA. I must say when we all went up to Scoop Jackson's funeral, that is one of the most pleasant places on the face of the United States to live. I would guess the competition to get in on a move to Everett, WA, would be very keen indeed.

Mr. President, the argument is very simple. We ought to support the Navy, support the Secretary of Navy, not because of politics, but for the opposite reason, because of survivability, because of sustainability, because that is where the strategic interests of this country are.

One final thought, Mr. President. If the balloon goes up and we all pray that it does not, and we have to embark a lot of American soldiers, they are not all going to be embarked at San Diego and at Norfolk. A huge proportion of those are going to be embarked on the gulf coast ports because that is where the bases are, that is where they would have to be embarked. They are going to need protection. You are going to need a presence out in the Gulf of Mexico. You are going to need a Naval presence in other places other than just the two ports.

Can you imagine if we had only two air bases in this country? Why, the air Force would be down here immediately and say "We need to disperse these assets; they are vulnerable with only two bases involved."

The same thing is equally true, the same arguments pertain and for the very same reason the Secretary of the Navy is not just supporting but he is strongly supporting and strongly anxious to approve the homeporting issue.

Mr. President, I hope we will defeat the amendment.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, I rise in support of the amendment by my distinguished friend from New Mexico, and with all due consideration for a warm friend from Louisiana I am amused by the suggestion that there is not a little bit of politics in this. I am pleased that my friend from Louisiana openly states that the Secretary of the Navy urged him to come to the floor, and I have no problem with that.

One of the facts that should be known by everybody in the Senate by now is that the Secretary of the Navy and his folks have been lobbying all 100 Senators for months about this issue, calling back to their respective States to other public officials, pulling out all the stops, and there is about as much politics in this particular issue on this bill as anything we will deal with on the DOD authorization bill.

Now, because a lot of folks might come over here thinking "I want to follow the committee," let us first talk about the result in the committee. The plain fact is that when this matter was first considered in the committee it was considered on a question of whether we would release the funds from the prior year, the funds we had fenced.

My friend from New Mexico stated his position which was carefully considered. There was a lot of discussion. And the truth of the matter is on the first vote there was a 9-9 tie.

I think Members of the Senate who have great personal regard for the distinguished chairman of our committee ought to know that the chairman and the ranking minority member voted against the release of these funds and the chairman and the ranking minority member, and I will assert this with no apology to anyone, know more about what we are doing in that committee than anyone else on that committee. The chairman and the ranking member opposed this program.

Now later they found a vote. And the ultimate result was on a 10 to 9

vote against the Chair and against the ranking minority member. This whole homeporting monster escaped from the committee.

Now do not anyone delude himself into thinking here that you are just voting on this $141 million. This $141 million is chicken feed. This $141 million is the first or rather really the second, I think I would be correct in saying, the second puny installment on a massively expensive system that is going to cost billions of dollars.

We knocked down the fence on $79 million and now we are opening up the gates for $141 million and after that money will cascade out of this homeport concept and flood Congress, literally inundate Congress.

Now, my friends in the Senate, when the Secretary of the Navy began to talk to us all about releasing these funds, he wanted to do that before we started talking about MilCon projects this year. Why? Why did he want to do it? Why did he want to open the gate? Why did he want to knock down the fence before we talked about MilCon this year? I will tell you why: because he knew, ladies and gentlemen of the Senate, he knew that the distinguished Senator from New Mexico and others in the Subcommittee on MilCon and ultimately the members of the Armed Services Committee would be faced with the very unpleasant and unpalatable task of cutting $1.2 billion, $1.2 billion in MilCon out of the DOD authorization bill this year.

□ 1720

And here is the book. Everybody is in this book; a little piece of all of you in here.

And so he did not want to go in where he had to defend his project against everybody else's project. No, he wanted to get that out in front, knock down the fence, get the 79, come around, get the 141 and knock over the gate. That is what he did in raw power.

I want to read you some things that were cut out, some sample military projects in the military construction budget in the $1.2 billion we cut out. We cut Army family housing for families to live in, $110 million; Navy family housing, $63 million; Air Force family housing $14 million.

Let me give you some examples of what we did to the Army at Fort Wainwright, AK, for New Light facilities, we cut $30 million. At Fort Campbell, KY, aircraft maintenance hangar knocked out, $16.5 million. At Fort Drum, NY, for New Light division facility, cut out $32 million.

And the Navy itself, a training facility at San Francisco for a fire fighting training facility, $9.3 million cut out. An air station in Hawaii, $6 million. Surface warfare officer school in Rhode Island, a training facility, $8 million. Navy weapons station in Charleston, $16 million.

I could go on. But the book is full of it. But he did not go in there with everybody else and take his share of the cut. He went out the door first.

Now, I do not have any problem with people working their bills. You know, that is part of the system. It is a great country we live in. But the question of the strategic importance of this legislation is so much inferior to the simple raw politics of what is being done that it is not even a close call.

Now, in the next 5 years—5 years; forget about the $79 million you spent and the $141 million we are talking about here, the foot-in-the-door stuff—in the next 5 years, the passage of this bill is going to cost $540 million for military construction and about $300 million in annual operating and support costs. What did our staff find? The armed services staff found that the strategic benefits of homeporting, if any—I want to emphasize "if any"—are marginal, because with modern surveillance systems, there is little conventional threat to our ports. The chance of a repetition of Pearl Harbor at Norfolk or Charleston or San Diego, the staff found extremely remote.

The General Accounting Office has concluded that the real cost of building new ports will be hundreds of millions of dollars more than the Navy estimate. But what is the Navy estimate? The Navy estimate is $799 million building the ports. So you have the military construction, but you also have the annual operating and support costs, to worry about you have got the building of the ports, which will cost $799 million—the Navy admits to that—but it will be hundreds of millions more.

Now, the Navy figure does not include housing, for instance. The Navy figure does not include housing, especially in New York City where the average cost of renting a one-bedroom house is about $900 a month; or needed dredging in Everett, WA, or other enhancement programs necessary to get the bases to full operating capacity.

The Armed Services Committee staff—now this is our staff, the experts we pay that you authorize us to hire—say that full operating capacity will cost at least $1.6 billion. And they say it could be as much as, that's the operating and service cost which the Navy says is $30 million to $50 million a year could be as much as $2 billion a year—$2 billion a year.

My friends, you are getting into something here, I am telling you, that has no bottom to it. This thing is going to eat us alive.

Last year, on the DOD authorization bill, we fought for a couple of days on this floor about the question of closing bases. Do you remember that? Could it have only been last year we were going to close them and now we are going to open nine new ones? Last year, we fought for days because the Secretary of Defense wanted to close 21 bases on a hit list he had. And today, almost without a glance, it looks like we are going to open nine new ones. It is a miracle. It is a miracle.

Now, I think the deficit is getting worse. Gramm-Rudman-Hollings has got us up against the wall all the time. We are trying to pass new triggers to do something about it. And everybody goes home at night and says, "How will I get through next week? How are we going to do this? What will we cut?"

Well, if it is worse, how come we were going to close 21 last year and we are going to have nine new ones this year?

Now, the Senator from New Mexico is a very thoughtful member of our committee. What does he ask to do with this $141 million that is in there now? I think it is $141,600,000. He says instead of going into this grandiose scheme, this ambitious scheme, this dream, this expensive dream, take the $141 million and spend it on something we need—buy munitions.

Do you know the trouble with that? Munitions does not have any constituency. Nobody gives a continental darn about buying munitions. About the most unsophisticated, the least exciting subject you can talk about here is buying some munitions.

But what did Adm. Lee Baggett say, the commander in chief of the U.S. Atlantic Command, in his testimony before our committee? Here is what he says:

> Correcting ordnance deficiencies, both in inventory levels and weapons capabilities, is my No. 1 sustainable issue. Although our inventories are improving as the initiatives of the past few years result in deliveries of ordnance items, shortages will continue to exist in both levels of effort and that munitions into the 1990's.

Last year, the Navy planned to buy 49,721 missiles and torpedoes. Rough that out at 50,000. Last year, the Navy was going to buy 50,000 missiles and torpedoes over this 4-year period.

But this year, this year, the Navy has come back. What do they want to buy? Only 37,000, instead, over the next 4 years, cutting back the missiles and torpedoes 25 percent. Why? There is a political constituency for homeporting and it is stronger than the constituency for munitions.

Mr. D'AMATO. Will the Senator yield?

Mr. DIXON. I am about to conclude.

Mr. D'AMATO. Just on that point. Would you yield for a question just on that point?

Mr. DIXON. If my colleague would permit, I will conclude in a second, then I will be glad to answer a question.

Mr. D'AMATO. Certainly.

Mr. DIXON. Let me just say this in conclusion. I do not pretend to know a whole lot about what we should be doing in connection with all matters of things concerning our armed services. I do not come here holding myself out for any special degree of expertise. But I want to say these two things quickly in closing: The people who know best in the committee, the chairman and the ranking member, are against this. They are not going to talk here, probably, frankly; I see their chairs are empty.

□ 1730

They are against it. The people that know best are against it. Second, I am ranking on the preparedness subcommittee and I know what I hear. And the service chiefs come in, and they put up the charts. What do the charts say? The charts say that the worst thing that has happened to us in connection with our conventional forces in this country is that the spare parts chart is going down, and the munitions chart is going down over the next 5 years. The Senator from New Mexico wants to bring that thing up a little bit and get us some munitions. I think it is a good idea.

I would say that while I know this is probably an impossible task and the votes are no doubt here to defeat the amendment, I want to say in conclusion it is my judgment that in the long run, this is going to be one of the most expensive and important undertakings involving the Congress.

Mr. BENTSEN and Mr. D'AMATO and Mr. GORTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. I have been on the floor and have listened with interest to the four previous speakers on this subject. And I was particularly impressed with the eloquence of my colleague, the junior Senator from Texas. I do not wish to impede his arguments. I must say that I was also impressed with the case made by the proponent and sponsor of the amendment, the junior Senator from New Mexico. He did the best job he possibly could with what seems to me to be an extremely difficult, perhaps an impossible case. If anyone could make a silk purse out of a sow's ear, the Senator from New Mexico has done that.

As I listened to him, I believe that I heard the three different strands, the three separate strands to his argument in favor of his amendment. The first was that there was no strategic justification for dispersing the fleet and for homeporting. The second was that it costs too much, an argument repeated eloquently by the Senator from Illinois, and the third was it was bad for, and unpopular with, the personnel of the Navy.

I say he did well in connection with a very difficult argument for just this reason: He places himself, with respect to the arguments that there is no strategic justification for these home ports, in opposition to the present Secretary of the Navy, to the two former Secretaries of the Navy who serve in this body, to the Chairman of the Joint Chiefs of Staff, who is himself an admiral in the Navy, to a wide range of former naval Chiefs of Staff who no longer could be said to have any particular or specific interest in this.

It was not he but the Senator from Illinois who said that the committee found at best the most marginal justification for this proposal. Yet, when I pick up the report for the bill with which we are dealing, I see the following: That the committee has had an opportunity to extensively review the Secretary of the Navy's strategic home port initiative. It is the judgment of the committee that the strategic value of this plan has been clearly demonstrated.

That does not seem to be a conditional or a marginal approval by any stretch of the imagination. The argument of the Senator from New Mexico in this connection is difficult, of course, in addition because it flies in the face of common sense. We have a Navy as we have an Army and an Air Force, of course, to protect the national security of the United States. We made the decision that that Navy should be of approximately 600 vessels. It would seem to this Senator that the proposition that we should not have half of those vessels in two single ports, where they are extremely crowded, where their movement is difficult, and their dispersal absent would be an extremely difficult argument to make. I must say with all respect to the Senator from New Mexico I do not believe that he has made that argument successfully.

Obviously, if we are providing for the national defense of the United States, we are well off to cover both the northern Pacific approaches to the United States as well as the southern Pacific approaches, the northern Atlantic approaches to the United States as well as the southern Atlantic approaches, and the Caribbean which is so vital to our national security.

Obviously, from the point of view of the much more likely form of conflict in which the United States could find itself, that is to say the kind of minor conflicts in which it has found itself even in the last few years, we are better off having the navy dispersed among a wide range of number of ports than we are concentrated in a single area.

Obviously, if we fear, as we do, some kind of terrorism or sabotage, we are better off having navy ships in a wide number of ports rather than in a simple handful of ports.

In short, the argument for dispersal of a large and a varied and a strong navy, a dispersal in which logistical units of the Navy can be kept together, a battleship task force, a carrier task force, and the like seems to me to be overwhelming, and not met simply by the argument of even Members in this body which would fly in the face of all appropriate strategic doctrine, and the priorities of the Navy itself.

The second argument of the Senator from New Mexico is that, in any event, this costs too much. I need not spend a great deal of my time on that subject as it was covered so well by the junior Senator from Texas. As he pointed out, we have spent some $50 billion to create an effective and a modern navy by building or being in the process of building some 130 new ships. The costs with which we are involved here today, not just directly, but indirectly, adding not just two ports which are the technical subject of this amendment, but San Francisco and the gulf ports in addition, is estimated to be $800 million, and the wildest and unsupported accusations of the supporters of the amendment only go a modest amount above that.

Should we not spend 2 percent of what we are dealing with in these new Navy ships to see to it that they are properly and more safely and more effectively stationed? It seems to me that argument is almost impossible to make. The Secretary of the Navy, even in a time of great budget austerity, even at a time at which his budget is being cut very, very sharply, regards this homeporting, this dispersal of Navy ships as an extremely high priority; high enough so that he is willing to give up the cost of one ship, one destroyer—one destroyer is the gross cost of these Navy home ports, not the net cost because of course at least half and perhaps three-quarters of the investment which is proposed here would have to be made in any event to improve to even reasonable adequacy ports which exist at the present time.

So, of all proposals which would be penny wise and pound foolish, the proposal that we spend not even $800 million properly to disperse a $50 billion new Navy, seems to me to be insupportable.

The final argument of the Senator from New Mexico is one that I find quite paradoxical. I rather imagine that my two colleagues from New York and my colleague from California will do so as well. I can do no better than to quote from the "Dear Colleague" letter which the Senator from New Mexico has written. He says, "But perhaps the most serious consequence of the Navy homeporting plan is the negative effect that it will have on Navy personnel and their

families. Increased time away from families, geographical moves," and I quote again, "and a relative austerity at the new bases in terms of community services traditionally available at Navy ports."

I suspect my two colleagues from New York will be surprised to be told that there are no traditional social services and community services available in the largest city in the United States of America. I know my colleague from California will be surprised at that accusation about the city of San Francisco. And I must say that I am when it refers to Puget Sound, which already has more than one naval station, and Navy personnel who would be surprised to be told that they must live in austerity far from training, far from any traditional Navy supports. I strongly suspect my distinguished colleague from Texas, who is on the floor, will express surprise at Texas being characterized in that fashion, as will the other gulf ports.

It simply is not the case. In fact, living conditions for members of the U.S. Navy who are stationed at these places will be improved rather than be harmed.

□ 1740

The ability of the Navy to recruit will be enhanced rather than hurt by the proposition that there will be more than simply two major naval stations in the country.

In other words, all three of those arguments are in error.

The rejection of this amendment on the building of Navy home ports is proper and appropriate as a strategic doctrine. It is a wise and relatively modest investment. It will be good for, and popular with, the personnel who are stationed in these places.

For each of these reasons, Mr. President, I suggest that my colleagues strongly reject the amendment.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. DENTON. Mr. President, we are discussing a major issue, not simply one that is economic but one that is strategic. It is an issue that I think in context, would be placed along with the discrepancy which this Congress effectively provided our President when we provided him a 0-3-3 progression in real growth in the Defense budget as part of our mandate to provide for the common defense.

Let us get some of these costs together with the economic and political implications. The program has been charged by the Senator from Illinois as being purely political, and with money cascading in future years from the coffers, so let's get down to cases.

Last year we in effect promised the President $320 billion this year in defense. We are now fooling around with a sum of around $290 billion at best, $30 billion less, and we are still putting ornaments on the budgetary Christmas tree, which will probably make sequestration or further cuts in defense by some other device necessary.

This Senator is not one who plays politics with defense. Indeed, I hope that the body as a whole will recognize that our principal mandate as Senators of the Federal Government is to provide for the common defense, and that because of politics we are perhaps losing sight of that.

The Senator from Illinois may have had some inspiration for his extremely spirited speech, which used such words, as I mentioned, as "cascading," and which referred to actual base closings as "a miracle."

The Senator said that the Secretary of the Navy was last year in favor of certain base closings. Now he wants to establish new bases.

Let us look into that issue.

Indeed, last year, the Secretary of Defense had 20 bases that he put on the list and said he was willing to close. It was politics, not strategic considerations, which forced him to come off of that. One of the bases which happened to be on that list was Great Lakes Naval Training Station, which happens to be in the State of Illinois. That might have something to do with some of the spirit behind the elocution of my friend from Illinois.

But let us get the costs straight, because he was considerably in error on that question.

He talked about billions of dollars, and how the Armed Services Committee staff "experts" put it at $1.6 billion.

Mr. President, I am going to say these figures twice because they are important.

The Secretary of the Navy has agreed to limit himself to $800 million in military construction for the entire homeporting program. That is $200 million more than would be required to stuff the new ships we are building into the existing ports. We are talking about $200 million, and we would gain tremendous advantages in the strategic field.

Which of the "experts" on the Armed Services staff, which, indeed, of us "experts" on the Armed Services Committee, which of us "experts" in the Senate can truly assess the strategic advantages afforded or involved in the following questions:

How much is it worth to have the Navy's escort ships based near the huge Army logistics base at Bayonne, NJ, which is the base that would spew forth the reinforcements to Europe that might deter a war, or prevent its escalation to a nuclear war, in the case of confrontation between the United States and the Soviet Union?

Any Senator who is familiar with the question of the reinforcement of Europe knows that that is not politics. It is fact. It is provision for the national defense.

How many Senators, how many of us "experts," would say what it would be worth to have escort ships based in the Gulf, to escort the cargo ships that must come from ports in the Gulf of Mexico to proceed to Europe, with 60 percent of the supplies for Europe coming from those Gulf Coast ports and required for any kind of success in the reinforcement of Europe?

How much will it be worth to have Navy ships there to move with those supply ships from the various ports in the Gulf such as Houston, Galveston, New Orleans, Mobile, and the others?

I am going to say something somewhat personal about myself. I served in the Navy for over 30 years. I think I still have a great aversion to playing politics with defense.

I would say to my friend from Illinois that when I first came to this body, the hottest number politically in my State for "pork" was a proposed $4.1 billion Federal subsidy of a synthetic fuel plant in Alabama.

The President thought that it should be privatized. I agreed. I was the only one in the congressional delegation from my State to go against that "pork," $4.1 billion worth of it.

We are now talking about $200 million, the difference between basing these ships the way the Navy, with its whole history of experience, says they should be based, and the inaccuracy of some of the remarks being made today, which are falling harshly on my ears.

We are talking about $200 million, and if somebody in this body thinks I will play politics for $200 million on defense, I wish he would see me outside.

When I first started to support homeporting, I did not know that the city of Mobile, which is the only one in my State getting any benefit from this, would get ships.

Homeporting means a signal toward South America, toward Cuba, toward Europe, that we mean business about what we said in the Monroe Doctrine.

We have something written by Monroe, with just four clerks in the Department of State, four clerks. He wrote up the doctrine because of the "Holy Alliance" taking form, really an Unholy Alliance, with the Czar of Russia, with France, and so on. Among its goals was for the Russians to join up Alaska with California, for Spain to resume her imperial role in the new world.

We stood up against that, tiny Nation that we were, and said, "No, you will not." And we made it stick.

Here I am in this body, after over 30 years of service in the military, listen-

ing to us talk about the politics involved in $200 million in additional expenditures to put almost 600 ships in new ports, which are really needed, rather than stuff them in existing ports for $200 million less.

To me that does not make any sense.

I say to the Members of the Senate, I do not want to overbuild upon my expertise in this matter. No one is a true expert on anything. I do not want to be noted as a prisoner of war, nor do I want to be falsely noted as a great naval aviator.

I would have you know, however, that as a lieutenant in the Navy, I was nominated by two senior officers for the Stephen Decatur Award for the outstanding operational contribution to the Navy for that year. It was in the field of strategy and tactics. I did not get the award. The man who broke through the North Pole icepack in a submarine did. The idea I had became standard Navy tactics and strategy, and it still is.

□ 1750

Answer this: With the conventional war scenario in mind, how much more likely is it that a ship or more than one would be sunk by submarines trailing ships coming from a few ports, like four, as opposed to many ports as proposed by the Navy in what is an altruistic, not a political, move?

How much is it worth to have some ships based at Everett to take care of escorting oil-laden ships from Alaska?

How much less likelihood is there of a terrorist attack on Navy ships in a few ports, as opposed to having them spread out all over?

How much less mining effort is required to sink ships as they sortie from a few ports as opposed to many ports?

I can tell my colleagues that all of those answers involve substantial differences, and we are talking about only $200 million. If one major ship, were we unfortunate enough to be engaged in hostilities, were to be saved because of this efficacious move, it would more than pay for all the homeporting and several times more. That is the true context of this. That is not elocution.

We have testimony from men with whom I have served.

Adm. Thomas H. Moorer, a fellow Alabamian and a friend, was Chief of Naval Operations during the 1960's, and then Chairman of the Joint Chiefs of Staff. He said that "the strategic homeporting program now under consideration is a highly desirable one," and he gives several reasons for that. He notes, in particular, the importance of a naval presence in the Gulf of Mexico.

Adm. Elmo Zumwalt was Chief of Naval Operations from 1970 to 1974, at the time when the number of bases was significantly reduced. He calls his role in that reduction "my sad duty" and says that "the loss of these bases was harmful to naval readiness." He goes on to say that he "strongly" supports the current strategic homeporting program, and concludes:

In my judgment, the hundreds of millions of dollars that must be appropriated in order for the strategic homeporting concept to be successful are fully warranted by the military benefits to be derived.

Adm. James L. Holloway III was Chief of Naval Operations from 1974 through 1978. He says that "I very strongly support the concept of strategic homeporting and consider that the Navy's plans to implement this philosophy are both imaginative and pragmatic." He notes in particular the threat of Soviet submarines operating off our coasts, and the benefits from basing our Navy "in a prudent system that takes advantage of the unique geography and special industrial capabilities of the United States." He concludes by saying that, in his opinion, "this country cannot afford not to move quickly into a system of strategic fleet basing."

Adm. Thomas B. Hayward was Chief of Naval Operations from 1978 to 1982. He has reservations about the strategic homeporting concept, particularly "the numerous detrimental aspects which such wide dispersal to new bases will have on most military personnel, especially the career oriented family Navy person." I know Tom Hayward well, and I understand his concern. No Chief of Naval Operations in my memory was more concerned about the welfare of our service personnel, and I believe that we and the Navy should ensure that questions of "quality of life" for our sailors and their families are kept in the forefront of our considerations and fully addressed. I believe that the Navy's program does that.

The committee also heard from Adm. Sylvester R. Foley, Jr., recently retired from the position of CINCPACFLT and now Assistant Secretary of Energy for Defense Programs. Admiral Foley, whose last position was truly as an "operating" rather than as a "political" admiral, supports strategic homeporting. He says:

I believe that the benefit of funding the additional homeports outweighs the risks of increased spending. Similarly, the risks associated with not funding this initiative far outweigh the benefits of economy that we would experience.

Those views are from a pretty good representation of our recent naval leaders. It is a little harder to assess the views of current, serving officers, although I was present in Mobile, AL, when Jim Watkins, then the Chief of Naval Operations, delivered a strong and passionate defense of the strategic homeporting concept.

I do know, however, that the new Chief of Naval Operations, Adm. Carlisle Trost, then CINCLANTFLT in Norfolk, earlier this year expressed great concern about the negative consequences in Norfolk and other Atlantic Fleet ports should strategic homeporting not be implemented. He noted the limitations of existing physical space which, he says, is "becoming more tightly hemmed in by commercial development." He pointed out that there would be great costs to provide adequate facilities in existing bases and, as a career officer of his seniority would, that not very many years ago we had to anchor ships out in the Hampton Roads area because of inadequate berthing facilities.

There was a rather tentative answer back from my friend, Tom Hayward, to Senator THURMOND when Senator THURMOND was questioning him. Tom is a friend of mine; I love him. I shall go ahead and read parts of that letter—in fact, the whole letter—because he was the only former CNO who took exception to this proposal.

HON. STROM THURMOND,
*U.S. Senator, Chairman, Subcommittee on Military Construction, Committee on Armed Services, Hart Senate Building, Washington, DC.*

DEAR SENATOR THURMOND: Thank you for your letter of January 21, 1986 in which you seek my views on the current homeporting initiative that has been undertaken by the United States Navy.

I am most pleased that the Armed Services Committee is looking carefully at this extensive homeporting initiative to determine its overall viability at a time of significant fiscal constraint on the defense budget.

It is not difficult to understand why the Navy believes a strategic homeporting program makes sense. Wide dispersal of the fleet around the nation obviously provides a certain modicum of decreased vulnerability. However, there surely are many reasons to question the concept these days. With your usual perception, you have focused accurately on the substantive issues related to (1) ships' vulnerability, (2) battle group integrity, (3) proximity to operating areas, (4) base overcrowding and (5) exploiting the industrial base. I would add one other: effect on personnel. I refer specifically to the numerous detrimental aspects which such wide dispersal to new bases will have on most military personnel, especially the career oriented family navy person.

I am going to repeat that because I think Tom, if he knew where the people were going, might not be saying that, if he thinks about how crowded Norfolk is now.

I refer specifically to the numerous detrimental aspects which such wide dispersal to new bases will have on most military personnel, especially the career oriented family navy person.

The Navy is the one to decide that today, and the Navy to a man, or at least 99 percent of the officers and men, are for this.

I am assuming that your Committee is examining the important, if not critical, issue of the added dollar costs, costs which are not trivial in any era—certainly not the present.

I mentioned the $200 million increment and the $800 million total which the Secretary of the Navy has agreed to limit himself to.

Thank you for informing me of the investigation plans of the Senate Armed Services Subcommittee under your leadership. I wish you well in this important work.

Now, Mr. President, there are women in the Navy, too. My daughter-in-law is one. She put on a black armband the other day when the House voted mistakenly, I hope—I am sure—not finally, on this subject. But, yes, there is plenty to argue about.

My chairman Senator GOLDWATER is a man I admire and have admired for more years than just about anybody else I know. Yes, he had serious problems with this. The Senator from Illinois was correct, we had close votes. We have had a learning process.

I do not say that Senator GOLDWATER needs a learning process, but I do say that other Senators, who emphatically stated at the beginning of all this that they were going to oppose it down the line, after study, they realized that the Navy was correct.

I am not in this for a $200 million political reason. I am in this because I think it is in the interest of our country, I am sure it is in the interest of our country, to go to this strategic homeporting. Everett and New York are the first two steps.

In conclusion, I want to say what a bargain we are getting. Just in cash, New York has put up $15 million to help pay for it, San Francisco $5 million, Corpus Christi $50 million, Galveston $8 million, Pascagoula $25 million, Mobile $30 million, Pensacola $12.5 million, Lake Charles $5 million, and in addition to those are land, infrastructure, and other in-kind contributions. That has never happened before in the history of the United States, this kind of local contribution to bring the military to a city.

I ask my colleagues to keep their minds on one thing: There is a $200 million difference to expand our basing infrastructure as we should as we build more ships, more complicated ships with more men and women aboard. $200 million is the difference for the new ports, not the billions that have been talked about.

I thank the Chair.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. THURMOND. Will the distinguished Senator yield?

Mr. BENTSEN. I am delighted to yield to the chairman of the subcommittee.

Mr. THURMOND. Mr. President, the cloture motion is supposed to be voted on at 6 o'clock. The leaders are trying to reach some agreement to change it to 8, but we cannot let that catch us.

Will the Senator permit me to put in a quorum call to stop the time?

Mr. HEFLIN. Mr. President, there is no set time on this amendment, is there?

Mr. THURMOND. No, Mr. President.

Mr. BENTSEN. But the vote is still set for 6 o'clock, Mr. President?

The PRESIDING OFFICER. The Senator is correct.

Mr. BENTSEN. I certainly yield to the manager of the bill.

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

I withhold that.

Mr. BENTSEN. Mr. President, I understand the time has been delayed for the cloture vote. I ask unanimous consent that I may proceed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENTSEN. Mr. President, first, I congratulate my distinguished colleague from the State of Texas who, I think, made a very able speech on this subject, and my colleague from the State of Washington.

Mr. THURMOND. Mr. President, will the distinguished Senator yield so I may put in a quorum call? I am going to ask unanimous consent that the vote come at 8 p.m. instead of 6 so the Senator may speak, because right now, he will have to stop in 1 minute.

Mr. BENTSEN. Mr. President, my understanding is that they reset the time of the vote. My problem is that I must go back into a tax conference. I would like an opportunity to make my statement.

Mr. THURMOND. Mr. President, I do not know how he can do it unless he gets unanimous consent. All I want to do is get unanimous consent to carry the quorum and come right back to defense.

The PRESIDING OFFICER. The Chair will say to the Senator from Texas that the vote has been called for 6 o'clock and no change has been made in that.

Mr. BENTSEN. I ask unanimous consent that I be allowed to regain the floor immediately thereafter.

The PRESIDING OFFICER. Without objection, it is so ordered.

□ 1800

Mr. THURMOND. I believe the Senator from Texas yielded.

Mr. BENTSEN. Yes.

Mr. THURMOND. Mr. President, I ask unanimous consent that the cloture vote be delayed until 8 o'clock.

Mr. BYRD. Mr. President, reserving the right to object, will the distinguished President pro tempore modify his proposal to provide for a vote at 7 o'clock? The reason I say this, I have an objection to delaying it further because it has been delayed a number of times today. I have an objection to delaying it further. I have been on the telephone for about 10 minutes and I had been able to work out an agreement between the other Senator and myself to delay if for 1 hour.

Mr. THURMOND. Mr. President, I modify the request.

The PRESIDING OFFICER. Is there objection?

Mr. THURMOND. Seven o'clock.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Texas.

Mr. BYRD. Mr. President, I thank the President pro tempore.

Mr. THURMOND. I thank the distinguished Senator from Texas and by doing that he will have longer to speak. Otherwise, he would have just had 1 minute.

Mr. BENTSEN. Mr. President, I am most appreciative of that. I once again congratulate my distinguished colleague from Texas for what I thought was a very comprehensive and very able speech on this subject, and I will try not to be too repetitious.

I have heard some remarks about this being a pork-barrel project. I am on the Environment and Public Works Committee. I have seen some pork barrel projects, but I sure have not seen any pork-barrel projects which have called on the local community to spend 37 percent of the money to put in that home port. But that is what we have seen down in Corpus Christi, TX, where the Government would pay for 63 percent and the State and local community, which really does not have a very rich tax base, are coming up with 37 percent of that money.

I heard some comments earlier about what kind of reception, what kind of quality of life those Navy folks would have if they were not in Norfolk or they were not in San Diego. Well, I watched these nuclear protests being put on around the country, and I think it is time we give some consideration to those communities which welcome these servicemen with open arms rather than clenched fists. And we have seen the reception along the gulf coast—one of hospitality and welcoming those folks.

Yes; there is some economic benefit to those of us who would have a home port, but I do believe in this instance we see the benefit to the national security and overwhelmingly so. There is no question about the fleet being overconcentrated.

Mr. President, may I have the attention of the floor.

The PRESIDING OFFICER. The Senator is correct.

The Senator may proceed.

Mr. BENTSEN. I thank the Chair.

Today you see 43 percent of the fleet concentrated in just two ports, good ports, but a 43-percent concentration, and as you see the new ships coming on are going to add to that problem. If you take the nine largest ports in the

country, you will see 91 percent of the fleet contained therein.

I should like to touch on just one area that has not been emphasized to the degree I think it should. In the 4 years since homeporting was announced, we have seen the military capabilities of Cuba and Nicaragua toward Central America continue to develop. We have seen the Russians put approximately one-half billion dollars in military aid into Nicaragua over the last 4 years. We have seen trouble spots in the Caribbean continuing to grow. I think it makes sense not to just concentrate the fleet on the Atlantic coast and the Pacific coast. I think the dispersal of that strategic fleet makes sense.

One of the other things we see is the maritime industrial base continuing to shrink in this country of ours. The Navy's share of revenue and employment in U.S. shipbuilding has soared to 85 percent.

Now, that is a dangerous trend for our country, particularly when you consider major overhauls, when you consider having the skilled workers to do the job. Homeporting helps distribute and disperse that capability, and I think once again it is a benefit to the whole country.

We have seen the Soviet Union dramatically increase its blue water naval capability and more and more of those ships are getting closer and closer to our shores. Further concentration of our ships in just a few ports obviously makes us more vulnerable to another Pearl Harbor. This time, though, we might not have the surviving strength, we might not have the additional time, we might not have the industrial capability to recoup. So defense really is emphasized and helped I think by dispersal of that fleet.

Another problem is threats from smaller nations or state-supported terrorists who might try to cripple a fleet by sowing some mines into the channel of a harbor. Dispersal helps guard against that kind of an attack.

Mr. President, Grenada was well on its way to becoming a full-fledged satellite when United States forces liberated that island. Meanwhile, you have a significant guerrilla force in El Salvador, and continuing instability in Haiti and Guatemala. The gulf coast home ports put our fleet closer to these potential trouble spots and that gives us a faster response. In Grenada we saw that time was very much of the essence.

Mr. President, recent history has demonstrated the basic logic behind the home port approach and the dispersal of that fleet. It made sense in 1982 when it was proposed, and I think it makes more sense today and will make even more sense in 1990. This is not a pork barrel project. Sure, you are going to have local communities that are going to a benefit, but they are also helping to share the costs. I do not recall much of that having been done in the past, so this is a breakthrough in that regard. Corpus Christi and the State of Texas have done far more than the average since they pledged $50 million for roads and other infrastructure projects needed for the home port, compared to $85 million that the Navy is going to spend.

Most of these communities that are designated for home ports are united in favor of the new installations. Cities along the gulf coast had an intense competition trying to decide who could do the most, who could pay a bigger part of the cost in trying to welcome the Navy to their particular location. I think we ought to appreciate the enthusiasm for a U.S. military presence and not denigrate it as some parochial money-grubbing effort. There are many in these localities who pride themselves on being strongly defense oriented and welcome these servicemen to their homes.

Sure, the Navy admits it is going to cost more money to build and operate dispersed home ports than to try to squeeze the new ships into the existing facilities. That cost is estimated to be $217 million in construction funding, plus $35 million to $50 million per year in subsequent operations.

I listened to the distinguished Senator from Alabama talk about how much money it would cost if we lost one of those capital ships, and for a fellow who used to be in the insurance business I understand that is a premium that you have to pay for safety, to try to protect yourself against that kind of a loss.

□ 1810

So, Mr. President, I support strategic homeporting, not just for my State, not just for the gulf coast, but also for the other sites chosen by the Navy, because I think this program will enhance our security and our survivability in the years to come.

This program makes military sense and it makes economic sense. So, instead of torpedoing this budget, I hope we will give it full speed ahead.

Several Senators addressed the Chair.

The PRESIDING OFFICER (Mr. DURENBERGER). The Senator from New York.

Mr. D'AMATO. Mr. President, I am not going to attempt to belabor the point that many of my colleagues have touched up on, particularly the distinguished Senator from Alabama, as it relates to the strategic importance of strategic homeporting. I think Senator DENTON touched on the strategic importance in terms of our facilities in New York, as it relates to the movement of troops and supplies to Europe. His observations and those of my colleague from Texas as to the importance of the gulf port and its utilization as it relates to Central and South America are obvious.

Mr. President, instead, let me touch on some of the charges that have been made, implicit if not explicit, in the letter dated August 4, written by our colleagues in opposition to homeporting. They talk about pork barrel politics as usual, and how homeporting would hurt the morale of the families involved.

I suggest that what we are seeing take place there is, No. 1, the addressing of an imbalance of an undue concentration of the Navy's fleet in two or three facilities, to the point where it has become dangerous and, at the very least, inadequate and indefensible; to the point of having a growing Navy with double and triple berthing of Navy ships now, and to the point of having two ports that have 43 percent of the Navy, and, yes, the economic benefits that flow to those communities as well.

I suggest to this body—and this body is much more astute than this Senator as it relates to how to build a consensus for an adequate military—that if we want to keep that consensus, then we had better understand that you simply cannot say that no one else shall have the opportunity to build public and political support for an adequate military. That is as important, I suggest, as the strategic and operational necessity for homeporting.

If we destroy that consensus—then you will continue to have resistance not only to the Navy and to homeporting but also to the supply and the support of systems in the Air Force and in the Army, as well as resistance to and adequate overall defense budget. That is a pretty essential ingredient; we should not forget it; we should not dismiss it; nor should we characterize it as some have as pork barrel politics as usual; I think they did a terrible disservice when they said this.

If you want to disagree with homeporting, that is all right. But to say that it is pork barrel politics as usual, I suggest, is to do a terrible disservice to our national effort in terms of developing and supporting a consensus for an adequate military.

I do not dispute anyone's judgment in saying they would rather see dollars go into munitions at this time, as opposed to a port, but I do have difficulty when someone, in such a blanket way, can say this is pork barrel politics as usual. I reject it. It is wrong. It is a disservice to this body. It is a disservice to all the people who come here and do the best they can in attempting to meet the needs of an adequate national defense posture.

So, Mr. President, I suggest that we should look at the strategic capabilities, the dollar cost, and, yes, at those important considerations by saying

that we do have a national consensus that will support a strong and well-balanced military, and that with the homeporting in those ports suggested, we do both of those things—we meet the strategic and operational considerations that are important to our Navy as well as build continued support for our overall military strategy and defense needs. Such needs take into account public support, and that takes into account communities that may benefit as a result of our defense needs and communities that have an appreciation for those men and women who serve our Nation in the military.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. STENNIS. Mr. President, as I understand it, I have 12 minutes. I do not know whether that is strictly under the rule. That is an understanding.

Mr. President, it has been my privilege to be on the Armed Services Committee since the Korean war—just after the Korean war started, all through the war in Vietnam, and the rest of these years.

With respect to the description about the way this matter was conducted, or the hearings, and the statement here about alleged political aspects, those things just have not fit in with the kind of hearings we held in that committee, and I do not think it fits these hearings, either.

Mr. President, as has been pointed out here, we have two Members who are former Secretaries of the Navy. I am also going to quote two men I know who are outstanding—an admiral, the Chief of Operations. I am going to point out the facts that have developed over the years. We realized some of the things, the deficiency of our Navy.

We have taken pride in planning and making a 100-ship Navy and we have come a long way on that, and I think we have done a fine job. A great number of those ships have been built already—of those ships, I mean the 600 ships; 103 have not been built.

□ 1820

The fact that we are making that enormous increase brings about problems. The problem is growth. That is a natural thing. This is a matter that had to be met. You have to have additional ports for these additional ships.

Of all the hearings, and I went to most of them, or here in debate, I have not heard anyone suggest that we not continue on with it until we get the 600 ships. In fact, we have already authorized that many and we have already appropriated the money to make it that many. So this proposition about the thing being so far off base or so far from being sound is just not correct.

This, as a whole, is in good shape and in good condition, and it is an absolute must, I think, just trying to be not safe but be where we will have a chance if worse comes to worse.

We know what is going on in Central America. We know what is going on in Cuba. We know what is going on in South America. We can go all around the world.

The facts are making it stronger, as I see it, rather than weaker for our need for these extra ships and, of course, we must have what goes with them. There is no use to argue any more about the soundness of homeporting.

I have heard these quotations here from these two admirals.

Let me mention them quite briefly. I believe the outstanding naval man that I personally deal with all the time that he was Chief of Naval Operations is Admiral Holloway. We have here a statement from him. I wish I could read all of it but time does not permit.

He said recently in a statement, a special statement, "We, as a Nation, have clearly and positively established the requirement for a 600-ship Navy as an essential component of our national strategy."

Those are strong words, my friends.

"Unless we take pains to base this 600-ship Navy in a prudent system that takes advantage of the unique geography and special industrial capabilities of the United States, we could fall far short of realizing the full potential of our fleet."

Think of that.

"It is essential that we capitalize on our investment in our new Navy."

I have not been given much to giving warnings. I do want to point this out as a warning.

I would put among the very first things that we must be sure we are getting done and getting it done right is this augmentation of our Navy.

Admiral Trost is the present Chief of Staff who has just gone in office a few weeks ago. He says, "Strategic homeporting must not die an untimely death." Why? The reasons are relatively simple. Again, they transcend politics.

"First, we need to review our present vulnerability. All of us recognize the mistake we made just before the Pearl Harbor attack."

This thing could start and end with those two words and all of us who were alive then remember. The Pearl Harbor attack—I start my remarks with that and let me end them with that same admonition. That is the meaning. That is something we can meet, this attainment. This necessity is one we can meet.

I do not have any doubt that we will meet it, but we have to quit talking about small things and move on to the big things, the big musts, these homeporting additions.

I do not like the amount of money these cost, of course. But you are dealing in high-price products. We are dealing with essentialities.

You are dealing with essentialities and we must not, we must not, lose anymore time.

Fortunately, we have the capacity here, the ability, we have the manpower, we have the will, and really in this case, we already have the money. As I have said, this money has been authorized and the money has been appropriated.

So, there is not but one way to go here which is to go on with the continuation of this well-planned program of these 600 ships and the homeporting. Many know more about that than I do. I have gotten interested in it and fascinated with it.

That is where you really get your payoff and exhaust the possibilities of what the machinery will do.

So I do not use the word "big" but I implore with you that we do not permit time to be lost.

We really already have made up our minds of the need. We have already paid out a lot of the money and appropriated the rest of it.

We have the best as good a testimony as you can find anywhere from any people covering the need, how to do it, and the time is now.

So I think we have common sense enough and everyone is acting in good faith. I think we have the plan, we have the judgment, and we are going to meet this thing on time and take advantage of this opportunity that we otherwise pass away. We must not let that happen.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Washington.

Mr. EVANS. Mr. President, I have listened with respect to my colleagues who have spoken against this amendment and particularly to the senior Senator from Mississippi, who has been through these fights and who understands the needs and the requirements of the military perhaps better than anyone else in this Chamber.

To paraphrase our 16th President, he has said it, far beyond my poor power to add or detract.

So I shall be short in my remarks and focus on two or three things that I think are important in this argument.

Everett, even though it is a small community, combined with Snohomish County and the State of Washington, has offered and will continue to offer significant local investments as the other home ports have done in order to not only welcome the Navy but make these home ports more affordable.

That is a new era, Mr. President. We have not often done this before. In the past, it was always how much you could get for a local community and it was all Federal dollars. That is not the case today and it is certainly not the case in terms of homeporting.

These significant financial commitments are not just for the infrastructure that the city might otherwise need or even for the schools and other facilities which need to be expanded rapidly for the new service personnel who will arrive but they are more direct investments that will have a particular value to the naval base itself.

There has been some considerable talk about the cost of dispersing. Others have spoken of it in quite pungent terms.

Let me only say to reiterate what I believe my colleague from Texas said. If you have a $10,000 car, this is equivalent of building a $200 garage. You cannot do much more than a small tar paper shack for $200.

This is virtually insignificant when related to the cost of ships we are attempting to house.

The Secretary of the Navy in his submission to the committee and to this Senate has indicated that he will eliminate and has one capital ship from the next 5-year plan which more than covers the cost of this naval homeporting, a pretty good indication that the Secretary of the Navy at least believes that this is an exceedingly high priority.

How often in the past has any Secretary of the Navy offered to give up a major capital ship at any time and under any circumstances?

In addition to that, it is my understanding that the committee itself has put a limit on how much they expect to be spent and that is a challenge to the Navy, to the various home ports themselves, to insure that this job can be done for the amount they claim it to be done.

Mr. President, I must join with my colleague from Washington in one rather odd statement made in the Dear Colleague letter by those who would submit this amendment.

The one which states, "But perhaps the most serious consequence of the Navy homeporting plan is the negative effect that it will have on naval personnel and their families. These problems will include increased time away from families because of remote training requirements, increases in the number of geographic moves which will require uprooting of families and relocation and the relatively austerity in the new bases in terms of community services traditionally available at Navy ports."

□ 1830

Well, let me tell the Senate that Indian tribes still have reservations in the State of Washington, but we have come a long way in the last 100 years. We have had the Navy in existence in a number of facilities in the State for the better part of that 100 years. Sandy Point Naval Air Station, Woodby Naval Air Station, the U.S. Naval Station in Seattle, the Bremerton Naval Shipyard, the 13th Naval District Headquarters, all have been long and traditional elements of the Navy in the Pacific Northwest.

What the about the austerity of the Puget Sound area which would hold this port? First, Everett, perhaps uniquely among all of the cities of the Nation, had an opportunity in 1984 to vote on the question of whether or not there should be a naval base at Everett. By more than 72 percent, the people at that referendum said, yes. I might add that was on the same ballot that President Reagan won a resounding second term election victory and he ran second to the Navy in the city of Everett. And that is a pretty good welcome.

We may be short of tattoo parlors in the Pacific Northwest, but we have a fine symphony, all of the professional sports teams that will attract those members of the Navy, a very large number of live repertory theater companies, a fine opera, a major university; a community college right in the Everett area, a few hundred yards, virtually, from the naval station, a place where people can have their extra classes; there is sailing and skiing and hiking; no tornadoes; no hurricanes; no hot, humid summers; and the winter weather, that gentle rainfall which makes the Northwest so green, at least runs down the drain and needs not be shoveled during the winter.

The State and community have both been regularly ranked as among the finest to live in the entire country. Hardly a test of austerity.

And I am sure that same is true of the other communities, the fine communities on the gulf coast and certainly in the New York City area where there are facilities to attract anyone.

Cramming too many ships in a port is both strategically wrong and debilitating to sailors who serve on those ships. I do not have anywhere near the same length of time in the Navy as my colleague from Alabama. But I did spend two tours, once in World War II and then on a destroyer in the Korean war. And I remember coming into Long Beach and in San Diego and the pain of having to crawl over three ships in order to get to the pier, or more likely to be moored out in the stream because there was no place at the pier and have to take a launch in and out; and I have done that many times. And that is no way to create homeporting.

But in conclusion, all of these arguments pale beside one, one overwhelming argument on which this decision ought to be made. Naval strategists have convinced this Congress over the last half-dozen years that a 600-ship navy is necessary. And we have voted for that. They have also indicated that these several new home ports are necessary on a strategic basis, and we should recognize and respect that.

The long list of those at the top who have endorsed this concept simply cannot be ignored. And I believe it is wise indeed for the Members of this Senate to not only respect and to pay attention, but to respond favorably to their recommendations.

Mr. MOYNIHAN. Mr. President, I have neither the great authority which our beloved Senator from Mississippi brings to this matter nor the extraordinary experience of the gallant Senator from Alabama. I speak with the modest qualifications of the Senator from Washington with respect to naval matters. But I served at sea and served in the particular waters of which I would like to speak briefly.

One new bit of information has come to us in the course of this debate: in a letter addressed to the President pro tempore, the Secretary of Defense has stated that in his judgment, 53 percent of our fleet is homeported in two harbors.

Now that flies against every doctrine of naval dispersion and naval strategy that has served us since we first encountered its specific consequences when Nelson took his ships into Copenhagen, in the course of the Napoleonic wars, found the Danish fleet at anchor and destroyed it.

The Second World War began for us with Pearl Harbor. As the Senator from Mississippi has said, not all of the fleet was at Pearl Harbor at that time. As a matter of fact, the half we needed least was there, but even so the Arizona lies on the bottom as testimony to the consequences of that much concentration. At Taranto, Sicily, and Port Oran in North Africa, we showed what could happen to fleets in opposition that we bottle up.

The 600 ship Navy we are talking about is not simply a larger Navy designed to carry out the same set of operations. It has a larger strategic and tactical assignment and it needs to be dispersed for that very reason.

The particular matter which engages the Senator from New York, of course, is the prospect of the surface action group that is scheduled to be homeported at the village of Stapleton on the lower reaches of Staten Island.

Might I say, Mr. President, that if the Navy had fought to bring the *Iowa* back into the sections of the harbor where it was built, the Brooklyn Navy Yard, I would find myself very much wondering why are we doing this.

The Senator from Alabama made reference to something which many

Members of this body will know, that the technology of mining is as much advanced in recent years as is the general technology of offensive weapons. We think of mines as those weapons which were scooped from the bottoms of shallow harbors by minesweepers in World War II. But we are far out of date.

The Navy has correctly decided that this surface action group, the *Iowa*, a cruiser, two guided missile destroyers, a regular destroyer, and two frigates, will be down harbor outside the narrows and about 8 miles, as I would judge, from deep water. Here the vessels are less exposed to the positions of mines as they could expect to be deployed in a major harbor.

What is the mission of a New York surface action group? Its mission is to protect the routes to Europe, Northern Europe and NATO. And, basically, to get to the United Kingdom-Greenland-Ireland gap. It is a very sensible and direct mission. Whether these are the ideal components for such a task force, it is not for me to say. I will not. But they have been chosen by the Navy and this site has been chosen as well.

There is an elemental number. The *Iowa* can steam at a flank speed of 33 knots, though it is known to have reached 35, which I doubt it could sustain. But, at 33 knots, that rounds out to 800 nautical miles a day. That is one day closer to the gap than Norfolk and it could be all the difference in a nonnuclear encounter at sea with the forces of the Warsaw pact.

Mr. President, I would speak with equal fervor about the need to put ships in Everett. I think the Senator from Washington need hardly have gone on as he did about a city once graced by Scoop Jackson. But certainly there is no disagreement from this Senator.

I hope we will approve what the Secretary of Defense has eloquently argued for, and two former Secretaries of the Navy in this Chamber have endorsed as well.

I shall conclude now with the full text of my prepared remarks.

Mr. President, the Chinese military theorist Sun Tzu—the man who first brought the truism "know your enemy and know yourself"—noticed in the 5th century B.C. that "when a cat is at the rat hole, 10,000 rats dare not come out; and when the tiger guards the ford, ten thousand deer can not cross." It seems to me that Sun Tzu was on to something about choke points and the need for strategic dispersal; 23 centuries later, off Copenhagen, Sir Hyde Parker signaled his second in command to avoid an engagement with the Danish fleet, then anchored in the harbor. At this, Admiral Nelson put his telescope to his left eye—the one he lost on Corsica—and declared he did not see any signal flags flying from Parker's ship. Then with but a squadron of 12 ships Nelson stormed into Copenhagen, engaged the entire Danish fleet and after three hours of intense naval combat compelled its surrender. Certainly this was the Nelson touch, but also a lesson for neutrals and combatants alike—do not put all your ships in one harbor, or too few harbors. Hense the verb "to Copenhagen," a verb that applies to Taranto, Port Oran, and Pearl Harbor as well.

The simple point is that strategic dispersal is not a fabrication, an advertising endorsement for a 600-ship navy. It is a national security need. This is what the Chief of Naval Operations, Admiral Trost, tells us. In a radio interview on July 15, Admiral Trost said:

> If someone said politics played a part, I would simply note that * * * the military rationale for the dispersal is so compelling, in my view, that I could support it no matter what.

Compelling is not a light word; and it is one we should heed.

Mr. President, 53 percent of the U.S. fleet is based in two ports: Norfolk and San Diego. Soon the Navy will have another 90 ships to berth and it behooves us to spread them out. As a result, the Secretary of the Navy and the Chief of Naval Operations have proposed to bring eight new ports to initial operating capability and upgrade five others. This will make our expanded fleet less susceptible to surveillance, and reduce the risk of a modern Copenhagen whether this takes the form of a terrorist, strategic, or more remotely, a conventional attack.

Moreover, by dispersing battle groups along our coasts, the Navy, in certain scenarios not requiring carrier-battle groups, will improve reaction time to potential trouble spots around the world. This means the Iowa can reach the pivotal United Kingdom-Greenland-Iceland gap about 1 day quicker than from an alternative southern port.

Mr. President, in conclusion I would like to reiterate what I said before the Senate Armed Services Committee in April. It seems to me, the homeporting decision is a strategic decision to be made by the Navy on no merits other than the war fighting capabilities of the fleet. If the decision on the war fighting capacity of the fleet is that we need to disperse—and the Armed Services Committee agrees with the Navy on that—then disperse to wherever it is thought best.

Thank you, Mr. President.

Mr. EXON and Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise in opposition to the amendment offered by the distinguished Senator from New Mexico.

The Navy strategic homeporting initiative is a matter that the Armed Services Committee has reviewed extensively.

Last year during our review of the Defense Department's request, it was clear that expanded logistical support was required to base our 600 ship Navy. More than 130 ships would be on station by 1993. The issue was to what extent should we open new ports. The Navy's plan included dispersing 5 of 19 battlegroups, 26 percent of our capital ships in 3 existing ports and 10 new ones.

As chairman of the Military Construction Subcommittee I insisted that the Navy demonstrate the strategic necessity and cost effectiveness of the Port Expansion Program before starting construction. The committee held numerous hearings and received testimony from military experts both inside and out of the Department of Defense.

Mr. President, let me review the findings of the Armed Services Committee. The most significant strategic development in the past decade is Soviet naval expansion. The Soviet's have increased their out of area deployments by tenfold. Soviet attack submarines are off our coasts every day.

In the face of that threat, it became clear to me and the majority of the Armed Services Committee that our fleet would be extremely vulnerable if we retained our present condition of almost 50 percent of our ships concentrated in only two ports. I have asked our Secretary of Defense and prominent naval strategists and operational commanders for their expert advice on this matter. They have overwhelmingly endorsed the plan.

Secretary of Defense Weinberger in a letter to the committee stated in strong terms that:

> We are convinced that the strategic and military arguments for the new homeports are overwhelming. These new homeports are vital . . . Our total cost for implementation of the Navy's strategic homeporting plan is $846 million over five years. B offsetting that figure by the $629 million that it would cost to homeport these same ships in the least costly mix of existing homeports, we end up with a net capital investment of $217 million. In addition, the affected state and local governments have pledged a total of $150 million in offset funding. We do anticipate an increase of $35 to $50 million in base operating costs for these bases, but this is less than 1 percent of the total base operating ccsts for the Navy of approximately $3.7 billion.

Adm. William Crowe, Chairman of the Joint Chiefs of Staff, our top military leader urged support stating that:

> The strategic homeporting plan will make a significant contribution to our strategy and to our military capability to respond effectively during crises or war.

Adm. Carlisle Trost, Chief of Naval Operations urged Congress to support the Navy homeport dispersal plan expressing great concern for the adverse impacts on personnel and readiness if we force the much larger fleet into already crowded existing homeports. In his words:

The strategic homeporting plan best provides for future Navy needs with enhanced readiness for crisis response and enhanced survivability . . . the military rationale for the dispersal is compelling.

Adm. James Watkins, the immediate past Chief of Naval Operations urged congressional support stressing the objectives of the homeporting plan—

to reduce geographic vulnerability and to promote growth in the industrial base concomitant with our building to a 600-ship Navy, an industrial base which can support fleet repair in event of war.

Adm. Elmo R. Zumwalt, former Chief of Naval Operations, in a letter to the committee wrote:

I strongly support the decision of present Navy management to disperse the now growing fleet to more homeports. There is no question but what spreading our fleet over a large number of homeports will reduce ship vulnerability, enhance battlegroup integrity, avoid overcrowding, exploit and enhance our industrial base, improve active and reserve recruiting and, in some cases, move our ships closer to operating areas. In my judgment, the hundreds of millions of dollars that must be appropriated in order for the strategic homeporting concept to be successful are fully warranted by the military benefits to be derived.

Admiral Holloway, former Chief of Naval Operations, strongly supported the Navy's concept and said that:

Unless we take pains to base this 600 ship Navy in a prudent system that takes advantage of our unique geography and special industrial capabilities of the United States, we could fall far short of realizing the full potential of our fleet.

Adm. Ronald Hays, Commander in Chief, U.S. Pacific Command, in a letter to the Secretary of Defense wrote:

There should be no doubt about the military benefits (of dispersed homeports). To argue otherwise defies the history of naval warfare.

Adm. Lee Baggett, Commander in Chief, U.S. Atlantic Command, in a letter to the Secretary of Defense wrote:

The solid logic which provided the foundation for the Navy's plan remains valid. Arguments favoring the plan on the basis of strategic necessity are now overshadowed by local economic issues. There is scant mention of the need to protect our Trident base in the Pacific Northwest, the threat to our sea lines of communication in the Caribbean and Gulf of Mexico, or the vulnerability of the Aleutians to Soviet sea and air power. Another issue overlooked in the debate is the value of maintaining a capable and widely dispersed maritime industrial base. In war, we must have the ability to expand quickly our shipbuilding and repair capacity. Strategic homeporting will permit the maintenance of this broad maritime infrastructure. The strategic homeporting plan has my unqualified support.

Adm. Frank B. Kelso II, Commander in Chief, U.S. Atlantic Fleet in a message to the Chief of Naval Operations said of quality of life:

Continuing increases of uniformed personnel in existing ports crowd already overloaded military support facilities. Added military population impacts on civilian schools, roads, parks, and other facilities. On and off base waiting lines get longer and personal services for military and civilian citizens decline. Well planned dispersed port facilities make good quality of life and military sense.

Adm. S.R. Foley, USN, former Commander in Chief, Pacific Fleet, in a letter to the committee stated:

Dispersal will improve the survivability of Navy assets in the event of a war. Pearl Harbor and the destruction of our battleship force should teach us that lesson . . . With regard to the priority of the homeporting initiative in relation to other national security programs, I believe this requirement is important enough to be funded even in this period of lean budget.

Adm. Robert L.J. Long, former Commander in Chief, Pacific, in a letter to the committee urged congressional support. He wrote:

I believe that the "strategic" in the Navy's Strategic Homeporting Plan is being overlooked in the current debate. This is unfortunate because strategically the homeporting plan is crucial, especially with our principal adversary operating globally, even on our own doorstep. Fleet dispersal, as envisioned by the homeporting plan, is an exceedingly important step in this context.

Much of this debate has centered on cost, which is an important factor especially in the face of difficult budget decisions. The committee has reviewed the proposed basing plans and while they are lean, they have been designed to provide the essential operating facilities as well as quality of life facilities for our service men and women. It is the opinion of the Armed Services Committee that $799 million as certified by the Secretary of the Navy is a fair and reasonable estimate of the 5-year military construction costs.

I am afraid that all of this debate on basing costs has obscured our real objective. The proponents of this amendment have called the port dispersal plan a luxury creating a hollow, toothless Navy. But I maintain that by failing to disperse our fleet in the way that ensures the maximum operational capability of our naval forces, we will risk creating a hollow, toothless Navy. Why put in jeopardy the fleet that we have spent billions of dollars to rebuild.

Mr. President, unless we want to give a prophetic new meaning to the term "sunk" cost, we must not cut corners now; we must ensure an adequate basing plan for our ships. I urge my colleagues to oppose this amendment.

Mr. President, I do not want to take any more time. I want to say we could speak on and on. All the naval experts endorse it, President Reagan endorses it, Secretary Weinberger endorses it, the Secretary of the Navy endorses it, and all of these past Chiefs of Naval Operations I mentioned here and other commanders in chief of the Navy endorsed it. To me it is a wise thing to do.

The subcommittee voted in favor of it, and also the full Committee on the Armed Services are in favor of this. I hope it will be retained in this report.

Mr. GLENN, Mr. COCHRAN, and Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr COCHRAN. Mr. President, I think it is pretty clear to the Senate by now that the great wave of the evidence is on the side of this strategic home port concept. The amendment of the Senator from New Mexico ought to be defeated.

The Secretary of the Navy, in a recent letter, explained that one of the very fine benefits that would result from the implementation of this program is an expansion of repair and maintenance facilities for the fleet. In local communities, in the new areas where ports will be located, there will be modern facilities built largely in some cases at the cost of local governments, local taxpayers. This is a good deal for the Navy. It is a bargain for the country.

The total net cost of this program is equivalent to less than one-half the cost of an FFG-7 class guided missile frigate. At a recent hearing of our Subcommittee on Defense of the Appropriations Committee, I had the opportunity to ask Admiral Crowe and Secretary Weinberger what their reaction to the need for this program was that we had heard mostly from the Secretary of the Navy.

There had been some who said this was dreamed up by the Secretary of the Navy just to get votes for the 600-ship fleet. The fact is according to the testimony we heard the other day from Admiral Crowe, for instance, he said, "I think from a military perspective and joint perspective"—speaking of the Joint Chiefs of Staff—"it is very definitely needed, Senator. I think it is long overdue and is something that will be helpful to our overall military posture." Secretary Weinberger likewise said, "We are strongly for it" in response to my question. "It provides for a proper dispersion of the ships. In some cases the addition of necessary shore facilities in several parts of the country strategically is very desirable."

Mr. President, I hope the Senate will defeat the amendment of the Senator from New Mexico.

Mr. GLENN, Mr. SPECTER and Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I wish to express my opposition to the Navy's homeporting plan and support for the amendment by the Senator from New Mexico. This issue has been the subject of much emotion, a lot of politics, but little objective appraisal. Indeed, this proposition could better be designated as "home porting"—like pork barreling not homeporting.

The Navy has offered its arguments and they have some merit. Yet the arguments deserve closer attention—especially in this era of tight budgets. Acknowledging the reality of less growth, if any, in future Defense budgets is essential to understanding this issue. In fact, from fiscal year 1985 to fiscal year 1986, the Defense budget experienced negative 5.8 percent real growth. That was the first negative real growth in the Defense Department budget since 1971. This year, the Defense budget will experience even greater negative real growth. That is 2 consecutive years of real decline. Despite this, funds are being requested this year for new bases at Staten Island, NY, and Everett, WA. In later years, funding will be requested for nine ports on the Gulf of Mexico. We should not underestimate, as the Navy has, the construction and the operating costs that this will entail.

The Navy argues that the main reason for building these new ports is to further disperse the fleet. Making the fleet less attractive to attack in port and scattering bases over wide areas is a sound idea, but the benefits of dispersal have been oversold in this case. Certainly, the 600-ship Navy, which I support, requires expanded support facilities and bases. It may need completely new bases. In making this determination, however, we need to address the threat to our existing ports. Nuclear defense of ports is impossible and only a conventional threat should be considered. This threat is real in the form of the Soviet submarine fleet, the largest in the world, well armed with mines and conventional cruise missiles. Soviet bloc merchant ships could also covertly emplace mines and Soviet sabotage is not a farfetched threat either.

Focusing on the mining threat, however, it becomes clear that, even with its projected force of mine hunters and minesweeping helicopters, the Navy will be hard pressed to keep its existing bases and our commercial ports free of mines. Despite a sincere effort to finally address our serious mine clearing shortfalls, the problem still remains largely unsolved. Now the Navy is planning to create additional ports without planning for the additional capability to keep them free of mines. In short, it will always be easier for the Soviets to threaten our ports than it will be for us to protect them.

Furthermore, the actual numbers and types of ships intended for the new ports is rather limited. Only 64 surface ships and no submarines out of the 600-ship Navy will be based in the new ports. Why so few ships if there is a real and immediate threat to the fleet? Why such a small number of ships relative to the high number of new ports? Why are no submarines, today's real "capital ship," being dispersed? So it seems that dispersal cannot be much of a reason for the new ports.

The new ports are also no closer to and, in some cases, farther from their wartime operating areas than our existing ports. This is especially true for the planned gulf bases. And Staten Island and Everett are actually farther from the primary training areas off southern California and Puerto Rico. In addition, while correctly pointing out that the Soviets face a serious strategic disadvantage because their access to the open ocean is limited, why is the Navy now intending to build so many ports on the gulf coast with potentially hostile Cuba and Nicaragua at its entrances? Should we be emulating one of the Soviet's key maritime strategic weaknesses?

Another argument used by the Navy is that co-locating the ships which would operate together is necessary to enhance their readiness and their "battlegroup integrity." This is nonsense. First, warships have such different maintenance cycles that they could not operate together as an integral unit for very long before that integrity would unavoidably be broken up due to different overhaul frequencies and durations. A carrier, for example, receives an overhaul of 12 to 21 months once every 7 years while an escorting destroyer would receive an 8-month overhaul once every 5 years.

The Navy's plan to further disperse the fleet actually discourages battlegroup integrity and could lower fleet readiness. For example, a battleship surface action group will in actuality be scattered between San Francisco, Pearl Harbor, and Long Beach. Another battleship surface action group and a carrier battlegroup will be scattered among the gulf coast ports. How can a battlegroup commander possibly execute the close control he needs over the maintenance and training of his ships when they are scattered hundreds of miles apart—thousands in the case of the Pacific battleship group? Dispersal will also increase training costs and possibly lower unit readiness because the new ports will not have even the basic training facilities available at our existing bases. The reason for this is to keep the costs of the new bases down. Yet it is combat readiness and ship productivity that will suffer if sailors have to travel far away for specialty training or even something as fundamental as shipboard damage control training or firefighting.

It has also been argued that dispersing the fleet will make better use of our maritime industries. This may be true but the total amount of shipyard work will remain the same. The homeporting plan would only redistribute existing work. Again, the advantage to the Nation is illusory.

It is clear to me that the strategic rationale for the new ports is, at best, questionable. In a time when funding was not so tight and competing with so many other pressing needs such as our nuclear deterrent, the strategic defense initiative, and our conventional modernization, a few additional homeports might make sense. I submit that that is not the situation today nor the one likely tomorrow.

The Navy argues that the fleet is growing and that our current ports will not be able to support this growth. It is true that expanding existing ports, where possible, will be unavoidable and costly. Yet the Navy has seriously underestimated the construction costs of new bases, favoring "austere facilities"—which in one case, excludes a base headquarters building. How many Navy families will be anxious to move to an "austere base" where medical, commissary, exchange, and other family support organizations will be limited or lacking? After experiencing months of separation, what Navy family will want to experience more time apart when service personnel are sent away when their ships are finally in port, to schools at the older established bases? Continued training and schooling are absolutely vital to fleet readiness but the Navy is not planning to build training facilities at the new bases.

Eventually, all these facilities will have to be provided. The Navy knows it but will not openly acknowledge that. The homeporting plan will soar beyond the $799 million cap the Navy claims. Inevitably, when these bases are built up, their operating cost will increase because facilities similar to those at the existing bases will have to be duplicated.

These are the arguments for and against the strategic homeporting plan. At best, the Navy's case is shaky. At a time in which we are working to reduce the deficit yet maintain the modernization of our Armed Forces, a problem such as the homeporting plan makes no sense. It will dilute the pool of existing funds available for modernization, training, and operations; in short, strategic homeporting will harm and not help our security.

But there is more to this issue, and it is what I find particularly worrisome. Stated simply, the Navy strategic homeporting plan is a political insurance policy for the Navy. The large number of ports planned for the gulf

coast is clearly intended to scatter the wealth. Why not simply upgrade Pensacola or build one new, complete base on the gulf coast? How can bases for three or four ships make any sense other than from a political perspective? Let's face it, the Navy's plan should be called the homeporking plan.

That Members of the Congress should rush in support of such a plan is not surprising. Many of us represent parts of the Nation not enjoying good economic times. But there comes a time when we must all place national interests above our domestic ones. That is our responsibility and unless we do so, we are every bit as guilty of wasting defense dollars as the manufacturer of the $400 hammers we have heard so much about.

That the Secretary of the Navy would employ something as attractive as the homeporting plan to gain continued support for the fleet is also not surprising. But it is disappointing. Much has been done to strengthen the Navy, rekindle many of its traditions, and restore its offensive spirit of going in harm's way to defeat potential enemies. The homeporting plan will only hurt this. It will tie up funds for which the Navy has many other pressing needs. It will place new hardships on Navy families who already make so many sacrifices, and it will do so without providing an equitable return for our investment. I urge the Navy to reevaluate this plan, perhaps settling for one that is less ambitious and more strategically sound. Until this happens, I urge my colleagues to oppose funding for this program.

Mr. President, let me sum it up, if I might. I know time is short. I have been here 3 hours listening to this debate. I do not wish to impugn the motives of any of my colleagues on this matter at all. I know many of them are speaking what they fully believe to be the real justification for the homeporting or "homeporking" plan offered by the U.S. Navy. Likewise they have cited the testimony and statements from a whole host of distinguished naval officers, Navy men and present leadership of the administration who fostered this plan.

Many of them are very sincere in their beliefs. But we have to make some very tough decisions here in this time of extremely tight budgets. I have been sitting here, and I have been listening to a whole series of many great speeches well done by my colleagues. But I think in each and every case the Senators that have stood on this floor and supported this measure for good reasons I say just happened to be by chance States where this "homeporking" plan is going to benefit.

□ 1850

I think maybe that should have something to do with this. There may be one or two exceptions. But by and large most of the people who have supported this so far in this debate have been from States where the new home ports would be located.

If, for example, we were building two new ports in Washington State and New York, and maybe one on the gulf someplace, this Senator would be in support. It is true that what we are authorizing here today are only the New York and the Everett, WA, ports. I recognize that some new facilities are needed.

As the ranking member of the Navy Subcommittee of the Armed Services Committee, I have great respect for the Navy, and I have been a strong supporter of the Navy ever since I have been in the Senate.

I would simply point out, Mr. President, that this is only a downpayment, these two ports, the one in New York and the one in Washington, for a new homeporting or porking plan, depending on what you want to call it, that bring forth nine new home ports or porking to several other States in this Nation.

I want to say that the $800 million total expenditure for all of these ports as subscribed to if not sworn to by the Secretary of the Navy is totally unrealistic if you look at the overall costs and obligations that will be assumed down the line. If anyone really believes that we can have all that they say is necessary for $800 million, I think they have not looked at what the Navy has said to us before on what the total cost of these programs are.

I would simply say if it is only $800 million, it might be worthwhile if he had a budget that could accommodate all the other needs that we have.

This is a downpayment. Why? Why, Mr. President? In view of the 600-ship Navy, which this Senator supports, is it necessary for the dispersal that they have outlined?

In this dispersal arrangement, what is dispersed? I think that is a logical question.

The facts of the matter are that not a single submarine, which is the real base of our deterrent today in both conventional and other warfare, as far as the Navy is concerned—not a single submarine is dispersed under this plan anywhere, anyplace, any time.

Only 64 ships of the total 600-ship Navy that you have heard so much about today are dispersed, only 64 out of 600, about 10 percent.

Yet if you listen to the debate on the floor of the Senate today, you think all is lost if we do not go ahead with this plan.

In other words, 64 ships would be dispersed and 530 ships would stay where they are.

Some dispersal. Where are the ships that are being dispersed being dispersed to? It is pretty interesting. Staten Island, NY, and Everett, WA, which this Senator said he would support if we were limiting it to those two places, Staten Island has 7 and Everett, WA, has 17. Where are the others? Mobile, four: Pascagoula, four; Corpus Christi, five; Galveston, five; Lake Charles, three; Gulfport, one; New Orleans, two, and Hunter's Point, six.

I am simply pointing out that these are the facts we have from the Navy. I submit, Mr. President, that this is not an effective dispersal if we are going to provide the dispersal that some claim necessary to protect our fleet with the new 600-ship Navy. I urge that this be rejected at this time, restudied once again and see if we can come up with a reasonable proposal, not based on a whole series of ports and a whole series of States but two or three new ports which might be justified.

Mr. President, I yield the floor.

Several Senators addressed the Chair.

THE PRESIDING OFFICER (Mr. GRAMM). The Senator from Pennsylvania is recognized.

Mr. SPECTER. I thank the Chair.

Mr. President, I support the Navy's program. After listening to the distinguished Senator from Nebraska, he enumerated the places where there would be homeporting. I note the absence of any homeporting in Pennsylvania, my State, which may add a little credibility to my position by the standards advanced by the Senator from Nebraska.

Mr. President, the Navy has developed the concept of strategic homeporting to provide additional security for the fleet and increase battle readiness. I strongly agree with the administration on this crucial issue of national defense and emphatically support this program.

The Secretary of the Navy, John Lehman, has congently and expertly presented the Navy's goals for this program and has steadfastly worked to educate Congress and the country about the vital importance of surface ship dispersal. The Secretary of Defense, Caspar Weinberger, has also labored effectively on behalf of this program. Both men must be commended for their efforts in identifying the impending threat to our fleet and quickly responding by formulating this new strategy for more safely basing our ships around the country.

At present, about 43 percent of the Navy's surface ships are homeported at San Diego, CA, and Norfolk, VA, making a Pearl Harbor like attack attractive to our enemies, and a quick strike by terrorist groups tempting and destructive. According to the recently retired Chief of Naval Oper-

ations, Adm. James D. Watkins, at the end of 1983, 91 percent of the Navy's ships were in nine major ports and 9 percent in other ports, indicating that the problem of heavy concentration of our fleet is even more grave.

In addition, the expansion of the fleet from roughly 480 ships to 600 intensifies the problems associated with concentration. The strategic homeporting dispersal plan would not so much reduce the current density situation as prevent further concentration of the Navy. It is only the net increase in the fleet that will be dispersed to new sites.

Dispersing our Navy will substantially reduce the vulnerability of the surface fleet, complicating our enemies' conventional targeting and making more difficult both a torpedo and/or cruise missile attack and a mining campaign.

The Navy's battle groups are currently divided among several ports and must assemble at sea before proceeding on their mission. The need to assemble at sea causes delay and increases the battle group's vulnerability. Strategic homeporting will integrate these battle groups, ensuring greater survivability and eliminating the dangerous period in which the members of the battle group must gather for an operation.

Dispersing the fleet will also move the Navy closer to operating areas and give better access to diverse training environments. Dispersal will reduce steaming times to potential areas of conflict and training areas thereby improving fleet responsivenes for any contingency. Moving Naval Reserve ships in with active fleet ships, as this program calls for, will enable Naval Reserve units to train with the active fleet augmenting their preparedness. Increased Navy presence in the new ports will also improve recruiting in those areas ensuring the continued high quality of our Naval personnel.

Strategic homeporting will also expand our naval logistics infrastructure to support the growing fleet. This will aid the Navy's new forward, offensively oriented maritime strategy.

Mr. President, in addition, for all of the above benefits, this program will cost little more than putting the new ships in existing homeports. The total cost of military construction for this program over 5 years will be under $846 million, while the alternative to strategic homeporting—placing new ships in existing bases—will cost about $629 million.

Opponents to this program argue that nuclear weapons-capable ships pose serious danger to surrounding communities because of the risk of a nuclear weapon accident and the enhanced attractiveness of the ports as targets for Soviet nuclear attack.

These arguments are unconvincing. The Navy's safety record concerning nuclear weapon safety is outstanding. The Navy's efforts in weapon design and personnel training to reduce the risk of an accident have been very successful. Furthermore, the ports in question are already attractive targets for a Soviet strike and the risks of securing an adequate national defense cannot be the responsibility of only a few areas of the country—it must be borne by all.

Mr. President, for these reasons I urge that homeporting as proposed by the Navy be confirmed by the Senate.

□ 1900

Several Senators addressed the Chair.

The PRESIDING OFFICER. The distinguished majority leader is recognized.

Mr. DOLE. Mr. President, I ask unanimous consent that I may proceed for 2 minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. GLENN. Mr. President, reserving the right to object, may I ask, after we have the cloture vote, what is the order of business then? Do we return to the homeporting issue?

Mr. DOLE. What I seek to do—I have not discussed this with the distinguished minority leader. If we could reach some agreement on when we might vote on the pending amendment and postpone the cloture vote or just plain withdraw the cloture motion, I think we are making progress on the bill. I would like to determine how many more speakers there may be and when we might have a vote on homeporting. There are seven more speakers.

Would it be possible to have a vote on the homeporting amendment by 8 o'clock?

Mr. HEINZ. Reserving the right to object.

Mr. GLENN. I would object to that. I do not plan to speak at great length, but I think with other people waiting also, it would be unfair to say that after waiting all day to get our turns, now we have to get them in by 8 o'clock.

Mr. GOLDWATER. Mr. President, there are four speakers that I see and I have a few words myself. I do not see how we can finish in under 2 hours.

Mr. DOLE. Mr. President, I ask unanimous consent, on that basis, that we postpone the cloture vote until 9 p.m.

Mr. GLENN. I object.

Mr. BYRD. Reserving the right to object.

Mr. GLENN. I object unless we have it clear that we can get our statements in. I do not know the order in which the Chair may recognize certain people. I want to get my statement made and have been waiting for some time.

Mr. DOLE. I am just asking to postpone the cloture vote until 9 p.m.

Mr. GLENN. Then will we go back on this after the cloture vote if we are not through with our statements?

Mr. DOLE. Yes, Mr. President; I do not have any notion that cloture is going to be invoked.

Maybe I will just ask unanimous consent that the cloture motion be withdrawn.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. GOLDWATER. Would it not be better to allow all of the speakers, many of whom have been waiting for hours, to finish their speaking and then have the cloture vote? If we stop at 9 o'clock to have a cloture vote, that is going to take a good half hour and we resume the speaking, that will mean probably 9:30 before we are finished and we intend to go, I think, tonight at least until midnight and later if we can. So I think if we allow them to speak in their proper order, it would probably be a little more orderly to ascend to the cloture vote.

Can I get an answer on that?

Mr. DOLE. Mr. President, I am willing to postpone the cloture vote; I am willing to have it now. I think on second thought, I am not going to withdraw it because there are still about 100-some amendments pending. It might be that after this particular amendment is disposed of, there will be a disposition on the part of Senators on both sides to vote for cloture. Anybody can object to my postponing the vote and we can have it right now. I hope that—based on the chairman's request, I would ask unanimous consent that it be postponed until 9:30.

Mr. BYRD. Mr. President, reserving the right to object, the postponement of the cloture vote has occurred a number of times during the afternoon and I certainly have had no objection. There was an objection to postponing it at the time it was to occur at 6 o'clock. I was able to get that objection waived, the request being to postpone it from 6 to 8. A Senator said he would not object to postponing it for 1 hour. I told him that the distinguished majority leader and Senators on his side of the aisle were discussing some matters that we had earlier talked about in the majority leader's office. I told him I would appreciate it if he could at least delay it 1 hour. He agreed to that but said he would not agree to delaying it further. So I am constrained to object to any further request to delay the cloture vote. I do object.

The PRESIDING OFFICER. Objection is heard.

The hour of 7 p.m. having arrived, under the previous order, the clerk will state the motion to invoke cloture.

Mr. GLENN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GLENN. Is it understood that we will return to this amendment after the cloture vote? Will it be the pending business after the cloture vote to return to the homeporting debate?

The PRESIDING OFFICER. If cloture fails, this amendment will be the pending business before the Senate.

Mr. GLENN. If cloture is invoked, we stay on that bill and this will be the pending business. After all the postcloture business is through, this will be the pending business?

The PRESIDING OFFICER. If cloture is invoked, the amendment will fall.

Mr. CHAFEE. Mr. President, may I ask a question?

Mr. DOLE. Mr. President, I ask unanimous consent that I may proceed for 5 extra minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. I was going to suggest to the majority leader, I wonder if anything might be gained by—most of the speakers on this are here and if each one could agree to be limited to *x* minutes, we could at least dispose of that and maybe narrow things down. I personally only want a minute.

Mr. DOLE. The only reason the cloture motion was filed in the first place was to try to speed up passage of the bill because we had a rather elaborate scheme in mind which did not work out. It was my feeling that it might be helpful to the managers, but obviously, this amendment would fall so you know you have 28 Senators going to vote against cloture. I doubt there would be 30 votes for cloture. But I would think after this amendment is disposed of, there might be a tendency to invoke cloture. Maybe not. If there is an objection to extending the time, we have no other choice but to vote on it. The other option would be to withdraw it, but I think we need it. The vote might at least indicate where people want to go on this bill.

It is still our hope—we had a meeting about 2 hours ago and we are still trying to reach an agreement on Contra aid and South Africa. After the close of business today, we can call for regular order and get off this bill and get back on the debt ceiling. I was just trying to expedite what have been diligent efforts of the managers on each side to try to finish this very important piece of legislation.

Mr. GOLDWATER. Will the Senator yield?

Mr. DOLE. I am happy to yield.

Mr. GOLDWATER. To get back to the subject of speeches, the Senator from Ohio was asking an important question that I think should be answered. It would be this Senator's opinion and suggestion that after the cloture vote, we go right on with the program as it is going now. Let us get these speeches out of the way, let us settle this very major amendment. Then we can go on into the night if we want to with whatever minor amendments might come up. I do not think there is any question that, in the orderly process of the Senate, we would proceed to speaking on this amendment after the cloture vote. I see no argument against it.

Mr. GLENN. If the Senator will yield, the point was made a moment ago that if cloture is invoked, this falls, and we would not come back to it. That is what I was afraid would happen.

Mr. THURMOND. That is right.

Mr. GOLDWATER. Mr. President, I ask unanimous consent, then, that following cloture, we resume this speaking schedule.

Mr. BYRD. Mr. President, I am constrained to object to that. I think we ought to wait and see what the cloture vote shows. I personally have no problem with that, but I think it could create some problems with Senators who want to call up amendments. If cloture is invoked, then the whole playing field will have been changed.

I hope the distinguished majority leader would not have any objection to a request that, in the event cloture is not invoked, the distinguished Senator from Ohio, who has the floor, would be permitted to regain the floor to continue his speech.

□ 1910

Mr. DOLE. There will be no objection to that.

Mr. HEFLIN. I am not sure the Senator had the floor.

Mr. BYRD. I am sorry. I thought he was delivering a speech.

Mr. HEFLIN. You had a parliamentary inquiry.

The PRESIDING OFFICER. The distinguished majority leader has the floor until 7:11.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The distinguished majority leader.

Mr. DOLE. It is obvious to this Senator that cloture is not going to be invoked. It is obvious it is going to take about 30 minutes of our time. It is obvious we are probably not going to complete this bill in any event. So I ask unanimous consent that the cloture motion be withdrawn.

Mr. BYRD. Mr. President, I will——

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. I have to object to that and I am very happy to state why. The DOD bill was called up on Monday. The distinguished majority leader's side of the aisle offered a cloture motion on the very day that this bill was called, and that was certainly within the rules. A cloture motion properly signed by these 16 Senators was entered and Senators have been on notice that the vote would occur on the motion to invoke cloture today, and repeatedly that time has been delayed, set back and set back and set back.

I do not intend to vote for cloture on this occasion. I think this is an extremely important bill. Everybody has known this for a long time. For several days I appeared on the floor of this Senate, as the distinguished majority leader has said, and continued to urge the calling up of the bill. The bill was not called up until Monday and the cloture motion was offered immediately, at least offered on that bill during the day, which changed the atmosphere for the calling up of other amendments.

We went into that at considerable length last night almost ad nauseam, but for those reasons I have to object to vitiating this vote. We should go ahead and have the vote and let the chips fall where they may, and go from there.

Mr. NUNN. Mr. President, will the majority leader yield?

Mr. DOLE. I would be happy to yield.

Mr. NUNN. Mr. President, I hope whether cloture is invoked or not invoked, we would be able to get Senators to indicate to us whether they are willing to take time limits on the amendments that are remaining. We have many amendments remaining. But I have had numerous Senators tell me they are willing to get a time agreement on their amendment. We may run into so much time that we cannot possibly get it done.

As far as I am concerned, there is no higher priority we face in this Congress than the Department of Defense authorization bill. Everyone else around here seems to have a stubborn streak and when they get a priority they are willing to do whatever is necessary to achieve that priority. Some of us believe the DOD bill is the most important matter we have. We have the debt ceiling. This bill can be put on the debt ceiling. It is an amendment that can be put on other legislation.

As far as I am concerned, recessing on August 15 is not nearly as important as passing a defense bill for the security of the Nation. So everybody has their own priorities around here, and some of us who work on this bill all year long, maybe we have a narrow perspective but, after all, this does involve national security, so I hope whatever happens on this cloture vote we would get Senators who would come forward. If we could get Senator GOLDWATER and myself and our staff here, we could get indications as to time limits on amendments. Then perhaps we can move this bill forward. I would like to stay on the bill until we

finish it. Obviously that is not my decision, but I do think everyone ought to be on notice that one way or another this Department of Defense authorization bill is going to be pushed.

Mr. HEINZ. Mr. President, will the majority leader yield?

Mr. DOLE. Mr. President, let me just make one correction. We started on this bill on Friday. Cloture was not filed until Monday, so the record will reflect the accurate description of that.

Mr. HEINZ. Will the majority leader yield?

Mr. DOLE. Yes.

Mr. HEINZ. I thank the majority leader for yielding.

I have listened to the reservation entered into by the Democratic leader. I must say I do not understand the logic of it. He has every right to object, the same as the majority leader had every right under the rules as the Democratic leader has said to file a cloture motion.

The reason I do not understand the logic is because there is a pending amendment. There are a lot of people who want to speak on that amendment. We would like to dispose of that amendment. The vote on cloture is going to be prejudicial to one side of that amendment. Senator GLENN's amendment will be prejudiced if cloture should be carried. His amendment will be stripped.

Now, I happen to be on the opposite side of Senator GLENN on his amendment, but, frankly, I do not see why the Senate should be put through what I think we all agree is an exercise that could affect the amendment of the Senator from Ohio. So I have to say to my leader and to the leader on the other side, I do not understand the logic and I would hope that if the majority leader were to renew his request, there would not be objection to it.

Mr. DOLE. Well, I do not plan to renew the request but I think we might as well vote. I am not under any illusion cloture will be invoked, but I think it will be an indication whether people would like to complete action on this bill.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The clerk will report the motion to invoke cloture.

Mr. BYRD. Mr. President, I ask unanimous consent that the leader may have an additional minute or that I may have an additional minute to respond——

The PRESIDING OFFICER. Is there objection?

Mr. BYRD [continuing]. To the Senator from Pennsylvania.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, the distinguished Senator, the majority leader, is correct; the bill was laid down on Friday. It was laid down at the close of business on Friday, with the understanding that only opening statements would be made or inserted in the RECORD. The reason the cloture motion was offered on Monday, as far as I can ascertain, was to, invoke cloture on this measure today and thus shut out nongermane amendments. Among those nongermane amendments are Contra aid and South Africa. That was the reason. It was not my decision to enter a cloture motion on Monday. Somebody else made that decision, and the appropriate number of Senators signed the petition.

But that decision having been made, and the vote having been delayed repeatedly today, I have to object to further delay, and I would have to object to vitiating the cloture petition.

The PRESIDING OFFICER. The clerk will report the motion to invoke cloture.

Mr. NUNN addressed the Chair.

Mr. HARKIN. Parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. May I ask the majority leader one other question procedurally? After this vote, whatever happens on the vote, will the majority leader permit us to return to the defense bill? Is that the intention?

Mr. DOLE. Yes, sure.

Mr. NUNN. For several more hours tonight? I would renew my request to Senators to let us know about time agreements because I think that would facilitate a great deal if we could get those agreements.

I thank the Chair.

Mr. HARKIN. I ask unanimous consent for parliamentary inquiry.

The PRESIDING OFFICER. Without objection, the Senator will state the parliamentary inquiry.

Mr. HARKIN. Mr. President, the cloture vote that we are about to proceed upon was filed on which day of this week?

The PRESIDING OFFICER. The motion was filed on Monday of this week.

Mr. HARKIN. And so under the rules of the Senate then it was supposed to have been held at noon today, it was postponed until 6 and then it was postponed again until 7. I would just like to back up what the distinguished minority leader said, that we have the rules. This cloture petition was not filed on this side. It was filed on the other side.

Several Senators called for regular order.

The PRESIDING OFFICER. The Senator is not propounding a unanimous consent request. The clerk will report the cloture motion.

Mr. GLENN. Mr. President, parliamentary inquiry, please.

The PRESIDING OFFICER. The Senator will state the parliamentary inquiry.

Mr. GLENN. If cloture is invoked, if we vote cloture, then what are the time limitations under our new rules? Is it 30 hours total? Is that correct?

The PRESIDING OFFICER. If cloture is invoked, there will be 30 hours for consideration of the motion on which cloture has been invoked.

Mr. GLENN. That would be what, equally divided on each side of the aisle?

The PRESIDING OFFICER. Each Senator has a maximum of 1 hour for debate on the basis of the ability of that Senator to be recognized.

Mr. GLENN. Each Senator has 1 hour with the whole Senate having 30 hours total.

The PRESIDING OFFICER. The Senator is correct.

Mr. GLENN. So that would mean many people who wish to speak on this particular issue would probably not be able to do so; is that correct?

The PRESIDING OFFICER. It would depend on the number of people who wished to speak and how long they spoke.

Mr. GLENN. Mr. President, that is not a very good situation in which we are left. I guess we have no option but to go ahead and vote on cloture.

□ 1920

SEVERAL SENATORS. Vote! Vote!

Mr. BYRD. Mr. President, I will not take more time of the Senate. The Chair indicated, in response to the distinguished Senator, that if cloture was invoked, there would be 30 hours of consideration of the measure.

Mr. GLENN. For the total Senate.

Mr. BYRD. That is true, but it is not 30 hours. It is no more than 30 hours. It could be less than 30 hours. That should be stated, because it might have a bearing on someone's decision to vote one way or the other.

Mr. GLENN. Mr. President, if we invoke cloture, when would this come back up? Would this come back up under cloture if it has already been filed at the desk then?

The PRESIDING OFFICER. Any amendment filed at the desk in timely fashion would be eligible to be offered. The Senator offering the amendment would have to be recognized for that purpose and offer the amendment.

Mr. GLENN. As I understand it, such amendments have been filed by the distinguished Senator from New Mexico to cover this particular subject under cloture.

I would propose a unanimous-consent request that if cloture is invoked, debate continue on this issue, on the amendment that has already been filed by the Senator from New Mexico, if that meets with his approval.

Mr. LONG. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will report the motion to invoke cloture.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on S. 2638, the Department of Defense authorization bill.

Senators Warren Rudman, Barry Goldwater, Slade Gorton, Bob Dole, Pete V. Domenici, Thad Cochran, Dan Quayle, Chic Hecht, James Abdnor, Paul Laxalt, Jake Garn, Pete Wilson, Phil Gramm, J.A. Denton, Don Nickles, Jesse Helms, Ted Stevens, and John Warner.

VOTE ON CLOTURE MOTION

The PRESIDING OFFICER. By unanimous consent, the quorum call has been waived.

The question is, Is it the sense of the Senate that debate on S. 2638, the Department of Defense authorization bill, shall be brought to a close? The yeas and nays are automatic under the rules, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Alaska [Mr. STEVENS] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The yeas and nays resulted—yeas 53, nays 46, as follows:

[Rollcall Vote No. 180 Leg.]

YEAS—53

| | | |
|---|---|---|
| Abdnor | Gramm | Packwood |
| Armstrong | Grassley | Pell |
| Boschwitz | Hatch | Pressler |
| Broyhill | Hawkins | Quayle |
| Chafee | Hecht | Roth |
| Cochran | Heflin | Rudman |
| Cohen | Heinz | Simpson |
| D'Amato | Helms | Stafford |
| Danforth | Humphrey | Stennis |
| DeConcini | Kassebaum | Symms |
| Denton | Kasten | Thurmond |
| Dole | Laxalt | Trible |
| Domenici | Lugar | Wallop |
| Durenberger | Mattingly | Warner |

| Eagleton | Long | |
| Exon | Mathias | |

NOT VOTING—1

Stevens

□ 1940

The PRESIDING OFFICER. On this vote, the yeas are 53, the nays are 46, three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the motion is not agreed to.

The distinguished majority leader is recognized.

Mr. DOLE. Mr. President, I want to thank my colleagues on both sides of the aisle for supporting the cloture vote. It is an indication that a majority of the Members in this body want to finish this bill. I hope we can do that.

We are right back where we started before the cloture motion, but I want to thank my colleagues. And I will before the evening is over, file another cloture motion.

In fact, I will do it right now.

---

CLOTURE MOTION

Mr. DOLE. I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The bill clerk read as follows:

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on S. 2638, the Department of Defense Authorization bill.

Bob Dole, Paul Trible, Pete Wilson, Ted Stevens, Phil Gramm, Strom Thurmond, Al Simpson, Jake Garn, Steve Symms, Bob Kasten, Frank Murkowski, Mitch McConnell, Gordon Humphrey, Warren B. Rudman, Bill Cohen, Dan Quayle and Chic Hecht.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. BYRD. Will the distinguished Senator from Alabama yield to me?

Mr. HEFLIN. Yes.

Mr. BYRD. I thank the Senator for yielding. I ask unanimous consent that, in his yielding to me, his rights to the floor will be protected.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, while the distinguished majority leader is here, I think it is appropriate to ask what the program will be for the rest of the day and tomorrow and Friday and Saturday, if the Senate is in session on Saturday, so that Senators might be able to schedule their days accordingly.

Mr. DOLE. I thank the distinguished minority leader. I have spoken to the manager in chief, who indicates we will be here until about midnight this evening. I believe, visiting with both Senators GOLDWATER and NUNN, at least they are optimistic, I think maybe overly optimistic, that it might be possible to finish this bill by late, late tomorrow evening—well, on Friday. No question about being here on Friday.

If, in fact, we can reach an agreement on the other matters, the other major items, on Contra aid and South Africa, then it would be my hope that we could start on those on Friday and it might necessitate a Saturday session. But I think we need to have at least another visit after awhile to see if we are getting close to an agreement.

But we will be here late tonight. I assume we will be here late tomorrow night. I am hopeful that we could complete action on this bill yet tomorrow night. I make the plea the managers have made that if Members have amendments, if they can get time agreements. I think there are still 50-some amendments that need to be dealt with. So that more or less is the schedule. I cannot indicate Saturday, but it is a distinct possibility.

Mr. GOLDWATER. Will the Senator yield?

Mr. DOLE. Yes.

Mr. GOLDWATER. If the majority leader and minority leader can get together and agree to a time limit, I think I could promise finishing this bill by Friday night. We have no more long, large amendments like this one. But with time agreements, we can assure that we do not drag on and on.

Mr. BYRD. Mr. President, the distinguished majority leader and I and other Senators met in his office today to discuss a possible agreement with respect to disposing of the two issues, Central America/Contra aid and South Africa. I made certain proposals at that meeting and I am ready to discuss those proposals further.

I would be happy to state at this point the Democratic amendments on Contra aid as far as I have been able to ascertain at this point if we could also know what the responses are on the other side and what some of the amendments are. I want the majority leader to know that we are prepared to continue discussing those proposals.

I must say now, now that cloture has again been offered on DOD—I hope the distinguished majority leader does not have any feeling that I am attempting to delay DOD simply because I objected earlier to the vitiation of the cloture vote. I did that because, as I stated earlier, the decision had been made on the other side of the aisle on Monday, 2 days ago, to push that cloture vote. And on behalf of Senators who have been expecting to vote on cloture on that measure, I had to oppose the vitiation of that cloture vote.

But I am perfectly willing to proceed on the DOD bill and try to work in a way that will dispose of amendments. I may have two or three more amendments myself. I would be happy to enter into time agreements on them. There is no disposition I know of on this side to drag action out on the

DOD bill. I do not know why a cloture motion has been introduced on that bill. Of course, no Senator has to answer to me in that regard. If a Senator wants to offer a cloture motion, he can. The problem I see with that, if cloture is invoked on Friday, is if we do not reach an agreement to deal with these other two matters, Contra aid, which is on the military construction appropriation bill, and the South African issue, I suppose they could not be offered to the DOD bill.

We only need to recall that Mr. NUNN the other evening proposed, in regard to the unanimous-consent request that had been read on the floor at that time, that the particular provision which provided against the offering of either of those two issues on that bill be deleted, and we proceeded to delete that provision, and then proceeded to agree that the debt limit extension resolution would be put over to the close of business today with no amendments in order thereto except amendments dealing with the South Africa issue and the Contra aid issue. We also agreed that no call for the regular order would bring back the debt limit extension resolution prior to the close of business today.

It might be that the distinguished majority leader has introduced a cloture motion at this particular time to bring back the DOD bill on Friday in the event that a call for the regular order does bring back the debt limit extension resolution in the meantime. That would be one way of doing it.

I have said all of that to say this: That if cloture is invoked on Friday on the Department of Defense authorization bill it may make it somewhat difficult to find time for the resolution of the two issues that we have been discussing now off and on for a considerable number of days—the Contra aid/Central America, and the South Africa/front-line states issue. This could, in the event cloture in invoked on Friday on the DOD measure, serve a purpose of delaying action on those two measures along with other measures that are rather important around here, one of which is the reconciliation measure, and one of which is the Boren PAC amendment which, of course, hopefully can be called up and disposed of very soon.

There could be problems if this cloture motion should ripen and cloture were invoked on Friday on the DOD bill. I personally would hope that the DOD bill would be disposed of before that time. And maybe it can be.

I would like to offer to the distinguished majority leader the names of Senators on this side who are ready to identify the amendments that they would offer on the Contra aid measure. I am referring precisely to titles II and III of the military construction appropriations bill. I think we ought to do that because I think everybody ought to know what has been proposed, what we are working on, and let us see, while several Senators are on floor if we can have their attention and support for the efforts that are being made.

The PRESIDING OFFICER. The distinguished majority leader is recognized.

Mr. DOLE. Following our discussion at 5 o'clock today, I met with the Parliamentarian and went over the original concept, the minority leader's concept and the minority leader's comments with reference to the earlier unanimous-consent agreement that this Senator had offered just at the starting point to get started with the discussion.

I think we are about prepared to submit a modified proposal incorporating some of each which I will be given by the distinguished minority leader in the next 10 or 15 minutes. It does not at this time contain, of course, a list of amendments or an agreement on amendments, 1 hour each, equally divided, or whatever, which I think has to be addressed. Otherwise, we do not have anything.

But I do hope we can finish the DOD authorization bill. It is my thought in addition to the one mentioned to get back to DOD on Friday that it might also encourage Members to come forth with their amendments, and I will do what the managers suggest to try to reach some time agreement. I understand there are a couple of good possibilities on major amendments where Senators have indicated they would settle for a very brief time period, I understand for five or six rather major amendments, and then this could move very quickly.

So I will do as the minority leader has done. We are in the process of determining which Members on this side will have amendments on Contra aid, and which Members on this side will have amendments on South Africa, and the nature of the amendments.

Mr. BYRD. Does the distinguished majority leader feel it well to state at this time, for all Senators to know, what the proposals are that have been discussed in the distinguished majority leader's office, so that Senators may indicate if they have additional amendments? It seems to me that we ought to be pressing ahead as well as we can press ahead to try to get some agreement worked out on these two major issues; in the meantime, also working ahead, hoping to finish action on the DOD bill.

As far as I am concerned it would be well just to lay it all out on the table right here now and state what the proposals are, let all Senators on both sides know so that we can get feedback from them if they have feelings different from those which I think have been expressed by me and others in the office of the distinguished majority leader. If they have other amendments, they can let us know.

Mr. DOLE. Mr. President, let me just indicate very quickly this is not in the final form, but what I would suggest which is still under negotiations, I think it is rather difficult to say precisely. We have not agreed on the language of any one proposal. But what we generally suggest so Members will be alerted is that we lay before the Senate H.R. 5052 on a certain date—I hope on Monday—and that for 2 days amendments be dealt with in the usual fashion. Provided that on the third day of consideration the Senate proceed as if under rule XXII, and if cloture is invoked there will be 8 additional hours of consideration. I think there have been 6 in the orders with the possibility of additional time being requested. Provided further that upon disposition of H.R. 5052, the Senate proceed to consider the committee reported bill on South Africa sanctions for not to exceed 2 days of session, provided that on the second day of session the Senate shall proceed as if under rule XXII, and if cloture is invoked there should be 8 hours available for consideration.

Further provided that all specified amendments be limited to 1 hour of debate; that no amendments other than those specified shall be in order, and further that there be no motion to recommit. That is a general framework for Members to be alerted.

My own view is it should not take 3 days on Contra aid. I understand there is a desire by many to fully discuss it. I think the desire of the majority leader is to finish both of these matters by the close of business on August 15 because I am not certain we will be able to deal with reconciliation. I am not certain it is going to be available. But we still have the debt limit, and maybe a conference on the debt limit.

So that in essence is a general outline though it needs to be refined. We need to meet again and see if we can reach an agreement on the specific language.

Mr. BYRD. Mr. President, if the distinguished Senator from Alabama will continue to yield under the same understanding as previously ordered, may I state to all Members of the Senate that the proposals on this side were, that there be a total of 3 days for debate and action on amendments on titles II and III of the military construction appropriation bill. Titles II and III deal with the Contra aid/Central America issue.

On day 1 of the 3 days, there would be the filing of a cloture petition on those two titles. On days 1 and 2, the time would be used for debate and disposition of amendments, with some arrangements to permit orderly consideration of amendments with time limitations and assurances in all cases that

Senators would have the opportunity to call up their amendments and have an orderly disposition thereof.

On day 3 the cloture vote would occur. If invoked, Senators to have the opportunity to call up their amendments and have orderly disposition of those amendments. Then if cloture is invoked there would be no more than 6 hours of debate to be equally divided and a final vote on titles 2 and 3. It would be agreeable then to go to final disposition of that bill without extended debate on either final passage or the appointment of conferees.

On South Africa, the proposal which I offered in the distinguished majority leader's office was that the foreign relations bill be called up with only 2 days of total time and that, as far as we were concerned, there would be no need for a cloture vote but there might be a disposition on the other side to have a motion to invoke cloture.

But on both days 1 and 2, as far as Senators on this side are concerned, those days would be used for debate and disposition of amendments. Again, Mr. President, with respect to both measures, if arrangements can be made and agreed to that would allow for the orderly recognition of Senators to call up their amendments and dispose of them, with time limitations on amendments, Senators on this side are willing to agree in advance that there will be no filibuster on the request for a conference or the naming of conferees.

We are discussing these two issues with the understanding that the commitment to the Senator from Oklahoma [Mr. BOREN] would have to be kept. The distinguished majority leader, of course, would be within his prerogative, within the context of the commitment to the Senator from Oklahoma, to schedule that measure for action.

Mr. DOLE. I think we have outlined the general framework. I think Members are on notice that we are trying to work it out. If they have any amendments, we need to know, amendments to either bill.

With reference to the Senator from Oklahoma and his priority, we are going to try to do them all. I do not know if we will do them all, but if we do not get this agreement, there is no problem with doing his. If we do get the agreement, we may have to alter it some.

Mr. BYRD. Except if cloture is invoked on the DOD bill and that bill has not been finished prior to Monday or whenever the distinguished Senator from Oklahoma anticipated that his measure, of which I am a cosponsor, would be called up, there could be some problem with that.

If the distinguished majority leader will let me have a copy of the proposed agreement, when he is ready, I will be happy to take a look at it.

Mr. BOREN. Mr. President, will the Senator from Alabama yield?

Mr. HEFLIN. For how long?

Mr. BOREN. About 30 seconds.

Mr. HEFLIN. All right.

Mr. BOREN. I thank my distinguished colleague. I thank the distinguished minority leader for the comments just made.

Last year, when this Senator agreed to the unanimous-consent request to allow certain provisions to be stripped out of S. 655, it was done so with the understanding that we would have the opportunity early this year to have full consideration of the pending PAC amendment. The distinguished majority leader has made that commitment and is certainly operating in good faith on it.

I just say that I appreciate the comments just made by the minority leader that that agreement will be protected. If we continue to postpone that action until after the recess, when we come back we would not have time for the House to act in a timely fashion. I hope whatever agreement is entered into would protect our right to start on that matter on Monday. We are willing to enter into an agreement to lock that in so that the distinguished majority leader would know exactly what time that would be. Then any votes on the matter would be on Tuesday.

I appreciate the remarks of the distinguished minority leader and I hope that all of this agreement can be arranged to get all of these issues considered in a timely fashion.

Mr. DOLE. Let me respond to the Senator from Oklahoma.

One way to accommodate is to shrink the time on the Contra bill from 3 days to 2. If the Senator will help me on that, we will not have any problem.

Mr. BYRD. Mr. President, I thank the Senator from Alabama. I know we have imposed on the distinguished Senator from Alabama. He has very graciously and charitably let us have the floor for a considerable length of time. I personally want to thank him. I think the Senate will be well served in the long run. I thank the Senator.

Mr. HEFLIN. Does anybody else have a unanimous-consent request or want time?

[Laughter.]

Mr. HEFLIN. Mr. President, I rise in opposition to the amendment to strike funding for the Navy's strategic homeporting plan.

As I consider the strategic homeporting concept, my mind goes back to the time that I was a Pfc, in the U.S. Marine Corps. That was during World War II. A Pfc was a private first class. He had been elevated from the position of private. On one occasion we were going through some training and were putting ourselves in a battle situation. Something happened to the corporal who was the squad leader so I was designated to be the squad leader.

While in the training we were supposed to be in battle conditions, but we all of a sudden were informed of our conditions, so I stopped and gathered all of the eight men of my squad together and I began to give them there orders. They were all bunched up together.

About that time, a gunny sergeant came by. A gunny sergeant in the Marine Corps is an unusual animal. He proceeded to chew me up one side and then down the other. Then when he got through, he spit me out in little pieces.

That chewing by a gunny sergeant is a rare experience and it is an experience that will be indelibly engraved in your mind forever.

What he was telling me was that when you are in battle formation and you are supposedly going through a situation where you think the enemy is in front of you, you do not bunch up. The proper procedure is to desperse. Never bring your men together in a bunch. You disperse.

The idea and concept of dispersal is a key point in the issue of strategic homeporting.

There was criticism, and probably unjustly so—I am not going to argue that—in regards to the marines being all located in one barracks in Lebanon when we lost over 200 marines in the recent bombing of those barracks. The idea was that they ought to have been dispersed.

The idea is not to put all your eggs in one basket or not to put them all in one, two, or three. If one cracks, then the others begin to crack around it.

If a mortar shell were to fall on a squad of marines that were bunched up together, it is going to be able to injure or kill more than one.

You are going to cause serious damage to that squad of marines.

The idea of dispersal was an issue in Pearl Harbor. It was an issue then when we felt we should have been dispersing our fleet and not have it all concentrated in one location. So I think we should have learned our lesson by then.

□ 2010

I think what we are doing now is finally getting around to the concept that we ought not to put a great number of ships together in one location where the types of weapons that we have today—nuclear or nonnuclear—can cause tremendous damage.

There is no question that if you have five ships right here in one place, it is easier to pick and to shoot those five ships than if they are spread out in various places.

That is the basic concept of homeporting. I think it is important. It is important today because we realize that submarines can travel in ocean lanes not too far from our own coastline. They can come up and, with various missiles, they can cause tremendous amounts of damage. Therefore, dispersal is key.

I listened to the Senator from Nebraska as he said, "Well, this is not a great dispersal." But it is the beginning. I think we ought to congratulate our leaders in the Navy for this beginning. It is one which should have begun a long time ago. So I say it is the beginning of an intelligent approach toward spacing of our vessels by way of the homeporting concept.

In my judgment, the concept of locating our coming 600-ship Navy in new homeports around the coast of the United States not only makes good sense, but is also an absolute necessity in meeting the national defense needs of this great country.

In October 1982, as the administration began increasing the size of the Navy toward its goal of a 600-ship general-purpose fleet, the Navy announced its intention to base many new ships which would be an addition to the existing fleet, in accordance with a policy called strategic homeporting.

As we look at this, I think we find that there is another reason. We find that in the gulf coast, there is no question that there is activity in Central America. We are much closer to this activity and it makes sense to locate some of our ships there. As it has been decided, there is an air carrier group and a battleship group that will be located in the Caribbean and in the gulf area and they will by this plan, of course, be homeported close by. I think it makes sense there.

Congress approved some $79 million for this concept for fiscal year 1986. This year, the Navy is requesting $161 million to begin construction of the new homeports in Staten Island, NY, and Everett, WA, which will serve as the bases for 18 new ships.

There are valid and sensible reasons for this strategic plan. The first reason that comes to mind is the fact that the 600-ship Navy is a reality. Congress has approved this number and the construction for most of these ships is underway. Ships that are not under construction have been authorized. I understand that we are likely to reach that goal in 3 or 4 years. The simple fact is that we are going to have to base those ships somewhere. We can build new piers and facilities at our present homeports. However, I believe that this would be an ill-advised and detrimental solution for the existing ports. Because, there is simply no room in the inn. Our existing ports cannot accommodate these new ships or their personnel. Real estate at the existing ports is physically and economically constrained to the point that nothing can be done to relieve overcrowding and congestion at the existing bases. All you have to do is ask any sailor who has been stationed at either Norfolk or San Diego. That sailor will tell you that there is just not enough room there for additional ships or for the support personnel to accompany them.

Along the same lines, Mr. President, the infrastructure at the existing homeports will not support the nearly 130 new ships coming on line. According to the Navy, the least costly alternatives to accommodate the new ships in existing ports will require more than $629 million in capital improvements. This is not to mention the local contribution which must be added to this figure which is only about $200 million less than the total capital investment required to build new homeports in New York, Puget Sound, San Francisco, and on the gulf coast.

Probably the most important of the many reasons for the homeport concept is simply that for which it was named—strategic homeporting. Strategic homeporting would disperse the fleet and thus reduce its vulnerability to attack. It would allow for quicker access to certain theaters of operation, therefore allowing the United States, when necessary, to establish a naval presence at a crisis point early in the action. Also, Mr. President, as I have said, in my judgment, the strategic homeporting plan will reduce the vulnerability of the fleet to conventional enemy attacks and also reduce the possibility of a few small mines emplaced at the entrance to a port bottling up the fleet inside. This will avoid the problem we faced with the tragic bombing of Pearl Harbor in World War II whereby the entire Pacific or Atlantic fleet could be crippled by a single attack. These are just a few of the many reasons we should endorse this program and approve the funding level requested by the administration, which is the same level approved by the Armed Services Committee.

My reasons for supporting this plan go even further than those which I have mentioned here today. Not only is it a plan that I believe makes good sense, but it also includes the construction of a homeport at the Port of Mobile in my home State of Alabama. The Navy will request for fiscal year 1988 some $33 million for construction of the Mobile homeport which will serve as the location for five of the new ships. However, if this amendment is agreed to, I do not believe that this new homeport in Mobile will ever become a reality.

Mr. President, some have said that this plan is unnecessary this year and can be put off until the next. They say that, due to budget restraints, this is a program which will not be harmed by the budget ax if deferred until some other time. In my judgment, if this amendment is accepted and the funding for the homeports in New York and Staten Island is deleted from this bill, the entire homeporting concept will fall. The delaying of the funding for these homeports will result in the termination of the program. Therefore, I urge my colleagues to defeat this amendment which would strike funding for the construction of the New York and Staten Island homeports.

Mr. President, I yield the floor.

Mr. GLENN and Mr. TRIBLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. TRIBLE. I yield the floor to the Senator from Ohio.

Mr. GLENN. Mr. President, I thank the Senator very much for yielding.

While I do not speak as a great naval strategist, I have had some experience in this field. I served 23 years in the Marine Corps, and I went through naval aviation flight training. So I consider myself somewhat of a student of naval strategy.

I would like to address this issue from the strategic standpoint before we get into some of the other issues that have already been developed by some of the other speakers.

Throughout the history of naval warfare, it has been a strategic objective to range your naval forces so that you control the chokepoints where force can be brought to bear on ships that have to narrow their activities in certain seaways. In World War II, we remember all too well the battles of Leyte Gulf and the Coral Sea where both sides were trying to control these seaways—seaways that were vital to shipping in that part of the world. The chokepoints can be seen on this map.

Today, we are literally spending billions of dollars to make sure we can control the Greenland-Iceland-United Kingdom gap. That means if we can control ships there, we can control shipping out of the Soviet Union's northern ports as they come out of the Norwegian Sea. You only have to read the record of the Senate and House Armed Services Committees and look at the budget figures to see how much we are spending to control that strategically important gap so that we can bottle up Soviet ships.

We have had naval battles in the past that have been in the Skagerak, here in the Baltic Sea, and in the Bosporus. More recently, we have been concerned with the entrance to the Persian Gulf—the Strait of Hormuz. One of the greatest traveled ship channels in the world is the Straits of Malacca, where they come down through to the Indian Ocean.

Why is the Soviet Union, for instance, making such a major base out of Cam Ranh Bay, directly across the Philippines from our base at Subic? Because if they can make that a major port, they control the chokepoints that come down through the Straits of Malacca, through the channels around the Philippines and Indonesia, and thereby control shipping in that part of the world.

The point I am making is this: Throughout history, naval strategy has been to try to control the chokepoints of the world. Naval battles have been fought repeatedly over this.

The Soviets, in addition to Cam Ranh Bay, have sought to develop major naval facilities at Vladivostok and Petropavlovsk, in the colder areas of the north. Vladivostok, north of Korea, has been developed for many years as a major base.

Our naval strategy says we want to control these shipping lanes. We have a forward deployment strategy and I support that. This strategy says we will be the Nation that makes sure the Mediterranean and Persian Gulf stay open. We put billions of dollars into making sure that we control the flow of Soviet ships out of the Greenland-Iceland-United Kingdom gap. That will be one of the major places that we will try to bottle up the Soviet net as well as in Vladivostok. Again I emphasize that naval strategy is involved with controlling the chokepoints of the world.

Now, this map of the United States indicates our current naval base structure: Newport, Norfolk, Charleston; Kings Bay, GA; Mayport, Pensacola, Pearl Harbor; San Diego, Long Beach, San Francisco, and Puget Sound in Washington. That is a good dispersal pattern. Those who claim we have no dispersal have not looked at a map to see that we are dispersed adjacent to deep water areas where ships can get to sea rapidly.

The new bases proposed at Staten Island, NY, and Everett, WA, would still fit the criteria of being adjacent to deep water where they could disperse and not be bottled up.

Along the Gulf of Mexico, we are proposing new bases at Key West, FL; Mobile, Pascagoula, Gulfport, Lake Charles, Galveston, and Corpus Christi, TX. If war starts, we have to get our ships out through the approximately 90-mile-wide Yucatan Channel, or through the Straits of Florida. In other words, we would deliberately put ourselves into a potentially bottled up situation that naval strategy states we must desperately try to avoid.

I appreciate the interest of those who say they want these facilities in their home State. But from a global strategic standpoint, I would submit that this is wrong.

The argument is made on the other side that we have some of our major shipping coming out of the gulf in case of war.

But do we have sufficient forces in the gulf to fight their way out in the event of war? No. Out of these 600 ships, we are going to have only 26 in the gulf. Forty-five would go to 9 new ports, 19 would go to existing ports, and 26 in the gulf.

Now to me that does not make for a good situation at all. It means that we are blocking our forces up near the Yucatan Channel. Are we going to have to fight our way out of there? I hope we never have to, but if we do, that force is not going to be sufficient to accomplish the job. We know the Soviets have had a submarine base at Cienfuegos, Cuba, but I presume that in a wartime situation, it would be one of our first prime targets. Even if these ships broke through this area, they still have to come through the Caribbean and could be bottled up by the Windward Islands. We have a double blockade that we are setting up on our own. That to me makes very little sense.

If we expect to use these gulf-ported ships to go to the G-I-UK Gap, we have built in an additional 3 days' steaming time to get there—which again makes no sense whatsoever. If we are trying to use these ships to protect the Panama Canal, the gulf ports might make some sense, but we are hopefully going to have other forces deployed on either side of the Panama Canal to keep Soviet shipping and Soviet submarines out of this area. We can certainly cover the Gulf of Mexico with antisub forces from the air rather than having our ships take the significant risk of being bottled up inside that area. That is the basic reason why I am so opposed to this plan and back the proposal of the distinguished Senator from New Mexico [Mr. BINGAMAN].

I think he is right in what he is trying to do. I would propose that in coming years, we are going to have to make some accommodations at existing ports. Those existing ports will certainly need some expansion of their facilities. But those facilities do not need to be started in this fiscal budget and can come at a later time.

As the ranking minority member of the Military Construction Subcommittee, Senator BINGAMAN has studied this issue closely. He has heard all the testimony both pro and con. He concluded that the funds projected for the strategic homeporting plan could indeed be better spent elsewhere in support of our maritime strategy. I heartily concur with that conclusion.

One of the things I have been most concerned with in my tenure on the Senate Armed Services Committee has been that we purchase very expensive weapons carrying systems, but do not provide sufficient weapons for them. We can put forward unclassified figures that say for all the attack submarines the United States has, we have less than two torpedo loads for each of them. We cannot say exactly how low it is. We spend billions on attack submarines and do not put the weapons on them that would let them do the necessary job in time of war.

Now, how preposterous can we be? And so, my colleague's move to put some of this money into the O&M weapons accounts is a good one. A short time ago, a carrier going to relieve another carrier in the Persian Gulf had to crossdeck, as we call it—take air-to-air weapons off fighter aircraft, and transfer them over to the other carrier because the carrier coming out did not have its own weapons.

We were that short on air-to-air missiles to put on those aircraft. What a preposterous situation, to be spending $20 to $30 billion for a fighter aircraft, and not have an adequate number of weapons to put on them.

So this idea of taking money from the homeporting account and putting it into the munitions account is something that I very much favor. I am opposed to the strategic homeporting plan because I think it is not strategic. I think we deliberately, and unnecessarily, bottle our own ships up in the Gulf of Mexico. We do to ourselves what we hope the enemy will do. We hope our enemies get into restricted areas and have limited access to get out.

So my opposition to strategic homeporting is based on three concerns. First, that the strategic homeporting plan would not improve our ability to carry out our maritime, forward deployment strategy. In fact, it would make us much worse off as our ships are much more likely to be bottled up than would otherwise be the case.

Second, the establishment and operation of these nine new bases would have a negative fiscal impact on our defense posture.

Third, strategic homeporting would adversely affect the quality of life of naval personnel and their families.

I was an outspoken supporter on the floor of the Senate for the procurement of two new nuclear aircraft carriers. I also supported the procurement of the new *Aegis* class cruisers, additional nuclear attack submarines, and the reactivation of our four battleships.

Those battleships are necessary, not just for their 16-inch guns or because they look impressive coming into a port. We needed those battleships because they could carry cruise or antiaircraft missiles and had a protective

hull for them. That is why I supported them.

Likewise I supported efforts to redirect our maritime strategy. In Secretary of the Navy Lehman's posture statement before the Armed Services Committee, he testified that to achieve the Navy's strategic objectives: "We need a maritime strategy at once global, forward deployed, and—with our allies—superior to our probable opponents."

I could not agree with him more. That is the objective we should have—not bottling up our ships in the Gulf of Mexico. I want strategy that lets our ships have access to deep water immediately, not after a day's steaming time where they can be bottled up.

The United States is a maritime nation. We need a 600-ship Navy in order to have enough assets to insure that the lifelines to our allies, to our forward deployed ground and air forces, to our strategic resources, and to our trading partners, are not restricted anywhere on the globe.

The establishment of 9 new naval bases for approximately 45 ships would not improve our ability to carry out this maritime strategy.

From a purely strategic standpoint, a naval surface action group based in Staten Island in the Northeast and a carrier battle group based in Everett in the Northwest, might provide marginal improvements in response times in the event of a military crisis. I grant that ships located in these two ports could probably reach their most likely operating areas in the North Atlantic and Pacific sooner than the other ships we are talking about.

However, I emphasize that the proposed Staten Island and Everett ports only might provide a marginal improvement in our response times. This is because it is highly likely that at least one of the battle groups would already be forward deployed or otherwise away from homeport, either in training or in transit, when a crisis occurs.

As to the Gulf of Mexico, the establishment of seven new naval bases for approximately 26 ships—including an aircraft carrier and a battleship—would not improve our maritime strategy. In fact, it would be detrimental.

In arguing for additional homeports, the Navy has cited enemy mining and submarine launched cruise missiles as the top two threats in arguing against putting additional ships in existing ports. But when you look at the map of the Caribbean, you quickly see that instead of complicating a potential enemy's targeting, you would actually simplify his problem. If a potential enemy were to concentrate on the two natural choke points leading into the gulf, namely the Florida Straits and the Uycatan Channel, he could effectively bottle up shipping in the Gulf of Mexico. In fact, one of the major goals of our own maritime strategy is to either block strategic choke points, such as the Greenland-Iceland-United Kingdom Gap, to enemy transit or to ensure that they remain open for our own use.

Another major concern I have with strategic homeporting is the potential economic impact that the establishment and operation of these nine new naval bases would have on our ability to adequately support a 600-ship Navy—and ultimately to implement our maritime strategy.

The issue first and foremost is one of affordability and readiness. Can we afford to build, man, and operate these new bases as well as to man and operate our existing bases? In an ideal world of limitless financial resources, perhaps. But in this time of mounting budget deficits and the compelling need to effectively maximize the use of each and every defense dollar, we simply cannot afford the Navy's strategic homeporting plan.

I mentioned earlier that I have been outspoken in support of the 600-ship Navy. But I have also been outspoken about our failure to provide adequate readiness support for the fleet—in particular ammunition and spare parts.

Even with an average annual real growth in the Defense budget of 4.8 percent during the last 5 years, we still have not reached critical ammunition and spare parts inventory objectives. Unfortunately, we are now facing an indefinite period of little or no real growth in the defense budget. For this year, fiscal year 1986, after application of Gramm-Rudman-Hollings we will actually experience minus 6.2 percent real growth. For the coming year, fiscal year 1987, the Defense Authorization bill we are debating today does not even cover inflation. The forecast for the next few years is just as grim.

In testimony earlier this year, the Navy's Director of Fiscal Management for Operations predicted a "catastrophic" impact on Navy readiness if Senate Budget Committee recommendations were applied across the board.

There is a similar situation with regard to manpower. Just 2 weeks ago, the new Chief of Naval Operations, Adm. Carl Trost, in a speech to the Naval Submarine League, stated that because Congress has repeatedly cut requested increases in Navy personnel end strength, shore billets—like those required to man the nine new bases requested in strategic homeporting—have gone vacant in order to man ships. In this year's budget, the Navy's request for increased personnel end strength has been cut by 50 percent in the Senate bill, a cut with which I reluctantly agree because of budgetary constraints.

This is not a pretty picture and it is one that—as a member of the Armed Services Committee—I do not enjoy painting. But it is a picture of the fiscal realities that exist and that must be realistically confronted when we consider opening nine new bases.

My third major concern with strategic homeporting, and perhaps the most important of all, is the impact of homeporting on service personnel and their families. In testimony on homeporting before the Subcommittee on Military Construction, retired Adm. C.E. Bell, a former fleet commander and Director of Navy Plans and Programs, reminded the committee that retention of active duty personnel is seriously affected by several factors including:

Time away from families; number of geographic moves which require uprooting of families; availability of suitable housing and schools; availability of personal services—that is, medical, dental, commissaries—and recreational facilities; and acceptance of military personnel by the community at large.

These quality of life factors must be considered when looking at opening nine new bases. The first two family separation and the number of geographic moves, are particularly pertinent in this discussion.

Secretary Lehman testified this year that "family separation remains the No. 1 reason why young officers and enlisted men and women choose to leave the Navy." He further stated that "making improvements in this area was a top goal of the next 4 years."

But, as Admiral Bell testified, personnel based on ships in newly established homeports would experience additional separation in order to complete their annual training requirements at Fleet Training Centers at existing bases like Norfolk and San Diego. Admiral Bell testified that, on average, an Atlantic fleet officer and enlisted person spends almost 1 month each year in training. An additional month of separation might not seem like a long time, but it is important to remember that these services personnel could well have already spent between 6 and 9 months that year away from their homeport and families on a forward deployment cruise overseas.

Another area for concern for personnel assigned to the proposed new bases would be the increased number of geographic moves required. The chances are great that, at the conclusion of a sea tour homeported at one of these nine new bases there would be little opportunity for a shore duty billet there because it would be new, smaller, and lacking the high manpower needs of the established naval complexes and training centers. Consequently, when it was time for a service person to rotate to shore duty, if he were based out of one of the nine new ports he would most likely have to be reassigned to another location where

his services could be properly utilized ashore.

In commenting on these quality of life issues, former Chief of Naval Operations, Adm. Tom Hayward stated that "there are many reasons to question the—strategic homeporting—concept these days. I refer specifically to the numerous detrimental aspects which such wide dispersal to new bases will have on most military personnel, especially the career-oriented family Navy person."

So in summary, Mr. President, I am well aware that homeport facilities will have to be found for approximately 64 additional ships as we move toward our 600-ship goal. I am also aware that, no matter which cost estimates you use, whether from the Navy, the GAO, the Senate Armed Services Committee, or the Navy's independent consultant, there would be a very large additional cost increase entailed in constructing and operating nine new bases, an amount well in excess of that to homeport the ships at existing bases.

In my opinion, given the fiscal realities of the defense budget for the foreseeable future, we simply cannot both adequately procure, outfit and man a 600-ship Navy and operate our existing bases, and at the same time build and operate nine new bases.

So as an alternative, I would strongly recommend that the Navy reassess their dispersal plan to make better use of our sizable number of existing naval bases where highly effective base infrastructures, schools, and training areas already exist.

Mr. President, I suggest that constructing seven new Navy bases in five different States bordering on the Gulf of Mexico might make political sense for some but it does not make strategic sense for this Nation.

The distinguished Senator from Washington, Senator GORTON, in his remarks awhile ago in commenting on Senator BINGAMAN's statement said that Senator BINGAMAN tried to make a silk purse out of a sow's ear. That is a very engaging quote.

But I would submit that, excluding perhaps the base he refers to in his home area, a reference to pork might be very well taken. I would submit that the interest in this plan goes beyond our naval strategic interest.

I would like to quote some figures. The House Armed Services Committee has 45 members. Fourteen will be affected by this homeporting plan. The House Appropriations Committee has 56 members. Twenty-one members will be affected by what happens on homeporting. The House Appropriations Defense Subcommittee has 11 members. Six members will be affected by what happens on homeporting.

The Senate Armed Service Committee has 19 members. Only four will be affected. The Senate Appropriations Committee has 29 members and has a Defense Appropriations Subcommittee with 17 members, and out of those 17, 6 members will be affected.

I think Secretary Lehman's naval strategy is brilliant.

The admirals have favored this for a long time, and I do not doubt their sincerity. But I also know they are very interested in gaining political support for the Navy, and I do not blame them for that.

I hope the Senate will vote in favor of Senator BINGAMAN's amendment.

Mr. DENTON. Before the Senator quits, will he yield for a question?

Mr. GLENN. I yield.

Mr. DENTON. I consider the Senator's remarks relevant and sincere, and I would ask just to clarify. I want to ask a couple questions.

First, the Senator indicates he thought that Bremmerton was a good exercise in strategy.

Mr. GLENN. I would prefer to see us expand existing facilities that are cheaper and adequate to do the job.

Ships located in the proposed Everett port are much closer to open water and could not be bottled up. the same holds true for the proposed Staten Island port.

This is the reason I put these proposed ports in a slightly different category from the gulf ports.

Mr. DENTON. Does the Senator agree he is looking much toward the G-I-UK gap and not much toward the first possibility of having to engage, as the President has already indicated, the potential of the United States to engage in the Nicaraguan area if there were a quarantine or blockade similar to that which we put around Cuba in which case we, the United States, would be the one concerned with keeping open the gap in the Caribbean and gulf which alluded namely to the Yucatan Straits and Windward Passage, so on.

With three subs in Cuba, the Germans before we started escorting in World War II sank so many ships down there. As you know, we had something called Torpedo Alley in Guantanamo. You had a mass of ships on both sides. You will select a channel and see ships burning between Mobile and New Orleans. We did not have the escorts there.

We now intend to reinforce Europe if we have to. I mean that in deterrent sense, not in wartime sense.

In other words, if we are there, there is less likely the Soviets have the capability to get them out of there.

If we see that we do have, they are less likely to choose combat.

The same with Nicaragua, if they see we have the ability to steam directly there, we are focused there and not going to have to break through the windward gap or around Florida to get in. We can take care of the Yucatan Straits by the ships we have based there. That is the whole strategy and one of the reasons the Navy wants to do it.

I was where you are, I assure the Senator from Ohio, about 4 years ago, until I started contemplating the 60 percent reinforcement from the gulf to Europe how much we sacrificed in World War II not having escorts in the gulf and the situation in Central America having changed from where they were 4 or 5 years ago condemning us for what we did in Grenada. It would have been a threatening act on our part to, in that arc, focus ships towards that area.

They resented it politically. Now they have asked for help in Honduras, Costa Rica, El Salvador, against the ambition of Nicaragua, supported by Cuba and it becomes politically necessary. That is why I changed my mind, and I suggest that is logic.

Mr. GLENN. The situation today is very different from the situation during World War II. I trained out of Corpus Christi during World War II. I know what happened in the Gulf of Mexico. We used to be sent out on night missions down there. It is true that a lot of ships were sunk in that area.

But I would emphasize that there is a different situation today with our ability to monitor what goes through these channels and what is in the Gulf of Mexico.

I do not think that the situation today requires the protection we would need if we did not have the monitoring capability now that we did not have in World War II.

Regarding Nicaragua or protecting the Panama Canal, which should be a primary concern to us, if one looks at the distance from the Panama Canal to the Gulf of Mexico, and the distance from the Panama Canal to the east coast ports, they are almost identical. You swing an arc.

So the steaming time needed to protect the Panama Canal is going to be about the same out of the gulf as coming down from the ports in the Southeastern United States. It may be a few miles farther, but not enough to make the difference as to where we homeport.

We want to make sure that these additional ships are placed where they can do the job, where the choke points of the world are most accessible so that we can control those seaways in any future war.

To me, locking these ships up in the Gulf of Mexico is not only expensive, but a mistake strategically.

I urge support for the amendment of the distinguished Senator from New Mexico. He has done an excellent job and I am glad to support him in his efforts.

I yield the floor.

□ 2050

Mr. TRIBLE addressed the Chair.

The PRESIDING OFFICER (Mr. GORTON). The Senator from Virginia.

Mr. TRIBLE. Mr. President, I rise in support of this amendment. I have listened carefully to the debate over the last many hours. In truth, Mr. President, there are good arguments for homeporting and good arguments against homeporting. I have weighed those arguments over many months and find that the costs of this program are excessive and the strategic gain is minimal. Therefore, I support this amendment and oppose the implementation of this ambitious strategic homeporting plan.

During my 10 years in Congress, I have been a partisan of the Navy. I have supported efforts to build our naval forces and, indeed, have helped to shape the 600-ship Navy, first, as a member of the House Armed Services Committee, and now as a Member of the Senate.

However, my commitment to seapower as an indispensible element of our national strategy leads me to believe that this plan should not be adopted. The strategic homeporting plan to disperse surface ships among many ports adds little to our military capability and will cost our taxpayers billions and billions of dollars.

Simply stated, strategic homeporting would be an intolerably expensive addition to our defense budget.

Now let us talk about the cost and let me endeavor to summarize the arguments advanced in support of this amendment and to meet as persuasively as I can the arguments made against this amendment.

The Navy's estimated cost to the homeport proposal is very high, a minimum of $799 million. The General Accounting Office disputes the Navy's cost and suggests the price tag for additional homeports will be much, much higher. How much higher? No one really knows, but surely costs will be far greater.

However, it is apparent that this $800 million figure is unrealistically low. It excludes costs which are essential to establishing new ports. This $800 million does not—I repeat, does not—include such basics as military family housing, expanded ordnance storage, maintenance facilities. It does not include the additional costs for annual operations. Here, the costs are uncertain. But make no mistake, the costs will be considerable.

We have heard talk in the debate about choke points and the importance of deploying our fleet. In order to do that effectively in these new ports, the United States is going to have to acquire a capability we now lack, minesweeping capability. Right now we have a total of 21 minesweepers, all of which were built in the 1950's, all of which are simply inadequate to meet our present requirements.

If we add these homeports as envisioned by this strategic homeporting plan, we will have to add between 10 and 20 minesweepers to accommodate these new requirements. Each minesweeper costs a substantial amount of money, at least $100 million.

So, in computing the cost of this program, let us be mindful that many, many factors have been left out of the computation and an important element of our future ability to implement this plan is the ability to gain access to blue water and that will require an expanded minesweeping capability that will cost between $1 billion and $2 billion to acquire. Indeed this minesweeping force may not be obtainable at any price.

I would refer my colleagues to page 69 of the Defense Authorization Act report filed by the Armed Services Committee:

> . . . the committee is very concerned about serious shortcomings in this nation's mine countermeasures capability. Despite good faith efforts over several years to redress this deficiency, little progress has been made. Given the urgency of this situation, the committee now believes that unusual corrective measures are warranted.
>
> Rather than design a wholly new ship, with all the delay and risk that course would entail, the committee recommends the Secretary of the Navy be authorized to use up to $100 million . . . to acquire a European design capable of meeting our MSH mission. This initiative would add near-term minehunting capability to our fleet . . .
>
> The committee expects that follow-on ships of whatever design the Secretary selects will be built in quantity in the United States.

We do not have adequate minesweeping forces today. Indeed, that capability may well be unavailable for years. If available, it will cost between $1 billion and $2 billion.

Now let me make one final point, Mr. President. The Navy's numbers are bare bones figures. To expect that Senators from new homeport States will be content with this very austere program is to engage in political fantasy. If I was in their position, I would come back next year and the year after and the year after and demand more in terms of support for those naval forces. And that inevitably this Congress will appropriate more and more dollars to that task. We are talking about billions and billions and billions of dollars to implement this strategic homeporting plan.

At a time of unprecedented budget restraint, homeporting would be implemented at a cost of more ships, planes, ammunition, steaming time, training exercises and the other programs vital to our maritime strategy and supremacy. The moneys for new homeports will come from somewhere and they will be taken from things like hardware and readiness, or, indeed they will be taken from nondefense programs that are vitally important as well.

Now let us move beyond cost. Even if the costs of homeporting were not excessive, I believe the strategic arguments for this program are unpersuasive. The contributions of homeporting to our military capability will be, at best, minimal.

Truly, the Navy has yet to demonstrate that strategic homeporting will increase ship survivability and reduce the vulnerability of our surface fleets to attacks or mining operations. There has been woefully little debate thus far about strategy and tactics. I find that quite interesting.

One would have thought that the proponents of this program would have come forward and laid out the strategic basis on which this program is advanced. The only strategic argument we have heard thus far is, "Don't put all your eggs in one basket." Well, that has some persuasion. It is common sense that to the extent you can disperse your military assets, you are better off; you certainly complicate the task of your adversary. But that argument should not to be persuasive when we assess the real gain and recognize it is minimal, at best, and when we recognize that in order to implement this program it will cost billions and billions and billions of dollars.

The prior speaker has talked about strategy and tactics. He is really the first speaker to do so.

Well, ours is a forward deployed naval force. Our mission is to take the battle to the enemy and to fight our enemies nearer to their shores than our own. A third of our naval forces is at sea at all times.

What happens in a nuclear exchange? Obviously, in that scenario, all homeports are targeted and destroyed. That is not what we are talking about here. Rather what we are talking about is a conventional scenario.

And the Navy's reasoning and argument follows these lines: they believe that it is quite possible—and indeed this is supported by Soviet literature—that there could be a confrontation between the superpowers, a period of rising tensions and a conventional exchange.

□ 2100

Our naval brass argues that in that kind of scenario our naval forces would be more secure if dispersed and the job of our adversary more complicated in terms of mining, interdiction and the interception of our ships as they go to deep waters.

There is some credibility to that argument. But is that a likely scenario? I think not. Navy officials themselves have indicated that a conventional threat is relatively low. If the threat is

low, it is difficult for me to see the gain of dispersing this fleet. Certainly it is not compulsive.

In fact, I would suggest to my colleagues that dispersing our naval forces may very well reduce ship survivability. For example, these proposed new home ports are open commercial ports, and they freely welcome all the shipping in the world. Not so in Hampton Roads and San Diego. As a condition for maintaining a fleet presence in those ports we have closed our ports to Eastern bloc shipping because it represents a very clear danger to those naval forces.

I remember many years ago being petitioned by the chamber of commerce in Hampton Roads area saying no other ports have to live with that kind of limitation and loss of economic opportunities. Let us open it up, our port they argued. Well, Congressman BILL WHITEHURST, a senior member of the House Armed Services Committee and I received an in-depth Navy briefing on the threat posed by Eastern bloc shipping to our naval forces. It is a very real one. And that real threat will now exist in all these new home ports that are open to the commercial shipping of the Eastern bloc and the Soviet Union. Surveillance, sabotage, mining, and other risks will be imposed. Mr. President, strategic homeporting does not make our forces more secure; this program will make our naval ships and personnel more vulnerable.

Let me address one other argument.

It is argued that the dispersal of our naval forces will in some way aid our industrial base and add to our ship repair capability. This argument for strategic homeporting simply defies all logic. Existing home ports and private shipyards have more than adequate ship repair capability to meet the Navy's demands. There is no reason to increase ship repair capability in new home port areas when existing yards—like the outstanding shipyards in Hampton Roads—can meet those needs and need the work. Our industrial base will be maintained, Mr. President, by building more ships, not by spreading around an inadequate amount of work to additional shipyards.

Let me bring all of this to a close by simply saying that I cannot support the homeporting proposal. Not only is the cost of strategic homeporting unacceptably high, but it yields operational improvements of a marginal value. Our scarce and valuable taxpayer dollars should be spent for other more pressing national requirements.

I urge the adoption of this amendment.

Mr. PELL and Mr. GOLDWATER addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. Mr. President, I rise to support this amendment. I want to speak very, very briefly as to why.

Mr. President, tonight we have heard from Colonel GLENN, or Senator GLENN, a man who has been trained as a fighter pilot, as a fighter, as an officer by the Marine Corps. He knows what he is talking about. We have also heard from Senator DENTON, who is trained in military at the Naval Academy. He has had a distinguished war record of which we are all very proud.

So when I eliminate Senator GLENN, who is voting with me on this amendment, it is very difficult for me to stand up and oppose so many of my friends. I think of Senator WARNER, Senator CHAFEE, Senator STENNIS, one of my oldest friends in this body, and it is not easy to take this position. But it would be very difficult for me to live with my conscience if I voted any other way tonight.

A number of months ago I made the statement that this is one of the biggest political boondoggles I ever heard of. I used the word "boondoggle." It has been referred to tonight in some other way. But it all adds up to the same thing.

We have 13 States, Mr. President, that are indebted to the Secretary of the Navy. That is 26 votes for anything that the Secretary of the Navy happens to want. I think it was a brilliant political idea, probably one of the best that we are ever going to be confronted with while we are in the U.S. Senate. We have had the fact driven home to us that there has been no opposition from the Navy admirals. Who expects a Navy admiral to complain? Would an Air Force officer complain if this were an Air Force matter or an Army person complain if it were an Army matter? Lord knows what the Marines would do.

Mr. President, this whole thing to me is ludicrous. I think it is a terrific waste of money. I make this prediction. I will not be here to see if it is true or not because I will be out home, and I read the papers. This is going to cost over $10 billion before you are through fooling around with this homeporting. Somebody might say, "Why didn't you get a home port in Arizona?" [Laughter.]

I thought about it. But we would have to truck them quite a ways. [Laughter.]

Mr. NUNN. If the Senator will yield on that, we are going to try to arrange for the Navy's new tall ship to be stationed in Arizona. We hear you have a lot of wind there.

Mr. GOLDWATER. We have more wind than we know what to do with. In fact, we have a lot of dry air out there, and, in fact the trees chase the dogs. [Laughter.]

So, Mr. President, I am glad all of this debate and this argument and all of that is over. We have spent 5 hours on this helping 13 States, but in particular 2 States. I am particularly opposed in every way, strategy, economics, any way you want to look at it.

I yield the floor.

Mr. PELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, I rise in opposition to the amendment before us. In my view, the issue before the Senate is not one of funding nor of politics but one of maritime necessity. No one disputes that the $141 million contained in the defense bill for homeporting will benefit specific localities. Appropriations always help someone.

The important point, though, is that military experts are agreed that dispersing the fleet is a strategic necessity. Some have said that this concept was a fine idea for World War II but has no relevance for the nuclear age. I would say that just the opposite is true. If war should occur, nuclear escalation is possible but not inevitable. This terrible prospect is inversely related to our conventional capabilities and strategic options—the less able we are to fight at a conventional level, the more likely that nuclear escalation will occur. Strategic homeporting, as devised by Secretary Lehman, enhances our conventional posture and flexibility thereby raising the nuclear threshold. Thus no concept could be more relevant to the nuclear age than strategic homeporting. Moreover, in addition to increasing survivability, strategic homeporting will result in decreased sailing time in order to form battle groups, enhancing our flexible response and deterrence and allowing us to prosecute a war more effectively at the conventional level.

I am particularly pleased, Mr. President, to see that the Navy is making the very same arguments today about dispersing the fleet that my senior colleague (Mr. Pastore) and I made 13 years ago when the Navy regrettably, and wrongly, pulled out of the Northeast to concentrate its forces in the ports of Norfolk, Charleston, and Mayport.

I remember at that time 13 years ago making the argument that by withdrawing to southern ports the Navy was increasing the steaming time to the North Sea area from between 12 to 41 hours. Hours are critical at a time when a rapid response is necessary, and in any case a great deal of fuel is used.

I know when you follow on the Great Circle route going abroad, you can leave Washington, and an hour later I can look out of that airplane sometimes and see a point of land and my own house on it. We do not realize when you take the Great Circle route to Europe from Mayport, from Charleston, from Norfolk, or from

Rhode Island, that you are following the same line and the same route.

□ 2110

The steaming distance to Gibraltar, the best I can recall, was shown as 3,100 nautical miles from Rhode Island, while Norfolk, Charleston, and Mayport are, respectively, 197 nautical, miles 450 nautical miles, and in the case of Mayport, 602 nautical miles further.

Obviously, it makes sense that the fighting ships of our fleet should be where they can be in their positions and at their posts of duty and of patrol as quickly as they can. To do that means dispersing them.

What puzzles me a little bit is the thought that when Senator Pastore and I advanced this argument 13 years ago the Navy ignored it and said they were going to concentrate the fleet in Norfolk, Charleston and Mayport. Now they are making the very same sensible argument that we made at the time. I am very glad that they are. I congratulate Secretary Lehman on reversing the policy they had in 1972 when they pulled the floating Navy out from the very ports to which they are now intending to return them.

Now, 13 years later, the ports where the Navy concentrated its vessels are overcrowded and are virtually sinking under the weight of naval and military installations.

The Navy has finally and wisely embraced the identical arguments that Senator Pastore and I made against closing the northern ports in 1973.

Moreover, the last six men who served as Chief of Naval Operations have strongly endorsed the concept of strategic homeporting. This plan is a realistic investment and gives all an increase in national security.

I renew my congratulations to the Navy for making the same arguments we made 13 years ago. I wish they had followed them then. We would have avoided a great deal of expense and labor.

Mr. NUNN. Mr. President, I will not speak on this amendment, though I must say I share some of the sentiments expressed by my colleague from Arizona. I would like to point out partly in jest and partly serious that it has come to my attention this week that there have been several news articles saying that the Navy plans to build a new tall ship. I was making that comment about Arizona in jest. But nevertheless, it is serious that the Navy is planning on building a $20 million new tall sailing ship.

According to the article the goal of the Navy is to "dwarf the one used by the Navy's arch enemy, the Coast Guard."

I wonder when the Coast Guard got on the Navy's enemy list.

It seems to me that we have almost a joke here when we are talking about the Navy having something like $112 billion in cuts that they are going to take over the next 5 years from the 5-year defense plan, assuming a zero growth.

That may not be the right assumption, but if it is a 1 percent growth, it will still be in the $80 billion or $90 billion range. And here we are talking about building a tall ship.

I sat in the New York harbor on July 4 and enjoyed very much the parade of tall ships. I was proud of our Coast Guard ship, the *Eagle.*

I think it is not right for us to be talking in this kind of fiscal environment about building that kind of ship when we have every penny we can possibly get our hands on going to maintain the Navy's ships that they have already built.

I hope the reports are correct that the Secretary of Defense said no. I think he should say no.

I may or may not offer this amendment later on, but I would like to leave it here tonight and let my colleagues contemplate it. I may have an amendment saying:

No funds authorized to be appropriated by this or any other act may be used by the Navy for, first of all, planning, designing, or constructing a Navy ship primarily powered by wind; raising, refurbishing, or recommissioning the Monitor or the Merrimack or any replica thereof, or the Arizona; three, introducing biplanes as light attack bombers aboard Navy aircraft carriers; or, four, developing submarines made wholly or largely from wood products.

I hope the chairman will consider that because at a later time in the debate I may offer it.

Mr. GOLDWATER. I would like to be a cosponsor.

The PRESIDING OFFICER. Is there further debate?

Mr. WILSON. With all due respect to the wishes of my colleagues, Mr. President, and the fact that they have spent long hours filling the pages and the air with arguments, I think it is no oversimplification simply to point out the fact that this body has consistently, within recent years, supported the growth in the fleet, the building of the Navy, specifically by the addition of ships to its inventory. There is a certain logic that compels providing accommodations for those additional ships, or, to put it more simply, if you are going to add to the number of ships, you necessarily are compelled to add to the accommodations for their berthing.

Yes, you can defer maintenance, you can defer construction, you can, for a time, put off certain costs, but there is a cost in doing so.

I would suggest that what is being urged upon us here by the proponents of the amendment is just that kind of shortsighted, temporary cost-saving. Ultimately, we are going to have to do what the Secretary of the Navy has proposed. It will not be cheaper, I submit, if we delay and defer the inevitable act required to accommodate a 600-ship Navy or a 550-ship Navy. The point is, if we are going to add to that inventory, if we are going to try to rebuild that fleet, we are going to have to provide the necessary facilities to do so.

I think that the time has come to face that simple fact, not to defer the decision in favor of increased future costs but, rather, to get on with the business of homeporting now.

Mr. HEINZ. Mr. President, the debate over the Navy's homeporting plan comes down to two questions: What is the soundest basing strategy for our Navy, and how much are we willing to pay for it?

I support the Navy's strategic homeporting concept and oppose this amendment to divert money from the program.

Over the last 20 years the number of Navy homeports has dropped from 65 to 34. That number—34—sounds like a large number of ports, but that is misleading. Many of these ports are small, shallow draft or very specialized in purpose. In fact, there are currently only seven deep draft ports. These are the ones capable of homeporting a battleship or carriers battle group. Under the proposed Navy plan, the number of deep draft ports would be increased by five, or almost doubled. Significantly increasing the number of deep draft ports—as proposed by the Navy and the SASC—is strategically important to the Navy's essential role in our overall national defense effort.

Mr. President, let me provide some brief background on this issue.

Congress has agreed with the Navy that we need a 600-ship force to meet our commitments around the globe. In 1980, our Navy had 479 ships. Under the expansion program, we expect to have 609 ships by 1992. Without additional homeports, our growing naval fleet will be restricted to more crowded bases. Absent additional homeports, the fleet's deployment will become concentrated in a few areas of the country.

Today, 43 percent of the Navy's ships, are based in just two ports, San Diego and Norfolk. Seventy percent of our naval forces are situated in just seven homeports. We will add five battle groups to the Navy in the next decade, two groups centered around aircraft carriers and three headed by battleships. Without additional homeports, all that additional combat power would be concentrated in existing ports that already serve as the bases for our more than 500 ships.

Under such circumstances, the successful blockade, mining, or submarine interdiction of our forces would be a potentially feasible, even inevitable, strategy.

Mr. President, concentrating our fleet's basing is a fundamental violation of basic military strategy. Such basing creates a vulnerability that threatens the massive investment we are making in our naval program. Ironically, this is a vulnerability that we have always counted as a problem for the Soviet Union. One of the principal disadvantages suffered by the Soviet Navy is the small number of vulnerable ports at which its fleet is based—at a few bases in the Soviet Far East, on the Arctic Coast, and in the Black Sea. All of these locations suffer from limited access, and our key advantage lies in our ability to concentrate our offensive activities—surface air and subsurface—against these few spots in time of war.

The other advantages to the dispersal plan are the greater geographical flexibility and the expanded logistics support it gives our fleet. Today the U.S. Navy has no active combat surface ships based north of San Francisco, CA, on the west coast, or north of Norfolk, VA, on the east coast. We have no significant combat presence in the Gulf of Mexico at all.

Spreading our fleet strengthens our industrial support base. By spreading maintenance work to more contractors, we get improved competition in peace and a better support capacity in war.

Basing ships in more ports also better integrates our reserve personnel into the active fleet. Philadelphia, in my home State of Pennsylvania, while not at this time a part of the new homeport initiative, has already benefited from the wider basing of Navy ships. Philadelphia is the homeport for four reserve Perry-class frigates. This greater contact between the Navy and the society that it protects is good for the Navy and good for the American people.

Mr. President, it is clear that the Navy's strategy is sound. The second question is what are we willing to pay to provide greater protection to the ships and men in our Navy.

There are disputes about the precise costs of the Strategic Homeporting Program. According to Navy estimates, which have been verified by an outside accounting firm, the cost in military construction funds for the Navy's homeporting program is $799 million. To base the new ships we are building in existing ports, we would have to spend some $629 million. The net capital cost of our dispersal plan is $217 million. Additional operating costs are estimated to be from $35 to $50 million, out of a Navy operations budget of $25.5 billion.

Critics claim that the cost estimates do not include housing for families and other support items. But we will have to provide these facilities in any case, whether the new ships are based in new or old ports. And some of the existing ports, such as San Diego and Norfolk, have housing shortages or prices that are out of sight. So basing our new battlegroups in other areas could actually present savings when all factors are taken into accout.

But the central question is whether the additional expenditure of $217 million even if it is not offset by savings elsewhere, is justified by the numerous strategic benefits I have described. I believe it is justified. I believe we should exploit our geographical advantages to enhance and protect our naval power. I urge my colleagues to join me in opposing the amendment.

● Mr. HATFIELD. Mr. President, by 1992, the U.S. Navy fleet will include more than 600 ships. I am not an advocate of that expansion, Mr. President, and have consistently opposed appropriations for it. But the decision has been made and those of us on both sides of that issue must come together to ready our strategy and facilities to accommodate the additional ships. It simply makes no sense for this Congress to allocate funds for fleet expansion and then ignore the needs it will create.

Mr. President, I support the Navy's strategic homeporting plan. I support it because it will enhance the strategic value of our expanding fleet, and because it is cost effective.

By dispersing the Navy fleet to strategic geographic areas, our responsiveness is made more flexible and more effective. Such strategy holds true regardless of the fleet size—200 years ago, John Adams advised that we "disperse the frigates". Each strategic homeport in the plan we are now considering was chosen carefully to provide the best coverage of our various flanks. The strategic homeports will also insure the integrity of fully constituted battlegroups, providing for immediate response to crisis. Finally, the dispersal will complicate enemy targeting.

Despite the compelling strategic rationale for this plan, I would be hesitant to support it if it were fiscally irresponsible. It is not—indeed the Navy has agreed to lock the cost of the plan at $799 million. Take from that the cost which would be required to expand existing homeports to accommodate the growth in the Navy fleet—$629 million—and we are talking about a net cost of approximately $170 million. For less than the cost of a single ship, we can enhance deterrence and improve our strategic posture. In addition, increased competition will mean that the long-term effect of strategic homeporting will be increased revenue in the homeport areas. That strikes me as a pretty good deal.

I would like to make a final point in opposition to the amendment we are considering. Not only does the amendment take money away from a worthwhile project, but it also puts up a smokescreen, blurring our vision of the issue before us. Whether or not the Navy needs additional munitions funding is not the issue. The issue, Mr. President, is strategic homeporting.

The strategic homeporting plan included in the fiscal year 1987 Department of Defense authorization bill is a sensible response to a demonstrated need. I urge my colleagues to vote against the amendment now before us.●

Mr. WARNER. Mr. President, I support the Navy's strategic homeporting policy.

While I have received some criticism of my support for strategic homeporting from some of those within my State who believe that the Port of Norfolk might be adversely affected, I have taken a position which I believe is in the best interests of the national security of our Nation.

I ask unanimous consent that a Dear Colleague letter prepared by myself and another former Secretary of Navy, the distinguished Senator from Rhode Island, Mr. CHAFEE, be printed in the RECORD. Senator CHAFEE and I have expressed our views on strategic homeporting in this letter sent to each Senator today.

I also ask unanimous consent that a recent article by the new Chief of Naval Operations, Adm. Carl Trost, which appears in the most recent edition of the Reserve Officer's Association National Security Report also be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
*Washington, DC, August 5, 1986.*

DEAR COLLEAGUE: Much has been said and written recently regarding the Navy's plans to disperse the projected 600 ship Navy among a greater number of port facilities located in the United States. These plans envision adding homeport facilities in New York, Washington, and the Gulf Coast. We desire to share with you the reasons why we were persuaded to support this fleet dispersal program.

Our decision on this issue is predicated upon national security considerations, as confirmed by the best professional judgement available; namely, the present and former Chiefs of Naval Operations.

When the DoD recommendation first came to the Senate, Senator Warner, concerned by the added costs associated with new ports, initiated hearings and specifically directed that former Chiefs of Naval Operations be urged to testify or provide the Armed Services Committee with their views.

Four former Chiefs of Naval Operations, along with the current Chairman of the Joint Chiefs of Staff, Admiral Crowe, joined the present Chief, Admiral Trost, in providing their unequivocal judgments that the plan was in the strategic interests of our national defense policy (only one chief dissented).

An important part of their reasoning was predicated on the changing tactics of Soviet ASW forces, the ever-increasing overall size of Soviet Naval forces and their operational

areas, and the growing importance of U.S. military presence in the Southern hemisphere, along with the need to shorten the steaming hours of our fleet units from U.S. ports to those areas.

The Secretaries of Defense and Navy, in accepting this military judgment, decided an allocation of resources in support of this program is a high priority. These arguments make sense to us.

We therefore urge you to support the legislation to disperse our growing fleet.

Sincerely,

JOHN H. CHAFEE,
JOHN W. WARNER.

---

STRATEGIC HOMEPORTING IS A NECESSITY

(By Adm. C.A.H. Trost, USN)

In recent weeks the idea of strategic homeporting—and the budgetary authorizations that would permit this idea to be implemented at several key locations in the country—have been vigorously debated in the Congress. The sailing has not been altogether smooth. Serious charges have been made that strategic homeporting is a political agenda, and that in an era of fiscal austerity the country cannot afford a Navy pork barrel.

The issue is not about politics but about maritime strategy. No one disputes that the additional moneys required to disperse the operating bases of our fleet and broaden the industrial bases that support our fleet will benefit specific localities and interests. Appropriations always help someone.

But what the current debate needs to reaffirm is that money required to implement strategic homeporting—about $200 million over and above the costs required to base ships at locations already in service—is a wise investment that will give all of us a significant increase in national security as a result. Strategic homeporting is a professional question of vital and immediate interest to our country.

Strategic homeporting has its roots in the current growth and modernization of our Navy. The Navy is undergoing, at considerable expense, a much needed modernization to restore its strength—strength depleted in the years after Vietnam—to enable it not only to compete with any potential adversary but to prevail in an armed conflict.

As a vital and integral component of our national defense, the Navy's modernization is part of the larger recovery of strength that has already had such an important effect on America's position in the world. Our nation has seen the results from this effort, most recently in the Mediterranean.

The key element of this modernization is the expansion of the fleet to 600 ships. This is not a "magic number," but a reasonable level of offensive and defensive naval power required to support our national maritime strategy. Congress has approved the building of the ships required to meet his national goal. In a nutshell, strategic homeporting answers this question, "Where shall we put them?"

At present our Navy numbers 555 ships stationed in 34 ports, both at home and overseas. Of these ships, 53 percent are concentrated in two ports, Norfolk and San Diego. These are vital naval bases.

The fiscal year 1986 Appropriations Act provided money to start building a battleship battlegroup support complex at Staten Island, N.Y., and money to buy land for a carrier battlegroup support complex at Everett, WA. These were among the first actions under the strategic homeporting concept. In addition, money will be requested to open bases on the Gulf Coast for the ships of a Carrier Battlegroup in Pensacola, Pascagoula and Mobile and for ships of a Battleship Surface Action Group in Corpus Christi and Galveston.

After some ups and downs, the follow-on appropriation for fiscal year 1987 was rejected by the House as too expensive. Further debate in both chambers will be scheduled, and it is safe to say that the merits of strategic homeporting will be examined closely in the future as we try to incorporate this idea into the national consensus about our defense posture. Strategic homeporting must not die an untimely death.

Why?

The reasons are relatively simple, and again, they transcend politics.

First, we need to reduce our present strategic vulnerability. All of us recognize the mistake we made just before the Pearl Harbor attack when we allowed our airplanes to be parked "wingtip to wingtip" at Hickam Field and other key installations in the area. That same thought was foremost in the mind of President Kennedy in the opening hours of the Cuban Missile Crisis when he gave sweeping preemptory orders for a strategic dispersal.

Today the problem has recurred, but with ships instead of airplanes. Acting out of a worthy concern for reducing costs, a previous administration shortly after the Vietnam conflict cut our number of bases nearly in half. Very simply, we now have too many ships stationed in too few ports. Dispersal of forces to maximize survivability and to compound a potential enemy's containment problem is a basic tenet of military planning. The strategic homeporting concept supports this tenet.

The Soviet Navy with its numerous submarines, minelayers, and cruise-missile platforms could make it very difficult for us to sortie in accordance with our war plans if the need should arise. The idea of being "bottled up in harbor" is not at all farfetched.

Second, we need to broaden in the industrial base that supports our fleet. This is absolutely necessary. It is also equitable. The number of shipyards capable of performing effective overhauls on our complex ships is dwindling at an alarming rate. Now contrast that situation with the desperate days of World War II when an industrial base saturated with work orders was capable of producing the "100 day destroyer" when "Rosie the Riveter" was hard at work at literally hundreds of facilities around the country; and you will see how serious the problem has become.

The Navy—and the entire maritime industry—depends on a healthy and well-developed shipbuilding and repair industry to provide new ships and maintain existing ones. This industry must be broadly based and have the depth required to reach wartime production levels if necessary. Dispersing our fleet units also spreads the opportunity to perform repairs, and therefore encourages the sustainment of this vital industry.

All of us Americans, through our tax dollars, support the ships and the men. It is only fair that our support base be extended to a broader cross-section of the populace as well.

Third, we need to station our ships where the action is. The Navy traditionally has provided the first response to crisis spots throughout the world, and often if needed "on station" now. In a crisis, battle group units may have to sortie on short notice to protect our sea lines of communication. For example, few Americans realize that 55 per cent of the petroleum bound for the US must now transit the Caribbean.

The Caribbean states also provide 75 per cent of our nation's aluminum requirements. In addition, 44 per cent of our foreign trade exports pass through the Caribbean. During World War II, over 50 per cent of the supplies and reinforcements bound for Europe and Africa passed through ports in the Gulf of Mexico. Today, significant numbers of NATO reinforcements and a large percentage of resupply material would originate at these same Gulf ports.

Having a number of ships nearby, available in war and counterpoised in peace, just makes sense. In the northwest, the oil routes between Alaska and the continental US are almost completely unprotected. A carrier battle group stationed in Puget Sound would provide an immediate option to our President and Secretary of Defense if Alaskan oil or other critical national assets in that area should be threatened.

A similar case can be made for the easy accessibility of northeast ports to the vital sea lanes to Northern Europe. Strategic homeporting provides us tremendous flexibility and will save us precious days and hours if we should ever need them.

Fourth, our present facilities will be overloaded if we do not open new homeports. Six hundred ships could certainly fit in our present ports. But many would have to anchor out or be nested together, their crews would have to stay on board in three-section duty while their engineering plants were steamed and the opportunities to shut down equipment for proper maintenance would be extraordinarily reduced. Adequate pier space is not available.

The modern facilities required for power, water, and sewage—in a world of complex ships that do not damage the environment—are inadequate. Strategic homeporting will allow us to provide proper basing at an affordable cost with clear cut strategic and operational advantages.

Finally, we need to disperse our ships, and our natural features permit us to disperse them. Our long seacoast and warm-water harbors are essential features of our geography which give us an enormous strategic advantage over the Soviet Union. For us not to exploit our advantage would be to yield up, for a small savings, a factor that might prove decisive either in deterring war with the Soviet Union or, if necessary, in producing a favorable outcome.

Strategic homeporting is an idea from the past whose time must come again, and must come now. It is the most inexpensive insurance that we can pay for the security of the fleet and our nation.

Mr. PACKWOOD. Mr. President, I rise in opposition to the amendment offered by Senator BINGAMAN to delete funding for the Navy's strategic homeporting proposal. Mr. President, I support the Navy's homeport proposal, particularly in light of the recent announcement that Oregon shipyards will be included within the Puget Sound homeport district, and will now be eligible to bid—on an equal basis with Puget Sound shipyards—on short-term Navy contracts both current and future. This will provide great benefits to Oregon shipyards both in the near and long term, and it

makes sense strategically as well. I urge my colleagues to oppose the Bingaman amendment and support the Navy's homeport proposal.

Mr. BINGAMAN. Mr. President, I believe everybody who wants to has spoken on this issue. I will not repeat the arguments. I will urge my colleagues to support the amendment to transfer these funds over for the use of Navy munitions. I would suggest the Senate is ready for a vote on this issue.

The PRESIDING OFFICER. Is there further debate?

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I want to make one or two points before we vote.

Cost has been referred to. I want to remind the Members of the Senate that we are going to get the ships and they have to be put somewhere. If you put them into existing ports, it will cost $629 million. You have to provide that under any conditions.

If you put some of these ships into new ports, the total cost is $846 million, but they will be dispersed, where they will be much safer.

The difference is $217 million over 5 years. We think it is worth $217 million to assure that those ships and the places where they will be dispersed will not be subject to a Pearl Harbor attack. You know what happened at Pearl Harbor. Everybody remembers what happened at Pearl Harbor, those living at that time. Our entire Navy was practically destroyed out there. We do not want that to happen if we have another war.

Or from a terrorist standpoint, a missile could be sent in or a terrorist could use other means to destroy these ships.

From the strategic standpoint, and that is the main point we have made here, the cost is very little more, but from a strategic standpoint, we think it is exceedingly important. The Secretary of Defense recommended this. The Secretary of Defense is over the Army, the Navy, and the Air Force, but he recommended this for the Navy. He thought it was right.

The Secretary of the Navy said, "If reductions must be made in the budget we submitted, strategic homeporting is at the top of our list of programs that should remain intact."

That is the top Navy man in the United States.

Mr. President, I want to say further that, of course, these admirals would go along. Well, maybe those in service may have some inclination to possibly do that. However, it is difficult for me to think that Admiral Crowe, the Chairman of the Joint Chiefs of Staff, would go along. After this service he will retire. Admiral Crowe is strong for this program. He thinks it is for the best interests of the security of our Navy and of this Nation.

□ 2120

We shall leave out Admiral Trost, present Chief of Naval Operations or we shall leave out Adm. Jim Watkins, former Chief of Naval Operations, both of whom favor this program. Let us go to some others.

Admiral Zumwalt is a former Chief of Naval Operations. He strongly favors this program. Admiral Holloway is a former Chief of Naval Operations.

The are not under the gun. They have retired. They have no ax to grind. They are merely giving opinions to this country as to what they think is best for our national defense.

Adm. Ron Hays, Commander in Chief in the Pacific, and several other CINC commanders are strong for this program.

Here is another former Commander in Chief who is retired, Admiral Foley. He thinks we ought to have this program. He said:

> With regard to the priorities of the homeporting initiative and in relation to other national security programs, I believe this requirement is important enough to be funded even in this period of a lean budget.

Even when he knows they have to cut defense, he says he knows that has to be done.

Admiral Long is a former CINC. He is retired. He has no ax to grind. These are patriotic, devoted Americans who have given their lives to serving their country. They are merely trying to advise us now as to what is best to preserve the ships that we are going to build.

These ships are going to cost a lot of money. To destroy one ship would cost twice as much as this program will cost.

In closing, I just want to say the Senate should think carefully about this matter. The subcommittee put it in the program; the full committee put it in the program. It is in the bill now. We think it ought to stay in the bill. And I hope the amendment will be defeated.

The PRESIDING OFFICER. Is there further debate?

If not, the question is on agreeing to the amendment of the Senator from New Mexico [Mr. BINGAMAN]. The yeas and nays have been ordered.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT], is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 34, nays 65, as follows:

[Rollcall Vote No. 181 Leg.]

YEAS—34

NOT VOTING—1

Laxalt

So the amendment (No. 2571) was rejected.

□ 2140

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BENTSEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

AMENDMENT NO. 2587

(Purpose: To provide community planning assistance for gulf coast homeport sites)

Mr. BENTSEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

Mr. NUNN. Mr. President, may we have order in the Senate, please?

The PRESIDING OFFICER. The Senate will be in order.

Mr. GOLDWATER. Mr. President, in the interest of Senators present——

The PRESIDING OFFICER. Will the Senator desist for a moment, so that we can restore order in the Chamber?

The Senate is not in order. We will not proceed until we have restored order in the Chamber. Senators are asked to take their seats.

There are two amendments pending before the Senate. We cannot proceed to other business until those amendments are decided.

Mr. BENTSEN. Mr. President, I ask unanimous consent that the two amendments be temporarily set aside.

Mr. GOLDWATER. I had not finished my statement. Will the Senator yield?

Mr. BENTSEN. I yield.

Mr. GOLDWATER. I want to announce to the Senate that it is not our intention to go much past the hour of 11, but we would like to get as many amendments disposed of by then as we can.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. BENTSEN. Mr. President, I ask unanimous consent that the two amendments be set aside temporarily, for the consideration of my amendment, which I think has been cleared by both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The bill clerk read as follows:

The Senator from Texas [Mr. BENTSEN] proposes an amendment numbered 2587.

Mr. BENTSEN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate point in the bill, add a new section as follows:

SEC. . Community Planning Assistance.

The Secretary of Defense may use funds appropriated to the Department of Defense for fiscal year 1987 to provide planning assistance to local communities if the Secretary determines that the financial resources available to the community (by grant or otherwise) are inadequate. The Secretary may use such funds to assist communities located near homeports proposed under the Naval Strategic Dispersal Program at Ingleside, Texas and other Gulf Coast sites. For fiscal year 1987, not to exceed $200,000 may be used for this purpose at Gulf Coast sites.

Mr. BENTSEN. Mr. President, let me state first that this amendment adds no additional funds. It merely earmarks some funds already in being, and in this atmosphere I am almost embarrassed to have so few digits in it.

We are talking about a maximum of $200,000, and it deals with community planning assistance for the gulf coast homeport sites.

□ 2150

I have discussed that with the manager for the majority and manager for the minority. Let me explain briefly the rationale for this amendment.

Mr. President, the Navy's Strategic Homeport Program may be controversial in this city, but it is welcomed as sensible in much of the rest of the country, particularly in cities like Corpus Christi and Galveston/Houston, TX, as well as elsewhere along the gulf coast.

One reason for the selection of the two Texas cities was the strong community support for the homeports, backed up by a special appropriation by the Texas Legislature. The people of Texas wanted the increased Navy presence, and they were willing to pay their fair share of the startup costs.

It is a complex task, however, to plan for an influx of over 5,000 additional military personnel and their dependents, such as will occur in Texas. Roads, housing, schools, water and sewer lines must all be planned for and coordinated with the military construction and deployment schedules. The necessary analysis and planning can overwhelm all but the largest cities, so special help is needed.

The Defense Department has a special Office of Economic Adjustment to assist local communities in planning for the growth which strategic homeporting brings. That office has a fine record of smoothing the transition with advice, coordination, and planning funds. One of its major efforts in recent years, for example, was to help in the planning for the new Trident base at Kings Bay, GA.

Now the planning is beginning for gulf coast homporting. In Corpus Christi, the required environmental impact statement has been drafted and the local community has set up a planning staff. The Office of Economic Adjustment has even provided some initial seed money to get the process started. Much more needs to be done, however, and the legal situation has to be clarified by specific authorizing language.

After the budget was released last February, I wrote to Defense Secretary Weinberger expressing concern that no specific request was included for community impact planning assistance for gulf coast homeport sites. I advised the Secretary of my intention to offer legislation to guarantee that local communities get the planning assistance they need to make homeporting a success.

On March 14, Secretary Weinberger responded to me and noted that additional legislation would be needed to give specific authorization for community planning assistance for the gulf coast. Accordingly, I am proposing an amendment to provide that authorization so that the planning efforts already begun can continue.

This amendment would earmark available funds, not add additional funds, for community planning assistance for gulf coast homeport sites. It provides a maximum of $200,000, which I am advised should be sufficient for the forthcoming year.

Although Congress has not yet given formal approval to construction projects connected with gulf coast homeporting, it is essential that community planning be done now in order to permit the phasing of local efforts with those of the Navy. Congress has permitted this advance planning before, twice in the case of the MX missile.

Mr. President, I recognize that this is a comparatively small sum of money in this bill. But it is important that the legal authority for planning be clear, and that local communities have the resources to plan wisely for the influx of major military facilities.

Mr. GOLDWATER. Mr. President, we discussed it and we have no objection on this side.

Mr. NUNN. Mr. President, first may we have order?

The PRESIDIING OFFICER. The Chair has been striving to restore order in this Chamber. The Senate is asked to be in order.

The Senator from Texas continues to enjoy the floor.

Mr. NUNN. Will the Senator from Texas yield the floor for a statement?

Mr. BENTSEN. I yield to the manager of the bill.

Mr. NUNN. These are necessary community impact funds that correspond to the homeporting vote that was just taken.

We support this amendment.

Mr. THURMOND. Mr. President, we have done this in other similar instances and I think it is fair to do it here.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Texas [Mr. BENTSEN].

The amendment (No. 2587) was agreed to.

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Maine.

AMENDMENT NO. 2275

(Purpose: To increase funds for hazardous waste cleanup and make offsetting reductions in other accounts)

Mr. MITCHELL. Mr. President, I have an amendment at the desk, No. 2275. I ask that it be called up.

The PRESIDING OFFICER. Is there objection to setting aside the two pending amendments? If not, it is so ordered.

The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Maine [Mr. MITCHELL] for himself, Mr. COHEN and Mr. KASTEN proposes an amendment numbered 2275.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 20, line 1, strike out "$20,664,070,000" and insert in lieu thereof "$20,657,270,000".

On page 20, line 2, strike out "$24,275,960,000" and insert in lieu thereof "$24,269,169,000".

On page 20, line 4, strike out "$19,418,371,000" and insert in lieu thereof "$19,411,671,000".

On page 20, line 17, strike out "$370,600,000" and insert in lieu thereof "$385,900,000".

On page 276, line 6, strike out "$16,400,000" and insert in lieu thereof "$21,400,000".

Mr. MITCHELL. Mr. President, this amendment, offered by Senator COHEN and myself, and I believe it is acceptable to both sides as well, deals with a serious problem of hazardous waste generated by military facilities around the country.

It will restore $15.3 million to the Defense Department's environmental restoration funds and $5 million for the construction of hazardous waste storage facilities, simply bringing these two programs back to the funding levels requested by the President.

Mr. President, this amendment, No. 2275, offered by Senator COHEN and myself, addresses the serious problem of hazardous wastes generated by military facilities around the country.

The Defense Department is one of the largest generators of hazardous waste in the United States. In 1984 333 DOD installations produced more than 530,000 tons of hazardous waste. Unfortunately, much of this waste was disposed of in ways that have created health and environmental hazards. Billions of gallons of dangerous chemicals have been improperly dumped, resulting in leaks that have contaminated the soil and ground water supplies in virtually every State in the Union. Forty-four Defense Department sites have been proposed for inclusion on the Environmental Protection Agency's list of the worst hazardous waste sites in the Nation.

In my own State of Maine, an airbase has discarded 800 gallons of highly toxic PCB in an unprotected rural dump. Another installation chose as its hazardous waste site a location only a short distance from wells that provided some of the drinking water for a neighboring town. A subsequent investigation revealed that officers at the base were aware of the problem but did not inform town officials until the EPA listed the site as among the worst of the Nation's known hazardous waste sites.

A naval shipyard in Maine has compiled a list of unsound and unsafe practices, including: The storage of waste without proper manifests; a failure to analyze wastes to determine how to dispose of them safely; the misidentification of toxic waste solvents as nonhazardous waste oil; open hazardous waste containers; mislabeled and misdated containers; the expansion of hazardous waste storage facilities without a license; and the disposal of lead-acid sludge down a common floor drain.

In citing these problems, I do not mean to single out Maine's military installations for special criticism. In fact, Maine enjoys unusually cordial relations with our military bases around the State, and Maine is proud to serve as the home for some of America's finest service men and women.

Instead, I display our dirty linen solely to point out how extensive the problem of improper hazardous waste disposal has become. Maine has its difficulties in this regard, but so do each of our States. Military site cleanup is an issue that affects every one of the Senators in this Chamber. DOD has identified almost 3,000 potential problem sites at defense installations across the United States, and it has not yet finished compiling its list. Pentagon officials have thoroughly investigated 1,000 of these sites and have found that nearly half require major restoration activities.

Unfortunately, unsafe disposal practices represent only part of the problem. To make matters worse, some military facilities have been reluctant to remit the fees that all other generators of hazardous waste pay into State hazardous waste cleanup funds. If I may return to Maine's experience, the unpaid fees for one installation alone now total nearly $358,000. That is a lot of money to a fund that has never totaled more than $600,000 since its inception.

In addition, many installations routinely fail to pay the penalties that the States assess for illegal disposal practices. These unpaid penalties represent a sizable loss to the hazardous waste funds of the various States. Of course, the individual taxpayer in the State must then make up the deficit.

I do not wish to suggest that the Pentagon is either oblivious to this situation, or unmindful of its responsibilities to address past failures and to prevent future hazards. To the contrary, the Defense Department has an active program to deal with the problems I have just outlined.

For instance, the Environmental Restoration Fund is a Pentagon program whose mission is to identify, survey, and clean up hazardous and toxic waste, unexploded ordnance, and unsafe and unsightly buildings, structures, and other debris. Another DOD program, located within the Defense Logistics Agency, has as its principal mission the construction of storage facilities that conform to Federal, State, and local laws and regulations for the disposal of hazardous waste. The Pentagon has budgeted $90 million over the next 3 years for this program, in an effort to relieve some of the backlog of problems I have already mentioned.

So the problem is not a lack of will on the part of the Pentagon; the problem is a lack of resources. That is where our amendment seeks to help.

As part of DOD's program to address the problem of military generated hazardous waste, the President in his fiscal year 1987 request asked for $385.9 million for the Defense Department's Environmental Restoration Fund and $21.4 million for the construction of hazardous waste storage facilities for the Pentagon. Unfortunately, the President's request for the Environmental Restoration Fund was reduced by $15.3 million, leaving this program with $8.5 million less than this year's appropriation. Similarly, the President's request for $21.4 million for construction of the storage facilities was decreased by $5 million, a 23.4-percent reduction.

Given the gravity of the hazardous waste situation confronting us, we believe that reductions in these programs are penny wise and pound foolish. Our failure now to fund these cleanup programs adequately will inevitably increase both future cleanup costs and, more importantly, the health and environmental dangers associated with improper handling of hazardous wastes.

Our amendment proposes to reinstate the $20.3 million cut from the President's request for these two programs. Five million dollars will be allotted for the construction of DOD hazardous waste storage facilities, while $15.3 million will be returned to the Environmental Restoration Fund.

None of this $20.3 million, I hasten to add, will be specifically targeted for Maine or any other State. Instead, the money will be spent according to priorities and plans set by the Pentagon. Nor will these additional funds relieve DOD of the necessity of securing all proper Federal, State, and local preconstruction permits as required by the Resource Recovery Act and other applicable statutes.

To offset this $20.3 million that we wish to put back into the cleanup effort, we intend to reduce the Operation and Maintenance accounts of the Army, Navy, and Air Force by an identical $20.3 million. Under the terms of our amendment, Army O&M will lose $6.8 million out of a total O&M budget of $20.7 billion—a cut of less than 1/30th of 1 percent. Navy O&M will lose $6.8 million out of $24.3 billion, a cut of less than 1/35th of 1 percent, while Air Force O&M will lose $6.7 million out of $19.4 billion a cut of 1/29th of 1 percent. Obviously, these reductions are minuscule compared to the proposed cuts in the cleanup funds.

Furthermore, in an effort to make these O&M cuts as painless as possible for the services, we are not stipulating which specific programs the reduc-

tions should come from. We leave this to the discretion of the Pentagon.

This is not an antidefense amendment. It is prodefense, because it is designed to enable our military better to carry out its designated missions. Allow me to read from an assessment drawn up in the Pentagon:

> Current inadequate storage conditions may subject installation commanders * * * to notices of violations and threats of fines and personal liability, as well as other legal action. * * * The problem is escalating as * * * regulators * * * become disenchanted with DOD's failure to respond affirmatively to longstanding environmental laws * * * Unless DOD now begins to exhibit a more substantial effort to conform, States may (some already have) withdraw existing temporary authority to transport and store hazardous waste generations. * * * This will have major adverse impacts on DOD's readiness mission.

This amendment to restore funding to levels proposed by the President will make a small dent in the hazardous waste problems facing all 50 States. But by reinstating the full figure the President requested, we will be alerting the Pentagon of our concerns on this matter and making a statement about the importance we attach to a clean and safe environment. I urge Senators to demonstrate their concern for these issues by supporting this amendment.

Mr. COHEN. Mr. President, I join my colleague in offering this amendment.

We have a serious problem in hazardous waste disposal throughout the country.

This does, as Senator MITCHELL indicated, simply restore the funding level requested by the President and the Department of Defense.

I hope the amendment will be accepted.

Mr. President, the amendment I am jointly offering with my colleague from Maine simply restores to the levels requested by the President the funding for the Department of Defense hazardous waste cleanup programs. It is crucial that DOD participate in the on-going nationwide cleanup of hazardous waste sites, and I believe it is important that we provide the Department with adequate funding to carry out this mission.

The amendment at the desk will add $15.3 million to DOD's environmental restoration fund and $5 million for the construction of hazardous waste storage facilities. The funding will be taken from the Operations and Maintenance accounts for the Army, Navy and Air Force, a cut of about three-hundredths of 1 percent. We have not directed the services to make specific cuts within their O&M accounts, but rather leave it to their discretion, so that the reductions will be as painless as possible.

Mr. President, the Department of Defense is one of this Nation's largest producers of toxic waste, yet its record at meeting State and Federal environmental protection laws is deplorable. This fact has become quite obvious to citizens in Maine, where each of the defense installations in the State has been found to be in violation of Maine's waste disposal laws, to the detriment of the health and safety of nearby residents. In fact, one site in northern Maine, the result of inadequate dumping techniques, has recently been cleaned up with the help of Superfund money, and another is on the Environmental Protection Agency's list of this Nation's worst known hazardous waste sites. I suspect that this is only the tip of the iceberg.

A recent report by the General Accounting Office indicated that the Defense Department generated over 530,000 tons of hazardous waste in 1984, but its information collection system is so faulty that it does not know how many installations might be in violation of the law.

The Defense Department itself admits that the problem of defense waste is a large one which demands attention. In a report to the Department's inspector general, it was found that:

First, hazardous waste programs are fragmented and ineffective.

Second, there are inadequate hazardous waste storage facilities at most military bases.

Third, DOD's management of hazardous waste storage is unsatisfactory.

Fourth, cleanup costs are escalating more rapidly than money is made available to meet them.

Without adequate storage facilities, the DOD tends to look for the easy way out, finding "hidden" dump sites or storing the waste inadequately for an indefinite period of time. It is, therefore, essential that funds for the construction of storage facilities not be reduced just at the moment that DOD has begun to recognize its responsibility to act according to the law. The administration requested $21.4 million for such construction, and our amendment will ensure that this amount is authorized by adding $5 million to the committee's authorization level.

The bulk of the funds in our amendment, $15.3 million, is earmarked for the Department's environmental restoration account, which pays for the cleanup of military hazardous waste funds. A portion of this account will also go toward hazardous waste reduction, recycling and reuse efforts. The administration request for this account was $385.9 million, but the bill before us reduces that request by $15.3 million, leaving the program with $8.5 million less than last year.

It is quite clear to me that this is an extremely serious issue which deserves our immediate attention. In light of our recent hard work on the issue of safe civilian hazardous waste disposal and cleanup, I think that to cut these defense waste cleanup accounts at this time will leave a gaping hole in our effort to ensure a clean environment for ourselves and our children.

I urge the passage of this amendment.

Mr. GOLDWATER. Mr. President, this amendment has been requested by the President and while it is a little more money than we like to say "yes" to, this side takes it.

Mr. NUNN. Mr. President, I support the amendment. I know it is for an important purpose. It was requested by the administration. We are going to have some real funding problems. Everyone should recognize that.

The amendment of the Senator from Maine basically offsets this agreement which is a worthy increase for environmental cleanup but he offsets it with operation and maintenance cuts. That is my understanding of the amendment.

We are going to have some real problems in both the conference and as we move along in the process with the overall funding as I already tried to make clear.

I think this is a worthy amendment and we support it.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. KASTEN. Mr. President, I think this is a very important amendment and I hope it will be agreed to.

Protecting the public's health and safety is one of the primary functions of Government. Our children's future is too valuable to allow any delay in facing up to nuclear waste problems. Delaying action will only cause more extreme and difficult problems later.

The Federal Government should not be excused from its responsibility. Instead we should be setting an example for the rest of the country. I support this amendment which deals with the serious problem of nuclear waste generated by military facilities. This amendment will restore $15.3 million for the Department of Defense's Environmental Restoration Fund. It will also provide $5.0 million for construction of waste storage facilities. Unfortunately, much of the waste disposed of at military installations has been done in ways which create health and environmental hazards.

Our Nation needs to move ahead with all due speed on this challenge. By taking this action we help to protect our Nation's natural heritage and the health of generations to come.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, this waste is generated from defense installations. The administration requested this fund; and I think it is appropriate to approve it.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Maine.

The amendment (No. 2275) was agreed to.

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KASTEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GOLDWATER. Mr. President, there is a lot of talking going on. Could we have it a little quiet, please?

The PRESIDING OFFICER. The hour is late. There is a lot of conversation on the floor.

Senators are asked to be still and listen.

Mr. INOUYE. Mr. President, I ask that the two pending amendments be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2352

(Purpose: To provide for the transfer of certain lands in Hawaii under the jurisdiction of the Navy to the United States Postal Service in exchange for the construction of laundry facilities for the Navy)

Mr. INOUYE. Mr. President, I call up my Amendment No. 2352 and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment of the Senator from Hawaii.

The assistant legislative clerk read as follows:

The Senator from Hawaii [Mr. INOUYE] proposes an amendment numbered 2352.

Mr. INOUYE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 299, line 25, before the period insert ", except that no amount shall remain available until the Secretary of the Navy (hereinafter in this section referred to as the "Secretary") transfers to the United States Postal Service (hereinafter in this section referred to as the "Postal Service") jurisdiction over approximately 3.2 acres of land, together with improvements thereon, located in Aiea, Hawaii, and the Postal Service pays, out of any funds available to the Postal Service, to the Secretary of the Navy an amount equal to the greater of the following:

(1) The approved fair market value of the property over which jurisdiction is to be transferred (as determined by the Secretary).

(2) The cost of providing to the Navy fleet laundry and dry cleaning facilities to replace facilities located on the land over which jurisdiction is to be transferred pursuant to this subsection.

(l) LEGAL DESCRIPTION OF LAND.—The exact acreage and legal description of the land over which jurisdiction is to be transferred under this section shall be determined by surveys that are satisfactory to the Secretary. The cost of the surveys shall be borne by the Postal Service.

(m) ADDITIONAL TERMS.—(1) The Secretary may require such additional terms and conditions under this section as the Secretary considers appropriate to protect the interest of the Navy.

(2) If the fair market value of the property over which jurisdiction is to be transferred to the Postal Service under subsection (k) exceeds the cost of the replacement fleet laundry and dry cleaning facilities, the Secretary shall deposit the excess into the general fund of the Treasury.

Mr. INOUYE. Mr. President, this amendment is submitted at the request of the Department of the Army and the U.S. Postal Service.

It authorizes the Secretary of the Navy to convey to the U.S. Postal Service 2.3 acres in an area called Aiea and in return the Navy will receive new replacement laundry facilities.

It has been cleared with the managers on both sides and I am told they have no objection.

The PRESIDING OFFICER. Is there further debate on this amendment?

Mr. GOLDWATER. Mr. President, we have no objection to the amendment.

Mr. NUNN. Mr. President, we have been over the amendment carefully with the Senator from Hawaii. We have no objections. We support the amendment and urge its adoption by the body.

The PRESIDING OFFICER. Is there further debate on this amendment?

If not, the question is on agreeing to the amendment of the Senator from Hawaii [Mr. INOUYE].

The amendment (No. 2352) was agreed to.

Mr. INOUYE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DECONCINI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

Mr. NUNN. Will the Senator from Arizona give us an indication of which amendment this is?

Mr. DECONCINI. The amendment dealing with the drugs and narcotics.

Mr. NUNN. Mr. President, I ask the Senator how long he thinks this will take. He has every right to the floor and every right to bring the amendment up.

We are trying to handle as many amendments as possible tonight. This amendment is going to take a considerable amount of time, I would imagine. If the Senator could agree on a time limit.

Mr. DECONCINI. I am more than happy to agree on a time limit, I say to the Senator from Georgia, of 20 minutes to a side.

I will be glad to work out something with the manager.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. DECONCINI. I ask unanimous consent that the pending amendment be termporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, the Senator has indicated he would agree to a time limit.

Mr. DECONCINI. I am glad to agree to a time limit.

Mr. NUNN. Could we do about 15 minutes on each side?

Mr. DECONCINI. If the Senator makes it 20, I would be glad to agree.

Mr. NUNN. Twenty minutes on each side.

Mr. DECONCINI. Maybe even a little bit less.

Mr. NUNN. I would hope we could do it sooner than that. There are about six other Senators who have indicated they would like to bring up amendments tonight. We could move that amendment if we have time remaining.

As the chairman said we hope everyone will go home by 11 o'clock. We have a busy day tomorrow if we have any hope of getting the bill completed.

Mr. DECONCINI. Will the Senator yield?

Mr. NUNN. I yield.

Mr. DECONCINI. If the Senator from Georgia would want to enter into a unanimous consent agreement that the amendment will be the pending amendment when we come back on the bill tomorrow, I will be glad to do that.

Mr. NUNN. I believe that would help us because that would give us time. I still would like to get it as quickly as possible. But if we could get it up earlier tomorrow morning as soon as we come in and get on this bill.

Mr. DECONCINI. If the Senator from Georgia will yield, it is not my intention to hold up late tonight, particularly if we have a lot of amendments to accept.

I do want to get to the amendment tomorrow and get on with it.

Mr. NUNN. I would have no objection if the Senator from Arizona would have no objection to making this amendment the first amendment up tomorrow morning.

Mr. GOLDWATER. I think the Senator is correct. If we start this tonight we might be on it all night.

If my friend from Arizona would bring it up in the morning we will make it the first point of business.

Mr. DECONCINI. Mr. President, a parliamentary inquiry?

The PRESIDING OFFICER. The Senator will state it.

Mr. DECONCINI. Mr. President, when we come in tomorrow what is the status of this particular legislation? Is it the pending business after

the standing orders and morning business?

The PRESIDING OFFICER. The Senator is correct.

Mr. DECONCINI. A further parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DECONCINI. Mr. President, are there any cloture votes, or anything that would intervene?

The PRESIDING OFFICER. Cloture votes are scheduled to occur tomorrow first on a cloture motion of the minority leader and second a cloture motion of the majority leader.

Mr. DECONCINI. Mr. President, just only to address my colleagues because I——

Mr. NUNN. Could we have order? I cannot hear the Senator. He is addressing me.

Mr. DECONCINI. Just to address the colleagues, I ran into a parliamentary problem.

The PRESIDING OFFICER. Will the Senator suspend? The Senate is not in order. The Senator will not proceed until the Senate is in order. The staff members who are standing in the aisles are asked to retire from the Chamber. Those Senators who wish to carry on conversations respectfully are asked to leave the Chamber. We cannot proceed with the Senate's business when the Senate is not in order.

□ 2200

The Senator from Arizona.

Mr. DECONCINI. Mr. President, could I suggest to my senior colleague and the ranking member that if they would enter into a unanimous-consent agreement that when we finish morning business, before we go to the cloture votes, we take up my amendment, 20 minutes on each side, I would be more than happy to agree to that and thereby let them go forward with other amendments.

Mr. NUNN. Mr. President, I would have no objection to that. I think the wording needs to be handled carefully. We have to have a provision that there be no amendment to the amendment. But if the Senator would propound that while the minority leader is here on the floor, I would certainly recommend that we agree to that.

Mr. GOLDWATER. I would say so.

Mr. DECONCINI. I am sorry, would the Senator repeat that?

Mr. NUNN. If the Senator would propound that unanimous-consent request, particularly while the minority leader is here on the floor.

Mr. DECONCINI. Mr. President, while the minority leader is here, and the senior Senator from Arizona and the ranking member of the committee, I ask unanimous consent that the pending DeConcini amendment be laid aside and that it be the pending amendment after morning business tomorrow morning prior to the cloture votes and that a time agreement be entered into of 20 minutes on each side.

Mr. NUNN. And, Mr. President, would the Senator from Arizona add to that that no amendment be in order to the amendment?

Mr. DECONCINI. I further ask unanimous consent that there be no amendment permitted to the amendment when it is back as the pending amendment.

The PRESIDING OFFICER. Is there objection?

Mr. MATTINGLY. Reserving the right to object, may I ask the managers of the bill, if you are going to put aside an amendment tonight that is only going to take 40 minutes but you are going to have votes, are there going to be any more votes on the amendments you are going to take up tonight?

Mr. GOLDWATER. This matter will take a little time to discuss.

Mr. MATTINGLY. Forty minutes.

Mr. GOLDWATER. What is the Senator's question?

Mr. MATTINGLY. Well, the agreement is 20 minutes on each side, which is 40 minutes.

Mr. GOLDWATER. That is tomorrow.

Mr. MATTINGLY. I know, but why not tonight? Are you going to have other amendments brought up tonight that you will have rollcall votes on?

Mr. GOLDWATER. We might get a couple more amendments.

Mr. NUNN. I say to the Senator from Georgia, it would be our hope that we could do as many amendments as possible that are not controversial. I do not think we could assure anyone there will be no rollcall votes. It would be my hope we could have as many amendments as possible, because real progress is going to be required to move the bill. It would be my hope that we would have no rollcalls, but I do not think I am in a position to guarantee that. We do not know what amendments may come up.

Mr. MATTINGLY. I agree with the Senator. I was just saying that 40 minutes is a pretty short time for an amendment.

Mr. NUNN. That is right. That is why we are pleased we got this unanimous-consent for tomorrow. But the thing is, I believe between now and 11 o'clock we can handle 7 or 8 amendments, maybe 10.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, just so I understand it now, that unanimous consent has been agreed to, is that correct?

The PRESIDING OFFICER. That is indeed the case.

Several Senators addressed the Chair.

The PRESIDING OFFICER (Mr. STAFFORD). The Chair recognizes the Senator from Virginia.

AMENDMENT NO. 2589

(Purpose: Sense of the Senate Regarding the Taxation of Military Benefits)

Mr. WARNER. Mr. President, I send an amendment to the desk and ask for its immediate consideration. Mr. President, this amendment, I believe, will be accepted by both sides.

The PRESIDING OFFICER. Is there objection to setting aside the pending amendments? Hearing none, it is so ordered.

The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Virginia [Mr. WARNER] proposes an amendment numbered 2589.

Mr. WARNER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

It is the sense of the Senate with respect to the tax treatment of Military Benefits, that for purposes of paragraph (1) of section 61(a) of the Internal Revenue Code of 1954 (defining gross income), the term "fringe benefits" does not include the following military benefits:

(a) Subsistence and uniform allowances granted a member of the uniformed services (as defined in title 37) and amounts received by them as commutation of quarters.

(b) Any in-kind benefit received by a member or former member of the uniformed services and his family resulting from his status or service as a member of the Armed Forces of the United States other than those received as a result of such status or service being considered that of an "officer" or "employee" of the Government.

Mr. WARNER. Mr. President, this is a sense-of-the-Senate resolution. It relates to a tax proposal that is presently being considered by the conference. It is my understanding that the Secretary of the Treasury has approved it, the Secretary of Defense has approved it, and, indeed, the White House is urging its adoption by the Conference.

The fringe benefit provisions of the Tax Reform Act of 1984 (Pub. L. 98–369, 98 Stat. 877) amended sections 61 to include "fringe benefits" as compensation for services and added section 132 which enumerated specific categories of excludable fringe benefits. These provisions, by their very terms, do not contemplate application to military benefits.

However, in my judgment, the doubt created by the uncertain legislative intent of the 1984 bill in this area could lead to the taxation of many essential benefits, which could have a severe impact on our Nation's military personnel. Taxing these benefits could eventually lead to large-scale attrition of personnel, which would then need

to be rectified by providing prohibitively costly salary increases.

I am not suggesting that a policy change to the 1984 Act is now needed, just a clarification of the legislative intent with respect to military benefits when the Congress changed tax policy on employee fringe benefits.

Although the House and Conference Committee Reports on the Tax Reform Act of 1984 discuss the Act's fringe benefit provisions in great detail, both are perhaps more significant in that, for the first time, military benefits are mentioned in the context of fringe benefit regulations or legislation. The House Ways and Means Committee Report, House Report No. 98-432 (pt. 2) indicates:

Under existing Code provisions and section 61 regulations, benefits to military personnel such as subsistence, housing, and uniform allowances are excludable from income (see Treas. Reg. sec. 1.61-2(b)). This bill does not make any change in existing excludable military benefits. Thus, for example, the value of discounts at military commissaries is to be considered as provision of subsistence under existing regulations and fully excludable without regard to the bill.

Perhaps recognizing that many military benefits are not excluded by statute, the Conference Report reinforces the House Report discussion but does not reiterate its exact language, as it did on many other discussions of the fringe benefits provisions. The conference report (H. Rept. No. 98-861) indicates:

The conferees intend that Treasury regulations are to be issued to implement the statutory fringe benefit provisions of the bill. Such language of the bill and the legislative history as reflected in House Report No. 98-432 (pt. 2) and this Statement of Managers. Thus, for example, as stated in the report of the Ways and Means Committee, the bill does not modify the existing rules under which benefits to military personnel such as subsistence, housing, and uniform allowances are excludable from gross income.

There is a need for a legally sufficient, easily administered definition of military benefits which will not unnecessarily limit the statutory term "fringe benefit," nor include the value of home-to-work transportation received by military personnel, but distinguish between "fringe benefits" and "military benefits".

The authority for providing military benefits is found in statute, regulations, and in some cases, custom and practice. Therefore, any definition of military benefits must be broad enough to apply to these provisions.

To satisfy these concerns, I have offered this sense-of-the Senate amendment. . . . This language, if adopted in the tax reform conference will be easy for field representatives of the Internal Revenue Service to apply. They are personally aware of what taxable fringe benefits (such as home-to-work transportation) a Federal employee receives. If a military member receives the same fringe benefits, he, like the civilian employee, is equally taxable.

If, however, a military member receives an in-kind benefit, not generally available to Federal civilian employees, this military benefit, resulting from his status as a member of the Armed Forces, is nontaxable.

I am seeking merely to clarify executive procedures and policy through legislative language to allow for consistent expectations for military personnel and their families.

Military benefits are a matter of legislative prerogative, while fringe benefits are a contractual term of many employment contracts. The former is specifically devoid of contractual consideration, while the latter are part and parcel of every employment contract.

Common-law rules governing private employment contracts have no place in the area of military pay. This separate treatment of these two different kinds of compensation, for tax treatment, has existed for over 60 years since the 1925 Court of Claims decision. Nothing to the contrary has occurred to alter this arrangement.

The Supreme Court, in a number of cases involving military compensation, has held that military service and the compensation thereof are unique, and that a soldier's entitlement to pay is dependent upon statutory right and not a contractual agreement. Distinction between military service and employment in the private sector are many.

In military service, the only profession of arms, a member takes an oath to give of his life, if necessary, in the conduct of his duties. No other profession can make such a demand. These members are also subject to being sent anywhere in the world at any time to defend the basic freedoms which all of us enjoy. Their work involves long hours under adverse conditions and with a substantial degree of danger.

In recognition of this arduous nature of their duties, we, the Members of Congress, have provided them with certain statutory pay and allowances and benefits. These in-kind benefits are intended to improve the quality of life of members and their families and assist in retaining those members with potential for continued service.

Additionally, these benefits materially assist the survivors of these members in the event of their death. Taxing these benefits would adversely affect the economic well-being of our service members and indicate a lessening of commitment by the Congress in recognizing the unique nature of military service.

Mr. NUNN. Mr. President, will the Senator yield for a brief question? I have not had a chance to study this amendment. It is a tax matter. I would assume that it would be acceptable, but have you checked with the Finance Committee, Senator LONG and Senator PACKWOOD?

Mr. WARNER. It has been checked with Senator PACKWOOD and Senator LONG and both have approved it.

Mr. NUNN. They are willing for it to be added to this bill?

Mr. WARNER. That is correct.

Mr. NUNN. Does the Senator have a revenue loss?

Mr. WARNER. Zero.

Mr. NUNN. It has no revenue loss?

Mr. WARNER. No. It is, by and large, to correct an interpretation of the Tax Reform Act of 1984.

Mr. GOLDWATER. This side will accept the amendment.

Mr. NUNN. Mr. President, based on the assurances of my friend from Virginia about the approval of the Finance Committee chairman and ranking member, and the assurance there is no revenue loss here, I recommend we accept the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

The amendment (No. 2589) was agreed to.

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WARNER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order. The business of the Senate will be expedited if Members will cease audible conversations and take their seats. We will not proceed until we have that order.

The Chair would again ask Senators to take their seats and cease audible conversations in the Chamber.

The Senator from Arkansas.

Mr. PRYOR. I thank the Chair.

Mr. President, I am not certain this unanimous consent will be accepted, but if I might state the situation very briefly.

Senator HATFIELD and myself have worked on two amendments. One amendment relates to the NATO certification for the production of the new generation of nerve gas, binary nerve gas. The other amendment relates to the Bigeye bomb and to whether it is feasible to go ahead with production or not. The two are very, very closely related.

Mr. President, I ask unanimous consent that immediately following—and I hope the distinguished ranking member of the Armed Services Com-

mittee will hear this—I am asking unanimous consent that immediately following the disposition on tomorrow of the amendment offered by the Senator from Arizona, Senator DECONCINI, immediately following that, that the Senator from Oregon, Senator HATFIELD, may offer an amendment relative to the NATO certification of chemical warfare, to be immediately followed thereafter by an amendment the Senator from Arkansas will offer on the Bigeye bomb.

I think that would be a proper sequence of events. I respectfully submit that to my colleagues and hope that unanimous-consent request may be requested to put that on the schedule immediately following the Senator from Arizona.

Mr. NUNN. Does the Senator have any time in mind for each one of those? The shorter the time, the more receptive the managers will be.

Mr. PRYOR. I am very sorry, I do not see the Senator from Oregon on the floor. I cannot speak for him on time.

I think that, frankly, 15 minutes on a side might be appropriate on the Bigeye bomb amendment. I do not know with the first amendment, the NATO certification amendment.

Mr. NUNN. The Senator from Oregon indicated to me earlier in the day he would be prepared to enter into a time agreement, but I do not recall, at least, if we arrived at an exact time.

If the Senator from Arkansas can check with him, I would certainly be prepared to recommend we work out this unanimous-consent agreement.

Mr. COHEN. Will the Senator yield?

Mr. PRYOR. I am glad to yield.

Mr. COHEN. Would you be prepared to go forward right now?

Mr. PRYOR. If we go forward right now, I respond to my friend from Maine, this is going to necessitate two rollcall votes and I do not know what the managers of the bill want to do. It is my sense that they may not want to have two rollcall votes this evening. In fact, I do not want to have any more rollcall votes. But I cannot speak for the Senator from Oregon on that. I am very sorry that I am not prepared to do so.

Mr. GOLDWATER. Mr. President, I think that tomorrow morning we can satisfy the Senator by agreeing to 30 minutes, 15 minutes on a side.

□ 2210

Mr. PRYOR. For the second amendment relative to the Bigeye bomb, but the first amendment I think offered by the Senator from Oregon, Senator HATFIELD, would be that amendment relative to NATO certifications for the production of the new chemical warfare nerve gas. I cannot speak for the Senator from Oregon on that. But I imagine, because he does not normally consume a great deal of time, we should say 30 minutes equally divided and with the possibility that we may even lessen that time after we reach the Senator from Oregon.

Mr. COHEN. On both amendments, 30 minutes on each amendment.

Mr. PRYOR. There would be 30 minutes on the second amendment on the Bigeye bomb, 1 hour on Senator HATFIELD's amendment, but possibly even less time on that amendment on the NATO certifications.

Mr. NUNN. I believe the Senator from Oregon mentioned 40 minutes to be equally divided. But I am not absolutely clear in my memory on it.

Mr. LEAHY. Mr. President, does the Senator from Arkansas say tomorrow?

Mr. PRYOR. The Senator from Arkansas would not like to go forward with this amendment tonight because I have a sense people are not in the mood to take on such a heavy issue at this moment. I think tomorrow might be best after the disposition of the amendment offered by the Senator from Arizona.

Mr. GOLDWATER. I might say half an hour equally divided on each amendment would be agreeable.

Mr. PRYOR. That would certainly be agreeable to the Senator from Arkansas. If I may ask a few minutes, and ask that we may come back to this unanimous consent in about 5 minutes, I will attempt to reach the Senator from Oregon to see if it might be agreeable with him. There would be 30 minutes.

Mr. GOLDWATER. There would be 30 minutes equally divided on each amendment.

Mr. PRYOR. As far as the Senator from Arkansas is concerned——

Mr. GOLDWATER. We requested this for years and years and years.

Mr. PRYOR. I am very, very understanding of that, I say to my friend from Arizona.

Let me, if I might, propose or propound this proposal in just a moment after I reach the Senator from Oregon.

Mr. NUNN. The Senator from Arkansas, if he propounds it, if he would add on each one of these no amendment would be in order to either.

Mr. PRYOR. We would be glad to add that proposal. I will be in touch with the managers in just a moment.

The PRESIDING OFFICER. Without objection, the amendments are temporarily laid aside.

Mr. PRYOR. I thank the Chair.

Mr. DANFORTH. Mr. President, I ask unanimous consent the pending amendments be laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2590

(Purpose: Impose certain restrictions on research and development funds of the Department of Defense used for grants or contributions to educational institutions)

Mr. DANFORTH. Mr. President, I call up amendment No. 2590, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Missouri [Mr. DANFORTH], for himself and Mr. BINGAMAN, Mr. PROXMIRE, Mr. EVANS, Mr. CHAFEE, Mr. EAGLETON, Mr. GLENN, Mr. COHEN, Mr. GOLDWATER, and Mr. NUNN, proposes an amendment numbered 2590.

Mr DANFORTH. Mr. President, I think it would be well for the clerk to read the amendment if he can put his hands on it because it is self-explanatory. I think as far as I am concerned, the debate will not last long. I think the amendment pretty well states on its face what it is all about.

The PRESIDING OFFICER. If the Senator from Missouri could have our attention, the Chair must inform the Senator that we do not have a copy of the amendment at the desk.

Mr. DANFORTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Missouri [Mr. DANFORTH], for himself and Mr. BINGAMAN, Mr. PROXMIRE, Mr. EVANS, Mr. CHAFEE, Mr. EAGLETON, Mr. GLENN, Mr. COHEN, Mr. GOLDWATER, and Mr. NUNN, proposes an amendment numbered 2590.

On page 19, between lines 18 and 19, insert the following new section:

SEC. . RESTRICTIONS ON USE OF RESEARCH AND DEVELOPMENT FUNDS OF THE DEPARTMENT OF DEFENSE.

This Act does not authorize any research, development, test, and evaluation funds to or for the use of the Department of Defense for the purpose of making any grant or contribution to any educational institution unless the Secretary of Defense, using existing authority, determines—

(1) that the purpose of such grant or contribution has a potential relationship to a military function or operation; and

(2) that the grant or contribution is based on the technical merit of the proposed research that best satisfies the requirements of the Department of Defense.

Mr. DANFORTH. Mr. President, the Senate will remember that at the time the supplemental appropriations bill was on the floor of the Senate we offered an amendment to strip from that bill certain university research projects that had been placed in it by the Appropriations Committee. The argument went on for about an hour and a half or two hours. It concerned the question of whether the Appropriations Committee should earmark funds for specific universities, for building libraries, science buildings,

whatever, or whether defense money that was spent on research should be spent on the basis of some kind of competition or other showing of merit and the ability to carry on the research by the educational institution receiving the grant.

When that amendment was offered on the floor, and after considerable debate, the Senate, by a vote of 58 to 40, voted to delete the earmarking for those specific universities. However, in conference, all of those projects were added back and when the conference report came back we had another vote on the same subject and, in fact, we agreed on the floor of the Senate to add them back.

So that was that. I am not refighting that battle. Those projects are going forward. Those grants have been made. As far as I am concerned, that is all water under the bridge. However, since that vote, the question has been put to me by two different university presidents, What is going to be the policy of the Federal Government henceforth on university research grants? Is it the intention of the Defense Department to award research grants on the basis of competence and merit, or instead, is it going to be a mad rush to the Appropriations Committee in order to try to get special pork barrel projects to be put in appropriations bills?

I asked these two university presidents their view, and, of course, they preferred to operate on the basis of merit, not on the basis of pork. But they made it clear to me that if our policy around here is going to be one of just getting your friends on the Appropriations Committee to offer projects for your home State university, they did not want to be left out.

So what this amendment does is to state prospectively it does not affect these projects for which there have already been appropriations, prospectively, that henceforth grants will be conditioned on the fact that the Secretary of Defense must determine, one, that the purpose of such grant or contribution has a potential relationship to a military function or operation; and, two, that the grant or contribution is based on the technical merit of the proposed research that best satisfies the requirements of the Department of Defense.

Mr. COHEN. Will the Senator yield?

Mr. President, I want to commend the Senator for offering the amendment. This is entirely consistent with the whole thrust of what the Senate Armed Services Committee has done, under the leadership of Senator GOLDWATER, Senator LEVIN, and Senator NUNN, in trying to instill more competition into the field of defense spending.

We should not confine it simply to military weapons, but apply it also to the field of university grants and research grants. So I commend the Senator for offering the amendment. I believe it is consistent with our entire philosophy that we have been moving to for a number of years now. I hope it will be accepted.

Mr. FORD. Mr. President, will the distinguished Senator yield for a question?

Mr. DANFORTH. Yes.

Mr. FORD. As I recall in the original amendment the Senator had a committee that would be set up to scrutinize the applications.

Mr. DANFORTH. No; that was a misconception of the amendment.

□ 2220

Mr. President, we never mandated any kind of peer review system. That is a standard way of some research money being spent by the Federal Government. But, in fact, in the Defense Department, while they do seek to use a merit system of picking the recipients of research money, they do not necessarily use the peer review system. We did not, in the appropriations bill, attempt to do that. Rather, we simply deleted those paragraphs from the bill that specified the specific universities.

In this, we do not mandate any particular system either, and we leave that up to the Secretary of Defense.

Mr. FORD. I thank the distinguished Senator. I have no objection to the amendment. I know there are more politics in smaller groups, giving to the same universities all the time. Regardless of how good your programs are and that sort of thing, you are excluded. It makes small universities vulnerable to the opportunity of being involved to receive grants that may have some good ideas. I have no objection.

Mr. NUNN. Mr. President, I supported the amendment of the Senator from Missouri when he first had it up. I regretted that it did not pass the last time we voted for it. There are a lot of reasons for it. I think it is a good amendment.

I have heard the same argument as the Senator from Kentucky has, about little universities. I think it should be really done on merit and not on the basis of politics. I hope the Senator from Missouri will make certain that we are giving a fair opportunity to all.

I think the worst thing we can do is to continue this trend we started when the amendment of the Senator from Missouri was defeated before, of having the Members of the Senate decide which universities are going to get these grants strictly on the basis of politics. It had nothing to do with the research ability or merit.

I know what the Senator is talking about. Every university and school in my State says, "If you are going to play games this way, we expect to get ours."

I think this is a very important amendment and strongly support it. I urge my colleagues to adopt it.

Mr. GOLDWATER. Mr. President, I was on the original amendment with Senator DANFORTH. Even though this automatically concerns $25,000 to one of my universities, I support it. I supported it then and I support it now. This side accepts the amendment.

Mr. DANFORTH. Mr. President, in addition to the original cosponsors which I have already listed, I ask unanimous consent that Senator LEVIN be added as cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2590) was agreed to.

Mr. DANFORTH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

UNANIMOUS-CONSENT AGREEMENT

Mr. PRYOR. Mr. President, a moment ago I propounded a unanimous-consent request on behalf of Senator HATFIELD and myself for two back-to-back consecutive, very related and closely akin amendments immediately following the disposition of the amendment tomorrow morning to be offered by the Senator from Arizona, Senator DECONCINI.

I have just talked to Senator HATFIELD by telephone. I would like to propound the following unanimous-consent request, provided it is accepted by the managers of the bill.

That Senator HATFIELD be allowed, immediately following the Senator from Arizona, a 45-minute time period, equally divided between the two parties, so to speak, on the NATO certification of chemical production; followed immediately thereafter by an amendment that I shall offer on the Bigeye bomb, 30 minutes, 15 minutes on a side, equally divided, with no amendments in the second degree or intervening amendments to each of the amendments proposed by Senator HATFIELD and by the Senator from Arkansas. I hope that agreement will be satisfactory with the managers. We will be prepared to propose those amendments at the time of the disposition of the amendment to be offered by the Senator from Arizona.

The PRESIDING OFFICER. Is there objection to the request?

Mr. COHEN. We have no objection.

The PRESIDING OFFICER. If there is no objection, without objec-

tion the unanimous-consent request is agreed to.

The Chair recognizes the Senator from Indiana.

AMENDMENT NO. 2400, AS MODIFIED

Mr. QUAYLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Does the Senator ask unanimous consent to set aside the pending amendment temporarily?

Mr. QUAYLE. I ask unanimous consent that the pending amendment be temporarily set aside for the purpose of discussing my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Indiana [Mr. QUAYLE], for himself, Mr. HOLLINGS, and Mr. HUMPHREY proposes an amendment numbered 2400, as modified.

Mr. QUAYLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, add the following new section:

"SEC. . (a) The Department of Defense shall provide Congress on or before March 15, 1987, a report detailing what Strategic Defense Initiative technologies can be developed or deployed within the next 5 to 10 years to defend against significant military threats and help accomplish critical military missions including,

(1) defending our troops and allies abroad against tactical ballistic missiles particularly new and highly accurate Soviet shorter range ballistic missiles armed with conventional, chemical, or nuclear warheads,

(2) defending against a limited but militarily effective Soviet attack aimed at disrupting our National Command Authority and other valuable military assets,

(3) providing sufficient warning and tracking information to defend or effectively evade possible Soviet attacks against our military satellites including those in high orbits,

(4) providing early warning and attack assessment information and the necessary survivable command, control and communication to defend against possible Soviet conventional or strategic attacks.

(b) This report shall also

(1) identify any other significant near-term military missions that the application of Strategic Defense Initiative technologies might help accomplish;

(2) list what specific program elements of the Strategic Defense Initiative are pertinent to these applications;

(3) estimate initial operating capability dates for the systems needed to accomplish these missions;

(4) estimate the level of funding necessary for each program to reach these operating capability dates.

(5) estimate the survivability and cost effectiveness at the margin of these systems against current and projected Soviet threats.

(c) The Department of Defense will provide the Senate and House Armed Services Committees an interim report of its findings not later than December 31, 1986.

Mr. QUAYLE. Mr. President, this is an amendment that I have discussed with both managers of the bill. It deals with a report to the Congress concerning the strategic defense initiative.

Over the last couple of days in the debate that was taken on SDI, both the proponents and the opponents of various SDI funding amendments have focused on where SDI ought to be in the long term. Those who strongly support SDI talk about near-perfect defenses, the astrodome concept, and argue that we are going to protect the entire United States population, military targets, and the whole ball of wax. In other words, all of a sudden someday down the road—they do not say exactly when—15, 20, 25, 30 years, we will have a full multilayered SDI system deployed.

On the other hand, many critics say, "That type of proposal is never-never land. You simply are not going to be able to get there."

You have people questioning the technical feasibility of such a system. You have scientist questioning whether it ever is going to happen from a political point of view. These critics are saying, "Well, that is nice, but we will just keep this in the research stage and not get into any of the testing and development. We have a very sensitive and important treaty, the AMB Treaty, that will certainly stand in our way. Therefore, you can talk about it, but it is not really going to happen."

What this amendment does, Mr. President, is to began to refocus SDI and to try to suggest a different view of where we might go with this program. As a matter of fact, my amendment is an extension of the efforts of Senator NUNN and Senator COHEN to redirect SDI. They wanted to see SDI focused on what we might be able to do in the near term.

What this amendment does is to request that the Department of Defense submit a report to Congress on what can, in fact, be achieved in the near term. In other words, let us focus on what we might be able to do in the next 5 or 10 years. Let us see what technologies might be applied to mitigate near-term military threats. How can we protect not only ourselves, but our allies from tactical ballistic missile attacks, which may take place in Europe, Israel, or the Far East? What kind of near-term things could we do to defend some of our military assets in the United States short of having any kind of a perfect defense?

□ 2230

This would not just be limited to terminal defense; it would include midcourse defense as well.

I believe that what this amendment will do is give us the information to show that perhaps there is another approach to SDI rather than just look at what is going to be out there 15 or 20 years from now. Then we can have that debate what course we should take once we get that information. We can see whether it is cost-effective at the margin to focus SDI on the near-term; which we did put in this amendment at the suggestion of Senator NUNN. We want to see what other military threats besides an all-out Soviet strike could be addressed specific SDI programs, on what kind of time schedules, at what level of funding.

The President said again today that he fully intends SDI to be deployed at some time. I think this amendment is a way that to assure that this point is the focus of our debate on SDI. It would assure we focus on incremental approaches to SDI. It would take both the arguments of those strong proponents who say we are going to have a perfect defense and of the opponents who say that is a crazy idea, and put that argument aside for a while.

I for one do not want to get away from the possibility that we might be able to have a perfect defense. I do not know. I do not think anybody in this Chamber knows. We all have our biases on the way we think this program will work out, but we cannot tell for certain.

What we can understand in a far more intelligible and comprehensive way is what can be done in the next 5 or 10 years.

Mr. President, we do not have that information now.

Quite frankly, as one of the strong supporters of SDI, I am saying if we do not get that information and focus the debate on it, then I think the chances of the program of getting beyond research, testing, development, and eventual deployment—those chances are going to be slim. I think the patience of Congress and of the American people has always been rather marginal. They would like to see something happen now. Not much is going to happen now, but important things could happen in the next 5 to 10 years.

We want to know what could happen in the next 5 to 10 years, but we do not have that information. I think the American people strongly support having defenses to enhance deterrence. I believe if you ask that question, whether it be a poll or just have a group of ordinary common people, sitting around in a coffee shop or out on the farm or down in town hall, if you ask the question about defenses, they are going to be quite shocked to learn that we do not have defenses. I think if you——

Mr. GOLDWATER. Mr. President, will the Senator yield for a moment?

Mr. QUAYLE. Yes, I yield.

Mr. GOLDWATER. Mr. Presdent, I promise there will be no more rollcall votes so you can all go home but be here tomorrow morning.

Mr. QUAYLE. I have a great speech. They may want to stay around and listen to that. I was just getting going.

Mr. NUNN. Mr. President, will the Senator yield?

Mr. QUAYLE. Yes. I yield.

Mr. NUNN. I heard the Senator from Arizona mutter that if the Senator from Indiana did not complete his remarks in the next couple of minutes, we were not going to be able to accept this amendment. We started off for it and the Senator is making a very persuasive case but he is right at the right point to stop.

Mr. QUAYLE. The Senator from Indiana understands when to stop: when both the manager and the comanager of the bill get up. I think this amendment is so good and everybody has been so impressed by the articulation of the Senator from Indiana that I do not believe I need to articulate my point any more. I think I have sold the managers of the bill. Therefore, I shall cease and say this is a great amendment. You will really enjoy reading my speech in the RECORD. It is a great speech but I will save the Senators from having to listen to any more tonight other than to ask that my speech be placed in the RECORD because I think others may want to read it.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

SDI FOR THE NEAR-TERM

Mr. QUAYLE. Mr. President, presently, SDI is defined as an effort to determine what might be devised to afford "thoroughly reliable defenses against the fully responsive Soviet threat." In other words, SDI's key orientation is to develop defenses that would be nearly leakproof, not against what the Soviets now have, but the missile force they might deploy in response to the defenses we might eventually deploy.

This definition of SDI is part of the reason why the current debate is so sterile. Instead of asking what near-term strategic and tactical vulnerabilities SDI technology might help to mitigate, we have focused almost exclusively on how SDI can defend against a Soviet spasm attack 20 or more years off. This preoccupation with extreme threats in the extreme future has itself produced a fruitless debate on extremes.

On the one hand, those who emphasize SDI's promise of nearly leakproof defenses have been unwilling to support deploying anything until the entire system has been perfected. Rather than learn more from smaller efforts designed to address less stressing, but more likely threats than a Soviet "bolt from the blue," these proponents prefer to plan for perfection for the year 2010 or beyond.

On the other hand, those who criticize the SDI have become so absorbed in their denial of its value that they have failed to recognize how it can help counter the very military threats they themselves claim are important.

Mr. President, the purpose of my amendment is to turn this debate around by focusing it and the SDI away from their preoccupation with ultimate defenses against an ultimate threat which is itself years away. My aim is not to deny the value of such goals but rather to focus greater attention on what can be done incrementally.

My amendment does this by asking certain questions. First, what can the application of SDI technology do in the near term to address the threat that new, highly accurate Soviet shorter-range ballistic missiles—the SS-21, SS-22, and SS-23—pose against our troops and allies abroad? According to testimony that both the HASC and SASC has received, these missiles are expected to become so accurate that by the late 1980's or very early 1990's the Soviets will be able to use conventional and chemically armed versions of these missiles to take out virtually all of NATO's key military assets—both nuclear and nonnuclear—without ever having to resort to nuclear weapons themselves.

Mr. President, this threat is not distant or remote. In the case of NATO, it will arrive within the next five years. For Israel, the threat is even closer—the Soviets have already given the Syrians SS-21's that can target most of Northern Israel and have pledged to sell them SS-23's within a year or two that could reach all of Israel's military assets.

Israel and our key NATO allies, of course, are interested in learning what SDI can do to afford protection against these missiles. We should be no less concerned. Not only is our defense at stake if no defenses against this threat is devised, but we can gain important lessons for SDI.

Although defenses against tactical ballistic missiles, which are slow and relatively simple in design, would differ from defenses designed to cope with strategic ballistic missiles, the similarities in interceptor technology and sensor and radar technologies are significant. An ATBM could not take down an ICBM but it could help us to learn how to design an interceptor that could.

Similarly, airborne optical sensors and warning radars designed to warn of a tactical ballistic missile attack could not be used to warn of a strategic strike but it could help give practical guidance for the design of such a system. Certainly, if we cannot devise defenses against Soviet tactical ballistic missiles, there is little reason to believe that we can do much against strategic ones.

Second, my amendment asks what can the application of SDI technologies do to help defend against a limited Soviet attack aimed at disrupting our National Command Authority or other valuable military assets. In the last year, we have seen a considerable number of articles concerning what the Soviets might do to disrupt or knock out our key military command and control centers. Under one scenario, the Soviets might launch a limited number of submarine-launched ballistic missiles off our coasts and detonate these missiles' warheads high above the atmosphere.

Such an attack would harm no one physically but could temporarily make us deaf, dumb and blind militarily. In a major conventional conflict against us or our allies that was not going well for the Soviets, such an attack for the Soviets might seem less risky in order to turn things around, than avoiding such a strike.

By the same token, the Soviets may never have reason to launch a major attack against all of our strategic assets, but might find knocking out an American military port of debarkation to be critical in the case of a war against our allies to prevent their resupply.

Finally, there is the possibility of an accidental launch against the U.S. not just by the Soviet Union, but other nations acquiring ICBM's, as well.

Currently, we have no defenses against such threats. Yet, it could be possible within the 100 launcher limit of the ABM Treaty to devise and deploy such defense. Unlike ATBM's, these systems, such as ERIS interceptors, terminal imaging radars, and airborne optical sensor systems, could counter a small number of strategic missiles and do so in the mid course, rather than the terminal phase. Again, if we cannot perfect defenses against such a limited threat, there is little reason to believe we can devise defenses against threats that are larger.

Third, my amendment asks what SDI technologies could be applied in the near term to provide sufficient warning and tracking information to defend against or effectively evade possible Soviet attacks against our military satellites including those in high orbits and to afford them such defense.

The Soviets already have ASAT's capable of destroying U.S. military satellites in low-earth orbit. The concern of both Hawks and Doves is that they may achieve this capability against our satellites in higher orbits. All that would be required, for this is for the Soviets to perfect the infrared seeker system they have already tested several times on their existing coorbital ASAT.

Against this threat, a number of arms control schemes have been suggested including everything from ASAT bans to space self-defense zones. Each of these schemes assumes we have a surveillance capability against ASAT's. The later idea, which was promoted by Albert Wohlstetter and that received the endorsement of the Aspen institute and Harvard arms control expert, Joseph Nye, depends on our being able to alert satellites to evade or take other defensive measures in a timely fashion.

Unfortunately, none of these capabilities yet exists in a serious fashion and the most important of them all, boost surveillance and tracking (BST's) and space surveillance and tracking (SST's) are projects that SDI has assumed. Boost surveillance is critical to know precisely what trajectory a Soviet ASAT booster is on. This information would be passed on to a space surveillance system geared to track small, relatively cool space objects such as unboosted satellites, which, in turn, would inform our satellites of the attack so they could respond or know where to move.

Again, surveillance and space defense efforts designed to guard against Soviet ASAT's or space mines might be inadequate to provide the sort of ICBM tracking and space surveillance a final SDI system might require. But this is not the point. What is is that unless we undertake this effort now, we will face a strategic ASAT threat that will jeopardize any space-basing of military assets including SDI.

Finally, my amendment asks what SDI technologies could be applied in the near term to provide early warning and attack assessment and the necessary survivable command, control, and communication systems necessary to defend against Soviet conventional or strategic attacks. This is of direct significance to our efforts to enhance our conventional defenses, particularly in the Eurasian thereafter.

In fact, the Soviets number one theater priority is to counter and defeat the command, control, communication and intelligence systems necessary to make our deep-strike theater strategies and emerging technology weapons work. What SDI can provide are the more powerful and survivable sensor and battle management systems capable of overriding the Soviets' efforts and making our smaller numbers much more effective against their larger force deployments.

Infrared focal plane technology, of the sort BSTS is expected to employ is almost certain to be critical to improving our ability to guide conventional submunitions in ground warfare and to devise satellites capable of tracking aircraft or ships or moving tank divisions. Similarly, phased-array radar satellites could be used for such detection and tracking. Finally, survivable multiple satellite systems cheap enough to be mass-produced and employing packet switching could provide virtually jam-proof radio communications world-wide for all three of our services.

Currently, each of these advanced C31 technologies is being developed under SDI but there is nothing that prevents their dual application under SDI other than adequate funding and congressional support.

Mr. President, this sort of support will not come "out of the blue." It will come from a full and clear presentation of the facts concerning SDI and what it could do to counter important military threats, not two or more decades from now, but within the next 10 years. As I stated before, we lack this information not because it is not available, but because we have focused on the wrong question.

Mr. President, I think it is time we start asking the right questions. That is why I am offering my amendment today.

Mr. QUAYLE. Mr. President, I ask unanimous consent that Senator HOLLINGS be added as an original cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, it is a good amendment. We worked with the Senator from Indiana on this amendment. We added the Presidential criteria, cost effectiveness at the margin, and survivability and technical feasibility. That is incorporated in here. We shall get the report.

The Senator is exactly right when he says that unless we begin to get at least an idea of what can be accomplished in the near term and get away from this vision that may be a possibility but is not a probability, in my view, of a perfect defense that will eliminate nuclear weapons from the face of the Earth and then turning the technology over to the Soviet Union—unless we get away from that kind of definition, the SDI Program is going to erode and erode in its support. The Senator is right on the question, and I think this amendment will help us. I support the amendment.

Mr. GOLDWATER. Mr. President, this side supports the amendment. I might say to my friend from Indiana that I had a father who was the best salesman I ever knew. He always said, "Son, know when to close the book."

The PRESIDING OFFICER. Is there further debate? If there is no further debate, the question is on agreeing to the amendment of the Senator from Indiana.

The amendment (No. 2400) as modified, was agreed to.

Mr. GOLDWATER. I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I ask unanimous consent that the pending amendment be set aside.

The PRESIDING OFFICER. The Chair informs that the motion to reconsider the vote on the amendment was made.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEVIN. Mr. President, I ask unanimous consent that the pending amendment be laid aside so I may proceed with an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2591

(Purpose: To modify the limitation on obligation of funds for establishing a Federally Funded Research and Development Center for the Strategic Defense Initiative)

Mr. LEVIN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Michigan [Mr. LEVIN] proposes an amendment numbered 2591.

On page 220, line 10, beginning with "report", strike out all that follows through page line 19, and insert in lieu thereof "reports described in subsection (b) and thirty (30) legislative days have elapsed following the date on which the Congress has received both reports.

"(b) REPORT REQUIREMENT.—In order for Congress to make an informed decision on the need for the establishment of a Federally Funded Research and Development Center for the support of the Strategic Defense Initiative Organization and on the ability of such an entity to function as an independent and objective source of technical support, the Secretary of Defense and the Comptroller General of the United States shall each submit to Congress a report that includes the following:".

Mr. LEVIN. Mr. President, I ask unanimous consent that Senator WARNER be added as a cosponsor to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, the Department of Defense [DOD] announced in March its intention to establish a new research center called the Strategic Defense Initiative Institute [SDII]. From the start, many people questioned the need for this institute, pointing out that the Strategic Defense Initiative Organization [SDIO], existing research facilities, and private sector companies are already performing the needed research.

Others were equally troubled by indications that DOD was planning to set up a research center in a way that would jeopardize its independence and objectivity. It came to light, for example, that DOD was planning to influence SDII's staff selection; invite only one group of people, rumored to be closely involved with the SDIO, to submit a proposal to run the institute, without any competitive proposals being solicited; and select as SDII's contractor a newly created entity, with no track record of scientific excellence.

Some people say that DOD is using the SDII to circumvent personnel ceilings and funding limitations placed on the SDI Program. Others say DOD is trying to create a body which will provide a veneer of scientific credibility for star wars research. Neither reason is sufficient justification for setting up a research center.

This is a good science issue. We can't afford to fund a new science center which is not needed and which may not provide independent and objective scientific advice. Nor can we afford to fund a research facility whose work, due to perceived or actual bias, will not be accepted as credible in the scientific community.

I. BACKGROUND

There is some confusion over what exactly the SDII will do. Just like the debate in the SDI Program as a whole, on whether it will protect missiles or the American population, there is debate over whether the SDII will provide policy studies or just technical support to the SDIO staff. The Armed Services Committee report reflects this confusion.

In any event, I have been told that the SDII's mission will be to evaluate and integrate all the research being done by other centers and companies under the star wars program. The center will perform this sensitive work, not as a Government facility, but as a private, nonprofit federally funded research and development center [FFRDC].

Federally funded research and development centers, or FFRDC's, are particular kinds of private research facilities which enjoy special privileges in our Government. They are exempted from the Competition in Contracting Act, which means they can get Federal contracts on a sole source basis; they have an official agency sponsor and unusual access to agency plans and data; and the Government supplies 70 percent or more of their annual budgets. They are also costly. The Congressional Research Service [CRS] stated in a report dated May 30, 1986, that:

FFRDC's are more costly to operate. Critics contend that FFRDC's have no incentives to control their costs since they are

generally nonprofit, obtain yearly funding, and do not have to compete for work in the normal peer review process. FFRDC's are often criticized because of the high salaries that they pay to middle and top management.

In return for their privileges and big price tags, FFRDC's are supposed to provide independent, objective scientific advice to the Government. Independence and objectivity are the hallmarks of an FFRDC. FFRDC's are supposed to be independent not only from commercial concerns, but also from the political pressures on their sponsors, so that they can deliver objective advice, even when politically unpopular. To this end, executive branch rules governing the creation and operation of these centers require agency sponsors to encourage their FFRDCs' independence and objectivity (See OFPP Policy Letter 84-1).

There are currently about 40 FFRDC's in existence, 8 of which are sponsored by DOD. Examples include the Rand Corp., Lawrence Livermore National Lab, Los Alamos National Lab, and Brookings Institution.

II. PROBLEMS WITH SDII

There is a serious question as to whether DOD needs to set up a new FFRDC for the star wars program. Existing facilities are currently performing the research that the SDII is supposed to perform. They can continue to do so, probably at less cost.

Executive branch rules designed to prevent unnecessary FFRDC's require any agency that wants to set one up to justify its creation. These rules require the agency to perform, among other steps, a thorough assessment of other ways to accomplish the same research.

In response to these rules, DOD has written a report which attempts to justify its creation of the SDII. However, this report is vague, has no comparative cost data and is generally unconvincing. Moreover, at the same time DOD is arguing that it wants a nonprofit center with no interest in producing SDI weapons, to assure the center's independence, DOD is planning other steps that jeopardize that center's independence and objectively.

Let me describe just some of the DOD plans for SDII which, I believe, jeopardize its independence.

1. INFLUENCING SELECTION OF PERSONNEL

DOD wants to exert an unusual degree of influence in selecting the SDII's staff, affecting not only the chief executive but also a dozen senior directors and wielding not only veto authority but also apparently participating in the nomination and interviewing of candidates.

This contrasts with usual practice. In a report dated July 25, 1986, analyzing seven out of the eight FFRDC's sponsored by DOD, CRS reported that:

In general, the contracts between [existing] FFRDCs/contractors and the DOD sponsoring agencies give DOD little or no control over the FFRDCs' selections of chief executive officers or senior personnel, although a FFRDC is likely to determine informally whether a prospective employee would be unacceptable to the sponsoring agency.

In another report, dated May 8, 1986, CRS stated: "SDIO's proposal to review and comment on the President's selection for SDII's research director and the directors of various research groups with the SDII does not conform to past DOD FFRDC personnel practices." CRS cautioned against going ahead with this plan in a report dated May 30, 1986:

SDIO appears to favor greater than normal personnel input compared with existing FFRDC's. This may not be in the best interest of SDIO for two reasons: (1) its perceived introduction of bias and control over research result, and (2) its potential for merely shifting SDIO personnel into positions of higher salary without concomitant increases in responsibilities.

The foundation of an independent FFRDC is a staff well insulated from the political pressures that bear upon its sponsoring agency. DOD's plan for participating in the selection of SDII's staff is unusual and bodes ill for that staff's independence.

2. NONCOMPETITIVE SELECTION OF SDII CONTRACTOR

DOD has asked only one group of people to submit a proposal to manage the SDII. DOD has not identified these people, but they are rumored to be closely associated with the SDIO.

Rather than inviting only one proposal to manage the SDII, DOD should be seeking multiple proposals and should be reviewing them on a competitive basis. It's been done before. The July CRS report indicated that contractors running two of DOD's FFRDS's were chosen competitively, after DOD issued a general request for proposals [RFP]: (a) in 1984, DOD issued an RFP for contractors to run the new Software Engineering Institute and chose Carnegie-Mellon University; and (b) in 1983, DOD issued an RFP for contractors to run the Center for Naval Analysis and chose the Hudson Institute.

Thus, while Federal law permits DOD to select an FFRDC's contractor on a sole source basis and DOD has done that with a number of its FFRDC's, competitive selection is also appropriate and DOD has followed that procedure in recent years. It should do so with the SDII.

DOD has twice refused to identify the group of persons it has invited to submit a proposal to run the SDII. (Letters from SDIO to Senator LEVIN, dated April 16 and May 30, 1986.) It contends that such identification is premature since the individuals have yet to submit a management proposal and DOD has yet to enter into any final agreement with them.

Sole source contracting should not, however, be done behind closed doors. Congress and the American public have a right to know who is being considered to run a potentially important, multimillion-dollar program, especially if only one contractor is being considered and if that contractor is rumored to lack an independent perspective on the Star Wars Program. We should not have to wait until after DOD has selected the contractor to find out who it is.

Moreover, DOD should choose a contractor with a track record of scientific excellence. The July CRS report indicated that, in the three most recent instances of contractor selection, DOD chose established, respected contractors of proven excellence: (a) the Software Engineering Institute was created in 1984; DOD chose as its contractor a respected university, Carnegie-Mellon University; (b) the Logistics Management Institute was made an FFRDC in 1985, after it had performed 25 years of respected research in the logistics field; DOD chose as its contractor the same persons responsible for the facility's excellence over the years; (c) the Center for Naval Analysis received a new contractor in 1983; DOD chose an established and respected research center, the Hudson Institute, to manage it. Thus, it is unusual, especially in recent years, for DOD to select a contractor with no record of accomplishment.

In the case of the SDII, DOD has invited a group of persons to form a brand new organization to submit a proposal to manage the institute. Obviously, a new organization has no track record. In such an important endeavor, DOD should instead be inviting proposals from established, respected entities such as universities.

3. NO SELF-INITIATED RESEARCH

Self-initiated research is research which an FFRDC can decide to pursue, whether or not its sponsoring agency wants it to. Such research is thought to foster independence in the research center and may also attract higher quality scientific personnel. As stated in the May CRS report:

SDIO does not plan to allow SDII any money in its budget for initiating its own related research. Such contract provisions * * * are intended to encourage innovation and provide a means for funding studies designed to resolve conflicts among researchers over conclusions drawn from requested studies. * * * The claim has also been made, but not proven, that the ability to initiate studies helps to attract top scientific talent to the organization. * * * [S]etting aside a portion of SDII's budget for independent studies should be considered.

Moreover, the White House Science Council's Federal Laboratory Review Panel stated in a May 1983 report that 5-10 percent of a research facility's annual budget should be set aside for self-initiated research. This panel was

chaired by David Packard and another member was Edward Teller. The July CRS report indicates that all of DOD's existing FFRDC's, in practice, can perform self-initiated research. The portion of the budget allocated to such research varies but can be as high as 15 percent.

These studies suggest that, to guarantee its independence and excellence, the SDII should also be able to conduct self-initiated research.

4. NO CONFLICT OF INTEREST PROVISIONS

DOD refuses to consider requiring SDII employees to be subject to post-employment conflict of interest provisions. This is worrisome, since an SDII employee reporting on the merits of a particular company's research child, 2 weeks later, take a job with that company. Protections against possible bias should be adopted.

The July CRS report indicates that at least seven of the eight existing DOD FFRDC's have conflicts of interest policies in place, which could include post-employment restrictions. DOD should at least consider requiring such restrictions for the SDII.

5. INFLUENCING SDII'S ORGANIZATION

DOD plans to require the SDII to set up an internal organization which mirrors or complements the existing organization of the SDIO. It also plans to have the SDII submit 6-month work plans which have to be approved by the SDIO.

It is unusual for a sponsoring agency to control the internal organization of its FFRDC. The July CRS report states that: "It appears as if, typically, the sponsoring agencies are not interested in directing the FFRDC's as to how to organize themselves—they are primarily interested in results." DOD's plan to control the organization of the SDII is one more indication that it doesn't want a truly independent research center.

III. SOLUTION

The Star Wars Program is a research program. Its success will depend upon the integrity and credibility of its scientists. We cannot afford to fund a research center which is not needed or which, due to perceived or actual bias, will not be respected by the scientific community. We do not have the money to fund just another cheerleader for the star wars program. This is a good science issue which everyone here needs to look at and act upon.

The Senate Armed Services Committee has taken some steps to provide Congress with more information on the issues affecting the SDII's independence and the need for this institution.

Mr. LEVIN. Mr. President, I now seek some clarification from my colleague from Virginia, the distinguished chairman of the Subcommittee on Strategic and Theater Nuclear Forces on which I am pleased to serve. Now as my colleague may remember, during our committee's consideration of this bill, there was a good deal of discussion about the Strategic Defense Initiative Institute, a Federally Funded Reserarch and Development Center which the Department of Defense proposes to create to support the SDIO. In fact, I offered an amendment in our markup which would have had the effect of preventing the creation of such an FFRDC unless it had been specifically authorized by the Congress.

That amendment went to a vote and the chairman, who opposed it, prevailed. But, as one comes to expect of the Senator from Virginia, he was not content just to win a vote—he wanted to solve a problem. And while he disagreed with my solution, he did agree with my concerns about the way this FFRDC, this SDII, was being established and justified. In fact, I believe that we both shared a concern about assuring the independence and scientific credibility of the SDII, am I not correct?

Mr. WARNER. Indeed, you are correct. In fact, as the Senator well knows, those concerns were expressed in our committee report which indicated that "a number of valid questions need to be answered with regard to the establishment of a new FFRDC. . . ." And as the Senator knows, the legislative language in the bill requires the Department of Defense to provide the committee with a report designed to answer those questions and then prevents the DOD from establishing the SDII until the Congress has had 30 days to consider that report. In addition, the Senator and I agreed—and the report language reflects that agreement—that the General Accounting Office will also conduct a study of the SDII, which the Senator and I have already requested. Finally, as the Senator recalls, he and I agreed that the committee would hold a hearing on the issue after the DOD report was received and before funding was released for the establishment of the SDII.

Mr. LEVIN. The Senator is correct and in fact, I appreciate very much his willingness to enter into those agreements and understandings. In that context, I simply want to clarify a couple of points. First, is it the intent of the committee that DOD not take any action relative to SDII until the terms set forth in this bill and the report which accompanies it have been met?

Mr. WARNER. The Senator is correct: the committee clearly intends that the Department of Defense make no financial commitment relative to establishing or operating a Strategic Defense Initiative Institute. I would be happy to join with the Senator in a letter informing DOD of that clear intent.

Mr. LEVIN. I thank the Senator. Second, is it his understanding that the committee should hold the hearing mentioned in the report sufficiently prior to the expiration of the 30 legislative days specified in the report to allow the committee to formulate and the Congress to act on any recommendation we may deem necessary "with regard to continuation of the funding limitation contained in this bill"?

Mr. WARNER. Again, the Senator is correct. Given the pressure of business at the end of the session, it is of course difficult to fix a firm date. Assuming, however, that both the DOD and the GAO reports are received by September 15, it would be my hope that we could hold a hearing on this matter prior to the expected adjournment of the Congress.

Mr. LEVIN. I thank the Senator. Finally, as the Senator knows, there are some inconsistencies between the report language and the bill language on two key points. First, the report refers to a GAO and a DOD report while the bill only mentions the DOD report; second, the report refers to a 30 legislative day waiting period between the receipt of the reports and any action by DOD while the bill simply refers to a 30 day period. Would the Senator be willing to join with me in an amendment designed to make the legislative language conform more exactly to the clear intent of the committee as expressed in the report language?

Mr. WARNER. As is usually the case, the Senator has again proven he is an excellent lawyer. He is correct. The bill is not explicit on those points, and I agree that clarification would be useful. So I will gladly join my friend from Michigan in such an amendment.

Mr. LEVIN. Mr. President, this colloquy clarifies and adds to what is in the bill and in the committee report. First, they would stop activity on the SDII while Congress examines the need and the plans for this research institute.

Second, the amendment requires two reports, one from DOD and one from GAO on whether the DOD needs a new FFRDC, as they are called, devoted to the SDI Program and if so, whether DOD's plans for the SDII would encourage or discourage that institute's independence and objectivity. It states that upon receipt of both reports, Congress will have 30 legislative days to consider them and to hold a hearing which will further illuminate the issues.

I thank my colleague from Virginia on his willingness to clarify and strengthen the language in the bill that deals with this issue. While I do not feel that the bill even as amended is strong enough, as I would prefer to prevent any funding for the SDII until

Congress has authorized its creation, this amendment and colloquy does take us some way toward providing the congressional oversight that is needed in this situation.

It is my expectation that 30 legislative days will carry us into the next Congress. That amount of time is necessary to consider whether we need a new FFRDC just for star wars, especially in light of the unusual plans DOD has for managing it. It is also needed to provide sufficient opportunity for Congress to act, if it decides that the funding limitation should continue. I hasten to add that this extended period will not disrupt the Star Wars Program itself, since SDIO can continue to obtain the research it needs from its own staff and existing FFRDC's, corporations, and other research facilities.

Finally, the report indicates that after Congress has obtained the information it needs and considered the matter in full, it should decide whether to continue the funding limitation on the SDII. Congress needs to exercise this oversight authority.

The SDII issue is not over. In the months ahead, we will carefully consider the wisdom of creating this institute and we will carefully review DOD's plans for managing it. Unless DOD can justify its creation and formulate more evenhanded plans for operating it, the Congress may direct the Star Wars Program to spend its money elsewhere.

Mr. President, I understand this has been cleared on both sides. Senator WARNER did want to be here at the time of the vote, but I think he has no problem with our proceeding in his absence. His staff, I believe, has indicated that there would be no problem if he could not get back to the floor. He is a cosponsor of the amendment and I understand it has been cleared on both sides.

The PRESIDING OFFICER. Is there further debate?

Mr. NUNN. I support the amendment, Mr. President. I recommend that our colleagues accept it.

Mr. GOLDWATER. Mr. President, we accept this amendment.

The PRESIDING OFFICER. Is there further debate on the amendment of the Senator from Michigan?

The amendment (No. 2591) is agreed to.

□ 2240

Mr. GOLDWATER. I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. I yield to the Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that I might be permitted to be shown in the RECORD as a cosponsor of the Quayle amendment on the SDI study.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUMPHREY. I thank the Senator from Nebraska.

AMENDMENT NO. 2408

(Purpose: To require the Secretary of Defense, through the Chief of the National Guard Bureau, to develop policies to improve the reporting requirements for operations, maintenance, and repair of Army National Guard facilities)

Mr. ZORINSKY. Mr. President, I ask unanimous consent to set aside the pending amendment and call up Senate Amendment No. 2408.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Nebraska [Mr. ZORINSKY] proposes an amendment numbered 2408.

Mr. ZORINSKY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(At the appropriate place in the bill, insert the following:)

The Secretary of Defense shall require the Chief of the National Guard Bureau to develop and implement procedures to monitor the backlog of maintenance and repair projects of Army National Guard armories.

Mr. ZORINSKY. Mr. President, this amendment is designed to improve the Pentagon's ability to acquire information on the state of repair of Army National Guard armories across the country.

The Department of Defense total force policy, adopted in 1970, changed the way this country readies itself for the possibility of a conventional war in Europe. Under that policy, the role of the Army National Guard in meeting our preparedness goals has increased dramatically. The Guard is now charged with early deployment and combat missions very similar to those assigned to active Army units. Obviously, the great expansion of the Army Guard in both size and mission has placed great strains on the associated support functions. As with any governmental policy, the total force concept may be both supported or criticized with sound arguments, but it is clear that if we expect the Army Guard to act more like active forces, we have to treat the Guard more like active forces in many respects. This means more congressional oversight, better accountability, and more attention to the logistics of the Guard.

I have directed my attention toward the condition of National Guard armories for some time now. The armories are literally the peacetime home to the Guard units we would depend on to respond quickly in time of war. The armories are essential to maintenance, storage, and training for equipment and personnel that will control in large part how well Guard units will be able to fulfill their missions. Much of what I have seen indicates that a very large number of armories and associated facilities are seriously inadequate to meet the modern needs of the Army National Guard. I will not go into those findings, nor make proposals today to address these problems. However, I will put the Senate on notice that I plan to initiate a comprehensive effort in the near future to call attention to the problems that exist with regard to operations and maintenance funding for the Guard. The solution necessary to bring armory facilities up to an appropriate condition will require thoughtful and well-considered policy decisions in the Congress, and we should begin to build the record for this purpose. I look forward to working closely with my friends on the Armed Services Committee on these matters when that time comes.

My amendment today seeks to plug a hole in our accounting systems with regard to those important armory facilities. We have 2,655 Army Guard armories in the 50 States and the territories. They are not Federal assets. They are owned by the States. Different States have different budget problems, different spending priorities, and different commitments to National Guard assets within their borders. Clearly there is a great deal of variation in how those facilities are maintained. Unfortunately, the Department of Defense has no system in place to report data on armory maintenance and repair status. More importantly, no system is in place to ascertain the backlog of maintenance and repair. I have some idea of how far armories are behind on maintenance and repair, and how this can affect readiness of forces. I think if this information were known generally, we would all be very concerned about the dilapidated state of many armories. A major reason we haven't heard more discussion on this issue is that the backlog figures in the various States are not reported to and compiled by the Pentagon. Mr. President, we need those figures and my amendment is designed to develop them.

The amendment is very simple and short. It provides that: "The Secretary of Defense shall require the Chief of the National Guard Bureau to develop and implement procedures to monitor the backlog of maintenance and repair projects of Army National Guard armories."

That is it. There is no cost involved. There is no impact on the budget, except that it will help us allocate resources more effectively for the Army National Guard.

I know that the distinguished members of the Armed Services Committee have been giving increasing scrutiny to the less visible aspects of defense spending like operations, maintenance, and repair funding, that are very important for readiness concerns. I applaud their action and look forward to future efforts to enhance the capacity of the Army National Guard to fulfill its duties. Mr. President, the amendment has been cleared on both sides. I request its immediate adoption.

The PRESIDING OFFICER. Is there further debate?

The Senator from Arizona.

Mr. GOLDWATER. Mr. President, as an old National Guardsman myself, I think this is an excellent amendment and this side will take it.

The PRESIDING OFFICER. Is there further debate?

Mr. NUNN. Mr. President, I recommend that we accept the amendment of the Senator from Nebraska.

Mr. ZORINSKY. I thank the managers of the bill.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2408) was agreed to.

Mr. ZORINSKY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GOLDWATER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2592

(Purpose: To restrict the procurement by the Department of Defense of ball bearings and roller bearings and to give expedited consideration to cases involving ball bearings and roller bearings under certain trade law provisions)

Mr. DODD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Does the Senator first move to set aside the pending amendment?

Mr. DODD. Mr. President, I ask unanimous consent that the pending amendment be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The bill clerk read as follows:

The Senator from Connecticut (Mr. DODD) proposes an amendment numbered 2592.

Mr. DODD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 186, between lines 9 and 10, insert the following:

SEC. 963. LIMITATIONS ON THE PROCUREMENT OF BALL BEARINGS AND ROLLER BEARINGS; EXPEDITED CONSIDERATION UNDER CERTAIN TRADE LAWS.

(a) FINDINGS.—The Congress finds that—

(1) a healthy domestic ball and roller bearing industry (hereafter in this subsection referred to as the "industry") is of critical importance to a sound domestic industrial base in the United States;

(2) the industry has a broad role in the supply of essential components to other industries representing the core of a modern industrial economy;

(3) the Federal Government has previously recognized the importance of the industry to the defense-related industrial base of the United States by requiring that certain bearings purchased by the Department of Defense be manufactured in the United States or Canada;

(4) the United States market for this industry has been increasingly penetrated by imports over the past decade, which has resulted in reductions in capacity, employment, and abandonment of certain markets by domestic producers in the industry; and

(5) the industry is under a state of siege, caught between an eroding share of the domestic market and rising imports of bearings that compete with the industry's domestic customers.

(b) LIMITATIONS ON PROCUREMENT.—(1) Except as provided in paragraph (2), the Department of Defense may not procure ball bearings or roller bearings which have been manufactured outside the United States (including the Commonwealth of Puerto Rico, the Virgin Islands of the United States, and the territories and possessions of the United States).

(2)(A) If the Secretary of Defense certifies in writing to the Secretary of Commerce that—

(i) any kind of ball or roller bearings needed by the Department of Defense is not manufactured in the United States; or

(ii) any kind of ball or roller bearings manufactured in the United States is not available in sufficient quantities to meet the needs of the Department of Defense,

the prohibition prescribed in paragraph (1) shall not apply in the case of any contract for the procurement of such kind of ball or roller bearings which is awarded pursuant to a procurement solicitation issued during the period beginning 30 days after the date on which the certification is received by the Secretary of Commerce and ending on the date on which the Secretary of Defense or the Secretary of Commerce determines that the certified condition has terminated.

(B) Notwithstanding subparagraph (A), the Department of Defense may not conduct a procurement with respect to which a certification has been made under such subparagraph if the Secretary of Commerce disagrees with the findings of the Secretary of Defense (with respect to a condition described in such subparagraph) contained in the certification and notifies the Secretary of Defense, in writing, of the disagreement within 30 days after the date on which the certification is received by the Secretary of Commerce.

(3) The Secretary of Defense shall prescribe regulations to carry out this subsection.

(4) This subsection shall apply to procurement solicitations issued by the Department of Defense during the 5-year period beginning on January 1, 1987.

(d) AMENDMENTS TO THE TRADE EXPANSION ACT OF 1962.—Subsection (b) of section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862(b)) is amended—

(1) by striking out "Upon request" and inserting in lieu thereof "(1) Upon request", and

(2) by adding at the end thereof the following new paragraph:

"(2)(A) The President and the Secretary shall give expedited consideration to any application submitted under this section with respect to imports of ball bearings or roller bearings.

"(B) The Secretary shall provide notice to the Secretary of Labor of any determination made by the Secretary under paragraph (1) that imports of ball bearings or roller bearings threaten to impair the national security.".

(e) AMENDMENTS TO THE TRADE ACT OF 1974.—(1) Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) is amended by adding at the end thereof the following new subsection:

"(e) The Secretary shall give expedited consideration to any petition filed under section 221 on behalf of workers of a firm, or subdivision of a firm, that produces ball bearings or roller bearings if the Secretary of Commerce has determined under section 232 of the Trade Expansion Act of 1962, at any time during the 3-year period preceding the date of the determination of the Secretary under subsection (a), that imports of ball bearings or roller bearings threaten to impair the national security.".

(2) Section 251 of the Trade Act of 1974 (19 U.S.C. 2341) is amended by adding at the end thereof the following new subsection:

"(e) The Secretary shall give expedited consideration to any petition filed under subsection (a) on behalf of a firm that produces ball bearings or roller bearings if the Secretary has determined under section 232 of the Trade Expansion Act of 1962, at any time during the 3-year period preceding the date of the determination of the Secretary under subsection (c), that imports on ball bearings or roller bearings threaten to impair the national security.".

Mr. DODD. Mr. President, I have offered this amendment for the purpose of discussion. I say to my colleagues that I do not intend to pursue this amendment. I merely offer it and very shortly I will ask unanimous consent that the amendment be withdrawn.

It is a subject matter, Mr. President, which I think deserves a few moments of attention at this late hour tonight. I apologize to my colleagues for raising it at this point.

This amendment, very briefly, Mr. President, involves a study that was completed on June 18 by the Joint Logistics Commanders of the Department of Defense. It is a very important report, one that did not receive a great deal of attention by the media, but nonetheless an extremely important report on the state of the ball-bearing industry in this country and the importance of that industry to our national defense and national security.

This report contains a number of very troubling conclusions as to what the industry will face and our country could face in the coming years.

Among other things, the report found that "the industry is at risk and

will experience a dramatic contraction if nothing is done" to reverse the erosion of this industry which has resulted from increasing import penetration. The industry has already lost one-third of its domestic market to foreign firms. As plant after plant has closed its doors, 10,000 American workers lost their jobs. Moreover, the report concluded that if we do not soon take action to reverse these trends, we may find ourselves with a domestic industry which is incapable of meeting our defense requirements at the time when we may need it the most, at the time of a national emergency.

This latter conclusion is the one that makes this issue so relevant during the discussion of this bill. Ball and roller bearings are crucial components of almost every product of our aerospace and weapons industry. We simply cannot afford the total elimination of the American industrial base for this product. The time has come to act to save our domestic bearing industry and thereby protect our national security.

The amendment I have introduced aims at the revitalization of this industry, so critical to our national defense. The amendment requires that, for a period of 5 years, all Defense Department procurement of ball and roller bearings be from domestic companies, unless the Secretary of Defense certifies that a specific type of bearing is not available domestically in sufficient quantity. I believe this provision will be able to restore profitability for the industry by guaranteeing a minimum level of sales.

Defense industry alone, however, may not be able to do the job as it represents only 15 percent of the industry's sales. For that reason I also included provisions for the expedited consideration of any request by the industry for tariff or quota protection under the national security provisions of section 232 of the Trade Expansion Act of 1982. Finally, as it may not be possible to reopen all of the closed factories of the industry, I also included provisions for expedited consideration of petitions by workers or firms in this industry for trade adjustment assistance under the Trade Act of 1974. It is my hope that this will ease their painful transition to other employment and business activities.

I trust that my colleagues will realize the importance of taking the first step toward the preservation of this key industry so important for the national defense. I ask my colleagues to support my amendment.

Mr. President, I realize that this study on the bearing industry is a relatively new item before the Senate. Its conclusions, however, are so stark for a crucial segment of our defense production structure that I felt compelled to enter this issue into our debate over the Defense budget.

The bearing industry is very important in my State, Connecticut, and also in 20 other States where the industry has factories. Since 1980, Connecticut alone has lost nearly 3,000 jobs as imports have replaced domestic sales. Comparable losses have also occurred elsewhere in the United States. These are, however, employment issues, trade issues, market penetration issues not directly relevant to the legislation before us.

What is very relevant, though, is the fact that this problem also has an important national security aspect that I have already described. This aspect cannot be left to the Commerce Department and the Finance Committee of the Senate. It is the responsibility of the Armed Services Committee to exercise oversight over the defense production capacity of the Nation.

The serious condition of the bearing industry has been recognized by the leaders of the Department of Defense. Reacting to this report, Assistant Secretary of Defense James P. Wade expressed the concern of the Department over the availability of domestic bearings and the state of the domestic bearing industry. He also declared that in order to maintain a domestic source for bearings something needs to be done. I repeat, something needs to be done.

I realize that my amendment could not prevail over the objections of the distinguished managers of the bill. I hope, on the other hand, that their objection is only procedural and not directed against the substance, and effort to find remedy for this situation.

Normally this amendment is something you would offer on a trade bill or Department of Commerce legislation. I offer it to draw the attention of my colleagues to this issue when it comes to the defense capabilities of this country.

Obviously, in the time remaining in this year, it is not possible, but in the next Congesss this report should be examined by the Senate Armed Services Committee. We ought to have a say in this. It ought not to be left entirely up to the trade folks or the State Department as to whether or not we allow deeper penetration in this market.

This is an important national security question, and the simple request I have of my distinguished colleagues, is some commitment that they would take a look at this report and possibly report back to the Congress how we might deal with this issue.

I would be glad to yield to my distinguished colleague from Arizona.

Mr. GOLDWATER. I thank the Senator from Connecticut for bringing this up. I remind my friend that the biggest factor in the victory of the allies over Germany was the initial raid on Stuttgart when they practically destroyed the German ability to build ball bearings and they never were able to recover. It is one of the most important items we have.

Mr. DODD. I thank the Senator.

Mr. NUNN. Mr. President, will the Senator yield?

Mr. DODD. I will be glad to yield.

Mr. NUNN. I appreciate the Senator from Connecticut bringing this amendment up and discussing it. I think it is important. It would be my suggestion in order to focus the committee on this that the Senator from Connecticut write a letter to the chairman of the committee and favor me with a reply and that we would then in turn write to the Preparadness Subcommittee and also to communicate with them orally and ask Senator HUMPHREY and Senator DIXON to undertake to have a hearing on this subject next year in the Preparedness Subcommittee, if that would be satisfactory.

Mr. DODD. I thank my colleague from Georgia. That is more than satisfactory.

Mr. President, the offer of the Senator from Georgia is one that I accept. It is a gracious offer that the committee would look at this.

I ask unanimous consent that the amendment be withdrawn.

The PRESIDING OFFICER. Without objection, the amendment is withdrawn.

AMENDMENT NO. 2593

(Purpose: To amend section 932 of the Department of Defense Authorization Act, 1986 to clarify the prohibition on felons convicted of defense contract related felonies from working on defense contracts and to extend the prohibition to five years.)

Mr. DODD. Mr. President, I have one additional amendment that I send to the desk at this time and ask for its immediate consideration.

The PRESIDING OFFICER. Does the Senator again move to set aside the pending amendment?

Mr. DODD. Again I ask unanimous consent to lay aside the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered, and the clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Connecticut [Mr. DODD], for himself and Mr. BOREN proposes an amendment numbered 2593.

Mr. DODD. Mr. President, I ask unanimous consent that the amendment be considered as read.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 147, after line 22, insert the following new section:

SEC. 933. PROHIBITION ON FELONS CONVICTED OF DEFENSE CONTRACT RELATED FELONIES AND PENALTY ON EMPLOYMENT OF SUCH PERSONS BY DEFENSE CONTRACTORS.

Subsection (a) of section 932 of the Department of Defense Authorization Act, 1986 (Public Law 99-145) is amended by—

(1) inserting after "management or supervisory capacity" the following: ", including the capacity of service on the board of directors,"; and

(2) striking out "one year" and inserting in lieu thereof "five years".

Mr. DODD. Mr. President, this is a very simple amendment and I do not expect it to create much controversy. I have discussed it with my colleagues on this side and the majority side as well. This amendment raises the penalty that we created in last year's DOD authorization bill. Very specifically, it raises the length of time from 1 year to 5 years during which a person convicted of fraud in the defense procurement process cannot be employed in a supervisory or management position by a defense contractor.

Now, Mr. President, in the past we have said if you are convicted of a felony, you will be suspended for 1 year. Well, the fact is that if you are convicted of a felony, you are going to go to prison for a time, unless your sentence is suspended. What we are trying to do is make it more realistic, to make it a minimum of 5 years, but let the Secretary of Defense determine a longer period. What we have seen over the past several years with all of the allegations raised about various defense contractors in this country is that the company is suspended from doing business.

□ 2250

In effect, blue-collar workers are being punished for white-collar crime. What we are suggesting is that those people who are convicted of fraud ought to be the ones to bear the burden of the punishments, but they should be meaningful. If we are going to make just a small sentence or allow them to go back to doing business as usual with the Government, as if nothing happened, then I do not think it will have the kind of effect it should have.

This amendment takes it from 1 year to 5 years. It prohibits them from being employed in a supervisory-management position and excludes them from the board of directors during that time as well.

Mr. COHEN. Mr. President, if the Senator will yield, I think we agree with the thrust of what the Senator from Connecticut is trying to do.

In view of the lateness of the hour, the fact that few people are here, there is some reluctance to simply accept this amendment up to a 5-year penalty.

I recommend, if the Senator is willing, that he amend his amendment to make it 1 to 3 years, putting a cap at 3, for this period of time at least, and it will be acceptable. I think the chairman will accept that as well as the membership and Senator NUNN and myself.

Mr. DODD. There is no upward limit. The Secretary would have the discretion to impose 5 years or 7 years or 10 years. We set the ceiling at 5. I do not want to make it meaningless. My point is that with 1 year, you might as well not have it.

Mr. COHEN. We agree on that. We think some balance should be struck at this point, and perhaps we will revisit this next year and go to a higher figure.

Mr. DODD. The limit would be 3 years? Is that the understanding?

Mr. NUNN. Mr. President, I recommend that the Senator accept that. That is at least substantial progress along the line the Senator from Connecticut is anxious to move, and we can take another look at it next year.

Mr. DODD. Mr. President, I modify my amendment by striking 5 years and making it 3 years, with the understanding that we are talking about it being a minimum of 3 years, with the discretion of the Secretary to impose a longer period of time should he so decide. Are we clear on that point?

Mr. COHEN. That is correct.

Mr. DODD. Mr. President, if there is agreement on that particular point, I accept the suggestion of the Senator from Maine and the Senator from Georgia. We will look at it again next year and possibly raise it.

Mr. COHEN. If we make the penalty so high on the first offense, you may have a situation where defendants are able to negotiate a plea and engage in plea bargaining and get it down to a misdemeanor. We are trying to get people who are defrauding the Federal Government, and we do not want to set a penalty so high that a deal is made so that they do not have to face the charge.

Mr. DODD. The Senator from Maine makes a good point, and I am glad to accept that modification.

The modified amendment is as follows:

On page 147, after line 22, insert the following new section:

SEC. 933. PROHIBITION OF FELONS CONVICTED OF DEFENSE CONTRACT RELATED FELONIES AND PENALTY ON EMPLOYMENT OF SUCH PERSONS BY DEFENSE CONTRACTORS.

Subsection (a) of section 932 of the Department of Defense Authorization Act, 1986 (Public Law 99-145) is amended by—

(1) inserting after "management or supervisory capacity" the following: ", including the capacity of service on the board of directors,"; and

(2) striking out "one year" and inserting in lieu thereof "three years".

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment as modified.

The amendment (No. 2593), as modified, was agreed to.

Mr. DODD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GOLDWATER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2594

Mr. WARNER. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. Does the Senator first ask unanimous consent to set aside the pending business temporarily?

Mr. WARNER. Yes, I ask unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Virginia [Mr. WARNER] proposed an amendment numbered 2594.

Mr. WARNER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in Title II, Sec. 202, add the following new subsection:

( ) DOD SOFTWARE ENGINEERING INSTITUTE AND VERY HIGH SPEED INTEGRATED CIRCUITS, AIR FORCE.—Of the funds appropriated pursuant to an authorization in this act, not more than $14,541,000 may be obligated and expended for the DOD Software Engineering Institute and not more than $127,897,000 may be obligated and expended for the Very High Speed Integrated Circuits program.

Mr. WARNER. Mr. President, this amendment is in the nature of a reprogramming.

The programs involved in the amendment are research and development programs being conducted by the Air Force. Both are very meritorious in that they are aimed at areas with tremendous potential to enhance the performance of future weapon systems. VHSIC is seeking to miniaturize electronic circuits and thereby increase their performance—speed—and reduce their volume and weight. The Software Engineering Institute is aimed at perhaps the most pressing problem facing the development of modern weapons systems and that is their software.

The reallocation of funding in this amendment is based on new information made available to the committee since the markup of the authorization bill. The reallocation would have the effect of putting the implementation of the Software Engineering Institute back on the schedule approved by the Congress in fiscal year 1986 defense authorization bill. In the judgment of this Senator, the reduction in the VHSIC Program, even if sustain in the conference, would not adversely affect

the pace of inserting this technology into new weapon systems.

Mr. President, this amendment has been agreed to by the managers of the bill on both sides, and I urge its acceptance.

Mr. HEINZ. Mr. President, I wish to express my support for the amendment offered by my distinguished colleague from Virginia. His amendment addresses an oversight in authorization for the Department of Defense Software Engineering Institute. Since the President's budget submission in early February, I have been working to correct a $5 million error in the Air Force request for the Software Engineering Institute.

Having failed to assign a program office in a timely manner, the Air Force mistakenly requested $9.7 million for the program instead of a planned spending level of $14.1 million. The mistaken 34-percent reduction will virtually stop growth at SEI, and with its reduced effectiveness, cost the taxpayers millions in lost savings.

In fiscal year 1985, the military spend $10 million on mission critical software only. This expenditure is estimated to reach $32 billion by 1990. If the Software Engineering Institute makes only a 1-percent improvement in productivity and SEI officials believe they can do much better, a minimum of $100 million will be saved annually. This annual savings exceeds the entire SEI budget for over 5 years.

The Air Force understands that the SEI Program will save many times more than it spends and agrees that if the spending level for SEI is not adjusted, software quality in the military will suffer.

Mr. Chairman, I want to thank my colleague from Virginia and the members of the Armed Services Committee for their cooperation on this matter. I am hopeful that the Members of the Senate will approve the amendment.

Mr. NUNN. Mr. President, I recommend that we accept the amendment.

Mr. GOLDWATER. We have no objection on this side.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2594) was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GOLDWATER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NUNN. Mr. President, are there other Senators who have amendments?

Mr. WILSON. Mr. President, I have an amendment at the desk, and I ask for its consideration.

The PRESIDING OFFICER. Does the Senator first ask unanimous consent to temporarily lay aside the pending amendment?

Mr. WILSON. Mr. President, I ask unanimous consent to temporarily lay aside the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT 2595

(Purpose: To provide funds for and place certain limitations on the Rolling Airframe Missile program and the Penguin Missile program)

Mr. WILSON. Mr. President, I have an amendment at the desk which I offer on behalf of myself, Senator NUNN, Senator QUAYLE, and Senator LUGAR.

The PRESIDING OFFICER. A copy of the amendment is not at the desk.

Mr. COHEN. It is called the "Stealth amendment"—you have it but you cannot see it.

The PRESIDING OFFICER. The amendment is now at the desk, and it will be stated.

The assistant legislative clerk read as follows:

The Senator from California [Mr. WILSON], for himself, Mr. NUNN, Mr. QUAYLE, and Mr. LUGAR, proposes an amendment numbered 2595.

Mr. WILSON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, line 11, strike out "$5,557,490,000" and insert in lieu thereof "$5,597,490,000".

On page 6, between lines 12 and 13, insert the following new subsection:

(g) ROLLING AIRFRAME MISSILE PROGRAM.—(1) None of the funds appropriated pursuant to an authorization in this title may be obligated or expended in connection with procurement of the Rolling Airframe Missile program until the Secretary of Defense has certified in writing to the Committees on Armed Servcies of the Senate and the House of Representatives that—

(A) the total Navy research and development cost of the Rolling Airframe Missile program will not exceed $219,700,000; and

(B) the Secretary will terminate the program if at any time he determines that the total Navy research and development cost will exceed the amount specified in subparagraph (A); and

(C) the recurring missile unit flyaway cost for a minimum of 4,900 missiles will not exceed $100,000 per missile (using fiscal year 1986 dollars as the base year); and

(D) the design of the Rolling Airframe Missile and its unique support equipment are complete and that the system performance has not been degraded from the original development specifications (as contained in Navy Decision Coordinating Paper No. SO-167-AA); and

(E) the Director of Operational Test and Evaluation has approved a test and evaluation master plan for the Rolling Airframe Missile.

(2) If the Secretary of Defense fails to make the certification described in paragraph (1) by March 30, 1987, he shall cause the Rolling Airframe Missile program to be terminated effective on that date.

(3) Subsection (d) of section 205 of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 608), is repealed.

(4) Department of Defense reprogramming request 85-91PA is approved.

Mr. WILSON. Mr. President, this amendment restores funding for a program which the Committee on Armed Services reluctantly decided to terminate during its review of the fiscal year 1987 defense authorization bill. This program is especially important because it involves cooperative development efforts with an important NATO ally.

The rolling airframe missile—called the RAM missile—program is a joint program between the United States and the Federal Republic of Germany, and is intended to meet an urgent United States and German Navy requirement to counter high-speed, antiship cruise missiles.

In 1979 the United States joined in a collaborative development effort with the Federal Republic of Germany and with Denmark to develop the RAM missile. The RAM missile is a lightweight, fast response missile that extensively uses existing components of other missiles, but integrates them in an ingenious new way to meet the challenging threat posed by modern antiship cruise missiles.

In addition to meeting a critical need in the Navy, the RAM missile also offers an advantage in that it is a joint program with the Federal Republic of Germany. The United States and Germany share development costs on a 50-50 basis. This is a model for joint cooperative development of weapon systems.

Mr. President, the Committee on Armed Services reluctantly decided to terminate the RAM missile program during markup of the authorization bill. The committee believed that cost problems and reliability problems with the RAM missile, and cost and priority considerations for the Penguin missile justified termination of the programs.

At the time the Sea Power Subcommittee recommended termination of this programs, Senator NUNN noted that Dr. Donald Hicks, Under Secretary of Defense for Research and Engineering, had expressed reservations over the proposed termination. Senator NUNN thereafter wrote Dr. Hicks expressing the concerns raised by the subcommittee, specifically on the RAM missile, and requested more complete information for full committee consideration.

Unfortunately, we did not receive that information before the full committee met to review and approve the recommendations of the subcommittee. When we did receive the response from Dr. Hicks, Senator NUNN, and I indicated to our colleagues on the Armed Services Committee that we would study the matter further and

and consider a floor amendment to restore funding for this program. Since that time we have received a good deal of additional information on the RAM Missile Program.

Let me say at this point that not only Senator NUNN but also Senator QUAYLE has devoted a great deal of time in studying these issues as well. We are pleased to join in sponsoring this amendment and I congratulate them for their detailed analysis of these complex issues.

Mr. President, I want to say that I am most anxious to restore this program because it represents a model for what I think we must do in the future—and that is work much more closely in collaborative development efforts with our NATO allies. The burden for defending the free world is greater than the United States can bear alone. Indeed, as is well known, the NATO alliance outspends the Warsaw Pact, yet we are perpetually behind the Warsaw Pact in terms of numbers of weapons and people under arms. One of the key reasons for this paradox is the redundant and parallel development efforts which plague our alliance. Too much of the time we duplicate the efforts of each other, and in the process we waste limited defense resources and lower the interoperability of our combat forces.

That is why Senator NUNN wisely sponsored a provision in last year's defense authorization bill which created a new program for NATO cooperative research and development. That program proposed funding for collaborative weapons development with NATO allies. To date the responses have been excellent and progress has been very encouraging. Proposed termination of the RAM and Penguin Programs, however, has cast a shadow over this cooperative development program. Allies are questioning our commitment to cooperation.

I have received numerous letters testifying to the serious impact termination would have on prospects for continued collaborative development. The doubt and skepticism that termination casts on NATO cooperation requires restoration of these programs.

I should say that this program has not been without problems. There have been serious technical problems in the RAM development program. It has had cost-growth problems. And some have questioned the requirement for this system.

Mr. President, the provisions we incorporate in our amendment are designed to insure that there is tangible military merit in this program and that we have resolved the cost and performance problems before we make a further commitment to it. I believe this amendment strikes the appropriate balance between continuing the momentum in joint NATO cooperative programs and insuring the military and financial soundness of these programs.

Mr. President, I ask unanimous consent to have printed in the RECORD a sheaf of requests received from United States and Germany and other NATO officials asking the restoration of this program.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EMBASSY OF THE FEDERAL
REPUBLIC OF GERMANY,
*Washington, DC, June 27, 1986.*

Hon. PETE WILSON,
*U.S. Senate, Washington, DC.*

DEAR SENATOR WILSON: Please find for your information the text of letters from the Federal Minister of Defense, Dr. Manfred Woerner, to Senators Goldwaters, Nunn, and Cohen as well as Congressmen Aspin and Dickinson.

Subject of the letters, which were delivered yesterday, is the German position on the recent developments concerning funding of the Rolling Airframe Missile (RAM).

Your assistance in this matter would be highly appreciated.

Sincerely yours,

HASSO VON USLAR,
*Brigadier General.*

---

COURTESY TRANSLATION

I have been advised that the Senate Armed Services Seapower Subcommittee, and the House Armed Services R&D Subcommittee, have recently disapproved the research and development funding for the Rolling Airframe Missile Program (RAM). RAM is a joint U.S.-German program. Our two countries share equally in the development costs. The German Navy has an urgent requirement for this defensive weapon that would be able to counter the immediate missile threat facing our ships. For this reason the Federal Republic of Germany has already invested more than 300 million DM in the development of RAM and has helped the project overcome the difficult problems of recent years. We are of the opinion that the program has now moved to solid ground.

The actions of the subcommittees consequently have come as a surprise. I must believe that the fact has been overlooked that RAM is a cooperative international program. So that there can been no doubt, let me emphaisze a termination of the program in this manner would constitute a serious setback for the armaments cooperation between our two countries. Such unilateral decisions without regard for the cooperating partner must lead to the impression in the Federal Republic that our influence in the program is restricted only to a financial contribution. The consequences would be devastating—setting aside the fact that I would be required to explain the U.S. withdrawal from RAM, and thus the failure of the program, to our Parliament. This would come after the Federal Republic of Germany has expended more than 300 million DM in development funds almost exclusively to the benefit of U.S. industry.

While I believe that the actions of the subcommittees are not final, this negative signal is already now having consequences for the public debate in the Federal Republic. Until now the U.S. Congress has been perceived as a proponent of Trans-Atlantic armaments cooperation. I, therefore, implore that you exercise your influence for a repeal of the actions of the subcommittee. I sincerely thank you for your efforts.

Yours,

MANFRED WOERNER.

---

THE SECRETARY OF STATE,
*Washington, DC.*

Hon. PETE WILSON,
*U.S. Senate, Washington, DC.*

DEAR SENATOR WILSON: I am writing to express, from the foreign policy perspective, my urgent concern and sincere disappointment over the recent decisions by the Committees on Armed Services of both houses to recommend eliminating U.S. funding for the Rolling Airframe Missile (RAM) joint project with the Federal Republic of Germany.

RAM has contributed significantly to our ability to manage multinational programs. In addition to its military merits, RAM is considered by our European allies as a bellwether for future defense industrial cooperation in the spirit of last year's Nunn Amendment. Despite early problems, it now has strong potential to become the first collaborative development project with our NATO allies to transition into a collaborative production program. It will save costs and have important symbolic value in terms of rationalizing NATO's industrial base. I cannot stress enough that if Congress cancels this program with its substantial German investment, it will imply that the United States puts little stock in such undertakings and it will be much more difficult to convince the FRG and other allies to invest in cooperative projects with the United States. Our allies might put greater emphasis on intra-European cooperation to the exclusion to the exclusion of U.S. industry.

Even in the face of our current budgetary stringencies, I believe we must continue to fund those programs which have high leverage for our foreign policy. I believe RAM is such a program, and I would appreciate your support in restoring funds for it in FY 1987.

Sincerely yours,

GEORGE P. SHULTZ.

---

EMBASSY OF THE FEDERAL
REPUBLIC OF GERMANY,
*Washington, DC, June 27, 1986.*

Col. CHRISTIAN M. SHORE,
*EUR/NATO Policy, ISP, The Pentagon, Room 4 D 776, Washington, DC.*

DEAR CHRIS: Please find for your information the text of letters from the Federal Minister of Defense, Dr. Manfred Woener, to Senators Goldwater, Nunn, and Cohen as well as Congressmen Aspin and Dickinson.

Subject of the letters, which were delivered yesterday, is the German position on recent developments concerning funding of the Rolling Airframe Missile (RAM).

Sincerely yours,

HARSO VON USLAR,
*Brigadier General.*

---

COURTESY TRANSLATION

I have been advised that the Senate Armed Services Seapower Subcommittee, and the House Armed Services R&D Subcommittee, have recently disapproved the research and development funding for the Rolling Airframe Missile Program (RAM). RAM is a joint U.S.-German program. Our two countries share equally in the development costs. The German Navy has an urgent requirement for this defensive weapon that would be able to counter the

immediate missile threat facing our ships. For this reason the Federal Republic of Germany has already invested more than 300 million DM in the development of RAM and has helped the project overcome the difficult problems of recent years. We are of the opinion that the program has now moved to solid ground.

The actions of the subcommittees consequently have come as a surprise. I must believe that the fact has been overlooked that RAM is a cooperative international program. So that there can be no doubt, let me emphasize a termination of the program in this manner would constitute a serious setback for the armaments cooperation between our two countries. Such unilateral decisions without regard for the cooperation partner must lead to the impression in the Federal Republic that our influence in the program is restricted only to a financial contribution. The consequences would be devastating—setting aside the fact that I would be required to explain the U.S. withdrawal from RAM, and thus the failure of the program, to our Parliament. This would come after the Federal Republic of Germany has expended more than 300 million DM in development funds almost exclusively to the benefit of U.S. industry.

While I believe that the actions of the subcommittees are not final, this negative signal is already now having consequences for the public debate in the Federal Republic. Until now the U.S. Congress has been perceived as a proponent of Trans-Atlantic armaments cooperation. I, therefore, implore that you exercise your influence for a repeal of the actions of the subcommittes. I sincerely thank you for your efforts.

MANFRED WOERNER.

---

U.S. PERMANENT REPRESENTATIVE
ON THE NORTH ATLANTIC COUNCIL,
*July 15, 1986.*

Hon. PETE WILSON,
*U.S. Senate, Washington, DC.*

DEAR PETE: I am very concerned that the decision by the Senate Armed Services Committee to terminate funding of the RAM cooperative project will not only have a damaging impact on U.S.-West German relations, but could also jeopardize the progress being made with our NATO Allies in developing a more effective framework for transatlantic armaments cooperation under the innovative Nunn-Roth-Warner legislation.

As you know, the RAM program has been promoted on both sides of the Atlantic as a pioneering R&D effort that will pave the way for a new generation of NATO armaments cooperation projects. There are two particular aspects of the RAM program which deserve the continuing support of the Congress. First, RAM is a jointly funded effort between the U.S. and the FRG involving a substantial sharing of technologies on both sides. This type of jointly funded and co-developed program is certainly in the U.S. interest as it significantly lowers the cost of R&D to the U.S. Services and gives us access to valuable technologies developed by the European Allies. Second, the RAM progam features a unique competitive, second source production agreement between the U.S. and German consortia which will guarantee high quality and low production costs for the U.S. Navy.

Termination of this program will certainly be a serious blow to the Government of the FRG, and particularly, to Defense Minister Woerner who strongly supported the RAM program despite technical and financial difficulties, and strong industrial pressures to pursue a Europe-only solution. The Committee's decision will raise bitter questions in the Bonn government and in the Parliament as to whether the FRG can count on the United States to pursue armaments cooperation on an ambitious scale over the long term.

I am also very concerned that the Committee's decision comes just as we are in the process of negotiating at least twelve MOU's to pursue armaments cooperation with the Allies under the framework of the Nunn-Roth-Warner legislation. We have pushed the Allies hard to join us in what is one of the most promising efforts to improve NATO conventional defenses. Failure to provide a clear and affirmative signal that the European Allies can depend on Congressional support for NATO armaments cooperation in the coming years will certainly complicate our current negotiations and even reduce Allied participation in this initiative.

I fully realize that the RAM program has run into financial and technical problems in the past. Nonetheless, the importance of this program for U.S.-FRG relations and its impact on the future success of the Nunn-Roth-Warner armaments cooperation initiative, makes it essential that we make an additional effort to ensure the completion of this program.

Sincerely yours,

DAVID M. ABSHIRE,
*Ambassador.*

---

CHIEF OF NAVAL OPERATIONS,
*July 15, 1986.*

Hon. BARRY GOLDWATER,
*Chairman, Committee on Armed Services, U.S. Senate, Washington, DC.*

DEAR MR. CHAIRMAN: I am writing to solicit your support to reverse recent actions by the Senate and House Armed Services Committees which will result in termination of the Rolling Airframe Missile (RAM) program unless you support a floor amendment to the FY-87 Authorization Act.

We have an urgent need for RAM to meet our requirements for a lightweight missile system with adequate firepower to defend against anti-ship missiles. Termination of this program will reduce our warfighting capability in the near term, and it will necessitate service life extensions of obsolete systems while requiring costly development of a replacement system to meet our long term needs.

The concerns expressed by Congress about RAM include technical difficulties, cost increases during development, responsiveness to the threat and projected unit production costs. We have reviewed the RAM program and acknowledge that it has experienced some technical delays, but we are confident that the design is functionally sound and the program has overcome its technical difficulties. RAM can respond to most threat missiles now, and it has been designed with the capability for upgrade to enable countering passive missiles in the future. We can sign a capped development contract this summer which will bring development and production unit costs under control. In addition, we are continuing our efforts to reduce missile unit costs below recent commitments made by the prime contractor.

We need your support for the immediate continuation of the RAM program because our fleet needs it now. I am sending a similar letter to Chairmen Stevens, Chappell and Aspin.

Sincerely,

C.A.H. TROST,
*Admiral, U.S. Navy.*

---

U.S. DEPARTMENT OF STATE,
*Washington, DC, July 17, 1986.*

Hon. PETE WILSON,
*Committee on Armed Services,*
*U.S. Senate.*

DEAR SENATOR WILSON: Ambassador Burt has asked me to forward to you the enclosed letter which we received electronically from Embassy Bonn.

Sincerely,

HARRY J. GILMORE,
*Director, Office of*
*Central European Affairs.*

---

U.S. DEPARTMENT OF STATE,
*Washington, DC.*

Hon. PETE WILSON,
*Committee on Armed Services,*
*U.S. Senate.*

DEAR PETE: I was surprised and extremely disappointed to hear that the Committee on Armed Services recommended the termination of the Rolling Airframe Missile (RAM) Cooperation Agreement program. I cannot overemphasize the negative impact that the unilateral termination of this program would have on our multifaceted and vital defense relationship with the Federal Republic of Germany.

I understand and appreciate the checkered technical and cost history of RAM, but I have been assured by the U.S. Navy and technical experts from industry that both aspects are now under control and we can move forward on firm technical and financial ground.

As important as this system is militarily to the German Navy, the consequences in a broader context to the two way street are even more critical. The Federal Republic has already invested over 300 million marks in research and development. German government and industry have several hundred million marks more invested or committed to facilitization for production, testing and simulation. The U.S. proposal to cease participation in this model cooperative venture has been met with shock and disbelief in the German Ministry of Defense and Navy.

It is seen as a direct personal blow to Minister Woerner, a steadfast friend and staunch ally of the U.S., and by extension, to the close relationship we enjoy.

This contemplated action appears to be in direct opposition to the principles of section 1103 of last year's Defense Authorization Act, the "Nunn Amendment", and would have a disastrous effect on our future efforts at cooperative research and development within NATO.

It is in view of the above far-reaching consequences that I ask you to take positive action now to restore the RAM program in the budget.

Sincerely,

RICHARD R. BURT,
*American Embassy, Bonn, Germany.*

---

THE UNDER SECRETARY OF DEFENSE,
*Washington, DC, June 16, 1986.*

Hon. SAM NUNN,
*U.S. Senate,*
*Washington, DC.*

DEAR SAM: I appreciate the opportunity to respond to your question on RAM. I, too, have been concerned about this program as it not only supports an urgent Navy requirement for a high firepower self-defense naval

missile, but also bears directly on our credibility in embarking on future NATO cooperative development and production programs under your initiative.

The current FSED program will be cost capped at $409.2M, which is approximately double the 1977 estimated joint development costs. Until reliability and quality assurance problems became evident late in 1984, the R&D program was on schedule. When the contractor's flight test success rate dropped to 50% in February 1985, the Navy ordered a complete program review and restructuring. This resulted in additional R&D costs associated with a revised FSED program.

The flight test failures have been associated with reliability of the engineering prototype missiles. At the same time, these same missiles have demonstrated the capability of this unique dual-mode RF/IR seeker application to engage very high speed, sea-skimming threat representative targets. In fact, when the missile has flown reliably, all performance standards have been met or exceeded. In order to ensure that missile reliability in all environments is acceptable, we have restructured the FSED program to include more stringent ground and flight testing. Consequently, fleet introduction is now planned for 1990.

In November 1984, a dual source competitive acquisition strategy with Germany was initiated for future production. The combined effects of stretching out early production due to the restructured FSED program and assuming the full burden for facilitizing the US production line had a near-term impact of doubling the nonrecurring costs associated with the establishment of a production facility. This cost now must be distributed across the low rate missile procurements shown in the President's Budget for FY87-89. I concur that the projected unit cost of the RAM is excessive. We have taken the initiative to direct the prime contractor to undertake a cost reduction program to ensure unit production cost does not exceed $125K per round in the first year of full competition, 1990. This would compare favorably with the 1979 unit cost estimate of $80K in then-year dollars.

The RAM was not intended to counter passive homing missiles, which make up a small portion of the current threat inventory and are not projected to be in substantial numbers in the 1990s. Naval layered defense provides adequate counters to the limited numbers of passive missiles in the form of NATO Sea Sparrow and Phalanx Close-in Weapon System.

The Federal Republic of Germany has two choices if the RAM program is terminated by Congress. They can terminate participation in the program or assume the entire burden of the remaining development cost estimated at $180M. Termination of the RAM program will have a negative impact on our ability to encourage future NATO cooperative programs. I again request your assistance in providing the required fiscal support for RAM.

Sincerely,

DONALD A. HICKS.

---

THE SECRETARY OF DEFENSE,
*Washington, DC, July 3, 1986.*

Hon. BARRY M. GOLDWATER,
*Chairman, Senate Armed Services Committee, U.S. Senate, Washington, DC.*

DEAR MR. CHAIRMAN: I was dismayed to learn of the recommendation of the Committee on Armed Services to terminate the Navy's programs to develop the Rolling Airframe Missile (RAM) and to arm the LAMPS III helicopter with the Penguin anti-ship missile.

The military need for these systems is urgent. The Penguin will provide a new and extremely useful capability that cannot be provided by any other weapon, including Harpoon. We will separately provide you classified information that substantiates the requirement for Penguin.

Both the US Navy and the German Navy presently have ships in commission with no protection against anti-ship missiles. RAM promises to correct that unacceptable situation. RAM also provides significant firepower improvements to our ships with NATO Sea Sparrow self defense systems. While the program has had its share of problems, recent efforts have borne fruit and the program is now on solid ground. A recent test firing was an unqualified success, and we believe that we have both the development cost and the production cost under control.

Aside from the military need for these weapons, the programs are symbolic of our commitment to the principles set forth in Section 1103 of last year's Defense Authorization Act—the "Nunn Amendment" on NATO Cooperative Research and Development.

We have worked hard with our NATO Allies to implement the provisions of the Nunn Amendment and the related appropriation. This required asking the Allies to help fund the projects. They have been very responsive and we have made good progress in laying the foundations for a number of important projects.

I do not believe that we can be successful in persuading our Allies to engage in more armaments cooperation with us if we cannot sustain the few efforts we have undertaken with them. I view continuation of the RAM and Penguin progams essential to the success of our armaments cooperation initiatives of the past year—and, moreover, to the long-term progress in NATO armaments cooperation that is such an important element in NATO's Conventional Defense Improvement effort.

Sincerely,

CAP.

---

THE SECRETARY OF DEFENSE,
*Washington, July 3, 1986.*

Hon. SAM NUNN,
*U.S. Senate,*
*Washington, DC 20510.*

DEAR SAM: I was dismayed to learn of the recommendation of the Committee on Armed Services to terminate the Navy's programs to develop the Rolling Airframe Missile (RAM) and to arm the LAMPS III helicopter with the Penguin anti-ship missile.

The military need for these systems is urgent. The Penguin will provide a new and extremely useful capability that cannot be provided by any other weapon, including Harpoon. We will separately provide you classified information that substantiates the requirement for Penguin.

Both the US Navy and the German Navy presently have ships in commission with no protection against anti-ship missiles. RAM promises to correct that unacceptable situation. RAM also provides significant firepower improvements to our ships with NATO Sea Sparrow self defense systems. CAP WEINBERGER.

---

THE SECRETARY OF DEFENSE,
*Washington, DC, July 3, 1986.*

Hon. LES ASPIN,
*Chairman, House Armed Services Committee, House of Representatives, Washington, DC.*

DEAR MR. CHAIRMAN: I was dismayed to learn that the Committee on Armed Services might recommend termination of the Navy's program to develop the Rolling Airframe Missile (RAM).

Both the US Navy and the German Navy presently have ships in commission with no protection against anti-ship missiles. RAM promises to correct that unacceptable situation. RAM also provides significant firepower improvements to our ships with NATO Sea Sparrow self defense systems. While the program has had its share of problems, recent efforts have borne fruit and the program is now on solid ground. A recent test firing was an unqualified success, and we believe that we have both the development cost and the production cost under control.

Aside from the military need for this weapon, the program is symbolic of our commitment to the principles set forth in Section 1103 of last year's Defense Authorization Act—the "Nunn Amendment" on NATO Cooperative Research and Development.

We have worked hard with our NATO Allies to implement the provisions of the Nunn Amendment and the related appropriation. This required asking the Allies to help fund the projects. They have been very responsive and we have made good progress in laying the foundations for a number of important projects.

I do not believe that we can be successful in persuading our Allies to engage in more armaments cooperation with us if we cannot sustain the few efforts we have undertaken with them. I view continuation of the RAM program essential to the success of our armaments cooperation initiatives of the past year—and, moreover, to the long-term progress in NATO armaments cooperation that is such an important element in NATO's Conventional Defense Improvement effort.

Sincerely,

CAP WEINBERGER.

The Honorable ——

Dear Mr. ——, Dear ——, I have been advised that the Senate Armed Services Seapower Subcommittee, and the House Armed Services R&D Subcommittee, have recently disapproved the research and development funding for the Rolling Airframe Missile Program (RAM). RAM is a joint U.S.-German program. Our two countries share equally in the development costs. The German Navy has an urgent requirement for this defensive weapon that would be able to counter the immediate missile threat facing our ships. For this reason the Federal Republic of Germany has already invested more than 300 million DM in the development of RAM and has helped the project overcome the difficult problems of recent years. We are of the opinion that the program has now moved to solid ground.

The actions of the subcommittees consequently have come as a surprise. I must believe that the fact has been overlooked that RAM is a cooperative international program. So that there can be no doubt, let me emphasize a termination of the program in this manner would constitute a serious setback for the armaments cooperation between our two countries. Such unilateral decisions without regard for the cooperating partner must lead to the impression in the Federal Republic that our influence in the program is restricted only to a financial contribution. The consequences would be devastating—setting aside the fact that I would be required to explain the U.S. withdrawal from RAM, and thus the failure of the program, to our Parliament. This would come after the Federal Republic of Germany has expended more than 300 million DM in development funds as almost exclusively been to the benefit of U.S. industry.

While I believe that the actions of the subcommittees are not final, this negative signal is already now having consequences for the public debate in the Federal Republic. Until now the U.S. Congress has been perceived as a proponent of Trans-Atlantic armaments cooperation. I, therefore, implore that you exercise your influence for a repeal of the actions of the subcommittee. I sincerely thank you for your efforts.

Yours truly,

MANFRED WORNER.

---

JUNE 6, 1986.

Adm. M.E. CHANG,

*Deputy Commander, Weapons Combat Systems Directorate, Naval Sea Systems Command, National Center Building 2, Jefferson Davis Highway, Arlington, VA*

DEAR ADMIRAL CHANG: On 11 June 1986. I attended meetings with various U.S. Government officials regarding the Navy's RAM program. I was informed that the RAM program budget decisions were being made at this time and the key factor for a favorable release of funding is the missile production unit cost. After a discussion with Tony Battista. I agreed to provide an estimate of missile production cost by 1 July 1986. I briefed Admiral Meinig on my meetings with Mr. Battista and other Government officials on 12 June.

At this time there is no official Navy request for production quantities, cost, and schedules. Therefore, I selected production quantities I believe would be useful and cost effective. These selected production quantities, built to the current General Dynamics' tested configuration and deliverable to the Navy assembly depot, are a first year quantity of 50 pilot proofing missiles and a second year buy of 500 missiles for initial production.

The 50 proofing missile unit cost is consistent with the FY'87 budget request for production start-up as we understand it. The 500 missile quantity unit cost will be in the $125,000 to $145,000 range. These costs are in constant 1986 dollars and includes the cost for Government furnished items, based on the current tested configuration.

Admiral, as you know, I have initiated a cost reduction study. To be effective, this cost reduction study will take an appreciable time, perhaps six to eight months. While I had planned to provide information on approximate cost of the missile unit quantities to Congress by 1 July, I have been overtaken by Congressional urgency and other events and this information will now be presented on Tuesday, 17 June.

I have scheduled a meeting with Admiral Meinig on Tuesday, 17 June, to review the entire cost, schedule, and production status.

Sincerely,

F.O. CHESUS.

---

JUNE 18, 1986.

Hon. LES ASPIN,

*Chairman, Committee on Armed Services, House of Representatives, Washington, DC.*

DEAR MR. CHAIRMAN, over the past several months, the Navy has informed Congress of the plan to restructure the Rolling Airframe Missile (RAM) program, cap development costs, and significantly reduce production unit cost.

As part of the continuing review of the RAM program, both development partners (the U.S. and Germany) have confirmed the urgent requirement for this high firepower, self-defense missile. No alternative has been identified which meets the current and projected threat in the time period RAM can be fielded and includes the attractive tactical feature of homing on energy generated by the target vice being dependent on a radio-frequency source from the firing ship.

The Navy's intention is to complete the development program with a capped, jointly funded (50/50 US/German) contract. The prime contractor has been informed of my limitations on the average missile unit production flyaway cost. If, after completion of the development program, the average unit flyaway cost for the first three years of full rate production exceeds $125K per unit (including GFE), the program will be terminated. These production unit costs will be contractor commitments expressed in yearly not-to-exceed prices.

We are fully committed to the RAM program. Your assistance in providing the required fiscal support is critical. Not only does this program support an urgent US and German requirement, but its continuation also bears directly on our credibility to embark on future cooperative development/production programs.

JAMES F. GOODRICH,
*Acting Secretary of the Navy.*

Mr. WILSON. Mr. President, the messages I have inserted in the RECORD, I think, are a testament to the importance that officials of both nations and officials of NATO attach to this program. It has not been without problems. I think our amendment sees to it that those problems will be dealt with adequately in terms of cost and performance.

Mr. President, I want to take a moment to commend my colleague, the distinguished ranking member of the committee, Senator NUNN. Last year, Senators will recall, Senator NUNN urged upon us an amendment that we very wisely adopted. It was one that went a long way toward improving the status of collaboration between the United States and our NATO allies. It developed a program for NATO cooperative research and development. That program proposed funding for collaborative weapons development with the NATO allies, and to date the responses have been excellent.

□ 2200

Progress has been more than encouraging and it is precisely because of the success of that program that the proposed termination of the RAM Missile Program has cast a shadow over this cooperative development program.

In short, our NATO allies are questioning our commitment to the cooperation enunciated under the Nunn amendment.

So in short, Mr. President, I feel that we have in this amendment cured the defects. The information that we sought was not available to the committee or to the subcommittee at the time of consideration.

Senator NUNN and I contacted Secretary Hicks, whose letter is included in those that I have inserted into the RECORD.

We have been given assurance by him and other sources that the problems with the program stand to be corrected, and again I will simply state that the importance of the program both in terms of its merit in responding to the need of our Navy and that of the German navy and its importance symbolic in terms of making good on a program that we initiated last year under the Nunn amendment argue very strongly for the adoption of this amendment so that we may get on with the RAM Program.

I believe my colleague, the distinguished chairman of the Subcommittee on Seapower has a comment to make, and I yield the floor to him at this time.

Mr. COHEN. Mr. President, I am going to recommend that we accept the amendment pending other Members coming to the floor perhaps voicing some concerns and objections.

But let me say that my acceptance and recommendation of acceptance is not without some reservation.

The reason the subcommittee originally took the position that we should cancel our participation in this particular missile system was generated by several things, most of all the budget.

Senator GOLDWATER has spoken many times during the past several days in the past week about what has happened to the size of the defense

budget which is now driving the kind of reductions we have been looking at.

This is one of the programs that fell out, and it fell out for several reasons. No. 1, the costs of this particular missile have gotten out of control.

There was no control on the NATO side and there was very little control on the U.S. side.

So in looking at systems that have to be reduced or canceled we look at those that are cost effective. This system has not been cost effective in its development.

Second, we have to look at its effectiveness as a war fighting piece of equipment, and here again the future in my judgment is not particularly promising.

This system is effective currently against about 75 percent of the Soviet force. That will be reduced in the coming year to perhaps 50 percent or less as the Soviets move to a different type of antiship missile system. So we are spending a great deal of money upon a system which is going to become rather if not obsolete at least reduced in its effectiveness against the Soviet threat.

It will still be effective against perhaps a Libyan threat or some other third world country. But in terms of combating the major systems to be produced by the Soviet Union, its effectiveness is going to be reduced in the future.

There is another dimension of this particular problem that is the one of NATO cooperation, and Senator NUNN certainly has been a leading voice in this regard along with Senator WILSON, and others.

But the message has to go forth to our NATO allies that it is not an endless pit of money in the United States that we are going to fund systems that are not properly managed in which the cost is out of control and may be of limited utility in the future.

In fact, the reliability of this particular system is no better than 50 percent to date. So, for these reasons the committee took the really serious action. We were not unaware of the political consequences. We are friends with our NATO partners. We want to have a two-way street. We want to show to them, yes, we want them to buy our systems. We are willing to buy theirs. We are willing to enter into joint programs. But we are not prepared to commit ourselves in the future indefinitely to systems that simply have gotten out of control in terms of their cost and are of marginal or reduced significance in defeating the enemy force in the future.

It is for these reasons we recommend cancellation of the system.

We have provoked a rather vigorous response, and I think there is some merit to that response in terms of the two-way street.

So I would reluctantly agree to the amendment offered by my friend from California with the kind of constraints that he has placed in his amendment.

We are going to start setting some limitations on how much can be spent on this particular system.

In fact, tomorrow morning I may want to review this issue again in terms of what contact we have had in communication with the German manufacturers in terms of what kind of cost constraints they can live with. But I am not satisfied at this point that we should simply give carte blanche on this particular system.

I think the Senator from California has offered an important restriction on the spending side, and for that reason I am going to recommend to our chairman that we accept the amendment subject to being revisited again tomorrow after we have had more contact with the German manufacturer.

The PRESIDING OFFICER. Is there further debate?

Mr. LUGAR. Mr. President, as a cosponsor of the Wilson-Nunn amendment, I would like to make a few points from the foreign policy perspective. In doing this, I do not wish to imply that we should proceed with the rolling airframe missile [RAM] solely for foreign policy reasons. RAM must meet a real military requirement and perform as it is supposed to. The Armed Services Committee is right to consider it against these criteria. However, we must also consider the foreign policy implications of our actions.

RAM has been a joint cooperative project between the United States and the Federal Republic of Germany. Denmark is also expected to have a small participation. Unlike most cooperative programs, RAM has been a joint project from the initial research and development stage right through procurement. Thus we may regard it as a bellwether of U.S./NATO cooperation. Furthermore, U.S. officials involved with the program all say that RAM has contributed significantly to our ability to manage multinational programs. While this sort of progress is difficult to measure, it is vital if we are to proceed with collaborative projects which will rationalize NATO's production base and make alliance forces more compatible.

This progress which we have achieved with the RAM project has not been without its costs. There have been delays, and the program has cost more than anticipated. At a time in which we must be so careful in spending, these are considerations which must weigh heavily in our decision. If these problems cannot be corrected, cancellation is an option we should consider.

However, the officials responsible for the program tell us that RAM has turned the corner, that the problems have been solved. If this is so, then we must consider the foreign policy implications of acting too hastily.

RAM has been a partnership. Our partners, the Germans, have suffered the same costs and delays we have. No doubt each side has sometimes wished that things had been done differently. Each side might have done those things differently if it had been alone. But neither was alone. Whether in business or interallied defense projects, each partner must consider the consequences of his actions for the other. We cannot simply cancel RAM and leave Germany holding the bag. Such an action would have repercussions throughout NATO. Other, and future cooperative efforts would be called into question. Surely our allies would think long and hard before taking us on as a partner again. In fact, they would probably seek more intra-European cooperation to the exclusion of U.S. industry.

If there is light at the end of the tunnel for RAM, it seems to me we should give it one more chance. This is not a chance to go along unnoticed for another year while costs and delays increase. The Wilson-Nunn amendment places strict conditions which must be met if RAM is to continue. Costs are capped for research and development and procurement, and RAM must perform as the original specifications called for. This is a responsible approach. Our Department of Defense and the German Ministry of Defense will know the conditions. So will United States and German contractors. There will be no alliance-damaging, precipitous cancellation, but there will be fair warning that RAM must perform. I believe that this is a situation which we can all live with, and one which our allies will understand and support. Therefore, I urge the Senate to adopt the amendment.

Mr. NUNN. Mr. President, I support the amendment of the Senator from California. I am a cosponsor of it.

I understand the committee's position. There were new facts that have come in since we took our position in the committee to cancel this program. This is of importance in Europe. It is a key in terms of overall cooperation in NATO. So I support the amendment.

Having said that, I must ask that we delay it for just a few moments. Hopefully maybe it can be set-aside temporarily.

I think the Senator from Virginia has a couple of amendments. The Senator from Nebraska who is a member of the committee has asked to come over before we vote on this particular amendment.

So I ask the Senator from California if he would be willing to temporarily lay this amendment aside with the hope that we can complete it as soon

as the Senator from Nebraska has taken a look at it.

Mr. WILSON. I am pleased to do so.

The PRESIDING OFFICER. Without objection, the amendment is temporarily set-aside.

The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the pending amendments be set-aside for the purpose of considering an amendment that has, as I understand, been cleared on both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2596

(Purpose: To require a report from the Secretary of Defense, in conjunction with other agencies, regarding the current efforts to educate youth of military personnel in schools operated by the Department of Defense concerning drug and substance abuse, and to further require that the Secretary report on the feasibility of schools from grades K through 12)

Mr. MURKOWSKI. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska [Mr. MURKOWSKI] proposes an amendment numbered 2596.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 228, between lines 17 and 18, insert the following new subsection:

(b) Drug Educational and Counseling Report: The Secretary of Defense, in consultation with the National Drug Enforcement Policy Board and the Department of Education, shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report, not later than December 1, 1986, discussing (i) the extent to which youth in schools operated by the Department of Defense for dependent members of the Armed Forces are receiving education on drug and substance abuse, (ii) the types of drug education programs that are currently being provided, (iii) whether additional drug education programs are needed, and (iv) the extent to which drug education programs for youth in grades K through 12 include or should include preventative peer counseling classes.

Redesignate subsection (b) as subsection (c).

Mr. MURKOWSKI. Mr. President, this has been cleared by both sides. The purpose of the amendment is to require a report from the Secretary of Defense in conjunction with other agencies regarding the current efforts to educate youth of military personnel in schools operated by the Department of Defense concerning drug and substance abuse and to further require that the Secretary report on the feasibility requiring drug prevention peer counseling to youth in such schools from grade K through grade 12.

Mr. President, my amendment requires the Department of Defense in conjunction with the Department of Education to report to Congress on the extent to which Department of Defense operated schools provide substance abuse education in kindergarten through 12th grade. It also requires an assessment of whether further programs are needed. This report augments section 1219 of the bill which requires the National Drug Enforcement Policy Board to report on the manner and extent to which the Department of Defense should be involved in drug enforcement activities. My amendment will give the Congress the opportunity to review the Department of Defense's role in both the supply and demand side of the drug equation.

The Department of Defense operates two separate dependent school programs—the Department of Defense Dependents Schools [DODDS] Program and section 6 schools. DODDS schools provide education to military students overseas and section 6 schools are located in the United States. There are 270 DODDS schools and 67 section 6 schools. Alabama, Georgia, Kentucky, Louisiana, New York, North Carolina, South Carolina, Virginia, and Puerto Rico all have DOD schools.

As President Reagan stated in announcing his new national crusade to eliminate the demand for drugs, the main thrust of our war against drugs is "to be to get the people themselves to turn off on it." My amendment will provide an important tool to assess whether the Department of Defense's programs are addressing the drug abuse issue to stop children before they become involved in drugs. The Department of Defense may also have model educational programs which can be applied to school districts across the country.

An additional requirement of my amendment will be to assess the need for peer counseling classes. As reported in the August 11 edition of Newsweek educators now believe that the focus of our prevention programs should be through peer and parental pressure to teach children that drug use is uncool. Research has shown that peer teaching and positive peer pressure are the most promising and effective approaches in drug use prevention today. These programs encourage children to think for themselves and say "no" to activities that might harm them. Through role playing and other activities children are able to cope more easily when they are pressured to try alcohol or drugs. They also have the support of their peers who are also participating in the activities.

Mr. President, my amendment will not cost money, and will serve to focus the attention of the Department of Defense on the drug education of the dependents of military personnel. I urge the floor managers and my colleagues to support my amendment.

Mr. President, I defer to the chairman of the Armed Services Committee and the majority and minority who I believe have cleared this.

Mr. GOLDWATER. Mr. President, we have looked at this amendment. We think it is a worthwhile amendment.

We will accept it on this side.

Mr. NUNN. Mr. President, I recommend that we approve the amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. MURKOWSKI. Mr. President, I ask the amendment be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment (No. 2596) was agreed to.

Mr. MURKOWSKI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MOYNIHAN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, is there an amendment pending?

The PRESIDING OFFICER. The Senator is correct, there is an amendment pending.

Mr. BYRD. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside that I may call up an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2597

(Purpose: To ensure a secure source of critical material and to ensure the survival of the ferroalloy industry)

Mr. BYRD. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD] proposes an amendment numbered 2597.

Mr. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 197, between lines 12 and 13, insert the following new section:

SEC. 1106. CONVERSION OF CHROMIUM AND MANGANESE ORE TO HIGH CARBON FERROCHROMIUM AND HIGH CARBON FERROMANGANESE.

(a) IN GENERAL.—During fiscal year 1987 and during each of the six succeeding fiscal years, the Administrator of General Services shall obtain bids from domestic producers of high carbon ferrochromimum and of high carbon ferromanganese and award contracts for the conversion of chromium and

manganese ores held in the National Defense Stockpile into high carbon ferrochromium and high carbon ferromanganese, respectively.

(b) STOCKPILE GOALS.—(1) Contracts awarded under subsection (a) shall provide for the addition of not less than 53,500 short tons of high carbon ferrochromium and 67,500 short tons of high carbon ferromanganese to the National Defense Stockpile in each of the fiscal years referred to in the preceding sentence.

(2) If, in any fiscal year referred to in subsection (a), the minimum quantity of high carbon ferrochromium or high carbon ferromanganese to be added to the National Defense Stockpile, as prescribed in paragraph (1), is not met, the quantity of such material to be added to such stockpile in the succeeding fiscal year shall be increased by the quantity of the deficiency.

(c) SEVEN-YEAR MINIMUM QUANTITIES.—The total quantities of carbon ferrochromium and high carbon ferromanganese in the National Defense Stockpile at the end of the seven fiscal years referred to in subsection (a) shall be as follows:

(1) Carbon ferrochromium, 374,000 short tons.

(2) High carbon ferromanganese, 472,000 short tons.

(d) In this section, the term "National Defense Stockpile" means the stockpile provided for in section 4 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98c).

Mr. BYRD. Mr. President, some of my colleagues may not be familiar with ferroalloys. These metals impart special qualities to steel and are absolutely essential to a modern society. They make steel corrosion and temperature resistant, and are essential to products as diverse as electronic components and jet engine parts.

In May 1984, the President turned down a petition brought by American ferroalloy producers under section 232 of the Trade Expansion Act, the national security provision of our trade law. Imports have taken over 60 percent of the U.S. market for ferroalloys and were putting American producers of these strategic materials out of business more and more.

The administration did take some action to help American ferroalloy producers survive—and it is only barebones survival at this point. The President said he would continue a program begun in 1982 to process chromium and manganese ores currently in the national strategic stockpile into high-carbon ferrochromium and high-carbon ferromanganese. In the Federal Register of May 21, 1984, the administration announced its commitment to a 10 year program of ore processing—8 years beyond the date of the announcement plus the 2 years during which the program had been in operation. This would keep two American ferrochrome and ferromanganese producers in business—just barely—over the duration of the program. In so doing, it would make a modest contribution to the survival of this vital industry here within our borders.

The administration has actually obligated the necessary funding and other support to the program in 3-year increments. After the expiration of the first 3-year segment, the administration recently obligated itself to keep the program alive for a second 3-year period. However, the companies involved are left with a strong impression that the administration's commitment to the program is fainthearted at best. It has been approving the program in fits and starts, and the future of the companies involved—and that of the people who work there—has been dangling from a string.

I believe the Congress should demonstrate its support for this program, and provide some predictability to this crucial industry.

The amendment I offer today requires the General Services Administration to seek bids from domestic ferroalloy producers to add to the national defense stockpile at least the 374,000 short tons of high-carbon ferrochromium and 472,000 short tons of high-carbon ferromanganese which it had promised to have processed in the May 1984 decision. This will involve continuing the program begun in 1982 for the full 7 years that remain of the 10-year commitment.

This is nothing beyond what the administration previously said it was committed to do. But a congressional mandate could make all the difference.

I urge support for the amendment by all my colleagues on both sides of the aisle.

Mr. GOLDWATER. Mr. President, I would like to ask a question. Does the United States produce a lot of that type steel?

Mr. BYRD. We are talking about ferroalloys and a great deal of these ores come from South Africa. And, of course, we can always fall back on the second producer, and that is the Soviet Union.

These are matters that are very vital. These are ores, these are ferroalloys, not only vital to the economy of this country, but they are vital to the national security of the country. We had three facilities in West Virginia. This is not a labor-intensive industry. I think that nationwide we probably have about 3,600 people left working across the Nation; in West Virginia, probably less than 600.

I am talking about something that is absolutely vital to the national security of this country.

I have never been able to understand why the administration would not listen to the pleas of those of us who have said time and time and time again—I said to the President one day down at the White House in the Cabinet Room, I told him about this situation and how these companies were going out of business all over the country, three small companies in my own State going on the rocks, and that if we get into a war, these ferroalloys are going to be absolutely necessary to our national defense.

If we do not have these ferroalloys, we cannot have jet engines, we cannot make the cannons, the tanks, the ships, and the guns. We cannot produce the steel for steel girders. We cannot produce the stainless steel for medical instruments.

I have been at a loss to understand why we let a vital industry of this kind perish on the vine. But perhaps if we can adopt this amendment, this will give these few remaining employees and these already anemic companies a little hope for the next 7 years, that they can continue operating.

Mr. GOLDWATER. Mr. President, having been chairman of the Stockpile Committee and having served on it for a long time, I recognize what the Senator from West Virginia is saying is absolutely true. One of the great fears that I have in the coming months is the threat to our stockpile at a time when we should have no threats to it.

This side has no objection to taking this amendment.

Mr. BYRD. I thank the distinguished manager.

The PRESIDING OFFICER. Is there further debate?

Mr. NUNN. Mr. President, I recommend we accept the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2597) was agreed to.

Mr. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GOLDWATER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, I thank both managers for their patience at this very late hour and for according me the courtesy of calling up this amendment at this hour and also for supporting it and accepting it.

Mr. NUNN. I thank the Senator from West Virginia.

The Senator from West Virginia and the majority leader I think would be interested in the progress we made today. I do not have an exact count of amendments, but I believe we have handled about 25 amendments, and a lot of it has happened in the last 3 or 4 hours. So we have gotten over the hurdle with two or three big matters and we have three or four other big matters that are going to come up, but we have time agreements tomorrow morning on three of those. So, with some luck, we are going to make an awful lot of progress between now and the end of the day tomorrow.

I would urge Senators who have amendments to come over early in the

morning and to work with us during the day to get time agreements on those amendments. There is even a possibility we can complete this bill, if we stay in very late, tomorrow night, or certainly by Friday.

I hope we can finish it tomorrow night.

Mr. BYRD. The distinguished majority leader is not on the floor, but I am sure he joins with me in complimenting the managers of the bill on the progress that has been made and also complimenting the Senators who have come to the floor and called up their amendments. I think the record of work that these two fine managers have done indicates that several amendments have been disposed of and progress has been made. I, too, hope that action can be completed on this bill shortly.

Mr. NUNN. Senators have been very cooperative, I would agree with the Senator from West Virginia, and I see no hint that there is anyone trying to delay this bill. I think everyone is acting in good faith. I think the amendments are being presented as rapidly as we can handle them. I see no prolonged debate. We may have to retract those words tomorrow, but I hope we can keep making progress.

Mr. GOLDWATER. I agree with my friend from Georgia. The progress we have made this afternoon and evening has been very remarkable. I just hope we can keep the Members on their toes tomorrow in offering amendments as the time comes up.

Mr. President, that will be the last vote as far as I am concerned.

□ 1120

AMENDMENT NO. 2595, AS MODIFIED

Mr. COHEN. Will the chairman yield? I believe we have yet to resolve the Wilson amendment. I think Senator EXON is still conferring with counsel on that issue. We should be able to resolve that momentarily.

Mr. WILSON addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Arizona yield the floor?

Mr. GOLDWATER. I do not have the floor. It is all yours.

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. I thank the distinguished manager.

Mr. President, while we are waiting, I want to modify the amendment at the desk to include at lines 7 and 8 of the third page, the following language: "On page 11, line 2, strike out $9,265,378,000 and insert in lieu thereof,"—and the figure that presently is in that amendment should be changed to read "$9,289,678,000," that figure representing the total Navy R&D figure.

The PRESIDING OFFICER. The Senator has the right to modify his amendment. The amendment is so modified.

The amendment (No. 2595), as modified, is as follows:

On page 4, line 11, strike out "$5,557,490,000" and insert in lieu thereof "5,597,490,000".

On page 6, between lines 12 and 13, insert the following new subsection:

(g) ROLLING AIRFRAME MISSILE PROGRAM.—(1) None of the funds appropriated pursuant to an authorization in this title may be obligated or expended in connection with procurement of the Rolling Airframe Missile program until the Secretary of Defense has certified in writing to the Committees on Armed Services of the Senate and the House of Representatives that—

(A) the total Navy research and development cost of the Rolling Airframe Missile program will not exceed $219,700,000; and

(B) the Secretary will terminate the program if at any time he determines that the total Navy research and development cost will exceed the amount specified in subparagraph (A); and

(C) the recurring missile unit flyaway cost for a minimum of 4,900 missiles will not exceed $100,000 per missile (using fiscal year 1986 dollars as the base year); and

(D) the design of the Rolling Airframe Missile and its unique support equipment are complete and that the system performance has not been degraded from the original development specifications (as contained in Navy Decision Coordinating Paper No. SO-167-AA); and

(E) the Director of Operational Test and Evaluation has approved a test and evaluation master plan for the Rolling Airframe Missile.

(2) If the Secretary of Defense fails to make the certification described in paragraph (1) by March 30, 1987, he shall cause the Rolling Airframe Missile program to be terminated effective on that date.

(3) Subsection (d) of section 205 of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 608), is repealed.

(4) Department of Defense reprogramming request 85-91PA is approved.

On page 11, line 2, strike out "$9,265,378,000" and insert in lieu thereof "$9,289,678,000".

Mr. NUNN. Mr. President, I say as cosponsor of this amendment to my friend and colleague from California, and to my colleague and friend from Maine, that I believe we should hold this amendment over until tomorrow. There are a couple of Senators who would like to think about it and have a chance to study it more. I think we would be better served to hold it until tomorrow.

Mr. WILSON. Mr. President, I have no desire to rush Senators who have questions. I am agreeable to laying this matter aside temporarily.

The PRESIDING OFFICER. Is there objection?

Mr. COHEN. Reserving the right to object, can I inquire as to what the order of procedure would be with respect to the consideration of this amendment tomorrow? As I understand it, there has been a unanimous-consent request that we deal with an amendment of the Senator from Arizona and following the completion of that, we have the amendment offered by the Senator from Oregon, Senator HATFIELD, followed by the amendment offered by the Senator from Arkansas. Is that correct?

The PRESIDING OFFICER. The consideration of the amendments tomorrow will be determined by whether cloture is invoked.

Mr. COHEN. Would it be in order to ask unanimous consent that this matter be considered at the conclusion of the disposition of the matter by the Senator from Arkansas, Senator PRYOR?

The PRESIDING OFFICER. That would automatically occur.

Mr. NUNN. Parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. NUNN. What time is the cloture vote based on the current schedule?

The PRESIDING OFFICER. The cloture vote will occur 1 hour after the Senate convenes following a live quorum.

Mr. NUNN. What will be the fate of this bill should cloture be invoked?

The PRESIDING OFFICER. All of the amendments which are nongermane that are pending will fall. Only germane amendments will be subject to be called up.

Mr. NUNN. Parliamentary inquiry, Mr. President. It is my understanding that the cloture vote was not on the bill but rather on an amendment dealing with South Africa.

The PRESIDING OFFICER. Amendments which are not germane to the bill or the Byrd amendment will fall.

Mr. NUNN. Further parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. NUNN. As I understand what the Chair is saying, if cloture is invoked on the Byrd, South Africa amendment, then amendments that are not germane to that amendment and amendments that are not germane to the bill will fall.

The PRESIDING OFFICER. The Senator is correct.

Mr. NUNN. So the effect of the cloture if it is invoked on that amendment would have the same effect as if cloture were invoked on the bill itself as far as amendments to the bill?

The PRESIDING OFFICER. For the duration of the time on the Byrd amendment, that is correct.

Mr. NUNN. Further parlimentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. NUNN. After the Byrd amendment has been disposed of if cloture is invoked tomorrow then we would return to the regular order on the bill,

and germaneness would not apply to amendments at that stage to the bill.

The PRESIDING OFFICER. The Senator is correct.

Mr. NUNN. I thank the Chair.

Mr. President, I would certainly hope based on the time agreements we have in the morning and the chances of considerable progress that we would be able to postpone that cloture vote, but that, of course, is not my call. But we could get considerable progress on this bill on major amendments in the first 2 hours tomorrow morning. It would help us see the daylight at the end of the tunnel as far as the bill itself is concerned.

## ROUTINE MORNING BUSINESS

Mr. COHEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine.

Mr. COHEN. I ask unanimous consent that we go into morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MESSAGES FROM THE HOUSE

ENROLLED BILLS SIGNED

At 10:18 a.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bills:

H.R. 1740. An act to direct the Secretary of the Interior to release a reversionary interest in certain lands in Orange County, Florida which were previously conveyed to Orange County, Florida; and

H.R. 1795. An act to exempt certain lands in the State of Mississippi from a restriction set forth in the Act of April 21, 1806.

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

---

At 11:20 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the amendment of the Senate numbered 1 to the bill [H.R. 2478] to amend the Revised Organic Act of the Virgin Islands, to amend the Covenant to Establish a Commonwealth of the Northern Mariana Islands, to amend the Organic Act of Guam, to provide for the governance of the insular areas of the United States, and for other purposes; it agrees to the amendments of the amendments of the Senate numbered 2 and 4 of the bill, each with an amendment in which it requests the concurrence of the Senate; and insists upon its disagreement to the amendment of the Senate numbered 3 to the bill.

---

At 3:17 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that having proceeded to reconsider the bill [H.R. 1562] entitled "An Act to achieve the objectives of the Multi-Fiber Arrangement and to promote the economic recovery of the United States textile and apparel industry and its workers", returned by the President of the United States with his objections, to the House of Representatives, in which it originated, it was:

*Resolved*, That the said bill do not pass, two-thirds of the House of Representatives not agreeing to pass the same.

The message also announced that the House agrees to the amendment of the Senate to the bill [H.R. 4184] to authorize appropriations to the National Science Foundation for the fiscal year 1987, and for other purposes.

The message further announced that the House disagrees to the amendment of the Senate to the bill [H.R. 4151] to provide enhanced diplomatic security and combat international terrorism, and for other purposes; it asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and that the following are appointed as conferees for consideration of all matters: Mr. FASCELL, Mr. YATRON, Mr. MICA, Mr. KOSTMAYER, Mr. SMITH of Florida, Mr. WEISS, Mr. MACKAY, Mr. BROOMFIELD, Mr. GILMAN, Ms. SNOWE, Mr. MACK, and Mr. MCCAIN.

Appointed as additional conferees, for consideration of title IX of the House bill and modifications thereof committed to conference: Mr. JONES of North Carolina, Mr. BIAGGI, Mr. STUDDS, Mr. DAVIS, and Mr. SNYDER.

Appointed as additional conferees, for consideration of titles III, VIII, XI, and section 603 of the House bill and modifications thereof committed to conference: Mr. ASPIN, Mr. PRICE, and Mr. DICKINSON.

Appointed as additional conferees, for consideration of sections 702, 703, 711, 713, and 714 of the Senate amendment, and modifications thereof committed to conference: Mr. RODINO, Mr. HUGHES, Mr. EDWARDS of California, Mr. CONYERS, Mr. MCCOLLUM, Mr. LUNGREN, and Mr. GEKAS.

Appointed as additional conferees, for consideration of title III and title VIII of the House bill and modifications thereof committed to conference: Mr. FORD of Michigan, Mrs. SCHROEDER, Ms. OAKAR, Mr. HORTON, and Mr. YOUNG of Alaska.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 5047. An Act to amend title 38, United States Code, to eliminate gender-based language distinctions in title 38, United States Code, and to make technical corrections in that title;

H.R. 5288. An Act to provide emergency assistance to farmers and ranchers adversely affected by natural disasters in 1986; and

H.R. 5299. An Act to amend title 38, United States Code, to provide a 2.0 percent increase in the rates of compensation and of dependency and indemnity compensation (DIC) paid by the Veterans' Administration, and for other purposes.

## MEASURES REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 5047. An act to amend title 38, United States Code, to eliminate gender-based language distinctions in title 38, United States Code, and to make technical corrections in that title; to the Committee on Veterans' Affairs.

## MEASURES PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 5299. An act to amend title 38, United States Code, to provide a 2.0 percent increase in the rates of compensation and of dependency and indemnity compensation (DIC) paid by the Veterans' Administration, and for other purposes.

## MEASURE READ THE FIRST TIME

The following bill was read the first time:

H.R. 5288. An act to provide emergency assistance to farmers and ranchers adversely affected by natural disasters in 1986;

## ENROLLED BILL AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on August 5, 1987, she had presented to the President of the United States the following enrolled bill and joint resolution:

S. 1073. An act to amend the Stevenson-Wydler Technology Innovation Act of 1980 for the purpose of improving the availability of Japanese science and engineering literature in the United States; and

S.J. Res. 371. Joint resolution to designate August 1, 1986, as "Helsinki Human Rights Day".

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LUGAR, from the Committee on Foreign Relations, with an amendment in the nature of a substitute:

S. 2701: A bill to provide a comprehensive policy for the United States in opposition to the system of apartheid in South Africa, and for other purposes (Rept. No. 99-370).

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. 306: A bill for the relief of Shyh-Fann Tyan-Norem and Bin-Ti Yao Tyan-Norem (Rept. No. 99-371).

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment:

S. 330: A bill for the relief of Bhaskarbhai S. Patel (Rept. No. 99-372).

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. 363: A bill for the relief of Mary Patricia McLaughlin (Rept. No. 99-373).

S. 527: A bill for the relief of Pravinchandra and Kamala Bhuva (Rept. No. 99-374).

S. 773: A bill for the relief of Doctor Oscar Raul Espinoza Madariaga, his wife, Maria Inez, his son Felipe Andres, and daughter Claudia Paola (Rept. No. 99-375).

S. 1708: A bill for the relief of Fernando Esquivel, Marcos Antonio Esquivel, and Nieves Julio Esquivel (Rept. No. 99-376).
